We have heard a lot of talk about studies today. Those who oppose the Volker amendment said, well, we ought not to do that because it needed more study by the Department. But I would point out that the National Dairy Policy Commission spent 18 months looking into this and into other features of the dairy program, and they concluded that the high make allowance in California had encouraged construction of excessive manufacturing capacity and increased Federal purchases, and they declared, "Federal policy should prohibit California or any other State from using a greater allowance for manufacturing."

Mr. Chairman, I would suggest to Members this may sound like a complicated matter. Often all of these matters sound far more complicated than they are. But the fact is very simple: California is being allowed a special deal, they pay their processors more, the processors are encouraged to produce more and sell it directly to the Government. They do not sell to the market in the case of butter, because we have a glut, and that means our taxpayers all over the country pay the bill.

Mr. Chairman, if we are going to have a national program, it ought to be applied uniformly, to every State, no matter how large. So I would simply ask Members to support the amendment, which is supported by a wide variety of people on both sides of the aisle, to restore equity to the farmers of the country and to the taxpayers, and to discourage the surplus production, which most assuredly will occur if we allow the California make accounts to continue.

Mr. BROWN of California. Mr. Chairman, I rise reluctantly in opposition to the amendment.

I will not belabor the subject. There are other Members from California more knowledgeable than I who may wish to speak on the subject.

Mr. Chairman, it is possible to create economic arguments both for and against the California make-allowance. For one thing, California is a State in which there are higher cost elements, and we recognize this in many areas of Government policy. For example, we allow higher FHA loans on houses, and we are shortly going to be paying Federal Civil Service employees more money for working in these high cost areas.

Mr. Chairman, you can make the same identical argument for allowing a higher make allowance for the manufacturing of dairy products. A part of the reason that we have strong objections from representatives of States such as Wisconsin and Minnesota is that for years they have had the preponderant part of the national market for products manufactured from milk, and they do not like to lose it. They resent the fact that California is adding manufacturing capability.

Mr. Chairman, I do not want to probe these economic arguments too far, because I am sure that you can find an economist who will come down on either side of this question. What the bill provides, after considerable discussion in the committee, is a provision for a 1-year study and recommendation by the Department of Agriculture as to whether we should or should not continue with the California make-allowance. I think that is the best way to approach it.

Mr. Chairman, I frankly do not know how to evaluate all of the arguments. I think it requires the best kinds of scientific and economic analysis that we can make, and then I think we ought to abide by the results of such an analysis.

Mr. Chairman, one may say that some of those studies have already been made and that they recommend that we end the California make-allowance. I am not at all convinced that that is what a study done in today's climate would recommend, but I am willing to abide by whatever the results of the study provided for in the legislation will result in. I think the committee acted wisely and prudently, and gave full weight to the views of the Department of Agriculture. I would like to recommend that we stay with the committee position.

Mr. WALSH. Mr. Chairman, I rise in favor of the amendment.

Mr. Chairman, as a member of the Subcommittee on Livestock, Dairy, and Poultry, we traveled all over the country, California included, North Carolina, New York, Minnesota, Florida, and the process was to try to develop a national dairy policy, one in which all regions would be treated equally. We struggled, might I add, to do that. I think in most cases this bill arrives at a national dairy policy.

□ 1620

However, under the existing law, California established the make-allowance, perfectly legal.

However, given the mandate of the farmers of this country to provide a national dairy policy and to try to ignore regional differences and make it fair, the support price that the Government pays for commodity purchases, $10.10, should be provided to all farmers. Under this law, California producers, California farmers receive less and the processors receive more.

What this does is it affects not only California, but it affects the farmers in the Northeast, in the Midwest, and in the South. The make-allowance artificially inflates the surplus level. The surplus level or trigger is used or has been used the past 5 years to reduce the support price of milk. So the trigger should accurately reflect what the surplus is.

The surplus is artificially inflated by the use of this California make-allowance and, therefore, all farmers, not only the farmers in California, are receiving less of a pay price. That is farmers all across the country, but this is especially devastating for the smaller farms in the Northeast.

The argument that the cost of production in California is the highest in the Nation has been refuted, and that was the reason that this make-allowance was initially instituted, to provide self-sufficiency in California where it was presumed it cost more to produce dairy products. A 1989 Cornell University study indicated that the Northeast manufacturers had the highest cost, not California, and the Midwest was even higher. California fell somewhere in the middle.

The National Dairy Commission compiled an 18-month study after the 1985 farm bill. That study stated that the California make-allowance encouraged construction of excessive manufacturing capacity and increased Federal purchases of dairy products in California. They further state that any further program adversely affecting the national dairy program should be eliminated. Clearly this adversely affects the national dairy program.

This is not an anti-California bill. I do not think that point can or should be made. This bill, in fact, will help farmers in California.

For all of those reasons I would urge support of the amendment.

Mr. BOEHLERT. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, as I rise in support of the Obey-Boehlert amendment I am mindful that tonight is the night for the annual congressional baseball game. I would suggest that one does not have to go to the stadium to see some real hardball being played. It is being played right here and now. It is the big guys, California, against the rest of us.

Mr. Chairman, this amendment simply levels the playing field throughout the United States for milk processors. If this amendment is approved, milk processors in California will no longer be able to withhold part of the support price that they receive from milk sold to the CCC—from their farmers. No longer will it be more profitable for processors to build plants in California rather than any other part of the country because processors in California ultimately get to keep more of the amount paid by the CCC for milk than processors in any other State. Why should the Federal Government be subsidizing milk processors in California? Why should the Federal Government be encouraging the milk processing industry to move operations to California? Why should the dairy farmers in California be denied portions of their income to the benefit of their processors?

Let me explain how it works to the detriment of the rest of the country. In the rest of the United States, through Federal milk orders, the blend price is the minimum price that must be paid to milk producers. In California, final product prices are computed as a residual in marketing transactions. The California make-allowance determines the minimum price its producers are paid for milk used for manufacturing purposes and ensures that the minimum price—class 4A—will be below the Federal minimum price. Because the CCC purchase price for butter, cheese, and nonfat dry milk is identical in all parts of the Nation, this practice provides a subsidy to California processors by allowing them to purchase milk used in the production of dairy products at a cheaper price than must be paid by other processors in other States.

In essence, the Federal Government, through CCC purchase is subsidizing the processors of California. Processors in California are getting a better break than processors in the rest of the United States. California officials will try to tell you that it costs 20 to 30 percent more to process milk in California than anywhere else, but a 1989 study by Cornell University showed that processing costs more in the Northeast and that California is in the middle of the pack. California officials want you to spend money to study the issue—a waste of taxpayers money. Everyone knows a study will do nothing more than confirm what we already know. Furthermore, by giving California processors a break, we are encouraging more processors to move operations to California, for processors to build new plants in California, at a time when California is the root of our national problem of dairy overproduction. We don't need more milk production from California—we need less.

California officials will also try to tell you that if we take away the California make-allowance, and their farmers get the price they are supposed to for the milk sold to the CCC, we will encourage the farmers to overproduce more. Quite the contrary. The reason California farmers are overproducing is that they are not getting the price they are supposed to for their milk, and in order to cover their cost of production, they are forced to produce more to make up for the loss of revenue going into processors' pockets. If we give farmers what they are supposed to receive for their existing production, there won't be the pressure to increase production to make ends meet. That is the vicious cycle that contributes so much to the costly surplus, and when we are talking about contributions to the costly surplus, California is clearly No. 1.

California officials are quick to try to lay the blame for overproduction on Minnesota-Wisconsin by comparing what California sells to the CCC to that of M&W. But in order to get a true picture, one would have to also compare the total production of M&W to that of California on a nationwide milk product basis. Such a comparision would show that on a percentage basis, California beats everyone else hands down. It is also worthy to note that California is trying to get you to accept a comparison between their State sales to CCC compared to sales of two States to the CCC. A clever smoke and mirrors analysis.

I'm confident you will agree that all U.S. milk producers should be treated equally under Federal laws that compel a Government agency [CCC],

to purchase excess dairy products under the price support program. Why should farmers in California be getting less of the support price for their milk than farmers in any other State? Why should California milk processors be feathering their nest with the money that is being kept from their farmers? Why should the Federal Government be encouraging the milk processing industry to move operations to California?

We don't need a study of this problem. It is as plain as day to see. For too long this little goody has been hidden from public disclosure. Lets expose it for what it is—a scheme to benefit California processors at farmers and taxpayer expense. I urge everyone to vote to level the playing field. That is all our farmers ask of us.

Mr. BROWN of California. Mr. Chairman, will the gentleman yield?

Mr. BOEHLERT. I am delighted to yield to the gentleman from Califonia.

(On request of Mr. BROWN of California and by unanimous consent Mr. BOEHLERT was allowed to proceed for 1 additional minute.)

Mr. BROWN of California. Mr. Chairman, it is unfortunate that this amendment is being offered by two of my most respected friends. I do have some questions with the statistics the gentleman is using and the economic logic that he is following. Even given the fact that California dairy producers receive a lesser amount than they would if it were not for the higher make-allowance, California dairies are still the most profitable in the United States. And one of the reasons that they produce a great deal is because they make a profit on it, and they also want to have the colocated manufacturing capability that New York, Wisconsin, and Minnesota have had for some many years.

Mr. BOEHLERT. Reclaiming my time, I would point out that the production costs in California are considerably lower.

Mr. OBEY. Mr. Chairman, will the gentleman yield?

Mr. BOEHLERT. I am glad to yield to my distinguished coauthor.

Mr. OBEY. Mr. Chairman, I would simply say that I am delighted to hear that the California farmers are profitable. But I do not see why a part of that profit ought to come at the expense of the taxpayers because they are selling an inordinate amount of butter directly to the Commodity Credit Corporation because of the artificial incentive created by the California make-allowance.

Mr. BOEHLERT. That is a very good point, and I am glad to endorse it very strongly.

Mr. PASHAYAN. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

Mr. Chairman, I rise in strong opposition to the amendment. I have long been aware that certain dairy interests outside the State of California object to California's dairy program. But many of those do not understand the program.

□ 1630

California's State Code has existed since 1972. Dairymen there developed in the very early 1970's a special milk-pooling program for fluid milk, and its pricing mechanism necessarily contains an element of the Federal pricing structure.

The amendment before us now is not unlike its predecessor that was included in the original draft of the dairy title. That provision, section 103, would order the Secretary of Agriculture to prohibit any State from using or establishing an allowance for the manufacturing of butter, nonfat dry milk, and cheese, at a price greater than the price that is established by the Federal Government.

Although written in generic language it is painfully obvious section 103 and the amendment now before us affects only one State: California. California has unique costs for manufacturing butter, nonfat dry milk, and cheese. That difference can be as much as $13 per hundredweight. For example, it will cost a California processor $20 a hundredweight to manufacture cheese, while a processor in the upper Midwest will have a cost closer to $7.50 per hundredweight. This current amendment, like its predecessor, section 103, does not recognize these differences in cost.

I am fearful that should this amendment be accepted its impact will be just the opposite that which its proponents claim. Dairymen in California will respond to this: They will produce more milk, most of which will be converted into butter, powdered milk, and cheese. And the Federal Government will wind up having to purchase it.

Thus, I must urge care in developing a more level playing field. The Committee on Agriculture has proposed a sensible method of evaluating the differences of opinion that are developed. Section 403, the milk marketing margin study, of H.R. 3950, sets the proper parameters.

Mr. CONDIT. Mr. Chairman, I move to strike the requisite number of words, and I rise to speak against the amendment.

Mr. Chairman, I must rise and respectfully request my colleagues to vote against this amendment. The make-allowance in California has been in existence since the 1930's and was revised somewhat in 1979. It has been around for a long time. There has been some reference that we are the only State that has a make-allowance. Other States have the option to incorporate the make-allowance if they would like to do so.

This is a State's rights issue. We believe that the language in the existing bill is appropriate. It requires USDA to study this issue, and actually provides the Secretary with the authority to prohibit States from establishing a make-allowance in the event that specified factors exist. This allows time for us to review this and see whether or not there should be some changes.

It has been mentioned that there has been an 18-month study. Well, let me tell you the 18-month study was not a study that was designed to look at the make-allowance. The purpose of the Commission's study was to look at other areas and, incidentally, they looked at the make-allowance. The Commission members were dairy producers, and no representatives of processers participated.

It also is a fact that the CBO has indicated that if we eliminate the make-allowance in California, it will cost the Federal Government $51 billion. The dairy industry estimates the cost to the taxpayers to be as high as $160 billion. The make-allowance for California has worked and it has worked very well at absolutely no cost to the Federal Government.

Instead of looking at it in the negative, maybe we ought to look at it in the positive and some other States ought to be considering establishing their own make-allowance.

I suggest, as the subcommittee chairman said on the last amendment, this is too much, too fast, too quick. Let us take a look at it. We are willing to work with you. If it needs to be fixed or changed, we will consider that, we will look at that. But the language as passed by the Committee is the way to do it, through a comprehensive look and study.

I would ask my colleagues to vote against the amendment.

Mr. OBEY. Mr. Chairman, will the gentleman yield?

Mr. CONDIT. I yield to the gentleman from Wisconsin [Mr. OBEY].

Mr. OBEY. I thank the gentleman for yielding.

Mr. Chairman, the gentleman indicated this is a State's rights issue. How is this anything other than the right of the State to force the rest of the country to pay for a special privilege and special deal for that State? Why should we acquiesce in the quaint idea of State's rights which allows a State a permanent draw on the Federal Treasury?

Mr. CONDIT. This is a State quasi-marketing order. The State has put this in action. It operates at no cost to the Federal Government. It will, however, cost the Federal Government if you take away the make-allowance. That is the report from the CBO.

We think it makes good sense for the States to have a make-allowance. If a study will indicate otherwise, we will look at that.

Mr. GUNDERSON. Mr. Chairman, will the gentleman yield?

Mr. CONDIT. I yield to the gentleman from Wisconsin.

Mr. GUNDERSON. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, the gentleman said this does not cost the Treasury. The reason so many people feel strongly about this is the fact that California has 12 percent of the Nation's dairy production but they account for 24 percent of the CCC purchases. Now, that costs us money. If we have an $800 million program, that means California costs $200 million of that.

Mr. CONDIT. That is 24 precent; 76 percent of the purchases for the CCC comes from somewhere else.

Mr. GUNDERSON. That is right.

Mr. CONDIT. I think that Wisconsin and Minnesota sold 55 percent more to the CCC than their share of the U.S. production.

Mr. GUNDERSON. No. I appreciate the gentleman bringing that point up. The fact is Wisconsin has 17 percent of the production of milk in this country. We have only 12 percent of the sales to the CCC. So we have less a percentage of sales to the CCC then we do of overall production. California has just the opposite.

Mr. CONDIT. My records show for the past 7 years it is 55 percent.

Mr. GILMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the Obey-Boehlert amendment eliminating the California make-allowance, thereby treating all of our dairy farmers equally.

Mr. Chairman, I am confident that most of us here today recognize the need for this important amendment which treats all U.S. dairy producers fairly and equally under Federal law. Currently the Federal Government subsidizes the operation of milk processing plants at capacity in the State of California, at a time when we are already in an excess situation.

In fact, in California, milk producers are ensured that the minimum price paid to their milk producers for manufacturing purposes are well below the Federal minimum price. Because CCC purchases for dairy products are identical in all parts of the Nation, this practice by California provides a subsidy to its processors by enabling them to purchase milk used in the production of dairy commodities at a cheaper price than must be paid by other processors throughout the Nation.

Mr. Chairman, why should the Federal Government be subsidizing milk processors in California, thereby encouraging milk processors to relocate in California.

This unwarranted, inequitable policy should be stopped. It is depriving the California producer from receiving the support price for their milk. It is encouraging overproduction. Let us make certain that all dairy producers in our Nation will be treated equally and fairly under our national dairy policy.

Accordingly, I urge my colleagues to vote for the important amendment for dairy fairness and at the same time to reduce dairy program costs.

Mr. BOEHLERT. Mr. Chairman, will the gentleman yield?

Mr. GILMAN. I yield to the gentleman from New York, who has been a leader in this battle.

Mr. BOEHLERT. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, one of the previous speakers, not surprisingly a speaker from California, suggested that processing costs more in California. However, a 1989 study by Cornell University showed the processing costs more in the Northeast than any place else in the country and California is really in the middle of the pack.

Second, I point out that our next speaker, my distinguished colleague from California, and a number of his colleagues sent out a "dear colleague" letter which said, among other things, "For the purposes of the Commodity Credit Corporation purchase prices, the manufacturing allowance is uniform nationwide. The CCC purchases California products at the same price at which it purchases Minnesota and Wisconsin products."

Now, that is true, but what it does not tell is the rest of the story. The processors keep part of the extra money. The farmers do not get it. Therefore, the processors have a competitive advantage over the processors in the other 49 States.

The way I look at it, that just "ain't" fair.

Mr. GILMAN. I thank the gentleman for his very cogent argument.

□ 1640

Mr. HERGER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the California make-allowance operates at no additional cost to the Federal Government. Its elimination would likely stimulate overproduction of milk, and would result in an estimated increase of 1.6 billion pounds in purchases made by the Federal Commodity Credit Corporation. The Congressional Budget Office estimates that this would cost $51 million over the life of the farm bill, while the industry estimates the cost would total as much as $165 million. Also, elimination of the make-allowance could actually raise consumer prices for dairy products in my State of California.

I believe that the language that was adopted by the Agriculture Committee is a fair compromise on this issue. It requires that Secretary of Agriculture to examine the manufacturing allowance system, and actually provides him with the authority to prohibit States from establishing separate allowances if it is so determined that it is not justified based on costs.

California has utilized a separate dairy policy tailored to its own unique conditions and high costs since 1935. California processors have a different make-allowance because of labor, capitalization, and energy costs which are substantially higher than the national average. The Federal Pricing and Marketing System alone has not been appropriate for California. Most producers and processors support the separate make-allowance policy because they believe it is in the best interests of the industry and consumers alike.

As such, I strongly urge my colleagues to reject this amendment and support the compromise currently contained in this legislation.

Mr. FAZIO. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I sense that this debate between the Minnesota and Wisconsin and New York State delegations rural Members and the California delegation rural Members should come to a close. Perhaps our friends who have been listening have grown tired of the repetition, and I suppose we can all engage in it only because we have made note of the case and there is not much more to say.

However, I think for those Members from other parts of the Nation who have not really got, at this point, a great deal on the line here, who do not fully appreciate the intricacies of the make allowance or the manufacturer's allowance, it might be important just to underscore a couple of things. One, the law has traditionally allowed the States to develop their own program. It just happens that, at this point, California is the one State that has chosen to do so, but others can as long as they, as California does, operate at no expense to the Federal taxpayer. It is important to point out that we would add to the Federal deficit if we eliminate the California program, from $10 to $40 million a year. That is additional expenditure out of the CCC. That is additional deficit, no matter how we look at it. We would end up costing the taxpayers of this Nation more money if we eliminate the California program.

Therefore, I would hope that my friends from the other 46 States would, perhaps in their own constituents' interest, that they ought not to raise milk prices in California, and their own tax costs or deviate from some other needs that we may want to meet in their States by refusing to add

additional burdens to the Federal budget.

This is a program that has worked well for California, and I believe is not in any way violating the overall benefits that the CCC was created to make. We are, in fact, in California, providing far less additional protection to the CCC than those people from Minnesota and Wisconsin who over the last 7 years have sold 55 percent more to the CCC than their share of production. I really believe this is an area that ought to be left alone, at least until the study that the committee has authorized is completed.

I think the work that was done in the committee, as is the case with all of these amendments that have been brought to the floor, should be confirmed. Let Members stick with the committee.

Mr. WEBER. Mr. Chairman, will the gentleman yield?

Mr. FAZIO. I yield to the gentleman from Minnesota.

Mr. WEBER. Mr. Chairman, I am just interested in one point three gentleman made, which is that every State has this option available to them, which may be legally correct. However, the gentleman is a student of agricultural policy. Would the gentleman stand there and tell me honestly that he thinks we could conduct dairy policy as we have been conducting it in this country, if every dairy producing State had the California State plan?

Mr. FAZIO. I think every State could develop its own policy. Some may want to operate on a regional basis. I think that is feasible that the States were willing to make that kind of State expenditure to make the program work. We certainly would welcome it.

Mr. WEBER. Mr. Chairman, if the gentleman would yield further, the gentleman does not believe we would cause any imbalances in the overall dairy supply and demand situation in this country, if Minnesota, Wisconsin, the Southeastern producing States, New York, all had the California policy, all were subsidizing their processing?

Mr. FAZIO. I would not be able to guess. I assume at some point the marketplace would come into play, and so would the budgetary process. However, at this point I would not want to hazard a guess, if that kind of diversity broke out. I would be willing to experiment.

Mr. THOMAS of California. Mr. Chairman, I move to strike the requisite number of words.

When I was younger and I went to the supermarket, we used to look at the butter, and it was Land o' Lakes butter. When we looked at cheese, it was made in Wisconsin cheese. I think every Member here understand what is going on. That is, the traditional surplus area of the Nation is beginning to feel a little bit of competition. I understand that.

The first time I went to Chicago, I went up in the Sears Building, and it was a clear day, and they told me to look north, and I could see Wisconsin, and look south, and I could see Indiana. I understood then why Minnesota and Wisconsin produced as much dairy products as they did. Certainly they did not consume it in their own State. They were able to market it over a very broad multistate area.

This has been the traditional pattern for Minnesota and Wisconsin. In addition, selling enormous surpluses to CCC over the years. California was an island. It is now 30 million people, but back in the 1930's when the State of California very wisely constructed a milk law which made sure we evened out the surpluses and the deficit periods, and we had amilk for ice cream and for cheese, California was an island. Most of the discussion today is focused on the fact that Minnesota, really, although they have not said it, Minnesota and Wisconsin feels threatened in its traditional areas. California is growing and changing. We used to have the highest production costs. We used to have the highest producer costs. Perhaps we do not anymore, as twice has been mentioned, a Cornell study. The point is, the world is changing in the area of dairy. What we need to do is reexamine the role of California, reexamine the role of Minnesota, reexamine the role of Wisconsin as the price setters for the Nation. But that does not mean that the first thing we do is strike a self-imposed structure that California has had for 50 years, and it has worked.

What we do is examine the changing relationship, and what I would ask people to do is to decide, perhaps the study is the appropriate way to look at this problem, see to what extend California now is overproducing, to what extent is it infringing on the traditional markets of Minnesota and Wisconsin, and to what extent is Minnesota and Wisconsin producing for surplus, and to what extent is California producing for surplus, and let Members talk about the new world that is emerging. But I do think the proper approach is to stand up and tell California a process that has worked for 50 years is going to be struck, because your producers are not getting enough money.

Let me say it will create overproduction in California. Any person who knows the dairy business knows it is a family operation. The son wants his own dairy. We have 700-cow diaries in California, but they are family operations. We give the producer more money, that older son, the second oldest son is going to be out and become a diaryman, and we will have that surplus product. There will be more products sold to CCC, and it will cost the taxpayers money. Please let Members not use the one-sided argument that California is in excess and it is a burden to the taxpayers. Minnesota and Wisconsin are in excess and they are a burden to the taxpayers. However, we do not solve the problem by striking a reasonable, equitable, fair State law that has worked for the island of California for 50 years, because Minnesota and Wisconsin feels that it product on the supermarket shelf is being pushed a little bit. I think that is a drastic solution. Why not take a look a the study, take a look a the changing world, and talk about reasonable modification, really, for the taxpayer and the consumer instead of for one region's traditional benefit that feels threatened.

Mr. STENHOLM. Mr. Chairman, I move to strike the requisite number of words.

Once again as chairman of the Subcommittee on Livestock, Dairy, and Poultry, and having presided over this discussion for the last year and a half, I must reluctantly come, again today for the second time, and ask that the amendment as offered be opposed and the committee position be supported.

□ 1650

I believe the wisdom of our position will, in fact, be shown when we closely examine what we are suggesting by opposing this amendment. First, I make no bones about it, there has been a lot of study of this question, and we have heard it aired thoroughly and very accurately today, including the fact that the National Commission on Dairy Policy has recommended that all milk producers should be treated equally under price support programs.

Federal law should prohibit any State from using greater make allowance to establish a price for Grade A milk used in manufacturing dairy products.

That was recommended by the Diary Commission, a group of dairy farmers from all diary producing States.

That was persuasive to me early in this debate. But it seems that now we have also agreed that there are other issues that need to be studied, not the least of which is the multiple basing points, the Minnesota-Wisconsin price series, and the reconstituted milk question, all of which will be studied in a separate study on Federal milk market orders, which has a bearing on the first stage of the national dairy policy that we are in fact implementing with this floor action today.

It seems to me—I do not hesitate to recommend this to the full committee—that we should stay with the committee position today. The committee position basically is that the Secretary of Agriculture, through the Agricultural Market Service, should conduct a study for 1 year and report back to the

House and Senate Agriculture Committees with a recommendation of how we are to deal with this question.

Mr. OBEY. Mr. Chairman, will the gentleman yield?

Mr. STENHOLM. I am happy to yield to the gentleman from Wisconsin.

Mr. OBEY. Mr. Chairman, the problem with that is that every time anyone has suggested a change in the program, the answer is that we get a study and the problem is that a study that provides an answer after this pony has gone through the barn is a little late because we do not have the ability then to really deal with this issue legislatively. This is a bill that is going to govern dairy policy for 5 years. Why should we not deal with these issues now up front, especially with the advice we have had from people who have looked at it for 18 months?

Mr. STENHOLM. Mr. Chairman, I would give the gentleman the same answer that I gave regarding whether or not we should immediatley impose market quotas because this is the last bite of the apple. This is not the last bit of the apple. Everyone in this room knows we are going to have severe budget pressures applied to the agricultural function of the budget for the next 5 years. So, therefore, I can say with certainty to the gentleman from Wisconsin that this is not a study for the purpose of ducking the issue from the chairman's standpoint. This is a study for getting an answer to the question and then implementing it and fitting it into the total dairy policy we are going to be developing over the next 5 years, with the first installment in the House-Senate conferees and then at succeeding reconciliation points.

Mr. WEBER. Mr. Chairman, will the gentleman yield?

Mr. STENHOLM. I am happy to yield to the gentleman from Minnesota.

Mr. WEBER. Mr. Chairman, I thank the gentleman for yielding.

One of the gentleman's arguments, I think, really is in favor of making the change today. I agree with the gentleman that budgetary pressures may well cause us to revisit agriculture policy over the next few years. At least that is what I think the gentleman was alluding to. If we cannot make this change in policy today based on what is a sound dairy policy for the country, how can we possibly make the change under budgetary pressures in 1, 2, or 3 years? At that point the argument that we are simply singling out California will indeed be a valid one.

It seems to me that precisely because we do not want to advocate this kind of change in response to a budget crisis, we should make it today in response to the normal processes of making a change in agriculture policy.

Mr. STENHOLM. Mr. Chairman, the gentleman makes a very compelling argument, I must say.

The CHAIRMAN. The time of the gentleman from Texas [Mr. STENHOLM] has expired.

(By unanimous consent, Mr. STENHOLM was allowed to proceed for 1 additional minute.)

Mr. STENHOLM. Mr. Chairman, the statement was made a while ago that no one is taking dairy seriously, that the dairy title is all a burden to the taxpayer. I would submit that that is absolutely not true. The dairy title of the farm bill in 1985 has been the most fiscally responsible title, I believe, of any title in not only the farm bill but in any bill that has come to the floor. I believe that is a fair statement. Anybody can challenge me on that later.

Having said that, the budget pressures on us are going to be very severe because we are cutting from a vey low baseline, but we are going to have to cut. That was my previous argument in the last debate. We are going to have to make decisions.

So I would argue that in spite of the fact even that we have a l-year study, we may not have the luxury of 1 year to complete the study before we implement not only this policy but other policies, and I would argue, without repeating myself, that today is not the day.

Mr. Chairman, I ask the Members to stick with the committee position.

Mr. LEWIS of Florida. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I stand in support of this amendment. I believe that the Committee on Agriculture has worked hard for a dairy policy.

There has been a lot of dissent within the committee on this particular issue, more so on this than any other. What this amendment is really doing is eliminating that preferential treatment recommended by the 1988 report of the National Commission on Diary. We cannot have a State-by-State policy. We cannot have a regional policy. We need a national policy, and I believe this is a great firm step in that direction. It results in increased sales to the Commodity Credit Corporation, it inhibits the ability of areas like the State of Florida, which is still in a milk deficit, to affect much-needed expansion of the dairy industry, which is needed.

So I believe that with a true and honest conviction, the Obey amendment is the way to go to correct the problem we have right now with the dairy policy. This will do it, and I ask for total support of this amendment.

Mr. GUNDERSON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, let me read to the Members from present law, if I may. It says in section 401 of the present law, if I may. It says in section 401 of the present law as follows:

> Whenever any price support or surplus removal operation of an agricultural commodity is carried out through purchases, the Secretary shall to the extent practicable obtain from the processors such assurances as he deems adequate that the producers of the agricultural commodities involved have received or will receive national benefits from the price support operation.

Why do I read that language? Because it explains why we are here. My good friend, the former Secretary of Agriculture, Dick Lyng, made one mistake when he was in office; that mistake was that he was from California, so he decided not to report section 401 and enforce it, despite requests from California dairymen to do just that.

That is why this amendment is in front of us this afternoon, because we are suggesting that the law ought to be enforced, and that we ought to take the necessary steps in this farm bill to do so.

Many of the Members are well aware that on the last amendment, the Volkmer amendment, that was before us, I stood with the committee in opposition to the Volkmer amendment. Let me tell the Members that that is not easy, coming from Wisconsin. It is not easy, coming from the upper Midwest, where we have a tradition of supporting supply management in agriculture, particularly in dairy, and when we see some of the transfers in dairy that have occurred out of our region, to the South and the West, that is not an easy job politically to sell and defend back home.

Let me explain why I did it. I did it because if there is one thing that is absolutely necessary in dairy policy in this country, it is that we develop a national and a modern dairy policy. For gosh sakes, the Berlin Wall is coming down, EC-92 is going to happen, we are seeing GATT, and everything else is leading to worldwide trade. Agriculture, whether we like it or whether we do not, is going to be a part of that, and if America is going to participate in the world agricultural community, we had better at least start participating in the national agricultural market first and foremost in developing a policy that says whether you are from California, Virginia, Texas, Wisconsin, New York, or Washington, you must all abide by the same rules and participate in the same market.

□ 1700

Mr. Chairman, when we tried to put together this farm bill in subcommittee, we followed the recommendations of the National Commission on Dairy Policy which said just that. It was time to develop one set of standards

for every dairy farmer all over this country, if they wanted to sell to the CCC.

Listen to this point: California can have any make allowance it wants to, even if this amendment by the gentleman from Wisconsin [Mr. OBEY] passes. It can have any make allowance it wants to. But, if it wants to sell its surplus, its surplus dairy products, to the Commodity Credit Corporation, then it must abide by the same rules as every other dairy farmer in the country.

I say, "You want States rights? You got them. You want freedom to do what you want with your processors? You got them. Unless you want to sell to the Commodity Credit Corporation, and then we're saying you've got to live by the same rules as everybody else in this country."

Mr. Chairman, that is what the National Dairy Policy Commission recommended, and that is what we tried to pursue in subcommittee and we tried to pursue in full committee because that brings us to where we are today.

The Midwest wanted two-tier pricing, and I said, "You know what? That's good for Wisconsin, and it's good from Minnesota, but it's hard to defend in terms of a modern and national dairy policy."

New England wanted regional pricing because they said they were being affected by sales to CCC from other regions, and I said, "I understand why you want that, but we can't go to regionalism in this country. We're going just the opposite. We're trying to develop a national dairy policy."

The gentleman from Virginia [Mr. OLIN], and the South and the Southwest said, "Look. It isn't class 1 that's causing the problem. It's the manufactured product. It's the sales to CCC. If your going to cut the prices, cut the manufactured price, but don't cut the class 1 price."

And I said, "JIM, I understand why you're saying that, but that isn't fair if we're trying to develop one national policy that affects dairy farmers all over this country."

So, Mr. Chairman, then we got to California, and California says, "Wait a minute. We want business as usual regarding our make-allowance."

And we said, "No, that's not fair."

(By unanimous consent, Mr. GUNDERSON was allowed to proceed for 5 additional minutes.)

Mr. GUNDERSON. "If we're going to have a national policy for Minnesota and Wisconsin, if we're going to have a national dairy policy for the Northeast, and for the Southeast and for the Southwest, then California has got to participate in the same program as everybody else."

Now, Mr. Chairman, why is this so important? It is so important because, under the present system California, in 1975, recognized that they had reached the point where they were producing more milk than their food consumption could consume. So, they recognized that, if they were going to continue to expand production, they had to expand their manufacturing facilities.

However, Mr. Chairman, I say to my colleagues, "You know what? They're right. Whereas they have the lowest producers cost of production, they have the highest manufacturing costs."

Mr. Chairman, we do not differentiate anywhere else in the country, but they decided they wanted to differentiate, and so they got an increase in the make allowance. In 1975, California, 64 percent of their milk went to food consumption. In 1989, because of this particular make allowance, only 36 percent goes to food consumption. They are in the process of building a national manufacturing industry, and that is fine, and I will defend that to every one of my Wisconsin farmers providing they play by the same rules as everybody else.

Mr. Chairman, that is all this amendment does by the gentleman from Wisconsin [Mr. OBEY] and the gentleman from New York [Mr. WALSH] and the gentleman from Virginia [Mr. OLIN]. All this does is say, "California, you're not being treated any worse than anybody else. As a matter of fact, the truth is you've been given 14 years of a special manufacturing make allowance, but now for the 1990's let's move to one national, modern policy."

(On request of Mr. BROWN of California and by unanimous consent, Mr. GUNDERSON was allowed to proceed for 1 additional minute.)

Mr. BROWN of California. Mr. Chairman, will the gentleman yield?

Mr. GUNDERSON. I yield to the gentleman from California.

Mr. BROWN of California. Mr. Chairman, I asked the gentleman from Wisconsin [Mr. GUNDERSON] to yield only for the purpose of correcting what I think was probably an inadvertent mistake on his part which does not detract from his main argument.

The text of the amendment of the gentleman from Wisconsin [Mr. OBEY] read as follows:

> The Secretary of Agriculture shall prohibit any State from using an allowance to establish a Grade A price for milk for manufacturing butter, nonfat dry milk and cheese greater than the allowance established by the Department.

That is a flat prohibition, not merely a statement, that the CCC would not buy that surplus product.

Mr. GUNDERSON. Oh, no. I appreciate the gentleman from California [Mr. BROWN] bringing that up so that I might once again point out that they can have any make allowance they want providing they do not sell to the CCC. Any plant in California that wants to maintain the present make allowance under the amendment of the gentleman from Wisconsin [Mr. OBEY] can do so. What they cannot do is have it both ways. They cannot have the advantage of the make allowance in their commercial sales because they only have to abide by that when they are selling the CCC.

The amendment of the gentleman from Wisconsin [Mr. OBEY] is part of the Federal statute, affects the Dairy Price Support Program. It does not affect that milk which is bought, and manufactured, and sold on the private commercial market.

Mr. BROWN of California. Mr. Chairman, the clear language of the amendment, as I read it, says that the Secretary shall prohibit.

Mr. OBEY. Mr. Chairman, will the gentleman yield?

Mr. GUNDERSON. I yield to the gentleman from Wisconsin, the author of the amendment.

(By unanimous consent, Mr. GUNDERSON was allowed to proceed for 2 additional minutes.)

Mr. OBEY. Mr. Chairman, I would simply say that I think the understanding of the gentleman from Wisconsin [Mr. GUNDERSON] of the way the program works is correct, but, irrespective of that fact, I would raise this question:

Why should we allow producers in one State only to simultaneously depress the price that they paid to the farmers who are producing the product in the first place? Why should the processors be allowed to do that and then in the process then be able to use this gimmick to artificially subsidize their prices nationwide, and wedge a larger share of the market, and then at the same time say, "By the way, if we can't sell our surplus directly to the market, then we are going to sell it right directly to Uncle Sam through the CCC," as they are doing with butter.

Mr. Chairman, it seems to me they are having it, not just two ways, but three, and I would suggest that the time has come that that end and that the California farmer be treated and the California processor be treated the same as they are in every other State in the Union.

Mr. GUNDERSON. Mr. Chairman, I appreciate the leadership of the gentleman from Wisconsin [Mr. OBEY] on this issue.

Mr. PENNY. Mr. Chairman, will the gentleman yield?

Mr. GUNDERSON. I yield to the gentleman from Minnesota.

Mr. PENNY. Mr. Chairman, I simply want to add my words of support for the statement of the gentleman from Wisconsin. I think he has made the case in support of this amendment most eloquently.

39-059 O-91-24 (Pt. 13)

We debated this issue in committee. Unfortunately at that time we did not have the votes to pass the equivalent of the provision of the gentleman from Wisconsin [Mr. OBEY] which was offered by the gnetleman from Wisconsin [Mr. GUNDERSON] in our committee.

I think we are either going to have a national policy or we are not. We are either going to play by the same rules, or we are not. In fairness, all dairy producers ought to be under one national policy, and for that reason I urge adoption of the amendment of the gentleman from Wisconsin [Mr. OBEY].

Mr. THOMAS of California. Mr. Chairman, will the gentleman yield?

Mr. GUNDERSON. I yield to the gentleman from California.

Mr. THOMAS of California. Mr. Chairman, I just do not want anybody at the end of this debate to assume that the California dairy producer is crying out for help and reaching to their brethren in Minnesota and Wisconsin to be freed form the yoke of the consolidated milk pooling legislation of California. I think it needs to be understood.

Mr. GUNDERSON. Mr. Chairman, the gentleman from California [Mr. THOMAS] would agree with me, would he not, that the California dairy industry is split on this issue.

Mr. THOMAS of California. No, it is not split. It is like a 95 to 5 percent split. The overwhelming majority of the dairy farmers in California support the program. We are not looking for relief for the beleaguered California dairy farmer.

Mr. GUNDERSON. Mr. Chairman, I appreciate the gentleman from California [Mr. THOMAS] making those points.

Mr. Chairman, I reclaim my time to point out that every farmer who has a base in Cloud, CA, loves the present program. The new farmers are the ones that get took.

Mr. GRANDY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment, and I only take this time to talk because, as our opponents on this issue have pointed out, they are asking for a study. A study is usually compromised between ongoing policy and elimination, and normally a study is something that I, as a member of the committee, could support.

However, Mr. Chairman, let me just direct Members' attention to the language in this study. First of all, the Secretary of Agriculture shall direct the Agriculture Marketing Service of the United States. I would point out that the milk program is administered by the Agricultural Stabilization and Conservation Service. This is a price support program.

Why is the Agricultural Marketing Service involved? Perhaps because the head of that is from California.

But let me go on and specify what the criteria for this study is. The Secretary may terminate this program if he finds that a State's use of a manufacturing allowance that is different from the Federal manufacturing allowance has an adverse effect on the operation of the Federal dairy program and that manufacturing costs and yield data from that same State, audited by that State and presented at public hearings in that State, do not justify different manufacturing allowances in that State.

□ 1710

My point is simply this. If this is an impartial study, then I would like my State to have such an impartial study, audited by my State from data by my State. We all know that the purposes of advocacy are usually used up in this Chamber. The purposes of an impartial study are to split the differencs in this Chamber.

I would argue that we do not have a study here. We have a conclusion. Why spend the money on the study when we know what the answer is going to be, but if we are going to have a study, make it impartial and draw the conclusions from that study.

Mr. Chairman, I urge support for the Obey-Walsh-Boehlert amendment because it is an honest approach to this problem.

Mr. DE LA GARZA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, once again I find myself in the awkward situation that the committee was divided on a vote on this issue. The committee version, and that is what is before us, prevailed on a 26 to 18 vote of the committee.

Therefore, I have no alternative but to request, and I respectfully ask my colleagues to support the committee version which provides or allows the Secretary 1 year for a study and then gives him the authority to act accordingly.

I would like from my personal standpoint to make one point, and that is even though the discussion here has been about Minnesota-Wisconsin versus California, it impacts on all of agriculture. It impacts on all the dairy industry.

If we could exercise our efforts to go and sell more product and have more people consume the product and work in the other areas of the legislation, some of which we can address in this omnibus farm bill, probably we might not have time to be having regional differences; but at this point without personally taking a side, I would state that the responsible vote in my opinion respectfully is that you support the committee, that the committee acted with a majority vote on a recorded vote and that we will continue working on this. If the committee version prevails, and I hope it does, in the end it will be addressed by the administration. We will continue addressing it here. That is my commitment to both sides, that we will continue trying to arrive at some resolution besides "you're getting and we're not." Hopefully that vote will not come to that type of situation, but rather in support of the committee, which is trying to resolve the issue.

Mr. HENRY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, let me simply say that this is really an issue that pits California against the Nation in terms of equity. What you are really trying to do is tell me where I have got a major cheese processing plant that is going up in west Michigan that you are going to use the dairy program to launder funds, quite frankly, in your manufacturing process to subsidize your manufacturing process so you squeeze out the rest of the national competition. Then you will do it like the rest of the Nation.

It kind of sounds like the Japanese giving support to its manufacturing process and dumping automobiles in the United States. You want to dump California cheese and California dairy products across the country, soak up the national market and use this program preferentially to do that.

I simply say if you are from any other dairy State, if you are from Michigan, if you are from Wisconsin, if you are from Illinois, if you are from New York, any other area in the Nation, you are put at a disadvantage by preferential rules in this legislation which give preferential treatment to dairy processing and manufacturing at the expense of the rest of us. It is simply not right, and I rise in strong support of the amendment.

Mr. MATSUI. Mr. Chairman, I rise in opposition to the amendment.

It appears that the facts regarding the "make allowance"—what it is and what the implications are for precluding the States' ability to set these apportionments—continue to be misunderstood.

The amendment we are considering will not eliminate or even reduce a Federal subsidy. It will not relieve the Commodity Credit Corporation from any portion of its obligations in California or any other State. What it will do is prevent the States from exercising economic flexibility. Specifically, it will put California dairy farmers at a competitive disadvantage by refusing to recognize a State's right to provide allowances for citizens who are disadvantaged by regional economic conditions.

The amendment before us today is decidedly anti-California. Although the amendment declares that "no State may establish a dairy 'make allowance' greater than that used by USDA," the fact is that there is only one

State, with a distinct make allowance—California.

The State of California, which has its own dairy marketing order program has maintained since 1979 a make allowance above the Federal allowance to offset the State's associated production cost—labor, insurance, utilities and property costs—all of which make dairy production more expensive in California than it is elsewhere in the United States. We must remember that the Federal manufacturing allowance is based on prices in Minnesota and Wisconsin, not California. Why shouldn't the State of California be allowed to compensate for that inadequacy at no cost to the Federal Government?

Make no mistake about it, this amendment will not save the taxpayer, much less the Government, any money. In fact, CBO estimates that this amendment would cost the Commodity Credit Corporation $51 million over the life of the farm bill because it would stimulate overproduction in milk.

Mr. Chairman, this amendment undercuts California's ability to take care of an important segment of its society and economy. I urge my colleagues to oppose it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin [Mr. OBEY].

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. STENHOLM. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 307, noes 114, not voting 11, as follows:

[Roll No. 260]

NOT VOTING—11

Crockett	Hansen	Nelson
Flake	Houghton	Pickett
Ford (TN)	Ireland	Watkins
Frenzel	Morrison (CT)	

□ 1735

Messrs. PAYNE of Virginia, YOUNG of Alaska, HOAGLAND, and Mrs. BOGGS changed their vote from "aye" to "no."

Messrs. FRANK, SWIFT, SMITH of Florida, RANGEL, WEISS, GREEN, MOAKLEY, KYL, NEAL of Massachusetts, STUMP, Mrs. COLLINS, and Mrs. SAIKI changed their vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

Mr. FRENZEL. Mr. Chairman, I rise in opposition to H.R. 3950, the Food and Agricultural Resources Act of 1990, for two reasons: First, it raises entitlement—type spending at the very time that budget negotiations are attempting to reduce the enormous deficit that is facing our country. Second, it promotes programs that reverse the current trend toward a market-oriented agricultural policy.

If H.R. 3950 becomes law it will add $6.9 billion to the deficit over 5 years. It does this mainly by rapidly expanding nutrition programs. It adds $0.5 billion to the already $2.5 billion increase included in the baseline. Such growth is totally inconsistent with the fiscal discipline being advocated in the summit talks. This is an example of the type of mandatory spending that has put us in the mess we're in. While I support the Agriculture Committee's efforts to improve the Nation's nutrition, I must also chastise them for ignoring the unhealthy effect that adding to the deficit will have on our economy.

From a market perspective, it concerns me that the Agriculture Committee has opted for increasing its commitment to central planning while all of Eastern Europe has been tearing down walls to get away from it. The competitiveness of U.S. agricultural products will suffer greatly in the years ahead because of the provisions contained in the bill that raise loan rates, freeze target prices, maintain quotas, and extend loan subsidies to new crops. When Congress took similar steps in the 1981 farm bill our exports collapsed and farm income dried up. This bill encourages a cruel repeat of those events.

As the budget summit is trying to find some solution to the deficit problem, it doesn't make any sense to make the task more difficult by passing H.R. 3950. It would only take some modest amendments to make H.R. 3950 fiscally reasonable. Until those changes are made. I cannot support it.

Mr. ROGERS. Mr. Chairman, I rise in strong support of H.R. 3950, the Food and Agricultural Resources Act. I want to commend our Ag-

riculture Committee for the untold hours spent in developing this crucial legislation.

Our farmers are the backbone of this Nation. Developing legislation which satisfies the agricultural needs of this Nation, encourages economic growth at home and abroad, and at the same time sustains and inspires our farmers is not easy. Some of our colleagues want to attack policy which they consider unfair or unnecessary. I stand before you to defend our farm policy and H.R. 3950.

My congressional district is 100 percent rural and I am working hard to increase our agricultural resources, efficiency and income. In 1987, agricultural income in my district was $524 million—53 percent from livestock, 42 percent from cash crops, and 5 percent from forestry. By the year 2000, agricultural income has the potential to increase 76 percent to $920 million. That is significant development for my district and crucial for our future and I believe the future of this Nation.

Mr. Chairman, our farm communities are healthy and growing. My farmers are interested in experimenting with new crops and new methods in response to the concerns and needs of our Nation. Let us support this invaluable resource and continue on the road to agricultural recovery.

Once again, I laud the committee for yeoman's work and urge my colleagues to support H.R. 3950 as reported by our Agriculture Committee under the leadership of Mr. DE LA GARZA.

Mr. TAUZIN. Mr. Chairman, I rise in strong opposition to the Downey-Gradison amendment to H.R. 3950, the Food and Agricultural Resources Act of 1990.

I'd like to bring into focus some of the so-called economics floating around this floor today.

First, the sugar program protects the average shopper by curtailing the upward price potential of an extremely volatile world market. Opponents of the sugar program are quick to point out that it costs the American consumer approximately $1.9 billion a year. However, most of their cost-benefit comparisons highlight only the difference between a support price of 18 cents a pound and a speculated world price for sugar.

Nothing could be more naive. That sort of comparison incorrectly assumes that: First, the world price for sugar is the result of a competitive marketplace; and, second, the world price will remain constant or nearly constant in the absence of a sugar program. How can that be when the USDA tells us that 110 countries subsidize their sugar production, consumption, and/or trade in some way? Moreover, who would assume a constant world price when in 1974, in the absence of a sugar program, sugar sold for over 60 cents a pound? The fact is that the current world price is tremendously distorted, the result of intense global manipulation of the market. At 18 cents a pound, the American sweetened-product manufacturer saves a bundle of money.

Are these savings passed on the consumer? Has the price of Coke decreased since 1974? Perhaps we've just stumbled upon the reason why industry, and not consumer groups are pressing for a further reduction in the sugar program. Eighty-five percent of the sugar consumed by the public is done so through processed foods and drinks. Consequently, the benefits of any price decrease will go directly into the pockets of corporate manufacturers of those foods, not the Nation's shoppers.

Mr. Chairman, because of the price and production stability, this sugar program creates jobs. The U.S. Department of Commerce has found that, contrary to the claims of program opponents, a support price above the current world price has caused neither an influx of sweetened-product imports nor a relocation of the sweetened-product manufacturing industry. This would signify confidence in the sugar industry's ability to provide a steady inventory at a fair price. Interestingly, a recent study by a London commodity research firm indicates that the U.S. sugar industry has directly and indirectly created over 361,000 jobs and generates more than $18 billion in annual revenues.

Finally, I'd like to clear up a misconception that the sugar support level is not in equity with other major commodities. The net result of the 1981–90 price support changes was an average increase of 8.6 percent for other major crops—higher than the 7.5 percent increase for sugar.

The Agriculture Committee has produced viable, responsible recommendations for American farm policy, recommendations we should sustain. I urge Members to reject this misguided attack on the U.S. sugar program.

Mr. DE LA GARZA. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. PENNY) having assumed the chair, Mr. BONIOR, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill H.R. 3950 entitled the "Food and Agricultural Resources Act of 1990" had come to no resolution thereon.

PERSONAL EXPLANATION

Mr. NELSON of Florida. Mr. Speaker, had I been present I would have voted "nay" on rollcall No. 259 and No. 260.

PERSONAL EXPLANATION

Mr. MORRISON of Connecticut. Mr. Speaker, I was unavoidably absent and missed rollcall vote 258, which occurred on the amendments offered by Mr. DOWNEY and Mr. GRADISON on the sugar title to H.R. 3950, the 1990 farm bill. Had I been present, I would have voted "aye."

I also missed two votes on amendments to the dairy title of the same bill. On rollcall 259, the Volkmer amendment, I would have voted "no." On rollcall 260, the Obey amendment, I would have voted "aye."

PERSONAL EXPLANATION

Mr. HOUGHTON. Mr. Speaker, I was not present for the vote on the Obey amendment to the 1990 farm bill (rollcall No. 260). Had I been present, I would have voted "yes."

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 2584

Mr. PARKER. Mr. Speaker, I ask unanimous consent to have my name removed from cosponsorship of H.R. 2584.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

ENOUGH IS ENOUGH: LET'S SHUT DOWN IRAN-CONTRA PROBE

(Mr. BROOMFIELD asked and was given permission to address the House for 1 minute and to revise and extend his remarks, and include extraneous matter.)

Mr. BROOMFIELD. Mr. Speaker, 3 years ago, when the congressional investigation of the Iran-Contra affair was winding down, I said that the investigation went on too long.

Nothing that has happened since then has changed my judgment.

The special prosecutor has hired a treasure trove of attorneys, spent tens of millions of dollars over the better part of 4 years, and still hasn't done any better.

Enough is enough. Lawrence Walsh has invested an elephant's worth of taxpayer dollars, and he has come up with a mouse.

Today I sent a letter to Attorney General Thornburgh asking him to shut down the office. And I plan to introduce legislation putting a 2-year sunset provision on future special prosecutors.

Mr. Speaker, I include my letter to the Attorney General as part of the RECORD.

HOUSE OF REPRESENTATIVES,
Washington, DC, July 24, 1990.

Hon. RICHARD L. THORNBURGH,
Attorney General,
Department of Justice, Washington, DC.

DEAR MR. ATTORNEY GENERAL: I am writing to request that you use your authority under title 28, chapter 40, section 596(b)(2) of the United States Code to begin actions to terminate the office of independent counsel established for the Iran-Contra matter.

Last Friday's decision by the federal appeals panel setting aside the convictions of Lt. Col. Oliver North again focuses attention on Lawrence Walsh's "perpetual investigation," which has continued for the better part of four years and cost tens of millions of taxpayer dollars. I believe we are well past the point where further pursuit of this matter by an independent counsel serves any public good. Your office can tie up any remaining loose ends from the current investigation and make appropriate decisions as to how to respond to the recent court decision.

The Iran-Contra affair has been thoroughly investigated; we've paid for two congressional committees, a presidential commission, and an independent counsel; and scores of lawyers, accountants, and investigators have pored over the documents, interviewed hundreds of witnesses, and

issued report after report. Still, Walsh seems intent on ensconcing himself as part of the permanent bureaucracy as he continues to pursue his investigation, which might more appropriately be labeled a fishing expedition. I believe the time has come to say enough is enough.

Already, Walsh has spent twice as long on his investigation as any other Independent Counsel or Special Prosecutor appointed since enactment of the Ethics in Government statute save one. Prolonging this appointment, and moving into new areas as Walsh declared he was going to do following the Poindexter conviction (which now also seems likely to be set aside), is contrary to the intent of the authorizing statute. Congress never intended that a special prosecutor make a career of his investigation. In fact, when we reauthorized the Independent Counsel Act in 1987, we tried to make it clear that the independent counsel should work as diligently and as quickly as possible to resolve his particular investigation or prosecution.

The Independent Counsel Reauthorization Act of 1987 gives you the authority to request that the division of the court terminate an office of independent counsel and have remaining matters turned over to your office for completion. I hope you will act swiftly to put this entire ordeal behind us.

Sincerely,

WILLIAM S. BROOMFIELD,
Member of Congress.

HONORING PAUL BURES, THE DRIVING FORCE BEHIND HOUSTON CRACKDOWN

(Mr. FIELDS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FIELDS. Mr. Speaker, I would like to take a moment to salute a true civic leader, Paul Bures, who has been the driving force behind the Houston Crackdown antidrug campaign since its inception in 1988.

Paul is no stranger to community service. He has served, or currently serves, on a wide and diverse number of civic organizations which have made Houston a better community in which to live.

But it is for his work with Houston Crackdown that Houstonians most owe him their gratitude.

Houston Crackdown was conceived in 1988 as a means of bringing together the best minds in our community to fight the problem of drug abuse. Houston Crackdown unites government officials, business executives, clergy, educators, law enforcement officers, media representatives, medical experts, and private citizens to address the host of problems associated with drug use in Houston—and to devise solutions to those problems. By bringing every segment of the community together, the program allows individuals and agencies charged with reducing drug use in the Houston area to communicate more effectively and to better coordinate their antidrug efforts.

Houston Crackdown acts as an umbrella organization dedicated to reducing the use of crack cocaine and other illegal drugs; to support increased and improved rehabilitation opportunities for drug addicts who want to obtain treatment; to educate young people about the legal and medical dangers involved with drug use; and to show all Houstonians that, working together, there is something that each and every one of us can do, we can battle the scourge of drugs in our community.

Houston Crackdown is a model for other communities nationwide, and Houstonians have rallied behind Houston Crackdown as they have rallied behind no other local program.

Until Paul conceived of Houston Crackdown, Houstonians were concerned and worried about our local drug problem—but they really didn't know what they personally could do to solve that problem. Paul showed them that each of us has a role to play in our Nation's war on drugs.

As a result, Houstonians have responded enthusiastically and generously, as have businesses throughout the Houston area.

On behalf of Houston Crackdown, Paul recently presented a check in the amount of $250,000 to Houston Mayor Kathy Whitmire. That money was raised at a citywide anti-drug rally called A Night of a Thousand Lights, held in Houston in April. The money will be used for substance abuse education and awareness.

Paul is a remarkable man whose sense of civic duty has made an indelible imprint in Houston. A former advertising executive, Paul served as general sales manager and vice president for television sales at KTRK-TV, the ABC affiliate in Houston, from 1971 to 1982. In 1982, he left Houston to serve as president and general manager of WTVD-TV in Durham, NC for 4 years. But in 1986, he returned to Houston as president and general manager of KTRK-TV. Paul recently announced that he will soon resign that position to achieve one of his life long dreams: become a full-time author. Fortunately for all Houstonians, Paul has indicated he will remain in Houston.

Paul's list of civic activities are almost too numerous to mention. In addition to his active participation in Houston Crackdown, Paul serves on the boards of directors of the Greater Houston American Red Cross; Houston's Campaign for Literacy; and Houston Area Urban League. He served as a member of the host committee of the just concluded Houston Economic Summit; he is a cabinet member of the Houston Campaign for the Homeless; he serves on the steering committee of Partners in Space; he is an adviser to the Houston Grand Opera and the Houston End Hunger Network; he belongs to a variety of chambers of commerce in the Houston area; and he serves as a member of the International Platform Association.

Houston has been richly blessed by, and is deeply fortunate to have in its midst, a man named Paul Bures. His contributions to a better Houston are unparalleled, and his motivation has been a love for Houston—and a desire to see his city become a better place for his family, and all Houstonians, in which to live.

Mr. Speaker, it is with profound gratitude that I salute Paul's civic efforts, particularly his work with Houston Crackdown. It is with deep appreciation that I congratulate him on a job well done at KTRK-TV in Houston. And it is with tremendous anticipation that I await the publication of his first novel. I know you join with me in wishing this remarkable man well in all his future endeavors.

PHIL SOKOLOF BATTLES FOR MILLIONS

(Mr. HOAGLAND asked and was given permission to address the House for 1 minute and to revise and extend his remarks and to include extraneous material.)

Mr. HOAGLAND. Mr. Speaker, distinguished colleagues in the House, standing on the easel next to me is an urgent message to Members of the Senate and House on H.R. 3562, the Nutrition Labeling and Education Act.

Phil Sokolof, president of National Heart Savers Association and a constituent of mine from Omaha, NE, has dedicated his life and personal wealth toward lowering cholesterol and reducing the risk of heart disease, by waging a one-man campaign of proper nutrition and responsible accurate food labeling.

Members will remember Phil Sokolof's full-page advertisements raising concerns about the content of the food in McDonald's fast food chains around the country.

Today, Mr. Sokolof placed the ad you see next to me in several major national newspapers around the country. He is trying to bring to our attention the positive benefits of understanding the food we eat. Mr. Sokolof feels we in Congress need to address the Nutrition Labeling and Education Act as quickly as possible, and I unequivocally agree with him. Millions of Americans face near-fatal health situations every year as a result of not being properly informed of the nutritional composition of the food they eat.

The Federal Government spends billions of dollars on curing health problems created by high-cholesterol, high-fat diets. It makes good policy sense for the Federal Government to take preemptive action to improve the health of our citizens.

By the way Mr. Speaker, there is something else you should know about Mr. Sokolof. Nearly 24 years ago he got a second chance in life. He nearly died of a heart attack. Since then, Mr. Sokolof has dedicated his life to saving the lives of others. Mr. Speaker, we should join him and help Mr. Sokolof help others to better their health and better their lives.

Mr. Speaker, I include this New York Times article to be made part of the CONGRESSIONAL RECORD.

By the way, his ad campaigns are having a major effect. Today, McDonald's has announced it is now deep-frying its french fries in vegetable oil rather than beef tallow.

Congratulations Phil, you are making a difference.

[From the New York Times, July 22, 1990]

ONE MAN WITH A PURPOSE TAKES ON HEART DISEASE

(By William Robbins)

OMAHA.—The "little guy out here in Omaha," as Phil Sokolof sees himself, has a new message for the giants of the fast-food industry. He has no plans to let up on them until he sees a lot of improvement in American diets.

"How can I stop as long as there are people out there I can help?" said Mr. Sokolof, a 67-year-old industrialist whose attention was focused on diet problems by a near-fatal heart attack 24 years ago.

For the last five years, Mr. Sokolof, a widower who prepares his own meals "with a microwave and a can opener," has been urging Americans to lower their cholesterol levels. For the last couple of years under the name of National Heart Savers Association, he has been financing a national advertising campaign against food companies he regards as offenders because of saturated fats in their products. He estimates that he has spent about $2.5 million so far in his crusade.

Mr. Sokolof's latest advertisement, which ran on July 3 in several newspapers including The New York Times, focused on the McDonald's Corporation and some of its rivals. "McDonald's, Your Hamburgers Still Have Too Much Fat!" it said, "and Your French Fries Still are Cooked with Beef Tallow." In a footnote it said, "Both references are applicable to Burger King and Wendy's."

CONFIDENT OF IMPROVEMENT

"I can't say we're going to tear down the golden arches by the year 2000," Mr. Sokolof said in an interview here. "But I am confident that by the year 2000 they are going to be serving more healthful food under those golden arches."

Earlier, Mr. Sokolof ran a series of advertisements entitled "The Poisoning of America" that pictured products of several companies. His target was saturated fats used as ingredients, particularly coconut and palm oils. Saturated fats raise the level of cholesterol in the bloodstream; cholesterol has been identified as a major contributor to heart attacks.

A subsequent advertisement named a dozen food companies that had altered products to exclude saturated fats. The implication was that the changes had come in response to the advertising campaign.

Mr. Sokolof's attacks have stirred angry replies from several companies named in them, including McDonald's, but some have indicated a grudging respect. Among independent specialists, observations have been mixed.

"HE DESERVES HIGH MARKS"

Spokesmen for McDonald's assail the advertisements as "absurd" or "reckless, misleading, the worst kind of sensationalism." And they say many McDonald's restaurants are experimenting with vegetable cooking oils.

Terry Thompson, a vice president of the Pillsbury Company, one of many food companies that have altered products, said: "My only observation then and now was that he was an effective communicator on an issue that was very important to him. He deserves high marks for that."

But he continued: "Like a lot of other food companies, Pillsbury's interest in reformulations preceded Mr. Sokolof's campaign. If anything, he probably accelerated some programs."

A FORTUNE IN CORNER BEADS

Philip Morton Sokolof was already a millionaire when he suffered his heart attack. Born in Omaha on Dec. 14, 1922, he was the son of a fruit-market owner who branched out into liquor stores and bars. Mr. Sokolof showed a childhood skill as a song-and-dance performer, and from the ages of 17 to 21, he earned his living on the road with a big band.

Following his father into business, Mr. Sokolof soon found himself in real estate and then in home building. In 1955 he found the niche in which he built his fortune. He bought a $15,000 metal-forming tool and began producing corner beads, the metal fittings that protect wallboard joints. Phillips Manufacturing, the company he formed to produce them, quickly became a success.

Meanwhile, he met and married Ruth Rosinsky, a woman who captured and held his admiration.

"She had an indomitable spirit," he said. His wife, who became ill at the age of 26 with a glandular cancer that finally caused her death in 1982, spent much of her life working with blind children while also bringing up the Sokolofs' two children.

Mr. Sokolof, always a compulsive worker, never had a hobby except bridge, a game at which he won many tournament events and became a life master. But he gave it up, complaining of a lack of time. Still he found time to pursue an interest in stock investments, a pursuit he credits as the source of part of his fortune, which he places as somewhere "in eight figures."

In 1966, when he was 43, came his heart attack, a surprise because he was slender, did not smoke and said he "was really into exercise, in great physical condition." After the heart attack, he discovered that his cholesterol level was dangerously high.

But it was not until 1984, when a Government study showed sharp reduction in heart attacks among people with low cholesterol levels, that he felt he had ammunition enough to start a national campaign.

In 1985 he started Heart Savers, an association with no membership rolls and with Mr. Sokolof as its sole supporter. That same year, in Grand Island, Neb., he started a program of cholesterol testing and soon replicated it in 16 other cities.

Mr. Sokolof summed up this way: "I have had great good fortune—being able to make a lot of money and being able to do something with it that I think is important."

[An advertisement from the Washington Times, July 24, 1990]

AN URGENT MESSAGE TO MEMBERS OF THE UNITED STATES SENATE AND HOUSE OF REPRESENTATIVES

WHAT IS MORE IMPORTANT THAN THE HEALTH OF THE AMERICAN PUBLIC?—OBVIOUSLY NOTHING!

A Vital Food Labeling Bill endorsed by leading U.S. health experts and organizations awaits final action in both houses of congress.

The Food Labeling Bill will require that food companies identify precise amounts of saturated fat, cholesterol, sodium, sugar, calories, and other important information. It will prohibit misleading labeling claims such as:

"Lite," which can mean anything from fewer calories to merely lighter in taste, color, texture, or weight;

"97% Fat Free," which may misleadingly imply that a food is low in fat;

"No Cholesterol," which appears on labels of foods laden with saturated fat;

"Helps Reduce the Risk of Heart Disease," which can be applied to foods high in sodium.

"High in Fiber," which sometimes appears on labels of foods that contain small amounts of fiber.

The absence of nutrition information on most groceries and this barrage of misleading nutrition and health claims on food labels is an abuse you have the power to stop.

Please, Senate Majority Leader Mitchell, Senator Kennedy, Senator Metzenbaum, Speaker Foley, Congressman Dingell, and Congressman Waxman, end this public health peril by ensuring that this bill is promptly brought to a floor vote. But don't sacrifice strong consumer protection laws to appease the food industry.

Senator Hatch, this much needed legislation enjoys strong bipartisan support. Please reconsider your opposition.

Don't let a crowded agenda prevent H.R. 3562/S.1425, The Nutrition Labeling and Education Act, from reaching the House and Senate floors.

The Food and Drug Administration may initiate food labeling regulations without congressional approval. However, litigation could thwart their implementation indefinitely.

An Act of Congress will make proper food labeling a fact. This bill will be a giant step forward in helping consumers make the intelligent choices necessary to lead healthier lives.

The American People Are Depending On You To See That This Legislation Is Enacted. Don't Let Us Down!

Sincerely,

PHIL SOKOLOF.

OMAHA, NE.
(402) 339-3813

(Phil Sokolof, as a private citizen, paid for this ad. Mr. Sokolof is president of National Heart Savers Association, a private foundation not permitted to promote legislation.)

□ 1740

S&L PROVISIONS OF THE CRIME PACKAGE

The SPEAKER pro tempore (Mr. PENNY). Under a previous order of the House, the gentleman from New York [Mr. FISH] is recognized for 5 minutes.

Mr. FISH. Mr. Speaker, the House Judiciary Committee yesterday reported a crime package by a bare vote of 19 to 17. The narrowness of this margin was due primarily to provisions in the package with respect to the death penalty, habeas corpus, exclusionary rule among others. There was, however, one area in which Democrats and Republicans agreed and that is the amendment introduced by Mr. SCHUMER and adopted by the committee dealing with the savings and loan crisis.

That amendment had its genesis in legislation introduced by my colleague from Ohio, Mr. WYLIE (H.R. 5050), and legislation introduced by the minority leader on behalf of the administration (H.R. 5150). What the committee adopted with respect to savings and loans must be processed separately and done so as soon as possible. Therefore, Mr. WYLIE and I are introducing that amendment as reported by the committee in a spirit of bipartisanship, recognizing that the ideas originally proposed by Mr. WYLIE and the administration have been perfected by the contribution of others, Democrats and Republicans alike. This bipartisan effort must not only be supported, it must be considered on its own and now. This work of Democrats and Republicans alike cannot be allowed to become the stuff of political rankling—it cannot and should not be allowed to be the pretty paper covering a package of provisions that will undercut law enforcement.

Mr. Speaker, I am pleased that so many positive features of the President's crime bill have been recognized by my colleagues on the other side of the aisle and incorporated into the package of S&L reforms that we are offering today. I must first recognize the long and early efforts of my colleague from Ohio, Mr. WYLIE, the chief sponsor of H.R. 5050 which was recently passed 42 to 0 by the Financial Institutions Subcommittee of the House Banking Committee. His contributions were confirmed by the action of the Judiciary Committee which incorporated 80 percent of them in its final savings and loan amendment.

I must commend the administration, specifically the Attorney General, for taking decisive action in prosecuting cases of savings and loan fraud. While others have talked, he has acted. As early as 1987, well before the publicity surrounding this crisis reached the front page, this was a priority of his department. Since October of 1988, major savings and loan prosecutions by U.S. attorneys have yielded 202 indictments involving 329 defendants; 213 defendants have been convicted so far and sentenced to nearly 400 years of imprisonment collectively. Restitution of almost $60 million has been ordered.

Mr. Speaker, the Congress now can become a full partner with the administration by finally providing our law enforcement officials with the resources they need and the public will be well-served by bipartisan action.

I want to highlight one provision that is in the legislation we introduce. It would empower the special counsel entrusted with investigating the savings and loans fraud to investigate any involvement of current or former Members of Congress, the Cabinet and high executive officials and their immediate families.

Mr. Speaker, this provision is crucial if we as a body are to ensure the confidence and respect of the American people. We must be as vigorous about wrongdoing on the part of those who have abused the public trust as we are about private sector criminal behavior if we expect to put this crisis behind us. The American people demand no less of us than complete forthrightness.

This legislation is timely and necessary. It must be considered separately and now. Mr. Speaker, I urge the support of all my colleagues.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio [Mr. WYLIE] is recognized for 5 minutes.

Mr. WYLIE. Mr. Speaker, I am pleased to join with my friend, the gentleman from New York, Mr. HAMILTON FISH, in introducing a bill today designed to move quickly to get at the major savings and loan fraud cases and those responsible for them. Much of the bill is H.R. 5050 which I introduced, along with Chairman GONZALEZ, BOB MICHEL, Chairman ANNUNZIO, and Congressman BARNARD and Congressman HILER.

When I appeared before the Judiciary Subcommittee on Crime 2 weeks ago, Chairman SCHUMER indicated that any bill of this nature had to have five provisions in it. I pointed out that H.R. 5050 had all five of those provisions in it, and that the chairman should give serious thought to signing on as a cosponsor.

Basically, the title which deals with this issue of the crime bill is good legislation and incorporates about 80 percent of H.R. 5050 in it, for which I commend Chairman SCHUMER and the others on the Judicary Committee. The problem is that the crime bill has been referred to four other committees, which only serves to delay consideration of any provision of this title of the bill, and the S&L title is designed to be a rifle shot approach. Our bill which we are introducing today is designed to be a rifle shot approach to prosecuting savings and loan criminals and recovering some of the money from white collar crimes which took place in the savings and loan debacle.

The Financial Institutions Subcommittee reported out H.R. 5050 by a vote of 42 to 0. There are 51 Members on the Committee on Banking, Finance and Urban Affairs, so this represents a clear majority from the committee with primary jurisdiction and responsibility in the area of savings and loans. The Justice Department gave a qualified endorsement and the FDIC chairman, Bill Seidman, strongly supports H.R. 5050.

In addition to the provisions of H.R. 5050, we have added, as Congressman FISH indicated, another provision having to do with a special prosecutor. What we are concerned with is that the crime bill will move so slow in the process that we will not get to considering the provisions which we consider so important. So we want to put it out as a separate bill and get it on a fast track. We think we need to be moving this legislation expeditiously.

Mr. HILER. Mr. Speaker, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from Indiana.

Mr. HILER. Mr. Speaker, I thank the gentleman for yielding and want to commend him and the gentleman from New York, Mr. FISH, for their expeditious efforts in moving this product, as it moved out of the Judiciary Committee, moving it into a separate piece of legislation and bringing it to the attention of the full Congress.

As the gentleman from Ohio has so accurately reflected, much of this bill is the original H.R. 5050 as well as the Taxpayer Recovery Act, and parts of H.R. 5150, and the gentleman from Ohio has been a principal author on all three of those pieces of legislation.

□ 1750

And it is always gratifying to know when your work is being considered by other committees.

Flattery, what is the old saying about flattery: When someone copies something, it is the sincerest form of flattery. I think that is great flattery to you that so much of your three original bills were adopted in the Judiciary Committee's provision.

But I think, as the gentleman points out, the issue here is not authorship or pride of authorship, it is getting this legislation moved to the floor of the House and passed before we leave for the August recess.

There is absolutely no reason why this particular provision of the crime bill cannot be separated out and brought up on the floor next week. I would certainly encourage the Democratic leadership, who runs the schedule and determines the schedule, to bring this measure to a vote quickly, get it out to the floor so we can give the Justice Department and the regulators more authority and more power and more money to go after the bad guys in this S&L crisis.

We have heard a lot of talk about what has been done and what has not been done. This is a very positive step that can take place, and we ought not adjourn in the House of Representatives until we have passed this legislation.

Mr. WYLIE. I thank the gentleman for his contribution and associate myself with his remarks. What we want to do is to speed up the process so the Federal Government has the proper tools to do the job effectively and as quickly as possible.

I learned a long time ago that you can accomplish a lot in this world if you do not worry about who gets the credit.

Congressman FISH and I are not concerned about that. We are concerned that the provisions which would speed up the prosecution of the savings-and-loan criminals and speed up the process of regaining some of the ill-gotten funds and property has become bogged down in a partisan effort in the crime control bill.

We would call on the House Democratic leadership to allow the provisions of the bill we introduced tonight to be brought to the floor as quickly as possible in a bipartisan effort.

SCHUMER AMENDMENT TO H.R. 5269

The Schumer amendment adds a new title to the bill, entitled "Banking Law Enforcement." It has seven subtitles.

SUBTITLE A—ENHANCED CRIMINAL PENALTIES

Subtitle A contains provisions that enhance existing criminal penalties and that establish new crimes.

Section 1

Section 1 of the bill amends chapter 47 of title 18, United States Code, to add a new offense entitled "concealment of assets from conservator or receiver of insured financial institution." The offense makes it a felony (five years imprisonment) for a person, with intent to impede the functions of the Federal Deposit Insurance Corporation (acting as conservator or receiver) or the Resolution Trust Corporation (acting as conservator or receiver) to conceal an asset or property from (or to place or endeavor to place an asset or property beyond the reach of) the Federal Deposit Insurance Corporation or the Resolution Trust Corporation.

H.R. 5050: As amended by Mr. McCollum, the Schumer Amendment is virtually identical to Section 308 of H.R. 5050.

Section 2

Section 2 of the bill amends section 19(a) of the Federal Deposit Insurance Act to expand the prohibition on control of, or participation in the conduct of the affairs of, an insured depository institution. Section 19(a) prohibits a person convicted of certain offenses from serving as an institution-affiliated party, or owning, controlling, or otherwise participating in the affairs of an insured depository institution. The Federal Deposit Insurance Corporation is authorized to waive this prohibition.

Section 2 of the bill prevents the Federal Deposit Insurance Corporation from waiving the prohibition of section 19(a) for a period of ten years if the person has been convicted of a violation of specified offenses. The offenses are:

18 U.S.C. § 215(a) (relating to receipt of commissions or gifts for providing loans);

18 U.S.C. § 656 (relating to bank embezzlement);

18 U.S.C. § 657 (relating to thrift institution embezzlement);

18 U.S.C. § 1005 (relating to fraudulent bank entries);

18 U.S.C. § 1006 (relating to fraudulent federal credit institution entries);

18 U.S.C. § 1007 (relating to Federal Deposit Insurance transactions);

18 U.S.C. § 1008 (relating to Federal Savings and Loan Insurance Corporation transactions);

18 U.S.C. § 1014 (relating to fraudulent loan and credit);

18 U.S.C. § 1032 (relating to concealment of assets);

18 U.S.C. § 1341 (relating to mail fraud) if the offense affects a financial institution applications);

18 U.S.C. § 1343 (relating to wire fraud), if the offense affects a financial institution;

18 U.S.C. § 1344 (relating to bank fraud); and

18 U.S.C. § 1956 (relating to laundering of monetary instruments).

H.R. 5050: No comparable provision to Section 2 of the Schumer Amendment.

Section 3

Section 3 of the bill amends chapter 73 (obstruction of justice) of title 18, United States Code, to add a new crime punishing interference with the examination of a financial institution. The new offense makes it a felony (five years imprisonment) corruptly to obstruct, or to attempt to obstruct, an examination of a financial institution by a federal agency with jurisdiction to conduct the examination.

H.R. 5050: No comparable provision to section 3 of the Schumer Amendment. The provision may have been suggested by the Office of the Comptroller of the Currency.

Section 4

Section 4 of the bill increases from 20 years to 30 years the maximum prison term that can be imposed for various financial-institution-related offenses. The offenses are:

18 U.S.C. § 215(a) (relating to receipt of commissions or gifts for providing loans);

18 U.S.C. § 656 (relating to bank embezzlement);

18 U.S.C. § 657 (relating to thrift institution embezzlement);

18 U.S.C. § 1005 (relating to fraudulent bank entries);

18 U.S.C. § 1006 (relating to fradulent federal credit institution entries);

18 U.S.C. § 1007 (relating to Federal Deposit Insurance transactions);

18 U.S.C. § 1014 (relating to fraudulent loan or credit applications);

18 U.S.C. § 1341 (relating to mail fraud), but only if the offense affects a financial institution;

18 U.S.C. § 1343 (relating to wire fraud), but only if the offense affects a financial institution; and

18 U.S.C. § 1344 (relating to bank fraud).

H.R. 5050: No comparable provision to Section 4 of the Schumer Amendment.

Section 5

Section 5(a) of the bill amends the statute of limitations provision of title 18, United States Code, to increase the period within which a criminal prosecution may be commenced when the offense is a RICO violation, if the racketeering activity involves certain financial institution offenses (or a conspiracy to commit one of those offenses). The period is increased from five years to ten years. The financial institution offenses are:

18 U.S.C. § 215(a) (relating to receipt of commissions or gifts for providing loans);

18 U.S.C. § 656 (relating to bank embezzlement);

18 U.S.C. § 657 (relating to thrift institution embezzlement);

18 U.S.C. § 1005 (relating to fraudulent bank entries);

18 U.S.C. § 1006 (relating to fraudulent federal credit institution entries);

18 U.S.C. § 1007 (relating to Federal Deposit Insurance transactions);

18 U.S.C. § 1008 (relating to Federal Savings and Loan Insurance Corporation transactions);

18 U.S.C. § 1014 (relating to fraudulent loan or credit applications);

18 U.S.C. § 1341 (relating to mail fraud), but only if the offense affects a financial institution;

18 U.S.C. § 1343 (relating to wire fraud), but only if the offense affects a financial institution; and

18 U.S.C. § 1344 (relating to bank fraud).

H.R. 5050: No comparable provision to Section 5 of the Schumer Amendment.

Section 6

Section 6 of the bill amends the money laundering offense to add six new predicate offense to the definition of "specified unlawful activity." The six new offenses are:

18 U.S.C. § 1005 (relating to fraudulent bank entries);

18 U.S.C. § 1006 (relating to fraudulent federal credit institution entries);

18 U.S.C. § 1007 (relating to Federal Deposit Insurance transactions);

18 U.S.C. § 1014 (relating to fraudulent loan or credit applications);

18 U.S.C. § 1341 (relating to mail fraud), but only if the offense affects a financial institution; and

18 U.S.C. § 1343 (relating to wire fraud), but only if the offense affects a financial institution.

H.R. 5050: No directly comparable provision to Section 6 of the Schumer Amendment. H.R. 5050 does make certain amendments to the moneylaundering statutes in Section 315.

Section 7

Section 7 of the bill requires the United States Sentencing Commission to promulgate sentencing guidelines for certain financial institution offenses that call for an offense level of 24 if the defendant derives more than $1 million in gross receipts from the offense. For a first-time offender, a level 24 offense calls for a prison term of 51 to 63 months. The offenses covered are:

18 U.S.C. § 215(a) (relating to receipt of commissions or gifts for providing loans);

18 U.S.C. § 656 (relating to bank embezzlement);

18 U.S.C. § 657 (relating to thrift institution embezzlement);

18 U.S.C. § 1006 (relating to fraudulent federal credit institution entries);

18 U.S.C. § 1007 (relating to Federal Deposit Insurance transactions);

18 U.S.C. § 1014 (relating to fraudulent loan or credit applications);

18 U.S.C. § 1341 (relating to mail fraud), but only if the offense affects a financial institution;

18 U.S.C. § 1343 (relating to wire fraud), but only if the offense affects a financial institution; and

18 U.S.C. § 1344 (relating to bank fraud).

H.R. 5050: No comparable provision to Section 7 of the Schumer Amendment.

Section 8

Section 8 of the bill amends title 18, United States Code, § 981(e), the civil forfeiture provision which authorizes the Attorney General to distribute forfeited property. Section 8 amends that provision to permit the Attorney General, with regard to property forfeited as proceeds traceable to any of eight financial institution offenses, to restore the forfeited property to a victim of the offense. The eight financial institution offenses are: (1) 18 U.S.C. § 215(a) (relating to receipt of commissions or gifts for providing loans); (2) 18 U.S.C. § 656 (relating to bank embezzlement); (3) 18 U.S.C. § 657 (relating to thrift institution embezzlement); (4) 18 U.S.C. § 1005 (relating to fraudulent bank entries); (5) 18 U.S.C. § 1006 (relating to fraudulent federal credit institution entries); (6) 18 U.S.C. § 1007 (relating to Federal Deposit Insurance transactions); (7) 18 U.S.C. § 1014 (relating to fraudulent loan or credit applications); and (8) 18 U.S.C. § 1344 (relating to bank fraud).

H.R. 5050: No comparable provision to Section 8 of the Schumer Amendment.

Section 9

Section 9 of the bill amends the restitution provision of title 18, United States Code, which authorizes the sentencing court to order a convicted defendant to make restitution to a victim of the offense. Section 9 adds a definition of the term "victim" for the purposes of an offense affecting a financial institution that has as an element a scheme, a conspiracy, or a pattern of crime activity. The definition provides that a person is a victim of such an offense if the offense caused direct harm to the person.

Section 9 of the bill also amends the restitution provision to permit the court to order restitution to the extent, that the parties have agreed to restitution in a plea agreement.

H.R. 5050: Section 9 of the Schumer Amendment is virtually identical to Section 311 of H.R. 5050.

Section 21

Section 21 of the bill expands the civil injunction against fraud provision of title 18, United States Code. That provision authorizes the Attorney General to bring a civil action to enjoin a violation of 18 U.S.C. ch. 63 (mail fraud), or 18 U.S.C. § 287 (false, fictitious, or fraudulent claims), 371 (conspiracy to commit offense or to defraud the United States), or 1001 (false statements). Section 21 of the bill expands the violations covered and the remedy that can be sought.

As amended by section 21, the civil injunction against fraud provision authorizes, the Attorney General to bring a civil action in federal court if a person is violating or about to violate the above provisions or is committing or about to commit a banking law violation. The remedy provided is an order enjoining the violation.

The civil injunction against fraud provision, as amended by section 21, also authorizes the Attorney General to bring a civil action in federal court if a person is disposing of, or about to dispose of, property obtained as a result of a banking law violation. The remeby is an order enjoining such violation or restraining any person from disposing of the property, or property of equivalent value. The court can also appoint a temporary receiver to administer the restraining order.

H.R. 5050: Section 9 of the Schumer Amendment is virtually identical to Section 307(c) of H.R. 5050.

Section 22

Section 22 of the bill amends section 11(d) of the Federal Deposit Insurance Act to authorize the Resolution Trust Corporation and the Federal Deposit Insurance Corporation to place under the control of a court appointed trustee the assets of an individual who may be held culpable in the failure of an insured financial institution. This provision would prevent such individual from dissipating assets or removing them from the jurisdiction of the court in anticipation of an adverse judgment of liability.

H.R. 5050: Section 22 of the Schumer Amendment is virtually identical to Sections 307(a) and 307(b) of H.R. 5050.

Section 23 of the bill amends the bankruptcy code to prevent institution-affiliated parties from using bankruptcy to evade commitments to maintain capital reserve requirements of a federally insured depository institution or evade other civil or criminal liability to federal banking regulatory agencies.

Subsection (a) adds new banking-related definitions to section 101 of the Bankruptcy Code. "Institution-affiliated party," "insured credit unions," and "insured depository institution" are given the same meaning as these terms have under the Federal Depository Insurance Act and the Federal Credit Union Act. "Federal depository institutions regulatory agency" is defined according to the specific context in which it is used in the amendment.

Subsection (b) adds a new subsection (o) to section 365 of the Bankruptcy Code, to provide that the trustee of a debtor's estate shall be deemed to have assumed, consistent with the debtor's other obligations under section 507 of the Bankruptcy Code, any commitment by the debtor to maintain the capital of an insured depository institution. This provision applies to bank holding companies and savings and loan holding companies as well as to institution-affiliated parties. The effect of this provision is to prevent the trustee from rejecting any such commitment as an executory contract under his usual "avoidance" powers. Subsection (o) makes clear that the provision does not supersede any banking regulatory law which would otherwise terminate such a commitment.

Subsection (c) makes four changes to section 523 of the Bankruptcy Code, delineating certain debts that are deemed nondischargeable through a bankruptcy proceeding. The first change exempts a federal depository institutions regulatory agency, in its capacity as conservator, receiver, or liquidating agent for an insured depository institution, from having to prove that it relied on an institution-affiliated party's false financial statement in order to make debts arising for such false statement nondischargeable.

The second change creates a new category of nondischargeable debts—debts resulting from the debtor's failure to fullfil any commitment to a federal depository institutions regulatory agency to maintain the capital of an insured depository institution.

The third change exempts a federal depository institutions regulatory agency from having to make a timely request to the bankruptcy court in order to preserve as nondischargeable a debt against an institution-affiliated party relating to fraud, false statements, fiduciary defalcation, (or willful and malicious injury).

The fourth change provides that an institution-affiliated party will be deemed to have been acting in a fiduciary capacity for purposes of determining whether any debt to a federal depository institutions regulatory agency is nondischargeable under section 523(a)(4), which applies to debt for fraud or defalcation while acting in a fiduciary capacity.

Subsection (d) creates an exception to discharge chapter 11 reorganization for a commitment to a federal depository institutions regulatory agency to maintain the capital of an insured depository institution. The subsection provides that a chapter 11 reorganization plan may not be approved unless it provides that, following the completion of the plan, the debtor will maintain any such commitment and will continue to be obligated for any debt resulting from failure to fulfill any such commitment. The subsection makes clear that it does not supersede any banking regulatory law which would otherwise terminate such a commitment.

Subsection (e) makes certain debts owed by an institution-affiliated party to a federal depository institutions regulatory agency which are already nondischargeable in bankruptcy generally also nondischargeable in chapter 13 bankruptcy as well. These are debts relating to fraud, false statements, fiduciary defalcation, willful and malicious injury, and fines and criminal restitution.

H.R. 5050: Section 23 of the Schumer Amendment is virtually identical to Title IV of H.R. 5050, the Taxpayer Recovery Act of 1990, which was introduced in the Senate by Senator Dole and in the House by Congressmen Wylie and Hiler.

Section 24

Section 24 of the bill amends section 11 of the Federal Deposit Insurance Act to provide the Federal Deposit Insurance Corporation with the ability to avoid fraudulent transfers of assets by institution-affiliated parties and debtors of an institution within five years of the date that the Federal Deposit Insurance Corporation is appointed conservator or receiver. Further, Section 24 limits FDIC's right to recover assets from the transfer where the transferee has taken the property for value in good faith. Additionally, this provision gives the FDIC superior rights to the trustee or any other party (other than a federal agency) in bankruptcy with respect to the property transferred.

Currently, the Federal Deposit Insurance Corporation's authority to void fraudulent transfers of property is established by state law only. Under state law, the Federal Deposit Insurance Corporation may void such transfers for a period ranging from three to seven years from the date of transfer.

H.R. 5050: Section 24 of the Schumer Amendment is similar to Section 306 of H.R. 5050 but slightly expands the scope of activities that may be considered a fraudulent conveyance.

Section 25

Section 25 of the bill prohibits an institution which does not meet its minimum capital requirements from entering into golden parachute contracts or making payments unless it gets the prior written approval of its primary federal regulator, and the Federal Deposit Insurance Corporation under certain circumstances. It also prohibits the payment of legal fees and civil penalties in actions brought by the federal banking agencies, without the prior written approval of the primary federal regulator and the Federal Deposit Insurance Corporation. These provisions will prevent management from voting themselves generous bonuses at the expense of the Federal Deposit Insurance Corporation and ultimately the tax-

payer. This section would not prohibit the institution's payment of premiums for officers' and directors' liability insurance, unless that insurance covers payment of civil money penalties.

H.R. 5050: Section 25 of the Schumer Amendment is virtually identical to Sections 318 of H.R. 5050 as reported from the Banking Committee's Financial Institution's Subcommittee. This provision was derived from a bill introduced by Congressman Price that had wide bi-partisan support.

Section 26

Section 26 of the bill amends the civil forfeiture provision of title 18, United States Code, to expand the offenses covered. Section 26 adds 18 U.S.C. § 1032, 18 U.S.C. § 1341, but only if the offense affects a financial institution; and 18 U.S.C. § 1343, but only if the offense affects a financial institution. Section 26 also amends the civil forfeiture provision to expand the authority of the Attorney General to make forefeited property available to federal financial institution regulatory agencies and financial institutions.

H.R. 5050: Section 26 of the Schumer Amendment is virtually identical to Section 312 of H.R. 5050.

Section 27(a) of the bill amends the civil forfeiture provision of title 18, United States Code, to expand the property subject to forefeiture. Section 27(a) adds property that represents, or is traceable to, the gross receipts obtained from any of five specified offenses, but only if the offense relates to the sale of assets obtained or held by the Federal Deposit Insurance Corporation (as conservator or receiver) or the Resolution Trust Corporation (as conservator or receiver). The six offenses are: (1) 18 U.S.C. § 666(a)(1) (relating to federal program fraud); (2) 18 U.S.C. § 1001 (relating to false statements); (3) 18 U.S.C. § 1031 (relating to major fraud against the United States); (4) 18 U.S.C. § 1032 (relating to concealment of assets); (5) 18 U.S.C. § 1341 (relating to mail fraud); and (6) 18 U.S.C. § 1343 (relating to wire fraud). Section 27(a) also amends the civil forfeiture provision to provide that if specified offense is committed for the purpose of (1) executing or attempting to execute a scheme or artifice to defraud or (2) obtaining money or property by means of false or fraudulent statements, then the property forfeitable includes all property—real or personal, tangible or intangible—that is obtained by means of the offense. Finally, Section 27(a) amends the civil forfeiture provision to authorize the Attorney General to distribute property forfeited under the new language to the Resolution Trust Corporation or a federal financial institution regulatory agency.

Section 27(b) of the bill amends the criminal forfeiture provision of title 18, United States Code, to order to convicted defendant to forefeit property representing, or traceable to, the gross receipts of six specified offenses involving the sale of assets obtained or held by the Resolution Trust Corporation as conservator or receiver. The specified offenses are: (1) 18 U.S.C. § 666(a)(1) (relating to federal program fraud); (2) 18 U.S.C. § 1001 (relating to false statements); (3) 18 U.S.C. § 1031 (relating to major fraud against the United States); (4) 18 U.S.C. § 1032 (relating to concealment of assets); (5) 18 U.S.C. § 1341 (relating to mail fraud); and (6) 18 U.S.C. § 1343 (relating to wire fraud). Section 27(b) also amends the criminal forfeiture provisions to provide that if the specified offense is committed for the purpose of (1) executing or attempting to execute a scheme or artifice to defraud, or (2) obtaining money or property by means of false or fraudulent statements, then the property that can be ordered forfeited includes all property—real or personal, tangible or intangible—that is obtained by means of the offense.

H.R. 5050: No comparable provision to Section 27 of the Schumer Amendment.

Section 28

Section 28 of the bill amends section 11 of the Federal Deposit Insurance Act to prohibit an individual who has been convicted of a specified major banking offense from purchasing assets of a failed institution, where that individual is in default on loans to that institution and where such loans, if left unpaid, will result in a substantial loss to the institution. The specific offenses are:

18 U.S.C. § 215(a) (relating to receipt of commissions or gifts for providing loans);

18 U.S.C. § 656 (relating to bank embezzlement);

18 U.S.C. § 657 (relating to thrift institution embezzlement);

18 U.S.C. § 1005 (relating to fraudulent bank entries);

18 U.S.C. § 1006 (relating to fraudulent federal credit institution entries);

18 U.S.C. § 1007 (relating to Federal Deposit Insurance transactions);

18 U.S.C. § 1008 (relating to Federal Savings and Loan Insurance Corporation transactions);

18 U.S.C. § 1014 (relating to fraudulent loan or credit);

18 U.S.C. § 1032 (relating to concealment of assets);

18 U.S.C. § 1341 (relating to mail fraud), if the offense affects a financial institution applications);

18 U.S.C. § 1343 (relating to wire fraud), if the offense affects a financial institution; and

18 U.S.C. § 1344 (relating to bank fraud).

H.R. 5050: No comparable provision to Section 28 of the Schumer Amendment.

SUBTITLE C—IMPROVED PROCEDURES FOR HANDLING BANKING-RELATED CASES

Subtitle C contains provisions to improve the way in which banking-related cases are investigated and extends the limitation period for civil actions under section 951 of FIRREA.

Section 31

Section 31 of the bill expands the wiretap provision of title 18, United States Code, to authorize the Justice Department to seek an order permitting use of a wiretap to investigate three financial institution-related offenses. The three offenses are:

18 U.S.C. § 215(a) (relating to receipt of commissions or gifts for providing loans);

18 U.S.C. 1014 (relating to fraudulent loan or credit applications); and

18 U.S.C. 1344 (relating to bank fraud).

Section 31 also makes technical amendments to the wiretap provision in order to correct clerical and typographical errors.

H.R. 5050: Section 31 of the Schumer Amendment is virtually identical to Section 316 and part of Section 315 of H.R. 5050.

Section 32

Section 32(a) of the bill amends section 8 of the Federal Deposit Insurance Act to authorize federal banking agencies to request the assistance of foreign banking authorities and to establish an office outside of the United States. Section 32(a) also authorizes federal banking agencies to assist foreign banking authorities.

Section 32(b) makes a parallel amendment to section 11 of the Federal Deposit Insurance Act concerning the Federal Deposit Insurance Corporation and the Resolution Trust Corporation, as conservator or receiver.

H.R. 5050: Section 32 of the Schumer Amendment is virtually identical to section 303 of H.R. 5050.

Section 33

Section 33 of the bill amends section 951 of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 to provide a limitation period for commencing a civil action authorized by section 951. The amendment provides that a suit under section 951 must be commenced within ten years from the date the cause of action accrues. Current law (28 U.S.C. § 2462) provides a five year period for such suits.

H.R. 5050: No comparable provision to Section 33 of the Schumer Amendment.

Section 34

Section 34 of the bill amends section 1 of the Federal Deposit Insurance Act to expand the Federal Deposit Insurance Corporation's subpoena authority to apply to closed, as well as open, institutions. The amendment also gives the Resolution Trust Corporation, acting as conservator, receiver or exclusive manager, subpoena authority for an insured depository institution in conservatorship or receivership. Such authority in a failed institution situation would provide the Federal Deposit Insurance Corporation and the Resolution Trust Corporation a powerful tool in conducting closed institution investigations. The Federal Deposit Insurance Corporation's current authority to investigate and trace fund movements is extinguished when the institution is placed in receivership. This provision will give the Federal Deposit Insurance Corporation and the Resolution Trust Corporation the ability to "follow the money" even after the institution fails.

SUBTITLE D—STRUCTURAL REFORMS TO IMPROVE THE FEDERAL RESPONSE TO CRIMES AFFECTING FINANCIAL INSTITUTIONS

Subtitle D has provisions establishing a Financial Institution Fraud Unit in the Department of Justice, authorizing interagency cooperation in financial institution cases, and providing additional investigatory authority for the Secret Service.

H.R. 5050: Section 34 of the Schumer Amendment is virtually identical to Section 301 of H.R. 5050.

Section 41

Section 41(a) of the bill establishes a Financial Crime Unit, headed by a Special Counsel, within the office of the Deputy Attorney General. Section 41(b) provides that the Special Counsel is responsible, and reports directly, to the Deputy Attorney General. Section 41(c) provides that this section sunsets in five years.

Section 42

Section 42(a) provides that the President appoints the Special Counsel, by and with the advice and consent of the Senate. Section 42(b)—sets forth the responsibilities of the Special Counsel, which includes supervising and coordinating investigations and prosecutions of crimes in and against the financial services industry. Section 42(c) provides that the Special Counsel is paid at the rate for level V of the Executive Schedule.

Section 43

Section 43 of the bill authorizes the Attorney General to assign to the Financial Institution Fraud Unit whatever personnel the Attorney General deems necessary in order

to provide an appropriate level of enforcement activities in the area of crimes in and against the financial services industry.

Section 44

Section 44(a) of the bill requires the Attorney General to establish such financial institution fraud task forces as the Attorney General deems necessary in order to ensure that adequate resources are made available to investigate and prosecute crimes in and against financial institutions and to recover the proceeds of unlawful activities from persons who have committed crimes in or against the financial services industry. Section 44(b) requires the Attorney General to determine how each task force is to be supervised and permits the Attorney General to have the Special Counsel supervise any task force.

Section 44(c) establishes a senior interagency group for the purpose of assisting in the identification of the most significant financial institution cases and in the allocation of investigative and prosecutorial resources. The Attorney General appoints the members of the groups, which is chaired by the Assistant Attorney General in charge of the Criminal Division. Section 44(c) requires, however, that the group include senior officials from the Justice and Treasury Departments, the Office of Thrift Supervision, the Resolution Trust Corporation, the * * * the Comptroller of the Currency, the Board of Governors of the Federal Reserve System, and the National Credit Union Administration.

H.R. 5050: Section 41 through 44 of the Schumer Amendment are derived from the Administrative Plan to combat S&L crimes announced by the President on June 22nd. These proposals are already being implemented by the Department of Justice.

Section 45

Section 45(a) of the bill permits the Justice Department to accept, and another federal agency to provide, without reimbursement, the services of attorneys, law enforcement personnel, and other employees in order to assist in the investigation and prosecution of crimes in or against financial institutions. Section 45(b) gives attorneys detailed to the Justice Department from other federal agencies the authority, subject to the supervision of the Attorney General, to perform functions that United States attorneys are authorized to perform.

H.R. 5050: Section 45 of the Schumer Amendment is virtually identical to Section 208 of H.R. 5050.

Section 46

Section 46(a) of the bill amends 15 United States Code § 3056(b)(1) to expand the investigative authority of the Secret Service to seven financial institution offenses. The offenses are: (1) 18 U.S.C. § 215(a) (relating to receipt of commissions or gifts for providing loans); (2) 18 U.S.C § 656 (relating to bank embezzlement); (3) 18 U.S.C. § 1005 (relating to fraudulent bank entries); (4) 18 U.S.C. § 1341 (relating to mail fraud), but only if the offense affects a financial institution applications); (5) 18 U.S.C. § 1343 (relating to wire fraud), but only if the offense affects a financial institution; (6) 18 U.S.C. § 1344 (relating to bank fraud); and (7) 18 U.S.C. § 1510(b) (relating to obstruction of criminal investigations).

Section 46(b) provides that an investigation conducted under the authority of the amendment made by Section 46 is subject to the direction and supervision of the Attorney General. Section 406(c) provides that the amendments made by Section 46, (1) do not alter the authority of any other federal law enforcement agency and (2) expire when the Resolution Trust Corporation's authority expires.

H.R. 5050: No comparable provision to Section 46 of the Schumer Amendment.

SUBTITLE E—REPORTING REQUIREMENTS

Section 51

Section 51 of the bill requires the Attorney General to report to Congress on a quarterly basis regarding activities of the Department of Justice with respect to crimes affecting financial institutions. Specifically, the section mandates that the Attorney General's reports include information regarding criminal referrals, the number and status of investigations, prosecutions and civil actions, a description of sentences obtained and resources devoted to the above efforts with respect to pursuing crimes affecting financial institutions.

SUBTITLE F—NATIONAL COMMISSION ON FINANCIAL INSTITUTION REFORM, RECOVERY AND ENFORCEMENT

Subtitle F establishes, sets forth the duties and powers of, and requires reports from a National Commission on Financial Institution Reform, Recovery, and Enforcement.

H.R. 5050: Section 51 of the Schumer Amendment requires the Attorney General to report to Congress certain information concerning S&L prosecutions on a quarterly basis. H.R. 5050 requires the same type of information to be reported, but also requires the Attorney General to appear before the House and Senate Banking Committees on a quarterly basis. This provision was derived from H.R. 4990 sponsored by Congressman Neal with wide bipartisan support.

Section 61

Section 61 of the bill establishes the duties of the Commission, specifically to:

Investigate the causes of the S&L crisis;

Recommend methods for disposing of assets by the RTC;

Recommend methods and procedures for regulating and supervising the financial services industry;

Recommend administrative or legislative action to protect the safety and soundness of the financial services industry;

Investigate and develop recommendations for strategies and tactics for law enforcement regarding financial crimes;

Investigate the causes of fraud and abuse in the industry; recommend measures to prevent financial crimes from occurring in the future.

H.R. 5050: Section of the Schumer Amendment establishes a National Commission to study different aspects of the S&L problem. Section 61 adopts verbatim all of the duties of the National Commission on Financial Crimes established in Section 101 of H.R. 5050. The Schumer Amendment adds certain new duties for the Commission which include: (1) Studying the causes of the S&L problem; (2) Recommendations for RTC reforms: and (3) Recommendations for actions to protect the safety and soundness of the financial services industry.

Section 62

Section 62 of the bill provides for membership of the 12 person Commission. The President shall appoint four individuals; the Speaker of the House of Representatives shall appoint four individuals, one upon the recommendation of the minority leader of the House; the President pro tempore of the Senate shall appoint four individuals, one upon the recommendation of the minority leader of the Senate.

This section also provides for terms of the Commission including, terms of appointment, filling vacancies, prohibition on compensation, travel expenses, meetings, etc.

H.R. 5050: Section 62 of the Schumer Amendment is similar to Section 102 of H.R. 5050. Schumer, however, establishes a 12 Member Commission evenly divided between the political parties whose Chairman is elected by the Commissioners. H.R. 5050 establishes a 9 member Commission that is chaired by a Presidential appointee.

Section 63

Section 63 of the bill amendment establishes the powers of the Commission, including the power to hold hearings, subpoena witnesses and evidence, administer oaths, request official data and administrative support services.

Section 64

Section 64 of the bill provides for staffing of the Commission.

Section 65

Section 65 of the bill permits the Commission to submit interim reports to the President and Congress as appropriate, and requires the submission of the final report within 1 year from the date of enactment.

Section 66

Section 66 mandates the termination of the Commission 30 days after the submission of the final report.

H.R. 5050: Sections 63 through 66 of the Schumer Amendment are virtually identical to Sections 106 through 107 of H.R. 5050.

Section 67

Section 67 authorizes an appropriation of $1 million for the Commission.

H.R. 5050: No comparable provision to Section 67 of the Schumer Amendment.

SUBTITLE G—AUTHORIZATION

Section 71

Section 71 of the bill authorizes $153 million for the Department of Justice for investigators, prosecutions and civil actions involving financial institutions for fiscal years 1991 through 1993. With respect to fiscal years 1991 and 1992, the authorization will be allocated as follows:

FBI—$100,000,000.

U.S. Attorneys—$39,000,000.

Criminal Division—$3,000,000.

Civil Division—$10,000,000.

Tax Division—$1,000,000.

With respect to fiscal year 1993, the authorization is not specifically allocated amongst these entities.

The current authorization under FIRREA for these activities is $75 million for fiscal years 1990 through 1992.

H.R. 5050: Section 207 of H.R. 5050 is similar to Section 71 of the Schumer Amendment. Schumer authorizes a total of $153M excluding IRS agents, while H.R. 5050 authorizes $152M including the IRS. H.R. 5050 does not include the details that the Schumer Amendment contains to allocate the authorization between different programs.

INTRODUCTION OF THE MEDICATION PRICE CONTROL ACT OF 1990

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. STARK] is recognized for 5 minutes.

Mr. STARK. Mr. Speaker, today I am introducing the Medication Price Control Act of 1990, which would amend the Internal Revenue Code of 1986 and disallow research and development tax credits for pharmaceutical companies introducing copycat drugs or excessively inflating the price of prescription drugs.

Over the past decade, drug prices have risen at a rate almost three times the general rate of inflation. Medi-Span Inc. recently published data regarding drug pricing between 1988 and early 1990. Their data shows, for example, that major pharmaceutical manufacturers Sandoz and UpJohn raised their prices on Visken and Xanax, respectively, an average of 22 and 17 percent—per year. These increases come at the same time that investment analysts Hembrech & Quist, Inc., stated that "return on equity for the pharmaceutical industry has been consistently above that of the S&P 400. If anything, this gap has widened over the past 10 years." A study, also released in 1988, by the Italian pharmaceutical manufacturing association reported that European citizens pay up to five times less for brand name drugs than we do in the United States. Further, the drug companies' executive compensation packages remain one of the highest among American industries. We should not be providing research and development tax subsidies to American Home Products at the same time they pay their president, J.R. Stafford, more than $1.5 million and continue to raise their drug prices.

I might be able to understand modest increases in drug prices, if I believed that the industry was incurring huge costs to achieve medical miracles and produce significant new products. But a recent excellent report by the Senate Special Committee on Aging seems to prove otherwise. The committee found that the bulk of research and development by prescription drug manufacturers produces "insignificant new products and add little or nothing to drug therapies already on the market." Of the 348 new drugs introduced by the top 25 U.S. drug makers between 1981 and 1988, only 3 percent were judged as significant contributions by the FDA. During the same period, these same companies introduced 292 drugs which the Food and Drug Administration cited as having insignificant or no therapeutic potential—but which they were able to use in figuring research and development tax credits.

It is this copycat or me-too factor which greatly contributes to the rising cost of new medicines. Because they are not developing significant new drugs at the same rate they achieved during the fifties and sixties, companies must raise prices on existing drugs to maintain the profit margin to which they have become accustomed. In addition, pharmaceutical companies are beginning to advertise their products directly to the public. Private citizens are usually unable to make logical, informed decisions as to drug choices—this should be left to the doctor. This direct advertising expense further inflates the price of the drug to the consumer. It is not increased prescription drug use which accounts for rising drug costs to our Government: 97 percent of the increases between 1980 and 1987 were a result of the inflation in drug prices—only 3 percent due to increased usage.

While I do understand that the cost of bringing a new drug to market is high, I do not feel that the taxpayer should offer research and development tax credits to companies introducing drugs with no signficant value.

The bill which I am introducing today would deny tax credits for new drugs which the Food and Drug Administration finds have no new therapeutic gains. In addition, it would penalize pharmaceutical firms excessively inflating the prices of valuable drugs by revoking their R&D tax credits for the year in which the increase of the drug price was greater than the CPI plus 2 percent.

The time is already here when the Federal and State governments cannot afford the needed drugs for their poorest citizens. The antischizophrenic drug clozaril is a prime example. While most agree that the drug can be provided at a cost of $10–$20 per week, its manufacturer, Sandoz, has proposed a monitoring program which would drive prices to about $170 per week. Experts agree that this monitoring program could be performed much cheaper, and see the Sandoz plan as only an extra profit generator. Although clozaril might be able to help many ill persons, its high price puts it out of reach of most of those who need the treatment.

I hope that my colleagues will join me in approving this legislation. We need to send the message to the pharmaceutical manufacturers that we will no longer offer tax credits for the development of copycat drugs while drug prices continue to inflate obscenely. We cannot allow the health of our poorest citizens to be jeopardized by an industry solely interested in their balance sheets.

OPERATION OF THE "MEDICATION PRICE CONTROL ACT OF 1990"

FDA designation	Eligible for R&D tax credit	Inflation control
A (important therapeutic gain).	Yes	If price increase greater than CPI plus 2 percent, company loses R&D credit for a 1 year period.
or		
B (modest therapeutic gain).	Yes	Do.
C (little or no therapeutic gain).	No	N/A.
Orphan drugs	Does not affect	Does not affect.

PROPOSED CRIME BILL DOES MORE HARM THAN GOOD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida [Mr. MCCOLLUM] is recognized for 5 minutes.

Mr. MCCOLLUM. Mr. Speaker, I have taken this time today to talk about the crime bill that the Judiciary Committee passed out of its full committee yesterday and will come to the floor here maybe as early as next week.

Unfortunately, this bill does more harm than good in the critical areas that it addresses. I am not here to talk about the things that did not happen that should have happened in the bill, but rather to talk about provisions that I think my colleagues would find startling if they know what is in this bill, as bad as it is. We just simply cannot let it wait until we get it to the floor to understand what is in here.

First of all, let us talk about capital punishment or the death penalty.

What does this bill do in that regard? A lot of us wanted to see the death penalty procedures at the Federal level finally reinstated after the 1972 decision of the Supreme Court. Well, that has not occurred. In fact, what has occurred in this bill is that we will actually repeal a number of the existing crimes on the books today that could get the death penalty. In other words, you will not be allowed to give the death penalty, if this bill goes through, for such things as planting a bomb on a plane or mailing a bomb on a plane when somebody is killed as the plane explodes, or you cannot have the death penalty any longer for the murdering of a member of the FBI, an FBI agent. You will also not be able to have the death penalty imposed because of murder in the course of bank robbery.

There is a whole host of those things, a long list of those things which have been exempted which for history's sake and all the past and currently under Federal law you have the death penalty on the books for, it would eliminate if this bill is passed.

Second, on the procedures alone, it is unlikely we are going to get the death penalty imposed very often because procedures that would be used now under the law that would be put in effect with this bill would require at least two aggravating factors, not one, which is what the normal requirement is, for getting the imposition of the death penalty, but at least two.

That means if the President of the United States is assassinated, the very fact that he is assassinated by somebody is not enough. It is going to require that the guy have some previous criminal record or there be some other factor that has to be proven up.

In the area that we have been working on for a long time trying to get some reforms in to expedite the carrying out of sentences, especially the death penalty, to keep people from appealing it again and again and again, in terms of the so-called habeas corpus laws. Justice Powell has said that the provision in this bill that is coming to the floor of the House is such that it would—as a practical matter, we would not ever see a death penalty, at least at the Federal level and maybe at the State level, ever carried out in the country again if this law is passed.

And the exclusionary rule, you know, a lot of us would like to see more evidence be admitted from the searches that police officers make at the scene when they find heroin or some other contraband, cocaine, whatever, we would like to have it intro-

duced into evidence, admitted into evidence.

Right now, the court has the exclusionary rule that if it is an exclusionary search and seizure you cannot have that admitted. Well, this bill, this particular provision in the bill now only codifies existing law. It does not change the law to allow it, more evidence is required to be put in.

Instead, we do not get any relief.

A lot of us wanted to see certain parameters for good-faith exceptions for police officers that we do not let these people off on technicalities. But that is not what this law does. It makes it worse, it makes it tougher. In fact, it narrows the parameters of how the court may allow evidence in and codifies it.

Last but not least, I want to point out the fact that under this legislation as it comes to the floor, if it were to become law, there is going to be a "Willy Horton provision." To me, in view of the last Presidential campaign, this is amazing. Under this bill, we are going to give the Bureau of Prisons the power to release anybody who has been convicted and sentenced for a Federal crime on a work-release program for anybody for the entire duration of their sentence, even a 20- or 30-year sentence. There is absolutely whatsoever on the work-release program that the Bureau of Prisons could let somebody out under this.

Right now, Federal law says you cannot do it for more than 6 months or the last 10 percent of your sentence. It is absurd to open the door like that and let people out on the streets.

I know we have overcrowded conditions in our prisons, but the answer is to build more prisons and to take remedial steps in that regard. It is not to let people out on the streets, especially not to let the Bureau of Prisons make that decision.

So all in all my point to my colleagues is that you should be very wary of this bill. It actually eliminates the opportunity for the death penalty under conditions that could be achieved under existing Federal law. It changes the rules of procedure on the death penalty not to allow it to be constitutional but to actually require tougher procedural hoopla to go through that effectively means we will probably never have capital punishment under Federal law again. And it changes the State rights in this situation so that it could eliminate capital punishment altogether.

It is a very dangerous bill. I urge my colleagues to look at it very carefully.

THE EXCLUSIONARY RULE IN THE CRIME BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Hampshire [Mr. DOUGLAS], is recognized for 5 minutes.

Mr. DOUGLAS. Mr. Speaker, I wanted to also speak on the question of the crime bill that came out of Judiciary yesterday, specifically the question of the exclusionary rule that Mr. MCCOLLUM, the gentleman from Florida just mentioned. We have a very bad section in that crime bill dealing with the exclusionary rule of evidence, and I just wanted to explain briefly what the exclusionary rule is.

If you are involved with an interrogation of an individual and you use undue force, whether it is physical or psychological, that confession that comes out of that station house is inherently suspect.

The courts in Miranda and other decisions have said that because of that, we will keep that evidence out. On the other hand, the exclusionary rule is one that arises out of the fourth amendment, and what it says is that it really does not matter if it was good or bad evidence, whether it really was heroin or cocaine or stolen checks, the catch is that unless the police officer did everything absolutely 100-percent correctly, all the courts in this country are required to exclude the seized evidence at trial.

Now, I was a judge on the New Hampshire Supreme Court back in the early 1980's, in 1982. I dissented at that time and said this is an inflexible rule. It hits outrageous conduct as well as innocent mistakes. It hits bad faith, malicious conduct, the same as good-faith mistakes by a police officer.

So for me this has been a cause that I feel very strongly requires that the Congress say to the Supreme Court and to the courts of our land that if the police officer in objective good faith, not what he thought but what an objective good-faith determination reveals, conducted the search or conducted the seizure in basically proper accordance with the law as it would otherwise be construed by the courts, but he made some technical mistakes, that technicality will not keep that evidence out.

□ 1800

Unfortunately, while we have a very simple resolution of the problem, and I offered it, it was defeated on a 22-to-14 vote, and instead the Sangmeister version was put in that accomplishes absolutely nothing.

The gentleman from Illinois has a measure that codifies the rule that if the evidence is seized under a search warrant, and it is not 100-percent correct, it can come in in good faith nonetheless. That is already the law of the land. The United States versus Leon has already decided that. By his version being put into the crime bill, we are in effect telling the Fifth Circuit and the Eleventh Circuit Court of Appeals who have already adopted the approach I recommend, that "You are wrong." I think that is an incorrect way to address the crime problem in this country.

I would urge that the crime bill be stricken of that section of the Sangmeister amendment, that my language be put in for the good faith exception to be in its broadest sense the law of the land, and I would certainly urge that that be one of the things we try and correct as that crime bill comes to the floor.

I just wanted to add one historical footnote. I, too, want to praise the gentleman from Ohio [Mr. WYLIE] and the gentleman from New York [Mr. FISH] and the gentleman from Indiana [Mr. HILER] and all the others who were so involved in crafting a very good bill that was stolen from them and made to appear to be some kind of a great solution to the S&L crisis. That had been worked on on the Republican side of the aisle. They did an excellent job, and it is a good, strong measure. I support it. I voted for it in the committee, but it really should not be part of that comprehensive crime bill. It should be stripped out, voted on separately and, in fact, it needs to be strengthened. There are some strengthening amendments that I know we could be forthcoming with if we had that opportunity. Even though we do not get to run this place, those who do should show their good faith and allow this S&L bill, which is H.R. 5353 to come to the floor as soon as possible for a vote. I know that bills come to this floor that have never been through a hearing, that have never been through subcommittee. We just did it last week with the so-called balanced budget statute. So, if the leadership really wants to vote, let H.R. 5353 come up next week.

ACTION IN COMMITTEE ON THE JUDICIARY

The SPEAKER pro tempore (Mr. PENNY). Under a previous order of the House, the gentleman from Pennsylvania [Mr. GEKAS] is recognized for 5 minutes.

Mr. GEKAS. Mr. Speaker, the American people, by a wide margin in every opinion poll that has been taken in the last 10 years have indicated, without question, that they favor the imposition of the death penalty on proper cases of the series murderer, savage, heinous, tragic cases that the newspapers reveal almost every single day. There is no question about that.

So, when we in the Committee on the Judiciary try to fashion a death penalty statute that will work for drug dealers who kill in their continuing enterprises in which they are involved, for a mass murderer in a transportation center, I am not making these things up. These are things that

happen in our country. When a person tries to kill the President of the United States or commits treason or espionage. Am I making these things up? Are they not a part of our everyday life, it seems, and because of that we need to crack down on all these phases of crime, especially those which deal with the taking of innocent life by hoodlums and murderers.

So what do we have? When we finally get to the point where the Committee on the Judiciary is pushed into considering a death penalty, the opponents of the death penalty win today because they allow a death penalty that is ineffective to stay on the books. We have had a system in many States whereby a defendant's rights in a murder case are fully defended. If he is found guilty of murder in the first degree, there is a separate hearing on whether he should have the death penalty imposed, and the same jury decides through a series of evidence, whether or not there is sufficient aggravating circumstance to allow the imposition of the death penalty. What the opponents of the death penalty have done is insist that two aggravated circumstances have to be shown in order to have the death penalty apply.

What does that mean? That means that if someone has killed already, has a murder conviction on his record, and now commits another one, then the jury has to decide whether or not the death penalty should be imposed for the second one. He has escaped the electric chair in the first one. The jury now has to find 2 aggravated circumstances, one on top of the fact that he committed a murder sometime before the one for which he is being tried. That is outrageous. One aggravating circumstance, especially a previous murder, should be enough to allow a jury to decide that now in the second killing perpetrated by this individual that the death penalty ought to be applied.

These are the kind of killing amendments, to use the wrong phrasing of the death penalty statute that the majority of the Committee on the Judiciary are attempting to foist on the American public, to say and to be able to go back home and say, "We are for the death penalty," and put one on the books that did not work, that cannot result in putting a desperate murderer, who would kill a family or a whole series of people, and still be able to escape the electric chair because of the burden of proof required in the determination of whether or not the death penalty ought to be applied. That is something that we are going to try very hard to overcome.

The second thing, how many people have Members discussed the situation with, having to do with a criminal escaping on a technicality? How many times have we read that the police catch someone with the goods, are in court, and then because of a technicality the judge frees the man or individual who is in front of them on a very serious charge? Let me give Members a quick example. There is one where a search warrant was issued for pornography, or some other kind of offense, and the officers go in and find a whole load of cocaine. Because the search warrant did not have in it "looking for cocaine," and they seize the cocaine, and they know whose it was, the judge has to throw it out because it did not list it on the search warrant. Now, that is outlandish.

We are trying to do something about it. This exclusionary rule about which this is, has to be reformed. We have to allow police officers who in good faith enter the premises for whatever purpose, for some other crime that they are investigating, and happen to find cocaine. Well, surprise, surprise perhaps, but they found cocaine. We should not permit the laws of the land to prohibit the police from using that evidence, and let the evidence go scot free because the search warrant had "pornography" on it or had "a gun" on it or some other object, other than the cocaine, which is killing our youngsters right and left.

These are the kinds of things we are trying to do. The Committee on the Judiciary's leadership and those who oppose these tough law enforcement measures are making it tough for Members who want to abide by the wishes of the American people to get tough on crime, especially on the death penalty and on the exclusionary rule, to make sure that technicalities do not result in freeing desperate hoodlums who would kill and who would steal and would poison our young people.

RAINBOW LOBBY UPDATE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. DYMALLY] is recognized for 60 minutes.

Mr. DYMALLY. Mr. Speaker, today marks 1 year since I embarked on a project to expose a political cult known in Congress as the Rainbow Lobby, and ofttimes confused with Reverend Jesse Jackson's Rainbow Coalition.

□ 1810

It took the media approximately 2 to 3 years to uncover Lyndon LaRouche's cult, so it is no surprise that two of the five journalists credited with uncovering LaRouche have done tremendously valuable work on uncovering this so-called Rainbow Lobby, which is but one of myriad front organizations, all leading to cult strongmen and LaRouche associated Fred Newman.

The credit should go to Dennis King and Chip Berlet. Other reporters who wrote articles on this cult are Ken Lawrence and Charles Tisdale of the Mississippi Jackson Advocate.

The problem is, Mr. Speaker, that despite these heroic efforts, major newspapers have decided to overlook the evidence and instead provide coverage exuding with laudatory remarks about the Rainbow Lobby which is not even afforded to the Rainbow Coalition headed by the Reverened Jesse Jackson.

The Washington Post devoted two-thirds of the Federal Page to the Rainbow Lobby, and the Los Angeles Times picked up the story which sets this front organization and the expert not only on Africa but Eastern Europe.

Evidence placed in the CONGRESSIONAL RECORD shows that this cult cultivated relations with journalists and fed them information on Members of the Congress, especially members of the Congressional Black Caucus.

According to an internal cult memo introduced in the CONGRESSIONAL RECORD on May 17, 1990, on page E1626, they peddled a story on me to Washington Post reporters Dan Morgan and Jim McGee. The latter is described as a "beat up on black Congressmen specialist."

It is unfortunate, Mr. Speaker, that newspeople faced with the pressure to struggle with captivating headlines such as "baby born with tattoo" or "wife says: I am married to the werewolf,'" or "lonely aliens kidnap U.S. pets into UFO's" in the National Enquirer and other similar tabloids opt to write negative stories on black Congressmen rather than expose LaRouche and the Rainbow Lobby.

So I want to bring to the attention of Members this devious group, this group that indulges in intrigue and divisiveness, which has singled out certain Members for harassment, and I will place in the RECORD, to support my assertion, three articles describing their work.

This so-called Rainbow Lobby was created as another front organization for Fred Newman and his political cult in order to confuse Congress and the public so they will allow its shady members access, thinking it is affiliated with Reverend Jackson's Rainbow Coalition.

Let me make that abundantly clear. The Rainbow Lobby is a New York-based group, with an office in Washington. It has nothing to do with Rev. Jesse Jackson's Rainbow Coalition. Rather, they have used that name to confuse the public. The only relationship is the name, "Rainbow," which was adopted by design. Those who wish to pursue that, pot of gold at the end, instead of discovering a scenario for the cult, whose origins are traced to Lyndon LaRouche, may look at these articles which I will place in the RECORD.

Mr. Speaker, the Rainbow Lobby has singled out some Members of Congress. In 1986, they singled out Congressman GRAY. They ran a candidate against Congressman GRAY. In 1988, they singled out Congressman Leland, myself, Congressman FLOYD FLAKE, and Congressman FAUNTROY on matters dealing with Haiti.

It ought to be carefully observed that these people concentrated most of their divisive energies on Members of the Congressional Black Caucus. They have also attempted to infiltrate a group known as the New Jewish Agenda. The New Jewish Agenda discovered who they were and expelled them from their organization. I will place in the RECORD this memorandum from the New Jewish Agenda.

Other groups across the country, representing gays, Lesbians, and progressives, have all spoken about the devisive nature of this group and their method of operation. One of the methods they use is to file lawsuits against Members. They provide false information to newspapers about Members with whom they disagree, and they smear these Members in the newspapers which they publish on a weekly basis.

What I am attempting to do today, Mr. Speaker, after 1 year of careful research is to provide a documentation to the Members of the House for their examination so that when this group comes around, they will know exactly with whom they are dealing, that they are not dealing with Rev. Jesse Jackson's Rainbow Coalition but they are dealing with the Rainbow Lobby.

Last week, pretending that they were somehow affiliated with Rev. Jesse Jackson, they were able to secure a room in the Senate to put together a seminar on Haiti. It is interesting to note that the two countries they focus on, because of the belief that it would attract support from the African-American community, are Haiti and Zaire. But the Members or the people in the Senate, the Senate Rules Committee, those who gave them this room, were under the impression they were Jesse Jackson's supporters.

They operate in New York, and they are well funded. Last year, Mr. Speaker, they spent over $1 million here in Washington. When the Republicans and the Democrats look around their treasuries and they find they are short of cash, they need only to look at the finances of the Rainbow Lobby. They raise millions of dollars through a therapy center. Some believe they are centers for brainwashing some of their members, and one center in New York in particular, the Castillo Center, raised $2.7 million.

A number of investigative reporters from time to time have brought to the attention of the American public their intrigue, and I will place in the RECORD some of these articles so that Members can clearly see that whatever I say here is documented by well researched articles.

Mr. Speaker, on a more personal note, some time ago this group came to me, and believing they were part of Jesse Jackson's operation, I, of course, greeted them very warmly and began working with them. I worked with them on some matters on Haiti, and I worked with them on matters on Zaire, and on one occasion they brought the opposition leaders from Zaire to meet with me. At that time I was in a conference committee on a State Department authorization bill and was unable to meet them, as a result of which they lambasted me for my refusal to meet with their guests. That was not exactly true. The fact is that I was just busy. But they have filed a $2 million suit against me, and they tried to gag me.

They asked a Federal judge, Mr. Speaker, to prevent me from coming on the floor to discuss their intrigue and their deceptiveness and their divisiveness and their harassment directed against Members. The judge was so incensed that he forbade their lawyer from coming back to his chambers and did not grant a restraining order.

They also ran a candidate against me in Los Angeles. They got a lawyer, and without knowing what he was getting into, he ran against me and disrupted a meeting my daughter was organizing. They came to a dedication of a park to picket me, and by and large they smeared me in the newspapers every week.

So today, after 1 year of research, I am inserting documents and well-researched material in the RECORD to bring to the attention of the Members the intrigue of this group, with the hope that the public at large would understand that the Rainbow Lobby and its affiliates, the U.S. Congo Friendship Committee, the New Alliance Party, the New Alliance Newspaper, the Castillo Social Therapy Centers, and a number of other front organizations are in no way related to Rev. Jesse Jackson's Rainbow Coalition.

This group is a very divisive group. As I stated before their main targets are members of the Congressional Black Caucus. They operate from New York and have an office here in Washington.

□ 1820

So, Mr. Speaker, I hope, when they come around to Members, that Members understand that the Rainbow Lobby is not Jesse Jackson's Rainbow Coalition, and hopefully by tomorrow this assertion on my part, well documented, with a series of well-researched articles, not to mention the fact that over the last year I have placed in the RECORD material about this group, their obsession with targetting members of the Congressional Black Caucus, smearing them, using the first amendment guarantees, placing with reporters in the metropolitan newspapers false information about Members and, by and large, trying to make life difficult for some of us. Mr. Speaker, I hope that Members at least will be alerted, believing, as I do, in a free and democratic society and free speech. I am not in any way trying to gag them, but simply to say to Members, as they come around, I hope they will understand whom they are and what they are about, that this is not a group designed to bring people together. This is a group designed to be very divisive.

Finally, Mr. Speaker, I think that I will have had the last word on this issue. It has been 1 year now that I have been talking about this group and trying to bring their work or their divisiveness, and their harassment and their intrigue to the American public, and I am pleased that I am giving to the Members of the House material which basically supports the information which I have just spoken about.

Mr. Speaker, there is one last word I should add. The group filed a complaint against me for having gone to Zaire. I went to Zaire in my capacity as a member of the Committee on Foreign Affairs, filed the necessary papers promptly, and other Members, I might add, have gone to Zaire. They did not single those Members out. But they filed a complaint, a harassment complaint. The whole modus operandi is harass, harass, harass until you either give up, surrender or let them go about their work triumphantly.

I am just a little too stubborn, Mr. Speaker. I am not going to let a group such as this beat me down. I have been through enough political wars to know that truth will win out in the final analysis and that my record speaks for itself.

So, I conclude with just a word of caution to my colleagues in the House and, hopefully, Members in the other House will read the RECORD to know the true nature of this group which purports to be pushing a progressive agenda, but in effect is a very divisive group which indulges in harassment of Members of Congress, and in particular, members of the Congressional Black Caucus.

[From the Los Angeles Times, June 10, 1990]

GROUP SAYS TWO-PARTY SYSTEM IN U.S. CONTRIBUTES TO EROSION OF DEMOCRACY

(By Dan Balz)

WASHINGTON.—Many Americans have watched the flowering of democracy in Eastern Europe with a sense of pride. Nancy Ross looks on in frustration and envy.

The outbreak of free elections in Eastern Europe and the multitude of political parties competing for support have only heightened Ross' conviction that something

is wrong in this country. She argues that the antidote to low voter turnout, public disgust at negative campaigns and the absence of substantive debate in campaigns is a little Eastern European-style politics.

Ross, the executive director of the Rainbow Lobby, a small, left-liberal, grass-roots organization, believes that the two major political parties in this country have a stranglehold on the process and that their collusion protects incumbents and freezes candidates with radical or innovative ideas out of the political dialogue.

Her group is trying to attract attention to a package of proposals that Ross believes will stimulate interest in the political process. "Our main concern is the erosion of democracy in this country," she said.

The Rainbow Lobby was organized in 1985 by a number of people who had worked the year before on Jesse Jackson's presidential campaign (hence the similarity of the name to the Rainbow Coalition, even though there is no connection).

So far, it has made little dent on the political process and is lightly regarded on Capitol Hill. And there is nothing to suggest that the current quest is anything other than quixotic. But for activists like Ross, a former school board member in New York City and a founder of the New Alliance Party, hope springs eternal.

Ross argues that the two political parties have "set up the rules to lock third-party candidates out."

In 1988, for example, a third-party candidate for President had to obtain 674,495 valid petition signatures to be listed on the ballots in all 50 states and the District of Columbia. Realistically, candidates need to collect twice that number, because many signatures are ruled invalid. That is 26.5 times the number needed by a Democratic candidate and 11 times the number needed by a Republican candidate.

In Florida, third-party candidates not only need 56,000 valid signatures—each on a separate postcard—but also must pay 10 cents for each signature they submit.

The solution, says Ross, is a bill sponsored by Rep. John Conyers, Jr. (D-Mich.) that is designed to make it easier for independent candidates or third parties to gain access to the ballot throughout the country by sharply reducing the number of signatures needed.

Conyers got interested in the idea from his work on voter registration. He introduced the bill in the last session of Congress but it got no hearings. The same fate appears to await the bill this year.

But Julien Epstein, a Conyers aide, who is staff director of the House Government Operations Committee, said recent events in Eastern Europe put the U.S. system in a new light. "There is a growing sense here that it is time for imaginative forms of changes and opportunities," he said.

Conyers' bill has been referred to the House Administration Committee, but an aide to Rep. Al Swift (D-Wash.), chairman of the elections subcommittee, said no hearings are planned.

Swift also comes from a state with relatively easy ballot access, and the aide said that he believes the proliferation of candidates on the ballot in the race to fill the Senate vacancy created by the death of Democrats Henry M. Jackson led to considerable confusion among voters.

Many political analysts argue that the two-party system in America helps provide stability to the electoral and governing process. Party primaries help to filter out unacceptable candidates, and the parties provide checks against one another's power without bringing about the kind of governmental paralysis often seen in multiparty systems.

But with the decline of allegiance to the parties by voters and the increased tendency of candidates to run on their own merits rather than their party's, outsiders such as Ross see the two parties joining to defend a decaying system.

To encourage a livelier political dialogue, the group wants legislation that would guarantee a spot in future presidential debates to legitimate independent or third party candidates who have qualified for the ballot in at least 40 states and raised at least $500,000.

In 1988, the debates were organized by a commission controlled by the two major parties. Under the Rainbow Lobby's proposal the debates would have included Libertarian Party candidate Ron Pell and New Alliance Party candidate Lenora Futani.

What would these proposals produce? "You might see something like Eastern Europe," Ross said. "You might see increased * * * participation. You might see a greater discussion of issues. It is a scandal that so few people vote.

[From the Washington Post, May 23, 1990]

RX FOR LETHARGY AMONG VOTERS: MORE PARTIES?

(By Dan Balz)

Many Americans have watched the flowering of democracy in Eastern Europe with a sense of pride. Nancy Ross looks on in frustration and envy.

The outbreak of free elections in Eastern Europe and the multitude of political parties competing for support have only heightened Ross' conviction that something is wrong in this country. She argues that the antidote to low voter turnout, public disgust at negative campaigns and the absence of substantive debate in campaigns is a little Eastern European-style politics.

Ross, the executive director of the Rainbow Lobby, a small, left-liberal, grass-roots organization, believes the two major political parties in this country have a stranglehold on the process and that their collusion protects incumbents and freezes candidadates with radical or innovative ideas out of the political dialogue.

The group is trying to attract attention to a package of proposals that Ross believes will stimulate interest in the political process. "Our main concern," she said, "is the erosion of democracy in this country."

The Rainbow Lobby was organized in 1985 by a number of people who had worked on Jesse L. Jackson's presidential campaign the year before (hence the similarity of the name to the Rainbow Coalition, even though there is no connection).

So far, it has made little dent on the political process and is lightly regarded on Capital Hill. And there is nothing to suggest that the current quest is anything other than quixotic. But for activists such as Ross, a former school board member in New York City and a founder of the New Alliance Party hope springs eternal.

Ross argues that the two political parties have "set up the rules to lock third-party candidates out."

In 1988, for example, a third-party candidate for president had to obtain 674,495 valid petition signatures to be listed on the ballots in all 50 states and the District. Realistically, candidates need to collect twice that number, because many are ruled invalid. That is 26.5 times the number needed by a Democratic candidate and 11 times the number needed by a Republican candidate.

In Florida, third-party candidates not only need 56,000 valid signatures—each on a separate postcard—but also must pay 10 cents for each signature they submit.

The solution, says Ross, is a bill sponsored by Rep. John Conyers Jr. (D-Mich.) designed to make it easier for independent candidates or third parties to gain access to the ballot throughout the country by sharply reducing the number of signatures needed to qualify.

Conyers got interested in the idea from his work on voter registration. He introduced the bill in the last Congress but it got no hearings. The same fate appears to await the bill this year.

But Julien Epstein, a Conyers aide who is staff director of the House Government Operations Committee, said recent events in Eastern Europe put the U.S. system in a new light. "There is a growing sense here that it is time for imaginative forms of changes and opportunities," he said.

Conyers' bill has been referred to the House Administration Committee, but an aide to Rep. Al Swift (D-Wash.), chairman of the elections subcommittee, said no hearings are planned, in part because Swift is "hesitant" to mandate federal election standards for the states.

Swift also comes from a state with relatively easy ballot access and, the aide said, believes the proliferation of candidates on the ballot in the race to fill the Senate vacancy created by the death of Democrat Henry M. Jackson led to considerable confusion among voters.

Many political analysts argue that the two-party system in America helps provide stability to the electoral and governing process. Party primaries help to filter out unacceptable candidates, and the parties provide checks against one another's power without bringing about the kind of governmental paralysis often seen in multiparty systems.

But with the decline of allegiance to the parties by voters and the increased tendency of candidates to run on their own merits rather than their party's, outsiders such as Ross see the two parties joining to defend a decaying system.

To encourage a livelier political dialogue, the group wants legislation that would guarantee a spot in future presidential debates to legitimate independent or third-party candidates who have qualified for the ballot in 40 states and raised at least $500,000.

In 1988 the debates were organized by a commission controlled by the two major parties. Under the Rainbow Lobby's proposal, the debates would have included Libertarian Party candidate Ron Paul and New Alliance Party candidate Lenora Fulani.

Ross has heard many of the arguments against the proliferation of parties and candidates, but she believes public apathy represents a rejection of the system that politicians can no longer ignore.

What would these proposals produce? "You might see something like Eastern Europe," Ross said. "You might see increased other participation. You might see a greater discussion of issues. It's a scandal that so few people vote."

THE SEEDY SIDE OF THE RAINBOW

(By Tim Kingston)

This organization (the New Alliance Party), and please quote me on this, is an

opportunistic infection on the body politic of the gay and lesbian community," vehemently declares Sue Hyde, a seasoned lesbian activist from Boston, now working at the National Gay and Lesbian Task Force in Washington. Hyde is not the only lesbian/gay activist who practically vaporized the telephone in this reporter's ear when three words were mentioned: New Alliance Party.

"The New Alliance Party (NAP) uses progressive politics, but what it really is is a cult. The purpose is to perpetuate an organization for [party founder] Fred Newman's ego and instead of religion they use progressive politics," states Sheila McCue, former NAP member and secretary to Newman. "You think you are working for revolution but really you are giving money and giving up independent thought."

Steve Ault, a Co-chair of the March on Washington, sees NAP as the "Moonies of the left" and calls the group "deceptive, manipulative and dishonest."

The NAP is one of the fastest growing organizations on the left in America. NAP has offices in over twenty states and cities across the nation including Chicago, New York, Los Angeles, Boston, and Washington, D.C. Their presidential candidate, Lenora Fulani, is the first black woman in the history of the United States to appear on the ballot in all 50 states and Washington. She has collected over $1 million in federally matched campaign funds. By comparison, in 1984 NAP was on the ballot in approximately 30 states and did not receive matching funds. Fulani has managed to garner considerable media interest, including a spot on the McNeil-Lehrer News.

Critics of NAP differ on what they believe its ultimate goal is; some charge it with operating as a front for the right, wreaking havoc amongst left wing organizations. Others see it simply as an independent, opportunistic group exploiting vulnerable communities to further advance its effort to control the progressive agenda.

Whatever the ultimate goal, there is general agreement that NAP tactics used to gain entry into other organizations have included the insinuation of endorsements, including the misuse of names and titles; infiltration; the hosting of pseudo forums where the actual agenda is to recruit new members; the creation of parallel organizations that siphon off support and funds from the host group; and finally, if all else fails, smears and personal attacks.

Many of these charges are made against small sectarian left groups, but what distinguishes the NAP is its creation of what Newman and his closest associates call the "Social Therapy" movement, which posits that virtually all psychological problems are directly related to social conditions and can be alleviated through political work (often with NAP). Critics suggest the therapy is also a way the NAP maintains control over its own members.

The central figure in NAP is Fred Newman, the man who created the Centers For Change (CFC), a therapy organization in New York that affiliated with Lyndon LaRouche's National Caucuses of Labor Committees (NCLC) in 1973. While with the NCLC, the group changed its name to the International Workers Party (IWP). In 1977 when the California Peoples Party raised questions about the IWP's legitimacy, the group dissolved and then resurfaced in 1979 as NAP.

The most consistent target of the NAP is the Democratic Party, most recently in the form of Lenora Fulani's Presidential campaign. Fulani is waging an all-out campaign to lure lesbian, gay and black voters to support Fulani and oppose Dukakis.

THE PERFECT PARTY, AT A PRICE; GEORGE BUSH

NAP insists it is a black-led, women-led, pro-gay, pro-peace, multiracial political party which is dedicated to the creation of a left wing independent third party as an alternative to the Democrats.

Fulani calls her campaign the Two-Roads strategy. NAP first called for support of Jesse Jackson and his platform, but when he was effectively neutralized it pointed to the bankruptcy of the Democratic Party and urged progressives and others to support Fulani. "We have to make it really clear that we voted for Jesse's political agenda and not the Democratic Party, that we're willing to step outside of that party and build whatever we need to do in order to bring the two-party system to its knees."

Fulani argues that right-wing Democrats now have more clout than left Democrats, because right wingers cannot be relied on to vote Democratic and have to be enticed back to the party. She argues an independent party will do the same thing for the Democrat's left wing that George Wallace's bolting from the party did for the Dixiecrats.

"I wouldn't lead my mother to vote for Michael Dukakis. I'm going to do everything that I can to cripple the bastard and send a message to the Democrats that if they want our vote, be it the black vote, the gay vote, every other vote we can go out and get, they're going to have to work for it."

(Even before Jackson's defeat, however, Fulani was campaigning against the Democrats. Local activist Pat Norma, currently a canadidate for supervisor, says Fulani told a Lesbian Agenda For Action meeting this past spring before the California primary: "We will pull votes away from the Democrats and let the Republicans win . . . In order to get what we want, we will have to punish the Democrats!")

That strategy enrages a lot of lesbian and gay politicos and activists. Maurice Belote, president of the Harvey Milk Lesbian/Gay Democratic Club, fulminated, "A vote for Fulani is a vote for George Bush is a vote for hundreds of thousands of people dying. For these people to allow Bush to sail into the White House is just beyond me."

GAY POSITIONS

NAP is aggressively campaigning in the lesbian/gay community nationwide. They are pushing for a national "AIDS Bills of Rights," and have obtained the endorsements of about two dozen gay leaders for the initiative. NAP organized a national day of lobbying in Washington, DC (that conflicted with the official gay/lesbian day of action on October 11). NAP has contacted the gay press and leaders for support, including Coming Up!. They have only succeeded in getting the endorsement of Just Out, a Portland, Oregon gay/lesbian paper.

Joyce Hunter, co-founder of the Harvey Milk High School in New York for lesbian/gay youth, exploded when asked about NAP, "They are a pain in the butt and they use the gay issue!"

Hunter says she was approached in 1986 by NAP, because they wanted to attend a conference she was organizing. They told Hunter NAP had developed a new approach to empower gays and lesbians, "that homosexuality is a political protest against conditions of oppression . . . (societal) repression creates homosexuality." Fulani told "Coming Up!" much the same thing: "Coming out is a statement in opposition to sex roles in this country which are organized in very oppressive ways."

The statement enraged Hunter; "Homosexuality is a natural proclivity. It is not a political protest. If you are coming from that point of view there is a cause!" She charges that the NAP has simply rephrased a pathological definition of homosexuality by putting it in terms of a political pathology. If political oppression is the cause of sexual oppression, "In a post revolutionary society there would be no need to be gay," notes Steve Ault.

AIDS: BILL OF RIGHTS OR BILL OF GOODS?

The AIDS Bill of Rights is the centerpiece of the NAP's strategy to attract lesbians and gays to the party. Fulania says it includes a statement about AIDS "victims" [sic] being treated with respect and dignity and having the rights that all patients in this country have, a statement in opposition to the anti-sodomy law, a statement supporting a national health care program and also an amendment to the constitution for gay and lesbian rights.

Sounds great. So why is it that the AIDS Action Council and the New York Human Rights Commission, AIDS Division are apposed to it? Critics charge the AIDS Bill of Rights with being badly drafted, ineffective, counterproductive and ultimately opportunistic.

NAP's AIDS proposal is a revamped AIDS bill that NAP tried to float in New York, which in itself was a copy of California law. Mitchell Karp, the New York City AIDS division attorney, told NAP, "Your bill does not correspond to New York law—it's modeled afer Los Angeles and San Francisco—and it would be struck down.

Jean McGuire, AIDS Action Council executive director in D.C., says the AIDS bill is poorly drafted because it does not take into account pre-existing and pending anti-discrimination legislation based on diability for people with HIV disease, Karp adds that it would probably disrupt a newborn alliance with disability and differently-abled rights groups now working with AIDS groups.

"There is not the political will to pass AIDS-specific legislation now," argues McGuire. Translated, that means AIDS specific legislation would attract right wing crazies like flies. On top of that, both Karp and McGuire say there are limited resources for AIDS work. Why waste good energy on something that might backfire?

"That's total garbage!" replies Fulani, who says her campaign is tapping enormous resources among lesbians and gays. "It's not just a fight of 15 progressive people." She says she supports disability antidiscrimination legislation but believes it doesn't go far enough. She complained the arguments against her bill were the same ones whites made against rights for blacks, by saying they "were in the bill of rights, they didn't need another amendment," while blacks were being lynched. "We need stronger legislation."

Karp disagrees. "We don't have a monopoly on discrimination." Karp wondered what would the point be of a black civil rights bill if it excluded Native Americans? The issue is discrimination and how to be inclusive and not separate people so as not to set them up as targets. "They have billed themselves as the protectors of the AIDS-related community. I question that."

LYNN MARCUS, LYNDON LAROUCHE AND THE CENTERS FOR CHANGE AND FRED NEWMAN

NAP members are a trifle touchy about their organization's historical affiliation with the LaRouchies. According to local activist John Belskus, when he quietly inquired of an NAP canvasser on Castro Street, "Well what about your party's connection with Lyndon LaRouche in the early days of the organization?" the response was rather dramatic. She slammed shut her folio and screamed at him "You are stupid! You are a democrat! and you are a Communist!" and hightailed it off down the street, leaving Belskus musing that at least she was right on two points.

The LaRouche connections have stuck to NAP and Newman like an albatross that won't let go. Newman say the Centers For Change, a therapy group he founded, became involved with Lyndon LaRouche in late 1973. "We had made a collective determination to explore left politics and wound up working with the National Caucus of Labor Committees." Newman says his group worked with the NCLC between November 1973 and August 1974. The Newman group merged with the NCLC between June and August of 1974.

That was precisely the period that LaRouche was winding down Operation Mop-up, a calculated campaign of brutal terror attacks conducted against the left that resulted in the hospitalization of several people. NCLC members would break up meetings with baseball bats in the hope of destroying organizations in precisely the way Nazi brownshirts went after socialists in pre-war Germany.

Ken Lawrence, a freelance journalist in Mississippi and frequent contributor to Counter Spy magazine who has been investigating NAP, says Operation Mop-up began in April 1973.

Newman says he was unaware of Operation Mop-Up until November or December of 1973, "We heard them discussing it in a meeting." When he found out about Mop-Up Newman says he was outspokenly critical. He says the CFC members argued with NCLC members about Operation Mop-Up. "Our perspective was to redirect them. . . Ultimately our perspective was to make every effort to redirect them, it was too little too late."

Lawrence finds that hard to believe. He says Operation Mop-Up was common knowledge on the left, "It's not as if this were hidden stuff. They (the NCLC) were proud of it and boasted about it."

The letter sent by Newman's group in August 1974 to LaRouche's NCLC announcing the formation of the IWP and the severing of formal ties with the NCLC does not even mention Operation Mop-Up as a reason for the split. The IWP even offered to continue a joint petitioning drive.

The tone of the letter is certainly not one of political abhorrence at fascist attacks carried out by the NCLC against other left groups. Instead, it is a cordial discussion of two groups going their separate ways. Of the 39 individuals who signed the letter, 22 remain with NAP today, among them the Boston National Alliance bureau chief, it's managing editor and one of Fulani's vice presidential candidates.

FINDING THE NEW MAN WHO RUNS THE ALLIANCE

Fred Newman the man at the center of the controversy around the NAP provokes widely disparate reactions. Opponents give the impression of a power-hungry despot determinated to expand his power base to eventually include "hegemony" over the entire progressive movement in the United States. In a phone interview with Coming Up! he came across as a rational, reasonable and very articulate radical with an incisive critique of the American politicial system.

"The problem with NAP is that basically they are a very dishonest group," explains Dennis Serrette, NAP 1984 presidential candidate. Before that, he was a black trade union organizer and civil rights worker. In early 1985 Serrette quit the party charging both duplicity and racism—charges he repeated under oath—because there were no blacks in leadership positions in the organization.

"There is absolute control by one person over this entire body," says Serrette. "The way he controls that is, in my opinion, racist, sexist and homophobic. He uses gays to penetrate gay organizations. He uses blacks to penetrate black organizations. . . I hesitate to even call it an organization—as much as I would call it a group headed up by a very egotistical and powerful person."

In reply, Newman laughs and says that at some point or other the leader of nearly every leftist group in the country has had the same charge leveled at them. He says it is "one of the standard sectarian criticisms—you know, Bob Avakian is in charge of the RCP," According to Newman, NAP is "one of the most open and democratic parties on the U.S. left. (it's) a terribly local and autonomous party."

Fulani also rejects the charges. "When people accuse us of being a cult and say that Fred is a leader of it, one of the things I point out is their racism and sexism, because given that more people know me, I at least should be the leader of the cult!. . . Fred is one of the poeple who works for me."

Newman grew up in the Bronx and went to City University. He earned a PhD in the early 1970s in the philosophy of science from Stanford University. He says he started his political career doing some organizing during the '60s, which eventually coalesced into the CFC. For change.

Some of those who left the NAP highly critical of the organization still respect Newman. San Francisco activist Cheryl Lazar, a member of the party from 1973 until 1981, says, "I have always thought of him as extremely strong willed, a strong ego, very loving, very caring. He was always there. He's a strong leader and probably is a very powerful and influential human being. I don't see him as a megalomaniacal cult leader."

Several ex-members, however, disagree. Serrette wrote of the NAP leader, "When Newman is happy everyone is happy. When he is mad everyone is terrified." of the eight ex-NAP members contacted by Coming Up!, only Lazar was unwilling to describe him as a controlling influence; of the eight, three had extensive contact with Newman up until 1985. Two of the eight had worked with the NAP until this summer.

Newman's control over his followers was noted in 1977 by Casey Peters, then the People Party national secretary, when he attended the NYC Working and Poor Peoples Party convention, another forerunner to NAP. Peters said, "When . . . the head of the organization puts his hand up it's like the ripples in a pond. Fred is the Kingpin." Indeed, in documents of the time, the group was frequently referred to as Newmanites. Peters also obtained secret internal documents proving that the IWP was still very much alive after it was officially dissolved.

Dennis Serrett, Cathy Hollandberg-Serrette and Sheila McCue, all dissident ex-members, claim the NAP is still controlled by Newman along with a small core group who are either invited in, or have been with the organization for a considerable length of time. According to Hollandberg-Serrette, those people include Nancy Ross, a director of the Rainbow Lobby, Jaqualine Salit, editor of the New Alliance paper, Hazel Daren, head of national operations, Debra Green, head of finances, and Gail Albey, chief of personnel.

Hollandberg-Serrette left the NAP in 1985 and say the IWP was alive and well with about 150 members in NAP. She asserts emphatically, "There is no way that would be disbanded." McCue was a member of the IWP from 1981–85, and says that when one joins the IWP you sign over control over your life, and your property is at the disposal of the organization.

* * * * * * *

FIXING THE FORUM

One common NAP strategy is to create or take over forums and turn the discussion into a NAP recruiting drive. Coming up! was informed of incidents in Los Angeles, Boston and New York. In New Orleans the same tactic was tried in the Women's Caucus of the American Public Health Association's (AHPA) annual conference. P. Ellen Parsons, a rainbow coalition activist and member of the APHA, say the Women Caucus was chaired by NAP member Cathy Stewart. "She inserted people on the panel and they would give highly political presentations. . . This women got up and talked about being a lesbian and being older, and basically said to work on your sexuality join an Institute for Social Therapy." Parson's says NAP confuses here, "I never understand what the hell their purpose is. I always feel they are on the wrong side!"

THE NEVER ENDING CAMPAIGN

The Fulani campaign against Dukakis is nothing new, it is just bigger. NAP has a reputation for running against progressive Democrats in close races with Republicans. NAP is currently running Mary Fridley against Senator Edward Kennedy. Fred Newman asserts "we now have two right wings." Newman charges the Democratic Party with using compassion to cover a move to the right, thus it is correct to target progessive Democrats. "I think Ted Kennedy is a bigger problem, (it) is well known that Bush is bad, but Kennedy has wound up supporting Reagan, and Dukakis is an anti-gay candidate."

In 1985, in a case of particular interest to Bay Area activists, NAP decided to run Jim Mangia in the race for New York City councilor. Mangia, National Coordinator of Lesbians and Gays for Fulani (recently hired as the AIDS Project of the East Bay Health Educator) entered the New York race against David Rothenberg, a progressive Democrat and founder of the Fortune Society, a prisoner's service organization. Rothenberg had turned down NAPs endorsement. The Republican won, but while Rothenberg doubts the NAP campaign had more than one or two percentage points effect, it soured him to politics. He says Mangia specifically campaigned against him to take away liberal and gay votes.

Mangia alleges at the time when Rothenberg refused the NAP endorsement "there were a whole series of moves by the Democratic party . . . The issue is, Does a gay

candidate represent the gay community? Harvey Milk did not run with the support of the gay establishment. Those people have a vested interest in supporting the status quo. We are the uptstairs . . . We made a lot of people real angry! We are doing the right thing."

TAKEOVERS/INFILTRATION

NAP has made two recent attempts to intervene in the Peace and Freedom Party and the New Jewish Agenda. One effort was partly successful, the other failed.

In California the Peace and Freedom Party (PFP) has been the unwilling subject of NAP's attentions, twice. The first time was in 1984, when according to Emma Mar, a long term Peace and Freedom Party activist, NAP bused in 50 people of color from Watts who chanted and stomped and yelled until the NAP contingent was given three or four delegate seats. Depending on whose side you listen to, it was either disenfranchised people gaining their rightful place at the convention, or a successful extortion operating in exchange for seats and peace so the conference could continue.

This year's convention was even more raucous. This time not one, but two sectarian outfits descended upon the party. The Internationalist Workers Party and the New Alliance Party attempted to get their own presidential candidate nominated by the PFP. They wanted the nomination because of the juicy plum that PFP's presence on the California ballot represented.

The convention turned into a three-ring circus, with the Internationalist WP, NAP, and the unaffiliated Peace and Freedom delegates all engaged in a Hobbesean struggle for the soul of the PFP.

The convention concluded with the NAP delegates stalking out to waiting NAP vans—with a Cadillac reserved for Fulani—to go to a nearby hotel for an instant rump convention. All three groups complained to the Secretary of State who responded by pulling PFP off the ballot. Now Fulani is the only alternative candidate left on the California Ballot.

NEW JEWISH AGENDA INTERVENTION

On October 25, 1987 the New Jewish Agenda (NJA) passed a resolution prohibiting any NJA member from publicly or in print associating themselves with NAP. The decision was the culmination of what some NJA members suspected was a NAP infiltration attempt. Clare Kinberg, Administrative Director of the Agenda, says the Manhattan branch of the NJA noticed an influx of NAP members.

When the NJA asked why the NAP members were joining, Kinberg says party members all gave the same "word for word" answer, "I am a progressive Jew and wanted to join a progressive Jewish organization." Eventually Helen Abel, a NAP member elected from the Los Angeles NJA chapter, requested that she be allowed to do NAP party work and use the NJA's name. The October 25 resolution was passed at that time.

Kinberg is unhappy with NAP tactics which she says "play heavily on Jewish guilt. They focus on black/Jewish relations. . . They proclaim to be doing something about it, but I think their influence is negative.

Then there is Louis Farrakhan.

In a September 6 press release obtained by Ken Lawrence, Fulani discussed at length Jewish-Black relations. In discussing Farrahkan's "righteous criticism" of Jewish landlords, she states that the Nation of Islam emphasizes the Jewishness of the landlord while she emphasizes the landlord aspect of the relation. But she comments, "I do not believe it is insignificant that a slumlord is Jewish."

When Coming Up! questioned her on the statement, Fulani explained how historically there is a "love-hate" relationship between the black and Jewish communities because, "Jews have been the last grouping of whites to be let into the middle class," thus she argues many blacks will have Jewish landlords.

DOUBLE RAINBOW

Perhaps the most frequent charge leveled at NAP is that they assume a name for themselves that closely resembles an already-active organization in order to encourage participation. In particular, they have called themselves the Rainbow Lobby in regions where Jesse Jackson's Rainbow Coalition has been particularly active.

Fulani argues that the first time the term "Rainbow" was used was by Black Panther party member Freddie Hampton in the '60s. "See, the rainbow, there's one in the sky, and there's one in the Bible, and then there's the only people angry at NAP's use of the term and nobody owns it." Fulani argues the only people angry at NAPs use of the term are Democratic Party hacks.

Coming Up! spoke to several activists for whom the term does not seem appropriate. They document instances where NAP behavior was less than straightforward. In Washington, D.C. and Atlanta, NAP supporters in the Rainbow Alliance allegedly collected money without distinguishing themselves from the Rainbow Coalition. In Mississippi, Fulani supporters campaigned for their candidate while, Francis Beal, Frontline editor and former SNCC worker says "much like leeches they attached themselves to the Jackson campaign," says The New Alliance newspaper featured a photograph doctored so at first glance it appeared as if Fulani was on the same stage speaking next to Jesse Jackson. Fulani says they worked for Jackson in the East Bay, but one East Bay Jackson activist states, "To the best of my knowledge they were not visible." Another prominent Jackson supporter says NAP put an ad in the New Republic next to an article about Jackson, "I have no doubt that many people were confused."

When queried about the NAPs tenacious tendency to tag along with Jackson, Newman turned around and said there is "an excessive connection between the Jackson Democratic Party and the Rainbow, and what has been projected is this is the only Rainbow."

Margeret Cerillo at Hampshire University says that NAP intervenes in communities where "people feel they have no choice. They speak to real issues, but they are incredibly opportunistic." That may be the key to NAP. Where a community is dispirited or feels powerless to change its situation, opportunistic groups will intervene.

Kris Kleindiest, author of an article in The Gay and Lesbian News Telegraph that discouraged NAP activity in St. Louis, says NAP is targeting the gay community, "At the March, a lot of people were vulnerable to this quick sweet-talk who have no historical perspective, people who don't know the history of NAP." It seems the gay and lesbian community is learning quickly. A recent appearance by Lenora Fulani was constantly interrupted by heckling ex-NAP members.

Lenora Williams, director of the Center for Democratic Renewal in Atlanta, says, "People often look for pat labels but . . . the question is are they being honest, are they representing the aims and aspirations of the community?"

IT NEEDS TO BE SAID

The SPEAKER pro tempore (Mr. PENNY). Under a previous order of the House, the gentlewoman from Maryland [Mrs. BENTLEY] is recognized for 60 minutes.

Mrs. BENTLEY. Mr. Speaker, there are two current newspaper articles making statements that need to be heard in today's climate of international trade. Both articles should be of interest to most Americans because they spell out some of the difficulties in our current trade policy.

One piece is a letter to the editor in the New York Times and the other is an article from the Washington Post.

Both pieces go to the very heart of "competitiveness" which has been the buzzword for the eighties for American business, and now it is becoming the buzzword for EC 92.

The first article is a New York Times letter to the editor by John M. Culbertson, emeritus professor of commerce at the University of Wisconsin.

His letter titled "Pauperized Workers Are Price of 'Free' Trade" is an important statement about our ability to compete and how the consequences of that competition affect the American worker. Although I am not in total accord with some of his views, I do believe we must have fair trade.

(From the New York Times, July 13, 1990]

PAUPERIZED WORKERS ARE PRICE OF "FREE" TRADE

(By John M. Culbertson)

To the Editor:

The foreign-trade deal the Bush Administration has negotiated with Japan (front page, June 29) follows the thinking of the Reagan Administration and will continue the giveaway of essential interests of the United States. Because it assumes that unregulated foreign trade—always called "free trade"—automatically benefits both nations involved, this viewpoint makes light of the one-sidedness of United States trade. The net takeover of our markets by excess imports, and the shrinkage of our industries and jobs, is attributed to some outside factor, and token policies are devised to deal with these imaginary causes.

Thus, the real causes of the self-destructive pattern of United States foreign trade were not touched by the Reagan Administration's initiating unfair trade practices investigations or getting commitments from other countries to increase their "economic growth." Neither will they be touched by the Bush Administration's getting Japan to increase its public-works spending, to speed up the issuing of patents, to reduce protection of small shops and to increase prosecution of bid rigging. These actions may be desirable, but their effect on the huge United States trade deficit with Japan will be long delayed and trivial. Saving the economic future of the United States requires the reg-

ulation of United States imports to bring about balanced, two-way-benefit trade with countries that differ from us in economic policies and institutions, market sizes and qualities, wage levels and other ways.

The widening spread in American incomes and the worsening plight of our ordinary workers is shown by data and has been viewed with concern by many commentators. Americans were once proud of being the only country where the factory parking lot was filled with the workers' cars—cars of one-income families. Two incomes may not permit workers to raise a family in today's United States, and the situation is continuing to worsen.

History provides an illuminating parallel. The ancient Roman Republic became politically unworkable largely because the jobs of ordinary Roman workers and small farmers were taken over by cheaper outside labor, in this case by burgeoning use of imported slave labor. Slave labor was cheaper than the labor of free Romans. Thus, "the free market" said, "Use the slave labor." During so enriched Roman landowners and the affluent. But the shift to slave labor took away the jobs of ordinary Romans, who had been the backbone of Rome's armies and state. They became an unemployed proletariat in the city of Rome, degraded by politicians' free bread and circuses—and Rome as a republic stopped working.

The United States turned the jobs of its ordinary workers over to outside labor—because it was cheaper than American labor—by accepting imports vastly in excess of our exports, imports that are cheaper than American-made goods because of foreign wage levels a tenth or less as high (as was initially true of Japan, which now relies on other advantages over United States production). One-sided immigration of low-wage labor has the same effect.

The Americans whose jobs are given away to outside labor, like the pauperized Roman workers and farmers, will not go away. They have no place to go. They are finding that the available temporary jobs, the parttime jobs, the minimum-wage jobs without job security, medical insurance and retirement benefits do not permit them to live and raise a family like other Americans—not even when both spouses work. What is to become of these people? What will become of a United States in which groups not subject to such foreign competition live extravagantly, while the ordinary workers thrown by one-sided foreign trade into wage competition with the poorest of the world's burgeoning millions of poor become outcasts in their own country?

The economic theory on which United States policy is based evades this problem by assuming an imaginary world in which unemployment is cured by lowering wage levels, where foreign trade and job shifts automatically balance out and where cheaper implies more efficient. Laissez-faire economics and the Bush foreign trade policy perhaps would work in this imaginary world—just as Communist economics perhaps would work in its imaginary world.

But in the world of reality, the United States is self-destructing in permitting one-sided "free trade" to throw ordinary American workers into competition with hundreds of millions of foreign workers who can live on much less than they. This kind of "free trade" may be a time bomb of laissez-fair ideology more deadly even than "free" savings and loan association pillaging, "free" airliner mergers, "free" liquidate-American-industry takeover deals, the "free" selling of America to foreigners and "free" government spending without taxes.

Professor Culbertson makes some profound statements about competitiveness which we should consider. He has aptly pointed out that the major burden of competitiveness is thrust upon the American worker and—until we do something to change our policies of free trade, the American worker will continue to pay the price of competitiveness.

The second article from the Washington Post is by Michael Schrage, a columnist for the Los Angeles Times. His piece is titled, "In R&D, Japan Should Be Willing to Contribute, Not Just Consume."

What a statement this article makes about Japan's university system and its being a net consumer, rather than a producer, of knowledge. It clearly points out that Japan has taken advantage of our brightest young minds, our research facilities, and our taxpayers national laboratories."

Mr. Schrage is right on target. His article follows:

[From the Washington Post, July 13, 1990]

IN R&D, JAPAN SHOULD BE WILLING TO CONTRIBUTE, NOT JUST CONSUME

(By Michael Schrage)

Even though Columbia Pictures didn't make the movie, Sony Corp.'s Akio Morita should pop the Beta version of "Treasure of the Sierra Madre" into his VCR. He should pay particular attention to the scene where Walter Huston tells Humphrey Bogart that, now that they have mined the mountain of its gold, they have to fix it up. "This mountain's been good to us," he says, and they owe it to the mountain to make it whole.

Morita, who was quick to chide Americans for short-term thinking in his book "The Japan That Can Say No," would immediately get the point. Japan, to its great credit, has relentlessly and successfully mined America's great research base. For decades, Japan has sent its best and brightest young minds to America's top research universities, the National Institutes of Health and the national labs—tapping into the largest tax-supported research infrastructure in the world. There is absolutely no question that this open access to knowledge has made a tremendous contribution to Japan's ability to compete so successfully in so many global markets.

If Japan really cares about assuming its rightful place as a global leader, if that nation wants to be a genuine collaborator in the creation of knowledge, it has to put in as much—or more—than it has taken out. The time has come for Japan to behave like a nation that has the gumption to invest its wealth in basic scientific research as willingly as it is prepared to snap up a Van Gogh or a Rockefeller Center.

It's not enough that the Sonys, Hitachis and Fujitsus spend billions on proprietary research and development—that's nothing but pure economic nationalism. The fact is that Japan's research and development infrastruture, unlike America's revolves around commercial interests: It is less interested in replenishing the world's endowment of intellectual capital than in capturing new ideas and techniques and turning them into profitable products. And why not? As things currently stand, Japan's top companies can often get the best of U.S. research for less than 20 cents on the dollar. That's a pretty good deal. In economics, this phenomenon of capitalizing on other's research on the cheap is called "the free rider," In biology, it's called parasitism.

In the United States, the government provides nearly 46 percent of the nation's research and development budget; in Japan, the government contribution barely touches 20 percent—and most of that sum goes more to development.

What's more, Japan's university system lacks the research tradition and initiative that mark America's top schools such as the California Institute of Technology, Massachusetts Institute of Technology and the University of California at Berkeley. Structurally, culturally and financially, Japan has evolved into a net consumer, rather than a producer, of knowledge. That's all very well and good for Japan's economy but it makes Japan's incessant complaining about America's consumption of goods a little annoying.

Even in health-care research for its own people, Japan is a laggard. America spends more than $6.3 billion on the National Institutes of Health-one of the great medical research institutions of the world—and even that's not enough to support some truly excellent research proposals.

In Japan, which has been one of the world's most prosperous countries for more than a decade, there's nothing even remotely like an NIH, and medical researchers are starved for funds. Nobel laureate Arthur Kornberg, who has been encouraging Japan to create its own counterpart of NIH, reports that the total budget for all government kakenhi—research grants—is "only 10 percent of Toyota's annual profits and 15 percent of the annual budget for research and development in a typical electronics company."

"They used to plead, 'We're a poor country'," says Kornberg, a Stanford University biochemistry professor who's been in touch with top Japanese science officials for years. "Now they tell me they're helpless in the face of a bureaucracy."

Nevertheless, Kornberg claims to be "optimistic" that Japan will live up to both its financial and intellectual responsibilities. Indeed, his fellow Nobel laureate, James Watson, who is overseeing this country's huge Human Genome Initiative to map the galaxy of human genetic code sequences, is energetically—some say aggressively—pushing the Japanese to give money and human resources to the project. These gene sequences would be the raw material for millions of medical insights and innovations. Shouldn't Japan be willing, if not eager, to be a partner in this endeavor? Or would Japan prefer to reap the benefits without the burden of the costs?

After National Academy of Science President Frank Press proposed this past spring that Japan make a significant investment in America's basic research infrastructure, he reported that many Japanese were astonished. "They said, 'Aren't you embarrassed, a great nation like you, to go around with your hat in your hand?'" he recalls.

It takes real *zuzushii*—the Japanese word for chutzpah—to say something like that. Japan's scientific establishment has been on the U.S. dole for so long that it acts as though it's entitled to this subsidy. Press said more in sorrow than in anger, that if Japan's leaders don't wise up, Congress is going to find a way to turn this into a trade issue. Indeed, National Science Foundation

Director Erich Bloch once actually threatened to deny Japanese researchers access to the U.S. national labs if Japan didn't make its laboratories more open to Americans.

Yes, Japan can point to a few chairs that its companies have endowed at places like MIT, as well as something called the Human Frontiers Program in Science that has all of a $20 million endowment. But that's just a few grains of rice.

For its own interest—if not the world's—Japan should be willing to make matching grants in key areas of biology, materials research, physics and other domains to U.S. universities, the NIH and the national labs in sums up to at least $200 million a year. There are more than 40,000 Japanese in the United States listed under the category of "foreign study, research and training." That works out to $5,000 per person per year. Given the billions that American taxpayers shell out each year to fund basic research, that hardly strikes me as unreasonable. Indeed, it takes a lot of *zuzushii* to explain why Japan hasn't already offered to be as willing to contribute as it is to consume. Indeed, here is a wonderful opportunity for Japan to demonstrate that it can craft ingenious funding initiatives to match its ingenuity in technological products.

I want to stress that even if Japan gave our basic research infrastructure a cool $1 billion a year, I don't think it would affect our global competitiveness one whit. As America has already discovered, a great research base doesn't necessarily translate into world-class competitive products. The issue here isn't the global marketplace—it's the continued viability of our treasures, our intellectual and scientific gold mines. Our research infrastructure is a global resource, but countries that assiduously mine it should be prepared to help keep it whole.

JAPANESE FIRMS IN UNITED STATES REPORTED LESS PROFIT IN 1987

(By John Burgess)

Income reported by Japanese-owned companies operating in the United States declined 65 percent to $219 million in 1987, according to figures released yesterday, a fall that gives new ammunition to congressional critics who contend that many of the firms are manipulating their books to avoid paying U.S. taxes.

Income reported by all foreign-owned companies, however, rose to $5.6 billion from a net loss in 1986. Higher income normally results in higher tax being paid.

As foreign capital began streaming into the United States in the 1980s, the role of foreign firms in the economy began rising quickly. Their sales rose from $459 billion in 1984 to $650 billion in 1987, according to yesterday's figures.

The Internal Revenue Service is reported to be auditing in detail the U.S. operations of many foreign companies and banks.

Representative Duncan Hunter (R-Calif.) and two other Republican members of the House yesterday released the figures, which were provided to them by the IRS, and charged that foreign companies may owe up to $50 billion in back taxes They urged that any money due be collected before U.S. citizens are asked to pay additional taxes as part of a new budget package.

The Organization for Fair Treatment of International Investment, which represents foreign investors, concedes that income reported in 1986 by foreign companies fell sharply. But it says that was due to hard times and the impact of a falling dollar, which is hard on the companies because they import a lot of goods.

"In '86 our tax went down because our income went down," said Sandra E. Taylor, chairman of the group's Washington committee. "It wasn't because we were manipulating" the books. She noted that total income reported rose in 1987, calling it an end to the temporary conditions of 1986.

She suggested that the income of Japanese companies as a group may have continued to fall in 1987 because of heavy costs associated with starting up new U.S. plants, particularly auto factories. Japanese-owned companies had reported total sales of $185 billion and profit of $2.19 million.

Critics charge that foreign companies may be illegally inflating costs at their U.S. subsidiaries to lower profit reported here and U.S. taxes paid. In this way, profits are said to be transferred to appear on the books of the parent company or some subsidiary in another country.

Hunter yesterday also released a letter from a former American employee of Sony Corp. of America. The employee said he had questioned certain "service charges" that his employer was carrying on its books. In the letter, the man said he was told to destroy copies of a memo he had written on the subject and soon after was fired on "trumped-up charges."

Sony spokesman Jason Farrow said yesterday that "it's Sony's corporate policy to obey U.S. law and we conscientiously strive to do that." Farrow denies the allegation of misconduct and said the employee was dismissed for "just cause" in June 1989 and has brought a legal action against the firm.

Both Professor Culbertson and Mr. Schrage clearly outlined that the American people are paying a high price for the current policy toward foreign companies and governments.

In this race to be competitive we should consider the needs of American business and not tie their hands or give foreign companies an advantage.

The latest hearings of Congressman JAKE PICKLE on the evasion of taxes by foreign companies is one example of giving an advantage to foreign companies. Granted, many of these companies are law-abiding taxpayers.

The Washington Post recently reported in an article "Japanese Firms in United States Reported Less Profit in 1987" by John Burgess, that the income of "Japanese-owned companies operating in the United States declined 65 percent to $219 million in 1987."

The article explained that "As foreign capital began streaming into the United States in the 1980's, the role of foreign firms in the economy began rising quickly. Their sales rose from $459 billion in 1984 to $650 billion in 1987."

As an example of how some of the tax dodges are done, the article reported that Congressman PICKLE released a letter from a former American employee of Sony Corp. of America. The employee said he had questioned certain service charges that his employer was carrying on its books. In the letter, the man said he was told to destroy copies of a memo he had written on the subject and soon after was fired on trumped-up charges. The taxes of foreign companies are vitally important to the working people of this country, and I am grateful to Congressman PICKLE for taking on this task.

It should concern all of us when our strongest competitor, the Japanese, set up shop in the United States, buy our securities to finance our debt, and then don't pay their taxes—then you start wondering not only about Japanese intentions, but also our own policies.

This country was built by people with a vision of freedom and opportunity and, each generation has fought to keep that vision pure to pass on to their children. We can do little more than protect that freedom. It is time that we demand we need fair trade for American businessmen, so that we will be able to maintain our heritage of freedom and opportunity for future generations. The American people understand this, and I join with them in this battle.

Thank you, Mr. Speaker. I will leave my article for inclusion in the RECORD.

□ 1840

CAREER SCHOOLS—A VITAL AND NECESSARY SEGMENT OF THE HIGHER EDUCATION COMMUNITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. GAYDOS] is recognized for 60 minutes.

Mr. GAYDOS. Mr. Speaker, last Friday, the House passed H.R. 5515, the Equity and Excellence in Education Act of 1990 by an overwhelming majority. This legislation offers significant educational opportunities for many Americans who seek to overcome hopelessness and illiteracy, to achieve their educational goals, and to share in the American dream.

During the debate on H.R. 5115, we defeated an amendment consisting of 28 separate elements that could very well have eliminated that opportunity for far too many of our men and women, young and old.

It was introduced under the clever guise of reducing the costs associated with defaults in the guaranteed student loan programs, but, in reality, was a direct attack on the career training sector of higher education because that is where a large portion of the defaults are occurring.

This attack is not surprising. Many people do not believe that career training schools—whether public or private, profit or nonprofit—should be classified as institutions of higher education.

And, these same people continually blame the career training schools for every problem that arises in the stu-

dent aid assistance programs—particularly when it comes to student loan defaults.

Let us get one thing straight before I go any further, students default on student loans, not schools.

Many of us in this Chamber realize that the issue of defaulted student loans is a serious one that must, and will, be dealt with next year during reauthorization of the Higher Education Act of 1965.

While the Department of Education has not completed its data book on the guaranteed loan programs for fiscal year 1989, it has developed some estimates that give a pretty clear indication of what is happening in the programs.

Through fiscal year 1989, it is estimated that of all the money loaned out in the 25 years of the programs, almost 67 billion dollars' worth of loans has been paid back or is in the process of being paid back, while only $7.1 billion—9.5 percent of the $74 billion in repayment status—is in default.

At the end of fiscal year 1990, it is expected that almost $76 billion will have been repaid or will be in the process of being repaid, while only $8.4 billion—9.9 percent of the $84.3 billion in repayment status—will be in default.

Those defaulted loans amount to a lot of money by anyone's standards and, as I said, the default issue must be dealt with, but not by denying educational opportunities to those students who most need financial assistance.

We know as a matter of fact that educating these students is an excellent investment in our Nation.

Between 1940 and 1944, Congress enacted a series of laws for World War II veterans that became known as the GI bill of rights and one of these rights provided veterans with educational assistance.

Through the GI bill, the Government invested $14 billion in education and job training benefits for 7.8 million veterans.

It is estimated that almost $7 billion was used by 2.2 million GI's for college and graduate school. The value of that investment is clear. For every dollar the Government spent in education under the GI bill, the Nation got back no less than $5 and estimated as much as $12.50.

A 1989 report, using today's students, done by Shearson Lehman Hutton estimates that taxpayers save $17,938 per student per year for every American who finishes a training program and gets a job earning $15,000. This money is saved as follows:

Family welfare benefits, $6,000;
Food stamps, $1,908;
Women and infant care, $480;
Housing, $7,200; and
Medicaid, $500.

In addition, the taxes generated by that $15,000 job is equal to $1,850.

Even though we know that education and career training are among the best investments that our Nation can make, we seem to completely forget this when discussing the student loan default issue.

We have known for quite some time that certain students are more likely to default on student loans and that these high risk students tend to be among the poorest and the most in need of education to rise above their economic circumstances.

When we created the student assistance programs, we recognize that some students simply could not finance their own education. That is why we created the Pell Grant Program for the neediest of students and developed loan programs for other students.

Unfortunately, over the years, we have not kept pace with our original commitment of providing sufficient grants for the neediest students.

For example, the maximum Pell grant has risen only $200 since 1985-86 to $2,300. At this same time, the average cost of attendance has increased by more than $1,500.

Obviously, we are forcing more and more of these students to borrow thousands of dollars to finance their education.

If we continue this trend, education will become further out of reach for those students who most need assistance to realize their dreams, expand their horizons, and change their lives and the lives of their families for the better.

I am becoming very concerned about what will happen to these students after we complete reauthorization of the Higher Education Act.

There seems to be a movement gathering force that is urging us to adopt the quickest and final solution to the default issue—that of eliminating high-risk students from any of the assistance programs.

The reasoning behind this is really very simple. If high-risk students are not allowed to participate in these programs, they cannot default.

This so-called final solution would be very effective in reducing default costs, but let's look at what happens to students when we adopt these quick-fixes.

Last November during the budget reconciliation process, we were forced to make a number of changes to the Supplemental Loans for Students Program [SLS].

These changes, which were made over my protests, denied SLS loans to students who do not have high school diplomas or graduation equivalency diplomas; prorated the amount of the loan based on the length of the educational program; and flat out denied loans to students attending schools with a default rate greater than 30 percent.

At the time, we knew these changes would affect students attending career training schools but we didn't know to what extent.

Now, 8 months later, we are just beginning to see the tremendous impact they have had on denying access for those students—who desperately need career skills—to the very schools that would teach them these skills.

These changes have forced 15 percent of all career schools to close. This is more than three times the number of schools that closed in the previous 2 years combined.

And, after talking with many owners and operators of career schools, it is clear that the majority of the closings have been, and will continue to be, in major metropolitan areas—the same areas where the need for skill training is greatest.

Those schools serving city students can't survive in these areas because the students attending them have the greatest likelihood of defaulting on their loans.

There are other problems as well in these areas. Just one is the tremendous number of absences on days when welfare checks arrive because the students must literally stand at their mailboxes to ensure that no one steals their family's check. According to school administrators, it takes many extra unpaid hours just to keep these students in the programs.

I'm not talking about just a few students.

The 15-percent decrease in number of schools has resulted in an 11-percent decrease in total enrollment at career training schools—more than 200,000 students.

Some people would like us to believe that forcing these schools out of business is the best thing anyone can do for these students, that these students have somehow been rescued and are now free to attend more traditional institutions of higher education.

Before getting caught up in this fairy tale, there are some things you should know about the students in career schools: 46 percent of them are over the age of 25; 40 percent are minorities; 78 percent are women; and 54 percent are financially independent of their parents.

In addition, 71 percent of first-time career training school students are parents and half of these are single parents.

Are we to believe that these 200,000 students—who also have a high likelihood of being high school dropouts, poor and underskilled—will rush to attend more traditional institutions of education or will miraculously be accepted into other job training programs?

I doubt either of these results and you should too.

To get an idea of the types of attacks that will be waged against career training schools as we approach reauthorization, let me tell you about two proposals that are floating around right now.

One proposal would require banks to assume 5 percent of the risk when making loans to high-risk students.

Since the very inception of the student aid assistance programs, we have encouraged banks to make loans to high-risk students by guaranteeing these loans at 100 percent of their value. And, even with this 100-percent guarantee, high risk students still have difficulty finding banks that will give them loans.

Common sense tells us that if banks must assume 5 percent of the risk, they will simply stop making loans to these students—further aggravating the existing problem.

The other proposal would require that members of vocational accrediting agencies not be affiliated in any way with any of their member schools.

This contradicts existing provisions requiring that the makeup of vocational accrediting agencies be composed of "persons specially qualified to evaluate training provided by schools of that category."

How are the "specially qualified" persons supposed to acquire the experiences and knowledge needed to do an effective peer review if they have had no relevant contact with the schools in this sector?

These agencies clearly recognize the importance of having outside imput on their decisions and this is reflected in the membership of their accrediting boards. For example, 57 percent of the accrediting board at National Home Study Council is composed of members with no ties to the schools. This compares to 47 percent at National Accreditation Commission of Cosmetology Arts and Sciences, and 44 percent at National Association of Trade and Technical Schools. Also at NATTS, the chairman of the accrediting board is not affiliated with any of the schools.

These agencies are trying to get rid of the bad apples. They don't like them anymore than we do, but eliminating effective review of the schools in this sector is definitely not going to force the ineffective schools out of business while retaining the quality schools.

This provision would only cast serious doubt on the quality of education at all vocational schools because the people overseeing them would have no working knowledge of what constitutes good and bad practices in the schools.

According to Department of Labor statistics, we need good, quality career training schools now more than ever.

Some of the fastest growing occupations percentwise to the year 2000 are those that require some form of career training such as medical assistants, radiology technologists and technicians, data processing equipment repairers, medical record technicians, medical secretaries, physical therapists, computer systems analysts, physical and corrective therapy assistants, EEG technologists, occupational therapists, computer programers, electrical and electronics engineers, flight attendants, and the list goes on.

In their rush to wage war on career schools, too many people seem to overlook the fact that we desparately need these schools. These same people also seem to overlook the fact that career training is an integral part of our Nation's history and most career training schools are proven extremely successful at teaching needed skills to their students.

Some of the current members of the major career training school organizations are more than 100 years old. For example, out of the 950 schools accredited under the Association of Independent Colleges and Schools—70 have operated for more than 100 years and 92 others have operated for more than 50 years.

Career training actually dates back much farther than 100 years to when young men were apprenticed to individuals who would provide skill or intellectual training.

Someone desiring to be a blacksmith, lived and trained with a blacksmith. Someone desiring to make wagons, trained with a skilled craftsman.

Lawyers took in students to read law and the town physicians trained their successors.

Later, schools were established to give students the opportunity to learn the three R's—reading, writing, and arithmetic.

And, as the demand for more trained persons grew and as higher skill levels were required, career schools were established to teach more people the needed skills.

With our society becoming more technologically advanced every day and higher skill levels increasingly required of all of our workers, now is not the time to drive the quality training schools out of existence.

Today there are many quality schools that are graduating really top-notch students.

I have given several special orders in the past, and will continue to give them, to recognize some of the millions of successful career training school graduates. If anyone is interested in receiving copies of these special orders, please contact my staff and we will send them to you.

In closing, let me tell you about another one of these students.

Jonathan Knight discovered the world of art by the time he was 3 years old and by first grade, he was sketching his teachers and the clothes and accessories they wore.

In seventh grade, Mr. Knight was illustrating the books that his English class was reading and his teacher introduced him to a private art teacher.

He studied with this art teacher for 7 years and later accepted a scholarship to the Art Institute of Fort Lauderdale. He graduated summa cum laude with an advertising design degree and received the Best Protfolio Award.

After graduating from the art institute, Mr. Knight joined the staff at Hallmark Cards in Kansas City, MO, where he has received several promotions during the 10 years he has been with the company. His current position is that of card designer/supervisor.

Mr. Knight designs greeting cards and other Hallmark products such as calendars, notebooks, and plaques and has been featured in a national television advertising campaign.

He has also won many awards for his paintings, among these are first prize in oil painting at the Georgia Miniature Art Society's Second Annual International Competition, and Best in Show at the Miniature Art Society of Florida's 13th Annual International Exhibition.

Mr. Knight is a truly talented artist and is just one of the millions of successful career training school graduates.

We must keep the door of opportunity open to these students. Through the GI bill, we have seen the return of between $5 and $12.50 for every $1 invested in higher education.

And, through the Shearson Lehman Hutton study, we have seen that taxpayers save $17,938 per student per year for every American who receives career training and gets a $15,000 job.

If we force career schools out of existence, these savings will quickly dwindle, become nonexistent, then turn into direct costs.

While we must, and will, deal with the student loan default problem, denying educational access to those students who most need assistance to realize their dreams is definitely not the answer.

□ 1900

SETTING THE RECORD STRAIGHT ON THE SAVINGS AND LOAN CRISIS

The SPEAKER pro tempore (Mr. PENNY). Under a previous order of the House, the gentleman from Virginia [Mr. PARRIS] is recognized for 60 minutes.

Mr. PARRIS. Mr. Speaker, I once again take to the well of the House, as I have many times before throughout

the past 5 years, to discuss the greatest financial disaster facing our Nation—the savings and loan crisis.

Over the past 5 years, I have taken precious time like this to address this great legislative body, and the American people as well, on the impending doom threatening over one-third of the thrift industry and the Federal Savings and Loan Insurance Corporation, now known as the Office of Thirft Supervision. However, my purpose in taking the valuable time of this institution today is not to sound alarms on the thrift crisis—they have already been sounded, and the American people have heard them, and experienced first hand this tragic financial situation. My purpose today is to address another wrong—the attempt to rewrite the historical events that led to the thrift crisis by Democrat political strategists.

One might ask why Democrat political strategists would want to rewrite the political history of the S&L fiasco to put the blame on Republicans? Well, the answer is easy—to provide damage control in an attempt to hide the egregious errors made by Democrat leadership and its members in aiding and abetting the thrift fiasco.

Let me set the record straight and remind the American people—and also remind those political strategists who apparently suffer from either a severe lack of knowledge, amnesia or at least selective memory—how we ended up with a $300 billion financial debacle that has now been placed on the back of the Federal Government and the American taxpayers.

I know a little bit about the S&L crisis. Since the early 1980's, I have followed closely and been involved as a Member of Congress with the activities of the savings and loan industry and those of us who are involved with the responsibility of legislating in this area.

□ 1910

In 1985 I informed the House on the startling conclusions of an investigation and report I had requested from the General Accounting Office on the health and the status of the thrift industry and the Federal Savings and Loan Insurance Corporation. The information that I received from the GAO at that time was so disturbing that I took to this very poduim—at which I now stand—to share the results of that alarming report with the Congress and the American people. I had hoped at that time that the Democrat controlled Congress and the House Banking Committee—on which I served—would listen and respond to warnings that were being sounded about the thrift crisis looming on the horizon.

Regrettably—for every man, woman and child in the United States—my hopes of early and corrective action were in vain.

On October 29, 1985, I reminded the Congress from the floor of this House that according to the GAO "42 percent of all savings institutions [were] insolvent or [had] a dangerously low net worth." That group of 1,343 institutions, at the end of 1984, had roughly one-half of the industry's assets, $483.7 billion. At that time I also noted that according to Bank Board officials "the cost [to clean up the bankrupt thrifts] could amount to between $30 and $50 billion." That quote can be found in the CONGRESSIONAL RECORD on page H9309.

That was in 1985, and by the time the Congress took substantive action to address the thrift crisis in 1989, 4 years later, that figure had multiplied by a factor of 10. Now, some predict that the ultimate resolution cost of this situation will approach one-half trillion dollars.

HISTORICAL BRIEFING

We are frequently asked, how did the size of this problem get so large? What happened that created a financial crisis for this Nation that will cost more to fix than it cost to wage all of World War II?

I, and others, have reviewed the history of the S&L industry ad nauseam. I certainly do not intend to consume the valuable time of this body to belabor the historical perspectives of the thrift industry. However, a brief review of the rise and fall of over one-third of the Nation's thrift industry and the Federal insurance funds that guarantee it may serve to remind us how we got to where we are today.

Savings and loans were originally created to provide mortgage financing for first-time homebuyers, and to take in small deposits in the form of savings accounts for consumers. Traditionally, commercial banks had little desire for small deposits and long-term mortgage loans, and S&L's filled this gap for many low- and moderate-income families.

The first savings and loan in the United States, then called a building and loan, was formed in 1831 in Frankford, PA. By the 1920's there were 12,000 S&L's in operation in the United States.

As a result of massive bank runs during the Great Depression of the 1920's, the Congress created Federal deposit insurance. The FSLIC was established in 1934 to protect depositors' money and prevent future depositor panic and subsequent runs on financial institutions. After 1934, depositors could rest easy when it came to their hard-earned money that they had placed in a savings account—after all, their money was insured by Uncle Sam.

For many years, savings institutions accepted modest deposits and lent money out in long-term, typically 30-year, fixed-rate home mortgages. Thrifts made money by charging higher interest rates on their loans than they paid on short-term deposits, and the interest they could pay on deposits was controlled and established by law.

The motto for the lending practice of S&L's in the "old days"—prior to 1966—was 3-6-3: offer 3 percent on savings, lend at 6 percent, and make your tee time at the golf course by 3 o'clock in the afternoon.

The Federal Government in 1966 codified regulation Q to place an interest rate cap of 5¼ percent on the amount of interest thrifts could pay on deposits. This was done in order to protect the housing market from high interest rates. The theory was that by preventing thrifts from competing for deposits by offering high interest rates, interest rates on home mortgage loans would remain relatively low as well—since S&L's would not need additional income to cover the amount of interest they paid in order to attract deposits.

THE FALL OF THE S&L INDUSTRY

The savings and loan system worked quite well up through the late 1970's. S&L's became an important financial component of communities, making home ownership affordable for an emerging middle class who, in turn, fueled the American economy.

So what happened?

Jimmy Carter economics is what happened. Jimmy Carter failed to deal successfully with the single greatest challenge facing his administration: inflation.

Mr. Speaker, I yield to the gentleman from Indiana [Mr. HILER].

Mr. HILER. I thank the gentleman for yielding at this point.

Let me see if I can understand this last several minutes of what the gentleman has said so we can kind of capsulize it.

The S&L industry operated fairly successfully from the time it was first chartered back in the twenties or thirties—

Mr. PARRIS. Thirties.

Mr. HILER. The thirties. At that time and up until the late seventies it essentially operated fairly successfully. They were able to borrow their money because interest rates had been fairly stable for that 50- or 40-year time period, able to borrow money at a fairly low rate, tack on about 3 percent and loan it back out for a long-term fixed-rate mortgages, 30-year fixed-rate mortgages.

Mr. PARRIS. To middle-class Americans.

Mr. HILER. Middle-class Americans.

Mr. PARRIS. That is correct.

Mr. HILER. In a sense, they were then able to generate enough profitability from that spread between what they borrowed the money from the de-

positors for and what they loaned it out to homeowners for, is that correct?

Mr. PARRIS. That is correct.

Mr. HILER. And so up until really the late 1970's they never really had a problem because those interest rates, which were fixed—you mentioned regulation Q earlier—the fact that they were fixed did not really matter that much because there was not anything happening in the overall economic system that drove interest rates up, is that correct?

Mr. PARRIS. That is again correct.

Mr. HILER. So for literally 40 years or so, with stable economics, we were able to have stable interest rates and S&L's were able to lend out their money, then, for a long period of time on that stability that had been in the system for so very, very many years.

Mr. PARRIS. Precisely. That is where Americans got used to the idea of a 15- or 30-year mortgage on their home and the low-interest rates that came with that opportunity for construction of single-family residence.

Mr. HILER. That takes us up to what you called Jimmy Carter economics. I think that is where I interrupted you, and I will yield back to you and let you pursue that point.

Mr. PARRIS. I thank the gentleman for his contribution and the dialog.

As I was indicating, what happened in the late seventies, as has been said by the gentleman from Indiana [Mr. HILER], is that there was enormous economics change in the climate of the United States of America.

And now when Jimmy Carter failed to address the issue of inflation, the Carter administration could have pursued an anti-inflationary monetary policy with the Federal Reserve Board to reduce the rate of consumer spending in the economy or the price increases that accompanied OPEC's actions which effected the domestic oil industry. In fact, conventional wisdom and contemporary commentators advised that the Carter administration do just that at that time.

Instead, Carter offered bits and pieces of a vague economic policy based on economic rules and incentives that he said would encourage efficiency, discourage waste and reward successful competition.

□ 1920

Jimmy Carter's policies would turn out to be a complete and total failure.

By defying both accepted economic theory and practice and pursuing his economic policies alone, Jimmy Carter effectively abandoned any working relationship he might have had with then Federal Reserve Board Chairman, Arthur Burns. At that time, Burns was the one man in Washington that the Nation's business community considered to be serious about fighting inflation.

Not surprisingly, Carter was later precluded from coordinating White House and Federal Reserve Board efforts to reduce inflation once it became clear that his policies were inadequate.

The Carter administration's economic policies and its inability to work with the Federal Reserve Board caused the money supply to grow—too many dollars continued to chase too few goods and interest rates continued to climb to unprecedented heights.

The disastrous effect of Carter's misdirected economic policies wreaked havoc on the S&L industry.

The S&L practice of borrowing short-term and lending long-term made the profitability of S&L's largely dependent upon the maintenance of relatively stable interest rates, and thrifts found themselves subject to massive withdrawals of funds—generally called disintermediation—whenever interest rates shot up.

Thanks to the Democrat economic policies of the Carter administration, an explosive inflation rate that ravaged the economy during the late 1970's, interest rate caps, and new competition in attracting deposits as a result of newly introduced developing money market funds, federally insured savings associations were becoming severely handicapped.

S&L's found themselves limited to paying 5¼ percent on deposits while inflation was running at over 13 percent in 1979, and thrifts subsequently found it increasingly difficult to attract and keep deposits.

Under the Carter administration the Federal Reserve tightened credit to 12 percent and imposed an additional reserve requirement of 8 percent on banks.

These actions, all during the term of a Democrat adminstration, threw financial markets into a tailspin, and S&L's were hit by these misdirected policies very hard. S&L's were forced to borrow money at over 12 percent while relying for earnings on mortgage portfolios with an average yield of only 9 percent or less.

To illustrate the damage that occured in the financial markets, and particularly the S&L industry during the Carter era—in 1972 the Nation's S&L loans had a combined net worth of $16.7 billion. Eight years later, by the end of the Carter administration in 1980—and its misdirected Democrat economic policies—the combined net worth of S&L's had plummeted to a negative $17.5 billion, and 85 percent of S&L's were losing money at an extremely fast pace.

Mr. HILER. Mr. Speaker, will the gentleman yield?

Mr. PARRIS. I yield to the gentleman from Indiana.

Mr. HILER. There has been so much focus on this S&L problem, as if it occurred just in the last 6 months or 9 months or year or 2 years. What the gentleman is saying is that the origins of this problem really go back 12, 13, 14 years, back to the latter part of the 1970's and the Carter administration, and that, in fact, because kind of the macroeconomic environment at that time that was impacted on our citizens, and who can forget those days of 21-percent interest rates, and 13- and 14- and 15-percent inflation rates? Who can forget that? But because of that, that causes massive disintermediation or this massive amount of money that left S&L's and went into what were becoming popular at that time, the money markets, it caused the S&L's to lose a great deal of money and, in fact, in 1972 to 1980 they went from a positive network of $16.7 billion to a negative of $17.5 billion, is that correct?

Mr. PARRIS. That is correct.

Mr. HILER. If the gentleman will continue to yield, a large number of S&L's at that time would have been insolvent.

Mr. PARRIS. Reclaiming my time for a moment to remind the gentleman he was not in the room when I said earlier in these remarks, on October 19, 1985, I took to this podium on the floor of this House and tried to suggest to my colleagues that there were 1,343 institutions out of roughly 3,500, almost one-third of the thrifts in 1985, with a half a trillion dollars worth of assets that were either insolvent or dangerously undercapitalized. So this was 4½ years or so ago, and that was 5 years after the economic period that we are discussing in terms of these enormous interest rates and the rest.

Mr. HILER. If the gentleman will yield, obviously this tremendous loss in equity in the industry was putting great pressure on the industry. It must have result in some type of acts taking place back in 1980. Maybe that is where the gentleman was heading?

Mr. PARRIS. That is exactly where I am going.

Under the policies of the Carter administration, thrifts were permitted to expand their funding sources to include floating rate certificates, negotiable and fixed-rate CD's, commercial paper, mortgage-backed bonds, and passthrough securities, as well as variable-rate mortgages. Thrifts were also allowed to dip into old reserves in order to stay in business; all at a time when many financial experts believed they should be holding greater reserves to maintain their creditworthiness.

In October 1979, the Federal Home Loan Bank Board, which was in charge of the Savings & Loan Thrift Industry, freed $2.5 billion for S&L's by reducing their reserve requirement and gave thrifts permission to borrow outside funds equal to 20 percent of

their assets—up from less than 10 percent.

And at the same time they were permitted to hide their true financial condition by utilizing regulatory accounting practices instead of generally accepted accounting practices.

Mr. HILER. If the gentleman will yield, so that regulatory accepted accounting practices have been at times derogatorily referred to as RAP as opposed to generally accepted accounting practices, or GAAP. So the RAP accounting really started back in 1979?

Mr. PARRIS. It developed very much like Topsy, a little bit at a time, but essentially I think the trend for RAP accounting began right in that time frame.

There has been a great deal of finger pointing by many Democrats that it was the Reagan administration which proposed deregulating the S&L industry, and thereby "opened the floodgates for fraud and abuse in the thrift industry."

Let's set the record straight. As it was recently reported by an ABC news program, it was the Carter administration—a Democrat administration—which proposed, advocated, and initiated the deregulation of the S&L industry.

Moreover, it was the Carter administration which enacted the first thrift deregulation bill, the Depository Institutions Deregulation and Monetary Control Act, in March 1980. This legislation had two significant impacts on the thrift industry.

First, it authorized the gradual phase out of interest rate ceilings on deposits placed in S&L's. Interest rates had become so high under the Carter administration, and inflation had gotten so out of control, that S&L's could not attract deposits by paying the maximum permitted interest rate of 5¼ percent on savings deposits while money market funds were paying the market rates of 13 percent and more.

□ 1930

In addition, to enable thrifts to earn more in order to pay higher interest rates on deposits, the bill authorized S&L's to invest up to 20 percent of assets in more risky consumer loans, commercial paper, and corporate debt securities. Even though the interest rate cap was lifted, however, S&L's found themselves having to pay higher interest on deposits than they were receiving from their 30-year mortgage loans, and thrifts began losing money at a faster rate than ever.

Second, the bill increased the FSLIC insurance coverage on deposits from $40,000 per account to $100,000. Regulators later said that "raising deposit insurance, to $100,000, may have been the most costly mistakes made in deregulating the thrift industry." The push for this increase came essentially from one man, Fernand St Germain, the then-Democrat chairman of the House Banking Committee.

Mr. HILER. Mr. Speaker, will the gentleman yield at this point?

Mr. PARRIS. I yield to the gentleman from Indiana.

Mr. HILER. Mr. Speaker, that raising of the insurance coverage from $40,000 to $100,000, does the gentleman from Virginia know if there was a vote on an amendment on the floor to do that? I mean for a very significant action to take place, I presume there must have been debate and discussion at that time on the floor of the House.

Mr. PARRIS. There must be mystical vibes transforming through the air this evening, I would say to the gentleman from Indiana, because this is my next paragraph.

Chairman St Germain and a Democrat Member of the other body singlehandedly raised deposit insurance from $40,000 to $100,000 per account behind closed doors, in the dead of night while negotiating the final provisions of a conference report on S&L legislation.

Mr. HILER. Mr. Speaker, will the gentleman yield?

Mr. PARRIS. I yield to the gentleman from Indiana.

Mr. HILER. So, Mr. Speaker, this substantial raising of the amount of money that could be insured, this over doubling of it took place, and there was literally never a debate really in committee, or on the floor of this House, or the floor of the other body? Is the gentleman aware of any debate in the other body on this?

Mr. PARRIS. I am not, and I should say in all candor that I was not a Member of Congress at the time, but we have researched very carefully the history of all of this, and I assure the gentleman from Indiana [Mr. HILER] that the increase of this insurance amount, the guarantee, if my colleagues will, of the Federal Government, was never discussed by the appropriate committees of this Congress.

Mr. DORNAN of California. Mr. Speaker, will the gentleman yield?

Mr. PARRIS. I yield to the gentleman from California.

Mr. DORNAN of California. Mr. Speaker, I do not think most Americans, at least in 49 States, have any idea who Fernand St Germain is, the chairman of the Banking Committee here for a quarter of a century. I know the people of Rhode Island were well aware of him because, unlike my State where there is 45 Congressmen, there is only two there, two Congressmen, two Senators, so all four about equally known. He was known well enough in his own State because they turned out a 25-, 6-, 7-, or 8-year incumbent chairman of the Banking Committee, and what I read, and it is precious little, about Mr. St Germain and in that race which was considered one of the scandal upsets, one of four out of six races that were turned, three on a real scandal, one on a proceed and two on races that were won by less than 1,000 votes in the 1986 election. Then in the 1988 election we had the highest percentage of returned Congressmen ever, 99-point-something percent, but the St Germain was one of the three scandals, and then another perceived scandal in New York which was unfair.

Mr. Speaker, I understand that he came here, as I did, at 43 with no resources other than home ownership and that he came in a much younger age with nothing and left this Chamber a multimillionaire.

Mr. Speaker, I think Americans should know that, that some people have become very wealthy as Congressmen. When he came here, the pay was something like $30,000 a year. So, a lot of people leave this House like Mr. Wright, Mr. Coelho, Mr. St Germain, and, by just giving up the prestige of this office, all investigations stop. I do not know if the Justice Department is still investigating any of these people. All investigations stopped, and they trade their seat, whether they want to leave or not, even in election defeat, they are then left alone, but the millionaire status remains, and it is just something that Americans should know.

Mr. Speaker, I just want to tell my colleagues that I have learned more in the special order of the gentleman from Virginia [Mr. PARRIS] tonight, and he is not even through, than I have learned in most of my reading in the press on this issue. But I do know this Congressional Research Service, which is bipartisan, will make up a seminar of an hour, 2 hours, 3 hours, whatever Members want, and they will present to us, and I hope the gentleman will help me with this, in a classroom around here, one of our committee rooms, and they will present, as I have had them do on Social Security, a few years ago, a 2-hour lecture to Members and staff on the whole S&L thrift mess, and I would hope they would incorporate much of what the gentleman has said because Americans are angry now, but still confused. There are Members around here who are all angry and still confused, as the average American, on how this thing got away from us.

I heard there was no debate on the move from $40,000 to $100,000 insurance which was telling these people, like pirates and freebooters, because most of them were not stealing money. Some were. They were free-wheeling freebooters with no entrepreneurial risk whatsoever, and that is what caused some decent men to just go bonkers in spending other people's money and a lot of dishonest men to say, "Buy a Lear jet, get a yacht, get

me some Baccarat crystal, and let's really go to town here," and now a lot of Americans are suffering badly.

Mr. PARRIS. Mr. Speaker, I thank the gentleman from California [Mr. DORNAN] very much for his kind words.

Mr. HILER. Mr. Speaker, will the gentleman yield further at this point because I think this question of insurance really is going to become integral to, I think, a lot of what the gentleman has to say the rest of this evening and possibly on other occasions because it was the raising of that insurance from $40,000 to $100,000 that really then gave the operators and those S&L's who maybe were a little bit more adventuresome maybe would be a kind way to say it. It really gave them the ability to attract the deposits that would fund their adventures I suspect.

Mr. PARRIS. The gentleman from Indiana [Mr. HILER] is exactly correct. And it is almost as if the gentleman is reading off of my speech.

Mr. HILER. I assure the gentleman from Virginia [Mr. PARRIS] that I am not.

Mr. PARRIS. I am sure the gentleman from Indiana is not because this is the only copy, but I would say to the gentleman that he is almost reading my mind because that is exactly where I am taking this discussion at this time, and I would say to my friend from California that I am about to make mention of one of the players in this decision, which is a Senator from his State of California.

The increase in deposit insurance was heavily supported by an S&L lobbying group. No congressional hearings were held, and there was no recorded debate on this drastic and significant change in Federal deposit insurance. "It was almost an afterthought," a House staffer later told a reporter. Afterthought indeed—that afterthought by Fernand St Germain and a Democrat Senator in the other body cost the American taxpayers billions of dollars.

It is interesting to note that the Democratic Senator that helped the S&L highflyers by pushing for the increase in Federal deposit insurance to $100,000 is a member of the so-called Keating Five.

It is also interesting to note that Fernand St Germain was later allegedly essentially living off a credit card of the S&L lobby which pushed for the increase in deposit insurance and was not reelected by his constituents 2 years ago largely for that reason.

Raising deposit insurance opened the door to fast and loose money brokers and swindlers. Moreover, the combination of lifting the interest rate cap and the increase in the amount of FSLIC insurance per account allowed depositors to seek the highest interest rate from S&L's—regardless of how sick or mismanaged—and it allowed the S&L's to attract $100,000 blocks of insured money with which they could wheel and deal at no risk to themselves.

The new deposit insurance level of $100,000—pushed by Democrat Fernand St Germain—ended the days when deposit insurance focused on insurance for the small saver.

□ 1940

Instead, the new level guaranteed the affluence of the wealthy, and it exacerbated the recklessness of S&L's, and it created a combination of circumstances that were deadly to the solvency of all financial institutions, healthy or not, because it required them literally to bid in a competitive market for deposits in order to stay in the business.

Obviously, the best way to attract those deposits was to pay above-market interest rates to the depositors, wherever they were found in the United States. Consequently, in order to offset the increased deposit costs the institutions found themselves entering into ever more increasingly speculative and risky investments and loans in order to generate a sufficient return to pay the increased interest rates.

All of that was a sure formula for self destruction.

When Jimmy Carter left the White House he left the Reagan administration with a Federal funds interest rate level of 19 percent, the prime interest rate was 21.5 percent, the unemployment rate was the highest in years, and the savings and loan industry was plunging into ruin.

These were the results of a Democrat administration's economic policies on the thirft industry. This was the genesis of the troubles which would bring about the greatest financial disaster our Nation has ever experienced, and the need for the Congress and the Reagan administration to address an ailing S&L industry was and is obvious to us all.

Mr. HILER. Mr. Speaker, will the gentleman yield at that point?

Mr. PARRIS. I am glad to yield to the gentleman from Indiana.

Mr. HILER. Mr. Speaker, I think what the gentleman says is so critical to having a really enlightening debate on the S&L problem. The fact is that when the gentleman from Virginia was elected in 1980, took office in 1981, as did the gentleman from Indiana, When Ronald Reagan was elected in 1980, taking office in 1981, at the time that we were taking office in fact not only the seeds of this problem, but the well-spread roots of this problem had already taken hold and in fact from 1981 on, almost every event that took place was in reaction to the disaster that was inherited in 1981.

I mean, would that be a fair statement to make?

Mr. PARRIS. I think, Mr. Speaker, that is exactly correct. I say to the gentleman in my remarks that I just completed, the savings and loan, the seeds of the disaster of the savings and loan industry, at least in one-third of the industry's financial institutions, was sown and we were reaping the whirlwind of the conditions that existed from economic policies that were beyond the control of anybody at that time, including my poor friend from Georgia, Mr. Carter.

Mr. HILER. Mr. Speaker, if the gentleman will yield further, does the gentleman have any specific names of thrifts, or at least recollect in his memory of thrifts in different parts of the country utilizing this expansion in the insurance authority to attract money in such a way that they grew precipitously, in that they went from small institutions to very large institutions?

Mr. PARRIS. Well, I would say to my friend that perhaps a classic case of that is the Vernon Savings & Loan in Vernon, TX, that was owned by Mr. Dixon, who just a week or so ago was sentenced by a court in Texas to 30 years in jail.

Mr. HILER. Mr. Speaker, if the gentleman will yield further at that point, I think Mr. Dixon was indicted. It was another gentleman.

Mr. PARRIS. I am sorry. The gentleman is correct. Mr. Dixon is not correct. I apoligize for that. That was not the correct name, although Mr. Dixon was just indicted.

Mr. HILER. Yes.

Mr. PARRIS. And the other gentleman's name, very frankly, escapes my mind at the moment; but the Vernon Savings & Loan, which was a typical high-flier Texas institution, that was a ma and pa savings and loan institution in a small town somewhere in west Texas, purchased by this gentleman, and through brokered accounts attracted by higher than market interest rates grew by billions of dollars in a very short period of time, in 1, 2, or 3 years, and it turned into an $8, $10, and $20 billion institution, and it had been a corner thrift savings and loan prior to that time, and that was typical.

Mr. HILER. Mr. Speaker, I thank the gentleman.

Mr. PARRIS. And so it was the Reagan administration and the Congress that was at the beginning of 1981, left to clean up the S&L mess that had been created by 4 years of a Democrat administration's economic policies which left the thrift industry—a major source of housing finance for low- and moderate-income families—in peril, and on the financial institutions endangered species list.

Four years of economic and administrative mismanagement by the Carter administration set the stage therefore for the thirft crisis.

The failed economic policies of the Carter administration led directly to that crisis in the S&L industry.

By the beginning of 1981, as we have just indicated, the stage was set—losses had already occurred in the thrift industry and action was needed to correct this extremely serious situation.

In this industry, which has a trillion dollars' worth of assets and something like 400,000 employees is providing funding for mortgage financing throughout this Nation and was in real trouble.

This, of course, is not the end of this tragic chapter in the history of America's federally insured institutions. There is more, much more, and I intend to continue this discussion on the S&L crisis in future special orders I have reserved.

I thank the gentleman for his contribution to this discussion this evening.

ORDER OF BUSINESS

Mr. PASHAYAN. Mr. Speaker, I ask unanimous consent that I be allowed to give my special order at this time.

The SPEAKER pro tempore (Mr. PENNY). Is there objection to the request of the gentleman from California?

There was no objection.

AMERICA'S FOOD SUPPLY AND THE HAYDEN INITIATIVE IN CALIFORNIA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. PASHAYAN] is recognized for 60 minutes.

Mr. PASHAYAN. Mr. Speaker, I wish to call to the attention of my colleagues an environmental initiative that will be on the ballot this November in California.

The measure is called the California Environmental Protection Act of 1990.

Its author is California State Assemblyman Tom Hayden, with help from California State Attorney General John Van de Kamp and several environmental groups.

The initiative is popularly known in California as "the Hayden initiative" or "the Big Green."

THERE IS POLITICAL RISK IN SPEAKING AGAINST BIG GREEN

There are several provisions of the Hayden initiative that concern me and lead me to oppose it. A compelling reason for me to speak out against the measure is that there is no question in my mind but that the Hayden initiative would reduce California crop yields, force up the price of food, and disrupt our Nation's food supply.

I believe deeply in protecting and preserving our environment and assuring the safety of agricultural produce. But there are too many features of the Hayden initiative that would have a negative impact on California's economy and on the Nation's economy.

I thought long and hard about the Hayden initiative before deciding to speak out against it. Many of the initiative's objectives are similar to my own. Moreover, the initiative is at this time a popular proposal in California. A poll sponsored by its opponents showed that 75 percent of voters surveyed, upon hearing their first description of the initiative, said they would vote for it. If the election were held today, the Hayden initiative would probably pass.

Even in my own 17th Congressional District, where farming is a multi-billion dollar industry, the Big Green will garner considerable votes this November. By opposing the Hayden initiative, I am setting myself up for the charge that if I am not for the Big Green, I must, therefore, be in favor of Californians having to eat produce that was sprayed with carcinogenic chemicals and having to breathe toxic fumes. Nothing could be further from the truth.

In my 12 years in Congress, I have been a strong supporter of Government efforts to assure the safety of pesticides and the chemicals.

For example, I voted for the Fungicide, Insecticide, and Rodenticide Act Amendments of 1988. The FIFRA law is a far-reaching statute that over the next few years will have the beneficial result of making our food supply safer than it is now—and, keep in mind, the American food supply, even before the adoption of FIFRA, was the safest and the cleanest of all the world's developed nations.

In addition, I have promoted the technology of Integrated Pest Management as a method for reducing agricultural use of chemicals. Using good bugs to kill bad bugs is an increasingly popular pest control strategy on California farms, and I am all for it. I am all for any reasonable attempt to reduce the use of pesticides. In summary, I have worked hard to encourage programs such as FIFRA and IPM to assure safe pesticides and to reduce their use whenever possible.

However, despite my longtime support for several of the objectives of the Hayden initiative, I cannot endorse it. I doubt not that it was crafted with idealistic intentions. But it is also a reckless and irresponsible proposal, a radical departure from current practices and an extreme solution to complex difficulties. The Big Green tries to do too much too soon.

The Hayden initiative would have a negative impact upon agriculture as practiced in my district and in California. The Nation itself would suffer higher food costs and lower yields as our efficient system of food supply, the best on Earth, would be made to undergo fundamental change.

And, as I point out later in my remarks, the Hayden initiative would have the unanticipated result of causing the importation of more food from foreign nations, thereby increasing the amount of chemical residue on our fruits and vegetables.

Finally, I would note that some political figures, as well as some journalists, have hyperventilated the pesticide story by making claims that the United States has a dangerous, poisonous, and carcinogenic food supply. That claim is not true.

But all too often the facts do not catch up with the original charges. That is irresponsible and has caused many Americans to lose confidence in the safety and cleanliness of their food. I would recommend that all of us try to evaluate the issue of food safety on its merits and not on unproven allegations.

WHERE THE HAYDEN INITIATIVE EXTENDS

While ostensibly the Hayden initiative is designed to affect only California, it should have an impact on other parts of the Nation, notably those States that buy California food and fiber and those States which grow human food and animal feed and ship them to California. It should have a like effect on foreign nations.

The Hayden initiative is 39 pages long and has some 15,000 words. For that reason, I am not going to ask that it be reprinted in the RECORD. I shall, however, see that each Member receives a copy of the initiative, with my remarks. I shall describe the initiative briefly.

The Hayden initiative is a sweeping piece of legislation that is designed to restrict or eliminate the use of pesticides in California, and to restrict or eliminate the use of pesticides on food and animal feed produced out of state but shipped to California.

The Hayden initiative would ban, over a period of 5 years, the use of pesticides known or determined to cause cancer or reproductive harm or to contain an inert ingredient that causes cancer or reproductive harm, or prohibited by proposition 65, the State's Safe Drinking Water and Toxic Enforcement Act of 1986.

In addition, the Hayden initiative is intended to protect against oil spills off the California coast, to prohibit cutting in certain Redwood forests, to curtail auto emissions, to raise water quality standards, and to combat further damage to the environment by creating an elected and independent environmental advocate who would have the authority to litigate and take other actions without prior approval of, or coordination with, the Governor, the legislature, the courts, or any

other component of the State's government.

It has been reported in California that Assemblyman Hayden would seek election as the environmental advocate, if it should be created.

GROUPS LINED UP ON BOTH SIDES OF THE INITIATIVE

Activities on both sides of the issue are preparing for the campaign on the Hayden initiative. Observers anticipate that large sums of money will be spent for and against the proposal.

In the gubernatorial election this fall, the candidate of the Democratic Party, former San Francisco Mayor Diane Feinstein, supports the Hayden initiative.

Senator PETE WILSON, the Republican Party candidate, opposes the Hayden initiative.

Among the interest groups that support the Hayden initiative are the Sierra Club, the Natural Resources Defense Council, and other environmentalist groups.

Among the opponents are California's water districts, public utilities, retailers, general manufacturers, auto makers, chemical and petroleum manufacturers, agricultural supply and forest products industries, food processors, grocers, farmers, and several others.

Under the leadership of the California Chamber of Commerce and the California Manufacturers Association, opponents have formed an entity known as the California Coordinating Council to mobilize efforts to defeat the measure.

CALIFORNIA ATTORNEY GENERAL'S SUMMARY OF HAYDEN INITIATIVE

On November 28, 1989, the office of the attorney general of California issued a summary of the chief purpose and points of the Hayden initiative, as follows:

Natural Environment. Public Health. Bonds. Initiative Statute.

Requires regulation of pesticide use to protect food and agricultural worker safety. Phases out use on food of pesticides known to cause cancer or reproductive harm, chemicals that potentially deplete ozone. Requires reduced emissions of gases contributing to global warming. Limits oil, gas extraction within bay, estuarine and ocean waters. Requires oil spill prevention, contingency plans. Creates prevention, response fund from fees on oil deliveries. Establishes water quality criteria, monitoring plans. Creates elective office of Environmental Advocate. Appropriates $40 million for environmental research. Authorizes $300 million general obligation bonds for ancient redwoods acquisition, forestry projects. Summary of estimate of Legislative Analyst and Director of Finance of fiscal impact on state and local governments: state costs of $300 million in bond principal, $235 million in projected bond interest for acquisition of ancient redwood stands and forestry grant projects. Unknown loss of state and local revenues resulting from acquisition of ancient redwood stands. One time cost of $17 million and annual costs of $40 to $70 million to state agencies to administer pesticide, air emission, marine resources and other required programs. One time state appropriation of $750,000 for elected Environmental Advocate and $40 million for environmental research programs. Approximately $360 million in revenues to the Oil Spill Prevention and Response Fund by 1996-97; unknown additional revenues from potential penalty assessments. Indefinite deferral of potentially over $2 billion in future state oil and gas revenues resulting from limits on oil and gas leases in marine waters. Unknown costs and revenue losses to state and local governments if measure changes energy costs and gasoline consumption. Unknown costs to state and local governments if reduced pesticide usage creates higher food costs.

INITIATIVE WILL CUT CROP YIELDS, RAISE FOOD COSTS

The initiative's features that I want to discuss now have to do with the measure's intent to restrict or eliminate the use of pesticides on the farms in California, and on food and animal feed shipped into California.

The Hayden initiative calls for elimination of at least 130 chemicals and 13 inert ingredients, many of which are critical components in the pesticides used by California farmers.

In addition, the initiative would prohibit the sale in California of foods, feed grains, and oilseed meals used for livestock and poultry feed that contain detectable residues of banned pesticides.

I have a partial list, complied by the California Grape and Tree Fruit League, of the chemicals likely to be banned by the initiative. The list was printed in the April 1990 edition of Fruit Grower magazine. I insert it at this point in the RECORD:

1,3-dichloropropane (Telone II)
Acephate (Orthene)
Acetochlor (Acenit)
Amitraz (Ectodex, Mitac)
Amitrole (Amitrol, Cytrol)
Atrazine (Gesaprim, Atrazine)
Azinphos-Methyl (Guthion)
Benomyl (Bentate)
Bromacil (Bromax)
Captan (Captan, Orthcide)
Clofentezine (Apollo)
Chlorbenzilate (Acraban, Akar)
Chlorothalonil (Bravo)
Cyhexatin (Pictran)
Cypermethrin (Ammo, Larvadex)
Dichlobenil (Decabane, Norosac)
Dichlorvos ((DDVP), (Vapona, Verdisol)
Dicofol (Hifol, Kelthane)
Dimethoate (Cygon, Dimethoate)
Dinoseb (Basanite, Sinox General)
Disulfoton (Di-Syston)
Ethoprop (Mocap)
Ethylene Oxide (ETO)
Fenarimol (Rubigan)
Folpet (Fungitrol II, Folpan)
Fosetyl Al (Aliete)
Hexythiazox (Savey)
Lead arsenate (Gypsine)
Lindane (Forlin)
Mancozeb (Dithane M-45, Manzate)
Maneb (Dithane M-22, Polyram)
Methidathion (Supracide)
Methomyl (Lannate, Nudrin)
Metiram (Polyram, Zinc Metiram)
Naled (Dibrom)
Napthalene acetic acid & salts (Amid-Thin W)
Oryzalin (Surflan)
Oxydemeton-methyl (Metasystox-R)
Oxyflurofen (Goal)
Paraquat (Gramoxone, paraquat)
Parathion (parathion)
Permethrin (Ambush, Pounce)
Phosalone (Zolone)
Phosmet (Imidan, Prolate)
Piperonyl Butoxide (Butacide)
Prochloraz (Rival, Sporgon)
Pronamide (Kerb)
Propiconanazole (Tilt, Banner)
Simazine (Princep, Simanex)
Sodium Arsenite (Chem Pels C)
Thiophanate-Methyl (Topsin M)
Triadimefon (Bayleton)
Trifluralin (Treflan)
Zineb (Aspor, Hexathane)
Ziram (Zirex, Caarbazinc)

It is important to note that the California Grape and Tree Fruit League and anyone else, including the backers of the initiative, are uncertain at this time precisely which agricultural chemicals would be banned. The uncertainty is a flaw in not only the pesticide provisions of the Hayden initiative; the same shortcoming—not knowning what the impact of the law would be—is found throughout the measure.

IMPACT OF PROP 65 AND FIFRA UPON PESTICIDE USE

Discussion of the impact of the Hayden initiative on the food supply of the United States should include a brief description of two other laws affecting California farm production—Proposition 65 adopted by California voters in 1986, and a 1988 Federal statute.

As farm analysts at the University of California at Davis, Michael W. Stimmann and Mary P. Ferguson, pointed out in the July-August 1990, issue of California Agriculture, Proposition 65 does not cancel pesticide registrations. It provides information to consumers at the marketplace and restricts the discharge of certain chemicals into the waterways. The law establishes a scientific advisory panel and requires that the State of California develop a list of chemicals known to cause cancer or reproductive toxicity.

Under the labeling provisions of the law, any person who may be exposed to a listed chemical at a significant level must be warned of any product that contains chemicals on the list which amount to a significant risk. Generally, the warnings are signs or labels displayed where the product is sold.

Proposition 65 exempted pesticide-treated commodities from the warning-label requirement, but recently a court decided to require such labels on agricultural commodities. The decision is under appeal.

The water-quality provisions of Proposition 65, if executed, would impose heavy fines on those responsible for the discharge of a listed chemical into any waterway.

The law established by Proposition 65 does not itself remove pesticides from use. However, farmers may be unwilling to use those pesticides or the manufacturers may withdraw California registrations if they should be subjected to commodity labeling requirements or if they risk substantial fines as a result of illegal discharges into a waterway.

The Federal Insecticide, Fungicide, and Rodenticide Act, amended in 1988 [FIFRA 1988], now requires accelerated reregistration of pesticides for which the Environmental Protection Agency did not have complete registration data. Federal reregistration is scheduled for completion in 1997.

Companies will lose registrations before 1997 if they do not agree to provide data or do not pay reregistration fees. Under FIFRA 1988, cancellations will occur if EPA shall determine that the pesticides should not be reregistered for use.

In addition, registrants may voluntarily withdraw pesticide reregistrations when they shall estimate that their costs for continued registration exceed potential sales revenue, or when the liability shall outweigh the potential profits.

As can be seen from this brief description, these two laws combined with the Hayden initiative would have a significant impact on California agriculture. The bureaucratic requirements alone would be an imposing and formidable challenge for individual farmers to overcome and could of themselves add an additional cost to the price of producing, growing, and marketing food and fiber.

TECHNICAL DESCRIPTION OF INITIATIVE'S PESTICIDE FEATURES

The Hayden initiative focuses on the carcinogenic potential of registered pesticides. The measure would eventually cancel the use of a significant number of pesticides included on the Environmental Protection Agency's list of chemicals evaluated for carcinogenic potential.

EPA's "A" list is limited to those chemicals known to be human carcinogens. Chemicals on the "B" list are those classified by the agency as probable human carcinogens. Chemicals on the "C" list are considered possible human carcinogens.

The Hayden initiative would cancel the registrations of the chemicals on the "A" and "B" lists and would revoke their tolerances by January 1, 1996. If it were shown at that time that no effective alternative pesticides were available, the State Director of Health Services could authorize an additional 3 years of use, requiring a 10-percent reduction in use each year before cancellation.

The registrants of the "C" list would have to petition for a determination of noncarcinogenicity if they wished to retain registration. Petitions would be due by November 7, 1994.

If the "C" list chemicals were determined to be a probable human carcinogen, the Hayden initiative would cancel registration and revoke its tolerance by the year 2001. The State director of health services could also authorize the optional 3-year extension. If the chemical were determined not to be a probable human carcinogen, its registration would remain in effect.

The Hayden initiative has a provision stating that all other pesticide tolerances must be evaluated by the State department of health services by January 1, 1997, and revised or revoked by January 1, 1998.

The Hayden initiative would incorporate the pesticides covered by the proposition 65 list, and would eventually cancel their use entirely.

The Hayden measure would prohibit importing into California those commodities carrying residues of pesticides on proposition 65's list or the Hayden initiative's list of banned chemicals. Most of these cancellations would take effect on January 1, 1996.

Most pesticide formulations include various inert ingredients in order to make them effective. The Hayden initiative defines inert ingredients to include any ingredients that are not active, and contaminants, metabolites, or degradation products in the formulated pesticide.

Specific information on most inert ingredients is considered a trade secret by manufacturers and is not publicly available. Proposition 65 includes some of these inert ingredients; 13 inert ingredients meet the same criteria applied to active ingredients, adding them to the Hayden initiative list of prohibited chemicals.

HAYDEN INITIATIVE HAS MANY UNCERTAINTIES

A frustrating feature of the Hayden initiative is that analysts who study the measure cannot predict with any certainty how the new law would be interpreted and administered and how significant would be its effect upon the farming industry and the food supply.

All that can be predicted with certainty is that farmers could be at the mercy of breakthroughs in the science and manufacture of agricultural chemicals. These breakthroughs presumably would enable the development and availability of new pesticides that would satisfy the requirements of the Hayden initiative.

Seen in its most favorable light, the Hayden initiative assumes that for every pesticide that is banned a new, safe, reasonably priced, acceptable pest-control technology will come on the market. That might happen or it might be wishful thinking, however, and it poses a dilemma for farmers who, as they plan for the future, have little left more than unprovable assurances that things will turn out all right. It is difficult or impossible for a farmer to get a loan from a bank with only hope as his collateral.

In no other industry, in no other human pursuit, do we require of practitioners that they proceed into a future so riddled with uncertainty and economic pitfalls. I sympathize with California farmers in this regard, for their farms, their careers, their life's work are being subjected to a plebiscite.

Reflective of the farmers' dilemma in planning for the future is information contained in the California Agriculture article by UC-Davis analysts Michael Stimmann and Mary P. Ferguson.

The authors wrote that the Hayden initiative

includes a clause that may eventually prove very significant. The initiative would set the maximum allowable risk of carcinogenicity to an exposed population at one case in one million. This risk would be determined using the most conservative risk assessment model that is accepted as scientifically valid.

The—Hayden initiative—states that this "* * * shall also apply to other adverse health effects of any pesticide as to which there is no generally accepted scientifically valid threshold below which exposure is safe * * *."

Depending on future interpretation, this portion of the initiative could impact any pesticide that shows any measurable neurological, behavioral, or reproductive activity in test animals. It could also affect pesticides shown to be mutagenic in higher organisms.

We cannot predict with certainty, however, how this portion of the initiative would be interpreted. Since—the Hayden initiative—includes no provision for review by a recognized scientific advisory organization, the process for establishment of standards and the technical determination of scientifically valid thresholds remains unclear.

The authors go on to say that the Hayden initiative, when combined with requirements of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1988 and proposition 65,

may cause progressive losses of pest management chemicals for the farming industry * * *.

Implementing acceptable alternative pest management strategies over the next five years would be expensive and require increased research and extension programs and, perhaps, major adjustments in agricultural production and management systems.

Stimmann and Ferguson reported that many possible alternative technologies exist and deserve further study, but they "are only partially developed and have not yet proven to be efficacious and economical."

The authors concluded by saying that, while the effort will be expensive, "with time" effective, affordable alternatives "may be developed."

To that I would say, yes, alternatives may be developed, but in how much time? And at what cost? The Hayden initiative never says. In effect, Assem-

blyman Hayden has asked the farmers of my State to have faith in technology and, at the same time, has asked the people of California to provide a blank check for the development of that technology: entirely idealistic; entirely impracticable.

ALL AMERICANS HAVE AN INTEREST IN THE HAYDEN INITIATIVE

Ordinarily, initiatives in California are California's matters and not of concern to the Congress or the national government. But the Hayden measure is an exception. It would have a significant impact on America's ability to feed itself, not only in California but in every State of the Union.

I mean not to overstate the difficulties that the Hayden initiative might raise. But I think it is fair to use an analogy. Let us say that the New York State Legislature was considering passing a law that would encourage Wall Street brokers to shut down or would require American investors largely to turn to the Tokyo Stock Exchange or to take some other drastic action that would undermine the entire national economy. That would be an issue deserving of the attention of the Congress. The collapse of the Chrysler Corp. in 1979 was a national issue.

Actually, the Hayden initiative, if adopted, goes beyond that analogy. The loss of the Nation's ability to feed itself may well be a more significant setback than anything that can occur on Wall Street. The proposed law would seriously curtail California's $19 billion farm industry. The proposed measure, if passed, would affect all of us, so all of us should know what may be coming.

The people of California will decide in November. But the Congress should know about potential changes in farming procedures in California, the Nation's most agricultural productive State, because what occurs there is going to affect everybody. Everybody's food is going to cost more and there are going to be lower yields. Working families and those who are at or near the poverty line would suffer the most.

INITIATIVE FAILS TO DISTINGUISH BETWEEN CHEMICAL AND DOSE

On agricultural pesticides, we should remember that it is the dose that makes the poison. Several of the pesticides currently in use in California do cause harmful effects on people if they are administered in huge doses. But this is also true of some other nonfarm chemicals that we have come to rely on in our daily lives.

Chlorine is an example. In concentrated form, it is one of nature's most deadly poisons. One swallow of pure chlorine could be fatal. Yet its addition in relatively small amounts to our water will prevent disease and bacteria growth, which is clearly a benefit. That is what I mean when I say the dose makes the poison.

That is a point which Assemblyman Hayden and his colleagues neglect to consider in their antichemical campaign. The Hayden initiative says merely that if a chemical proven to cause harm to people can be detected on a piece of fruit or a vegetable then its use shall be canceled.

That is incorrect logic. If the pool service man who adds chlorine to the local high school's swimming pool applies a bit too much, the results can be burning eyes, irritated skin, and bleached trunks. If he applies tremendous amounts too much, the result can be a serious threat to the health of swimmers. But if he applies the right amount and follows established procedures in his application, the result is a clean swimming pool and recreational and health benefits to those who play and exercise in the water.

One day science will come up with a substitute for chlorine. But that day has not come yet. Until it does, chlorine will continue to be a valuable and reasonably inexpensive chemical that provides many benefits to society.

Chlorine should not be banned because it has potential harmful effects. Chemists could detect the presence of chlorine in virtually every swimming pool in America. They could detect it in drinking water. But merely detecting its presence is not the measure of anything. It is the amount of chlorine that matters. It is the dose that makes the poison.

The same principle applies to chemicals used in farming. Instead of recognizing that important principle of balanced application, the Hayden initiative falsely assumes that any chemical that could be harmful in large doses must also be harmful in small doses. The Hayden initiative is wrong on that score. Small doses can be harmless. It is irresponsible for Mr. Hayden to give the public the fear that small doses of farm chemicals are always dangerous to their health.

There is no question but that people are worried about the chemicals that are used on their fruits and vegetables. The Hayden initiative panders to that concern. It is an unsatisfactory promotional tactic for political leaders to pander to the public's fear by neglecting to draw the distinction between chemicals and dosages.

INITIATIVE WILL DISRUPT NATION'S FOOD SUPPLY

Similarly, Mr. Hayden has not informed the public of what impact his initiative would have on the State and Nation's food supply. There is a strong likelihood that, if the Hayden initiative shall pass, the effectiveness of the Nation's food production, supply, and distribution would be seriously diminished.

We live in a bountiful Nation where there are ample supplies of fresh fruits, vegetables, and other food products available at affordable prices all year around. For the most part, we have access to virtually any food we desire at any time and without having to wait in long lines.

Too many of us take for granted the American food supply. We should recognize, by comparison with other countries, just how effective our farmers are at producing food at affordable prices.

For example, according to the Agriculture Council of America, American families pay 14 percent of their income for purchasing food. In Japan families spend 21 percent; in Greece, 42 percent; and in less developed countries such as Sierra Leone, 65 percent.

One American farmer provides food for 114 persons: 92 Americans and 22 persons living overseas.

Food and fiber production accounts for 17 percent of the U.S. gross national product.

Agriculture provides one out of every six jobs.

Agriculture generates an estimated 20.1 million jobs, about 17 percent of the workforce, with almost 90 percent of the jobs being off the farm.

The U.S. agricultural labor force, which also includes forestry, hunting, and fishing, in its large sense represents 0.3 percent of the world's agricultural labor force, yet it produces 8 percent of the world's food grains, 27 percent of the world's feed grains, and 25 percent of the world's beef.

The United States is the world's largest exporter of agricultural products, with $35.5 billion in 1988 compared to $21 billion in agricultural imports. This gives us a $14.5 billion favorable balance of trade for agricultural products and helps reduce the trade deficit from industrial trade.

Less than 1 percent of American farm land is foreign-owned and most of that is timber land.

Like other independent businesses, many American farms are incorporated but most, almost 82 percent, are family held.

The average farm is 463 acres, with assets of $373,700 and debt of about $70,500.

After all is said and done, however, the most important question of any nation's food supply system is, Does it provide safe, healthy, nutritious, attractive, affordable food for the people it serves? Yes, in America, it does.

The ready access to affordable and nutritious food would dwindle and could even end with the passage of the Hayden initiative. I suggest the very real possibility that the Hayden initiative could dwindle the highly efficient American system of supplying food, and perhaps even end it. Backers of the Hayden initiative deny that a disruption would occur. But critics of the initiative say such a disruption would occur.

STATE FARM CHIEF WARNS OF WORMS IN FRESH PRODUCE

Henry Voss, the director of the California Department of Food and Agriculture, said on July 5 that if California voters approve the Hayden initiative in November, the esthetically appealing and sanitary features of California's fresh fruits and vegetables might no longer exist. "I think we may get to eat fruits with worms in them," said Mr. Voss.

Mr. Voss, himself a tree-fruit farmer in the San Joaquin Valley town of Ceres, said that approval of the Hayden initiative would phase out 60 to 70 percent of the chemicals farmers use today, and chemical companies would lack the time and financial incentives to develop alternatives.

By 1996, Mr. Voss said, the Hayden initiative's chemical prohibitions would extend to chemically inert materials because background studies have only been done on toxic materials. "With no toxicological studies on—the inerts—they would be banned." Mr. Voss said, adding that although companies would try to develop products to replace some banned chemicals, the process could take years.

GRC STUDY PREDICTS 40-PERCENT CUT IN YIELDS

There are studies that determine what the Hayden initiative's impact would be. Californians for Responsible Food Laws [Careful], an organization composed of the California Farm Bureau, the Western Growers Association, and others, retained GRC Economics of Washington, DC, a unit of Hill & Knowlton, to study how the Hayden initiative would affect the agricultural industry and California's economy in general.

Careful, I should note at this point, is sponsoring a California initiative that would be an alternative to the pesticide provisions of the Hayden initiative. The Careful initiative is a balanced proposal and not extreme in any sense and I am supporting it.

GRC Economics came up with several disturbing findings of what would happen if the Hayden initiative passes.

GRC said it approached this effort determined to arrive at estimates which were conservative in nature; that is to say, GRC analysts said that if they erred they wanted to err on the side of more likely understating the dimensions of problems caused by the Hayden initiative than overstating them.

GRC said the Hayden initiative would lead to a 40-percent reduction in output of fruits, vegetables, and field crops.

The impact of pesticide restrictions would be felt by livestock, poultry, and dairy producers, GRC said, adding that the State is not self-sufficient in feed grains and oilseeds used in the production of animal feed.

Most of these feed ingredients are imported from other States. The Hayden initiative would prohibit the use of such feedstock that contain the banned pesticide. GRC said this could effectively cut off the major supply of animal feeds to California producers.

GRC Economics said the inability to sell food products containing pesticides banned in California would further restrict the availability of many foods that could be imported from other States.

This, combined with reduced yields and consequent increases in production costs, would push up prices of fruits and vegetables, poultry, and eggs by as much as 50 percent or more in California; beef, pork, and dairy prices would also increase, GRC said.

The GRC study said California would end up exporting a large segment of its agricultural sector to other States and countries. Production of commodities whose yields and quality cannot be maintained without the use of banned or restricted pesticides would shift outside of California.

The United States would be forced to import more fresh fruits and vegetables to meet the shortfall from California, GRC said, adding, "* * * U.S. agricultural exports will decline as exportable supplies of rice and cotton fall reflecting smaller production in California. The result of these movements will be a worsening of the U.S. trade deficit."

HAYDEN LAW WILL DISRUPT INTERSTATE COMMERCE IN FARM GOODS

Of all the likely disruptions in the food supply that the Hayden initiative would create, none is more troublesome than its impact on interstate trade and foreign commerce.

Because of the major role California plays in domestic and global commerce in food, the rest of the Nation and our trading partners would have to react once the Hayden initiative is in place. The other 49 States and other nations would try to maintain commerce with California or, failing that, they would abandon California as a market and try to develop substitute markets elsewhere.

Foreign governments and indeed the 49 States would have to set up two trade policies: one for commerce with the 49 States and the rest of the world, and the second for commerce with California.

In the United States, California would be a separate entity unlike all the other States, a State whose producers and consumers have standards distinct from everyone else. The Hayden initiative, then, would have the result of encircling California producers and consumers with a protectionist wall.

I know not whether Mr. Hayden and his associates intended to erect a protectionist wall around California, but that is what they will have achieved.

The commerce clause of the U.S. Constitution is specific on the issue of commerce between the States. There is to be no barrier to interstate commerce. The Hayden initiative would create barriers to interstate trade, and lead to long and disruptive litigation.

So significant are the dire implications to foreign commerce of the Hayden initiative that the issue already has arisen in the U.S. International Trade Commission.

Among several briefs filed before the ITC on the impact of the Hayden initiative was one submitted by the California-Arizona Citrus League, a voluntary nonprofit trade association composed of marketers of California and Arizona oranges, grapefruit, and lemons. Members of the Citrus League include farmer cooperatives and independent shippers that represent more than 90 percent of the 10,000 citrus-fruit farmers in Arizona and California.

Fred P. LaBue, chairman of the Citrus League, told the ITC that the Hayden initiative, if passed, would separate California from the rest of the United States.

"This ballot initiative must be recognized for what it really is intended to be," said Mr. LaBue. "It is a highly protectionist measure intended to protect California from the benefits of the Uruguay round, the free trade agreements with Israel, Canada, and Mexico and from competition in the United States.

"From the standpoint of commerce, the United States would consist of 49 States and California.

"It is doubtful this would remain that way very long. Undoubtly, other States would be forced to follow California's behavior and soon the United States would break up into different—would totally disrupt commerce in the United States."

"World trade would be adversely affected in the same way," Mr. LaBue said, explaining, "It will not take countries around the world long to see the ultimate protectionist measure adopted by California and to model their programs after it."

"One can only imagine how the United States would export food to Japan when each Japanese prefecture adopts a different residue standard."

At my direction, my staff has been working with the staffs of the House Committee on Agriculture and the House Committee on Energy and Commerce. The committees, both of which oversee food safety and pesticides, helped us in assembling data showing how the Hayden initiative, if passed, would affect the interstate commerce in farm goods. We found many examples, none of them encouraging. Here are five examples, but there are several more:

First, farmers in the States of Florida, Michigan, New York, and Ohio market celery in California. Like their California counterparts, the farmers in these States use acephate (orthene) in the production of the crop. But celery containing acephate would be prohibited by the Hayden initiative. Therefore, the Hayden initiative would no longer allow Florida, Michigan, New York, and Ohio to sell celery in California. They would have the choice of giving up use of the widely used pesticide, or of abandoning the California market.

Second, California produces most of its own onions in the spring. But many of its summer onions come from farms in New Mexico, Texas, and Washington. Onion farmers, no matter where they grow their crop, rely on parathion, another pesticide on the preliminary list of pesticides that the Hayden measures would ban.

Third, similarly, California, which is the second largest producer of grapefruit in the United States, does not grow sufficient numbers to meet its own demand. Florida, which is the largest in grapefruit production, markets their product in California. Growers in both States utilize dimethoate (cygon) and methidathion (supracide) in the cultivation of grapefruit. The Hayden initiative would ban both pesticides. Grapefruit may become an endangered product in California, losing its own productive capability and preventing Florida products from being sold there.

Fourth, California produces 30 percent of the national crop of fresh tomatoes, basic to most salads. Its major competitor is Florida. The pesticide common in growing tomatoes is methomyl (lannate, nudrin). Florida would either find new markets for its tomatoes or it would be forced to reduce output.

Fifth, California does not produce enough animal feed grains and meals. For its $4 billion livestock, dairy, and poultry industries it must import animal food products. Such products come from several States including Iowa, Illinois, Nebraska, Missouri, Kansas, Texas, Idaho, Washington, and Montana. We estimate that the total loss to these States in sales to California would be in excess of $150 million each year just in barley and corn. California is totally dependent on other States for all of its soybeans and most of its sorghum feed grains.

CALIFORNIA ACCOUNTS FOR LARGE AMOUNTS OF U.S. PRODUCE

I want to go into detail on the amount of food and fiber that California produces each year. I know my friends who serve on the Agriculture Committee are aware of the large farm yields that come from California's farmers. But other Members may find these statistics informative as they look down the road and try to assess the impact on our Nation's food supply if the Hayden initiative should pass.

California's agricultural production is the envy of the world. The value of last year's crops was $19 billion. There has never been anything to compare to these yields.

For example, in my own 17th Congressional District, which includes the counties of Fresno, Kings, Tulare, and Kern, farm production in 1989 was $6.8 billion, more than one-third.

Fresno Country's farm production was $2.6 billion, with principal crops being grapes ($464 million), cotton ($398 million), tomatoes ($194 million), milk ($142 million), cattle ($122 million), turkeys ($106 million), cantaloupes ($91 million), nectarines ($80 million), plums ($71 million), citrus ($69 million).

Tulare County's farm production was $1.853 billion, with principal crops being milk ($363 million), citrus ($311 million), grapes ($258 million), cattle ($177 million), cotton ($130 million), plums ($90 million), alfalfa ($81 million), nectarines ($47 million), olives ($37 million), wheat ($33 million).

Kern County's farm production was $1.6 billion, with principal crops being grapes ($278 million), cotton ($263 million), almonds ($149 million), citrus ($135 million), carrots ($134 million), potatoes ($80 million), alfalfa ($77 million), nursery ($71 million), milk ($46 million), onions ($28 million).

King's County farm production was $741 million, with the principal crops being cotton ($215 million), milk ($159 million), cattle ($60 million), cottonseed ($40 million), turkeys ($31 million), alfalfa ($28 million), safflower ($26 million), peaches ($19 million), wheat ($18 million), alfalfa seed ($17 million).

In 1989, California was the leading producer nationwide of 58 commercial crop and livestock commodities. I shall list them and, when available, place beside each product its value for 1989 and, when available, its share of the entire production in the United States.

Alfalfa seed ($41,7 million; percent NA).
Almonds ($600 million; 99.9 percent).
Apricots ($29.6 million; 92.9 perecent).
Artichokes ($38.2 million; percent NA).
Asparagus ($83.4 million; 48 percent).
Avocados ($205.2 million; 86.1 percent).
Broccoli ($266 million; 90.9 percent).
Brussel sprouts.
Cantaloupes ($114 million; percent NA).
Carrots ($247.3 million; 65.1 percent).
Casaba melons ($6 million; percent NA).
Cauliflower ($161.5 million; 79.2 percent).
Celery ($147.7 million; 68.4 percent).
Chinchillas.
Crenshaw melons ($3.1 million; percent NA).
Cut flowers ($654.9 million; 28.6 percent).
Dates ($19.7 million; 99.9 percent).
Eggs ($297.7 million; 11.1 percent).
Figs ($16.6 million; 99.9 percent).
Flower seeds.
Garlic ($40.5 million percent NA).
Grapes, table, wine, raisin ($1.35 billion; 91.6 percent).
Green lima beans.
Hay.
Herbs.
Honeydew melons ($47.4 million; 69.1 percent).
Indoor plants.
Kiwifruit ($22.4 million; 100 percent).
Ladino clover seed.
Lemons ($171.4 million; 82.3 percent).
Lettuce ($632.4 million; 73 percent).
Nectarines ($78.8 million; 97 percent).
Nursery plants ($919 million; 27.6 percent).
Olives ($50.4 million; 99.9 percent).
Onions ($104 million; 32.1 percent).
Oriental vegetables.
Parsley.
Peaches ($177.8 million; 58.7 percent).
Pears ($74.5 million; 35.1 percent).
Persian melons ($1.3 million; percent NA).
Persimmons.
Pigeons and Squabs.
Pistachios ($104.3 million; 100 percent).
Plums ($102 million; 80.6 percent).
Pomegranites ($6.3 million; 100 percent).
Prunes ($114 million; 100 percent).
Rabbits.
Safflower ($32 million; percent NA).
Spinach.
Strawberries ($388.9 million; 73.9 percent).
Sudan Grass.
Tomatoes, processed ($385.6 million; 88.4 percent).
Turnips.
Vegetables seeds.
Walnuts ($190 million; 100 percent).
Wild rice.

In addition to these commodities, California is in the top 10 in 23 other products. These include the following, with, when available, 1989 value and share of United States production:

Corn, sweet, No. 2 producer nationwide ($29.4; 13.4 percent).
Cucumbers, for processing, No. 3 ($14.7 million; 10 percent).
Mushrooms, No. 2 ($110.1 million; 17.8 percent).
Tomatoes, fresh market, No. 2 ($264 million; 17.8 percent).
Apples, No. 4 ($117.7 million; 6.9 percent).
Cherries, sweet, No. 4 ($20 million; 14 percent).
Grapefruit, No. 2 ($55.4 million; 13 percent).
Oranges, No. 2 ($458.4 million; 26 percent).
Cotton, No. 2 ($1.02 billion; percent NA).
Barley, No. 7 ($46.1 million; 3.7 percent).
Beans, dry, No. 2 ($104.7 million; 15 percent).
Potatoes, No. 7 ($143.6 million; 4.8 percent).
Rice, No. 2 ($197.5 million; 18.5 percent).
Sugar beets, No. 2 ($178 million; 21.4 percent).
Sweet potatoes, No. 3 ($15.3 million; 10.5 percent).
Cattle and calves, No. 7 ($1.6 million; 4.8 percent).
Chickens, No. 9 ($343 million; 5.1 percent).
Honey, No. 2 ($10 million; 9.9 percent).
Milk and cream, No. 2 ($2.08 million; 13 percent).
Sheep and lambs, No. 2 ($66.5 million; 10.5 percent).
Turkeys, No. 3 ($200.3 million; 11.3 percent).
Wool, No. 3 ($10.1 million; 8 percent).

39-059 O-91-25 (Pt. 13)

CALIFORNIA WILL HAVE TO SET UP A FORTRESS

An unanticipated result of the Hayden initiative would be that American consumers might have more pesticides on their foods, not less. That is because the State of California, while it may enlarge its produce inspection capability, cannot guarantee compliance in foreign nations or in other States.

Foreign and out-of-State growers may be able to violate the pesticide proscriptions, without the State of California ever finding out about it. Even it if does develop preliminary information indicating violation of California's pesticide laws, how is California going to enforce compliance? Will the Department of Food and Agriculture retain Interpol, the internaitonal police agency, to patrol the vineyards of Chile or the feed lots of the Argentinian Pampas in search of violations of California's law?

Already, we have seen instances wherein foreign produce and wines shipped into California were grown or produced with prohibited chemicals. Federal authorities have admitted that they are committing inadequate resources to inspecting imported food products. That is a tacit admission that food products with banned pesticides are being imported into the United States.

Thus, the Hayden initiative would force California to impose a large and costly administration of compliance within the State.

One of the most serious failings of the United States is its inability to control its own borders against unlawful immigration, drug smuggling, and the importation of other contraband. The State of California, with neither the resources nor the mandate of Federal authorities, will do no better, and probably much worse, in managing an effective border patrol.

That is but one more reason why it would be a mistake for us to increase reliance on food supplies from foreign nations, where chemical regulations will be more difficult to enforce, while, in effect, encouraging our own domestic food producers to decrease their own productive capacity.

I mean not to offend any foreign farmer anywhere in the world. Representing the most productive agricultural district in the Congress, I feel a certain kinship with growers everywhere, in my own district, in the United States, and around the globe. There would be no civilization on this planet without farmers. It is only with a reliable food supply that men and women can then go out and accomplish the things that make civilizations prosper.

However, all that being said, I have more confidence in American farmers meeting chemical requirements than I have with those overseas. This is simply because American farmers live here and expect to remain here and to continue as food producers.

The Department of Agriculture and the President's Council of Economic Advisers report imported foods are also increasing at high rates. In the past 5 years, there has been a 30-percent increase in imported fruits, and a 10-percent increase in imported vegetables from foreign producers. No one argues that imports would decrease; they would increase because the consumer is going to want and would pay for fresh fruits and vegetables regardless of the season.

HAYDEN LAW WOULD BRING CONFUSION TO U.S. CITRUS INDUSTRY

I want to quote again from Mr. LaBue, chairman of the California-Arizona Citrus League, because his comments on oranges, grapefruit, and lemons demonstrate how finely tuned the citrus industry is in this country. Other specific crop industries are also finely tuned, some more than others. The delicate nature of these industries makes them especially vulnerable to abrupt alteration imposed by governments. That is the sort of change the Hayden initiative mandates.

Mr. LaBue said:

The current production patterns in the United States reflect the economic comparative advantage that exists in each of the production regions. While these patterns are constantly changing as new production technology comes on stream, it is generally true that California predominates in the fresh citrus market and Florida produces mainly for the processed citrus market. In the 1987-88 crop year, about 200 million boxes of oranges were produced in the United States. Of this total, Florida produced approximately 138 million boxes and California produced nearly 59 million boxes.

These regional production patterns have emerged because growers and marketers have learned that when the lowest production and marketing costs for each individual use of the product. That is, under present conditions, Florida generally has a cost advantage in the production of oranges for processing and California has a like advantage in the production of fruit for the fresh market. These cost and production relationships among citrus producing regions have emerged largely from the application of cultural and economic research that has been conducted over the years by both public and private institutions.

A primary objective of the research has been to discover and develop new and improved cultural practices that increase productivity and lower costs. The per acre yield of marketable oranges has increased dramatically over the years as these improved cultural practices have been adopted by citrus growers.

One of the most important cultural practices that has accounted for increased productivity and lower costs is an effective control of insects. Insects, left uncontrolled, have a devastating effect on citrus production. They attack and destroy both the citrus tree and the fruit. This is not a theory or possibility in this instance. It is a certainty that if the California citrus industry is denied by State statute the use of pesticide to control insects, production levels will decline and production costs will significantly increase.

Under these circumstances, it does not take extensive elaboration to make conclusions about the probable economic impacts of restricting the use of pesticides in California citrus production. The trends are clear. Decreases in productivity and increases in costs in California production will force production shifts in other areas of the United States and the world. If one agrees with the proposition that current production patterns conform with regional comparative advantages, then there are no winners in this scenario. In economic terms, California producers will be denied production opportunities, and consumers will wind up paying higher prices for their citrus products.

INCREASE IN FOOD PRICES HURTS AMERICA'S WORKING POOR

The working poor and those dependent on fixed incomes are injured by the slightest rise in the cost of food.

Less food in the marketplace means higher prices.

For example, recently, Representative BOXER of California chaired hearings of the Budget Committee Task Force on the impact of milk and orange shortages on the Department of Agriculture's food assistance program for women, infants and children, known as the WIC Program.

State directors of the WIC Program from New York, Texas, and West Virginia, and a legal authority from the WIC Program in California, testified before the task force. They were of one voice in saying that the increase in the cost of milk and orange juice had exhausted the program's ability to continue to provide balanced diets to recipients.

The increased cost of milk was caused by a decline in surplus and an increase in demand; the increased cost of oranges was prompted by the winter freeze in Florida. To a large extent, there was little that government or the farm industry could do to circumvent these developments. Certainly, there is not much that we can do to avoid a sharp dip in temperatures in Florida.

But consider what happened because of these developments. The cost of food increased and a program like WIC desperately needed an 11th-hour supplemental appropriation. Multiply that occurrence many more times, and it becomes apparent what risk we create for the Nation, particularly the working poor and those at or near the poverty line, by tampering with the food supply in the unpredictable manner of the Hayden initiative.

HAYDEN INITIATIVE COMES AT A TIME OF STRONG CONTROLS

The Hayden initiative comes along at a time in the evolution of California agriculture when the State already has the most advanced and effective pesticide laws and regulations in this country and the world.

This was the point in an analysis of the Hayden initiative made by a group of 40 California State legislators, whose statement of March 15, 1990, opposing the measure said the initiative has the "potential to wreak havoc on California's economy and county government finances."

"If passed," the legislators said, "the initiative would impose large new energy, water and numerous other costs on California businesses, the farm community and consumers, placing our State at a competitive disadvantage to the rest of the Nation and the world."

The legislators said the Hayden measure:

Will undo much of the balanced public policy the legislature has put in place. For example, just last year the legislature took important steps to better ensure the safety of our food supply when we enacted the Food Safety Act of 1989. This legislation received overwhelming bipartisan support from the entire legislature and the full endorsement of California's leading health groups including the California Medical Association and the California Children's Lobby. The [Hayden initiative] ignores the medically balanced steps taken in the Food Safety Act in favor of an unscientific approach that may do more harm than good to the public health.

The legislators expressed opposition to the creation of "environmental advocate who could possess dictatorial powers" that would likely conflict with the work of other State agencies.

The legislators speaking against the Hayden initiative were Democratic State Senators Rose Ann Vuich, Ruben S. Ayala, Robert Presley, Alfred E. Alquist, and Dan McCorquodale; Republican Senators Marian Bergeson, John T. Doolittle, Don Rogers, Ken Maddy, Henry J. Mello, Newton Russell, and Jim Nielsen; Democratic Assemblymen Jim Costa, Bruce Bronzan, Sal Cannella, Rusty Areias, Norm Waters, and Steve Clute; and Republican Assemblymembers Bev Hansen, Trice Harvey, Carol Bentley, Curt Pringle, Dave Kelly, Tom McClintock, Tim Leslie, Bill Jones, Marian W. Ma Follette, Robert C. Grazee, Pat Nolan, Nolan Frizzelle, John Lewis, Steven Statham, Charles W. Bader, Sunny Mojonnier, Paul Woodruff, Chris Chandler, Cathie Wright, Bill Lancaster, Phil Wyman, and Tricia Rae Hunter.

REDUCED CHEMICAL USE IS A GROWING TREND IN CALIFORNIA

Large numbers of farmers in California are cutting back on using pesticides whenever they can. Organic farm products constitute a growing percentage of my State's agricultural output.

Many more farmers are enlisting the aid of "good bugs" to kill "bad bugs." Integrated pest management is a growth industry in California.

HAYDEN INITIATIVE SEEMS OUT OF CHARACTER FOR AUTHOR

There is a dimension to the Hayden initiative that does not square with what we know about the author of the measure. Assemblyman Tom Hayden engaged in radical politics in his youth. As a founder of the radical movement, students for a Democratic Society [SDS], Hayden wrote:

The Port Huron Statement, which Longtime Washington, DC, reporter Eugene H. Methvin described in his book The Riot Makers was "a warmed-over Marxist analysis of American society, with a pinch of Lennin's Imperialism, the Last Stage of Capitalism and a heavy flavoring of anarchistic utopian idealism.

Whether he was predicting the demise of the United States or was leading an assault on an administration building at Columbia University, Mr. Hayden justified his conduct on the grounds that he was doing it on behalf of the powerless, those people who were being victimized by impersonal and oppressive forces that, he said, controlled America.

Assemblyman Hayden would object to being characterized as a radical today. In many areas of his political pursuits, he has joined the mainstream of political activity and thought. But I do not think he would deny that he is still motivated by a desire to help people not able to help themselves—the poor, the indigent, the disenfranchised, those for whom the American dream is often not a viable goal.

I certainly do not agree with Mr. Hayden's politics. but I do not doubt his determination to improve the lives of the disadvantaged. That is why I am puzzled as to what Mr. Hayden's intentions were when he wrote the so-called Big Green. The very people he has spent his life trying to help will be the very people most damaged by his initiative. Does he not agree that the cost of food is a significant item in the budgets of millions of working Americans? Why would anyone want to increase that already heavy burden the working families of America must carry?

There are many provisions in the initiative which will have uncertain consequences. We shall not know the impact of them until they are actually in place. But one thing we know: that the Hayden initiative will cause, first, the amount of food grown in California to decline; and, second, the price of food to go up.

Let me repeat that point. The supply of food will decrease; the cost of food will increase.

Who will suffer the most from that? It will be the poor, the working poor, the disenfranchised, the low-income elderly on fixed incomes, those families for whom food is a major part of their budget.

For the overwhelming majority of Americans, food is plentiful and affordable. But those who live on the economic fringes, acquire food with careful budgeting. Many fruits and vegetables grown without chemicals will sell for from 20 to 50 percent more. This will be a hardship on many families.

Retired couples living on a fixed income, for example, are very sensitive to sudden fluctuations in the price of vegetables and fruits caused by unseasonal weather, labor-management strife, and other developments over which tney, as consumers, have no control.

Moreover, California, which exports about $7 billion in farm products, plays a major role in providing groceries to millions of families in foreign countries. Foreigners, too, will be affected should the Hayden initiative pass.

FAMINE THREATENS MANY NATIONS OF THE WORLD

I need not have to remind Mr. Hayden and other supporters of the Big Green that food is in short supply in large areas of the world.

Food shortages are going to worsen in this decade because, in the Third World, agricultural production is not keeping pace with population growth. The United States, which is blessed with more food than it needs, will continue to play an important role in abating world hunger. That is so apparent to me that I am at a loss to understand why Mr. Hayden did not take it into account when he wrote his initiative.

The Agriculture Council of America noted that the estimated population growth for the next quarter of a century is so enormous that all world leaders should place the production of food at the top of their nations' agendas.

It will require total mobilization of all global productive resources—land, infrastructure, people skills, technology—to prevent massive famine in the 1990s. Projections call for a world population of nearly 11 billion by the year 2050.

This increase will take place in a world where already more than 75 percent of the population can barely feed themselves.

Almost 500 million people are malnourished.

Millions of children worldwide die each year from starvation.

This is not the time to set out to undermine farm production. But that is the road down which the Hayden initiative would take us.

ORGANIC FOOD LOSSES POPULARITY AT CASH REGISTER

Early public opinion surveys show that there is, at first blush, sizable support in California for the Hayden measure. About 75 percent of registered voters say they are for the initiative. However, that figure drops just

below the 50 percent level when respondents are told in detail what the initiative would do.

The polling data on this issue is reminiscent of a recent experience of Raley's, a supermarket chain based in Sacramento. Raley's is an organization that takes pride in being sensitive to consumer concerns. The firm's executives noted polls which were showing that more and more Americans preferred organic food.

The growth of organic foods' popularity was in part the result of genuine concern about farm chemicals. But it was also prompted by an orchestrated promotional assault on pesticides, carried out with religious fervor. The campaign seemed designed to convince consumers that all foods grown with any chemicals were dangerous to their health.

In some portrayals, the spraying of pesticides on agricultural crops was characterized as the moral equivalent of dropping napalm on unsuspecting peasants in the Mekong Delta.

Many people began to fear their own Nation's food supply. That is regrettable because it is fear largely unreleated to reality. As we will see, however, in the Raley's experience, reality has a way of making itself felt.

Trying to be responsive to consumer concerns, Raley's began offering a wide variety of organic foods. But the firm had to charge 20 to 50 percent more for the produce than it charged for old-fashioned "tainted" fresh fruits and vegetables. Shoppers may have preferred organic food, but they balked at steep prices.

Raley's realized that, while its organic venture had received praise from the media and environmentalists, the public was not ready for the higher prices and pulled back from the organic commitment.

The Raley's experience indicates that large-scale marketing of organic fruits and vegetables is not practical at this time. It also shows that we should be cautious about politically mandated and abrupt changes in the farm industry.

SOME ORGANIC FOODS GROWN ON LARGE FARMS ARE NOT ATTRACTIVE

There is another aspect to produce grown without chemicals that I want to mention briefly. It is that organic food grown in small parcels is often as attractive to look at as produce grown with the help of chemicals.

But this is not always the case with large-scale farming without chemicals. When we harvest crops grown without chemicals on larger farms the result is frequently an unattractive product. Studies have shown that consumers want safe, nutritious, and attractive fruits and vegetables.

BUGS CANNOT BE LEGISLATED OUT OF EXISTENCE

By populist fiat, the Hayden initiative seeks to avoid the inevitable. The truth is that no matter how much we wish for something more pristine in the way farmers produce the Nation's most important product, our food, growers are still going to have to protect crops from certain bugs.

Whether we do it with increased "good bug vs. bad bug" technology, whether we do it with state-of-the-art integrated pest management, whether we do it with new chemicals or whether we do it with a combination of all these, the truth is we are still going to have keep pests away from fruits, vegetables, and grains.

At this time in technological development, government-mandated, large-scale, chemical-free farming will result in lower production and higher prices. That is why it would be unwise suddenly to abandon pesticides as a tool in farming or impose impractical government restrictions on their use.

In the failed experiment of Raley's with chemical-free produce, the push for widespread marketing of organic foods was revealed to be a mixture of media hype and good intentions often oblivious to economic realities. The same mixture can be found in the Hayden initiative.

One day soon there will be a breakthrough enabling farmers to market large amounts of organic produce at low prices. Until then, consumers should insist on more R & D in the chemical industry to develop safer pesticides. Growers should be encouraged to use newer techniques such as integrated pest management. Voters can demand more effective regulation and inspection. Federal programs at our borders for detecting foreign produce with banned chemicals are inadequate and can be improved.

These constructive steps make more sense than does the Hayden initiative. It is an idea that may sound good in the abstract but which would disrupt the way this Nation produces its food.

AMERICAN FOOD SUPPLY SYSTEM WORKS REASONABLY WELL

In conclusion, I want to point out that the Hayden initiative neglects to take into account that the United States has a reasonably smooth functioning system of food supply and that the system has evolved over the years into a sophisticated production, distribution, and marketing capability. From farm fields to grocery stores, the system works reasonably well.

We did not arrive at this point overnight. Domestic market forces had to be balanced with uncontrollable considerations such as weather conditions and foreign supply and demand. Government regulations must also be addressed. New technologies were developed and then had to make a nondisruptive transition into the supply system. Other unforeseen events such as labor-management conflicts temporarily can throw the system out of whack. It never functions perfectly. But it continues to function reasonably well—certainly at least as well as any other nation's, and better than most.

Moreover, on the pesticide front it is not as if American growers have stood idly by as spectators while the rest of the Nation became increasingly concerned about chemical use in agriculture. As previously noted, California has a new pesticide control statute. There are new Federal pesticide regulations.

In addition, California growers are moving away from pesticide use whenever possible. Integrated pest management—the technique of relying less on chemicals and more on good bugs that kill bad ones—has become increasingly popular among California growers.

The lesson in all this is that growers in California and elsewhere, along with processors, packers, distributors, brokers, growers, virtually everybody involved in the food supply industry, are well aware of the public concerns about pesticides. And much progress has been achieved reducing chemical use.

But these many people involved in growing and delivering food to market are also well aware of their responsibility as participants in a supply system that must provide sufficient amounts of fruits, vegetables, meats, dairy products, and poultry to comprise three meals a day for more than 250 million Americans and millions more around the world.

This is no easy task. To achieve it, a lot of thought and planning went into it. There was, and is, a certain amount of trial and error, mistakes are made, unexpected victories are scored. The point is, this is a dynamic system sensitive to its primary mission: Keeping affordable food on the table for the American people.

The Hayden initiative does not consider the American food supply as a whole, as a piece, as a coordinated mechanism that works, and works well, in cooperation with all its component parts—and in response to its primary objective: feeding a Nation. The Hayden initiative presumes to introduce pesticide reform into the system but neglects to provide assurances that the system will continue to function well or that it will even continue to function at all afterward.

The major flaw in the Hayden initiative is that it is prepared to sacrifice a reliable system of food supply at the altar of reduced chemical use. There is no middle ground in the Hayden initiative. There is no room for compromise or moderation. It is radical, extremist solution to a complicated challenge.

The Hayden initiative would have the unanticipated result of throwing the food supply system into disarray, of extracting from it its rationality and balance. A government mandate

of this magnitude would surely be followed by even more government mandates until, ultimately, the State, faced with the need to restore order and equity, would take more and more control of the food system.

□ 1950

THE CULTURAL WAR IN OUR SOCIETY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. DANNEMEYER] is recognized for 60 minutes.

Mr. DANNEMEYER. Mr. Speaker and Members, I have taken this special order this evening for the purpose of talking to my colleagues about the matter that will be coming up on the floor of the House for consideration, probably sometime this week, dealing with our colleague, the gentleman from Massachusetts [Mr. FRANK]. The House Ethics Committee submitted a report on July 20, which was just last Friday and that report has now been printed in the RECORD, and I will make reference to it as I discuss this issue.

I think it is appropriate for we Americans to recognize that a cultural war is going on in our society. Actually, there is nothing new about this cultural war. It has been going on from the beginning of the history of man in that man has constantly struggled to resist the idea that each of us owes allegiance to our Creator, God in Heaven, who created this world and everybody in it.

This cultural war has intensified in America in the last 25 years, and it has been overshadowed by the cold war that is more familiar to most Americans. Some of us believe that perhaps the intensity of that cold war, which is economic, political, psychological has decreased, at least in Eastern Europe and the Soviet Union. This Member of Congress believes that the cold war is still continuing in Third World nations, but because of the attention that has been focused on the cold war and the extent of the resources that have been invested by the U.S. Government in struggling with that cold war, this cultural war that has also been going on has been largely overshadowed. This cultural war represents two conflicting philosophies, the one, the philosophy that I believe is the foundation of Western civilization; namely, the Judeo-Christian ethic, that philosophy establishes that, or is a reflection of, what is stated in the Declaration of Independence that all men are endowed by their Creator with certain inalienable rights, among which are life, liberty, and the pursuit of happiness.

The main theory or basis for the American experiment, self-government, is that God created man, and God's message to man is a system of laws or rules that govern society. As Ted Koppel said in speaking to the graduating class of Duke University some time back, when Moses came down from Mount Sinai, he did not bring the Ten Suggestions. Those Ten Commandments established the foundation of the laws in this country. They give us standards by which to judge our conduct and the conduct of our peers, and this philosophy of the Judeo-Christian ethic is in conflict in this cultural war with the philosophy of moral relativism.

The philosophy of moral relativisim can also be described as secular humanism, and the cornerstone of this belief is that there is no God, that man is able to resolve all conflicts that he encounters independent of the existence of a higher being.

□ 2000

Moral relativism says that situation ethics is what governs the nature of the relationship of one human to another, and each of us is at liberty to decide for ourselves what we want to do, so long as we do not infringe on the rights of other people.

This cultural war evidences itself in issues that we confront as Members of Congress, such as pro-life and pro-abortion. This conflict is at the cornerstone of that struggle in American society. It is at the bottom of the issue of whether or not we in America will reinstate voluntary prayer in public schools. That right was taken away from us in 1962, by a divided U.S. Supreme Court, and in my view has been largely responsible for the intensity of this cultural war that I am talking about this evening.

As to the drug epidemic in America, we Americans should not be surprised that a generation of kids growing up is having difficulty in just saying no to drugs, which is the observance of a standard in how we treat our own bodies, when in fact we as a society have kicked the Creator of those standards out of the public school system of America by the decision of the U.S. Supreme Court in 1962.

This cultural war evidences itself also with respect to the issue of family units and the survival of marriage in American culture. We all know the tragedy that has unfolded before our eyes, and particularly the decline in the stability of marriage units, most particularly since that decisions by the U.S. Supreme Court in 1962.

A gentleman by the name of David Barton has written a book on that specific subject "To Pray or Not to Pray," and traces the decline in school performance, the increase in the incidence of juvenile delinquency, the increase in crime, the increase in venereal disease in America, the tragic view of what is happening to family units in our society. In other words, we are looking at as part of this cultural war the disintegration of our society before our eyes.

I mention this cultural war and the two conflicting philosophies because the tragedy of BARNEY FRANK evidences this cultural war as well. Mr. FRANK is a very distinguished Member of the House. He is a man of great intelligence, and has acquitted himself well in terms of his contributions to the political issues facing America. The tragedy is how he became involved in activity which prompts the House to take up the issue sometime this week.

I have discussed this matter with the chairman of the Ethics Committee, Mr. DIXON. I am hopeful that the resolution which I seek to offer concerning Mr. FRANK, that would have the House address the issue of his expulsion from the House by virtue of his conduct, can be taken up when the measure is presented by the Ethics Committee, probably on Thursday of this week.

I have great respect for the integrity of Mr. DIXON. I have asked Mr. DIXON to permit me at the conclusion of the presentation of the report of the Ethics Committee, to permit the offering of this motion for expulsion, so that the House can work its will concerning it before the House votes on the recommendation of the Ethics Committee.

Mr. DIXON has advised me that he will let me know tomorrow with respect to whether or not that procedure will be possible, and the importance of the issue, I think, can be emphasized by recognizing where we are from a procedural standpoint.

A motion to expel is a privileged resolution. The recommendation of the Ethics Committee also has a privileged status. They are of equal privileged status, at least as I have been advised by the House Parliamentarian. If I seek recognition and Mr. DIXON as the chairman of the committee seeks recognition, in all probability Mr. DIXON would receive recognition before this Member from California on the issue.

Once the report of the committee is taken up by the House, no other matters would be available to be presented, except the motion to recommit, which I am advised may be used by some Member for the purpose of offering the House an opportunity of a motion to censure. But, as I say, I am hopeful that an accommodation can be worked out where this Member will be able to offer the motion of expulsion before the House votes on the recommendation of the Ethics Committee in order that the House may work its will on that issue, which is the most severe of the penalties that we can provide, before the House votes on the recommendation of the Ethics Committee, which relates to a matter of a

formal reprimand, which is contained in the committee's recommendation.

I would like briefly to discuss the issue of what was contained in the Ethics Committee report to the House on July 20. I believe that the newspaper accounts of the conduct of Mr. FRANK are quite well-known to all of us, but I think it is also appropriate that some discussion be made so that we have the issue before us.

Beginning sometime in 1985, believed to be around April of that year, at least in the statement of——

The SPEAKER pro tempore (Mr. PENNY). If the gentleman from California [Mr. DANNEMEYER] will suspend for a moment, at this point the Chair would caution all Members that it is not in order in debate to engage in personalities. Members should refrain from references in debate to the conduct of other Members, where such conduct is not the subject then pending before the House as a question of the privileges of the House.

When a privileged resolution is offered, it would be appropriate for any Member then to discuss the details of the case. At this point, it would be inappropriate.

Mr. DANNEMEYER. Do I understand the Speaker to say that it would be inappropriate for me to discuss the details of the report that has been filed?

The SPEAKER pro tempore. It would be inappropriate to discuss the conduct of other Members, where such conduct is not the subject then pending before the House as a question of privilege.

Mr. DANNEMEYER. Well, if I may inquire of the Speaker, the report of the Committee on Standards of Official Conduct was filed July 20. It describes in detail the items that I feel like I am in a position to discuss at this time, by virtue of the fact that this report is now part of the public record.

The SPEAKER pro tempore. The report has been filed. The report is not the pending business.

Mr. DANNEMEYER. Well, I do not want to transpose on the rules or decorum of the House, Mr. Speaker. Do I understand you to say then that this Member would be precluded from discussing the report at this time; is that right?

The SPEAKER pro tempore. To the degree that it goes into the detail of the conduct of another Member, the gentleman would be. Up until this point, the gentleman has not been engaged in that type of discussion. If the gentleman avoids specific references to the conduct of another Member, he can continue to comment on the general issues involved.

Mr. DANNEMEYER. Is it appropriate for me at this point to discuss the findings of the committee, making refererence to what is contained in the report?

The SPEAKER pro tempore. Not to the degree that they relate to the specific conduct of another Member.

Mr. DANNEMEYER. Would it be appropriate to discuss observations by persons other than the Member as to what the Member did? For instance, there are percipient witnesses to this incident. May that be discussed?

The SPEAKER pro tempore. That would fall under the same restriction.

Mr. DANNEMEYER. So then the only opportunity that a Member would have to discuss the matter would be when the House takes the matter up, is that right, whenever that event takes place?

The SPEAKER pro tempore. That is consistent with precedent on these matters, cited at page 500 of the House Rules and Manual.

PARLIAMENTARY INQUIRIES

Mr. DANNEMEYER. Mr. Speaker, I have a parliamentary inquiry: when the House takes up the matter of this report, assuming that takes place on Thursday of this week, and if Mr. DIXON as chairman of the committee seeks recognition and I would be on the floor seeking recognition, who would take precedence in terms of recognition with respect to any motion that would be forthcoming, between Mr. DIXON, the chairman of the committee, and myself?

The SPEAKER pro tempore. Under those circumstances, if the motions were of equal precedence, and at that time the Speaker would make a determination as to whom to recognize.

Mr. DANNEMEYER. I note Mr. DIXON is a member of the majority party, the Democratic Party of the House, and I am a member of the Republican Party. Would the Speaker choose to speculate as to who would be recognized?

The SPEAKER pro tempore. The Chair cannot anticipate the Speaker's recognition. The Speaker has the power to recognize. The Chair would not predict for the gentleman whom the Speaker might recognize under those circumstances.

Mr. DANNEMEYER. If I file my motion for expulsion, the matter would then be pending before the House and would be eligible for discussion, would it not?

□ 2010

The SPEAKER pro tempore (Mr. PENNY). If the resolution is pending, the discussion could proceed.

Mr. DANNEMEYER. Then I will certainly respect the ruling of the Speaker with respect to the appropriateness to discuss this matter. I honestly believed that since the report had been filed it was appropriate for this Member to discuss the matter. But apparently this is not what the ruling has been forthcoming.

Let me just say on this point that if I am able to work out this arrangement with the gentleman from California [Mr. DIXON] so that I can make my motion of expulsion and be recognized before the House votes on the recommendation of the committee, which is a formal reprimand, then I think that logically is the way the sequence should follow, and that should be all at one time. The gentleman from California [Mr. DIXON] has assured me that he will let me know tomorrow as to whether or not that procedure can be worked out, but I would advise the House at this time that if that accommodation is not forthcoming, and I would not be recognized to offer my motion of expulsion before the House would then take up the recommendation of the committee and vote on the official reprimand, then this Member would intend to offer this resolution of expulsion tomorrow. And the reason I would do that is because I want an opportunity to analyze and have the House consider and the Members focus upon certain deficiencies in the recommendations of the report of the Committee on Standards of Official Conduct, and in order for me to have that opportunity I have got to have my resolution of expulsion recognized as a part of the business of the floor so that I can discuss the details of what the gentleman did and what other people said he did. And I agree, I will say again, this should all come as part of one consideration of the issue, but if I am in the position where I am not able to offer my motion of expulsion and the vote on that issue before the recommendation of the committee, then as I say, I would be inclined to offer my resolution of expulsion, whenever I can get recognition, assuming that I will get the Speaker's authority, or at least I can get the recognition of the Speaker to recognize me.

I am not sure that requires a response, but I just wanted to share that with the Speaker now, because as I understand the rules, if a Member stands up in the regular business, when we are in the full House, I would have the authority to be recognized for what business would come before the House, would I not?

Mr. DORNAN of California. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman's statement of intent will appear in the RECORD. Again, the Chair's observation to the gentleman earlier about making these remarks on Members' conduct when the business is pending still stands.

Mr. DANNEMEYER. I thank the Speaker.

The SPEAKER. Does the gentleman from California [Mr. DANNEMEYER]

yield to the gentleman from California [Mr. DORNAN]?

Mr. DANNEMEYER. I yield to the gentleman from California.

Mr. DORNAN of California. Mr. Speaker, I was listening in my office and I want to get something clear. We are not supposed to ever discuss another Member's conduct, and that is fitting and as it should be.

But suppose an Ethics Committee report is released and the House votes expulsion, for example, in the case of Adam Clayton Powell, and he is gone so we can talk about it all we want, that is one question, is that correct? And two, if someone is censured, can we refer to that Member's conduct that brought about the censure after it is voted upon forever, and does that also apply to reprimand, and does it also apply to this new category that I was not aware of called letter of reprimand as opposed to a formal reprimand, so I guess now we have four categories once action has all taken place and the House has taken its action in the case of an Ethics Committee in a letter of reprimand where nothing takes place on the floor, are we then allowed to discuss ad infinitum the conduct of that Member who has been disciplined?

Mr. SPEAKER pro tempore. As long as a Member remains a Member, the prohibition on discussing a Member's conduct would apply, unless another disciplinary action were pending on the House floor.

Mr. DORNAN of California. I did not know that, so I am informed. But then the only time you can ever discuss a Member's conduct is when an Ethics Committee report is on the floor, no action has been taken; that is the only time you can discuss it. But once it has been adjudicated and the House has voted dismissal, or to follow the recommendations of the Ethics Committee, or to increase the recommendations of the Ethics Committee, and that action is taken, then it is a dead issue, and can never, that Member's conduct can never be discussed again?

The SPEAKER pro tempore. It has been the policy in the House to discuss this matter only when that report is pending before the House or when another Member might bring some type of disciplinary resolution relating to that Member before the House.

Mr. DORNAN of California. I am with you, Mr. Speaker, and appreciate the Parliamentarian's giving us this information. Generally a million people follow the course of this House, and they are learning along with me.

So there is another category besides when the Ethics Committee brings an action to the House floor and the House is discussing it. There is that time when a Member might seek recognition of the Speaker and come forward with some other issue of conduct when he is demanding some action be taken?

The SPEAKER pro tempore. That is another possibility under which those discussions could occur. The gentleman from California [Mr. DANNEMEYER] has already indicated his intent to proceed in that fashion.

Mr. DORNAN of California. I was not referring necessarily to him, because I missed part of the discussion coming over here.

The SPEAKER pro tempore. The Chair is referring to him, but in general terms. That is an authority that is available to each Member of the House, and when they are recognized by the Speaker to raise such a question of privilege, then such a discussion could proceed.

Mr. DORNAN of California. Then, if a Member was apprised on the evening news that a Member had defected to Albania, he could come to the floor and say I am apprised of this I have called and found out it is true, and I move, Mr. Speaker, that we expel that Member right now so that he cannot come back? That is what the Speaker is talking about, a Member coming with a disciplinary action at that moment?

The SPEAKER pro tempore. When recognized by the Speaker for that resolution, it would then be considered by the House.

Mr. DORNAN of California. All right, then just in reconsidering this, this Member has now been apprised for the first time—I hope I have not violated this over the years—I might have with one particular Member—that when a Member has received a punishment by this Chamber, that is sealed forever and no one in the Chamber can ever again refer to that Member's conduct or the punishment he received?

The SPEAKER pro tempore. While that person is a Member of the House, unless during the pendency of another disciplinary resolution.

Mr. DORNAN of California. While they are a Member of the House. Thank you, Mr. Speaker. I yield back to the gentleman from California.

Mr. DANNEMEYER. Mr. Speaker, I thank my colleague. In light of the ruling of the Speaker, I will respect that and make no comment with respect to the gentleman from Massachusetts.

But I will call my colleagues' attention to the action of an elementary school principal here in the District of Columbia, Mr. Gabriel Massaro, who was involved in an incident here in the District of Columbia involving a prostitute named Gobie, and when this all came to light the elementary school principal resigned his job.

I will also draw my colleagues' attention to a tragedy that we saw unfold here in the Nation's Capital where the president of a university, American University by the name of Richard Berendzen, so far as the press account is concerned, the gentleman, the president of the university made one obscene phone call to another lady in this area, and on the basis of that evidence the president of the university resigned.

We had in the history of the House of Representatives 30 Members that have been considered for expulsion since the creation of the institution and 4 were actually expelled. The latest one was Mr. Michael Myers, in 1980, for corruption.

I think I can also draw my colleagues' attention to the tragedy of a former Member of the House, Mr. Wilbur Mills, the chairman of the Ways and Means Committee, who was afflicted with obvious inability to handle alcohol, became involved with a stripper by the name of Fannie Fox, and when this came to light Mr. Mills resigned.

I mention this because I think it is indicative of how other people in our society have acquitted themselves when they have violated the public trust that is placed in them by the people that brought them to leadership positions in the institution which they serve.

This Member from California will consider this matter further on tomorrow or Thursday of this week when hopefully the Members of the House will have an opportunity to reflect on the conduct of the gentleman from Massachusetts as well as the recommendations of the Ethics Committee and certain observations that this Member will have concerning the report of the committee and an appropriate recommendation concerning this issue.

Mr. Speaker, I yield back the balance of my time.

□ 2020

AMERICA's SLIDE INTO THE SEWER

The SPEAKER pro tempore (Mr. PENNY). Under a previous order of the House, the gentleman from California [Mr. DORNAN] is recognized for 60 minutes.

Mr. DORNAN of California. Mr. Speaker, I made a 1-minute speech at the beginning of today's session where I pointed out an article I mistakenly thought was in Time magazine, and it was Newsweek. I had carried it around opened to the article for a day. So I had forgotten that Mr. George F. Will writes for Newsweek.

Mr. George F. Will, very provocative writer, has a great gift with words and with speech. He is a regular on one of my regularly viewed, personally viewed television shows on Sunday, the so-called Sunday shows that discuss political and current world af-

fairs, David Brinkley's show, "This Week with David Brinkley," an excellent show.

Mr. Will is the house conservative. But more than that, he has become the house conservative for ABC, the whole network. More than that, it seems that NBC and CBS feel since ABC, their competitor, has a conservative on the air periodically, he can serve as the house conservative for all three networks. Thank heavens CNN has people on because I think they are a powerful fourth network, people like Patrick Buchanan. So Mr. Will has not become the house conservative for all of the major electronic outlets in this country.

But he brought up a subject, Mr. Will did, on Sunday's "This Week With David Brinkley." Mr. Brinkley, with more experience in broadcasting than anybody on the air regularly, agreed with Mr. Will instantly. That is that the whole debate on the corruption of the public marketplace in this country, from pornography to child pornography to music lyrics to speech on films, to speech on films that are not coming to us through commercial outlets but through cable television, that this whole debauchery in the public marketplace, which includes narcotics, narcotics, narcotics, legal prescription drugs, illegal prescription drugs, home-manufactured rainbow chemical drugs, the violence in schools, gang warfare, drunkenness, that the entire horrible side of American life that some countries are led to call us "the Great Satan" because of this, that all of this is losing out in the debate because we cannot be specific.

That includes the floor of this great deliberative Chamber, the floor of the other body, the U.S. Senate. We have a decorum here, and I like it. We call one another "my distinguished colleague," we kind of keep a calm level on debate. The worst that happens around here is when somebody cannot get "distinguished" through his teeth, he says, "Will the Member from Massachusetts understand such and such."

It first hit me that we were not going to properly discuss the corruption of the marketplace out there, the pollution of the minds of our youth, when they could not bring the Mapplethorpe photographs, the NEA-funded controversial, deceased-of-AIDS photographer, we could not bring his works to this floor.

I was not one of those who wanted to, they were so horrible. They involved child pornography, a new term, homoerotic art. I never heard the term hetererotic art, which usually means pornography. So this was homosexual pornography. We could not bring it to the floor.

One Member wanted at least to display it in the Speaker's lobby behind me and behind you, Mr. Speaker, and the compromise was it had to go in the far room of the Speaker's lobby because we did not want to offend people who might be walking through the Speaker's lobby. And the only people who have access to your Speaker's lobby other than Members are the press, if they are so credentialed.

I found it unusual that we might offend the press with these Mapplethorpe pictures, because most of the press, at least the dominant media culture liberal press, the biggies, they were defending all of this Mapplethorpe garbage in general.

So Mr. Will says to his colleagues on that show, I think it was Hodding Carter, who is a liberal, very distinguished, very articulate, and it was not Anthony Lewis but another one of the writers, Tom Wicker from the New York Times, very articulate liberal from the South, which is kind of unusual, and Mr. Brinkley, again, instantly agreeing with Mr. Will, Mr. Will says we are crippled in this debate, we are not discussing the lyrics of 2 Live Crew. We are not discussing what some of these NEA projects are. We are not discussing what Andrew Dice Clay, who calls himself "the Diceman," who has a movie out now called "Ford Fairlane," that by my mentioning it may sell a few more tickets, but that all the reviewers say is not nearly as ugly, as crass, as misogynist—meaning antiwoman—as his so-called humor in his nightclub standup act.

He says we cannot discuss any of this. Brinkley says, "I agree."

Will should have mentioned, I guess he did not want to push his Newsweek magazine article, but he should have mentioned that his article was coming out in the Monday edition, yesterday, of Newsweek.

In this article, and I do not think many children read Newsweek, not preteen children, he manages to cross the bridge a little bit and get graphic, to explain the horror.

I have been here a long time, I am 57 years of age, for 3½ years I covered 49 of our 50 States. I only missed Alaska because of its distance. I was eventually going to go there, but I won a congressional seat.

I covered this Nation talking about child pornography and pornography. I thought I had seen and heard it all. But some of the concepts of some of the so-called pseudo-art that people in NEA, through their peer review panels, are trying to get us to fund with no strings attached with taxpayers' dollars, I could not conceive of this. There are no psychopathic dark recesses of my mind that know how to handle sadism, masochism, bondage, discipline, or torture disguised as some sort of a sexual thrill that I could even conjure up some of this sexual garbage.

So I had no idea of the depths of degradation into which the lyrics of 2 Live Crew had sunk.

So now, Mr. Will gives us this in Newsweek. Now, because we, by a vote in this House back in April 1979, began televising these proceedings, Mr. Speaker, there is no way any of us are assured that children, especially in the summertime—it doesn't matter, because in the wintertime they could be home sick—are not following the proceedings of this House on C-SPAN.

I would hope that the children who visit this Chamber with their parents, I would hope their parents would take them out of the Chamber if we are going to discuss some of this because decorum must still prevail on the House floor.

So I cannot read part of Mr. Will's article exactly, but I can use euphemisms that will go past children but adults will know what I am talking about.

Now, I want to read the last paragraph of Mr. Will's article because it has the essence of the whole piece, it has got the punch. Then I may read it a second time.

He says, "America today is capable of terrific intolerance about smoking," I am intolerant, "or toxic waste that threatens trout. But only a deeply confused society is more concerned about protecting lungs than minds, trout than black women. We legislate against smoking in restaurants, singing "Me So Horny," is a constitutional right. Secondary smoke is carcinogenic; celebration of torn women, but the word for women here is a medical word for female genitalia, "celebration of torn women is mere words."

"Words," said Aristotle, "are what set human beings, the language-using animals, above lower animals."

Not necessarily, George Will concludes.

When I first read this article, and I have given it to about 100 Congressmen today, I wrote as a footnote at the bottom, "God have mercy on our beloved country." These are my words.

"Forgive the liberals for they know not what they do."

□ 2030

Then I wrote: "I hope, meaning I hope they don't know what they do."

Here is the way the article begins. It is titled, and by the way it is, Monday's brandnew Newsweek, dated July 30, America's Slide into the Sewer." This title by Newsweek comes out of George Will's words, where in one paragraph he says "This slide into the sewer is greased by praise."

Now, listen to this subtitle: "A Confused Society, Protects Lungs More Than Minds, Trout More than Black Women." George Will begins with a preface in italicized print, "I regret," this is Will writing, "I regret the offensiveness of what follows. However, it is high time adult readers sampled

the words that millions of young persons are hearing."

His article begins, "which words are lyrics, which are testimony." In a Manhattan courtroom testimony continues in the trail of young men accused of gang rape and other satistic violence against the Central Park jogger in last April's 'wilding' episode. This is one of the defendants in the trial that is going on now. "We charged her and we got her on the ground. Everybody started hitting her and stuff and she is on the ground, and everybody is stomping and everything. I grabbed one arm, and this other kid grabbed one arm, and we grabbled her legs and stuff, and then we took turns getting on her." "They did it for fun for entertainment," Mr. Will writes.

A new quote from the courtroom: "After she was hit on the head with a pipe, did someone take her clothes off," the prosecutor asks. "Yeah." "OK, Who took her clothes off?" "All of us." "Did someone have sex with her?" "Yeah."

When arrested, a defendant said, "It was something to do. It was fun." Mr. Will, "Where can you get the idea that sexual violence against women is fun? From a music store, through Walkman earphones, from boom boxes blaring forth the rap lyrics of 2 Live Crew." Then he starts the lyrics, and I have not done this yet. While I try to censor for House decorum the lyrics that George Will slightly censored by using a letter and then dashed and then another letter for some street words for female genitalia. Here are the lyrics: "To have her walkin' funny we try to abuse it, a big stinking"—censor street word for genitalia—"can't do it all, so we try real hard to bust the walls," end of 2 Live Crew lyrics.

Back to George Will: "That is, bust the walls of women's"—and he used a medical word while I prefer female genitalia. Only a slight distinction. Nothing wrong with medical words. "2 Live Crew's lyrics exult in busting women—almost always called bitches—in various forms, forcing"—sex where he has a different word, forcing women to—here I part from Mr. Will. House decorum, and he is talking about making women perform acts with, and he used the word "feces."

Back to 2 Live Crew lyrics. "He'll tear the"—street word for female genitalia—"open cause it's satisfaction." A word for oral intercourse. My word for female genitalia, bitch. Mr. Will just used dashes, and first and last letters, comma, "It makes you puke."

A question from Mr. Will: "That's entertainment?" That is the title of a great TV series that my cousin, Jack Haley, Jr., produced directed and wrote, and won Emmys for. That's entertainment? That's a statement, not a question mark.

Then Mr. Will switches, and I'm not doing him justice here because the writing is beautiful. He writes, "This is medicince. The jogger lost most of her blood, her temperature plunged to 85. Doctors struggling to keep her alive had to tie down her arms and legs because, even hours after the attack, while in a coma that would last weeks, she was flailing and kicking as if in a fighting stance." Those are the doctor's words. "Her face was so disfigured, a friend took 15 minutes to identify her. 'I recognized her ring.'" And now a BOB DORNAN footnote that I found out today. One of her eyes was pushed out of the socket, back into her cranium, and that was pulled forward in reconstructive surgery, and that is why she has blurred vision. She is a vice president of the Salmon Bros., one of the biggest investment counseling firms on Wall Street. She is back on the job. She has trouble reading because of her double vision. She has trouble walking because of injuries to her inner ear, sometimes falling to the right or left. Her friends help her. She has been on the stand for days. It took her 2½ minutes walking to get her on the witness stand by the prosecution, and she asked that her name not be used, and all the radios, newspapers, and television outlets are respecting that.

George Will continues, and this is after, "I recognized her ring."

"Do you recognize"—that is you, Mr. Speaker, that is me, that George Will says, "Do you recognize the relevance of 2 Live Crew?"

New lyrics: "I'll break ya down"—and street word for intercourse. Not the "F" word, another one. "I'll break ya down and"—street word—"bust your"—street word for female genitalia—"and break your backbone."

Back to George Will: "The furor—if anything so evanescent can be called that—about 2 Live Crew has subsided, for two reasons. Saturation journalism, print and broadcast, around the clock, quickly wrings the novelty out of subjects, leaving them dry husks," like discarded corn. "Then, as someone raises the subject again, the answer is a journalistic shrug: 'Not again.' But for 2 Live Crew the tour rolls on and the money rolls in."

When I read this article last night I could hear the music from the Broadway show "Evita," "And the money keeps rolling in." I could hear the song from the other Broadway plan "Cabaret" that Liza Minnelli sang so brilliantly in the film version "Money, money, money, money, money, money, money, money, money, ching, ching, ching." "So the money rolls in," and we are told not to discuss the Diceman or 2 Live Crew because they are going to make more money if we discuss them, so our kids' minds get twisted and polluted.

Back to Mr. Will's article: "Anyway, the 'fury' over the lyrics was feigned. It has to be because everyone dependent on journalism did not learn what the offending words were." That is all of us, because we censor it on the House floor, we censor it even slightly in this article in Newsweek, censored generally in Newsweek and Time and all newspapers and censured on television unless a person is watching a slimy movie now coming to our homes on paid television that pays a reflection of our 2 Live Crew lyrics. We do not know what these offending words were. "Media coverage was characterized by coy abstractness, an obscured mist of mincing, supercilious descriptions of the lyrics as 'explicit' or 'outrageous' or 'challenging' or 'controversial' or 'provocative.'"

"Well, now. Provoking what, precisely?"

From the jogger trail, testimony from court by young teens, "Steve was holding her with his leg and someone was ripping off her clothes and pulling her down. She screamed and Steve held her while Kevin pulled down his pants and had sex with her. Steve hit her with a brick twice."

□ 2040

Mr. Speaker, is there something I am missing here with young Americans? The smashing of this woman's face in with a brick is part of the rape? That is the new way to have sex with a rape victim while somebody else tees off with an iron pipe like it is a golf club, and smashes her head in and brings her so close to death?

Back to George Will.

"Fact: Some membrs of a particular age and social cohort, the one making 2 Live Crew rich, stomped and raped the jogger to the razor edge of death for the fun of it. Certainty: the coarsening of a community, the desensitizing of a society will have behavioral consequences.

"Juan Williams of the Washington Post is black and disgusted. The issue, he writes, is the abuse of women, especially black women and the corruption of young blacks' sensibilities, twisting their conceptions," quote from Mr. Williams, "of good sex, good relationships and good times," unquote Williams. Half of all black children live in single parent households headed by women.

I repeat: Half.

"The black family is falling apart in America. Teenage pregnancy regularly ruins lives. The rate of poverty is steadily rising, and 2 Live Crew," quotes Mr. Williams, "is selling corruption, self-hate, to vulnerable young minds in a weak, blackened America," unquote, Williams.

Mr. Speaker, I would have used the word "weakened black Americans."

Footnote from Congressman BOB DORNAN: Two members of the Black Caucus in this House, friends of mine, approached me and said, "Because of your 1-minute speech at the beginning of the day, I read the article. It is powerful."

The first black Congressman who approached me said, "I reached out and grabbed the article and began to read it before your 1-minute was through, and I agree with you completely, BOB. This is a powerful article, and I agree with every aspect of it."

Bold black letters for the second part of George Will's article: "No Morals."

"No Morals: In such selling, liberals are tools of entertainment corporations. The liberals and the corporations have the morals of the marketplace. Corporations sell civil pollution for profit. Liberals rationalize it as virtuous tolerance in, the marketplace of ideas."

"Not to worry, yawn the New York Times editorialists."

Quote from a New York Times editorial: "The history of music is the story of innovative, even outrageous styles that have interacted, adapted and become mainstream," New York Times.

"Oh, I see," says George Will. "First Stravinsky's Rite of Spring, now 2 Live Crew's Me So Horny: I won't tell your mama, and then the words from Me So Horny. 'I won't tell your mama, if you don't tell your dad. I know he'll be disgusted when he sees your,' female genitalia, street word, busted," Me So Horny lyrics.

Innovative. When that is, "mainstream," this will surely be an interesting country.

"2 Live Crew, who are black, resemble the cretinist, monstrous Andrew Dice Clay, the white, comedian. There is nothing new about selling the talentless to the tasteless. What is new is the combination of extreme infantilism and menace in the profit driven degeneration of popular entertainment. This slide into the sewage is greased by praise, yes, praise.

Hence, Mr. Speaker, the Newsweek title of the article.

"When journalism flinches from presenting the raw reality, and instead says only that 2 Live Crew's lyrics are, "explicit," and "controversial," and "provocative," there is an undertone of approval. Antonyms of those adjectives are—you have to look up these adjectives in a book: provocative, controversial, explicit, and here is what you get: vague, bland, and unchallenging. Somehow we never reach the subject of busting vaginal walls. Vague, bland, unchallenging.

"America today," and I repeat this final paragraph:

America today is capable of terrific intolerance about smoking, or toxic waste that threatens trout. But only a deeply confused society is more concerned about protecting lungs than minds, trout than black women. We legislate against smoking in restaurants; singing "Me So Horny" is a constitutional right. Secondary smoke is carcinogenic; celebration of torn vaginas is "mere words."

Words, said Aristotle, are what set human beings, the language-using animals, above lower animals. Not necessarily.

Concludes George Will. Well done, George. Excellent article. It is in the RECORD twice today. I will use it during the debate on NEA funding.

Mr. Speaker, the latest outrages in our beautiful National Federal City, the Capital of the United States of America, the leading city in the free world, is the "Alleged Area Male Prostitution Ringleader Surrenders." This is Henry Vinson, 29. He has been a fugitive for months, ran this big call boy operation under the names: Man to Man, Jack's Jocks, and the Dream Boys. According to one of the papers in town, it was frequented by all sorts of people in high places around here from the executive branch to all the way across the river to the Pentagon. They have just opened up the files on this Vinson call boy operation.

Mr. Speaker, they claim they are only going after the ones that ran the call boy operation, although they captured in a raid on Vinson's house months ago last year, they picked up a sophisticated AT&T telephone bank, paging devices, an adding machine, a credit card imprinter, and a credit card approval machine. They found lists of alleged customers' names, lists of preferred sexual acts after those customers' addresses, telephone numbers, and prices to charge. To date, however, the investigators have disclosed no evidence linking any high-level Government official, and they probably will not. What is that; some old boy network?

Mr. Speaker, the indictment charges the four defendants with conspiracy, racketeering, interstate transportation for purposes of prostitution. Vinson and Chambers are also charged with credit card fraud. That is Robert A. Chambers, 37, of Upper Marlboro. The other is James A. Macko, M-a-c-k-o, 29, and James Travis Smith, 23. The four are charged, I repeat, with conspiracy, racketeering, interstate transportation for the purposes of prostitution. Vinson and Chambers are also charged with credit card fraud.

Mr. Speaker, the indictment charges that Vinson set up the alleged prostitution ring sometime prior to August 1987 and served as its leader until at least June 1989. Chambers, the son of the owner of the Riverdale Funeral Home where Vinson once worked is accused of also helping to establish the ring and obtaining a merchant account with American Express to process credit cards used by the clients.

Mr. Speaker, my American Express card grows radioactive in my pocket as it does every time I read that they give money to Planned Parenthood.

My colleagues, I repeat for about the fourth or fifth time on this House floor, and I will keep repeating it, and that is that we are in a culture war, a vicious, horrible culture war that is a direct assault upon every woman in our society. I am glad my grandmothers are gone. I am glad my wife's mother and my mother are gone. Thank God I never had a sister to live in this world, but I have got three daughters. We have four granddaughters, and maybe another one on the way to join the three grandsons and the two sons. I was raised to protect women. I do not know if that is chauvinistic, but men are generally stronger, particularly in the upper body strength, and I was raised by my mother who would keep telling me that she wanted a little girl, that she wanted a sister for us so we could learn to treat every women the way she would have wanted us to treat them or would have wanted somebody to treat that sister we never had. I do not know where chivalry has gone in our country, but I know that some nations accuse us of moral corruption, and decadence, and the decay in our society. It was their excuse to continue the horror called communism.

Mr. Speaker, I have debated communism. I remember doing this in the Polish Embassy in Laos, a corner of the world, in 1970. I was sitting there with four wives of missing-in-action pilots, and not one of those great ladies got their hero guy back, their hero pilot back.

□ 2050

An Air Force wife, two Air Force wives, three Air Force wives and a Marine Corps wife, and this Polish Communist Ambassador to Laos said to us, "Why would we want to give up communism for your democracy? We don't have your narcotics problems." Now they do.

"We don't have your pornography problem." Now they do.

"We don't have the problems of moral decay and our kids turning to drugs in high school, your dropout rate." Now they are starting to get that.

Is that what comes with freedom? I heard that Hustler or Penthouse is now going to be produced in Hungary, that they have already got seven home-produced porno magazines, that when East Germans came out of years of Communist imprisonment, locked behind the Berlin Wall, shot if they tried to climb over the Wall, hang-glider over the Wall, race under the barrier in sports cars, jumped it with motorcycles, a la Steve McQueen, what they did, they killed them; 86 people died trying to cross that Wall, but when it comes down to opening

the gates, the dominant media culture tells us that the people rushed to the live sex shows in West Berlin and rushed to the porno shops.

I choose not to believe that was everybody.

Is there some dark side of freedom and liberty that turns to this sort of self-corruption? I hope we can turn this back and I hope the dominant media culture, and what I mean when I say dominant media culture is the New York Times, the Washington Post, the L.A. Times, the Wall Street Journal, ABC, CBS, NBC, CNN, Newsweek, Time, U.S. News and World Report—and who have I left out? There are 14—AP and UPI. I hope those 14 outlets—oh, and PBS and CNN. Now I have got 14. I hope those 14 outlets of information, and that is what most of us mean when we say dominant, because it is not everybody in the media. It is the dominant ones, media culture, and it is a separate culture. If they think these lyrics will turn into tomorrow's mainstream or that Andrew Dice Clay is not creating a direct frontal assault on women, and Nora Dunn was correct, and the Irish female singer, Shana Sinead, they were correct not to appear on Saturday Night Live, but Saturday Night Live's ratings went up when the Dice Man appeared and came up with more gutter street language for female genitalia that I cannot mention on the floor of the House of the U.S. Congress because of decorum here, but it was okay for the producers of Saturday Night Live to go out to America uncensored, and then they griped the next day that Andrew Dice Clay lied to them and got dirty when he promised not to.

No, we have a cultural war, and maybe some of the Cretons, as George Will calls them, some of these moral—you cannot even use medical words, for people who are mentally impaired or handicapped, these moral devils, maybe we can turn the clock back.

If the young people in this country, my seven grandkids and, God willing, an eighth due in a few weeks, will have the same chance to be raised in a decent America as I was. My grandparents came here as dirt poor Irish immigrants. I was raised in a wholesome environment, but my mom and dad told me when I was being raised in a nice environment, "Don't ever forget that there are black children who are still living in virtual slavery in the South 100 years after the Civil War is over and they don't have the same educational benefits that you do."

So just as the frightened Jewish family that came here fleeing Kossack pograms in Poland or Byelorussia, they came to America and they could hit all the economic homeruns they wanted, when Italians came here seeking economic freedom and political freedom, the Irish people, people from all over the world as is still happening with Haitians and Cubans and Guatemalans and Salvadorans and Nicaraguans and Cambodians and Laotians and Vietnamese, people coming from all over the world. Now some Hungarians can go home because freedom has opened up there; but when the black Americans, who are as American as anybody else because they have been here for three centuries, two centuries longer than my Irish relatives, when they finally get freedom, fought for in the civil rights period of the sixties, and they come up the back way, the economic door is slammed in their face.

Quick divorce is now a part of all society. The family structure begins to fall apart, and then the white dominant media makes excuses for a culture that is a counterculture, a subculture in the black community, that is a direct assault upon black women, and that is why George Will says a society that protects trout, fish, more than it protects women from a class that has suffered so much in a country that they did not even choose to come to, but accepted lovingly as their homeland and thought that their problems were solved with the Civil War, and they were not, now are being assaulted in a way more severely than slavery itself was an assault.

Less young black males die, chained in slavery, once they had suffered the third rate of every one in three dying on the Atlantic route of the slave trade, once they had gotten here, they were not dying, the young males, at the same rate the young black males are dying by gunshot. It is the No. 1 cause of death in some of our cities.

I do not know if the dominant media is psyched by this whole thing. Do they not consider blacks worthy of the same type of coverage that Irish-Americans, Jewish-Americans, Polish-Americans, Cambodian-Americans, have gotten over the years, What a tragedy.

I hope the Black Caucus will take this up as an item of discussion at their next meeting and see if there is not some way, because most of them consider themselves liberal, they will not be betraying their liberal principles to stop, and I quote George Will's title, "The slide into the sewer" for all of us, but the first group in our country that is suffering the earliest, and most severe attacks and the most destruction are our fellow brothers and sisters who are black.

Mr. Speaker, I close again with those words that I wrote at the bottom of this article, "Oh, God, have mercy on our beloved country. Forgive liberals, for they know not what they do." I hope they know not what they do.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. HILER) to revise and extend their remarks and include extraneous material:)

Mr. FISH, for 5 minutes, today.
Mr. WYLIE, for 5 minutes, today.
Mr. MCCOLLUM, for 5 minutes, today.
Mrs. BENTLEY, for 60 minutes, August 6, August 7, and August 8.
Mr. WOLF, for 60 minutes, July 27.
Mr. GEKAS, for 5 minutes, today.
Mr. DANNEMEYER, for 60 minutes, today.

(The following Members (at the request of Mr. HUGHES) to revise and extend their remarks and include extraneous material:)

Mr. STARK, for 5 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.

(The following Member (at his own request) to revise and extend his remarks and include extraneous material:)

Mr. DORNAN of California, for 60 minutes, today.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's

table and, under the rule, referred as follows:

S. 1076. An act to increase public understanding of the natural environment and to advance and develop environmental education and training; to the Committee on Education and Labor.

S. 2874. An act to authorize the reformulation of the Cedar Bluff Unit of the Pick-Sloan Missouri Basin Program, Kansas, to provide for the amendment of water service and repayment contracts; to the Committee on Interior and Insular Affairs.

ENROLLED JOINT RESOLUTION SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a joint resolution of the House of the following title, which was thereupon signed by the Speaker:

H.J. Res. 577. Joint resolution designating the month of November 1990 as "National American Indian Heritage Month."

ADJOURNMENT

Mr. DORNAN of California. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 8 o'clock and 57 minutes p.m.), the House adjourned until tomorrow, Wednesday, July 25, 1990, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

[Omitted from the Record of July 23, 1990]

3609. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to amend the Stevenson-Wydler Technology Innovation Act of 1980 to enhance technology transfer for workers prepared under cooperative research and development agreements under the Federal Technology Transfer Act of 1986; jointly to the Committee on Science, Space, and Technology and the Judiciary.

[Submitted July 24, 1990]

3610. A letter from the Acting Deputy for Programs and Installation Assistance, Department of Defense, transmitting notification of the decision to convert the custodial services function at Martin Army Community Hospital, Fort Benning, GA, to contractor performance which was found to be the most efficient and cost-effective, pursuant to Public Law 100-463, section 8061 (102 Stat. 2270-27); to the Committee on Armed Services.

3611. A letter from the Director, Defense Security Assistance Agency, transmitting the Department of the Navy's proposed Letter(s) of Offer and Acceptance (LOA) to Japan for defense articles estimated to cost $50 million or more (Transmittal No. 90-45), pursuant to 10 U.S.C. 118; to the Committee on Armed Services.

3612. A letter from the Director, Defense Security Assistance Agency, transmitting the Department of the Navy's proposed Letter(s) of Offer and Acceptance (LOA) to Japan for defense articles estimated to cost $50 million or more (Transmittal No. 90-47), pursuant to 10 U.S.C. 118; to the Committee on Armed Services.

3613. A letter from the Director, Defense Security Assistance Agency, transmitting the Department of the Navy's proposed Letter(s) of Offer and Acceptance (LOA) to Japan for defense articles estimated to cost $50 million or more (Transmittal No. 90-46), pursuant to 10 U.S.C. 118; to the Committee on Armed Services.

3614. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. Act 8-249, "District of Columbia Family and Medical Leave Act of 1990", and report, pursuant to D.C. Code, section 1-233(c)(1); to the Committee on the District of Columbia.

3615. A letter from the Director, Defense Security Assistance Agency, transmitting notification of the Department of the Navy's proposed Letter(s) of Offer and Acceptance (LOA) to the Netherlands for defense articles and services (Transmittal No. 90-48), pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

3616. A letter from the Director, Defense Security Assistance Agency, transmitting notification of the Department of the Navy's proposed Letter(s) of Offer and Acceptance (LOA) to Japan for defense articles and services (Transmittal No. 90-47), pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

3617. A letter from the Director, Defense Security Assistance Agency, transmitting notification of the Department of the Navy's proposed Letter(s) of Offer and Acceptance (LOA) to Japan for defense articles and services (Transmittal No. 90-45), pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

3618. A letter from the Director, Defense Security Assistance Agency, transmitting notification of the Department of the Navy's proposed Letter(s) of Offer and Acceptance (LOA) to Japan for defense articles and services (Transmittal No. 90-46), pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

3619. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b(a); to the Committee on Foreign Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BROOKS: Committee on the Judiciary. H.R. 4225. A bill to amend title 18, United States Code, to prohibit the possession, transfer, and certain exports of restricted weapons, the manufacture of firearms capable of accepting a silencer or bayonet without alteration, and the possession and transfer of large capacity ammunition feeding devices, and for other purposes, with an amendment (Rept. 101-621). Referred to the Committee of the Whole House on the State of the Union.

Mr. BROOKS: Committee on the Judiciary. S. 1814. An act for the relief of Wilson Johan Sherrouse (Rept. 101-622). Referred to the Committee of the Whole House.

Mr. BROOKS: Committee on the Judiciary. H.R. 3920. A bill for the relief of Fiona Lamont DuVal (Rept. 101-623). Referred to the Committee of the Whole House.

Mr. BROOKS: Committee on the Judiciary. H.R. 2863. A bill for the relief of Michael Wu; with an amendment (Rept. 101-624). Referred to the Committee of the Whole House.

Mr. BROOKS: Committee on the Judiciary. H.R. 2961. A bill for the relief of Sonanong Poonpipat (Latch) (Rept. 101-625). Referred to the Committee of the Whole House.

Mr. BROOKS: Committee on the Judiciary. S. 1683. An act for the relief of Paula Grzyb (Rept. 101-626). Referred to the Committee of the Whole House.

Mr. BROOKS: Committee on the Judiciary. S. 1229. An act for the relief of Maria Luisa Anderson (Rept. 101-627). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ROSTENKOWSKI:

H.R. 5350. A bill to provide for a temporary increase in the public debt limit; to the Committee on Ways and Means.

By Mr. ANDREWS:

H.R. 5351. A bill to amend the Internal Revenue Code of 1986 to extend the credit for fuel produced from a nonconventional source and to restore such credit for certain gas produced from a tight formation; to the Committee on Ways and Means.

By Mr. CHANDLER (for himself and Mrs. KENNELLY):

H.R. 5352. A bill to amend the Internal Revenue Code of 1986 to restructure and revitalize the Federal income tax incentives for certain employee stock options; to the Committee on Ways and Means.

By Mr. WYLIE (for himself, Mr. FISH, Mr. MICHEL, Mr. GINGRICH, Mr. LEWIS of California, Mr. VANDER JAGT, Mr. EDWARDS of Oklahoma, Mr. SOLOMON, Mr. HUNTER, Mr. MCCOLLUM, Mr. WEBER, Mr. GEKAS, Mr. HILER, Mr. DOUGLAS, and Mr. PARRIS):

H.R. 5353. A bill to enhance the ability of the Federal Government to successfully prosecute financial crimes and gain increased recoveries at failed financial institutions; jointly, to the Committee on the Judiciary and Banking, Finance and Urban Affairs.

By Mr. DERRICK:

H.R. 5354. A bill to amend the Internal Revenue Code of 1986, the Federal Election Campaign Act of 1971, and the Communications Act of 1934 to reform financing of congressional elections, and for other purposes; jointly, to the Committees on Ways and Means, House Administration, and Energy and Commerce.

By Mr. ROSTENKOWSKI (by request):

H.R. 5355. A bill to increase the statutory limit on the Public debt; to the Committee on Ways and Means.

By Mr. ENGEL:

H.R. 5356. A bill to require certain entities receiving United States funds from the

International Fund for Ireland to comply with the McBride principles; to the Committee on Foreign Affairs.

By Mr. HOCHBRUECKNER:

H.R. 5357. A bill to amend title 10, United States Code, to allow eligible entities under the Department of Defense procurement technical assistance program to furnish technical assistance relating to procurement with other Federal departments and agencies; to the Committee on Armed Services.

By Mr. STARK:

H.R. 5358. A bill to amend the Internal Revenue Code of 1986 to disallow the research credit for duplicative medications and excessively priced new therapeutic medications; to the Committee on Ways and Means.

By Mr. TORRES (for himself, Mr. HOCHBRUECKNER, Mr. ANDERSON, Mr. BATES, Mr. BEILENSON, Mr. BERMAN, Mr. BONIOR, Mr. BROWN of California, Mr. BRYANT, Mr. CONDIT, Mr. COYNE, Mr. DE LA GARZA, Mr. DYMALLY, Mr. EDWARDS of California, Mr. FAUNTROY, Mr. FAZIO, Mr. GAYDOS, Mr. HAWKINS, Mr. HAYES of Illinois, Mr. HORTON, Ms. KAPTUR, Mr. LEWIS of Georgia, Mr. MARKEY, Mr. MILLER of California, Mr. NAGLE, Mr. OWENS of Utah, Mr. PALLONE, Ms. PELOSI, Mr. RANGEL, Mr. RICHARDSON, Mr. ROYBAL, Ms. SCHNEIDER, Mr. SCHROEDER, Mr. SIKORSKI, Mr. TOWNS, Mr. WALSH, and Mr. WOLPE):

H.R. 5359. A bill to amend the Solid Waste Disposal Act to provide management standards and recycling requirements for spent lead-acid batteries; to the Committee on Energy and Commerce.

By Mr. MICHEL:

H.J. Res. 630. Joint resolution to recognize and commend the efforts being made to create a gallery in the U.S. Army Museum, Fort George G. Meade, MD, to commemorate the Battle of the Bulge; to the Committee on Armed Services.

By Mr. ENGEL (for himself, Mr. ANNUNZIO, Mr. CONTE, Mr. FASCELL, Mr. FAZIO, Mr. PALLONE, Mr. PANETTA, Mr. RINALDO, Mr. ACKERMAN, Mr. ANDERSON, Mr. APPLEGATE, Mr. AUCOIN, Mr. BATES, Mr. BENNETT, Mrs. BENTLEY, Mr. BORSKI, Mr. BOSCO, Mrs. BOXER, Mr. BRENNAN, Mr. BROWN of Colorado, Mr. CARR, Mr. CLEMENT, Mrs. COLLINS, Mr. COSTELLO, Mr. DEFAZIO, Mr. DOUGLAS, Mr. DOWNEY, Mr. DWYER of New Jersey, Mr. FALEOMAVAEGA, Mr. FEIGHAN, Mr. FISH, Mr. FOGLIETTA, Mr. FROST, Mr. FUSTER, Mr. GALLO, Mr. GILMAN, Mr. GORDON, Mr. GUARINI, Mr. HANSEN, Mr. HERTEL, Mr. HOAGLAND, Mr. HORTON, Mr. JONTZ, Ms. KAPTUR, Mr. KASICH, Mr. KILDEE, Mr. KOLTER, Mr. LAFALCE, Mr. LAGOMARSINO, Mr. LANCASTER, Mr. LENT, Mr. LEWIS of California, Mrs. LOWEY of New York, Mr. MCCOLLUM, Mr. MCDADE, Mr. MCDERMOTT, Mr. MCEWEN, Mr. MCGRATH, Mr. MCHUGH, Mr. MCNULTY, Mr. MACHTLEY, Mr. MANTON, Mrs. MARTIN of Illinois, Mr. MAZZOLI, Mr. MILLER of California, Ms. MOLINARI, Mr. MOLLOHAN, Mr. MONTGOMERY, Mr. MRAZEK, Mr. NEAL of Massachusetts, Mr. NOWAK, Mr. OBERSTAR, Mr. OWENS of Utah, Mr. PASHAYAN, Mr. PAXON, Mr. PAYNE of New Jersey, Ms. PELOSI, Mr. PICKETT, Mr. POSHARD, Mr. RANGEL, Mr. ROE, Mr. RUSSO, Mr. SABO, Mr. SAVAGE, Mr. SCHEUER, Mr. SCHUETTE, Mr. SHUMWAY, Mr. SLATTERY, Ms. SLAUGHTER of New York, Mr. SMITH of Florida, Mr. SOLARZ, Mr. SOLOMON, Mr. STANGELAND, Mr. SUNDQUIST, Mr. THOMAS of Wyoming, Mr. TORRICELLI, Mr. TOWNS, Mr. TRAFICANT, Mr. TRAXLER, Mr. VANDER JAGT, Mr. WALSH, Mr. WAXMAN, and Mr. YATES):

H.J. Res. 631. Joint resolution designating October 1990 as "Italian-American Heritage and Culture Month"; to the Committee on Post Office and Civil Service.

By Mr. KOSTMAYER (for himself, Mr. CROCKETT, Mr. YATRON, Mr. WEISS, Mr. STUDDS, Mr. JOHNSTON of Florida, and Mr. GEJDENSON):

H. Con. Res. 355. Concurrent resolution condemning human rights violations in Guatemala and supporting negotiations to peacefully end the 30-year civil war in that country; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 2584: Mr. PARKER.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3950

By Mr. SYNAR:

—Page 385, after line 22, insert the following new subtitle:

Subtitle F—Pesticide Export Reform

SEC. 1251. SHORT TITLE.

(a) SHORT TITLE.—This subtitle may be cited as the "Pesticide Export Reform Act of 1990".

(b) REFERENCE.—Whenever in this title an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Federal Insecticide, Fungicide, and Rodenticide Act.

PART 1—EXPORTED PESTICIDES

SEC. 1252. DEFINITIONS.

(a) IN GENERAL.—Section 2 (7 U.S.C. 136) is amended by adding at the end the following new subsections:

"(hh) COUNTRY OF USE.—The term 'country of use' means any foreign country in which a pesticide—

"(1) is intended by the exporter to be used or formulated; or

"(2) on the basis of information reasonably available to the exporter, the use or formulation of such pesticide being exported is foreseeable.

"(ii) EXPORTER.—The term 'exporter' means any person who arranges to transport, or who transports, any pesticide from the United States or any territory or possession of the United States to any country other than the United States.".

(b) MISBRANDED.—Section 2(q)(1) (7 U.S.C. 136(q)(1)) is amended—

(1) in subparagraph (G), by striking "or" at the end thereof;

(2) in subparagraph (H), by striking the period and inserting "; or"; and

(3) by adding at the end thereof the following new subparagraph:

"(I) in the case of a pesticide intended for export from the United States, the labeling does not meet the requirements of section 17(a)(8).".

SEC. 1253. REGISTRATION OF ESTABLISHMENTS.

Paragraph (1) of section 7(c) (7 U.S.C. 136e(c)(1)) is amended to read as follows:

"(1)(A) Any producer operating an establishment registered under this section shall inform the Administrator within 30 days after the establishment is registered of the types and quantities of pesticides and active ingredients used in producing pesticides that the producer—

"(i) is currently producing;

"(ii) has produced in the past 365-day period; and

"(iii) has sold or distributed during the past 365-day period.

"(B) Any producer operating an establishment registered under this section shall inform the Administrator within 30 days after the establishment is registered of—

"(i) the types and quantities of pesticides, and active ingredients used in producing pesticides, for export to a foreign country; and

"(ii) the date of export and quantity of pesticides and active ingredients exported to each foreign country to which the producer has exported during the past 365-day period.

The information required by this paragraph shall be kept current and submitted to the Administrator annually as required under such regulations as the Administrator may prescribe.".

SEC. 1254. PROTECTION OF TRADE SECRETS AND OTHER INFORMATION.

Section 10(d) (7 U.S.C. 136h(d)) is amended by adding at the end the following new paragraph:

"(4) The information submitted to the Administrator under sections 7(c)(1)(B)(ii) and 17(a)(6)(C) shall not be entitled to confidential treatment under subsection (b).

"(5) The data, summaries, and reviews described in section 17(a)(2)(A)(ii) shall be available to the public and shall be subject to the restrictions on use prescribed by section 3(c)(1)(D) as if they were submitted for purposes of registration under section 3.".

SEC. 1255. UNLAWFUL ACTS.

Section 12(a)(2) (7 U.S.C. 136j(a)(2)) is amended—

(1) by striking "or" at the end of subparagraph (R);

(2) by striking the period at the end of subparagraph (S) and inserting "; or"; and

(3) by adding at the end the following new subparagraph:

"(T) to knowingly or recklessly export a pesticide or device in violation of section 17.".

SEC. 1256. EXPORTS.

(a) SUBSECTIONS (a) AND (b).—Subsections (a) and (b) of section 17 (7 U.S.C. 136o) are amended to read as follows:

"(a) PESTICIDES OR DEVICES INTENDED FOR EXPORT.—

"(1) IN GENERAL.—

"(A) Notwithstanding any other provision of this Act, no pesticide or device may be exported to a foreign country unless such pesticide or device is prepared and packaged according to the specifications of the foreign purchaser and the legal requirements of the country of use is not considered misbranded under section 2(q).

"(B) The producers and exporters of any such pesticide or device shall be subject to the requirements of paragraphs (1), (2), (6), (7), and (9) of this subsection and sections 2(q), 7, 8, 19(a), and 19(e).

"(2) EXPORT OF PESTICIDES.—

"(A) No person shall export to any country of use a pesticide unless—

"(i)(I) that pesticide is registered with the Administrator under section 3; or the active ingredients in that pesticide are the subject of a food tolerance established under section 408 of the Federal Food, Drug, and Cosmetic Act;

"(II) if that pesticide is for use in connection with agricultural production related to food use unless that pesticide is registered with the Administrator for use in connection with agricultural production related to food under section 3; or the active ingredients of that pesticide are the subject of a food tolerance established under section 408 of the Federal Food, Drug, and Cosmetic Act; or

"(ii)(I) the pesticide is not registered under section 3, it has not been denied registration under section 3, it has not been the subject of an application for registration under such section that had not been granted because the Administrator had raised significant concerns about adverse human health effects, or the registration of the pesticide has not been canceled or suspended;

"(II) the exporter of the pesticide has provided the Administrator with a set of data and summaries of the data for acute effects, subchronic effects, teratology, oncogenicity, neurotoxicity, mutagenicity, and metabolic and pharmakinetic characteristics according to United States or foreign standards which the Administrator has determined by rule are sufficient to make a preliminary determination of the human health effects of the active ingredients in the pesticide;

"(III) the exporter of the pesticide has provided the Administrator with all methods known to the exporter for detecting residues of the active ingredients of the pesticide in food;

"(IV) the active ingredients in the pesticide are registered for use in a country which is a member of the Organization for Economic Cooperation and Development;

"(V) the Administrator has reviewed the data and summaries submitted under subclause (II) and has determined that they meet the requirements of the rule described in subclause (II), and has made a preliminary determination that the active ingredient does not pose an unreasonable risk to human health;

"(VI) the Administrator has determined that there is a practical method for detecting and measuring the presence of such pesticide chemical on such raw agricultural commodity or processed food that the Secretary of Health and Human Services is able to perform on a routine basis as part of sur-

veillance and compliance sampling of raw agricultural commodities and processed foods for pesticide chemicals; and

"(VII) all data and information described in this clause and the Administrator's evaluation of the data and information are available to a country of use receiving a notice under paragraph (6)(D) upon request and the country has granted consent to accept such pesticide.

The consent of a country of use described in clause (ii)(VII) shall be effective for not more than 24 months after the date of issuance of such response and such country of use may withdraw such consent at any time on or after the date of issuance of such consent.

"(B) A pesticide shall be considered to be for use in conjunction with agricultural production related to food use under the requirements of subparagraph (A)(i) if in the country of use—

"(i) on the basis of the advertising, promotion, packaging, distribution, labeling of such pesticide, or other circumstance, it is probable that such pesticide may be used in connection with agricultural production related to food use;

"(ii) patterns of pesticide use in the country indicate that it is probable that such pesticide may be used in connection with agricultural production related to food use;

"(iii) such pesticide is in use in connection with agricultural production related to food use; or

"(iv) the quantity of such pesticide that an exporter intends to export to a country of use exceeds the quantity, on the basis of expectations of use, that could be used in the country of use for use other than in connection with agricultural production related to food use.

"(3) TEMPORARY WAIVER FOR THE CONTROL OF COMMUNICABLE DISEASE.—On the request of a country of use, the Administrator may issue a temporary waiver from any requirement under paragraph (2) or (6) to permit the export to a country of use of a pesticide that does not otherwise meet the requirements for export under paragraph (2) or (6) to prevent the imminent spread or to arrest the spread of a communicable disease of humans that poses a serious threat to public health in such country of use if—

"(A) based on the certification of the country of use and information readily available to the Administrator, the Administrator makes a determination that—

"(i) the pesticide is to be used on a temporary basis for a period of time that shall not exceed 180 days;

"(ii) there is no practical chemical or nonchemical alternative to using the pesticide to prevent the imminent spread or arrest the spread of the communicable disease; and

"(iii) the pesticide will not be used as part of a routine continuing pest control program;

"(B) no quantity of the pesticide shall be exported in excess of a quantity that the Administrator, in consultation with the country of use, determines to be necessary to accomplish the purpose for the use of such pesticide under this paragraph;

"(C) the exporter agrees to assist in providing for the disposition or removal from the country of use of any unused or excess quantities of the pesticide at the time the purpose for the use of such pesticide under this paragraph has been accomplished; and

"(D) the Administrator publishes a notice in the Federal Register prior to the exportation of such pesticide, or as soon thereafter as practicable, that includes—

"(i) the factual basis for any determination that the Administrator makes under this paragraph;

"(ii) the identity of the exporter and the country of use;

"(iii) the quantity and identity of the pesticide (including a complete chemical description of the active ingredient of such pesticide that includes any commonly accepted chemical (generic), or abbreviated chemical name of such active ingredient) that the Administrator authorizes for export under this paragraph; and

"(iv) the estimated dates of export for the pesticide.

"(4) TEMPORARY WAIVER IN CIRCUMSTANCES OF FAMINE.—On the request of the country of use, the Administrator may issue a temporary waiver from any requirement under paragraph (2) or (6) to permit the export of a pesticide that does not otherwise meet the requirements for export under paragrph (2) or (6) to stop the spread or to prevent the imminent spread of a pest that is destroying or will destroy sufficient quantities of the food supply of the country of use so as to result in widespread famine or human starvation in the country of use if—

"(A) based on the certification of the country of use and information readily available to the Administrator, the Administrator makes a determination that—

"(i) the pesticide is to be used on a temporary basis for a period of not to exceed 180 days;

"(ii) the pesticide will only be used to stop the spread or to prevent the imminent spread of a pest that is destroying or will destroy sufficient quantities of the food supply of the country of use as to result in widespread famine or human starvation in the country of use;

"(iii) there is no practical chemical or nonchemical alternative to the use of the pesticide to stop the spread or to prevent the imminent spread of the pest in the country of use in time to prevent the destruction of such quantities of the food supply of the country of use as to result in human starvation in the country of use;

"(iv) the pesticide will not be used as part of a routine continuing pest control program; and

"(v) based on information provided by the country of use, food supplies stored in the country of use or that are available for purchase by the country of use or that are likely to be made otherwise available to the country of use are not likely to be adequate to prevent widespread famine or human starvation caused by the pest in the country of use;

"(B) no quantity of the pesticide shall be exported in excess of a quantity that the Administrator, in consultation with the country of use, determines to be necessary to accomplish the purpose for the use of such pesticide under this paragraph;

"(C) the exporter agrees to assist in providing for the disposition or removal from the country of use of any unused or excess quantities of the pesticide at the time the purpose for the use of such pesticide under this paragraph has been accomplished; and

"(D) the Administrator publishes a notice in the Federal Register prior to the exportation of such pesticide, or as soon thereafter as practicable, that includes—

"(i) the factual basis for any determination that the Administrator makes under this paragraph;

"(ii) the identity of the exporter and the country of use;

"(iii) the quantity and identity of the pesticide (including a complete chemical description of the active ingredient of such pesticide that includes any commonly accepted chemical (generic), or abbreviated chemical name of such active ingredient) that the Administrator authorizes for export under this paragraph; and

"(iv) the estimated dates of export for the pesticide.

"(5) STATUTORY CONSTRUCTION.—Except as specifically provided in this section, paragraphs (1) and (2) shall not be construed so as to allow the Administrator to exempt any pesticide or device from any requirement under this section except in the case of a pesticide that is exempted from the provisions of this Act pursuant to section 25(b).

"(6) ADDITIONAL REQUIREMENTS FOR THE EXPORT OF CERTAIN PESTICIDES.—

"(A) This paragraph applies to a pesticide—

"(i) for which a restricted use classification for reasons of human health risk is effective under section 3;

"(ii) that is subject to an order of suspension under section 6(c);

"(iii) that is the subject of a cancellation proceeding under section 6(b);

"(iv) that is the subject of a conditional registration under section 3(c)(7)(C);

"(v) that is the subject of an interim administrative review described in section 3(c)(8) in which the Administrator proposes to cancel the product;

"(vi) that contains an active ingredient that is included on the World Health Organization list of Class 1A, 'extremely hazardous', or Class 1B, 'highly hazardous' pesticides;

"(vii) that contains an active ingredient that was the subject of a registration under section 3 that was canceled, or was amended to delete a registered use because of human health risk associated with the registered use; or

"(viii) that is described in paragraph (2)(A)(ii).

"(B) No pesticide described in subparagraph (A) shall be exported if—

"(i) the exporter has not provided the notice required in subparagraph (C);

"(ii) the exporter has received from the Administrator, or the Administrator has published in the Federal Register, a written notice that the country of use has refused to consent to the importation of such pesticide pursuant to paragraph (7)(B); or

"(iii) to the extent not in conflict with requirements of the country of use, the pesticide is not packaged, and stored in conformity with standards for composition and quality of the Food and Agriculture Organization of the United Nations.

"(C) No pesticide described in subparagraph (A) may be exported unless, prior to shipment of such pesticide, the exporter provides to the Administrator—

"(i) the common or trade names by which such pesticide is known in the country of use and a complete chemical description of the active ingredients of such pesticide, including any commonly accepted, chemical (generic), or abbreviated chemical name known in the country of use for such active ingredients;

"(ii) the name and the address of the producer and exporter;

"(iii) the name and address of the foreign purchaser;

"(iv) the intended date and quantity of shipment of such pesticide;

"(v) the manner of transport of such shipment;

"(vi) the country of use that is the ultimate destination of such shipment; and

"(vii) the raw agricultural commodity, as defined in section 201(r) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(r)), or processed food, if any, on which such pesticide is intended or likely to be used.

"(D) For each pesticide identified in a notice submitted under subparagraph (C), if such notice is the first such notice that identifies a country of use for that pesticide that is received by the Administrator in the 12-month period immediately preceding the date of the receipt of such notice, the Administrator shall, within 60 days of the receipt of such notice submitted under subparagraph (C), notify the appropriate official in the appropriate regulatory department or agency designated by the country of use and the office responsible for the International Register of Potentially Toxic Chemicals of the intended export. Such notice by the Administrator shall contain a description in English, and in an official language of the country of use, of—

"(i) the information required by subparagraph (C);

"(ii) if the pesticide is subject to a conditional registration under section 3(c)(7)(C), an interim administrative review or suspension or concellation proceeding, or is classified for restricted use under this Act, a statement explaining the reasons for such status;

"(iii) alternatives known to the Administrator, including nonchemical alternatives, to the use of such pesticide;

"(iv) if the pesticide is described in paragraph (2)(A)(ii), a statement that a set of data, summaries, and reviews on the pesticide are available upon request; and

"(v) the name and address of the office of the Environmental Protection Agency that, on request of an appropriate official of the country of use, will provide additional information concerning such pesticide and alternatives to the use of such pesticide.

"(7) RESTRICTION ON THE EXPORT OF CERTAIN PESTICIDES.—

"(A) The Administrator shall publish a notice in the Federal Register disclosing that a country of use has informed the Administrator, or an international agency of which the United States is a member, that such country does not wish to import a pesticide, not later than 10 days of the receipt by the Administrator of such information.

"(B) The Administrator shall publish a notice under subparagraph (A) concerning a specific country of use only if—

"(i) the country of use has indicated that it does not wish to import the pesticide pursuant to an international system of pesticide export and import controls—

"(I) adopted by an international agency, if the United States is a member of the international agency and has consented to the adoption of the system; or

"(II) reached through an international agreement to which the United States is a signatory; or

"(ii) on the basis of a notice issued in accordance with paragraph (6)(D), the country of use does not consent, or has given conditional consent, to the importation of a pesticide.

"(C) Any refusal of consent by a country of use shall be considered as a continuing refusal that shall be effective until the country of use modifies or withdraws such refusal.

"(D) A refusal by a country of use to consent to the importation of a pesticide shall not be effective unless the country of use has certified that it—

"(i) is not producing and will not produce the pesticide or a similar product with the same active ingredient for use in the country of use; and

"(ii) is not importing and will not consent to the importation of the pesticide or a similar product with the same active ingredient from any other country.

"(E) If the Administrator makes a determination that the country of use is not in compliance with the certification provided under subparagraph (D), the Administrator shall withdraw the notice published under subparagraph (A).

"(8) LABELS.—The label of any pesticide intended for export from the United States shall—

"(A) be written in English and the official language of the country of use or in the major language of international relations of the country of use; and

"(B) to the extent not in conflict with requirements of the country of use, contain any health, safety, environmental and other related information, as determined by the Administrator to be applicable to the country of use and required to be included under section 3 in the labeling for such pesticide for use in the United States.

"(9) SPECIAL EXEMPTION FOR THE EXPORT OF RESEARCH OR EXPERIMENTAL PESTICIDES.—

"(A) Notwithstanding paragraphs (2) and (6), an exporter may export a pesticide for research or experimental use for use in a country of use if such pesticide is for research or experimental use—

"(i) is not and has not been the subject of any registration under section 3; and

"(ii) is to be used only for research or experimental purposes.

"(B) Nothing in this paragraph shall be interpreted so as to authorize the export of a pesticide for research or experimental use without the written consent of the government of the country of use. Such consent shall be obtained in the manner prescribed under subparagraph (C).

"(C)(i) In order to obtain the written consent of the government of country of use, the exporter shall submit a written request for consent to export the pesticide for research or experimental use to the Administrator and to the government of the country of use.

"(ii) The Administrator shall transmit to the appropriate official in the appropriate agency responsible for the regulation of pesticides in the country of use—

"(I) such written request;

"(II) a summary of all available information relating to the actual and potential adverse effects of the pesticide for research or experimental use on human health and the environment prepared by the Administrator; and

"(III) a complete statement of the factual basis for the issuance by the Administrator of an experimental use permit under section 5(a) for such pesticide if such permit has been issued for such pesticide.

"(iii) Not later than 60 days after the receipt of a request under clause (ii)(I), the Administrator shall certify whether such request meets the requirements of subparagraph (D).

"(D) A written request for consent that is submitted to the Administrator for transmittal to the country of use, and submitted to the country of use, shall identify the pesticide for experimental use and the active ingredients of such pesticide and include—

"(i) the name of the exporter;

"(ii) the trade names and chemical names of the active ingredients of the pesticide (including any commonly accepted, generic, or abbreviated chemical names);

"(iii) a complete description of the proposed experimental activity, including the formulation of the pesticide, the application rates and methods, the pests that are sought to be controlled, the locations where the experimental use will be made, the size of the areas where the experimental pesticide will be applied, the dates on which the experiment will be conducted, and the manner in which experimental data will be collected and recorded;

"(iv) the name of the persons who shall be responsible for the design and execution of the experiment and for the evaluation of the results of the experiment, along with the qualifications of these persons;

"(v) the name, address and qualifications of the person who will be the representative of the exporter in the counry of use and, if different, the named address and qualifications of the person in the country of use who will supervise the experiment;

"(vi) the location and manner of storage of the pesticide in the country of use;

"(vii) the protective techniques, devices and measures that will be provided to protect the health and safety of workers who will apply the pesticide and the health and safety of persons who live or work near the location of the experiment;

"(viii) a complete description of the results of all information known to the exporter of the toxic effects of the pesticide, including its effects on the pest that is to be controlled, its effects on plants and animals other than the pest that is likely to be controlled (with special reference to plant and animal species at and near the location of the experiment, including any crops or livestock to which the pesticide may be applied), and its chronic and acute effects on human health;

"(ix) a complete description of all information known by the exporter concerning the environmental persistence and fate of the pesticide, including the rate and manner of its degradation, its retention within plants and livestock, and its movement within water supplies;

"(x) such other disclosures as the Administrator may by regulation require;

"(xi) a written undertaking by the exporter to promptly advise the country of use of any changes, revisions or additions in the facts, circumstances and information that relate to the disclosures and that are required by this paragraph;

"(xii) a written certification by the exporter that the pesticide will be used only for experimental purposes, and will not be used for any nonexperimental commercial purpose; and

"(xiii) a written undertaking by the exporter that the exporter will destroy any crops or livestock to which the pesticide is applied or that the crops or livestock will be fed only to experimental animals that will be destroyed and not used for food purposes.

"(E) On the request of the appropriate official of the country of use, the Administrator shall provide a copy of any records in the files of the Administrator that are associated with the issuance of an experimental use permit issued pursuant to section 5(a) for the pesticide for research or experimental use that is the subject of a request under this paragraph if such permit has been issued for such pesticide, except that a complete confidential statement of the composi-

tion of the formula to be tested shall not be required to be provided.

"(F) The appropriate official of the country of use may consent, deny consent, or consent to such request on such terms and conditions as such official determines to be appropriate and shall transmit the response of the government of the country of use to the Administrator and the exporter. If the official sends a written notice of consent to the use of the pesticide for research or experimental use to the Administrator, the Administrator shall, not later than 5 working days after receipt of such notice, notify the exporter of such pesticide. On receipt of such written notice of consent from the Administrator or the country of use, the exporter of such pesticide may export such pesticide in accordance with—

"(i) the terms of the request submitted under subparagraph (D);

"(ii) any term of condition in the written notice of consent issued by the official of the country of use; and

"(iii) the requirements of this section.

"(G) The written notice of consent issued by the official of the country of use shall be subject to public review and inspection.

"(H) A producer or exporter of a pesticide that exports a pesticide for research or experimental use to a country of use pursuant to this paragraph shall be subject to the requirements of section 2(p), 2(q), 7, and 8.

"(b) NOTICES OF REGULATORY EVENTS FURNISHED TO FOREIGN GOVERNMENTS.—

"(1) IN GENERAL.—The Administrator shall, not more than 30 days after the effective date of the actions described in subparagraphs (A) through (D), transmit a notice to the appropriate officials of the appropriate departments or agencies of all countries, and to the office responsible for the International Register of Potentially Toxic Chemicals. The Administrator shall provide such notice each time—

"(A) a registration or a cancellation (whether voluntary or involuntary) or suspension, due in whole or in part to human health or environmental risks, if registration of a pesticide becomes effective or ceases to be effective under this Act;

"(B) a pesticide is first classified for restricted use under this Act;

"(C) a registration of a pesticide is made subject to conditions under section 3(c)(7)(C); or

"(D) a pesticide is made subject to an interim administrative review under section 3(c)(8).

"(2) CONTENTS OF NOTICE.—A notice described in paragraph (1) shall include—

"(A) the factual basis on which the Administrator issued findings in support of any regulatory action described in subparagraphs (A) through (D) of paragraph (1);

"(B) an explanation of the legal significance of such regulatory action;

"(C) information reasonably available to the Administrator in the case of any action that causes a pesticide to be subject to subsection (a)(2)—

"(i) concerning other pesticides registered under section 3 that could be used as an alternative to such pesticide including—

"(I) a complete summary of the regulatory status under this Act of any alternative pesticide; and

"(II) a summary of possible adverse effects on human health or on the environment that any alternative pesticide may cause;

"(ii) nonchemical alternatives to such pesticide;

"(iii) the names and addresses of international organizations that the Administrator determines to be capable of providing information concerning nonchemical alternatives to such pesticide; and

"(iv) the name and address of the office of the Environmental Protection Agency that will, on request, provide additional information concerning any pesticide that is subject to regulatory action, and alternatives to such pesticide.

(b) SUBSECTION (d).—Subsection (d) of section 17 (7 U.S.C. 136o) is amended to read as follows:

"(d) COOPERATION IN INTERNATIONAL EFFORTS.—The Administrator should—

"(1) convene, in cooperation with the Agency for International Development of the Department of State, the Food and Drug Administration of the Department of Health and Human Services, the United States Department of Agriculture, the United Nations Environment Program and agencies, Food and Agriculture Organization, and any other appropriate Federal agencies or departments, not later than 1 year after the date of the enactment of this section, a meeting of representatives of foreign governments, nongovernmental organizations, and other interested parties, and sponsor such additional meetings, as the Administrator determines to be necessary to promote the development and implementation of improved research and regulatory programs for pest management, and improved strategies for sustainable agriculture, including the promotion and development of integrated pest management;

"(2) provide foreign countries with technical assistance to develop comprehensive pesticide regulatory programs; and

"(3) not later than 1 year after the date of enactment of this section, convene, a meeting of representatives of foreign governments, nongovernmental organizations, and other interested parties, and sponsor such other meetings as may be necessary, to actively encourage the adoption of a binding multilateral convention requiring standard, mandatory notice and export control measures for pesticides.".

(c) STUDY.—Subsection (h) of section 17 (7 U.S.C. 136o) is redesignated as subsection (i) and the following is inserted after subsection (g):

"(h) STUDY OF COUNTRIES THAT IMPORT PESTICIDES.—

"(1) Not later than 1 year after the date of enactment of this section, and every 3 years thereafter, the Administrator shall conduct, publish, and transmit to Congress a study of countries that import pesticides from United States exporters and from which the United States imports agricultural commodities, to—

"(A) ascertain the procedures that are implemented by each such country regarding registration, labeling, and training to ensure safe handling, transportation, application, and disposal of pesticides; and

"(B) ascertain the procedures that are implemented by each such country to control residues on foods in order to meet tolerances established under United States law.

"(2) Not later than 1 year after the date of enactment of this section, the Administrator shall conduct a study, in cooperation with the Food and Drug Administration and the Department of Agriculture, on the ability of such agencies to test effectively for residues of pesticides.".

SEC. 1257. CONFORMING AMENDMENTS TO TABLE OF CONTENTS.

The table of contents in section 1(b) (7 U.S.C. prec. 121) is amended—

(1) by adding at the end of the items relating to section 2 the following new items:

"(hh) Country of use.

"(ii) Exporter.";

(2) by striking the items relating to subsections (a) and (b) of section 17 and inserting the following:

"(a) Pesticides or devices intended for export.

"(1) In general.

"(2) Export of pesticides.

"(3) Temporary waiver for the control of communicable disease.

"(4) Temporary waiver in circumstances of famine.

"(5) Statutory construction.

"(6) Additional requirements for the export of certain pesticides.

"(7) Restriction on the export of certain pesticides.

"(8) Labels.

"(9) Special exemption for the export of research or experimental pesticides.

"(b) Notices of regulatory events furnished to foreign government.

"(1) In general.

"(2) Contents of notice.";

(3) by striking the item relating to subsection (d) of section 17 and inserting the following:

"(d) Cooperation in international efforts.";

(4) by striking the item relating to subsection (h) and inserting the following:

"(h) Study of countries that import pesticides.

"(i) Relationship to Solid Waste Disposal Act.".

PART 2—STUDY

SEC. 1258. STUDY OF EXPORTS OF UNREGISTERED PESTICIDES.

(a) Within 6 months of the date of the enactment of this title, the General Accounting Office shall conduct a study of those pesticides for use in connection with agricultural products related to food use or those which have an active ingredient which is the subject of a food tolerance established under section 408 of the Federal Food, Drug, and Cosmetic Act which are exported from the United States and which contain active ingredients that are not contained in any pesticide product registered under section 3 of the Federal Insecticide, Fungicide, and Rodenticide Act. The study shall identify each such active ingredient, the pesticides containing such active ingredient exported from the United States in the calendar year preceding the date of the enactment of this title and their destination, the volume and value of such pesticides, the countries which are members of the Organization for Economic Cooperation and Development in which pesticides containing such active ingredient are registered for use, available information about the health and environmental effects of such active ingredient, the food products on which such active ingredients are likely to be used, and their potential for import into the United States.

(b) In conducting the study described in subsection (a), the General Accounting Office shall use readily available information sources and shall solicit cooperation of persons engaged in exporting pesticides from the United States.

(c) The study described in subsection (a) shall be transmitted to the Speaker of the House of Representatives and the President pro tempore of the Senate within 6 months after the date of the enactment of this title.

PART 3—EFFECTIVE DATES

SEC. 1259. EFFECTIVE DATES.

(a) IN GENERAL.—Except as provided in subsection (b), this subtitle, and the amendments made by this subtitle, shall become effective 6 months after the date of the enactment of this title.

(b) SECTION 17.—

(1) SECTION 17(a)(2)(A)(i).—The provisions of section 17(a)(2)(A)(i) of the Federal Insecticide, Fungicide, and Rodenticide Act (as amended by section 1256) shall become effective 6 months after the date of enactment of this title, except that such provisions shall become effective 36 months after the date of enactment of this title with respect to any pesticide that—

(A) on the date of enactment of this title, has not been the subject of a food tolerance under section 408 of the Federal Food, Drug, and Cosmetic Act, or an application for registration under section 3 of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136a)) all of which have been denied, revoked, canceled, or suspended; and

(B) is the subject of a food tolerance petition under section 408 of the Federal Food, Drug, and Cosmetic Act or an application for registration under section 3 of the Federal Insecticide, Fungicide, and Rodenticide Act that is filed not later than 6 months after the date of enactment of this title.

(2) SECTION 17(a)(2)(A)(ii).—The provisions of subclauses (III), (IV), (VI), and (VII) of section 17(a)(2)(A)(ii) of the Federal Insecticide, Fungicide, and Rodenticide Act (as amended by section 1256) shall become effective 6 months after the date of enactment of this title. The provisions of subclauses (II) and (V) of such section shall become effective 18 months after the date of enactment of this title with respect to any pesticide that is described in such section 17(a)(2)(A)(ii).

(3) EXTENSION.—

(A) The Administrator of the Environmental Protection Agency may grant up to a 1-year extension of the 36-month period described under paragraph (1) for good cause shown if the applicant for a food tolerance petition filed pursuant to paragraph (1)(B) has filed a complete petition in accordance with paragraph (1)(B) that has not been denied by the Administrator and if such applicant has exercised due diligence in pursuing such petition.

(B) The Administrator may grant up to a 1-year extension of the 18-month period described under paragraph (2) if the exporter has submitted the data, summaries, and other information described in paragraph (2) in a timely fashion, and the Administrator has not completed review of the submissions and made final determinations with respect to such submissions.

(c) SENSE OF CONGRESS.—It is the sense of Congress that the Administrator of the Environmental Protection Agency shall, within 1 year of the date of the enactment of this title, promulgate regulations to implement section 17(a)(2)(A)(ii) of the Federal Insecticide, Fungicide, and Rodenticide Act.

SENATE—July 24, 1990

(Legislative day of Tuesday, July 10, 1990)

The Senate met at 9 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. BYRD].

The PRESIDENT pro tempore. The Senate will be led in prayer this morning by the Senate Chaplain, the Reverend Richard C. Halverson.

Dr. Halverson.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

Except the Lord build the house, they labour in vain that build it: except the Lord keep the city, the watchman waketh but in vain.—Psalm 127:1.

Eternal God, Creator, Sustainer, Consummator of history, guide the Senate in its work that its labor be not in vain. As it builds laws to provide social, moral, economic, and fiscal order, let not its building be a house of cards which collapses under the weight of reality. As the Senators struggle with the pragmatism of politics, help them to accept the limitations of legislation at its best, remembering that even the perfect law of God cannot produce a perfect society. And in the awareness of that limitation, grant them grace to allow Thee to intervene and work Your will in and through them. We pray in the name of the Lord and Giver of life. Amen.

RESERVATION OF LEADER TIME

The PRESIDENT pro tempore. Under the previous order, the time of the two leaders has been reserved.

MORNING BUSINESS

The PRESIDENT pro tempore. There will now be a period for the transaction of morning business until the hour of 9:30 a.m., with Senators permitted to speak therein for not to exceed 5 minutes each.

Mr. SPECTER addressed the Chair.

The PRESIDENT pro tempore. The Senator from Pennsylvana [Mr. SPECTER], is recognized for not to exceed 5 minutes.

Mr. SPECTER. Mr. President, point of inquiry. Is there a vote certain set this morning at 11:30 under the unanimous-consent agreement?

The PRESIDENT pro tempore. There is a vote set for the hour of 10:30 a.m. on the Bradley amendment.

Mr. SPECTER. Is there any unanimous-consent agreement for a further vote after the vote at 10:30?

The PRESIDENT pro tempore. Following the vote on the Bradley amendment, there will be 40 minutes on the Cohen amendment, at the completion of which time there will be a vote.

Mr. SPECTER. Was that established, Mr. President, by unanimous consent?

The PRESIDENT pro tempore. It was.

Mr. SPECTER. Mr. President, I had come to the floor this morning for two purposes. One was to inquire on that unanimous-consent agreement and I shall await the arrival of the distinguished majority leader, for the concern that I have is the scheduling of matters for today which had been set for yesterday. I had an extended discussion with the distinguished majority leader on Friday on the subject of the regular order. It was this Senator's position, having been available on Mondays as the majority leader had advised some time ago, that I was concerned about the rearrangement of the schedule to the middle of Tuesday, when President Bush was scheduled to be in Philadelphia and had requested my presence along with my colleague's.

I had said to the majority leader I did not intend to ask for any special dispensation, realizing his own scheduling concerns, but at the same time did not want to see prejudice to this Senator by rearrangement of Monday's business to Tuesday. Having discussed that on Friday and again yesterday, I was somewhat surprised to find the unanimous-consent agreement entered into yesterday at the close of business. I was in the Capitol but not notified. But I shall await the arrival of the distinguished majority leader, Mr. President, to pursue that issue.

NOMINATION OF JUDGE SOUTER

Mr. SPECTER. At this time, Mr. President, I choose to make some observations about the nomination of Judge Souter for the Supreme Court of the United States, with specific reference to the controversy which has arisen as to whether a nominee should be required to answer a specific question. In the context of this nominee's presentation to the Senate and to the country, a controversy has already arisen as to where he stands on the abortion issue.

I suggest, Mr. President, that it is inappropriate to call for any nominee to answer any specific question on two grounds: First, it calls for a prejudgment of an issue and, second, it suggests selling or shading of his vote. Selling or shading of the vote, Mr. President, is especially applicable in the context of this specific nomination where there is such a divided country on the issue of abortion. It has been accurately stated that there has not been such a divisive issue in this country since slavery.

I further suggest, Mr. President, that our President, President Bush, acted entirely properly when he did not ask Judge Souter what his position was on abortion, as the President stated in his announcement yesterday, because to have asked Judge Souter that question would have been to raise the suggestion of looking for an answer favorable to the President's position. In that context, it would be only natural for the nominee to perhaps shade his answer in seeking the job. The nominee might not do that, but that temptation would, obviously, be present.

The nominee owes the country, the Court, the Constitution, his best judgment on constitutional issues, and he should not be confronted at the outset either on questions from the President or from the Senate on how he stands on a specific issue which might affect his getting that job. If the President is to ask the question, the nominee has reason to know what the President's predisposition is and the nominee would be very tempted to shade an answer to sell his vote on the question.

The same process occurs when a nominee appears before the Judiciary Committee, and a Senator may ask a question where the Senator has already expressed himself on the abortion issue, for example. That has been tabbed in some circumstances as "confirmation conversion" when a nominee shades his answer.

So I say, Mr. President, that it would be inappropriate for the nominee to have been asked the question by the President. It would be inappropriate for the nominee to be asked the question by the Senate because the nominee ought to come to that constitutional issue unfettered to render his best judgment on the constitutional interpretation without being called

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

upon to affect his own self-interest for the job.

Mr. President, the second reason why I suggest it is inappropriate to ask how a nominee would cast a specific vote is because it calls for a prejudgment. It is not realistic to answer a question on abortion or any other question in the abstract. When cases come before the Supreme Court of the United States or when cases come before any court, they arise in the context of a specific factual situation. That is when a case is ripe for decision.

The PRESIDENT pro tempore. The 5 minutes of the Senator has expired.

Mr. SPECTER. Mr. President, I ask unanimous consent that I be permitted to speak for an additional 3 minutes.

The PRESIDENT pro tempore. Is there objection?

Mr. NUNN. Mr. President, will the Senator repeat the request?

Mr. SPECTER. I ask unanimous consent for an additional 3 minutes.

Mr. NUNN. Mr. President, what is the standing order of the Senate?

The PRESIDENT pro tempore. The standing order, until 9:30 a.m., there will be a period for the transaction of morning business, with Senators permitted to speak therein for not to exceed 5 minutes each and with the Senator from Georgia [Mr. NUNN] being recognized for 15 minutes.

Mr. NUNN. I will not object for a couple minutes, but I want to have time for my colleague from Virginia to speak, and my remarks are going to take at least 15 minutes. We are pressed for time. As I understand, at 9:30, there will be another item of business.

So I will not object if the Senator will change it to 2 minutes.

Mr. WARNER addressed the Chair.

The PRESIDENT pro tempore. Is there objection?

Mr. WARNER. I should not object, Mr. President, but I ask unanimous consent that I might have 3 minutes following the remarks by the distinguished Senator from Georgia.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Pennsylvania? The Chair hears none. It is so ordered. The Senator is recognized.

Mr. SPECTER. Do I have 2 minutes or 3 minutes?

The PRESIDENT pro tempore. The Senator's request was for 3 minutes.

Mr. SPECTER. I thank the Chair.

The PRESIDENT pro tempore. If the Senator will allow the Chair, is there objection to the request of the Senator from Virginia [Mr. WARNER]? The Chair hears no objection, and it is so ordered. The Senator from Pennsylvania.

Mr. SPECTER. Mr. President, I was developing the point that it is not realistic to answer a question in the abstract because when a matter comes before the Supreme Court or any other court, it is phrased in the context of the specific factual situation and then it is ripe for decision.

When the matter comes before a court, briefs are submitted, presumably read, and argument is heard. Then the Justices confer among themselves. Only at that juncture is a decision made. So that it is not realistic to ask someone how that prospective Supreme Court Justice is going to answer a specific question.

Mr. President, it is my hope that the nomination of Judge Souter would not degenerate into a single issue litmus test. It is understandable that people on both sides of that controversial issue would like to know where Judge Souter stands. But a litigant is not entitled to a judge who is predisposed to his position. A litigant is not entitled to know what a judge's position is. A litigant is entitled to an unbiased judge. But that is all. It is not necessary for a judge to articulate in advance his predisposition on any issue.

There are many very important matters to be considered by a Supreme Court Justice. The baseline question is Marbury versus Madison and the finality of the Supreme Court as the arbiter of the Constitution. Civil rights are very important, as are the questions of Federal-State jurisdiction, criminal rights, and many other issues.

So it is the hope of this Senator, serving on the Judiciary Committee, that the nomination process will not degenerate into a single issue. It is my further hope, Mr. President, that Senators will approach this nomination with an open mind, unlike the proceedings on Judge Bork, where 11 of the 14 Judiciary Committee members had announced positions in advance of the hearings and more than 51 Senators had announced their positions in advance of the time the matter came before the floor of the Senate.

I suggest that while abortion is tremendously important, perhaps the most important issue facing the Court, there are many other issues of great importance and it is not proper to inquire about a judge's specific position on a specific issue because his answer may suggest selling or shading of his vote, and it simply is not ripe for decision in the absence of a specific case.

I thank the Chair for the additional time. I yield the floor.

The PRESIDENT pro tempore. The Senator from Georgia is recognized for 15 minutes under the order.

FISCAL YEAR 1991 DEFENSE AUTHORIZATION BILL

Mr. NUNN. Mr. President, on Thursday, July 12, the Armed Services Committee voted unanimously to report S. 2884, the fiscal year 1991 authorization bill, to the Senate. The bill was filed last Friday and the bill and report are available to all Members.

The majority leader has indicated that he intends to call up this bill next week. In anticipation of the Senate's debate on this important bill, I am going to be making several speeches over the next few days highlighting what I consider to be some of the major features of the bill.

MAJOR THEMES OF THE COMMITTEE BILL

The fiscal year 1991 Defense authorization bill reported by the Armed Services Committee is the most far-reaching defense bill since I came to the Senate in 1972. It is based on a careful assessment of the dramatic changes in the threat to our national security that have taken place in the last year, and the changes that are needed in our military strategy and our defense budget in light of this changed threat.

The bill puts the Defense Department on a responsible and manageable glidepath toward a smaller and restructured defense establishment over the next 5 years. As preparation for the decisions made during our week-long markup, the committee conducted 64 hearings and received testimony from more than 220 witnesses.

The committee's recommendations can be grouped under five major themes:

First, maintaining nuclear deterrence with forces lower in levels and more stable in structure than those currently proposed at the START negotiations;

Second, shifting to a reinforcement strategy in which the United States would reduce its forward-deployed forces, encourage specialization with its allies, and emphasize a reinforcement capability, including the use of Reserves to augment the remaining forward-deployed forces;

Third, making greater use and more innovative use of the National Guard and Reserve forces;

Fourth, adjusting the readiness of certain forces to reflect the changed threat, the amount of warning time, the likelihood that the forces will go into action, and the availability of airlift and sealift to transport these forces of the United States to the battle;

And finally, developing a stable and effective resource strategy around the theme suggested by former Ambassador David Abshire: "Think smarter, not richer."

Mr. President, in preparation for our markup, the Armed Services Committee adopted a specific set of markup guidelines designed to carry out these major themes. I ask unanimous consent that these guidelines be printed in the RECORD at this point.

There being no objection, the guidelines were ordered to be printed in the RECORD, as follows:

GUIDELINES FOR THE SENATE ARMED SERVICES COMMITTEE'S MARKUP OF THE FISCAL YEAR 1991 DEFENSE AUTHORIZATION BILL

Reflect changes in the threat
Emphasize five-year approach
Stress long-term
Identify follow-on assumptions and budget implications for recommended changes
Frame adjustments in terms of broad strategic goals and objectives, such as:
Maintain nuclear deterrence with forces lower in level and more stable in structure than those currently proposed at START
Adjusted readiness of selected forces
Emphasize lighter, more lethal, more mobile forces
Retire older, single purpose combat systems
Maintain technological superiority
Minimize impact of the transition to lower force levels on military members and their families
Enhance utilization of the National Guard and Reserve components
Encourage constructive competition for roles and missions
Improve management of defense programs
Endorse as much as possible of DoD's Management Improvement Act
Fly before buy
Product improvements
Streamline headquarters and consolidate organizations
Avoid micromanagement of defense programs
Eliminate reporting requirements on DoD
Minimize line item adjustments to the DoD budget

DEFENSE MANPOWER

Mr. NUNN. Mr. President, I think inevitably the main focus in the debate on the floor next week is likely to come in the area of big strategic programs like SDI, B-2 bomber, and the MILSTAR Satellite Program.

But in my view, the committee's recommendations in the area of manpower and personnel are the most important parts of this bill. One of the committee's highest priorities throughout our markup was to sustain and, where possible, enhance the well-being and the combat effectiveness of our military personnel as the overall size of the military services is reduced substantially over the next 5 years. With the direction and authority provided in this bill, the military services can now begin planning for the military force structure they will have at the end of 5 years, assuming of course our provisions become law of the land.

PERSONNEL STRENGTH LEVELS

Mr. President, the committee authorized an end strength for each of the military services for fiscal year 1991 and also for fiscal year 1995, the last year of the current 5-year defense program. We took this unusual step of looking down the road 5 years in order to give each of the military services a clear roadmap of what we thought their strengths should be. In this way, the military services can begin planning now to meet this long-term strength level instead of managing on a year-to-year, ad hoc basis.

The fiscal year 1995 end strengths for the military services are based on the reduced threat and the change in mission and force structure that the committee expects the military services to make in response to this changed threat.

For the Army, the end strength at the end of 5 years is 510,000, which is 32 percent, or 234,200 below the current fiscal year level of 1990.

For the Navy, the fiscal year 1995 authorized strength is 500,000, which is 15 percent, or 90,500 below the current level.

For the Marine Corps, the fiscal year 1995 authorized strength is 177,000, which is 10 percent, or 19,700 below the current level.

For the Air Force, the fiscal year 1995 fiscal year authorized strength is 415,000, which is 24 percent or 130,000 below the current level. The Air Force strength in particular reflects the committee's decisions to shift certain missions to the National Guard and Reserve.

These proposed fiscal year 1995 strength levels are generally in line with the 25-percent reduction in force structure which Secretary Cheney recently outlined for the budget summit. These reductions assume, but do not necessarily require, force structure reductions in the Army of at least 6 active divisions; a reduction of at least 111 Navy ships, including 2 aircraft carriers; 2 carrier air wings; and the deactivation of at least 11 active air wings in the Air Force.

The strengths authorized in the bill for fiscal year 1991 put the military services on a guide path to achieving the strengths authorized for fiscal year 1995. The fiscal year 1991 strengths for the military services are 100,000 below the fiscal year 1990 level:

The Army's fiscal year 1991 strength is 704,170, which is 40,000 below the current level;

The Navy's fiscal year 1991 strength is 568,500, which is 22,000 below the current level;

The Marine Corps' fiscal year 1991 strength is 193,735, which is 3,000 below the current level; and

The Air Force's fiscal year 1991 strength is 510,000, which is 35,000 below the current level.

Based on the information we have received in our hearings, the military services should be able to achieve these reductions in active duty end strength without involuntarily separating career personnel short of retirement.

For the National Guard and Reserve, the bill freezes fiscal year end strengths for each of the components at the fiscal year 1990 levels. This recommendation is part of a larger initiative taken by the committee to increase our reliance on National Guard and Reserve forces. I will have more to say on this larger initiative—and I am sure Senator WARNER will also—in the next several days.

The overall civilian personnel strength authorized for the Defense Department in fiscal year 1991 is 1,048,634, which is 47,107 below the administration's request. A large portion of this reduction is the result of the hiring freeze which Secretary Cheney put in place for the Defense Department last January.

REGULATED STRENGTH REDUCTION PROCEDURES

As the overall size of the military services is reduced, it is very important that the military services retain the essential cadre of experienced career enlisted and officer personnel which are the backbone of the military services.

The committee approved legislation requested by the Defense Department to allow the military services to reduce senior officer strength over the next 5 years. These authorities include more liberal selected early retirement and voluntary retirement measures.

However, the committee also made it clear that as the force is reduced, the midcareer officer and enlisted force must be the last segment of the force to be cut. The bill contains a provision specifying the order in which the military services should make strength reductions over the next 5 years.

First, the military services must set accession levels for new recruits at the level necessary to sustain the reduced fiscal year 1995 strength levels authorized in this bill.

Second, the military services must reduce the retirement eligible population consistent with the requirement for senior grade officers and enlisted personnel at the fiscal year 1995 strength levels.

Third, the military services must reduce the first-term, noncareer population consistent with the requirement for junior officer and enlisted personnel at the fiscal year 1995 strength levels.

And fourth, only after going through the first three steps will the services be able to reduce the midcareer personnel to reach the authorized strength levels for any given year.

Mr. President, this process ensures that the valuable and experienced midcareer segment of the military services is the last place that will be affected by the reduction in the size of the military services. It also ensures that the Defense Department will not hollow out the segment of the force most crucial to maintaining the fighting ability of the military services.

INVOLUNTARY SEPARATION COMPENSATION AND TRANSITION INITIATIVES

Even with this carefully regulated process for strength reductions, the reduction in the size of the military serv-

ices over the next 5 years will inevitably require some we hope very limited involuntary separation of career military personnel short of retirement. It is impossible at this point to say how widespread these involuntary separations will be. We hope they will not involve large numbers of midcareer personnel.

The committee is very mindful that the people serving in the All Volunteer Force today volunteered for service and are in uniform because they want to be. This is particularly true of career military members, who have made a commitment to serve their country in a dangerous profession for a full career. It is especially painful for the committee that some of these midcareer personnel will be asked to leave their service over the next 5 years before becoming eligible for retirement benefits.

In recognition of this fact, the committee bill contains a package of new compensation and benefits for military personnel who are involuntarily separated from active duty due to reductions in strength levels over the next 5 years. This package increases the current level of separation pay for officers, and for the first time authorizes separation pay for enlisted personnel. This separation pay will be provided to officers and enlisted personnel who are involuntarily separated with more than five but less than 20 years of service. This transition package also provides affected military members with medical transition benefits; unemployment compensation equal to that provided in the civilian sector; vesting in education benefits under the Montgomery GI bill; transition and job search services; and transportation benefits for resettlement to any location within the United States.

Mr. President, this package of compensation and transition benefits is an important effort to keep faith with military members. It provides a safety net for those military personnel who have planned on a career in the military but who may now be required to leave active duty through no fault of their own before they become eligible to retire.

REDUCTIONS IN OVERHEAD

As the size of the military services is reduced, it is important that the overall administrative structure of the services is also reduced. The committee bill includes a ceiling on officer strength in the military services that is consistent with the current ratio of officers to enlisted personnel. The bill also requires a 20-percent reduction in flag and general officers and in senior civilian personnel in the Defense Department over the next 5 years.

There are several other initiatives in the bill to reduce overhead in the Defense Department. In an effort to simplify and streamline the acquisition process, the committee recommends a 20-percent reduction in the Defense acquisition work force over the next 5 years. There is a similar 5-year, 20-percent reduction in management headquarters staffing. This reduction should be carried out by eliminating entire headquarters functions, not by simply reducing each and every function by a uniform percentage. Finally, the committee bill directs a 25-percent reduction in the number of personnel in intelligence-related organizations over a 5-year period, beginning in fiscal year 1992.

SENIOR OFFICER POSITIONS FOR THE JOINT STAFF

A final manpower and personnel issue I want to highlight is the provision in the bill that would authorize the President to designate up to six positions within the Joint Staff to be exempt from the overall ceiling on the number of three- and four-star officers in the military services.

This provision is based on a request from the Secretary of Defense and the Chairman of the Joint Chiefs of Staff for this authority. The committee believes that this provision will encourage the military services to nominate their best officers to fill the key positions on the Joint Staff, and will also provide the Chairman of the JCS greater flexibility in selecting officers recommended by the military services to fill these key positions.

CONCLUSION

Mr. President, the fiscal year 1991 Defense authorization bill marks a watershed. It sets the military services on a glide path to a smaller defense establishment based on the changes in the threat and a revised military strategy.

In the area of defense manpower, the committee worked very hard to establish clear guidelines for managing personnel programs not just in fiscal year 1991, but over the next 5 years. I think it is very important that military members and their families understand that the reductions in the defense budget are not directed at them personally. The paradox is these reductions are possible because they have done their job well. I think all of us should keep this in mind.

The American people understand and appreciate the fact that the sacrifices and dedication of a generation of men and women in uniform have helped hasten the end of the cold war and reduced the likelihood of superpower confrontation. It was in recognition of this service that the committee worked very had to minimize the impact of force reductions on military members and their families.

I want to congratulate the chairman and ranking minority member of the Manpower and Personnel Subcommittee, Senator GLENN and Senator MCCAIN, for their excellent and tireless work in this area.

Mr. President, I will have more to say on other areas of the fiscal year 1991 Defense authorization bill in the days ahead.

Mr. President, if I have remaining time, I will yield it to the Senator from Virginia.

The PRESIDENT pro tempore. The Senator has 1 minute and 20 seconds remaining, which he yields to the Senator from Virginia [Mr. WARNER] who is now recognized for 4 minutes and 20 seconds.

Mr. WARNER. Mr. President, I thank the Chair.

Mr. President, I commend the distinguished chairman of the Senate Armed Services Committee. Under his leadership, with the full cooperation in almost every respect of the minority Senators and minority staff, I think we have crafted a very good bill to bring to the floor of the Senate next week. It sets down a realistic marker as to the amount that we can cut back our Nation's defense and remain within an acceptable level of risk.

I am glad that the chairman emphasized that throughout the deliberations we kept our eye on one goal, namely, the men and women who proudly serve in uniform in our Armed Forces. We are trying in every respect to minimize the hardship that will be inflicted on them as a consequence of the build-down of our defense structure.

On the first page, Mr. President, the chairman referred to dramatic changes in the threat to our national security. I urge the chairman in the future to focus on those dramatic changes—having occurred in really only one place on the globe, and that is central Europe.

All too often, as we look at the impetus behind cutting defense today, the dramatic changes in central Europe are driving calls for changes in the Pacific Rim, in the Persian gulf, in the Middle East, and in other areas of the world.

I believe during the course of our deliberations we will point out there has not been a dramatic change in the threat in terms of lessening the threat. Indeed, this Senator and others are of the opinion that the Middle East presents a more serious situation today than in years past.

Further, in his enumeration of the various goals, the chairman did not put quite the enphasis I would on the doctrine of "fly before buy." It is likely to be incorporated in his last point. But I think the committee properly believes that, with the receding threat posed by the Soviet Union, some of our major programs today, which have as a primary goal deterrence against the Soviet Union, could be developed and researched over a longer period of time.

This country has witnessed bitter experiences with the B-1 bomber and with other systems, and we do not

want to see that repeated with the current major items now in research and development and at beginning stages of production.

The B-2 is currently the subject of a lot of controversy. This Senator believes the principal mission of the B-2 is to be available and on alert at all times thereby deterring any thoughts by the Soviets of aggression with the use of nuclear weapons. We should not try to overly define the mission. The cost of deterring the Soviet military planner from even considering a military attack on the United States is not cheap—but if it works, it is worth the price. We should remain on the present course, as laid down by the Senate Armed Services Committee, to provide for both continued research and development and minimal production of the B-2. The B-2 is a prudent insurance policy against nuclear war.

The distinguished chairman of the House Armed Services Committee, with whom I had a debate earlier this morning on national television, is taking steps to kill the program. But at the same time, he has taken what I regard as a vague position in which he says, put the production in mothballs. I challenge the chairman of the House Armed Services Committee, if he really intends to proceed down that line, to inform the American public of the very real additional cost of mothballing and then restarting the production facilities for the B-2 bomber. I challenge Mr. ASPIN to describe how he would propose to recreate the team of highly skilled workers that has thus far put together that system, once that team is abolished by his actions. I challenge Mr. ASPIN to define how he would propose to quickly enhance our deterrent if changes in the world should suddenly take a turn for the worse.

The PRESIDENT pro tempore. Time of the Senator has expired.

Mr. MCCAIN. Mr. President, I wish to thank the chairman of the Senate Armed Services Committee, Senator NUNN, and the ranking member, Mr. WARNER, for supporting the insertion of S. 2663, the McCain comprehensive transition plan into the Defense Authorization Act of 1991.

It is indeed important to recognize that this force drawdown will adversely affect those men and women who wished to make the armed services a career and now will not be allowed to. These men and women made a conscious commitment to serve the citizens of this great country by volunteering for this oft thankless career.

As has so eloquently been stated by my esteemed colleague from Georgia, Senator NUNN, we cannot let our search for a "peace dividend" result in our military personnel being forced from the armed services without proper protection and recognition of their service as volunteers. These men and women volunteered to serve our Nation, and it is due to their valiant efforts that we are now seeing a thaw in the cold war. We cannot now leave them the unfortunate victims of our rush to cut the defense budget.

That is why I worked closely with the military coalition in drafting the comprehensive transition plan that became S. 2663, and that now will be part of the fiscal year 1991 Defense authorization bill. Mr. President, I am very pleased that all the key provisions of S. 2663 were included in the Defense Authorization Act.

Additionally, I am deeply grateful to the chairman of the Subcommittee on Manpower and Personnel, Senator GLENN, for his help in ensuring that our gallant men and women in uniform were not forgotten. I also want to thank the rest of my esteemed colleagues on the Senate Armed Services Committee for lending their support. Finally, I must reiterate my gratitude to the military coalition for helping to draft this legislation and for their unswerving commitment to the well-being of the men and women of the armed services.

Mr. President, I yield the floor.

ABUSES OF THE COPYRIGHT DOCTRINE OF WORK MADE FOR HIRE

Mr. COCHRAN. Mr. President, hearings last fall on my work made for hire bill, S. 1253, produced evidence of abuses by publishers in their dealings with freelance creators. One of those abuses is the practice of requiring a creator to sign a blanket work for hire agreement, under which the creator surrenders not only his rights to the commissioned work, but also to all future works produced for the commissioning party.

My bill explicitly states the intent of Congress to forbid this overreaching practice. Congress intended the 1976 Copyright Act to allow a particular commissioned work to be made for hire if the parties so agreed in writing after negotiation of terms relating to the work in question. One of those terms, compensation, would be based necessarily on the parties' assessment of the value of the copyright in that work over time. Where the work for hire contract does not relate to any particular work, but rather to all future undefined services, there is no meaningful opportunity to negotiate fair compensation for the creator. Not only is the value of the services unknown; the precise identity of the copyrightable works resulting from those services cannot be known.

This practice is not confined to publishers. I am today placing in the RECORD two recent examples of blanket work for hire contracts used by commissioning parties outside the publishing industry. Both examples illustrate the need for better protection of the rights of freelance creators.

One of the agreements has been used by Toyota Motor Manufacturing, U.S.A., Inc., to extract work for hire concessions from freelance photographers. The Toyota agreement provides that all photographic services provided by the freelancer shall be considered works for hire. At no point does the contract identify or specify those services; it indiscriminately covers all work produced by the photographer pursuant to subsequent letter agreements over the course of his relationship with Toyota. The photographer is forbidden to reproduce his work for his own purposes, even if those purposes have nothing whatsoever to do with Toyota's business.

Since Toyota's work for hire provision applies to unidentified services to be rendered in the future, there is no way of knowing what the value of the copyrights in the future photographs will be. The fee paid to the photographer in exchange for this blanket surrender of rights does not, indeed cannot, bear any relationship to the value of the unknown future copyrightable works.

The second example is even more offensive because of the misleading statements accompanying it. In August 1989, Lee Hill, Inc., a marketing and communications firm in Chicago, mailed to freelance photographers a form letter stating that:

> Due to recent judicial interpretation, it is required that all individuals and studios who participate in the creation and design of artwork or promotional materials for Lee Hill, Inc., sign the attached form.

The form was a blanket work for hire agreement applicable to all projects, was effective immediately, and pertained to existing purchase orders as well as future transactions.

The suggestion that the Supreme Court decision on the Reid case somehow required photographers to sign blanket work for hire agreements was obviously meant to induce them to sign a form contract without questioning its legality or scope. The firm was unfortunately following typical current practice: Any freelance photographer interested in getting future assignments must agree that any or all work produced in the course of those assignments are works for hire in which the photographer has no rights.

Even more outrageous is the fact that the Lee Hill contract was a blanket work for hire agreement that covered not only future, but also past projects undertaken by the photographer. What would the photographer be paid for this wholesale divestiture of rights? Not a cent. He would simply have the opportunity * * * to receive future assignments from us.

These practices violate the spirit and intent of the 1976 Copyright Act. Un-

fortunately, there is no express prohibition against them in the language of the law. Experience over the 12 years the act has been in effect has shown that these practices will stop only if we amend the definition of "work made for hire" to require that work for hire terms be negotiated on a work-by-work basis. That is one of the goals of S. 1253, and I urge Senators to join me in passing that legislation to put an end to the practices that are destroying the ability of freelance creators to survive.

I ask unanimous consent to have printed in the RECORD at this point the work for hire contracts used by Toyota Motor Manufacturing, U.S.A., Inc., and Lee Hill, Inc.

There being no objection, the contracts were ordered to be printed in the RECORD, as follows:

WORK FOR HIRE AGREEMENT

This Work for Hire Agreement (this "Agreement") is entered into as of the last date indicated below by and between Toyota Motor Manufacturing, U.S.A., Inc., a Kentucky corporation ("TMM") and ———— (the "Contractor").

TMM and the Contractor hereby agree as follows:

1. TMM hereby retains the Contractor to perform, and the Contractor hereby agrees to provide, photographic and/or video services to be more particularly described from time to time in letter agreements to be executed by parties (the "Services"). The letter agreements, which together with this Agreement shall legally bind the parties, shall describe in detail the Services to be provided by the Contractor, the time schedule for providing the Services and the compensation to be paid to the Contractor in exchange for providing the Services.

2. The parties acknowledge that the Services will be undertaken by the Contractor at the request of TMM and that TMM will have the right to supervise and accept or reject recommendations made by the Contractor relating to the Services. Accordingly, the Contractor will perform the Services on a "Work For Hire" basis, as that term is defined in 17 U.S.C. S101. All photographs, prints, plates, tapes, films, videos, negatives, transparencies, layouts or other products produced by the Contractor pursuant to this Agreement or any subsequent letter agreements between the parties shall be the exclusive property of TMM. Except as otherwise specifically authorized by TMM in writing, the Contractor shall not make any copies from or otherwise reproduce any photograph, print, plate, tape, film, video, negative transparencies, layout or other product created pursuant to this Agreement or any subsequent letter agreement between the parties. The Contractor shall deliver all photographs, prints, plates, tapes, films, videos, negatives, transparencies, layouts or other products produced pursuant to this Agreement and any subsequent letter Agreement to TMM within five days of receipt of written request from TMM.

3. In providing the Services the Contractor may be exposed to or have access to machinery, designs, processes, present or future engineering, developmental efforts or operation, research and/or other manufacturing trade secrets relating to TMM's and its affiliates' business which are proprietary in nature ("Proprietary Information"). All Proprietary Information and all photographs, prints, plates, tapes, films, videos, negative transparencies, layouts and other products produced by Contractor pursuant to this Agreement and any subsequent letter agreements between the parties shall be deemed confidential and shall not be disclosed by Contractor or its employees to any person without TMM's prior written consent, which may be withheld in TMM's sole discretion.

4. This Agreement shall remain in effect until terminated by either party by delivering written notice to the other party at least thirty (30) days prior to the effective date of termination. The obligations of the Contractor described in paragraphs 2 and 3 of this Agreement shall survive the termination of this Agreement and any subsequent letter agreement between the parties.

5. This Agreement supercedes all prior contracts and understandings between the parties and may not be modified, changed or altered except by further written agreement signed by both parties.

6. This Agreement shall be binding upon and shall inure to the benefit of the parties, their respective legal representative, heirs, successors and assigns.

7. The terms of this Agreement shall be governed by the laws of the Commonwealth of Kentucky.

In Witness Whereof, the parties have executed this Agreement the last day, month and year set forth below.

MARKETING COMMUNICATIONS, INC.,
Chicago, IL.

DEAR ——: DUE TO RECENT JUDICIAL INTERPRETATION, IT IS REQUIRED THAT ALL INDIVIDUALS AND STUDIOS WHO PARTICIPATE IN THE CREATION AND DESIGN OF ARTWORK OR PROMOTIONAL MATERIALS FOR LEE HILL, INC. SIGN THE ATTACHED FORM.

This requirement is effective immediately and pertains to existing purchase orders as well as future transactions.

Please return the signed form to:
Theo Djan,
Lee Hill, Inc.,
25 W. Superior,
Chicago, IL 60611.

Your prompt response will be appreciated. Should you have any questions please call Theo Djan at 312-266-9090.

Sincerely,

SUSAN MITCHELL,
Lee Hill, Inc. Controller.

BLANKET WORK FOR HIRE/RIGHTS AGREEMENT

From time to time, Lee Hill, Inc. ("LHI") may retain ("you") to work on projects. For such work, LHI agrees to compensate you on a project by project basis and at mutually agreed upon prices for services and materials (including artwork) supplied by you to LHI.

In consideration of such payment, you agree that all the materials you produce on all projects for LHI shall be "works made for hire" under the copyright law and belong to LHI. If any materials you produce for LHI do not qualify as "works made for hire," you hereby sell, assign and grant to LHI all now and hereafter existing rights, title and interest in and to those materials, including, but not limited to, the copyright and all rights under the copyright law. In addition, you agree that all materials you produce for LHI are commissioned works which LHI may alter without your consent.

In consideration of the opportunity for you to receive future assignments from us, and in consideration of any payments made by us for those assignments, you agree to grant LHI all the rights described in the preceding paragraph with regard to other materials you supply or have supplied to us.

Please indicate your agreement below and return this letter to .

Very truly yours,

OHIO FLOOD VICTIMS

Mr. GLENN. Mr. President, I rise today to extend my deepest sympathies to the families and friends of those persons whose lives were lost during last month's devastating flood in eastern Ohio. As I traveled through Shadyside and surrounding areas in the wake of this tragedy, I was deeply shocked by the sheer devastation wrought by the flood's raging waters. On June 14, in a matter of minutes, familiar everyday life was without warning turned upside-down. Countless citizens of Belmont and Jefferson Counties were suddenly without homes, businesses, or places of worship. Where town fixtures stood just moments before, now there were only scattered reminders of their former functions.

More disturbing than the physical destruction was talking to families who were still awaiting news of their relatives and friends. I was struck by the agonizing uncertainty these people must have been experiencing as they nervously awaited the word of their loved one's fate. Tragically, 26 families ultimately received the news that their loved ones had lost their lives in the flood.

I would now like to read the list of those 26 persons. Edna Andrecht, John Andrecht, Scott Balsei, Roger DeNoon, Mary Gatten, Stephen Gatten, Timmy Gatten, Sophia Glazewski, Bart Graham, Debbie Graham, Don Grimes, Mary Grimes, Danny Humphrey, David Humphrey, Sue Humphrey, Jerry Krupa, Patsy Krupa, Novalee Mellott, Dorothy Moore, Jim Moore, Kerri Polivka, Rose Ramsay, Donald Webb, Tiffany Webb, Jim West, and Naomi West.

While I join in mourning these lives lost, I would also recognize the efforts

of those countless persons throughout Ohio and the United States who donated food, clothing, money, and time to ensure that the level of loss to life and property was not even worse than what occurred. Likewise, the heroic efforts of the rescue workers will always be remembered.

The people of Shadyside, Dillonvale, and surrounding areas are just now beginning the long and painful task of rebuilding their lives in the wake of this devastating and unexpected tragedy. I stand ready to work with the appropriate Federal and voluntary relief agencies in providing Jefferson and Belmont Counties with quick and efficient technical and financial assistance. The void left by the victims of this tragedy cannot be filled. However, the generosity and good will shown by countless persons and organizations in response to the flood will continue. Hopefully, this will make the healing of spirits and the renewing of livelihoods a little quicker and a little easier.

CONGRESS MUST RENEW GREAT LAKES SET-ASIDE

Mr. COATS. Mr. President, I rise to express my concern over the impact that the expiration in 1989 of the Great Lakes set-aside has been having on Indiana farm exports, the Great Lakes shipping industry, and the Port of Indiana.

In the 1985 farm bill, the Congress expanded the U.S.-flag cargo preference from 50 to 75 percent on all Government food aid cargoes. Recognizing the devastating blow that this action would have on midwestern farm producers due to the fact that Great Lakes ports are serviced primarily by foreign vessels and Public Law 480 cargoes would be diverted to other ports, the Congress also enacted into the 1985 law a Great Lakes set-aside under which approximately 4 percent of the total Public Law 480 Program—245,000 tons a year—would be preserved for the Lakes ports regardless of what flag merchant vessels carry the shipments. Unfortunately, while the 75-percent cargo preference remains in force indefinitely, the Great Lakes set-aside expired at the end of 1989.

The failure of Congress to extend the set-aside threatens to seriously damage Indiana agriculture, labor, the Port of Indiana and other businesses engaged in providing food shipments for the Public Law 480 Food for Peace Program.

Mr. President, I ask unanimous consent that the text of an article from the Journal of Commerce on the impact of the decline in food aid is having on Great Lakes ports be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DECLINE IN FOOD AID WORRIES GREAT LAKES PORTS

(By Kevin Commins)

CHICAGO.—A sharp reduction in government aid cargoes may imperil what otherwise should be a stable Great Lakes shipping season, U.S. port officials say.

A law expired last year that had guaranteed Great Lakes ports a percentage of cargoes shipped under Public Law 480 Title II, the Food for Peace program. The result will be a much smaller portion of the PL-480 pie.

"We'll definitely see less this year," said a spokesman for the Port of Duluth, Minn. "That will hurt us, Milwaukee, Toledo and Chicago."

At this time last year, about 50 million pounds of PL-480 Title II had been allocated to Great Lakes ports. So far this year, there have been no allocations to the Lakes.

The reduction in PL-480 allocations could have far-reaching effects on the Great Lakes, reducing the number of vessel calls and limiting other types of cargo movements, some port officials say.

Frequently, PL-480 cargoes act as a magnet for the Great Lakes system, attracting vessels that normally wouldn't come into the Lakes. Often, these vessels carry inbound cargoes and depart with additional outbound cargoes.

"If we have a reduction in PL-480 cargoes, it hurts the entire system," noted Dan Pappas, assistant port director at Burns International Harbor in Indiana.

Under the 1985 farm bill, Great Lakes ports were guaranteed a minimum volume of PL-480 cargoes as part of a compromise package that also increased the U.S.-flag requirement on government relief cargoes from 50 percent to 75 percent. Since the Great Lakes have limited U.S.-flag service, expiration of the "set-aside" puts the Lakes at a considerable disadvantage to other U.S. seacoasts, Lakes officials say.

Most Great Lakes port officials would like to see a continuation of the set-aside or a return of the U.S.-flag requirement on relief cargoes to 50 percent.

Extension of the Great Lakes set-aside for 1991 and beyond will be discussed this year as part of the congressional debate on the new farm bill.

Apart from the prospect of a reduction in PL-480 cargoes, most Great Lakes port officials predict a stable year in 1990, with grain and steel imports holding steady.

A relatively low dollar, continuation of U.S. export subsidies and strong overseas demand should ensure that U.S. grain exports remain reasonably strong. As always, however, there are a number of uncertainties.

"There's so many things that can affect grain that we don't know about: weather, how much the Russians will buy, whether there will be problems again on the Mississippi River," a spokesman for the Port of Duluth said. "It's still a question mark."

Last year, no Soviet ships visited Duluth. Six had called the previous year. The port hopes that a return of Soviet vessels in 1990 will enable it to bolster bulk grain exports, which fell off considerably in 1989.

Some Great Lakes ports are concerned that steel exports—a major growth cargo on the Lakes in the last two years—may weaken somewhat this year.

Last year, steel exports through the St. Lawrence Seaway increased 422 percent to 1.5 million metric tons, breaking the 1982 record of 1.25 million tons.

Cargo volumes moved by Canada's Great Lakes Carriers

[In millions of metric tons]

Year	*Volume*
1989	74.0
1988	80.7
1987	76.5
1986	72.1
1985	74.8
1984	84.6
1983	78.9

Source: Canadian Shipowners Association.

Helen Brohl, marketing director of the Illinois International Port in Chicago, thinks export steel volume at Chicago docks could soften somewhat in 1990, but over all, she expects this year will be about equal to 1989.

Similarly, the Port of Detroit is concerned that steel exports may drop off following a big increase in 1989. Otherwise, 1990 will be very similar to 1989, a spokesman said.

At Burns International Harbor, which lies adjacent to several steel mills, there is no sign that the steel industry or steel exports are slowing down, Mr. Pappas said.

Mr. COATS. Mr. President, either the cargo preference requirements must be eliminated, the Great Lakes set-aside must be renewed, or some safety net like the set-aside must be enacted. Otherwise the food producers and workers, the port and the businesses and workers that depend on the exporting of agricultural products for their livelihood will be threatened. That is why I cosponsored the Great Lakes Maritime Trade Act and why I am prepared to support other efforts to remedy this problem which could have a devastating economic impact on Indiana and on other States in the Great Lakes region. I hope that this matter will be addressed in the pending legislation.

HUMANITIES ON THE HILL

Mr. STEVENS. Mr. President, on May 3 I had the opportunity to attend the annual Humanities on the Hill congressional breakfast sponsored by the Federation of State Humanities Councils. The federation, founded in 1977, is the membership association of the 53 State Humanities Councils. Through its program of research, conferences, collaborative projects, and communication on issues of public interest to Members, legislators, and others, it provides support for the State Humanities Councils and strives to create greater awareness of the importance of the humanities in public and private life.

The State councils continue to expand and develop the remarkable grassroots network that brings humanities programs to more than 25 million Americans each year. Working with volunteer boards and committed to the idea that every citizen should have the opportunity to develop the life of the mind, the councils sponsor programs ranging from large conferences to teacher institutes to reading

and discussion groups, lectures, exhibits, and films.

Among many of the activities of the federation is the Humanities on the Hill breakfast brings together representatives from the State councils with Members of Congress and their staff as another effort of promoting a further dialog of the humanities in America.

The annual Humanities on the Hill breakfast, which grows in numbers and reputation each year, offers an opportunity for State Humanities Council representatives to focus national attention on the work of the councils and on issues that deserve support.

At this year's breakfast, Dr. James Billington, the Libriarian of Congress, addressed the group on "The Future of the U.S.S.R." Dr. Billington's address could not have come at a more poignant time with the dramatic developments occurring in the Soviet Union and throughout Eastern Europe. I believe he presents an excellent commentary on the recent moves toward democracy in the world today and how it reflects on current events here in America.

I invite my colleagues to read Dr. Billington's speech which I am inserting into the CONGRESSIONAL RECORD. I think it will provide some valuable insight for all of us to ponder and I strongly encourage my colleagues to consider its significance.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

RUSSIA: HISTORIC CONTINUITY OR RADICAL CHANGE?

(By James H. Billington, the Librarian of Congress)

No one, that I know of, predicted the specific course of change currently underway in the U.S.S.R.; and no one, I suspect, can predict the exact outcome. More than a decade ago, however, I did write that, when a new generation of leaders arrived, there could be a new thrust towards a market economy, a serious parliament, and a relegitimation of religion.

I suggested this not because I saw the system then moving in a benevolent direction, but because I have always seen Russia in humanistic terms as one of those dolls-within-dolls, a matryoshka: a society with hidden layers inside that contain latent creativity. I believed that there was an inner face of aspiration different from the outer face of power that would remain hidden from view until the survivors of the Stalin generation like Brezhnev and Chernenko died.

Layering in of the U.S.S.R. today, Gorbachev himself may be something of a matryoshka—containing within one package at least three different faces. So, after looking briefly at the historic U.S.-Soviet relationship, I want to discuss three faces of Gorbachev and focus on his Russian face.

There are striking similarities between the U.S.S.R. and the U.S.A. Both are multiethnic, continent-wide civilizations. The Anglo-Saxons have about the same slight plurality in America as the Great Russians have in the Soviet Union. Both nations are partly European and partly special products of a vast frontier that leads beyond. Both were primarily religious, rural civilizations that have moved on to largely urban and secular ways of life. Both colonized a continent by moving out on frontiers—ours moving west across North America, theirs east across and beyond Siberia—the two meeting at the Russian outpost of Fort Ross north of San Francisco at the beginning of the 19th century. We have, however, had remarkably little direct contact with Russia. The USA had extensive economic relationships with both the Russian Empire and the U.S.S.R. before we had formal political relationships (not until 1809 with the old Russian Empire, and 1933 with the U.S.S.R.). We have never fought the Russians, but never exactly fought alongside them. Even when we were allies in two world wars, we had no common front and relatively little contact.

By and large, the Russians did not come to America as others did from western Europe and Africa, and we did not go to them as we did to East Asia.

There has been (even to this day) very little immigration to the U.S.A. from the dominant Great-Russian nationality. It was largely the minority nationalities of the old Russian Empire (Finnish, Polish, Ukrainian, Jewish) that came here late in the period of great immigration. But, since the ethnic Russians were largely Christians, we did not have the missionary contact with them that we did with China in ways which led to a measure of understanding and even affection.

We have, in truth, had shockingly little contact over the years with our rival superpower. This has fostered mutual ignorance which has made the differences between us even more acute.

Politically, the Russian state has always been a centralized autocracy in which the key institution has been the military and the key modern leader, the engineer. The United States is a decentralized federal democracy in which the key institution has been the productive economic enterprise and the key modern leader, the lawyer.

Ideologically, both societies have been legitimized by revolutions. The United States and the Union of Soviet Socialist Republics are among the very few countries in the world whose formal names do not carry any ethnic-national designation. They are both the product of revolutions based on universalistic ideas. The Soviet Union's revolution was for equality to obtain social rights in hierachical Eastern Europe. The United States' revolution was for liberty to sustain civil and property rights in an open, entrepreneurial North America.

Psychologically, there is also a difference. Both feel unique—and profoundly different from traditional European nations. But (to oversimplify somewhat for both sides) Russians tend to feel uniquely persecuted, and long to be respected; Americans, uniquely favored, but wish to be loved. As the global reputation of both superpowers eroded in the 1970s, each turned to a new leader who spoke to those special needs. The Soviet Union turned to Andropov who came from an institution (the KGB) that commanded respect based on fear and efficiency. America produced in Ronald Reagan a specialist in communicating its sense of national favor trained in an institution (the cinema) which inspired confidence based on affection.

Gorbachev is a protege of Andropov who, as head of the KGB, epitomized the nomenklatura, or inner Leninist control structure of the Soviet state. Andropov modernized and brought scientific talent to streamlining the Soviet police structure, which is in a way, the central institution within the nomenklatura.

This then is the first face of Gorbachev on the matroshka: the face of a privileged insider from the nomenklatura, that central structure of perhaps 3 million people, which controls all important decisions and dispenses the perquisites of power. Gorbachev rose not by leading economic enterprises or political regions, but as an insider in the Leninist political machine. He was a kind of life-guard at a Beverly Hills Hotel—catching the attention of the aging Soviet leadership as they came to the resort town of Stavropol, where he was the bright, young man in charge.

The Soviet political machine is the largest and probably most effective political machine of the modern era. It is not successful in our terms (delivering services to people), but it is in its own terms of perpetuating the power of a ruling oligarchy—manipulating divided democratic societies abroad and atomizing opposition forces at home.

The Leninist machine has succeeded in its own terms; and much of Gorbachev's program can be explained in terms of simply modernizing the machine by ridding it of ideology and bureaucratic paralysis.

The form of Gorbachev's program has classical Leninist elements—centralization of authority, work discipline, warning against left and right deviations, and enforcing party obedience in the name of vague slogans (perestroika), which only the leader can define. His new super-presidency gives him dictatorial power with only one real limitation on his power: the need to be elected popularly in five years.

His new presidency makes it impossible for the party alone to throw him out as they did Khrushchev. He thus has an insurance policy for retaining, as well as exercising, power—he has brought the heads of KGB and Army into his new presidential cabinet.

But with food, medical care, and housing all less abundant than they were when Gorbachev came to power, he felt compelled to attempt radically to restructure the administrative system. Thus, he has unleashed during the last year a program of internal political reform and external devolution of empire in Eastern Europe which now leads a life of its own and threatens to undermine the machine that created him.

As in a Greek tragedy, these forces of change were unleashed by the central protagonist himself with Gorbachev's insistence on new ideas and models from outside the Soviet Union. This reformist restlessness reflects the fact that although Gorbachev is politically a product of the patronage system of the nomenklatura, he is culturally a product of a more educated postwar, post-Stalinist generation.

This is Gorbachev's second face: that of the first university graduate ever to rule the Russian Empire. He is both the representative and the mobilizer of a professional middle class that has grown up during 45 years of a peace and relative prosperity rare in Russian history. His wife is also the first spouse of a leader to be a university graduate and to define a public role for herself. Glasnost' and the introduction of a measure of popular choice through the new electoral process represent an unprecedented attempt to enlist this amorphous group as a political counter to the conservative party bureaucracy that is resisting modernization.

Gorbachev thus mobilized the new professional classes on the "left" against the old party apparatus on the "right," and has been playing them off against each other in a classical Leninist way.

The trouble with his reform program is that it is mostly glasnost' and not much perestroika. Gorbachev is seen as a talker rather than a doer. The economy is retrogressing, and restiveness and defiance have appeared among the subject nationalities.

Ethnic-based unrest, in turn, has activated and intensified the power of another deep force of change at work in the Soviet Union today: the search for a usable Russian identity. Gorbachev's willingness to work with this little-understood longing may be the most brilliant and original part of his entire program.

Gorbachev's third face is that of a Russian in search of pride. This is the earliest and least studied aspect of his personality. Before he graduated from Moscow University and rose in the nomenklatura, he was an ethnic Great Russian brought up by an Orthodox mother and a peasant father. His subsequent political career was made entirely in the Russian Republic; and, once in power, he has assembled one of the most ethnically Great Russian top leaderships that the Russian Empire has ever had, depending largely on Great Russians who have also made of their careers within the Russian Republic—many in Siberia, the most intensely Russian part of the vast Russian Republic.

Beyond the economic search for new efficiency in Gorbachev's U.S.S.R. and the political search for new authority, there now looms the psychological-ideological need for a new legitimacy in view of the discrediting of the Communist belief system. As the minority peoples increasingly seek new legitimacy in nationalism, the key element in this cultural-spiritual crisis has become the search for a non-Stalinist identity within the dominant Russian nationality.

The restiveness of the minority nationalities has been reflected in the parliament where nationalities are better represented than in the party. But the televised tumult there only feeds further the insecurity of the dominant Russian nationality and intensifies its search for some new identity in the modern age.

Faced with intractable domestic problems, Gorbachev has legitimized himself in foreign policy. But he is not following the previous reform pattern set by Khrushchev's neo-Leninist revivalism and assertion of a rising revolutionary tide in the Third World. Rather, Gorbachev seems to be retreating back to an inner ring of traditional Great Russian authority—back from the illusion of a Communist future to the lessons of the Russian past.

Gorbachev's deference to Russophile sentiments is sound politically because the key consideration in retaining central control within this polyglot imperial state is whether or not the dominant Russian nationality can find a way of feeling good about itself without feeling hostile to others: a sense of self-worth not dependent on domination. Most of the nationalities in ferment within the U.S.S.R. are more economically advanced than the Russians. But for the Russians, unlike the others, the problem of defining a new national identity is complicated by the fact that they were the authors of the original Communism—taken over from within, rather than conquered by an alien army from without.

Moscow is the center not just of Soviet power but of this search for Russian identity. The situation there increasingly borders on the surreal. The parts are recognizable, but they do not fit together, and there is no overall coherence. Educated people who have at last gained some of the freedom and political reform they have long sought seem more unhappy and pessimistic than ever. The Gorbachev leadership stands center-stage—but, as in the theater of the absurd, in eerie detachment from popular opinion. The condition of Jews has improved, but their dissatisfaction has increased. Precisely as their numbers decline, fantasies about Jewish dominance are growing.

The greatest absurdities come from those who are paid to be rational. A world-renowned humanistic scholar told me in all seriousness that Gorbachev's overwhelmingly Russian circle of confidants were almost all either Jewish or married to Jews—and that Gorbachev himself had been initiated into a Masonic lodge by Margaret Thatcher in London. One of Russia's greatest scientists recently published a treatise, "Russophobia," in which all of human history is seen as the war of clever "little nationalities" to undermine noble big ones like the Russians.

Gorbachev, who is widely popular abroad, is widely disliked at home. He has accumulated more power than any other Soviet leader since Stalin, but he may have even less moral authority in the society than the miserable Constantine Chernenko whom he succeeded.

"All one gets from the talkers around Gorbachev is SPID," one provincial Russian party official muttered in a morbid play on words with an acronym that stands both for the "the perestroika and democracy syndrome" and for AIDS. The first onset of that disease, the growing shortage of goods, the rise of narcotics, and the disaster at Chernobyl are all given apocalyptical significance. Some seriously speak of the imminent end of the world (as early as 1991, when the feasts of the Annunciation and Easter will occur on the same day). Everyone is reading the sensational new novel, The Man Who Did Not Return, which depicts the violent and devastated Russia that allegedly emerges by 1993 as a result of perestroika.

Gorbachev continues to legitimize himself largely by his international stature while his tiny band of genuine supporters—many of them fellow alumni of Moscow University from the early post-Stalin years—plunges on into the uncharted waters of writing new laws for a real legislature. Whereas the cause of reform had troops without leaders in China, Russia has leaders without troops.

The hitherto largely silent and long-suffering Russian people have been discovering recently that they have fewer things now and are having fewer children for the future even than most other nationalities in the U.S.S.R. The Russians who have at last become aware that they themselves have gained so little would like to be recognized as something more than the people responsible for all that has gone wrong.

Gorbachev has gone much further to accommodate this desire than Khrushchev, his only real role model as a Soviet reformer. Khrushchev launched a program against the Russian Orthodox Church almost as vicious as Stalin's while exhorting Russians to pour scarce resources into an alleged rising tide of revolution in the distant Third World. By contrast, Gorbachev emphasizes improvement at home. His wife serves on the Board of a new Cultural Fund, which is largely devoted to recovering lost cultural artifacts from the Russian past. She attended the lavish state ceremony in the Bolshoi Theatre celebrating the Millennium of Christianity among the Eastern Slavs in 1988, the commemoration of which Gorbachev himself mildly encouraged and helped channel into a celebration of Russian national tradition.

But Gorbachev has taken away the old history books without yet providing new ones. This is a particularly hard blow for the Russians, who had previously appeared as the vanguard of human progress in the Russocentric version of Communist history that the U.S.S.R. had propagated ever since Stalin's nationalistic turn in the 1930s.

The Gorbachev leadership is being whipsawed by the simultaneous opposition of swelling popular movements from both right and left. Fear that the extremes may once again squeeze out the center accounts for the increasingly frequent suggestion in the U.S.S.R. that violence is inevitable and some form of civil war probable. Yet ironically both of these extreme alternatives are almost certainly more popular at the moment than Gorbachev's cautious reformism—and largely because they provide clearer answers than the Gorbachev leadership to the basic question of Russian identity.

On the right there is a traditional reactionary answer to the question of Russian identity. Among delegitimized bureaucrats, worried writers, and some ordinary people, there has been a resurgence of Great Russian chauvinism, which sees a strong, Russian-dominated political machine as the only glue that can hold together an otherwise fragmented and potentially anarchic, multi-national empire. It must be preserved not to sustain a materialistic ideology and a socialist model for the world, but to protect an idealized Russian tradition (sometimes now presented as Slavic tradition in order to include the Ukrainians and Belorussians as well as the "great" Russians). This reactionary answer to the question of Russian identity derives some authority from the practical experience of managing the largest and most long-lived empire of the modern world. The Russian army and police and the Russian language have been the controlling elements in an empire where subject nationalities have been essentially kept in territorial compounds and often played off against one another.

Directly opposite from the nationalists on the right are the radical reformers to the left of Gorbachev. They are led by educated Russians principally in Moscow who argue that Russia's proper identity can be found only by proceeding directly to build a pluralistic, multi-party democracy based on the rule of law following essentially Western models. They see a new Russian identity being forged by the moral tasks of building a just society rather than by the physical exercise of sustaining an empire. They have forged in the parliament a tactical alliance with the most sophisticated and radical of the national minority movements, which seek to separate from the U.S.S.R. under their own democratic national auspices. This Interregional Group seeks an altogether new legitimacy which could make a new set of laws and institutions and which could be more than just another new front for the old system. These radicals on the left have lost a great moral leader in Sakharov, but they have won the moral high ground and much of the best talent in the new post-Stalinist generation. Wherever there was a genuine choice in the recent elections, these

radicals proved far more popular than the reactionaries.

Maneuvering between two positions that have broader support than his own, Gorbachev seeks to raise the Russian people towards a kind of de-ideologized productive dynamism. If he were able to open up the economy more boldly or de-collectivize agriculture and thus raise living standards, he might develop a sustaining constituency for what seems to be his alternative: a pragmatic authoritarian identity that seeks to rise above traditional questions of national identify and to avoid the need to relegitimize the system by either returning to Russian tradition or plunging on to real democracy.

Perhaps Gorbachev can continue to maneuver between the two positions, since they fear one another more than they hate Gorbachev. But his increasingly conservative and unproductive economic policy has produced all the resentments of an open competitive system while retaining all the inefficiencies of the old centalized command system. People of all persuasions in Moscow now believe that unless there is a turnaround in the declining standard of living, the odds will favor more internal violence that will produce a reactionary turn and probably sweep away Gorbachev's already retrenched reform program—hence the pessimism, the apocalypticism, and the growing desire either to get out before there is a search for scapegoats or to keep one's head down to avoid being hit by the coming bullets.

But it there a chance that Gorbachev or some future successor might be able to go beyond merely keeping a delegitimized Leninist party in power by improving its table manners and manipulating reactionary and the radical fears of each other's alternatives? Could the dominant Russians themselves possibly install the kind of open society and accountable government that their more Westernized former satellies have espoused? Certainly, such changes may not be sustainable in Eastern Europe and will not be conceivable in the U.S.S.R. itself without Russian support. So the key question is can the Russians find a non-Leninist and non-chauvinist identity for themselves: a way of feeling good about themselves without feeling hostile to others.

The conventional wisdom is that this is asking too much of human nature in general and of an aggrieved less-Westernized people like the Russians in particular. And the conventional consolation is that Western spectators at this Eastern drama should not get too emotionally or economically involved because the only realistic outcome will be either an inertial continuation of Gorbachev's present course or a reactionary reversion to Russian nationalism.

But these are not conventional times. There is no real precedent for the historic drama we are witnessing. We have entered a world of unpredictable contingencies in which the thirst for freedom has spread like an uncontainable epidemic to previously immune populations—even Mongolia—and the future has become truly indeterminate.

The Russians themselves may be developing a fourth alternative answer to their problem of identity that is more positive than mere chauvinism and may, indeed, be the prerequisite for any long-term evolution towards democracy.

Such a new Russian identity is based on the large-scale determination of the Russian people to rediscover everything meaningful in their shared experience that Stalin attempted to destroy and that Stalin's successors continued to defile: traditional village culture, the soil and rivers of a once pristine ecology, the long-suffering compassion of grass roots Russian Orthodoxy, the artistic majesty of a pioneering monastic culture that carried that faith across the forbidding Siberian frontier on to Alaska, and above all, a unique, modern literary tradition permeated with moral passion. There is a desire not just to recover but to learn from and make restitution to old Russian culture. The voluntary association for historical preservation has the largest membership of any organization in the U.S.S.R. An even more passionate environmental movement has been growing in strength ever since it forced the Politburo to drop its plans for diverting the flow of rivers in the Russian north three years ago.

Russia's leading academic expert on old Russian culture, the 83-year-old chairman of Mrs. Gorbachev's Cultural Fund, Dmitry Likhachev, has become a media celebrity in the U.S.S.R. with his call to defend and recover both "the ecology of culutre" and "the culture of ecology."

Many high officials who still call themselves Communists now purport personally to find a new and deeper basis for morality in the philosophically-rich Russian literary tradition of Dostoevsky and Tolstoy. But now that the corpus of works published in the U.S.S.R. has expanded to include figures who came into direct, heroic conflict with the Soviet regime like Bulgakov, Pasternak, and the still-living Solzhenitsyn, educated people are increasingly turning to the older Russian religious tradition which infuses these writers' works. Many who were present contend that the remarkable church service held last autumn—for the first time since 1918—in the Kremlin's Cathedral of the Assumption, where the Tsars were once crowned, was the most moving, single gathering they have ever attended. Part of that feeling may be attributed to the most surprising fact of all: the growing sympathy for restoring at least some version of a monarchy. The journalist who claims to know the secret burial place of the imperial family after their assassination by the Bolsheviks in 1918 is one of the most sought-after figures in Moscow. When the popular writer Rasputin spoke up for a constitutional monarchy at a dinner hosted for me by Soviet officials, it was the officials rather than the writer who seemed on the defensive. Even a liberal writer and critic of Rasputin like Andrei Voznesenky talked to me with quiet pride about his recent poem celebrating a small piece of wood which he has reverently kept in his dacha: a fragment of decorative carving from the last house lived in by the Tsar's family in Siberia just before it was razed.

Of course, collective historical restitution, inner oral conversion, and the proliferation of independent cultural organizations among Russians may not ultimately effect the dynamics of power in the U.S.S.R. Many Russians speak wearily about their own continued fatalism and passivity; the Leninist political tradition is skilled at co-opting Russian national symbols; and token gestures may be enough to keep the lid on—such as the recent return to believers of a few confiscated churches or the recent creation of new cultural institutions within the state structure of the Russian republic. But the thirst for new cultural institutions is now being satisfied throughout the U.S.S.R. almost entirely by a rising tide of new voluntary organizations that reject Communism in all it forms. There is almost no popular support for the current fall-back effort of reformers within the political system to relegitimize Communism by juxtaposing a good Lenin to a bad Stalin.

Most of the many new Russian political groupings and cultural undertakings that have sprung up in recent months have not been reported in the West and involve previously unknown, young leaders. Our bibliographers count between 400 and 700 new unofficial publications in the U.S.S.R. today. Much activity centers on a massive new Russian Encyclopedia designed to run for at least 50 volumes in an effort systematically to recover the lost regional history of Russia during the Soviet period. There is a new 12-volume agricultural encyclopedia, which will essentially attempt to reconstruct the culture and ecology of rural Russia prior to the atrocity of collectivization; the U.S.S.R's first private secondary school since the revolution, a neo-traditional Andrei Rubelve Lyceum, named after Russia's famous monastic painter; and an already completed 10-volume Orthodox encyclopedia.

Noble and intelligent voices of Russian dissent like Sakharov and Siniavsky doubt that a renewed traditionalism is compatible with democratization. But it may be worth remembering the religious roots and moral convictions independent of government were prerequisite to the establishment and future health of representative government in America—as Washington clearly noted in his farewell address. And the forming of voluntary associations independent of central government and bureaucracy was prerequisite to the establishment of democracy on a continental scale in America—as Tocqueville noted a half century later.

There are, finally, neglected aspects of the Russian cultural experience which may make a return to tradition more compatible with democracy than we have been inclined to think possible. There was more independent civil society and local organizational innovation in the late Tsarist period than the largely state-centered and triumphalist historians of the Russian empire have written about (self-governing local zemstvos, local zemgor committees that sprang up during World War I, an amazingly rich set of welfare institutions set up by women's convents, etc.). The most traditionalist ethnic Russians, the Old Believers, were also the most entrepreneurial. It seems appropriate that the newly reformed ministry of culture is now supporting Likhachev's Cultural Fund in a restoration of the main Old Believer center at Bela Krinistsa which was destroyed by Stalin in 1947. The writer Daniel Granin has attracted 6,000 members in a short pace of time to this new Society of Charity in Leningrad, which promotes voluntary humanitarian services independent of the state.

We cannot know if the Russians will eventually find their post-Stalinist identity by combining a religious-tinged return to tradition with a secular move forward to democracy. It would at best be a tortuous process—and one fraught with peril in the near term—for the Russians must simultaneously deal with a potentially dissolving empire as well as a demonstrably dead ideology. If we must, therefore, keep up our guard, we in America should at the same time raise our sights. We are the only nation by which they can measure themselves as they face the awesome challenge of trying to build democracy in a multi-cultural, continental context. In times of radical change, Russians have often reasserted traditional ways

to compensate psychologically for their simultaneous borrowing from their leading Western adversary. They took their religion from Byzantium, there first modern government from the Swedes, their industrial organization from the Germans—only after fighting all three. They look to us now more than we realize, and we cannot afford not to become more involved. America's and Russia's expanding frontiers once met at the old Russian outpost of Fort Ross just north of San Francisco. Our future paths will not converge, but there may be unexpected common horizons.

The forces of change that Gorbachev has stirred up are the dynamic forces in the world today—and these are more than just the material market forces that we have talked about so much in the 1980's or even desire for freedom. They seem to me to be immaterial aspirations that more and more of the world wants to share with us: (1) peaceful evolution rather than violent revolution as the engine of change; (2) widespread participation and accountability rather than centralization of power as the form of rule; and (3) access both to basic secular enlightenment and to one's own distinctive religious and cultural traditions as the right of all peoples.

We may be in the midst of global process that seems to be both moving forward to democratization and back to religion. But, in fact, democracy arose historically out of religion, which may be necessary to underpin it ethically. Thus, the new Soviet interest in both our liberal democracy and their own conservative spiritual heritage could prove to be two sides of the same coin—rather than conflicting sides of an irreconcilable Slavophile-Westernizer polarity as we usually tend to think.

The trend towards democracy may ultimately prove the best long-term quarantee of peace. Out of the large and generally depressing literature on how wars actually start in the modern world, there is one encouraging fact: democracies in history do not fight one another. If we can better understand and at least marginally help the extraordinary process of ferment that is going on in the Soviet Union (its cultural as well as its economic and political strivings), we may be able to help build a new agenda that will come to realize anew with Reinhold Niebuhr that man's capacity for good makes democracy possible; his capacity for evil makes it indispensable.

SOVIET IMMIGRANTS IN ISRAEL

Mr. REID. Mr. President, earlier this month I visited Israel for the third time. I met with many state dignitaries—many very prominent and important people.

I also met with my old friend, Arkady and Helen May, Soviet Refuseniks who Mrs. Reid and I helped leave the Soviet Union a few years ago.

One night we were having a small dinner with a number of other people in Jerusalem, and I rose to extol the heroism of my friends, the Mays, who had struggled through many years of adversity.

When I was through, Helen May rose and said, "We are not heroes; we are ordinary people. We are no different than so many other Soviet Jews."

Helen May went on to recount the story of her years as a Refusnik. She told us of how her internal visa was revoked, and she could not travel to see her dying mother. Her mother died without being able to see her daughter.

She told us of the many times she was taken to KGB headquarters in the middle of the night for questioning. She told us of her arrest and sentencing to Siberia, which, was never carried out.

She and her husband were not allowed to work. Many times they were without food. Their friends here in the United States used to have smuggled to them items like transistor radios which they could sell on the black market for a little money.

When Helen was through describing their odyssey, and how, with the help of her American friends, they were finally free, there was not a dry eye in the room. Everybody was moved by this triumph of the spirit—something that I still call heroism, despite her protestations.

One of my traveling companions, an old friend of mine and former staff member, Evan Wallach, was so moved that he wrote a poem. I wish to reprint that poem here, and dedicate it, as Mr. Wallach has, to Helen and Arkady May, but, also to all the heroes of Soviet Jewry who have experienced the same struggle.

WE ARE NOT HEROES

(For Helen and Arkady May)

We are not heroes
We are ordinary people, she says
Her eyes gleam
We lost our jobs
We survived
The KGB followed, looked, listened
They called us in for questioning
Siberia, they said, the Far East
Instead of the Near East

We struggled
They would not let me, she says
They would not let me see
My Mother before she died
We were forced by circumstances
We are not heroes
Let my people go

We are not heroes, they cry
It echoes through our ancient land
A hollow shout in a trench through the tells of time
Sinking through the mounds of antique cities
Look down the wells of history
See the levels of our despair
We are not heroes
Let my people go

We are not heroes
We wept at Massada and shivered in fear
As the causeway rose day by day
We are ordinary people
When they burned us in Spain with our books
We sobbed prayers in flames of knowledge
We are not heroes
When the Cossacks rode drunk and crazy

We cried and hid and shaved our heads
And when they came to the Ghetto
For the last lost few
We did what we could and died
We are not heroes
Let my people go

I am the Lord they God
Who brought you out of the land of Egypt

TERRY ANDERSON

Mr. MOYNIHAN. Mr. President, I rise to inform my colleagues that today marks the 1,956th day that Terry Anderson has been held in captivity in Beirut.

SENATOR QUENTIN BURDICK

Mr. KERRY. Mr. President, for the past 30 years, this body has been favored with the presence of one of its finest, most conscientious Members, Senator QUENTIN BURDICK. Although I have only worked with Senator BURDICK for 6 of his 30 distinguished years, I am honored that I have been able to serve with him, and I look forward to doing so in the future.

The people of North Dakota have shown their great wisdom by choosing QUENTIN BURDICK to represent them in Washington for three decades. Senator BURDICK has diligently and faithfully represented their interests and the interests of the Nation. Throughout his tenure he has never forgotten why he is here and has never forgotten the troubles and needs of the common man and woman. The people of North Dakota and the Nation owe QUENTIN BURDICK a great debt.

In an age of sound bites and negative ads, Senator BURDICK represents the good intentions and nonpartisan cooperation which are too often overlooked—and indispensable to the functioning of our democracy. His quiet competence and dedication, often lost in the clamor of the media, have not gone unnoticed in this Chamber. This is particularly true as he has so ably carried out his responsibilities to protect our Nation's environment and restore the soundness of our public infrastructure as chairman of the Senate Environment and Public Works Committee.

Mr. President, I am proud to join with every Member of this Chamber in congratulating him on his 30 years of service and to thank him for his dedication to this body and to the people of this Nation on this day when his colleagues will participate in a special tribute to his many years of Senate service. They have long recognized what is now clear to me—Senator BURDICK is an always reliable and persistent champion of the working and farming families of this country and always will be.

WORKSITE SCHOOLS—A PROMISING IDEA IN EDUCATION CHILD CARE

Mr. KENNEDY. Mr. President, the American Bankers Insurance Group, a corporation in Miami, FL, has on its grounds a satellite school run by the

Dade County public schools. The school is open to childern of ABIG employees in grades K to 2. I visited the school last year and spoke with teachers, parents, and students. I believe it can serve as a model for similar partnerships—in the most active sense of the word—between school districts and private industry across the country.

Conversations with parents whose children attend the school reveal how successful this effort has been. Parents drop off their children at the school on their way to work, and pick them up at the end of the workday. In between, parents can visit their children during their lunch hour, meet with the teachers, and become actively involved in their children's education. After school, children engage in activities provided at the school site by community groups until their parents are ready to pick them up.

Benefits accrue not just to parents and their children, but also to the corporate sponsor. ABIG has found this to be a profitable investment. It provided a building to house the school, and the Dade County schools provide the teachers, books, and supplies. With this facility on the corporate campus, ABIG reports that employee absenteeism has fallen 30 percent and employee turnover has dropped 13 percent.

Dade County has established similar satellite schools at Miami International Airport to serve employees of the County Aviation Department, and at the Miami-Dade Community College. Joseph Fernandez, who created the satellite school concept as school superintendent of Dade County, is now exploring ways to bring satellite schools to New York City workplaces where he now heads the public school system.

We talk about parents' involvement in their children's education, about child care for working parents, and about smaller, more intimate school environments where children, parents, and teachers can work together more effectively. The satellite school addresses all of these goals. I ask unanimous consent to include in the RECORD an article appearing in a recent edition of the American Federation of Teachers magazine American Educator on the satellite schools in Miami. It presents an excellent analysis of the advantages of this idea, and will be of interest to all of us in Congress.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE WORKSITE SCHOOL

(By Ellen Hoffman)

Item: Millie De Villa, mother of first-grader Alexander, has two "jobs"—one as a scheduler for a cargo airline at the Miami airport and the other as a volunteer art teacher at the Miami International Airport Satellite Learning Center.

Item: Parents of kindergartners and first-graders at the Miami Dade Community College Satellite Center are talking with campus officials about how their youngsters might benefit from close access to science labs and other community college facilities.

Item: An employee of the American Bankers Insurance Group in Miami may sign up to spend part of the lunch hour in class with his or her child at the satellite learning center on the grounds of the corporation. Once notified, teachers make sure that the child is involved in a small-group academic activity—such as a reading lesson—so that the parent can participate and observe during the visit.

Such parent commitment and participation are both the primary goals and benefits of a new breed of educational institution that is attracting both interest and approval from educators, employers, and parents: Public schools located at parent worksites and operated as a joint venture by the school system and the employer.

Dade County, Florida (which includes the city of Miami), where the concept is being pioneered, now has three "satellite learning centers," and other school systems in Florida, Minnesota, and other states have also started similar programs.

Brainchild of former Dade County Superintendent Joseph Fernandez (now head of the New York City school system), the satellite learning center concept is a simple device for meeting several goals: providing working parents with convenient, flexible education programs for their children; enhancing opportunities for involvement of working parents in their children's education; combating employee absenteeism and trunover by reducing stress from concern about or problems with their children; and relieving budgetary pressure faced by a school system that grows in enrollment by ten thousand to fifteen thousand students each year.

From the day Dade County school superintendent Joseph Fernandez floated the idea of satellite schools to a Miami Chamber of Commerce audience in 1987, it was only three months until the first one opened. It was a kindergarten housed in a trailer on the grounds of the American Bankers Insurance Group.

That original class of twenty-four kindergartners has blossomed into a full-blown primary school, located in a new building on the ABIG grounds and attended by more than seventy students in kindergarten through second grade.

And now Dade County has two more satellite centers, both serving kindergartners and first-graders and slated to admit second-graders next year—one at Miami International Airport and one at Miami-Dade Community College's North campus.

A formal contract guides the school system-employer relationship in each case, specifying that the employer provide the school facility and maintenance and security for it and that the school system provide the staff, furniture, equipment, and supplies that are normally found in any county school. A lead teacher is in charge at each school site, but ultimate operating and legal responsibility for the satellites remains with the principal of a nearby "host" elementary school.

The ebb and flow of the daily schedule at satellite centers begins as early as 7 a.m., when parents on their way to work drop off their children. The children may play or watch television in supervised setting until school starts around 8:30. The school program ends at 2 p.m. and is followed by an afterschool program staffed and conducted either by the YMCA or the county's community school unit. Although some parents take their children home around 2 or 3 p.m., most stop by later in the afternoon, after completing their work day.

Educators and parents alike consider the private parent-child time in the car to and from work each day an important benefit of the program. Cynthia Collins, for example, works as a personnel specialist in the Department of Aviation at the airport. The mother of five-year-old twins Stacee and Tracee says: "I get an extra thirty minutes each way (in the car) with the kids. . . . It gives me a chance to do the homework with them and find out who did what in school. It's fantastic."

Physical proximity of parents to children, both in case problems develop during the day and to facilitate parent involvement in school activities, is another plus cited by advocates of the satellite concept. The result, they say, is an increased sense of security for both parents and children.

American Bankers center teacher Karen Borgmann recalls the day a youngster fell and split her lip even before class started in the morning. "Her mother (who was working less than five minutes away) picked her up, took her to the dentist and the child was back in school with ten stitches by 11 a.m.," Borgmann recounted.

Mona Comeau, a divorced parent who is studying electronic engineering at the community college campus, explains that "it feels good" to have her daughter nearby all day: "I bring Chelsea (a 5-year-old) here from eight to five. My classes are from eight to one-thirty. . . . It's right across the campus. I can come and have lunch and as I drive by, I can see the children playing."

The lead teacher in each center plays a pivotal role, combining teaching and administrative responsibilities with supervision of other teachers and aides.

Under Dade County's teacher professionalization initiatives—which are set forth in the union contract between Dade public schools and the United Teachers of Dade—a lead teacher can play a variety of different roles. "In a secondary school, a lead teacher is more like a department head," observes Thomasine Morris, lead teacher at the airport center. "But we are at a site responsible for a program.

"I don't teach any differently," explains Morris, "because we have the same Dade County objectives." But before she ever got up in front of her new kindergarten class, Morris had been deeply involved in planning the conversion of an office building into the school, in the selection of furniture and equipment, and in hiring staff.

The satellite program is "giving teachers a chance to blossom," she says. "Instead of following a given format, we are creating and designing."

The lead teachers from each of the three worksite schools note also that the satellite center's small size and its physical separation from a larger school have created a dynamic in which center staff are constantly exchanging information and ideas about the children and the program.

Nonetheless, all involved in the program stress the importance of developing and maintaining strong ties between satellites and host schools, for staff and children alike. For staff, the connection is an important safeguard against the professional isolation that can occur when a teacher works in a school with as few as three staff members. While most staff members interviewed said that they don't feel isolated in their

centers, they stressed the positive effects of participating in regularly scheduled faculty meetings and other activities at the host schools.

Staff of the satellite schools acknowledge that they could also benefit from more collaboration among the three centers. When this reporter invited the three lead teachers to meet with her for this story, it was the first time they had gotten together as a group, without the presence of school system officials or other "outsiders." A number of staff of the centers had never visited the other satellite centers on a school day.

Contact with the host school is also seen as critical to the development of students in satellite centers, who must be prepared for the transition from a very small school—in which many of their classmates have been friends since they attended the same day care programs—to a much larger one.

For satellite school students, visits to the host schools may offer the only window on the experience they will encounter when they transfer to a larger school in third grade. Coping with lunch in a large cafeteria, for example, looms as a daunting prospect for these youngsters. To help prepare the children for this, Robert Keiser, lead teacher at the American Bankers center, has arranged for school lunches to be served cafeteria style at her satellite. Field trips, holiday parties, and other joint activities for the children are scheduled at the host schools throughout the year.

With the American Bankers center in its third year of operation and the other two in their second year, is the Dade County satellite learning program working?

Data collected by ABIG show that employee absenteeism is down 30 percent and turnover, 13 percent. A company vice president, Philip Sharkey, says enthusiastically that the benefits to the employer go far beyond expectations, and beyond the $375,000 invested in construction of a new building to house the school.

But there are no other data—such as compilations of test scores—on the program yet, and until the school system implements a pending plan for an evaluation, other measures of success must be used.

One way parents vote is by enrolling their children. Two of the three centers are at capacity and face the prospect of having more enrollees than they can accommodate next fall. Muriel Lundgren, director of the preschool on the Miami-Dade campus, has a six-year-old in the satellite and a four-year-old in the preschool. "I feel like," she struggled for the exact word, ". . . blessed . . . not only to have the convenience but also to have the continuity for the children's education," which, she stressed, is very important for working parents.

"Our employees (parents) are here on time, they are here daily, and if something happens to their kids, they don't have to lose two hours, because the children are five minutes away," sums up Esterlene Lewis, chief of administration and community affairs for the Dade County Aviation Department.

Parent participation and involvement in the satellite schools clearly exceed that in the average school. Points out ABIG teacher Barbara McMillan, "We are in contact with the parents all day long. They talk to me when they arrive, when they pick up the kids . . . and I have their phone numbers."

Parents of children in the satellite centers may belong to both the Parent-Teacher Association at the host school and a parent group at the center. The latter meets several times a year so that parents can be updated on school activities and receive tips on subjects such as how to supervise children's homework or how to prepare children to take standardized tests.

Each school has its regular parent volunteers such as Ronald Gutierrez, a recent graduate of a computer course who oversees the computer lab on Fridays at the airport center, where his son is a student. Others are more informal, such as the parent who came to pick up his child in Thomas' classroom at the community college. "Is everything okay here? Do you need anything?" he queried. Pointing to a light that was out, he asked if he should fix it.

School events, such as Christmas parties and fathers' day brunches, draw not just a few parents, the teachers report, but virtually 100 percent attendance.

Test scores and other academic measures of the children's progress will be evaluated in the future, but teacher Karen Monuse, from the community college satellite, observes that the constant presence of parents in the school and their contacts with teachers have a positive effect on children's study habits: "There's a difference in the kids as a result of the parent contact. Because they are aware that parents are always on top of things, they're not so likely to slack off. If I say I'm going to call their mom, they know I'm going to do it."

Although integration was not originally a goal of the satellite centers, it appears that social, economic, racial, and ethnic integration is greater in the satellite schools than in most. The 268,000 students in Dade County in 1988–89 included about 44 percent Hispanics; a third black non-Hispanic, 21 percent white non-Hispanic; and a small percentage of native Americans and other ethnic groups.

Each of the satellite schools has a racial and ethnic mix of about one-third of each of the three largest groups—Hispanic, black, and white. In the American Bankers school, two little girls in the same reading group are respectively the daughters of a company employee and her boss and are said to be good friends. The economic and social mix also occurs naturally when the sponsor employs parents who do everything from maintain the lawns to manage the company.

In Dade County, as in many metropolitan areas, the workplace is more integrated than the neighborhood. "These are all equal-opportunity employers," explains Morris, "so the schools offer equal opportunity for the children."

Data have not been compiled, but teachers in the schools say that they also have a mix of children who come from single-parent families (including some being raised by their fathers); two-parent families; and both one- and two-wage earner families.

Exposure of youngsters in the satellite programs to the work and career possibilities of the on-site employers is one area that may be developed more in the future, teachers say. Children at the airport have toured the facility, and many at the American Bankers center have visited their parents' offices. But Roberta Keiser points out that it would be possible in future career units to introduce children to such areas as food service, security, computer, and mail room operations, all at the nearby company headquarters.

The generally positive feelings about the satellite schools have promoted a movement toward expansion that has raised a variety of logistical and educational issues.

Expansion could take several forms: more K–2 classes at existing sites; more satellite centers; extension beyond second grade, perhaps up through sixth grade. All of these options present issues that are being discussed within the school system and by participants.

Each of the existing centers is located near a previously established day care program. The majority of the children in the K–2 classes were also together in day care, and this offers some of the benefits of continuity so valued by both parents and teachers.

Some parents would like children to remain in the satellite school beyond second grade. This presents space problems and also raises what Beulah Richards, principal of Cutler Ridge, the host school for the Amerian Bankers satellite, calls "a socialization issue. When the children get to third grade," she suggests, "they probably need to be in a neighborhood school."

There are no current commitments—other than adding a trailer to accommodate the second-grade class at Miami Dade next year—to providing additional space for the satellites. ABIG's Sharkey says that he is working with school personnel to try to accommodate all parents who want to enroll their children. The Aviation Department's Lewis sees both budget constraints and the difficulty of meeting state requirements (for outdoor space, etc.) as barriers to expanding.

Several potential sponsors, including an industrial park and several hospitals, have been talking with the school system about establishing programs. But so far, they have run into barriers ranging from community concern about potentially harmful pollution to church-state conflicts.

The county, which faces continuing pressure to build new classrooms, has a powerful incentive to identify sponsors who will work with them because the result is "free classrooms," a boon to both the school system and the taxpayer. Lynn Shenkman, a spokesperson for Dade County Schools' Department of Professionalization, emphasizes, however, that the school system is not totally wedded to the existing models and is willing to consider other options that might be proposed.

In the meantime, Dade's satellite schools serve as a model to other school systems seeking solutions to the challenge of providing quality education to the children of working parents. They respond to a steady stream of visitors—more than four hundred came last year—and inquiries. They have also inspired creation of similar programs sponsored by General Electric and Pinellas County in Tampa, by the state transportation department in Tallahassee, and a bank in St. Paul, Minnesota.

CONCLUSION OF MORNING BUSINESS

The PRESIDENT pro tempore. Morning business is closed.

FOOD, AGRICULTURE, CONSERVATION AND TRADE ACT OF 1990

The PRESIDENT pro tempore. Under the previous order, the hour of 9:30 having arrived, the Senate will now resume consideration of S. 2830, which the clerk will report.

The legislative clerk read as follows:

A bill (S. 2830) to extend and revise agricultural price support and related programs, to provide for agricultural export, resource conservation, farm credit, and agricultural research and related programs, to ensure consumers an abundance of food and fiber at reasonable prices, and for other purposes.

The Senate resumed consideration of the bill.

Pending:

Bradley amendment No. 2314, to extend the current sugar program for five years and decrease the loan rate from 18 cents to 16 cents.

Conrad amendment No. 2330, to modify the repayment requirements for advance deficiency payments for certain producers.

Mr. EXON addressed the Chair.

The PRESIDENT pro tempore. The Senator from Nebraska [Mr. EXON] is recognized.

Mr. EXON. Mr. President, I ask unanimous consent that I be permitted for no longer than 3 minutes to proceed as in morning business.

The PRESIDENT pro tempore. The Chair advises Senators that under the order previously entered, there will now be 1 hour of debate on the Bradley amendment, which is already running short by 2 minutes, and there is a vote scheduled for 10:30 a.m.

Mr. EXON. I thank the Chair.

Several Senators addressed the Chair.

Mr. JOHNSTON. Will Senator CONRAD yield me 5 minutes?

The PRESIDENT pro tempore. The Senator from New Jersey has control of one-half hour of the time. The manager of the bill, if he opposes the Bradley amendment, has control of the other half. If the manager does not oppose the amendment and supports the amendment, then the minority leader has control of the time in opposition to the amendment. Who yields time?

The Senator from New Jersey [Mr. BRADLEY] is recognized.

Mr. BRADLEY. Mr. President, the amendment we are considering is a reduction in the sugar loan rate from 18 cents to 16 cents. It is a very simple amendment. We debated it last week for an hour. Today we will have another hour of debate and then the vote.

The amendment deals with the Sugar Program. Now the Commodity Credit Corporation provides nonresource low interest loans to sugar growers with sugar standing as collateral. Current law also mandates that this program be managed at no cost to the Federal Government.

The Secretary of Agriculture was to ensure that there are no defaults on CCC loans. As such, he must ensure that the domestic price for sugar stays above the loan rate plus shipping, handling, and storage. Because the resulting so-called market stabilization price must cover the highest cost producer and the greatest transportation cost from Hawaii to the Northeast, the Secretary is forced to maintain a domestic price of about 22 cents per pound or 4 cents above the loan rate. Of course, the way he does this, Mr. President, is by reducing imports dramatically. In the last several years, imports have dropped from 5 billion tons to about 1 billion tons.

Mr. President, it is the contention of this Senator and the proponents of this amendment that this policy is a disaster, and I would like to make the case on several points.

First, the U.S. sugar policy gives our overall farm policy a bad name. Sugar is the only major commodity in the 1985 farm bill that did not take a 10 to 15 percent cut in total support. Sugar is the only commodity in the 1985 bill, which we are now debating the reauthorization of, that did not take a 10 to 15 percent cut in total support.

Second, the result of the high loan rate and the high market stabilization price led to a high rate of return for sugar, higher than other crops, and that resulted in an increase in the number of acreage planted in sugar in this country. In fact, sugar cane now has the highest acreage in 20 years, and beet sugar, the highest acreage since 1974, 1975.

The result of this expansion of acreage has been beet farmers in the upper Midwest bidding up prices of land from wheat farmers and from soybean farmers and taking the land for the planting of sugar beets.

Mr. President, this is not my imagination. This was confirmed on the floor of the Senate last week by the distinguished Senator from Minnesota, who confirmed that beet farmers are in competition with wheat farmers for land, and the price is going up because of that competition.

Mr. President, on the floor last week the Senator from North Dakota made another very telling admission. He said the following, and I will quote from the RECORD. When I raised the issue of other farmers being in competition with sugar farmers, he said:

The wheat farmers, the soybean farmers, the barley farmers, support the Sugar Program. In fact, they would like to have one like it, because it is one of the few programs that is working to secure incomes for American agricultural producers.

Indeed, I suppose they would like to have a program like it, because it is a better deal. Of course, they would like to have more than they get in the Wheat Program or the Soybean Program or the Barley Program.

Why is it a better deal? Why is it that other farmers want to have the same kind of program as the Sugar Program? Well, there is no down side here. If the prices go up, as they have in the past, the sugar farmer reaps the up side; but if the prices go down, there is a floor. So the sugar farmer has no down side. Who would not want that?

So it is understandable why the wheat farmers are envious of the sugar farmers, and why the barley farmers are envious of the sugar farmers, because the Sugar Program is about the best deal that you can imagine.

Does that sound familiar? I say, Mr. President, that the Sugar Program is the S&L of agriculture policy. It is ensured sugar deposits. There are no down sides here. There is only an up side potential. If there is a drought in Brazil and the price goes up, they reap all the benefits. If the price goes down, there is no down side.

So, Mr. President, I say first, the Sugar Program is wrong agriculture policy.

Second, Mr. President, I say that the Sugar Program threatens U.S. competitiveness and jobs. If you are a manufacturer, food manufacturer, confectioner, baker, do you have to pay a higher price for sugar, 15 cents on the world market? No, it is 22 or 23 cents in the United States to get it.

Mr. President, what happens you might block the import of cheaper sugar, you might block the import of sugar into the United States, but you are not going to block imports that have sugar in them. In fact, prices of U.S. bakery goods are going up, prices of sugar and sugar confection products up 157 percent since 1981, candy imports up 140 percent since 1980, and 10-pound chocolate bar since 1980 imports up 3,000 percent.

Mr. President, the Sugar Program is a blow to U.S. competitiveness and jobs, costing jobs and making our industry less competitive in the world market. We cannot sell our goods as well because we pay a higher price for sugar. In addition to that let us not even spend too much time but at least note the fact there was an industry in this country that refines sugar imports and that is virtually bankrupt, 2,000 jobs lost. Second, the Sugar Program threatens U.S. competitiveness and costs American jobs.

Third, the Sugar Program undermines our foreign policy. It undermines our foreign policy. We have been over this a lot of times. Should it not give concern to anyone who makes speeches on the floor about democracy in Central America, freedom, and about the pure free market economy, the open economy?

Mr. President, in the Sugar Program we have seen imports drop from 5 million to 1 million in the last several years. Who has been hurt by this? Little countries in Latin America, the Guatemalas, the Nicaraguas, the Panamas, the Philippines.

As I noted last week, all of the economic benefits of the Caribbean Basin Initiative which this Senate has been

very proud of are offset totally by the withdrawal of the sugar quota for those CBI countries.

So, Mr. President, our foreign policy is being undermined by the Sugar Program. Instead of allowing imports to come into this country at a price low enough so we can have consumers benefit, we do not allow the imports to come in. We deny comparative advantage to the country that has it in sugar production. The result is a poorer economy in those countries. The result is internal turmoil, economic turbulence, revolution. And then we proudly send foreign aid and military assistance to solve the problem that we in part created by blocking the import of sugar into the United States.

So, Mr. President, this is bad foreign policy, it threatens U.S. competitiveness in jobs, it undermines our foreign policy and, yes, it runs counter to our efforts to eradicate drugs, drug-producing plants, in other countries.

Mr. President, I made this argument last week and it hit a sensitive nerve. The fact of the matter is in Peru and Bolivia, several years ago there were 30,000 hectares of sugar production. Now there are 2,600 hectares of sugar production. Mr. President, at the same time coca production has skyrocketed. This is not just the Senator from New Jersey that suggests that our sugar policy has something to do with that. The Senator from New Jersey does not say if we simply cut the loan rate 18 cents to 16 cents we eliminate the problem with drugs. I am not arguing that.

I am saying on the margin these countries have to have other goods that they can produce and export. Sugar is one of those goods.

I quote just a few other authorities on this subject such as the five Andean Presidents at a recent meeting said the following, that opening the U.S. market for sugar to these countries would contribute significantly to the well-being of Andean peasants and improve potential economic development. From what, Mr. President? From coca production. Alternative development from coca production.

Take the Bolivian Embassy official who said many coca growers used to be sugarcane producers. Take the DEA, the DEA which today says that the coca price is below the break-even point.

Mr. President, I ask unanimous consent to print the table in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

BOLIVIAN COCA LEAF PRICES [1] SINCE COLOMBIAN CRACKDOWN

[September 1989 to May 1990]

Area	Sept. 1989	Oct. 1989	Nov. 1989	Dec. 1989	Jan. 1990	Feb. 1990	Mar. 1990	Apr. 1990	May 1990
CHAPARE									
Shinahota	30	30	30	17	10	10	10	12	10
Ivíragarazama	27	27	27	13	8	8	8	10	8
Eteramazama	40	40	40	13	8	12	13	14	11
COCHABAMBA									
Chaparena	45	45	45	26	17	13	10	14	15
LA PAZ									
Yungas	29	59	34	16	10	N/A	N/A	N/A	N/A
Asunta	62	62	48	31	39	35	27	43	47
Chulamani	83	97	68	47	52	48	40	55	63
Coripata	110	131	90	55	72	63	52	76	86

[1] Prices are for 1 carga of leaf (i.e., 100 lbs). Break-even point is $30.000. Colombian crackdown commenced during August 1989.

Mr. BRADLEY. Mr. President, this is an opportunity for us on the margins to begin to wean some of these countries from coca production and into other forms of crop production, particularly sugar which we are blocking by this effort.

One final comment on the drug question, Mr. President, and I know the distinguished Senator from Massachusetts will want to address this in greater detail. The American Council on Drug Education says the following: "Access to the U.S. sugar market for Peruvian peasants will not solve the world drug problem."

Unfortunately I agree with that. But it would, according to a study, provide Peruvian farmers with the suitable alternative crop that offers an opportunity for legal, safe, and livable profit.

Mr. President, the sugar policy runs counter to our efforts to eradicate coca production in many of the South American countries.

The sugar policy also threatens the environment, with the high loan rate, high rate of return, more acres in sugar production.

In the State of Florida, for example, since 1982 there have been 68,600 more acres of sugarcane production. The result of that, of course, is more phosphorus and nitrate pollution, moving into the Everglades threatening the fragile ecological system of the Everglades. Mr. President, that is not the only danger to the Everglades that is posed by sugarcane production, but clearly sugarcane production has been a major factor threatening that vital ecosystem.

So, Mr. President, sugar policy threatens the environment. Sugar policy also costs U.S. consumers. Take your choice. It is anywhere from $3 billion in cost, according to the Commerce Department, and $806 million, according to the FTC. However you cut it, it is a lot of money.

The Consumer Federation of America agrees with the proponents of this amendment. They support this amendment. That is why they have endorsed it because they recognize there are tremendous costs to consumers from the sugar program.

The opponents of the amendment have a nice chart that shows retail price, 41 cents in other parts of the world, 40 cents. They argue like it does not have much effect. We have stable prices. Stable prices only have an upside potential as I made the point earlier. But it ignores something called opportunity costs. We are not talking about simply what the price is now. We are talking about what the price could be if there was not a sugar program. In a world where market price in the world is 13 or 15 cents, it is definitely going to be a better deal for American consumers.

So, Mr. President, the Sugar Program is a bad deal for American consumers.

Finally, the Sugar Program I think runs counter to our efforts to get the European Community to reduce its price supports for sugar. The only way we are going to get the European Community to move on subsidies is if we act. Right now in the Uruguay round they point to the existence of the United States Sugar Program, GATT illegal declared, so they point to the existence of the United States Sugar Program as why they cannot move.

Mr. President, if we take this small step, 18 cents to 16 cents on the loan rate, we will shift the burden of proof into negotiations, and I think the result will be a much better chance to reduce those subsidies.

So, Mr. President, why are we wreaking havoc with the American farm program, pitting wheat farmers and soybean farmers against their best neighbors, assuring sugar farmers the highest total support of any other crop, higher per acre return than any

other commodity? Why are we frustrating our foreign policy efforts to promote democracy? Why are we undermining our attempts to eradicate the drug trade? Why are we endangering the fragile ecosystem in the Everglades? Why are we supporting the policy that makes the American food industry less competitive and depends on keeping thousands of workers underpaid, in horrible working conditions? Why we are casually passing the cost of over $1 billion to American consumers without concern?

Mr. President, I cannot tell you why we have done this. But I hope we will begin to change it today.

But I can tell you who benefits from the program. For 2.2 million farmers, not 1,000 sugar farmers, Mr. President, I am the first one to say that not all sugar farmers are rich; of course they are not. But I do know about 1,000 beet farms under sugarcane production, control 50 percent of all production. I do know that according to USDA In 1988 10 percent of all beet farmers accounted for 33 percent of all production. I do know that the largest sugarcane grower has 170,000 acres of cane in Florida, 40 percent of his State acreage. I do know that the sugar sales from that to be close to $240 million. I do know that the seven cane producers in the United States gross over $100 million. So I do know who benefits from these programs.

Mr. President, as I have said this does not eliminates the sugar program. This nicks it, cuts it from 18 cents to 16 cents. That is not a lot, but it is a beginning.

Mr. President, as I have talked to my colleagues on the floor and in the halls about this program, the same message comes back: We think you made some good points. but, you know, I got my crop, and if I go with you on sugar, well, my crop is going to be hit.

The result is, Mr. President, that we do not act against the program. That gives the entire farm program a bad name. Today is our opportunity to so act.

The PRESIDENT pro tempore. Who yields time?

Mr. LEAHY. Mr. President, how much time is there remaining to the Senator from Vermont in opposition?

The PRESIDENT pro tempore. The manager of the bill has 28 minutes and 50 seconds.

Mr. LEAHY. Mr. President, I designate the Senator from North Dakota in control of that time.

The PRESIDENT pro tempore. Who yields time?

Mr. CONRAD. Mr. President, I yield myself 4 minutes.

The PRESIDENT pro tempore. The Senator from North Dakota yields himself 4 minutes.

Mr. CONRAD. Mr. President, what we are being asked to do today is to engage in unilateral disarmament in an agriculture trade war. At the very time that we are in the midst of trade negotiations in Geneva, at the very time Europe is subsidizing their sugar producers at the rate of 30 cents a pound, when we only have a loan rate of 18 cents a pound, we are being told on the eve of those negotiations, let us unilaterally cut back.

Mr. President, I suggest that makes no sense at all. That would undermine our negotiations. In the midst of a trade war, we would be signaling retreat. We would never do that in arms negotiations. I see no reason to do it in trade negotiations.

Now we have heard the argument again advanced today that somehow if we would cut the loan rate for our farmers 2 cents a pound that all of a sudden drug production in the world would go down.

Mr. President, let us use some common sense. How can that be? The multibillion dollar drug cartel is somehow going to cut back on coca production? The facts are simply this: In Peru, according to the same study that the Senator from new Jersey cited, a Peruvian farmer can earn $9,000 a year producing coca. On that same amount of land for any legal crop, he can get $200. Mr. President, the coca is produced in the shadow mountains. Sugar would be produced down on the plain. So in order to accept the argument of the Senator from New Jersey, we would have to believe that these farmers are first going to move and, second, that they are ready to take a 98-percent pay cut.

Mr. President, let us look at history. There have been times we had no sugar program. We have had two times in the last 15 years with no sugar program. I think it is instructive to look at what happened. This chart shows what happened to U.S. sugar prices from 1947 to 1990 and focuses on the two periods in these yellow bars where we have no sugar program.

What happened? Prices absolutely skyrocketed. They went from under 25 cents a pound to 65 cents a pound, absolutely having a heavy hit on consumers and those refine sugar. And then what happened? Prices collapsed. And in the second period where we had no sugar program, exactly the same set of facts, sugar prices skyrocketed damaging consumers; then sugar prices plummeted, bankrupting producers, bankrupting refiners. That is the history. Mr. President, I think that is instructive.

Next I want to turn to the argument about the effect on consumers. We have heard much of that in this debate. This chart shows retail sugar consumer cost. The United States, 40 cents a pound; the worldwide average, 41 cents a pound; and in the developed world, the average is 44 cents a pound.

Mr. President, the charge that somehow consumers are disadvantaged just does not stand up. It does not stand the light of the evidence.

One other argument that we have heard advanced, Mr. President, is that somehow the sugar program is unfair to other commodities. Let us just take a look at the average reduction in support from 1981 to 1990. This chart shows very clearly the weighted average for corn, wheat, cotton, and rice. We have seen a reduction of about 22 cents.

The PRESIDENT pro tempore. The Senator's 4 minutes has expired.

Mr. CONRAD. Mr. President, I yield myself 1 more minute.

The PRESIDENT pro tempore. The Senator is recognized for 1 additional minute.

Mr. CONRAD. We see a 22-cent reduction for the other four major commodities. For sugar, we have seen a reduction of 23.5 percent. If this cut were made, it would be 32 percent for sugar. Clearly, sugar would be asked to take more of a reduction than any of the other commodities.

So, Mr. President, this sugar program does not cost consumers in this country. It is good for producers. And we believe it ought to be continued. To do otherwise, Mr. President, would signal unilateral disarmament on the very eve of trade negotiations.

Mr. President, I yield 1 minute to the Senator from Nebraska.

Mr. EXON. I thank my friend and colleague from North Dakota.

Mr. President, the big industrial users of sweeteners, the supporters of Senator BRADLEY's effort to cut 2 cents off the sugar loan rate, have taken out ads and have been distributing a button around our Capitol Hill offices with the message "2 cents makes sense." It certainly does make sense—for these big industrial user companies. It means $500 million a year in increased profits for them, not help for consumers.

We should not forget these profit increases come out of the pockets of our Nation's farmers and from the earnings of sugar exporting countries to our market. At this year's import level, these countries will lose more than $490 million, while U.S. farmers will lose some $400 million.

Yes, 2 cents makes sense for those sweetener using companies. It makes absolutely no sense, however, for our Nation's sugar and corn sweetener producers nor as a matter of public policy. This is clearly a case of helping the greedy at the expense of the needy.

One could perhaps justify considering such action if these user companies were struggling to survive. Nothing could be further from the truth, however.

We are talking about some of the most prestigious, profitable corpora-

tions in America. These companies are doing extremely well. According to the January 1990 Forbes "Annual Report of American Industry," the beverage and food processing industries are among our Nation's most profitable with an annual average return on equity over the past decade of more than 20 percent. Their earnings growth has exceeded 16 percent per year over the past 5 years in the beverage industry and 14 percent for the food processing industry. I support having profitable food processors as much as anyone else, but I think its time we put this issue in perspective. A 2-cent-a-pound reduction in sweetener costs means $500 million to these companies.

We should remember that these profits have been secured at a time when retail sugar prices have increased by a mere 6 percent during the decade of the eighties. Soft drink prices, on the other hand, have increased 25 percent; candy 45 percent, cookies and cakes 65 percent and cereals by 94 percent. Are we supposed to believe a reduction in their sweetener costs will mean lower consumer prices? We know that a reduction in the price of sugar—a product which accounts for 1⅓ cents in the 45-cent candy bar, less than 2 cents in a can of soda pop, and a penny in a package of cookies—will not be passed through to the consumer. These big companies would hardly be pushing the 2-cent reduction if they were planning to pass it on.

Yes, a 2-cent reduction in the sugar support level makes sense from their perspective. It makes no sense as a matter of public policy, however. Farmers are expected to continue in business with no increase in support levels, and in this case with a $100 an acre reduction in gross return, while big food processing, beverage, and confectionery companies add $500 million to their annual profits. Speak of equity. It certainly isn't found in this proposal.

I urge my colleagues to oppose the Bradley amendment.

Mr. CONRAD. Mr. President, I yield 4 minutes to the Senator from Louisiana.

The PRESIDENT pro tempore. The Senator from Louisiana is recognized for 4 minutes.

Mr. JOHNSTON. Mr. President, I was sorry to read in the New York Times that States in the Northeast have an economic slowdown. But, Mr. President, I wish my State of Louisiana had the kind of slowdown that they have in the Northeast. Our per capita income is about one-half of what it is in Connecticut. And most of the States in the Northeast have incomes far in excess of what we have in my State of Louisiana.

So, Mr. President, when a proposal like that submitted by the Senator from New Jersey, which would take 15 to 18 percent of our sugarcane farms in Louisiana which employ 24,000 Louisianians, we do not take very kindly to that kind of a suggestion that those who live in the Northeast would export our jobs. Now that is exactly what we have involved in this case. I think it is not fair, and I think it is not good economic policy.

Mr. President, as if the oil slowdown was not enough, last year we had the coldest weather of the century which wiped out 60 to 100 percent of the sugarcane crops. So we have devastation, economic devastation in these parishes—parishes are counties to you.

So, Mr. President, please, I ask my colleagues, do not do this unless it is absolutely necessary because it will devastate my State.

Mr. President, it is incredible that a program which has no net cost to the taxpayer should be the one under attack. This does not cost the taxpayer one thin dime, but we are told the consumer pays. Mr. President, that simply is not correct.

This year, in January, the cost of a Coca-Cola in the Hart Senate Office Building went up from 50 to 65 cents. The loan rate on sugar did not change, Mr. President. And the amount of sugar in that 65-cent soft drink for which they charged more elsewhere is only 2 cents. A 45-cent candy bar has 1.3 cents of sugar in it.

The increased cost of confections and soft drinks is not due to sugar.

The real danger is not to the consumer. The real danger is to American jobs. I do not know why the foreign aid group, the goody-goody softheaded American job exporting gang wants to get together and export still another species of American jobs. We see it in industry after industry. We destroyed the textile industry in this country and shipped the jobs overseas. Now the agricultural industry.

We have a Super 301 trade bill where we gave the President the power to stop discrimination against American products. And what do we hear? Let us keep a level playing field. So the President says.

This country has to wake up and stop the export of our jobs. We do it day after day. What does the Senator from New Jersey tell us, Mr. President? He says if we will cut our price, cut what he calls a subsidy—and it is not a subsidy, it is a no-net-cost program, but our loan rate is 18 cents—he said maybe then the people in the European Economic Community will cut their price.

The PRESIDENT pro tempore. The time of the Senator has expired.

Mr. JOHNSTON. I wonder if the Senator will yield me 1 more minute.

Mr. CONRAD. I would very much like to accommodate the Senator from Louisiana, but we are badly oversubscribed on time. I very much appreciate his contribution.

The PRESIDENT pro tempore. Who yields time?

Mr. CONRAD. I yield 2 minutes to the Senator from Wyoming.

The PRESIDENT pro tempore. Mr. Simpson is recognized for 2 minutes.

Mr. SIMPSON. Mr. President, I yield 1 minute to my colleague from Wyoming [Mr. WALLOP].

The PRESIDENT pro tempore. Mr. WALLOP is recognized for 1 minute.

Mr. WALLOP. Mr. President, I thank my colleague, Senator SIMPSON. I would say the arguments that have been made about drugs, about us leading GATT, about us doing all of these noble things, are simply specious on their face; they bear no philosophical nor logical examination.

The sugar program is very important to my State, Mr. President. It not only provides jobs in agriculture but it provides jobs in sugar refining.

I rise to join many of my colleagues in opposition to the amendment offered by the Senator from New Jersey calling for an 11-percent cut in the sugar support price. The sugar program, along with numerous other programs vital to the West, Midwest, South, and Southeast has been targeted by a coalition of Senators, who I believe are unaware of how their actions will hurt agriculture. The amendments couched in appealing arguments, are misguided and would undoubtedly have a disastrous economic effect on many States, including my State of Wyoming.

While reform in agriculture is certainly possible and needs to be seriously considered, it must be done in an orderly, equitable, and across-the-board manner. Many farmers and ranchers in my State would strongly support such liberalizations in our domestic agriculture policy, as would I.

Mr. President, there are numerous reasons I rise to voice my support for a continuation of the current sugar program. Primary among them is the economic impact on the least populated and most rural State in the Nation—Wyoming. Wyoming has seen its share of difficult economic times over the past decade with the decline of the energy industry. The national media has been more than willing to recount Wyoming's troubles over the last decade. Well, Wyoming is making a come back and the sugar program has played an integral role.

The Wyoming sugar beet industry has provided consistent and reliable economic activity. Our farmers in Wyoming have become some of the most efficient producers of sugar beets in the country and could no doubt compete with other world producers if placed on a level playing field. The Wyoming sugar beet industry provides roughly a quarter of a billion dollars of economic activity in our State; almost 3 percent of Wyoming's gross

State product. The sugar beet industry as a whole supplies the equivalent of 5,435 jobs for Wyoming's economy and sugar is Wyoming's only true value added product.

But, beyond the impact of the sugar program on Wyoming and the other sugar-producing States—sugar beets have a global value that could play a decisive part in a final negotiated agreement on agriculture barriers in the GATT talks which are scheduled to come to a close in December of this year.

One of President Bush's most notable goals in these talks is to negotiate reductions and liberalizations in worldwide agricultural trade. The American farmers, by far the most efficient and productive agricultural producers today, would dominate to an even greater extent the world markets if allowed to compete in a fairer marketplace. The effective conclusion of these talks between more than 100 nations hold the key to achieving the level playing field which I believe is sought by each and every one of my colleagues.

However, a unilateral cut in any commodity and especially sugar before the conclusion of this round of GATT talks in December is unwise. It not only reduces America's bargaining power at the negotiating table in relation to our own domestic producers, but realistically threatens the overall outcome of these negotiations. A unilateral reduction in the U.S. sugar program will be counterproductive to the negotiated reductions being sought by the USTR.

Possibly the great attribute of the sugar program in the United States is the stability it provides in what has historically been an unstable world sugar market. It exists through necessity. Congress has seen the effect of legislating away sugar support many times in the past. Yet as time passes and memories fade, many forget the true rationale for the program and mount yet another attack. We saw this happen in 1974 and 1979. The result? Erratic sugar prices which hurt both the consumer and the producer. Are we going to let it happen again in 1990?

Who would benefit from a 2-cent cut in domestic sugar prices? It is doubtful that the consumer would benefit. The farmer certainly would not benefit. The real beneficiaries will be foreign producers—like the European Community and Cuba—and domestic manufacturers of sugar containing foods—Mars Candy Co. in New Jersey.

Mr. President, I am certainly not against assisting the economies of the CBI countries and competing with the net exporters out there supplying the world market. But with the kind of proof and documentation we have about barriers and supports around the globe propping up so many sugar producers in their foreign countries, I find a real lack of credibility in the arguments being put forward—especially since the CBI countries support the higher 18-cent price support level and oppose the Bradley amendment. Quota levels for CBI countries have also rebounded and are currently estimated at 2.03 million tons—approximately 25 percent of all sugar used in the United States. On top of this, USDA and industry analysts have documented time after time that reductions in the price of a raw material such as sugar into the manufacturing process seldom if ever results in a reduction in price. In fact, I call my colleague's attention to a Wall Street Journal article written in 1981, but certainly still valid, about the 70-percent fall in world sugar price between October 1980 and October 1981 and its effect on domestic prices. This was, coincidently, one of those volatile periods without domestic supports. The United States saw a drastic fall in sugar prices—you might ask, what affect did this fall have on the consumer price of the 14 largest sugar consuming products being manufactured in the United States? Nothing. In fact, Mars Candy of New Jersey even boosted their prices 3.4 percent in the face of a 70-percent drop in sugar price. And the proponents contend that the 2-cent drop—11 percent—in sugar price will result in lower consumer prices. I strongly disagree. What will result from a cut in support price, as documented by USDA, is a savings by the manufacturer of $600 million annually and additional profits by sweetener users and not savings passed on to the consumer.

It comes down to a question of whether to continue to support the family farmer at the 18 cent level until our President and trade negotiators are able to bring some equity to one of the world's most distorted commodity markets. The 18-cent price levels the playing field for over 360,000 farmers nationwide—an $18.5 billion industry which is one of a dwindling few infrastructures in many rural States.

The case against this reduction in sugar price at this point in time is strong. The policy change would hurt: First, our country's efforts to liberalize agriculture in the GATT talks; second, it would hurt the CBI countries who support the 18 cent support price; third, it would certainly hurt rural America and our farmers; and fourth, the individual consumers would not benefit.

Mr. President, I hope this amendment is defeated.

SUGAR POLICY HAS NOT INCREASED DRUG PRODUCTION

CBI AND OTHER SUGAR EXPORTERS TO UNITED STATES: IMPACT OF U.S. POLICY

Mr. President, CBI countries—Bolivia, Uruguay, Ecuador, Peru, Costa Rica, El Salvador, Honduras, Panama, and the Philippines—have expressed support for the continuation of the sugar support prices at 18 cents. The 2 cent reduction will reduce income of countries exporting sugar to the United States by $35 million annually. It is estimated this decrease in income will not be made up by increased quotas. CBI will benefit more from the current program than from the revision being proposed. Imports peaked in 1984 at 3.09 million short tons and is estimated this year at 2.03 million short tons.

QUESTION ON DRUG PRODUCTION: HAS COCA PRODUCTION INCREASED?

Has United States sugar policy—due to reductions in quota sugar imports—resulted in the spread of cocaine production in Peru, Bolivia, and Colombia? The idea that sugar growers are switching to coca is absurd.

Coca is a highland crop, typically grown on small family plots. Sugarcane is a lowland crop, typically grown on large plantations. We do not know if coca production has increased—especially due to our sugar policy. I read in the paper sometime ago that cocaine had gone up in price substantially here in the United States because of a purity problem. It seems this would be a much more logical argument for an increase in production of coca in Colombia or Peru.

However, USDA estimates that sugarcane production in Colombia, Bolivia, and Peru have increased. A number of countries importing to the United States have failed even to meet their quota—Peru, Bolivia. Peru, in fact, is a net importer of sugar and merely funnels sugar through their country from the world market and into the United States.

Countries such as Bolivia, Uruguay, Ecuador, Peru, Costa Rica, El Salvador, Honduras, Panama, and the Philippines, whose United States import-quota allocations constitute a large share of their total sugar exports, would gain scant benefit from any increase in the world market price which may result from our expanded dependence on world market supplies, which would occur if domestic production declines. Those quota rents are sizable and the increased earnings of the countries named, assuming 1989 average world prices for the current 21-month quota period and a domestic price equal to the MSP, will be more than $100 million. For the Philippines alone, quota rents will be more than $55 million at the present quota level and for all exporters to the United States market, they will exceed $225 million.

Some critics have gone so far as to suggest that reductions in United States quota sugar imports, which peaked at 3.09 million short tons in calendar 1984 and are estimated by USDA at 2.03 million this year, have

contributed to the spread of cocaine production in Peru, Bolivia, and Colombia. The allegation that sugarcane growers are switching to coca is absurd, for a number of reasons:

First, coca is a highland crop, typically grown on small family plots. Sugarcane is a lowland crop, typically grown on large plantations.

Second, according to USDA estimates, harvested sugarcane area for these three countries has actually expanded. This year's estimated combined area of 219,000 hectares is up 5 percent from 1982 to 1983 when U.S. import quotas were first in force, and is up 11 percent from a decade ago.

Third, though their sugar quotas have recently increased, Peru and Bolivia failed even to fulfill their allocations in recent years. Peru, in fact, is a net importer of sugar. And sugar output in Colombia, the largest producer of the three by far, is estimated this year to be about 15 percent above its production levels of the early 1980's. Colombia, by the way, is not a major coca grower but a cocaine processing country.

Fourth, with sugarcane harvested area in Latin America estimated at 2.85 million hectares and total coca area estimated at 42,000 hectares, the scale of the two industries is so different as to make any comparison belabored, to say the least.

In conclusion, the U.S. sugar program is under attack for three reasons:

First, it is under attack because access to dumped sugar on the world market would increase the profits of the already very profitable large industrial users of sweeteners who are the buyers of nearly all corn sweeteners and a large majority of sugar. They have long conducted a heavily financed expert public relations campaign in their effort to get such access.

Second, it is under attack by foreign producers seeking to make the United States more dependent on sugar imports and to counter the threat posed by the expanding corn sweetener industry.

Third, it is under attack because it is a complicated market and program that is not easily understood. Opposition arguments make great 30-second sound bites. Defense of the program requires a greater depth of understanding.

The current sweetener program, and it is a sweetener program, for it also protects the large very efficient corn sweetener industry from the severe losses which would result from its having to compete with dumped sugar, is working and working well.

COCAINE AND SUGAR—NO LINK

One of the Nation's largest sugar users is promoting a misinformation campaign aimed at discrediting the sugar program and attempting to draw some link between coca and sugar. There is no link.

These are the facts:

First, Peru currently consumes more sugar—750,000 tons—than it produces—550,000 tons—thereby making it a net importer of sugar.

Second, Peru is not able to deliver its current quota of sugar to the United States.

Third, Peru has been a net importer of sugar for 7 of the last 8 years according to the Sugar Year Book published by the International Sugar Organization.

Fourth, in 1970 Peru nationalized its sugar industry and gave it to sugar employees who formed co-ops which have never produced as much as they did under private ownership.

Fifth, coca plants grown in the cloud mountain area of Peru in small plots tended by peasants. Sugarcane, a tropical grass, grows in the valleys in large units hundreds of miles from the mountainous areas.

Sixth, sugarcane, because of the logistics of growing and harvesting, must be grown near a mill and moved by large machinery to be efficient. It is not grown by small farmers successfully anywhere in the world. Sugarcane industries are large labor employers.

It is most disturbing that a major manufacturer would stoop to this misinformation tactic. This type of dirty tricks campaign by one of the leading sugar users is a cheap shot. It's untrue.

The value of sugar in a candy bar is less than 1.5 cents. The proposed cut in the sugar program would cut the manufacturer's unit cost by one and one-half tenths of a penny but would be a windfall to the company of millions of dollars in additional profits—at the expense of America's sugar farmers.

Mr. President, I ask unanimous consent two articles be printed in the RECORD. The first is a Wall Street Journal article, December 23, 1981, by G. Christian Hill.

The point he makes in this article is that no matter whether sugar increases or decreases in price, prices of products containing sugar always increase.

A Department of Agriculture survey showed the cost of 14 sugar-heavy products ranging from candy bars to soft drinks rose 8.4 percent during this 70 percent drop in world sugar price between October 1980 and October 1981.

Consumers will not save from a drop in the price of sugar.

The second is from the New York Times, June 3, 1989, a letter to the editor by John Kingery, former associate general counsel for the USTR.

He states, "the United States should not be required to disarm itself unilaterally in the highly restricted world sugar market."

He asks the writer of a New York Times article who blasted the sugar program—

Why are you so quick to blame America and cry Mea Culpa? Remember, in sugar the major price depressant is the massive dumping of highly subsidized sugar into the world market by the European Community.

Sugar is our exception and other countries rule.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, December 23, 1981]

FALLING SUGAR COSTS GENERALLY FAIL TO BRING DOWN RETAIL FOOD PRICES

(By G. Christian Hill)

Sugar is one of the largest costs at Bierman's Bakery in Los Angeles, and the price of refined sugar has dropped by about half in the past year. But the little shop on Wilshire Boulevard recently raised the price on its sugar-laden almond croissants by five cents each.

That's Gray's Law of Sugar at work. Its propounder, Agriculture Department economist Frederick Gray puts it this way: "Whether sugar increases or decreases in price, prices of products containing sugar always increase."

With exceptions, the law generally applies to processed foods. When the cost of their main ingredients rises sharply in the futures or cash markets, food processors are quick to raise prices and blame the increase on costs. When commodity prices fall, the processors often raise their prices, too, or at least leave prices unchanged, but neglect to mention declining costs. Sugar offers as sweet an example as any. From October 1980 to October 1981, an oversupply of "world," or nonsubsidized sugar, forced the price down by about 70%. But according to an Agriculture Department survey, the cost of 14 sugar-heavy products ranging from candy bars to soft drinks rose 8.4% over the same period.

There are reasons why falling sugar costs fail to bring retail prices down. For one thing, although the cost of sugar is an important one for candy makers, soft-drink bottlers and others, there are other costs, too, and they may be rising while sugar prices are falling.

For another, it's convenient for processors to justify increases when sugar prices have risen, even though, other cost increases might have encouraged rises anyway. The cost of sugar accounts for about 15% to 20% of the price of a bottle of pop. Packaging costs, including the costs of plant and labor, account for about a third, analysts figure, and distribution costs, 11%.

Yet the discrepancy between sugar costs and retail prices seems wider than usual over the past year. Consider that most sugary of all retail products, sugar itself. Since October 1950, its wholesale list price in the Northeast has fallen by 53%. The retail price, however, has declined by only 33%. In the last big sugar slump, in 1975, the retail price fell 55% against a decline in the wholesale price of 61%.

SHIFTING MARGINS

One reason why sugar savings aren't getting passed along, sugar brokers and other specialists believe, is that food processors, wholesalers and retailers are keeping more of the savings for themselves. That's in an attempt to repair profit margins eroded by

years of inflation or market competition. While some companies may be keeping prices firm despite falling sugar costs, others may be increasing their profits even more by raising prices.

"That is what happens in an inflationary spiral," an officer of a big sugar cooperative says. "A drop in sugar prices is like a drop in the price of tires to auto makers. They use that margin to make up losses from cost increases they can't control."

Or so, apparently, Hershey Foods Corp., Hershey, Pa., is doing. Hershey hasn't raised the price on its Hershey bars since April 1980. But it endured big sugar-cost increases that year. This year, with sugar depressed, Hershey is believed to be using its savings to compensate for what happened in 1980.

"If a manufacturer goes through a period of rising commodity costs, he'll try to raise prices as quickly as possible, but typically can't recover all the costs because of consumer resistance," says Lee Tawes, a sugar-industry analyst. "When prices come down, he won't cut prices unless forced by competition. He'll typically take a bigger margin."

Hershey is hardly encouraged to cut prices. One of its big competitors, M&M-Mars Inc., Hackettstown, N.J., has dealt with the sugar market in a different way and actually raised its prices by 3.4 cents a bar in September. The company cited higher costs. It also suggested that because Mars bars are bigger than Hershey's and other rivals, it could hold onto its market share. "Even at our new prices, our bars will be the best value in the chocolate bar market," said Jay Langdon, director of marketing, when Mars raised prices.

PRICING PRESSURE

Mars' competitors insinuated profiteering. After all, they observed, not only sugar costs but also cocoa costs were depressed. Hershey even took out advertisements saying it didn't consider a price increase justified. Curiously enough, however, Hershey remains under some pressure to raise its prices, too, even though H may genuinely prefer not to. The reason is that wholesalers and retailers prefer to price like products alike, so that a price increase by an aggressive marketer often leads to price increases by its competitors.

In early 1980, for instance, chewing-gum makers increased their wholesale prices to raise the pack of gum at retail by five cents. Wrigley, a big gum maker, at first didn't go along. Even so, retailers raised the price of Wrigley's gum by five cents a pack. They told Wrigley that a standard price on chewing gum made it easier for cashiers. In the case of Wrigley's gum, of course, raising the retail price with no increase in wholesale cost made Wrigley's much more profitable for the retailers.

"The retailers were enjoying higher than normal margins, and we were paying for it." Says Bill Piet, an assistant vice president at Wrigley. "Our margins were going down"—because of other costs—"and the consumer wasn't benefiting." Finally Wrigley, too, raised its prices.

Similarly, wholesale and retail prices of sugarless drinks, such as Tab, rose right along with sugar-filled drinks last year. Neither bottlers not retailers like to charge distinctly different prices on such beverages. Indeed, beverage bottlers, perhaps even more than other sugar users, have benefited from sugar's declining cost. They're getting more money for nonsugar concoctions and paying less for sugar. Coke bottlers, at the end of October, for instance, were being charged by Coca-Cola Co. only $2.64 a gallon for Coke syrup, down from $3.73 in October 1980, according to a bottler.

But Coke bottlers themselves don't keep all the savings. Most of Coca-Cola's 550 contract bottlers pay for the sugar in their syrup at a price based on sugar's average publicly listed wholesale price each quarter. But sugar brokers say that Coca-Cola gets much of its sugar directly from producers and pays refiners a "tolling fee" to process it. Wholesale prices have fallen less than producers' prices. Even when Coca-Cola buys at wholesale from refiners, the brokers say, its cost are at least $3 to $4 a hundredweight less than the wholesale price, and it gets high-fructose corn syrup, a sugar substitute, for about $1 below wholesale.

Coca-Cola is the biggest sugar consumer in the U.S. It buys, industry estimates have it, about a million tons of sugar and fructose a year. A broker estimates that the difference between the prices at which Coca-Cola can buy at wholesale and the wholesale list price amounts to more than $25 million a year. Coca-Cola won't discuss its sugar cost and price. But others in the business think that much of the cash generated by its spread between cost and price goes to finance Coca-Cola's marketing battle with Pepsi-Cola.

PRICE "UMBRELLA"

To the extent that it means discounting Coke prices in certain competitive markets, the consumer benefits. But overall, sugar brokers say, Coca-Cola's pricing policy maintains an "umbrella" over prices, under which other soft drink companies can keep their own prices higher than they might otherwise be able to.

Yet another factor influences sugar-product prices in the U.S.—the government. Since 1977, it has supported the price paid for U.S. produced raw sugar at 15 cents to 16 cents a pound by imposing duties and fees on imported sugar that accounts for half of U.S. consumption.

Under a pending farm bill, the support level would rise to 18 cents a pound by 1984. The aim is to protect U.S. sugar growers against foreign competition.

Sugar specialists estimate that sugar consumers in the U.S. pay $300 million a year in higher prices for each cent that the U.S. support price exceeds the world market price on sugar. It means that at the current support level, the additional yearly cost is running close to $1 billion.

That, complains the Ohio Soft Drink Association, "contributes to inflation, constitutes unfair taxation, benefits a select nonvital industry at the expense of American consumers and makes a mockery of the free-enterprise system."

[From the New York Times, June 3, 1989]

SUGAR QUOTA OUR EXCEPTION, THEIR RULE

To the Editor:

There you go again. In your May 23 editorial on trade, you claim that U.S. sugar quotas serve as a good example of why we should not accuse anyone else of unfair trade practices.

As the lawyer who wrote the briefs in the case you cite with regard to the General Agreement on Tariffs and Trade, I can assure you that no one claimed the sugar quotas were wise policy. Indeed, the U.S. position in the Uruguay Round of trade negotiations concerning the unwinding of all agricultural trade restrictions implicitly stated that such quotas were unwise. However, the U.S. should not be required to disarm itself unilaterally in the highly restricted world sugar market.

You ignore two important aspects of the GATT case. First, the country bringing the case, Austrialia, has had an absolute ban on imports of sugar for 70 years. Last year it announced a "reform" with a proposal to change from a ban to a tariff. However, Australia admitted to the International Sugar Organization that, at least for the next several years, the tariff will be so high that it will have the same effect as a ban. Now that is hypocrisy.

Also, during the GATT panel proceeding, the panel asked just how widespread restrictions such as the U.S. sugar quotas were. The U.S. quotas were administered under a tariff provision negotiated in a GATT round almost 40 years ago. We found many such restrictions in others' tariff schedules, including an illegal local content rule on tobacco in Australia. In particular, the European Community has so many quotas in its tariff schedule that we had a list several pages long after reviewing only a fraction of the E.C. schedule.

Why are you so quick to blame America and cry mea culpa? Remember, in sugar the major price depressant in the world is not the U.S. quotas, it is the massive dumping of highly subsidized sugar into the world market by the European Community. The lesson of the sugar case is not that we are as bad as everyone else; it is that an exception to our general practice is the rule for most of our trading partners.

JOHN C. KINGERY.

SIMSBURY, CONN., *May 23, 1989.*

The PRESIDENT pro tempore. The Senator from Wyoming [Mr. SIMPSON].

Mr. SIMPSON. Mr. President, I thank my colleague from North Dakota. Indeed, the sugar business is big business in the State of Wyoming. It may not sound that way to others, but to a small State of 470,000 people, the sugar industry we have there is obviously a critical business. We should not be weakening our GATT negotiating position and targeting farm bill benefits to profitable international corporate giants.

I earnestly urge the defeat of the amendment. My State has very limited options for agriculture production. Maintaining the sugar loan rate, which does not cost a nickel, will help a very important sector of the State's economy. It is a critical matter for our State. We need your help to reject this ill-advised amendment. It is a killer to business in the State of Wyoming and the Northwest.

Mr. President, these are certainly critical times with regard to farm bill legislation. I regret that I was not able to participate in the debate last Friday. I was necessarily absent at that time to greet our fine President as he paid a visit to my native State of Wyoming to assist in celebrating our centennial. Yesterday, I had a field hearing in Wyoming which had been scheduled many months ago on the critical issue of health care issues and rural and, so called, frontier areas in Wyoming and the West. Thus, I did not arrive back in the city of Washington until nearly 10 o'clock last night.

I am here today to strongly oppose the amendment offered by my fine friend—and he surely is that—my colleague from New Jersey. I urge my colleagues to join me in rejecting this amendment.

The Senator proposes to increase sugar quotas by reducing the current support price level to a level that would be extremely injurious to producers in my State. The proposed level is not economically feasible for sugar processing in Wyoming; 74,000 people in 14 States are employed in the sugar beet industry in full and part-time jobs on the farm and in the factories; 361,000 people are dependent on the domestic sugar industry for their livelihood.

In my home State of Wyoming, 584 farmers produce sugar beets on 62,000 acres. We have three sugar factories in Wyoming—at Torrington, Worland, and Lovell. These factories provide 1,154 jobs and account for 6 percent of the total nonfarm employment in the three counties in which they operate. They have a combined payroll of $10 million. That may not sound very "big" to some one from the Northeast—but it sure is in Wyoming.

Wyoming sugar growers provide 896 full-time jobs and 1,752 seasonal jobs. Wyoming sugar growers are efficient producers who would be able to compete in a totally free and unsubsidized international marketplace.

The production of refined sugar from sugar beets is the largest processed food industry in Wyoming and sugar beets are the highest value cash crop in my State.

Sugar producers don't receive USDA checks. They simply are not contributing to the Federal deficit. This is a no-cost program.

We must not forget that every major sugar producing nation in the world provides some sort of economic incentive or protection to their domestic sugar producers.

The Uruguay round of GATT is in the midst of negotiation for a level international playing field for trade. Why should we be giving away part of our sugar program now? This move could result in a further reduced sugar loan rate in the near future. We should remain patient and let the Uruguay round be completed before we start making rash policy decisions. We should negotiate our position on sugar from strength—not from an already weakened industry standpoint. On the surface, it might be argued that consumers are being overcharged for sugar, but this just isn't true. One of the very staunchest allies of this effort to reduce the sugar loan rate is the food and beverage industry.

From a profit perspective, the food and beverage industry is No. 2 in the Nation. Just take a look at the market reports and the activity in their various common stock trading in the past year. Now there is a place to use the word "big". This industry is clearly very stable and exhibits continual growth patterns for the future.

Annual sales projections for the 1990's for this industry illustrate how sweet it really is. Around $200 billion annually over the next 5 years. How can a sugar loan rate reduction be so important to this extremely profitable industry?

Each person in the United States now consumes more than two 12-ounce cans of "sody pop" a day, with retail spending for soft drinks topping over $43 billion in 1988 alone.

Do we really expect these giants to reduce the prices they now charge when they are seeing this amount of profit? If is clear that these industries are not endangered and continue to improve their profitability.

Coca-Cola and Pepsi have bragging rights for a combined 1990 estimated profit of $2.5 billion. Sales for Coca-Cola increased $5.9 billion in 1980 to over $8 billion in 1988, an increase in 41 percent.

Coca-Cola is leading the pack in the battle to lower the sugar loan rate by 2 cents. This is an extraordinary company—a superbly managed company with a great history of support of social, educational and cultural activities throughout the world. A remarkable man, Robert W. Woodruff—who was a close personal friend of mine and my family—was a great leader of that company for many years. He was the boss in every sense. He owned a ranch in Wyoming next to the small place of my parents'. He had an affection and love for Wyoming that was rich and deep. He would be deeply and personally distressed to see what his company's campaign and activities in this legislation would do to Wyoming—the State that he loved so thoroughly. This legislation does have just that kind of impact. Such a reduction will give this giant cheaper sugar to increase its profit even more. The argument for cheaper consumer prices for products that contain sugar doesn't ring true. The real fact of the matter is that if the loan rate is reduced; private industry will see higher profits; producers will see additional declines and be faced with the competition of increased imports.

We should not be weakening our GATT negotiating position and targeting farm bill benefits to profitable international corporate giants. Therefore, I earnestly urge the defeat of this amendment.

My State is faced with very limited options for agricultural production. Maintaining the sugar loan rate will keep alive a very important sector of my State's economy. This is a critical matter to my State. Critical. We need your help—those fellow Senators on the floor—to reject this ill advised amendment. It is truly a killer to a great business in Wyoming and the West. We urge your rejection of it.

The PRESIDENT pro tempore. Who yields time?

Mr. BRADLEY is recognized.

Mr. BRADLEY. I yield 4 minutes to the distinguished Senator from Washington.

The PRESIDENT pro tempore. The Senator from Washington is recognized.

Mr. GORTON. Mr. President, my opposition to the sugar program is not of recent origin. In fact, I was a cosponsor, along with Senator BRADLEY, of an amendment to the 1985 farm bill designed to reform the sugar program. The failure of that amendment has cost the American consumer billions of dollars for no good purpose. So this year I am supporting once again the efforts of the Senator from New Jersey.

Mr. President, frustration with the sugar subsidy and quota program has been building since it was reinstated in 1982. By now, most of us are familiar with the legacy of this failed program. What is that legacy? High consumer prices for sugar, lost jobs in sugar refining and sugar using industries, harm to other U.S. farmers, damage to trading partners—especially various impoverished developing nations, and finally the violation of international trade laws. In short, the sugar program is bad consumer policy, bad agricultural policy, bad foreign policy and bad trade policy.

The amendment offered by the distinguished Senator from New Jersey is a necessary, reasonable and all-too-modest first step toward restoring balance to U.S. sweetener policy. Under current law, Congress provides an 18-cent-per-pound loan for sugar producers. Because the program must be run at no cost to the Government, however, sugar imports must be restricted to keep the domestic price of sugar above the 18-cent loan rate. The result is a domestic sugar price nearly double the world price. This amendment would reduce sugar price supports by just 2 cents and thus allow the Government to ease restrictions on sugar imports.

What effect would this reduction in the support price have? On the roughly 12,000 sugar beet and cane producers, only a modest and affordable effect. In the United States, sugar producers are among the most profitable farmers in the Nation. The average sugar producer in the United States earns over $400 an acre. Compare that figure to the average wheat grower who makes approximately $130 per acre.

But what effect would this amendment have for the consumer? Even though the 1984 farm bill mandated that the sugar program be run at no cost, it annually costs several billion dollars. Who bears this cost? The con-

sumer. Last week, sugar sold on the world market for approximately 12 cents per pound. Domestically sugar sold for about 23 cents a pound. The 11-cent differential between those two markets is the smallest in many years.

As a consequence of the program, the average retail price for a pound of sugar today is an inflated 42 cents. This amendment, Mr. President, would save consumers over half a billion dollars a year. It is outrageous that the Members of this body should defend this program on the grounds that it is cost-free to the Treasury while they impose outrageously higher prices on every American sugar producer.

In addition to overcharging every retail consumer, the present program causes many of our sugar-using industries—like candy manufacturers—to be noncompetitive in the world markets, costing us at least as much in export income as a more liberal policy would.

In addition, American agriculture would benefit from increased sugar imports and a lower sugar support price. As sugar imports increase, capital in sugar exporting countries also increases. With the increased revenue derived from expanded exports, quota-holding countries will have more money to spend on U.S. farm and industrial products.

This amendment also will place the sugar support price in line with other commodity support prices. The 1985 farm bill required that all the major commodity programs be cut by 10 percent. The sugar program escaped these cuts. This 2-cent reduction, roughly 10 percent of the current sugar support level, would restore the balance among major commodity programs. Yet even with the reduction, sugar would remain among the most profitable crops in the Nation.

The consumer and the farmer are not the only people who stand to benefit by a reduction in the sugar-support price and increased sugar imports. The quotas squeeze on sugar effectively denies access for many poverty-stricken, developing nations to the world's largest market. Consequently, many Third World countries lose the opportunity to market one of their principal sources of income.

Ironically, it is to these same countries, to the Philippines, to Caribbean and Latin American nations, that the United States sends billions of dollars in aid each year. Elimination, or at least a reduction, of the sugar price support would allow us to raise our quota levels and open or borders to the sugar exports of these developing nations and, probably, to lower our foreign aid to them.

Mr. President, last year, while the United States was citing Japan, India, and Brazil for unfair trade practices, Australia was appealing to GATT about our sugar quota system. And winning. Apparently, we want other countries to accept our view of what trade rules should be—but we're not living by the trade rules that the industrial world accepted long ago. Is that equitable? No, it simply is bad trade policy.

Mr. President, there are many other reasons to adopt the amendment offered by my distinguished colleague from New Jersey. But the overwhelming reason is that a 2-cent reduction in the sugar loan rate makes sense because it is fair to consumers, fair to industry—both agriculture and manufacturing, and it is fair to our trading partners and allies. This amendment will put 2 cents worth of fairness back in our Nation's one-sided sugar policy.

The PRESIDENT pro tempore. The Senator from North Dakota.

Mr. CONRAD. I yield 4 minutes to the Senator from Minnesota.

The PRESIDENT pro tempore. The Senator from Minnesota [Mr. BOSCHWITZ] is recognized for 4 minutes.

Mr. BOSCHWITZ. I thank the Senator from North Dakota. Some years ago when the Reagan administration decided they would propose to GATT that all tariffs would be phased down, and trade impediments be eliminated, only one agricultural organization came to them and said, "We agree with that; that is really what we want." That was the sugar producers.

They said they did not want subsidies. They did not want particular preference in the world market. They would compete on a fair world market.

This amendment implies that the high price domestically is caused by the loan rate in sugar. "There is definitely going to be a better deal for consumers," says my friend from New Jersey. Quite clearly that will not occur.

Sugar, as I pointed out in an earlier speech on the floor, is a small crop internationally. It is about 107 million tons. Of that, 13 million tons of sweetener are used in the United States.

If we begin the process of undermining the American sugar industry and a major portion of our sugar demand enters the world market, there is no question about the fact that the world market is not going to stay at 11 cents, as my friend from Washington said, or 15 cents, as it recently was. The sugar price, which is very volatile on the world market, will rise and rise very rapidly.

Will the American consumer thereby be protected or will his interest be enhanced? The answer is clearly not. The American consumer and the world's consumer will be enhanced in the event that all barriers to trade are taken away, and in that case, the sugar program of the United States will fall, but it will fall in a more reasonable way. It would not fall in such a manner as to benefit the Europeans.

Quite clearly, if we begin the process of dismantling the American sugar program, we will benefit the Europeans. The Europeans are the principal violators in many areas of international trade and agriculture. They have created the surpluses in sugar that have, through export subsidies, been dumped on the markets at very low prices.

If the support price of sugar is lowered, the Europeans will save a considerable amount of money, and will continue in their practices. Their practices have really undermined the business of world agriculture.

What we should be moving to is a program of undoing all the barriers in agricultural trade. Only then will the people of the world, the consumers and, most particularly, the farmers of the Third and Fourth World countries be properly served.

We do, as the Senator from New Jersey referred, a great injustice to them by subsidizing our exports. This is done not by holding the price high as we do in the sugar program, but by subsidizing the export of wheat and other grains into their country at very low prices and, in effect, bankrupting those farmers of the Third and Fourth World nations.

I am for the disarmament of all the world with respect to trade barriers in agriculture. Certainly, that would benefit the poor; certainly, that would benefit the emerging nations; it would benefit American farmers because we are a competitive lot in this country. But unilaterally doing it does not serve our interest and does not serve the interest of world trade.

I yield the floor.

The PRESIDENT pro tempore. Who yields time?

Mr. BRADLEY. Mr. President, I yield 4 minutes to the distinguished Senator from Massachusetts.

The PRESIDENT pro tempore. The Senator from Massachusetts [Mr. KERRY] is recognized for 4 minutes.

Mr. KERRY. Mr. President, I rise in support of Senator BRADLEY's amendment. Obviously, my primary reason for cosponsoring this amendment is that I believe the current sugar subsidy program is costing American consumers much more than its value to American agriculture really is. But, at this time, I would like to address another important reason to curtail our excessive sugar price support program. As chairman of the subcommittee of the Foreign Relations Committee with jurisdiction over international narcotics matters, I have a particular appreciation for the role that alternative development in coca producing countries must play in any viable policy to solve this Nation's cocaine problem. As the problem is multifaceted, so must be the solution. There is no more important component of such a policy than a serious effort to reduce U.S. demand for cocaine, but it must also include a

serious international effort to reduce supply.

What, my colleagues may ask, does this have to do with a vote to reduce the loan rate on raw sugar by 10 percent? It is time we understood the relationship between our agriculture policies and our drug policies. A recent paper written by former Vice-Minister for Economy of Peru, Dr. Roberto Abusada, explains the connection between the closing off of the United States sugar market to imports and the rise in production of coca in Peru. Previously, the sugar growing region of Peru had been the magnet that attracted the highly migratory labor force of Peru. When the U.S. export market was closed off, this magnet ceased to exist and the high jungle frontier, the coca region, took its place.

More importantly, the paper outlines a sophisticated plan to replace coca farming with the cultivation of alternative legal agricultural crops, including sugar. The paper confirms that revitalization of the Peruvian sugar industry is a key part of any alternative development strategy and that such a revitalization is dependent, in part, on increased access to the stable and large U.S. sugar market.

As my colleague from New Jersey has made very clear, his amendment will not, by itself, solve this Nation's drug problem. But if we are serious about stemming the supply of cocaine to this country, we must pursue an integrated policy—one that includes not only eradication and interdiction but alternative development. In fact, if we do not stress alternative development, all the headway that has been made on the interdiction side will be squandered.

ARGUMENTS MADE

Some people suggest it a fantasy to think that by reducing the loan rate to our farmers, that the Peruvian farmer is going to turn his back on income of up to $9,000 a year in order to get $200. It may be the unfortunate truth that United States demand for cocaine could sustain such an income for the Peruvian coca farmer, but reality of farm level prices for coca leaves in Peru is quite different.

According to a February 2, 1990, Wall Street Journal article, "Peru grows an estimated 65 percent of the world's coca from which cocaine is made." But the Colombian Government, assisted by the DEA, has had recent success in placing a fence between the cultivation of coca leaf in Peru, and downstream production of cocaine in Colombia. Since last September, the Colombian Government has disabled many labs, airstrips, and storage areas used by the Colombian drug rings, which ultimately ship the refined cocaine to the United States. As a result, there is a glut of coca leaves which has driven down the price. The DEA's efforts and Colombia's brave crackdown on the drug trade have lowered the demand for coca leaf in Colombia to the point where the price for coca leaves has fallen to as low as $10 per 100-pound lot in the Upper Huallaga Valley, $8–$11 in the Chapare Region of Bolivia and $15 in the Cochabamba area of Colombia, according to the DEA. Prices used to be as high as $400 to $500 per 100 pounds, according to a May 20 article in the New York Times. In fact, this same New York Times article claims that in Bolivia, today 100 pounds of coca leaves may only bring $5 to $7.

Dr. Abusada's study states that in Peru, the price of coca leaf has dropped from $3 per kilogram in the mid-1980's to 90 cents today in the Upper Huallaga Valley, the highest price in existence. The price is only 20 to 25 cents in Bolivia, according to the Abusada study. These figures are consistent with the general magnitudes reported by the DEA and the New York Times article.

According to the Bureau of International Narcotics Matters [BINM] as well as Peruvian researchers R. Webb, J. Nunez, and R. Reategui, annual coca yields range from 0.7 metric tons to 4.5 metric tons per hectare per year. The Peruvian national average is about 2.8 metric tons.

Taking the absolute maximum yield and the highest possible current coca leaf price, the maximum gross receipts per hectare, per year for coca is about $4,050. The average gross income is about $2,000 and in Bolivia, it may have dropped to as low as $600.

Thus, the highest net income achievable from coca at current prices is about $1,500. So much for the $9,000 figure we keep hearing from the U.S. sugar industry. That is old news, rendered obsolete by the efforts of the Colombian Government and the DEA. Now if we miss this opportunity and the cartels move deep into the Peruvian jungle the coca leaf glut will disappear and prices for the leaves will climb again. We will have squandered this opportunity.

Now that we have debunked the myth that peasants currently earn $9,000 per hectare per year for growing coca, let us look at the claim that any legal crop can only yield $200 per year. A look at the facts will show that this claim is ludicrous.

Peru used to have sugar yields that were the envy of the world. According to the International Sugar Organization, Peruvian sugar yields in the late 1970's and early 1980's were on the order of 16 metric tons of raw sugar per hectare per year. This figure is confirmed in the Abusada study. Even at a net of transportation cost prices of 17 to 19 cents a pound, which assumes a lower U.S. price, the gross yield per hectare, per year for Peruvian sugar would be $6,000 to $7,000. Contrast this to coca where currently the highest possible gross yield is about $4,000. Factoring in production costs, a Campesino could earn a net income of $1,500 to $3,000 per hectare per year from sugar, if access to the U.S. market were increased.

There is no question that at current prices, sugar and many other crops would be competitive with coca. But as anthropologists and businessmen operating in the coca producing regions have stated, coca production can be an insecure, dangerous business. Therefore, peasants will accept a lower profit on legal crops. For this reason legitimate tobacco producers in the Huallaga Valley are being inundated with former coca laborers where once labor was so scarce that it had to be flown in from the coast. In Bolivia, according to the New York Times, coca prices are so low that coca farmers are voluntarily abandoning their coca fields in favor of other crops.

Given that interdiction and eradication continues to be somewhat successful, sugar would be one attractive alternative based on price alone. In addition, sugar production involves certain technological factors that make it attractive as a driver of economic development. International investors are desirous of making agribusiness sugar investments in the Peruvian upper jungle. They need a signal that there will be a stable U.S. market worthy of such investment.

Revival of the Peruvian sugar economy would help absorb workers now producing coca. Sugarcane production is labor-intensive. Moreover, sugarcane, which has been cultivated in Peru since the middle of the 16th century and the machinery for which I understand has been built in Peru since the turn of the century, can be grown in regions near to those where coca is now being produced. Over 350 square miles of Upper Huallaga land is currently devoted to coca production. The Peruvian Federation of Agrarian Sugar Cooperatives estimates that over 200 square miles of land in the Upper Huallaga is suitable for sugar production.

A more disturbing question is what will those farmers do if the Andean nations and the United States continue to interdict and to eradicate cocaine production but fail to construct the third leg of the policy stool—an alternative source of income for the peasant farmers? One suspects the answer would be that peasant farmers would either move their coca production deeper into the jungle and try to stay one season ahead of the DEA's search and destroy mission, or seriously consider joining the Sendero Luminoso. It would be deplorable for the United States to contribute to such a dilemma.

The Bradley amendment to reduce the loan rate on raw sugar by 10 percent—2 cents per pound—will not, by itself, solve the drug problem nor will it ensure that the farmers in Latin America won't be tempted to grow coca. But it will open the U.S. sugar market to a few more imports from the Andean region. It will send an important signal to the leaders of the Andean nations and equally important, will send a signal to international investors. Clearly, an alternative development program for any of the Andean countries will require increased access to markets for many products; but on May 23, 1990, at the summit at Machu Picchu, the leaders of the five Andean nations singled out only one product for which they believe increased market access in the United States is imperative. That product is sugar. To vote against the Bradley amendment would be to close the door on what may be the most promising alternative crop to coca.

Mr. CONRAD. Mr. President, at this point, I yield 3 minutes to the Senator from Florida.

The PRESIDENT pro tempore. The Senator from Florida [Mr. GRAHAM] is recognized.

Mr. GRAHAM. Thank you, Mr. President. Mr. President, I am going to focus on one issue that has been raised in this debate, and that is the impact of the sugar program on the Everglades.

I have had a long-term interest in the protection and preservation and enhancement of the Everglades. While I was Governor of Florida, we initiated a major program with the optimistic title of "Save the Everglades." There is a clear linkage between the sugar industry and the Everglades, but I suggest it is not necessarily the linkage that has been suggested.

From an economic standpoint, there is an assumption that if the number of acres in the Everglades which are currently being used for sugar were being used for some alternative, that that would have a beneficial effect on the quality of water in the Everglades system.

I suggest that is not necessarily the case. The land that we are talking about here has been selling at an average price in excess of $3,000 an acre. It is not land that is going to lie foul or be used for a low-intensity purpose. The fact is that sugar is one of the least intrusive potential uses of this land in terms of its contribution of pollutants toward the water supply.

Second, I inform the Senate that the sugar industry has now come forward with some commitments as to what role it will play in terms of the protection of the Everglades through a reduction of pollutants and an assurance of quantity of water into the Everglades system.

Through recent negotiations which I anticipate will soon be completed and incorporated through action of the local water management district, the agreement has been reached that there will be approximately a 150-ton reduction in phosphorus flowing out of the Everglades agricultural area into the balance of the Everglades system; that, of that 150 tons, half will be reduced within the Everglades agricultural area itself and the other half will be reduced through a series of transition zones that separate the agricultural area from the adjacent public conservation preserves, wildlife refuges, and eventually Everglades National Park; that the agricultural interest, specifically the sugar interest, will contribute toward the acquisition of those lands which will serve as that transition zone; and, finally, that there will be assurance of an adequate quantity of water flowing through the Everglades system in order to sustain Everglades National Park.

All of those commitments have major cost implications to the industry. I believe that at the time we are going to be asking the industry to make a greater financial commitment to the protection of the Everglades it would be inappropriate and, if fact, self-defeating to reduce the economic capacity of the industry to do so.

Mr. CONRAD. I yield to the Senator from Idaho for 1½ minutes.

The PRESIDENT pro tempore. The Senator from Idaho [Mr. SYMMS] is recognized for 1½ minutes.

Mr. SYMMS. Mr. President, why is sugar important to Idaho? It should not surprise anyone to find out that we produce in Idaho 32 percent of the Nation's potatoes. But we also produce 18 percent of America's barley, and 16 percent of her onions. We also produce slightly over 16 percent of the national sugar beet crop.

The diversity of Idaho's farm economy owes much to the stability that the sugar program offers. Sugar beets are a type of risk control—used by nearly 1,500 farmers in Idaho who can grow onions or potatoes, beef, or barley because of the stability provided by having 100 acres or so—average: 120 acres/farm—of sugar beets on the side—an important role for a crop produced on 180,000 acres of Idaho farmland, 1.3 million acres nationwide.

The sugar beet is a $150 million cash commodity in its own right ($300 million after value-added), just in Idaho. The industry employs 10,500 people, or about 1 out of every 50 Idahoans.

WHY IS WORLD-TRADED SUGAR NOT A TRUE "MARKET"?

Sugar on the international market is anything but a stable commodity; 75 percent of all the sugar produced is consumed in the country of origin. Export sugar markets, therefore, are frequently residual aftermarkets, often seen as a place to dump the excess sugar that is not sold domestically.

The world sugar price is seldom reflective of actual costs of production, and can vary violently. For instance, sugar prices soared to 65 cents/pound in 1974, and then dropped to less than 10 cents/pound in 1976-78. By 1980, it had risen again to 42 cents/pound, and then shortly after dropped back to 10.

One of the largest sugar exporting countries in the world, Cuba, places its sugar totally in the hands of its government to be used as barter for arms, fuel, and other supplies from the Soviet Union. In its contracts with the Soviet Union, the price of Cuban sugar is guaranteed at 31.5 cents/pound. Cuba's level of exports has nothing to do with the free market—depending more on the intensity of Cuba's intercontinental military campaigning than on any market-driven demand.

FLAWED ARGUMENTS FOR 10-PERCENT REDUCTION

The proponents of the amendment argue that "the sugar program is too costly." Let's get the facts straight—unlike other Federal farm programs financed directly by U.S. taxpayers to the tune of $12 billion in 1990 alone, the current sugar title of the 1985 farm bill requires that the program be operated at "no cost to the Federal Government." The program is operated entirely by the adjustment of quotas, and the Treasury doesn't spend a penny in the support of sugar beet growers.

When the proponents of a 10-percent reduction in the sugar loan rate talk of "saving money," they are not talking about reducing the deficit at all—their only claim is that the 18-cent sugar loan rate costs consumers.

In truth, if you were to slash the sugar program down by a third, the consumer would probably not notice any price change at all. It would represent 0.4 cents off the price of a typical candy bar, and 0.6 cents off the price of a can of non-diet soda. Foods with any lower sugar content would be nearly unaffected. And remember, that is the consumer impact of a 6-cent reducton in the sugar loan rate. The consumer impact of a 2-cent reduction, as proposed here, would likely be absolute zero.

In fact, a Cambridge Reports survey has found that, during the years from 1980 to 1987, in which the sugar program was in effect, the consumer price index—an index of the prices paid by consumers for goods and services—increased 38 percent, candy prices increased 37 percent, the price of cookies and cakes increased 45 percent, but the price of retail sugar actually dropped 17 percent.

COST OF REDUCED DOMESTIC SUGAR PRODUCTION

The truth is that the sugar program actually saves the taxpayer money. If 180,000 acres of prime Idaho farmland

were not devoted to sugar beets, they would be devoted to some other crop, very likely wheat or feed grains, crops that, unlike sugar, receive direct Federal payments.

The average sized 570-acre farm in Idaho includes roughly enough acres planted to federally supported program crops to qualify for $17,000 in payments from the U.S. Treasury. For every farmer that stops growing sugar beets, about 120 acres of land will be thrown into that farm's mix of other program and nonprogram crops. Simply assuming that the ratio of the mix holds about the same, the additional cost to the U.S. Treasury, per farm, goes up $3,600 a year, just in added program crop payments on the additional wheat or barley acres.

Of course, because the additional acreage leads to additional production, supplies of program crops go up and prices go down. Because Government support payments are greater when market prices are lower, this factor also will lead to higher taxpayer costs for every sugar beet farmer who stops growing sugar beets.

CONCLUSION

Speaking as a fiscal conservative, the amendment before us makes no sense. It provides virtually no benefit to consumers. It has a negative impact on taxpayers. And it has a devastating impact on sugar producers, farmers and many rural economies. I strongly encourage my colleagues to oppose it.

Mr. President, I wish to make two quick points. No. 1, sugar is a very capital-intensive crop, and for people to think that somehow some campesino in Peru is going to raise sugarcane on half a hectare just does not make any sense at all. That is not the way sugar is grown and produced out of the United States or in the United States. It is a very capital-intensive crop.

In my State, for example, 1 out of every 50 Idahoans receives his or her job from the sugar industry. It amounts to $300 million. It requires enormous capital investment in processing as well as equipment to grow the beets. It is labor intensive, and it has been very productive for us.

I might make point No. 2. If everyone remembers, when the price of sugar went way up and the price of soda pop went way up, the price of nonsugar diet soda pop went right up with it. The Senator from Louisiana [Mr. JOHNSTON] already made that point, but there is just no argument as far as the consumer case.

No. 3, sugar provides great diversity for farmers. In my State, we grow 16 percent of the Nation's sugar beet crop and 30 percent of the Nation's potato crop. We have done some estimates. If those farmers that grow sugar grew wheat, this Congress would have to pay $10 million for subsistence payments for the wheat farmers. There are no payments out of the Treasury on sugar.

Mr. CONRAD. Mr. President, I yield to the Senator from Minnesota [Mr. DURENBERGER] for 1½ minutes.

The PRESIDENT pro tempore. The Chair recognizes the Senator from Minnesota [Mr. DURENBERGER].

Mr. DURENBERGER. Mr. President, I rise to strongly oppose the Bradley amendment; up front, my bias and my credentials as well. Minnesota is the Nation's No. 1 producer of sugar beets, and when you combine that with the sweetener produced from Minnesota corn, we are clearly a major contributor to U.S. production. We farm 450,000 acres of sugar beets in 25 counties in the Red River Valley in North Dakota, and Minnesota.

The U.S. sugar program has been the focus of many misguided attacks.

Critics moan about the program's cost to consumers. This is misguided and not supported by the facts. Prior to the current program, sugar prices fluctuated wildly. Prices soared as high as 65 cents per pound, then plummeted to less than 10 cents per pound, and then shot back up to 42 cents. This fluctuation cost consumers and food processors dearly creating intolerable price uncertainty.

Mr. President, since the sugar program was implemented the prices have actually gone down relative to products that use sugar. From 1980 to 1987, the Consumer Price Index increased by 38 percent; for products using a lot of sugar like candies the price has gone up 37 percent; for cookies and cakes 45 percent; and cereals 63 percent. Yet, retail sugar prices dropped 17 percent and the price of corn syrup used in soft drinks fell 23 percent. Thus, those who argue that sugar prices are too high miss the fact that all major products that use sugar have increased in price while the cost of sugar has decreased. This means that any reduction in the wholesale price of sugar ends up not saving the consumer money but enriching the processors.

Critics argue it is protectionist; it is unneighborly; and it runs counter to America's free trade policy.

For the last 12 years, Mr. President, I have served on the Senate Finance Committee and I have heard all the arguments from the Senator from New Jersey. We have argued free trade, fair trade. The bottom line on the issue is that until there is free trade in this world, which most sugar beet growers would like to see, we are going to have to deal with fair trading.

The United States is one of the few nations that over the last decade has had a predictable, consistent agriculture policy and trade policy as it relates to sugar. People in my State of Minnesota and the State of our neighbor, North Dakota, and this Senator will support free trade with sugar and a variety of other products, but we do not believe in unilateral changes like that which the Senator from New Jersey proposes today. Changes in the sugar program can only come when all nations agree to that change.

Thus, as the Congress debates the U.S. sugar program I want Minnesotans and my colleagues to know that although the sugar program is loudly criticized it is not only good for Minnesota but good national policy in a world of subsidized and dumped sugar. Prices are low and stable and rural Minnesotans receive adequate incomes. This would not be the case with the U.S. sugar policy and this is why I oppose the pending amendment.

Mr. CONRAD. Mr. President, I yield 1 minute to the Senator from Idaho.

The PRESIDENT pro tempore. The Senator from Idaho, Mr. MCCLURE, is recognized for 1 minute.

Mr. MCCLURE. Mr. President, I strongly oppose a 2-cent reduction in the current sugar loan and urge my colleagues to extend the existing sugar program as recommended by the Senate Agriculture Committee.

The domestic sugar program has worked extremely well. It has provided stable and affordable prices to the American consumer at no net cost to the Federal Government. U.S. consumers pay less for their refined sugar than consumers in other sugar importing developed countries and even some of the sugar exporting countries. It has also provided a U.S. producers and processors with a minimum level of support in the face of heavily subsidized world markets. Extending the current program will allow U.S. sugar producers to continue providing a reliable supply of sweetener products at reasonable prices, and it will assure the United States of a strong domestic sweetener industry.

The sweetener industry is a vital part of the our Nation's economy. Approximately 361,000 U.S. jobs rely on the sugar and corn sweetener industries. The economic activity generated in the United States year by these industries is $18.5 billion in 42 States. Sugar beets are grown in 14 States and are processed in 35 sugar beet factories. The sugar beet industry directly employs 74,000 people in the full and part-time jobs on the farm and in factories. Additional jobs are provided by the sugarcane and corn sweetener industries.

In addition to the importance of the sugar industry to the Nation's economy and the American consumer, the sugar industry is extremely important to the economy of my State. Idaho ranks third in the Nation in sugar beet production. This represents 16.4 percent of the domestic sugar market. Sugar beet production is second only to potatoes. Approximately 1,800 farmers in Idaho produced over 4 million tons of sugar beets on almost

180,000 acres in 1988. This represents a total cash value of $180 million. Sugar beets are grown in 15 of Idaho's 44 counties.

There are three sugar processing plants in Idaho which employ 1,200 full-time and 1,600 part-time workers. Salary and wages for these factory workers is $34 million. The total economic activity generated by the sugar industry in Idaho is almost $800 million. A 2-cent reduction in the loan rate would result in a loss of approximately $18 million to sugar beet growers in my State, and even more to the State's economy as a whole.

PROPOSED 2-CENT REDUCTION

Those who support a 2-cent reduction in the sugar loan rate argue that price support levels for other commodities were significantly reduced under the 1985 farm bill while the sugar loan rate remained the same. They further argue that in order to be equitable, the sugar loan rate should be reduced by 10 percent.

Is is true that the average price support level for the major commodities—wheat, corn, cotton, rice, peanuts, soybeans—declined under the 1985 farm bill. However, that is only part of the story. Those who support a 2-cent reduction in the sugar loan rate fail to mention that the average price support level for those same crops increased 14.9 percent from 1981 to 1985 while the sugar loan rate only increased 7.5 percent during the same period. Even with the reductions required by the 1985 farm bill, the average support price levels for those commodities are still higher than the current loan rate which has remained at the current level of 18 cents per pound since 1985.

The farm bill we are considering today freezes price supports at the current level for the next 5 years. If a 2-cent reduction in the sugar loan rate is adopted, the average price support level for the major commodities will exceed the sugar loan rate by 13 percent. That is not equity. A 2-cent reduction in the current sugar loan rate would not restore balance among all commodities. It would do just the opposite. The sugar loan rate would drop well below levels established under the 1991 farm bill.

If the United States were to lower the loan rate for sugar at this time, it would place a heavy burden on our sugar industry. We should not have to compete on a world market with heavily subsidized foreign sugar. According to USDA, 110 countries support or control their sugar production, consumption, and prices in some way. All major exporters guarantee producer price minimums, and most subsidize exports and the amount of sugar available for domestic consumption. The European Community guarantees producer prices, applies prohibitive levies on imports, and subsidizes exports as necessary for them to compete on the world market.

COST TO CONSUMERS

Another argument that is frequently used against the sugar program is the high cost of sugar to American consumers. Opponents say that the sugar program costs consumers an estimated $3 billion per year in higher food costs. This is a complete myth. First, this inflated cost to consumers assumes our ability to purchase sugar at the world market price. The world market price is an artificial price for excess sugar that is dumped on the open market.

Sugar is one of the most strictly regulated commodities in the world. Only 15 percent of the world's sugar is actually traded on the open market at prevailing world prices. The rest is either consumed in the country where it is produced at a guaranteed price above the so-called world price, or it is sold under long-term trade agreements—above the world price. The supply of sugar that is available at the world market price is very limited and very unpredictable. Critics who charge that the U.S. sugar program costs consumers $3 billion, assume that we could supply our domestic sugar needs fom this limited market and that increased demands on this limited supply of sugar would not affect the price.

The $3 billion cost to consumers is also based on a world market price of less than 3 cents a pound. That is not the current world price which was 14.53 cents for the first half of 1990. It is not even the average world price over a period of time. The basis of these calculations is a historic low point of less than 3 cents per pound.

Even if sugar were available at the so-called world market price. And even if that price was actually 3 cents a pound, saying that this would save consumers $3 billion a year implies that the entire cost savings of purchasing sugar at the world price would be passed on the consumer. That has not been the case.

For example, when Congress failed to renew a previous sugar program in 1974, sugar prices fluctuated wildly. The price of sugar skyrocketed to 65 cents a pound, then plunged to less than 10 cents in 1976-78, and increased again to 42 cents a pound in 1980. Consumer prices for food rose dramatically as the price of sugar increased. However, the prices did not come down again when sugar prices later declined. These price gyrations, which occurred when there was no sugar program, severely damaged the domestic sugar industry. Many sugar beet and sugar cane producers were forced to switch to other crops while others went out of business. In just a few years, 39 sugar mills and processing plants went out of business.

According to a national survey, 86 percent of the consumers in the United States believe that food manufacturers maintain the price of their products when the cost of an ingredient such as sugar goes down, instead of passing this cost savings on to the consumer.

Sugar and corn sweetener costs actually constitute a very small portion of the cost of most sweetened products. For example, a 70-cent scoop of ice cream or a 45-cent package of cookies only contains about a penny's worth of sugar. A 45-cent candy bar contains approximately 1.3 cents' worth of sugar, and a 50-cent can of soft drink contains about 2 cents' worth of high fructose corn syrup. As you can see, it is not the cost of sugar that determines the final cost of sweetened products to consumers.

U.S. SUGAR IMPORT QUOTAS

The Caribbean initiative countries, the Philippines, and other developing countries that hold most of the United States benefit from the United States sugar program and oppose a reduction in the sugar loan rate. The United States import quota system insures them of a premium price over the depressed world market for sugar. From 1982 to 1989, prices in this so-called world market averaged only 7.7 cents per pound. This is less than the cost of production for even the lowest cost producers in the world. On the other hand, the United States market has provided quota holding countries with an average return of 20 cents per pound—after transportation costs—during the same period.

Using this year's quota-import level of 2.125 million short tons, the proposed 2-cent reduction would result in an immediate loss in revenues to quota holding countries of $85 million.

Of the 39 countries holding U.S. quotas, 15 actually import more sugar than they export; 24 export 10 percent or less of their sugar production onto the world market; 16 of those 25 countries export no sugar onto the world market; 21 countries export more sugar to the United States than to the world market; 8 sell more sugar to the European Community market than to the world market. So the charge that the current sugar program denies developing countries access to United States markets is unfounded.

So is the claim that countries like Peru, Bolivia, and Colombia must resort to the production of cocoa because they are being denied access to United States markets. This is absurd. According to USDA estimates, harvested sugarcane area for these three countries has actually increased. This years estimated area is up 5 percent from 1982-83, when U.S. import quotas were first imposed.

Even though United States sugar import quotas have recently increased, Peru and Bolivia have not met their allocations. In fact, Peru is a net sugar

importer. Sugar production in Colombia this year is estimated to be 15 percent above production levels of the early 1980's.

GATT NEGOTIATIONS

The United States is currently involved in the Uruguay round of the negotiations on the General Agreement on Tariffs and Trade. There is a major emphasis by the United States to eliminate trade-distorting agricultural policies. I believe the American sugar producer can compete with sugar producers anywhere in the world if they are allowed to compete on a level playing field. However, reducing the sugar loan rate in the midst of these negotiations would amount to unilateral disarmament and would severely weaken our bargaining position. We should not make drastic changes in the domestic sugar program unless our foreign competitors make the same concessions in an equitable and simultaneous manner. Otherwise, U.S. producers will continue to be at a disadvantage due to heavily subsidized foreign products.

I strongly oppose the proposed amendment to reduce the sugar loan rate by 2 cents per pound and urge my colleagues to support continuation of the sugar program as the Agriculture Committee recommended. Maintaining the current sugar program will assure a reliable supply of sugar at affordable, stable prices for American consumers. And it will provide some degree of certainty to small businesses which cannot afford the wild price fluctuations that will surely accompany a loan rate reduction.

Mr. President, I think the record should reflect the fact that Peru is a net importer of sugar today. If there were ready transferability from one agricultural industry to another, they would be producing more sugar today instead of importing it.

Mr. President, the first pronouncement that then candidate George Bush made on agricultural policy during the campaign was in Twin Falls, ID, the site of a sugar plant, the site of the intensive agriculture that is common to southern Idaho. He made a pledge to Idaho farmers and to the farmers of the United States at that time that he would not sacrifice the sugar industry to unfair trade competition. I think that is the basic issue we have before us today and it is important to note the President's position.

The PRESIDENT pro tempore. The Senator's time has expired.

Mr. CONRAD. Mr. President, I yield 1 minute to the Senator from Louisiana.

The PRESIDENT pro tempore. The Senator from Louisiana [Mr. BREAUX].

Mr. BREAUX. Mr. President, I have heard some novel arguments on the floor. I think one of the most novel is that if you increase the production of sugar, you are going to decrease the production of cocaine. I suggest the only connection between the two is that they both happen to be white powder. Increasing the production of sugar has absolutely nothing to do with decreasing the production of cocaine. If you look at a government program to see if it is working you look at, No. 1, is it costing the Treasury too much?

This program costs the Treasury absolutely nothing. It is one of the few farm programs that in fact has no cost to the Treasury.

The second point, is the cost to consumers too much? We do not get letters from consumers saying the price of sugar is too high. Soft drinks with no sugar sell for exactly the same price as soft drinks with a lot of sugar. The sugar price has been stabilized because of this program since the act went into effect. It is the purpose of the act. It, indeed, has worked very well. It costs the Treasury nothing, and it does not cost the consumer too much. In fact, it has stabilized their price.

The argument that somehow we would help foreign countries is one that simply does not wash. I oppose the Bradley amendment.

The PRESIDENT pro tempore. Who yields time? The Senator from New Jersey has 1 minute, 55 seconds. The Senator from North Dakota has 1 minute, 24 seconds.

Mr. BRADLEY. Mr. President, let me deal quickly with some of the arguments on the other side. First, that sugar is a substitute for coca. I say yes. The opponents say no. I ask unanimous consent there be printed in the RECORD the New York Times article that says, "Bolivians Switch Crop as Coca Market Falls."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, May 20, 1990]

BOLIVIANS SWITCH CROPS AS COCA MARKET FALLS

(By Shirley Christian)

ETERAMASAMA, BOLIVIA.—Félix Lazo's harvest of coca leaves lay on the floor of his cinder-block house, unsold because actions against drug dealers and processing laboratories in Bolivia and elsewhere have destroyed the market for the raw material of cocaine.

A hundred pounds of coca today may bring only 15 to 20 bolivianos, the equivalent of $5 to $7, he said, "and for that I have to carry the bags of leaves up to the crossroads on my back, then pay for transport to market." It is a familiar predicament for the small farmers here who produce a third of the world's coca, a crop that once provided a secure cash flow, as much as $400 to $500 for 100 pounds.

Drug experts say the price drop, which has led farmers to plant other crops, is a result of the crackdown on major drug traffickers in Colombia and the relentless assaults on drug laboratories and wholesale buyers of coca paste here in Bolivia.

Those actions are believed to have interrupted processing activities and lowered demand for coca leaves. Some of Bolivia's coca is turned into cocaine inside the country and more is processed in Colombia, with virtually all of the marketing done by Colombian dealers.

"Since the price fell, there is almost nothing for the people here," Mr. Lazo said as he led the way through the insects and interminable tropical rain to his remaining patch of coca—about two and a half acres, third of what he had three years ago. For lack of money, he said, he has stopped fertilizing and spraying it.

Mr. Lazo and other farmers here in the Chapare rain forest, Bolivia's main coca-growing region, have begun to substitute fruit and other crops.

They are doing it at such a quick pace that the aid programs run by the Bolivian Government, the United States, the United Nations and others are unable to keep up with the demand for seeds, plants and eradication payments.

A State Department official in La Paz said that when the United States does its annual aerial survey of drug-producing countries this year, Bolivia will show its first ever decline in total coca acreage.

BOLIVIA'S 'DYING INDUSTRY'

Drug experts attribute the race to other crops to the almost total collapse in the price of coca leaves in the last six months. Although there are skeptics among them who say they believe that the price drop is temporary or maintain that the farmers are eradicating coca along the roads while going deeper into the jungle to start new seed beds, more of the experts say they believe that in just a few years, Bolivia's part in the cocaine business could be reduced to a minor role.

The State department official called it a "dying industry" in Bolivia. He and other experts said the sharp decline in coca production in Bolivia would not necessarily lower the total supply of cocaine because the Upper HuaDága Valley in Peru, the leading source of coca leaf, is capable of expanded production.

Drug experts in La Paz said the presence of the Shining Path guerrilla organization in Peru greatly inhibited raids and other interdiction activities against drug laboratories and traffickers there. As a result, they said, the price of coca leaf in Peru has not collapsed as in Bolivia, and recent reports from Peru say farmers there are planting more acres in coca than ever before.

But officials say that in the Chapare, farmers have voluntarily dug up more than 8,000 acres of coca plants this year—more than was eliminated in all of 1989 and more than the Government, in an agreement with the United States, promised to eradicate in all of this year. The Chapare was estimated to have 100,000 acres of coca last year.

Some Government officials say they fear that the mass retreat from coca by Bolivian farmers will gather steam faster than economic development programs can find ways to replace the $500 million to $600 million that coca is thought to represent in hard-currency income.

A SWITCH TO RICE AND CORN

It is the lost income that worries Mr. Lazo and about 40,000 other farmers producing coca in the Chapare. Despite the big money associated with cocaine, their place at the bottom of the ladder earned them an income only slightly above subsistence level. But it was better than most Bolivians had.

Now, the coca farmers say they fear that they and their families will have nothing to eat and that there will be nowhere to sell the other products that agronomists and extension agents are persuading them to grow.

Down the road from Mr. Lazo, Guiliermo Grandón lighted an oil lamp, filled his guests' glasses from a half-gallon bottle of Coca-Cola, and said his "only hope" lay in the 750 young plants growing in his greenhouse, including citrus, macadamia, coconut and black pepper. He said he planned to mix them with subsistence crops like rice and corn.

Like his friend Hilario Claros, Mr. Grandón eradicated part of his coca for a one-time payment of $2,000 per 2.5 acres and joined a United States-financed crop-substitution program that helped them start the perennials that they hope will pay off in the future.

LIMITED EXPORT MENTALITY

Both men traveled to Costa Rica in the last two years under the substitution program to see how small farmers there were succeeding with tropical crops. They returned enthusiastic and have signed on as promoters of the substitution program to spread the word to others.

"The Costa Rican trip convinced us that this can work," said Mr. Claros. "But it won't work if we don't get some agro-industry in here to process and sell what we produce."

José Decker, who directs the substitution program from offices in Cochabamba, the departmental capital, said his biggest worry was finding markets for the products—citrus, pineapple, macadamia, ginger, pepper, exotic fruits and flowers, and more—that will be pouring out of the Chapare in the next few years.

"The problem is that private national firms in Bolivia have no experience in international marketing," he said. "Except concerning tin and coca, this country has never had an export mentality. Coca, in fact, is the only product that Bolivians have ever exported with value added."

PLAN FOR MACADAMIA NUTS

Joe López, a New Mexico-born tropical agriculture specialist who serves as a consultant to the crop substitution program, is less worried. He is convinced that as the crops come into production, the markets and processing plants will appear. He said several foreign companies had expressed interest in buying from the Chapare.

Among other things, Mr. López was instrumental in bringing in the macadamia nuts from Costa Rica that are now sprouting into tiny trees in make-shift greenhouses across the Chapare. Although they will not begin to produce for about seven years, he said that world demand for the nuts was strong and growing and that he was convinced that Bolivia can join Hawaii and Costa Rica as major producers. Many farmers are putting their faith in that possibility.

Joaquin Valderrama, head of a low growers' group, complained bitterly about the lack of roads and electricity in the area and the Government's failure to keep promises of help in the past. Then he said he had eradicated half his coca and planned to plant macadamia trees, among other things.

Told that a small container of macadamia nuts costs several dollars in the United States, he said he hoped this price remained high "because we're going to produce a lot of those nuts."

Mr. BRADLEY. Mr. President, the fact is they are already switching. Shall we accelerate that or shall we retard it?

Second, somehow this a major blow to our trade negotiations. I ask unanimous consent that there be printed in the RECORD a letter by the trade negotiator, Carla Hills, who says the administration supports a reduction in the sugar support level and would not take this position if it felt our negotiating position would be weakened by it. It strengthens our position in negotiations. It does not weaken it.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE U.S. TRADE REPRESENTATIVE,
EXECUTIVE OFFICE OF THE PRESIDENT,
WASHINGTON, DC, JULY 18, 1990.

Hon. BILL BRADLEY,
U.S. Senate, Washington, DC.

DEAR SENATOR BRADLEY: I understand that some have suggested that a 2-cent reduction in the domestic support price for sugar should be opposed because it would reduce our leverage in the Uruguay Round agriculture negotiations. The Administration supports a reduction in the sugar support level and would not take this position if we felt or negotiating position would be weakened by it.

Our objective in the negotiations is to achieve comprehensive and substantial reform of the international rules on agricultural trade. We have proposed that all countries make commitments to reduce protection, subsidies and market access barriers affecting all commodities.

Our position with respect to the sugar provision of the farm bill is that substantial reform should not be undertaken. However, the Administration supports an immediate 2-cent reduction in the sugar price support level in order to modify the level of government support provided to sugar and make it more consistent with that provided to other commodities in the Food Security Act of 1985. We do not feel that this modification would conflict with our position opposing substantial reform.

Sincerely,

CARLA A. HILLS.

Mr. BRADLEY. In terms of increased costs, indeed, 41 cents versus 42 cents, the fact is that retailers have eaten that difference. We are not talking about the actual cost; we are talking about the opportunity cost, what it could be, and it could be a lot lower in price for consumers.

Fourth, the spikes, price spikes. They occurred during the Sugar Program in 1973-74, not after the Sugar Program in June 1974, but it began to go up earlier than the Sugar Program.

The last argument about the Everglades. It is a very interesting argument that we should not reduce the price support, loan rate, because the polluters have agreed to clean up. That is what we do with toxic wastes, Mr. President. The polluters have to pay. I am glad that the polluters of the Everglades are going to have to pay, but that is not the point. The point is no pollution in the first place. The distinguished Senator from Florida, in his letter to his colleagues, did not state that sugarcane was not a polluting force in the Everglades. In fact, it is a polluting force in the Everglades.

I ask unanimous consent that a "Dear Colleague" letter from Senator GRAHAM, dated July 13, 1990, be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, DC, July 13, 1990.

DEAR COLLEAGUE: As we prepare to consider the 1990 Farm Bill, I want to bring to your attention the importance of sugar farming to Florida's economy and the fact that Florida sugar growers have a critical role to play in the protection of the Everglades. Because the health of the Everglades is inextricably linked to the sugar industry's economic stability, Florida cane fields are an integral component of the Everglades ecosystem.

As Governor, I made the protection and expansion of the Everglades one of my highest priorities. The environmental vitality of the Everglades remains a primary concern for me in the Senate. I appreciate the support which most of my colleagues have given to the protection of this national treasure.

Therefore, in order to ensure sugar's ability to accept and pay for the improvement of the Everglades' ecosystem, I support the Senate Agriculture Committee's decision to continue the current sugar program.

The sugar industry has assured me of its commitment to a program of environmental protection. Among the measures it has agreed to take are:

A significant reduction in the flow of nutrient runoff (phosphorus) into the Everglades. A reduction of nutrients from agricultural sources through Best Management Practices and other programs such as flow through marshes of at least 60-75 tons per year is needed.

The quantity and quality of the water that flows into the Everglades National Park must be sufficient to protect and preserve the Park.

I expect the sugar industry to fulfill its commitments to the environment and therefore urge you to support the federal sugar program which provides the growers with a stable production and marketing framework.

Enclosed is an editorial from The Miami Herald which supports the government's sugar program and recognizes the complex interrelation between the farmers, the environment and the government.

Sincerely,

BOB GRAHAM,
U.S. Senator.

Mr. BRADLEY. Mr. President, I ask unanimous consent that a letter from the Audubon Society of Florida in support of this amendment be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FLORIDA AUDUBON SOCIETY,
July 21, 1990.

Senator BOB GRAHAM,
Dirksen Senate Office Building,
Washington, DC.

DEAR BOB: I have received a copy of a "Dear Colleague" letter Dated July 13 concerning the 1990 Farm Bill, which appears to bear your signature. In this letter, you assert that the ". . . health of the Everglades is inextracably linked to the sugar industry's economic stability . . .", that ". . . in order to ensure sugar's ability to accept and pay for the improvement of the Everglades ecosystem, (you) support the Senate Agriculture Committee's decision to continue the current sugar program.", and that ". . . the sugar industry has assured (you) of its commitment to a pogram of environmental protection."

According to your "Dear Colleague" letter, this "commitment" includes agreement to reduce nutrients from agricultural sources through Best Management Practices and other programs by at least 60 to 75 tons per year, and that the ". . . quality and quantity of water that flows into the Everglades National Park must be sufficient to protect and preserve the park."

First, even if this were the commitment of the industry, it is seriously inadequate on its face. The proposed 60 to 75 ton annual reduction of "nutrients" (I presume this means phosphorous) is less than half the reduction that has previously been identified as necessary in the South Florida Water Management District S.W.I.M. plan process.

Second, and even more important, though your "Dear Colleague" letter bears the date of July 13, we know of no "agreement" by the sugar industry to any of the things that are alleged to be agreed to in your letter.

I attended the South Florida Water Management District Governing Board meeting where the S.W.I.M. plan was discussed earlier this month. It was apparent that there was no agreement from the industry on any of the points you mentioned.

Further, on July 17th Dr. Bernard Yokel, President of Florida Audubon, and I attended a meeting held at the request of Nathaniel Reed at the Royce Hotel in West Palm Beach. Present at the meeting were Woody Woodraska and James Garner, Executive Director and Chairman of the South Florida Water Management District, respectively, and representatives of all of the major companies and cooperatives that make up the "sugar industry" in Florida. While the discussions were interesting (and we hope that they will continue), it was clear to us that at present "the sugar industry" is not in agreement with any plan to resolve the Everglades water quality problems that the sugar industry is causing.

At present, the position of the industry (articulated as late as the July 1990 meeting of the Governing Board of the Water Management District) is that the Everglades Water Conservation Areas (including the Loxahatchee National Wildlife Refuge) should continue to be the dumping ground for agricultural runoff from the sugarcane fields. The position of the industry is that the legislation of the 1940's that created the Central and Southern Florida Flood Control Project and which authorized the U.S. Army Corps of Engineers to participate in the project intended that the Conservation Areas be managed as reservoirs primarily for the convenience of agriculture and development.

In concluding your letter, you relied upon an editorial published in the Miami Herald which supported continuation of the sugar program, while the Herald did in fact publish such an editorial, it is important to note that it is the only major newspaper in Florida to do so. The overwhelming weight of the editorial opinion in Florida is against continuation of the sugar program and in favor of the Bradley/Roth amendment to the farm bill. A sample of some of these recent editorials is enclosed.

We hope that you will carefully review the sources of information that led to the issuance of your "Dear Colleague" letter of July 13 copcnerning the 1990 Farm Bill. We believe that the information that you relied upon is gravely in error.

In January, 1990, the Everglades Coalition, comprising the major state and national environmental groups that are working for the implementation of the "Save Our Everglades" goals, identified the eliminaiton of the current sugar program as an important objective for everglades Protection. I would greatly appreciate the opportunity to discuss this matter with you prior to your vote on the Farm Bill next week.

Sincerely,

CHARLES LEE,
Senior Vice President.

Mr. BRADLEY. Mr. President, I urge adoption of the amendment.

Mr. CONRAD. Mr. President, I yield 1 minute to the Senator from Hawaii.

The PRESIDENT pro tempore. The Senator is recognized for 1 minute.

Mr INOUYE. Mr. President, I wish to summarize the opposition to the Bradley amendment. The sugar program is the most successful agriculture program we have on the books. It does not cost the taxpayers a penny. In fact, according to the Department of Agriculture, this country has profited by more than $200 million. It provides much needed employment.

Without this program the bad economy of Louisiana would be completely devastated; the Florida economy would be devastated; and the State of Hawaii's economy would be devastated.

It has been suggested that the CBI sugar group, the Caribbean Basin Initiative group, and the Philippines support the Bradley amendment. I have two letters here in opposition. I ask unanimous consent that they be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CBI SUGAR GROUP,
July 12, 1990.

Hon. DANIEL K. INOUYE,
U.S. Senate,
Washington, DC.

DEAR SENATOR INOUYE: This letter is in response to your inquiry as to the effect of a two cent reduction in the sugar loan rate on the CBI sugar producing countries.

Without a guarantee that a price reduction would produce a substantial and immediate increase in quotas, the result would be a net loss in income for our countries.

Simple mathematics convince us that a two cent reduction in price would, in fact, result in lower foreign exchange earnings for our economies that need social and political stability.

I would also mention my remarks to the American Sugar Alliance symposium on June 25, 1990:

"The assumption made by many that the U.S. price is out of line with what a true world market would dictate oversimplifies the present world dumping market. The only credible study I have seen, done by Landel Mills, concludes that the world price in a free market would be somewhere between 15 and 22 cents, which is the same range as the U.S. price."

I hope this is responsive to your inquiry.

Sincerely,

JULIO HERRERA,
Pesident.

REPUBLIC OF THE PHILIPPINES,
SUGAR REGULATORY ADMINISTRATION,
Diliman, Quezon City, July 23, 1990.

Hon. STEPHEN J. SOLARZ,
U.S. House of Representatives,
Washington, DC.

DEAR REPRESENTATIVE SOLARZ: As you know, the House Agricultural Committee reported a farm bill that included a sugar title which would be highly beneficial to the Philippines sugar industry. It provided for a minimum import quota of 1,250,000 tons, and a re-export program, for which the Philippines would have been eligible.

Last week the Ways and Means Committee voted to drop the re-export program from the bill.

We understand that when the bill reaches the House floor, Congressmen Downey and Gradison plan to offer an amendment which would, among other things, remove the minimum import quota and lower the price support level by two cents.

A two-cent reduction in the price support is not enough to bring about a significant drop in domestic sugar production. Since it appears that a similar amendment to be offered in the Senate has little chance of passing, it must be assumed that if the Downey/Gradison amendment is adopted, the most likely outcome in conference would be a one-cent reduction to 17 cents.

Under those circumstances our exports to the United States could not increase enough to offset the reduction we would receive in the price of the sugar.

We are concerned that without the minimum quota, total imports could drop to under 800,000 tons as they did in 1988, with disastrous effects in the Philippines.

We urge you to support the minimum import quota in the Committee bill, and therefore to vote against the Downey/Gradison amendment.

Yours truly,

ARSENIO B. YULO, Jr.,
Chairman/Administrator, Philippine Sugar Regulatory Administration.

Mr. ROTH. Mr. President, last week I stood to cosponsor with Senator BRADLEY an amendment to the farm bill that will cut the federally funded loan rate for sugar by 2 cents. I explained that the bill, which would extend an 18-cent loan rate for another 5 years creates a false economy that will continue to batter the American consumer, begin to penalize the American taxpayer, and allow the domestic sugar growers to thrive in a protected state that will become more and more difficult to break.

Though these reasons are sound enough to demonstrate why we should

begin now to cut back the loan rate, to restore domestic sugar to reality-based economics, they are not the only reasons. As I see it, beyond protecting the consumer, the taxpayer, food and candy manufacturers, and even the future of the domestic sugar growers, there are five other specific reasons why this amendment is necessary:

First, we must restore equity to the agricultural community. In 1985 we reduced the price support level of all major commodities—corn, wheat, soybeans, tobacco, and dairy products—on all major commodities except sugar. Rather, we allowed sugar to continue to expand in an artificial environment, planting record levels of acreage at the expense of these other crops. For example, Mr. President, in Texas, in 1987 returns over variable costs for sugar cane producers averaged about $470 per acre compared with returns for corn and cotton of about $200 per acre. In Minnesota, sugar beets returned an average of about $660 an acre while corn returns were about $190 per acre. Not only is this unfair to the farmers, we all pay for it as consumers.

Second, we must demonstrate to our trading partners, currently at odds with us in the Uruguay round of trade talks over agricultural policy, that we practice what we preach. Our negotiators are vehemently arguing against European protectionism in the farming policies, and their negotiators are countering by pointing to our sugar policies which are locking out less expensive foreign sugar.

The third reason springs from the second, and that is that because we are locking out sugar imports—which generally come from developing countries—we are creating economic havoc in Central America, the Caribbean, the Philippines, Africa, and elsewhere. Our laws have caused a 75-percent decline in import quotas between 1981 and 1988, and the Overseas Development Council estimates that this protectionism has completely offset the benefits of the Caribbean Basin Initiative. It has increased the demand for foreign aid to these areas and in the end cost the taxpayer a bundle.

Fourth, our current laws are dealing a ferocious blow to the environment. The elite growers who are getting fat off the sugar subsidies are destroying miles of pristine land, especially in the Florida Everglades, to, as they say, make hay while the Sun shines. When the bottom falls out of the false economy perpetuated by the price support system, the Everglades will require hundreds of millions of dollars to clean up and will never be fully returned to their current state. Even now, there is a Federal lawsuit filed by the U.S. attorney for south Florida. He has sued the Florida Water Management Agency and the Natural Resources Department for failure to regulate the sugar industry in that State.

Another environmental hazard is related to the fifth reason why we must begin to reduce these subsidies, and that is the resultant increase in drug—or coca farming—on lands once devoted to sugar. Many developing nations, including Bolivia and Peru are turning their agricultural acreage from sugar to coca as quotas restrict the former and make it an economically disadvantageous commodity. Presidents from these South American countries have pleaded that we lower our quotas and reduce our domestic price supports to encourage sugar farming as a economically viable replacement for coca farming. As I indicated, the advantages of doing so would spill over into the environment as it's been discovered that converting coca leaf into paste in the Andes has led to the dumping of petroleum distillates and other chemicals in the watershed of the Amazon.

Mr. President, clearly these five reasons are significant enough for us to approve this amendment—to begin now to restore a semblance of equity and economic reality to the sugar growing industry. To reduce the loan support by 2 cents is not a lot, it's not dramatic, but it's a step in the right direction. And we will see the benefits that result from a more even farm policy. We will see the benefits to foreign policy, our drug policy, trade policy, the environment. But again, let me restate the most compelling reason—and that is to take care of the American consumers. It all comes down to the family. It all comes to down to grocery bills, to the cost of living. It's nice to state that cutting back subsidies and relaxing quotas will increase America's competitive posture, but the real issue is taking care of our people. And that's what this amendment is all about.

Consequently, I strongly urge all of my colleagues to support this modest, but necessary step.

Mr. LAUTENBERG. Mr. President, I rise as a cosponsor of this amendment to provide a 2-cent reduction in the price support level for sugar.

Mr. President, the sugar program badly needs reform. The current program is hurting consumers, it is hurting producers of products containing sugar, and it is hurting many of our sugar-producing allies and neighbors. And all of this for the benefit of only a few thousand producers.

Mr. President, the sugar program is a huge rip-off of the American consumer. According to the U.S. Department of Commerce, the sugar program cost American consumers an estimated $3 billion in 1987, though that figure may now be reduced to $2 billion. In effect, this is an enormous hidden tax—and a very regressive one at that.

Manufacturers of candy, chocolate, and other sugar-containing products also are paying a heavy price for the sugar program. Some have fled to Canada to avoid the inflated United States prices, leaving their American workers behind. Those who have remained are being placed at a competitive disadvantage because foreign competitors are producing their products with cheaper sugar. The result again is lost American jobs and lost American manufacturing capacity.

The harmful effects of the Nation's sugar program do not stop at the border. By limiting imports of sugar, we are hurting many of the poorest countries in the world that depend heavily on sugar exports—countries like the Philippines, El Salvador, Costa Rica, and several Caribbean and African countries. Many of these countries are struggling to maintain democracy and improve their economies. Their people are struggling with desperate poverty.

The United States has strong interests in supporting these countries. Yet while we often uphold these interests in our rhetoric, we undermine them with our sugar program, a program that can only be labeled as protectionist.

For all the costs the sugar program imposes, it benefits a relatively small number of producers: only about 11,000 grow sugar cane or sugar beets, and fewer than 1,000 of those account for 50 percent of sugar production.

The few that benefit do so in a big way. The program's effective annual subsidy works out to between $170,000 to $270,000 per sugar grower. For some, the program means millions of dollars in Government-created income.

Mr. President, our sugar program has been a sweet deal for sugar producers, but has soured our relations with many in the Third World. Millions of Americans—and millions more around the world—are suffering so that a narrow special interest can reap a large and unjustified windfall. That is fundamentally wrong.

This amendment will begin to correct that wrong. I commend my colleague from New Jersey, Senator BRADLEY, for his leadership in this area, and I urge my colleagues to support this amendment.

Mr. HATCH. Mr. President, since 1981, the U.S. sugar program has helped to maintain a secure domestic supply of sugar at reasonable prices for American consumers. The program allows more than 1 million American farmers and workers who produce and process beets, cane, and corn for sweetner to maintain a viable U.S. industry despite unfair foreign competition.

Nearly 100 countries worldwide produce sugar. About 70 percent of all the sugar produced in the world is consumed in countries of origin. Another 15 to 20 percent is traded under bilat-

eral agreements or special arrangements. The rest, as little as 10 percent of the sugar produced each year worldwide, is traded on the so-called world market, a dumping ground for surplus sugar.

Every major sugar producing country subsidizes its producers or insulates them from the world market. These Government interventions allow excess sugar to be dumped on the world market, often at prices far below the actual cost of production. That is why the so-called world price of sugar has fluctuated wildly, ranging from as low as 2.6 cents per pound to as high as 65 cents per pound. In contrast, the U.S. sugar program assures U.S. farmers of an 18-cents-per-pound support level.

Passage of this amendment will impose an extreme economic hardship on our domestic producers and undercut an industry that contributes some $18.5 billion in revenues annually to the U.S. economy and is responsible for over 361,000 American jobs. In addition, passage would also penalize traditional exporters of sugar to the United States and hinder the ability of our Trade Representatives at the GATT negotiations who seek to rid world trade in agriculture of all tariff and nontariff barriers on a concurrent basis.

The U.S. sugar program helps to assure that American farmers and workers will not lose their jobs because of the import of artificially cheap, heavily subsidized foreign sugar. The program operates at no cost to the taxpayer and is supported by all segments of the U.S. sweetner producing industry. It is program that should continue as outlined in the committee bill and until foreign nations end their unfair trade practices, we must maintain a strong, viable U.S. sugar program. It is a good deal for all Americans—consumers, farmers, and workers and I urge defeat of this amendment.

WE NEED TO TRIM SUGAR LOAN RATE

Mr. PELL. Mr. President, I was pleased to join my colleague, the senior Senator from New Jersey [Mr. BRADLEY] in proposing an amendment to reduce the loan rate for sugar by a modest 2 cents, from 18 cents to 16 cents.

Frankly, I support even deeper cuts in this so-called no-cost program. The loan rate has proved to be an expensive disaster that has guaranteed high profits for sugar growers—at the expense of all other Americans.

The modest reduction of about 10 percent, that our amendment would require, is a step in the right direction.

Federal Government outlays for this no-cost program have been minimal but, as my colleagues have pointed out, the cost to nonsugar farmers, to U.S. competitiveness, to our foreign policy, to our drug policy, to our trade policy, to the environment, and to the consumer have been enormous.

Our sugar policy has been characterized as America's least efficient welfare program. Critics cite the U.S. Department of Commerce estimate that in 1988 that the Federal sugar program cost American consumers $3 billion a year.

The critics note that in the preceding year sugar farmers had a total estimated income from sugar sales of about $300 million. That translates into a frightfully inefficient program that costs consumers $10 for each $1 of income sugar farmers received.

The cost to consumers for the sugar program is probably closer to $2 billion per year now, but those costs remain far in excess of what we should tolerate.

A 10-percent cut in the loan rate will not resolve the problem, but it should help stop the needless expansion of acres planted in sugar crops. The less efficient growers and less productive land will be taken out of sugar crops. This may help limit or reverse adverse environmental impacts.

Most importantly, the modest 2-cent reduction will provide a break for consumers. In these years of staggering Federal deficits, when we should be tightening our belts, it is long past time for us to demand that the sugar program be trimmed and that American consumers get an honest deal.

Mr. ADAMS. Mr. President, the debate on the future of the U.S. sugar program has been exceptionally vigorous and hard fought. After serious consideration of the arguments raised by both the opponents and supporters of the existing sugar program, I have decided to vote against the Bradley-Roth amendment.

This amendment would effectively cripple the U.S. sugar industry, an industry that produces approximately $18.5 billion in revenues, and provides 360,000 jobs. Sugar growers, sugar beet growers, refiners, all would suffer. American businesses would go bankrupt and American jobs would be lost.

I have always supported free trade, and accepted the risks that run with such a policy for individual American businesses, because of the benefits that free trade brings to our economy as a whole. In this case, however, I am concerned that the benefits claimed through reduction of the sugar policy are illusory, and not worth the social costs of dismantling the current program.

It is claimed that reduction of the sugar subsidy will result in lower consumer costs, and that the candy makers and the soft drink bottlers will automatically pass on the savings to the consumer. If this actually happened, it would be an act of corporate generosity unheard of in the annals of American business. It is certainly true that excess corporate costs get passed on to the consumer, but in my experience the reverse is rarely true. Especially due to the small amount of sugar in each item.

In addition, estimates made by proponents of this amendment of the potential savings to the consumer are misleading. Massive government support of sugar production worldwide has produced a two-tiered market—a contract market reflecting production costs, and a dump market for surplus sugar priced far below production costs. Estimating consumer savings based on the dump market price is a flawed analysis, because it is not based on a realistic calculation of the long-term price.

Consumers do not benefit from a fluctuating market vulnerable to shortfalls and sudden price increases. Consumers benefit from a steady, stable sugar supply; and that is what they get from the current program.

The proponents also claim that reduction of the sugar subsidy will have foreign policy benefits, both in terms of aiding our allies abroad and in terms of the war on drugs. Again, I find these promises illusory. Once the subsidy is cut we have no guarantees that any of these good things will happen. The sugar market will respond to the laws of the market and the manipulations of entrepreneurs, not our foreign policy desires.

I also feel it is inappropriate to unilaterally reduce our sugar subsidy given our long-term goals in the Uruguay round of the General Agreement on Tariffs and Trade [GATT]. The United States is attempting to eliminate all tariff and nontariff barriers to world trade in agriculture on a concurrent basis. Unilaterally slashing our sugar program at this stage of this negotiations would be tactically unwise.

In conclusion, Mr. President, the potential benefits of this amendment are not worth the very clear costs of dismantling a viable American industry, and I must oppose this amendment.

Mr. MACK. Mr. President, I rise today in opposition to the amendment offered by my colleague from New Jersey, Mr. BRADLEY, which would lower the sugar loan rate from 18 cents per pound to 16 cents per pound.

Mr. President, I oppose this legislation for several reasons, and I would like to take this opportunity to address some of the arguments made by my colleagues in favor of Mr. BRADLEY's amendment.

First, the U.S. sugar program does not deny needed income to developing countries. On the contrary, the system provides foreign sugar-exporting quota holders with a guaranteed U.S. market at prices consistently above those available on the world residual market for sugar. And I want to emphasize the residual nature of that market. The so-called world price for sugar is

essentially meaningless, as it reflects only a small dumped market. According to USDA figures, 110 countries subsidize their sugar in some manner, thereby distorting world markets. Eighty-five percent of that sugar is purchased at subsidized prices which are generally well above the world market price. The remainder is dumped on the world market for whatever price it may bring. This means that the world price is well below the average cost of production, and is therefore a meaningless figure for comparison.

The administration has stated repeatedly that it would not make any modifications in the existing sugar program that might be construed as unilateral concessions in the Uruguay round. However, a reduction in the loan rate by 11 percent, as proposed by my colleague from New Jersey, would do just that. It would send a signal to our trading partners in the GATT that the United States is willing to trade away its industries without requiring reciprocal actions by GATT members. It is imperative that we maintain our leverage as the negotiations continue, so that we are truly able to realize the administration's goal of the complete reduction of subsidies within the next 10 years. This goal is shared by our Nation's sugar farmers who were the first to publicly express their support for the administration's objectives in the Urugary round. U.S. sugar producers have repeatedly stated that they are more than willing to cut their subsidies if other countries will take similar action. However, it makes no sense whatsoever for our producers to accept dismantling of their program unilaterally.

Supporters of the loan reduction have established a completely false linkage between increased coca production in Peru and the United States sugar program. They allege that, because the United States sugar program supposedly discourages sugar production in Peru, that Peruvian farmers have turned instead to coca production. First, coca plants grow in the mountain area of Peru in small plots tended by peasants. Sugarcane, a tropical grass, grows in the river valleys in large units hundreds of miles from the mountainous areas. They further allege that tropical rain forests are being destroyed by coca planters. Since coca is grown on the steep mountain sides, it is hardly a rain forest. Clearly the issue of coca production comes down to one thing: Simple economics. It is far more profitable to grow coca in Peru than it is to grow sugar.

Mr. President, I would like to call to the attention of my colleagues an editorial which appeared earlier this year in my hometown newspaper, the Fort Myers News-Press. This editorial provides some needed perspective on the issue of sugar price supports, and I ask unanimous consent that it be printed in the RECORD as part of my statement.

It is my hope, Mr. President, that my colleagues will join me in opposing any attempt to weaken unilaterally our domestic sugar program and will vote against the amendment by the Senator from New Jersey. Thank you, Mr. President.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Fort Myers (FL) News-Press, May 4, 1990]

HELP FOR NATION'S SWEET TOOTH

Food manufacturers are beating the drums again for dropping sugar price supports. They want U.S. sugar producers to compete on the volatile world market, forcing them to take smaller profits while raising profits for candy, soft-drink, pastry and other food manufacturers.

The cost of sugar represents only a tiny fraction of the cost of a candy bar or a sweet roll. Any lowering of the price of raw sugar would not change prices to the consumers, it would only raise profits for the maker.

But having to compete on the world market could be disastrous for sugar cane and sugar beet growers and processors.

That's because every major sugar producing country subsidizes its producers or insulates them from the world market. More than 70 per cent of world production is consumed in the countries in which it is grown; some is traded under long-term agreements at negotiated prices, and the rest is dumped on the world market at give-away prices.

The world price currently is about 10 cents a pound for raw sugar based at a foreign port, while the world average cost of production is 23 cents a pound.

The present U.S. program provides 18-cents-per-pound loans to growers. That price is maintained to make sure the government is repaid. It provided stability in the sugar market throughout the past decade, without costing taxpayers anything.

U.S. price supports have been criticized for putting the squeeze on some foreign producers whom it is in our interest to help—in the Philippines and Caribbean, for instance. But the free market for sugar is depressed primarily because of dumping by the European Economic Community which has expanded production by almost 40 percent, dumping surpluses onto the free market.

The U.S. program has spared American consumers steep price fluctuations and prevented shortages of sugar. It's in the best interests of American consumers and taxpayers to continue it.

Mr. CONRAD. Mr. President, might I make an inquiry as to the time remaining?

The PRESIDENT pro tempore. The Senator has 13 seconds.

Mr. CONRAD. I yield my remaning time to the Senator from Hawaii [Mr. AKAKA].

Mr. AKAKA. Mr. President, in the 14 years I have served in Congress, this is the fourth farm bill we have debated. With each passing bill, it seems as though fiction, and not fact, governs the debate on sugar. As I listen to everything being said about the sugar program, it appears there is no problem in the farm community today that cannot be blamed on sugar. And, during this year's farm policy debate, it seems that sugar is now responsible for a host of the world's foreign policy problems as well.

First, we are to believe that South American cocaine production is being stimulated by the U.S. sugar program. Clearly, the big, corporate manufacturers of foods and soft drinks who oppose the sugar program will say almost anything to malign sugar. But to attribute the cocaine crisis to the sugar program is a bit ridiculous. Despite what opponents wish us to believe, sugar is not the root of all evil.

Those who seek to gut the sugar program suggest that is must be revamped because the steady flow of cocaine from Bolivia, Colombia, and Peru is directly attributable to the United States sugar quotas and the domestic sugar program. Their theory goes something like this: Because these countries have been cut off from our sugar market, sugar production has lagged and farmers are turning to alternative crops, namely, coca.

One need only look at the agricultural reports from cocaine producing countries to soundly debunk this theory. Since the United States sugar quota was adopted in 1982, Colombia's sugar acreage has increased by more than 10 percent. Our USDA agricultural attaché reports that sugar acreage in Colombia "continues stable while cane yields are improving."

In Peru, sugar acreage has increased 40 percent since the quota was adopted. Despite these increases, Peruvian farmers can produce only 75 percent of their country's sugar needs. As a consequence, Peru failed to fill almost one-third of its quota last year.

Bolivia is not even a player in the field of sugar exports. Despite an acreage increase of more than 10 percent, Bolivia cannot produce enough sugar to satisfy its domestic needs, let alone fill its United States quota.

No amount of sweet talking will make people believe that the domestic sugar program is the cause of our Nation's drug problem. The U.S. sugar program can hardly be responsible for the agricultural woes of these cocaine producing nations when they fail to produce enough sugar to satisfy internal demand or fill their U.S. quota.

Mr. President, the drug crisis is a problem of monumental proportions. All the creative attention and enlightened thought Americans can muster will be necessary to fight this menace. As we search for proper solutions to the vexing problem of drugs in America, I think we should "just say no" to misguided proposals which disguise themselves as solutions to the drug crisis.

Next we are supposed to believe that the sugar program is the most destabilizing influence since Manuel Ortega arrived on the scene a decade ago. In fact, the opposite is true. As a consequence of the United States sugar program, the Philippines and the sugar producing nations of the Caribbean are not required to sell their sugar at depressed prices on the world sugar market.

In a recent study of the Caribbean Basin Initiative program, the U.S. Department of Agriculture and the U.S. International Trade Commission determined that without the U.S. sugar program, CBI revenues would drop by 20 percent. This would mean a loss of several hundred million dollars of exports for the region. Nothing would be a more mortal blow to the fragile economies of our Caribbean friends than the enactment of this amendment. Our struggling neighbors can ill-afford such losses. Will the United States be able to make up these losses through increased foreign aid to the region? Given our current budget woes, I think not.

If the sugar program was as harmful to the economies of the region as the proponents of this amendment would have us believe, then you would expect them to support this amendment. In reality, the opposite is true. Caribbean sugar producers strongly opposed this attempt to cut the sugar program. In the words of the President of the CBI sugar group, "a 2-cent reduction in price would, in fact, result in lower foreign exchange earnings for our economies that need social and political stability."

Those who study the politics of sugar understand that the real villain among the world sugar producing nations is not the United States, which supports sugar at a price equal to the cost of production, but the Common Market. As a consequence of Common Market policies which promote domestic production through exorbitant price supports at the same time that sugar imports are virtually prohibited, the European Community has moved from being a net importer of 1 million tons of sugar in 1970, to exporting nearly 5 million tons of sugar in 1988.

Mr. President, a vote for this amendment is a vote to let Common Market sugar farmers celebrate Christmas in July. It is they who will be the principal beneficiaries of any amendment to cut the sugar program. And sugar farmers in Hawaii and other States will suffer as a consequence.

Any meaningful discussion of this essential commodity cannot proceed without an understanding that sugar is the most widely grown and heavily protected commodity in the world. The U.S. sugar program is fair and appropriate for a country that leads the world in both production and consumption of nutritive sweeteners. In light of the current world and U.S. cost of production for sugar, it is anything but excessive.

Statements of administration policy normally carry great weight when we consider farm bill amendments. With regard to the pending amendment, however, the Bush administration has lost all credibility. That is because they can't seem to make up their mind. By my count, they have voiced their support for the sugar program in four instances and been against it an equal number of times.

The administration has changed its position on sugar almost as often as Secretary Yeutter changes his jacket and tie!

This on-again, off-again approach to agricultural policy prevents growers in Hawaii from making any long-range decisions and keeps sugar workers and their families on the edge of their seats. What we need to do is defeat this amendment so that our sugar growers can go back to producing steady supply of sugar at reasonable prices.

Mr. President, this is a bad amendment. It will hurt the sugar workers in Hawaii. It will hurt our Nation. We will be at the mercy of foreign cartels.

Therefore, Mr. President, I move to table the amendment, and I ask for the yeas and nays.

The PRESIDENT pro tempore. Is the demand sustained? Obviously it is.

The yeas and nays were ordered.

The PRESIDENT pro tempore. The question is on agreeing to the motion of the Senator from Hawaii to lay on the table the amendment of the Senator from New Jersey. On this question the yeas and nays have been ordered, and the clerk will call the roll. The clerk will please repeat the responses so that all may hear.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Utah [Mr. GARN] is necessarily absent.

I further announce that the Senator from South Dakota [Mr. PRESSLER] is absent due to a death in the family.

The PRESIDENT pro tempore. Are there any Senators in the Chamber who wish to vote or change their vote?

The result was announced—yeas 54, nays 44, as follows:

[Rollcall Vote No. 166 Leg.]

YEAS—54

Adams	Dodd	Lott
Akaka	Durenberger	Mack
Baucus	Exon	McClure
Bentsen	Ford	Mikulski
Boren	Fowler	Pryor
Boschwitz	Gore	Riegle
Breaux	Graham	Rockefeller
Bumpers	Gramm	Sanford
Burdick	Harkin	Sasser
Burns	Hatch	Shelby
Byrd	Heflin	Simon
Cochran	Helms	Simpson
Conrad	Hollings	Stevens
Cranston	Inouye	Symms
D'Amato	Johnston	Thurmond
Daschle	Kerrey	Wallop
DeConcini	Leahy	Wilson
Dixon	Levin	Wirth

NAYS—44

Armstrong	Hatfield	Mitchell
Biden	Heinz	Moynihan
Bingaman	Humphrey	Murkowski
Bond	Jeffords	Nickles
Bradley	Kassebaum	Nunn
Bryan	Kasten	Packwood
Chafee	Kennedy	Pell
Coats	Kerry	Reid
Cohen	Kohl	Robb
Danforth	Lautenberg	Roth
Dole	Lieberman	Rudman
Domenici	Lugar	Sarbanes
Glenn	McCain	Specter
Gorton	McConnell	Warner
Grassley	Metzenbaum	

NOT VOTING—2

Garn	Pressler

So the motion to lay on the table the amendment (No. 2314) was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDENT pro tempore. Under the order, the Senator from Maine [Mr. COHEN] is recognized to offer an amendment on which there will be 40 mintues of debate to be equally divided and controlled in the usual form, which means that the managers of the bill will control half of the time and the mover of the amendment will control half.

Does the manager of the bill oppose the amendment?

Mr. LEAHY. The manager of the bill supports the amendment.

The PRESIDENT pro tempore. Then under the usual form, the minority leader or his designee will control the time in opposition to the amendment.

Who yields time?

Mr. MITCHELL. Mr. President, will the Senator yield a moment to permit me to get a unanimous-consent agreement regarding the handling of amendments immediately following the amendment of the Senator from Maine?

Mr. COHEN. I am happy to yield to the majority leader.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the time used to obtain this unanimous-consent agreement not be charged to either side on the amendment.

The PRESIDENT pro tempore. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT

Mr. MITCHELL. Mr. President, I ask unanimous consent that, upon the disposition of the Cohen amendment regarding "flexible basing," Senator BOSCHWITZ be recognized to offer an amendment relating to "loan rate," and that the amendment be under a 2-hour time limitation, equally divided in the usual form; that no amendments to the Boschwitz amendment be in order, and that upon the use or yielding back of time the Senate pro-

ceed to vote without any intervening action or debate on or in relation to the Boschwitz amendment.

I further ask unanimous consent that, upon disposition of the Boschwitz amendment, Senator CHAFEE be recognized to offer an amendment relating to honey, that the amendment be under a 90-minute time limitation, equally controlled and divided in the usual form, that no amendment be in order to the Chafee amendment, that upon the use or yielding back of time the Senate proceed to vote, without any intervention action, on or in relation to the Chafee amendment.

The PRESIDENT pro tempore. Is there objection to the request? The Chair hears no objection.

Mr. BOSCHWITZ. Reserving the right to object; after the termination of this amendment, does the majority leader want me to go forward with mine, which I am very willing to do?

Mr. MITCHELL. Yes.

Mr. BOSCHWITZ. I would say to the majority leader that I have a meeting in my office that I cannot avoid, so I will speak on this amendment and attempt to come back and be timely for the proposal and adoption of my amendment, which will come next.

Mr. MITCHELL. I appreciate that very much. I just want to make sure the Senator will be in a position to return so that if we stack these we are not in a position of waiting for everything else.

Mr. BOSCHWITZ. I will be in a position to return no later than 20 after 11.

Mr. SYMMS. Mr. President, reserving the right to be object, and I will not object; I just wanted to make inquiry of the leader and the managers of the bill. Some of us have amendment that are being cleared. I have two now that are cleared. Is there a time where we want Senators on the floor to get those taken care of?

Mr. LEAHY. Mr. President, I ask any Senator who has an amendment that is being cleared to have them here for either the Senator from Indiana or myself. If they have been cleared, we would be happy to bring them up ourselves as we get time.

Mr. SYMMS. That is fine. I will submit them to the managers.

Mr. LUGAR. Mr. President, will the leader submit to a question? How will the recess for the party meetings fit in the 2-hour time limit on the Boschwitz amendment?

Mr. MITCHELL. I think it will come during the Boschwitz amendment. I was going to ask, after we got the agreement, that when we got close to 12:30, if there were any possibility of completing action roughly at that time, it might be wise to do so and vote then. But that would obviously require the consent of both parties.

Mr. LUGAR. Otherwise the time for the vote would come after the recess?

Mr. MITCHELL. Yes.

Mr. BOSCHWITZ. I say to the majority leader that I have spoken on my amendment on the floor several times now so that it may well be that we will not use the entire 2 hours.

Mr. MITCHELL. I thank my colleagues.

The PRESIDENT pro tempore. Is there objection to the request? The Chair hears no objection. The request is granted.

Mr. MITCHELL. Mr. President, I thank my colleagues for their courtesy.

The PRESIDENT pro tempore. The Senator from Maine is recognized.

AMENDMENT NO. 2335

(Purpose: To prohibit certain fruits and vegetables from being eligible for the flexibility provisions in the commodity titles)

The PRESIDENT pro tempore. The amendment of the Senator from Maine is at the desk.

The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Maine [Mr. COHEN], for himself, Mr. LEVIN, Mr. CONRAD, Mr. MITCHELL, Mr. BURDICK, Mr. CRANSTON, Mr. SYMMS and Mr. RIEGLE, proposes an amendment numbered 2335.

Mr. COHEN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDENT pro tempore. Without objection it is so ordered.

The amendment is as follows:

On page 316, line 23, after the word "crop", insert the following: "(or any fruit or vegetable crop (including potatoes and edible beans) not designated as an industrial or experimental crop by the Secretary)";

On page 319, line 7, after the word "oilseed" add the following: ", industrial crops and experimental crops (as designated by the Secretary)";

On page 319, line 8, replace the period at the end of the line with a comma and add the following: "except any fruit or vegetable crop (including potatoes and edible beans) not designated as an industrial or experimental crop by the Secretary.".

Mr. COHEN. Mr. President, I ask unanimous consent that Senator MACK be added as a cosponsor.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Who yields time?

Mr. COHEN. Mr. President, I yield myself 1 minute.

The PRESIDENT pro tempore. The Senator is recognized for 1 minute.

Mr. COHEN. Mr. President, I am going to proceed in a somewhat unusual fashion. Senator BOSCHWITZ has indicated that he has an important meeting that he has to attend with a Cabinet member back in his office. For that reason, rather than proceeding with debating the merits of the amendment, I am going to yield the floor so that Senator BOSCHWITZ may proceed in opposition. Because, in my judgment, the opposition has so little merit to his argument, I do not see this as compromising the substantial arguments in favor of the amendment. So I will yield the floor at this time to accommodate Senator BOSCHWITZ.

The PRESIDENT pro tempore. How much time is yielded by the opposition?

Mr. LUGAR. Mr. President, I yield to the distinguished Senator from Minnesota as much time as he requires.

The PRESIDENT pro tempore. The Senator from Minnesota [Mr. BOSCHWITZ] is recognized for as much time as he may require.

The Senator from Minnesota is recognized.

Mr. BOSCHWITZ. Thank you, Mr. President, and I thank my colleague from Maine, the senior Senator from Maine.

Mr. President, farm programs are schizophrenic in many, many ways. We send very mixed signals to farmers. And it is that which we are trying to correct, among other things, in the 1990 farm bill.

The whole idea of flexibility which has been watered down in the 1990 farm bill is to begin the process of unmixing the signals that we send to farmers. First, we tell the farmers to plant fence row to fence row. Then we reverse the signals by introducing a conservation reserve program. Then, with high target prices and higher loan rates, we induce plantings so that farmers plow up new lands and plant wheat, corn and other crops in new areas, marginal areas farther up the side of the hill in southeastern Minnesota, further out to the prairies in South Dakota, Colorado, and North Dakota; land that really should be grazed, land that really should not be cropped.

Then we have a reversal and we buy that land that we have induced into production, we buy it out of production with the conservation reserve program or some other program.

Then we send the soil and conservation experts out to the land and we tell farmers how they can drain their swamps. We tell them how they can tile their land and we even participate financially in tiling the land so that they can drain the swamps. And then we turn around and we implement swamp buster because what we expected to happen is happening, wetlands are being drained.

And so it is over the years that we have this schizophrenia that applies to agriculture and to agriculture policies. There really is no consistency.

In 1985, when we offered this 5-year farm bill, Senator BOREN and I offered a 6-year farm bill because prior to that there had only been 4-year farm bills. We felt it was important to have consistent policy. We wanted a longer

period. We did not get 6 years, but we got 5 years. And now 5 years is the established norm. As a matter of fact, in the bill that I introduced I even asked for 7 years hoping that it might go up another year once again. The likelihood of that happening was not great because then we would have it once again in an election year and that is not considered to be desired if it can be avoided.

But, in any event, there has been a very schizophrenic element to the whole business of agricultural policy, and it is that which we were trying to begin to change with the business of flexibility. And now comes my good friend from Maine and says that with the flexibility that we have introduced here that we are possibly undermining producers of fruits and vegetables and other crops.

Back in 1985, when we had the so-called decoupling plan where we not only allowed a farmer to retain his base but to get a payment and be able to plant other crops. The Senator from Maine made the point that he is making this morning to me and I agreed with him. And so in this farm bill we simply say that the farmer will be able to maintain his base, his corn base, his feed grain, wheat, cotton, or rice base. The interchangeability of crops is not quite as great as some would think.

The interchangeability of cornland or wheatland with potatoes, asparagus, or various root crops for which special equipment is involved really is not very great.

For things like navy beans and sweet corn, the interchangeability is greater. Really, my farmers have more to fear from that than do the farmers of the Northeast, farmers who are principally involved in more specialty vegetable crops than ours in the Midwest are.

Specialty crops such as vegetables are highly intensive forms of agriculture that are not going to spread to the Midwest simply because we say to a farmer you can have flexibility and retain your corn base.

The reason we put that into the bill is because the basic asset of agriculture is the land. And there is no queston about the fact that the value of the land is enhanced by having a crop base on that land. We simply cannot, as we begin this process of moving toward flexibility, take away or devalue the basic asset of agriculture.

However, we remove almost all of the advantages that the farmer has with respect to planting those acres to a nonprogram crop. The advantages that he would have, of course, are the payments that he would not receive under the flexibility plan that is in the 1990 farm bill.

So the purpose of this bill is not to lock farmers into doing certain things. But now, as we begin to unlock, we are once again locking up by virtue of this amendment. We are saying to the farmers: You have flexibility, but not very much flexibility. Yes, you can plant your regular crop or you can respond to the market, but not in all crops. Not in most crops, as a matter of fact. Of all the varieties of crops that you might plant, most of them have been removed.

It is for that reason I object to this amendment. We are trying to unlock agriculture from restraints. This amendment would lock more restraints back into agriculture, even as we try to move away from that.

I understand the opposition to this amendment. You are providing something of a safety net by allowing the base to remain. But the important thing is we are providing no payments. We do not want to undermine the basic asset of agriculture. But we do, indeed, want flexibility to occur in a fair way. That is why we have removed the payments.

I hope my friends and colleagues will watch this vote because some of those people who voted on the last amendment and voted for a lower sugar support and called it a consumer vote, will not reverse the field. They will vote with my friend from the State of Maine, though I do not believe there will be a rollcall vote on it. There will not be a rollcall, Mr. President, because of the lack of support for my position. That lack of support comes because, as is so often the case in agriculture, there is a shift of positions. Yes, we want to vote for the consumer on sugar, but we do not want to vote for the consumer when it comes to adding flexibility to what farmers are able to do. That is the basic argument.

There is a great deal of schizophrenia in farm programs. We are making an effort in this bill to remove that. We are making an effort to provide more market orientation in this bill. Yet, with this amendment we are removing some of the advantages we are seeking in this new 1990 farm bill.

I thank the Senator from Maine for allowing me to speak at this time and for his courtesy. I yield the floor.

The PRESIDENT pro tempore. Who yields time?

Mr. COHEN. Mr. President, how much time do I have remaining?

The PRESIDENT pro tempore. The Senator from Maine has 19 minutes and 12 seconds.

Mr. COHEN. Mr. President, I yield myself 3 minutes.

The PRESIDENT pro tempore. The Senator from Maine is recognized for 3 minutes.

Mr. COHEN. I ask unanimous consent Senator GRAHAM of Florida be added as a cosponsor.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. COHEN. Mr. President, contrary to what the Senator from Minnesota has just argued, this is not a question of flexibility; it is a question of fairness. By the way, this particular amendment is supported by both the minority and majority members of the committee. It is also supported by the Western Growers Association, the American Farm Bureau Federation, the Florida Fruit and Vegetable Association, the United Fruit and Vegetable Association, the National Potato Council, and the administration.

This is not an anticonsumer vote. It is a pro-consumer vote. Let me briefly explain what is involved here when I say it is an act of fundamental fairness to all farmers.

This amendment addresses two provisions in the farm bill: zero certification and flexibility. Under the zero certification provision, a program crop farmer could plant nonprogram crops on his acreage base without losing any of that base, if he certifies that no program crop was planted.

Under flexibility, a farmer could set aside 25 percent of his acreage and grow a nonprogram crop; for example, potatoes or broccoli or some other fruit or vegetable without losing any of his acreage base.

The fairness that is involved here is the situation where those who are covered with Federal supports are in direct competition with those who are not. Senator BOSCHWITZ has argued it is only flexible. The fact of the matter is, this is absurd. Every farmer has a total freedom to plant anything he or she wants. They can plant fruit, vegetables, anything. We have over 1,000 potato farmers in Maine, and I do not recall a single farmer ever going down to a Government office to get a writ of production to grow potatoes. You can grow anything you want in this country, and you do not need the Government's permission.

Farming is like a high wire act. You have to fight against the elements; you have to fight against the insects; you have to fight against domestic competition; you have to fight against foreign competition. It is easy to fall off that high wire.

What Senator BOSCHWITZ wants is to protect a certain class of farmers walking on that high wire by providing a safety net below. If they go into, let us say, the potato market for a year with 25 percent of their acreage, and if they do not make it and they fall, they simply fall back onto their original protected acreage base.

So they can fall and be secure and know they can go back to their wheat or corn or whatever else they were growing that was protected. But the Maine potato farmers or Idaho potato farmers or those in California, if they fall, there is no safety net. They simply have to take the whims of the marketplace.

The PRESIDENT pro tempore. The time allotted to the Senator has expired.

Mr. COHEN. I yield myself 1 additional minute.

The second argument is one of market stability, Mr. President. I am all in favor of market stability, and I am particularly aware of its importance in the potato industry. It is a very supply-sensitive industry.

In a recent study by the U.S. Department of Agriculture, they found for every 1-percent increase in supply of potatoes, there is a corresponding 4-percent decrease in price. So in my situation, the potato farmer can have a good year. They are having a good year this year; they are breaking even. The crops may look appealing to Senator BOSCHWITZ' farmers, and they may decide to go into potatoes this year. If they go into potatoes, they increase supply, the market price goes down, and then we have tremendous failures up in my area of the country, or in Idaho or elsewhere.

So market stability is critically important. What we are arguing for and what is supported by the overwhelming majority of the people involved in this issue is not only fairness to all farmers, treating them equally, but also market stability so we do not have one group of farmers saying we tried our act and we failed; we walked the high wire and fell off, and now we are going to go back to the safety net so we can have our programs protected to the full extent.

I urge the adoption of my amendment, Mr. President.

Mr. SIMPSON. Will the Senator yield for a comment?

Mr. COHEN. I yield 1 minute to the Senator.

Mr. SIMPSON. I thank the Senator for yielding.

Mr. President, I want to compliment the Senator from Maine. He is absolutely right, in my opinion, in the comments he has made.

Mr. President, it is no secret in this body this Senator grew up in the produce business. In fact, I spent this past weekend at the orchards in Idaho. The amendment of the Senator from Maine is very fair. It tries to recognize, and we do all recognize, that there are nonprogram crops and they are a very important part of the U.S. economy, such as most of the fruits and vegetables that people consume. It would disrupt the market to engage the farm programs with those nonprogram crops. We have edible dry beans in Idaho, peas and lentils, and many other crops.

I compliment the Senator for the work he has obviously done on this amendment. He is a real asset to the Senate. I thank him very much for the work he did and for the privilege of being a cosponsor of the amendment.

Mr. COHEN. I thank the Senator.

I yield 2 minutes to Senator CONRAD.

The PRESIDENT pro tempore. The Senator yields 2 minutes to whom?

Mr. COHEN. The Senator from North Dakota.

The PRESIDENT pro tempore. The Senator from North Dakota is recognized for 2 minutes.

Mr. CONRAD. Mr. President, under current law, on 25 percent of a farmer's base, he can grow anything and protect that program base. Under our amendment, he can grow anything, but he cannot protect his base if he grows fruit, vegetables, potatoes, or dry edible beans.

The issue is simply this: Program crop producers with a protected base will shift to nonprogram crops during periods of high prices. For example, a corn grower in North Dakota with a program base can increase potato plantings when potato prices are high and fall back on his program crop base when potato prices fall. This is clearly unfair to producers who rely solely on potatoes or other nonprogram crops for their livelihood.

Simply stated, Mr. President, those who oppose this amendment are not arguing for flexibility; they are arguing for instability.

I thank the Senator from Maine and yield the floor.

Mr. COHEN. Mr. President, how much time remains?

The PRESIDENT pro tempore. Senator COHEN has 12 minutes and Senator LUGAR has 10 minutes. Who yields time?

Mr. LUGAR. Mr. President, I yield myself as much time as I may require.

The PRESIDENT pro tempore. The Senator from Indiana yields himself as much time as he consumes.

Mr. LUGAR. Mr. President, this amendment points up the problems of farm programs generally and the inflexibility that is inherently a part of programs as they are now written. I shall not strenuously oppose the amendment of the distinguished Senator from Maine because largely the green book of the U.S. Department of Agriculture and much of the argumentation we have heard before the committee is supportive generally of the Senator's amendment.

Clearly, those producers of small vegetable and fruit crops are fearful that in the event that the large acreage that are not planted in the so-called program crops of corn, wheat, cotton, and rice, are shifted, if even a small percentage of those acres were shifted to the nonprogram crops, it is going to have enormous disruption. I understand that. This is the reason why the Senator's amendment will be adopted and deserves to be a part of the bill.

I take this occasion, however, to point out that there will come a time, I suspect, when many farmers will not be involved in the programs. They will find it advantageous economically not to restrict their planting in order to qualify for the program crops. They will make choices as the market dictates. Certainly, theoretically, most economists would suggest that a farmer ought to have the full gamut of options. If on a particular occasion, if the climate and the weather and the geography is good to plant potatoes, that farmer ought to plant potatoes, as opposed to corn or wheat or rice or what have you. Many of these choices are dictated by geography, and clearly some choices of plantings are entirely inappropriate.

But we have managed to fashion in U.S. agriculture such a rigid system that farmers now really, on many occasions, cannot make choices dictated by supply and demand, by the market in this country or the market abroad. For a corn farmer in Indiana to deviate from planting corn is to risk the loss of the crop history which he must have to undergird the program payments. Therefore, the farmer plants corn.

In my own situation in Indiana, the logical choice in some years would be plant more soybeans, but as soybeans do not have a program, therefore, are not supported in the same way corn is, farmers are inclined to plant corn. It is clearly the safer option. The arithmetic has to be extraordinary to change that.

In this particular amendment, the thought was that farmers could move off and plant potatoes and not lose their history. They would not get money from planting the potatoes in the deficiency payment situation, as they would with corn. Clearly, these would have to be an extraordinary year in which the arithmetic in favor of potatoes was better than the arithmetic in favor of soybeans. This is an unlikely occurrence. Therefore, the Senator has pointed up a potential dilemma for the small nonprogram crops. In actuality, it is probably not a very large one in most sections of the country most years.

As I mentioned to the Chair, in due course, I suspect, good agricultural policy will lead to more general flexibility in which the farmers will be able to use their very best acres to plant those crops in this country that are the most efficient, the most low cost, therefore, the most competitive in our world situation.

The farm bill now in front of us makes some modest steps in favor of flexibility. We may have amendments offered which attempt to augment that flexibility in due course. But this is, in my judgment, not the place in which that argument will rise or fall. I commend the Senator for pointing up something that is of great concern to many of the nonprogram crop people in the country.

I see no Senators on our side of the aisle in opposition to the amendment. I will withhold yielding back all time until I make certain of that, but I am prepared to do that at the point the distinguished Senator from Maine is prepared to end this debate. I thank the Chair.

Mr. COHEN. I thank the Senator.

Mr. President, I yield the Senator from California 3 minutes.

The PRESIDENT pro tempore. The Senator from California [Mr. WILSON] is recognized for 3 minutes.

Mr. WILSON. Thank you. Mr. President.

Mr. President, I rise in support of the amendment offered by the Senator from Maine, and I particularly like the analogy he has made. We on the floor often make reference to leveling the playing field. The particular metaphor he has chosen illustrates that program crop producers who are seeking so-called flexibility do have a safety net that is not available to nonprogram crop producers. This safety net comes in the form of base acreage protection, price supports and income supports.

What we would see, I think, if it were not for the Cohen amendment, is that even though payments would not be made on the acreage shifted to nonprogram commodity production, the program crop producer would have the opportunity of resuming production of a program crop with full program benefits in subsequent years. This ability of a program crop producer to move 25 percent of his production into nonprogram crops could cause disequilibrium in the fruit and vegetable market.

Additionally, there is the concern of those who are engaged in the production of fruits and vegetables that increased imports of these commodities into the United States could exacerbate an oversupply problem created, in part, by the production of fruits and vegetables on program crop acres.

The Senator from Indiana has just made that point, and it is all too clear to anyone who has been involved in even the casual observation of agriculture. So what we would have without the Cohen amendment is, in effect, Government encouragement of intrusion into what is a very fragile marketplace.

A disruption of the balance would not be good for the consumer, Mr. President. Perhaps in the short run, some glut of the market would produce lower prices for the consumer, but obviously in any case where that drives people out, where it knocks people off the high wire that Senator COHEN has alluded to, the long-term net effect for the consumer is that with fewer producers, with uncertainty in the marketplace, there will be higher prices, and that is not good for the consumer nor for the farmer.

Mr. President, in addition to commending the Senator from Maine, I wish that the amendment permitted the inclusion of foraging crops. I understand the pressures that caused him to remove that provision from his amendment. It is present in the House language, and I think in conference that those who are urging its inclusion will prevail. They should. There is no reason that the producers of foraging crops should not have the same protection as other nonprogram crop producers.

But what we have here is a very wise amendment by the Senator from Maine. I join him in supporting it.

The PRESIDING OFFICER (Mr. LIEBERMAN). Who yields time? The Senator from Maine.

Mr. COHEN. Mr. President, I believe the majority leader should arrive on the floor momentarily and would like to address the Senate on this issue.

I thank the Senator from California for his comments. I must say that when he referred to net effect, I am not sure whether he was referring to the safety net that we were talking about earlier.

But let me come back to a particular point that I made earlier. We are not at all saying that farmers should not have flexibility. In fact, we agree that they should have total flexibility. If they want to plant 25 percent of nonprogram crop, they should do so. Plant 50 percent, plant 75 percent, plant 100 percent, but do not ask farmers in one area of the country or in several areas of the country who do not receive the sort of protection the Federal Government provides to stand idly by while they have to withstand all the competitive forces. Do not ask Maine farmers to watch while their competitors whom they are subsidizing through their tax dollars come in and seek a share of the market and, if they fail, go back to their full acreage protection. This is something that is fundamental to the farm program.

The Senate Agriculture Committee report accompanying S. 2830 itself acknowledges that protecting the based of subsidized farmers who choose to grow potatoes would unfairly give one class of growers an insurance policy that would be denied to nonprogram farmers.

All we are saying by this amendment is that if you want to get into the market, if you want flexibility, you cannot expect a guarantee. We are saying that you cannot go out into the volatility of the marketplace and then come back into the safety of the Federal Government's security program. We do not have a security blanket for Maine potato farmers or the other fruit or vegetable producers. I do not think that we should provide one for a special class of fruit or vegetable farmers.

Mr. CONRAD. Will the Senator yield for a moment at that point?

Mr. COHEN. Could I inquire how much time I have remaining?

The PRESIDING OFFICER. The Senator from Maine has 5 minutes and 46 seconds.

Mr. COHEN. How many minutes?

The PRESIDING OFFICER. Five minutes.

Mr. COHEN. I yield to the Senator from North Dakota.

Mr. CONRAD. I just want to drive home the point that the Senator from Maine is making. Really, absent this amendment, we will create two classes of producers: Those who have complete flexibility with a protected program base, and those who have complete flexibility with no protected program base. Obviously, that creates an unfairness. I commend the Senator from maine for making, I think, a cogent argument on that point.

Mr. COHEN. I thank the Senator for his comments.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Maine has exactly 5 minutes remaining.

Mr. COHEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. COHEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered. Who yields time?

Mr. COHEN. How much time do I have, Mr. President?

The PRESIDING OFFICER. The Senator from Maine has 4 minutes remaining.

Mr. COHEN. I yield 4 minutes to the Senator from Maine, the majority leader.

The PRESIDING OFFICER. The Chair recognizes the Senate majority leader, Mr. MITCHELL of Maine.

Mr. MITCHELL. Mr. President, I want to express my support for the amendment offered by Senator COHEN, myself, and other Senators. I commend Senator COHEN for his effort on this matter.

This amendment provides a measure of basic fairness for Maine's potato farmers. It is needed since S. 2830, as reported by the Agriculture Committee, would allow program crop producers to grow nonprogram crops such as potatoes without penalty toward determining their eligibility for current or future Federal farm program subsidies.

The committee bill allows farmers to shift up to 25 percent of their wheat and feed grain base acreage into any program crop, any oilseed, and any

nonprogram, nonoilseed crop without suffering a loss in crop acreage base.

In addition, S. 2830 allows producers to shift 100 percent of their acreage out of the program crop into any other crop without losing base.

Maine potato farmers have told me they fear that if such a program did not exclude potatoes from the crops, that could be grown, many program crop farmers would plant potatoes on the shifted acres, continue to receive farm program benefits and, in effect, subsidize their potato acres.

The combination of these two provisions could potentially lead to greatly increased potato acreage. Program crop farmers who take advantage of the bill's provisions would do so knowing that if potato prices, for whatever reason, declined, they could simply return to producing a program crop the following year with no penalty.

But potato farmers in Maine, if potato prices for any reason declined or plummeted, would have nothing to fall back on and would have to try to make up their losses the following year with no assistance from Federal farm programs. There is no fairness to that proposition.

Our amendment would preclude the planting of fruits and vegetables, including potatoes and edible beans, not designated as an agricultural or experimental crop by the Secretary of Agriculture on these acres.

It levels the playing field so Maine's potato farmers will not have to compete against farmers whose planting decisions are based in part on the availability of farm program benefits not otherwise available for potato growers.

Just last week, the Department of Agriculture issued its first estimate of fall potato acreage. The department estimates that the fall potato States planted 1.17 million acres. That acreage is up almost 6 percent from the previous year.

That is not surprising, given that potato prices for the past few years have been pretty good. If prices remain high again this year and the committee report language is not modified as proposed in our amendment, the department will likely estimate acreages much higher next year.

The prospects for this increased production to have a negative impact on potatoes would be great. The program crop farmers would not have to worry; they would go back to the program crop in 1991 or maybe move on to another nonprogram crop that had a couple of good price years.

If program crop farmers want to plant potatoes, they should take the same risk as potato farmers. Anything else is not the ideal called a free market about which the Secretary of Agriculture speaks so often.

Mr. President, I support the amendment. I urge its adoption by the Senate. I thank my colleague for his efforts and for yielding this time.

Mr. LEVIN. Mr. President, I am joining with several of my colleagues in offering an amendment to protect certain nonprogram crop producers from potential economic damage due to the unrestrained flexibility provisions in S. 2830. As the bill now stands, program crop producers could grow any crop on up to 25 percent of their permitted acreage without losing their historical crop acreage base.

Though the bill does not allow deficiency payments for flexed acres, my concern is that traditional program crop producers might turn to growing fruits, vegetables, potatoes, or dry edible beans. If this happens, traditional nonprogram crop producers could find their income reduced as a result of increasing supplies on the market that would lower prices of these commodities. The prices of these crops are supply-sensitive and might drop below a level at which a traditional nonprogram crop producer, who does not have the benefit of returning to a program crop payment system, could afford to maintain his farm.

This amendment does not prohibit growers from getting into the fruits, vegetables, potatoes, or dry edible beans business. They already have that right, and the right to grow as much as the market will bear. However, I see no reason why we should allow flexibility to change the playing field and provide further options and benefits to program crop producers that are not given to nonprogram crop producers. Producers of these commodities in Michigan can compete with any country and any other producer in the world, but let us not change the rules on them and force them to compete against their neighbors, if their neighbors are getting a better deal from the Government for producing the same crops. The amendment simply seeks to level the playing field.

One of the strengths of Michigan's agriculture is its diversity. This amendment will help ensure that this diversity is maintained and enhanced. I urge my colleagues to vote for this amendment.

The PRESIDING OFFICER. Who yields time? The Senator from Maine has 24 seconds remaining.

Mr. COHEN. Mr. President, I yield back all remaining time.

The PRESIDING OFFICER. The Senator from Indiana has 5 minutes 8 seconds remaining.

Mr. LUGAR. Mr. President, I yield back all time on our side.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to amendment No. 2335 offered by the Senator from Maine.

The amendment (No. 2335) was agreed to.

Mr. LEAHY. I move to reconsider the vote.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Under the previous order the Senator from Minnesota was to be recognized for the purpose of offering an amendment.

Mr. LUGAR. Mr. President, the Senator from Minnesota has been notified and is on the way to the floor. For the moment, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, what is the parliamentary situation?

The PRESIDING OFFICER. Under the previous order, the Senator from Minnesota [Mr. BOSCHWITZ] is now to be recognized for the purpose of offering his amendment. Debate will proceed for 2 hours divided in the normal fashion.

Mr. LEAHY. Mr. President, I ask unanimous consent that the debate be shortened to 1 hour and 35 minutes divided equally in the usual fashion.

The PRESIDING OFFICER. Is there objection?

Mr. BOSCHWITZ. Why do we not make it 1½ hours?

Mr. LEAHY. Make it 1½ hours, divided in the normal fashion.

The PRESIDING OFFICER. Without objection, it is so ordered.

The time will be controlled by the Senator from Minnesota and the manager of the bill.

Mr. LEAHY. Yes.

The PRESIDING OFFICER. The Senator from Minnesota is recognized for the purpose of offering an amendment.

AMENDMENT NO. 2336

(Purpose: To modify the loan and purchase authority for wheat and feed grains)

Mr. BOSCHWITZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Minnesota [Mr. BOSCHWITZ] proposes an amendment numbered 2336.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 67, line 17, strike "nor below $2.44 per bushel".

On page 68, lines 11 and 12, strike "nor below $2.44 per bushel".

Mr. BOSCHWITZ. Mr. President, this is an amendment about which I have spoken on the floor a couple of times during the course of the farm bill consideration and it is for that reason that I am pleased to reduce the amount of time that is allotted to the actual consideration of the amendment.

I apologize to the distinguished chairman of the committee and the ranking minority member for my delay in getting here to the floor.

This amendment would continue forward the 1985 farm bill with respect to loan rates. It would keep loan rates competitive.

I spoke on the floor yesterday about the 1985 farm bill and about what farmers would say about this farm bill if asked. I have asked hundreds of them, perhaps thousands of them, throughout my State. I have seen polls, too, where hundreds and thousands more have been asked the same question and they respond with surprising unanimity with very large margins of majority "Why don't you just continue the 1985 farm bill? The 1985 farm bill has served us well."

While I agree that the farm bill itself must be supplemented by a good rainfall, it must be supplemented by a dollar that is not too expensive, it must be supplemented by reasonable prosperity around the world so that buyers can buy, nevertheless, the essence of the 1985 farm bill that has made it such a valuable tool in changing the direction of agriculture has been competitive loan rates.

In the 1990 farm bill, we continue the loan rate formula but we establish floors. This amendment removes those floors.

The loan rate has been established under the 1985 bill and once again under the 1990 bill at 75 to 85 percent of the average market price in the 5 preceding years, taking out the high year and the low year and averaging the other three. The Secretary can choose 75 or 85 or somewhere in between. The Secretary has always chosen the lower figure, 75 percent of the average market price. It has caused loan rates to go down.

With the use of the so-called Finley provision, loan rates have been made even more competitive. The result has been that we have exported far more than we did in earlier years.

Senator BRADLEY and I asked the GAO to report on the 1985 farm bill. We asked them to report what it did with respect to carryover stocks, what it did with respect to exports, and what it did with respect to farm income. In each case, the GAO reported that the 1985 farm bill had achieved the goals that it set out to achieve and singled out the idea that more competitive loan rates had made it possible for us to recapture world markets.

As you see in the chart behind me, Mr. President, exports rose very rapidly from the early 1970's when they were at $6 or $7 billion and went up all the way to $43 billion and then fell precipitiously back to about $26 billion and now have once again climbed to $40 billion.

If there is a positive note in our balance of trade, it is agriculture, because in this red area, as shown on this chart, the positive trade balance which once again has opened up to nearly $19 billion. We export $19 billion more of agricultural products that we import.

Exports are the very essence, the very base of profitability in rural America, not only for the farmer who has had 3 very good years, but also for the infrastructure of rural America. As I have earlier pointed out on this floor, Mr. President, our constituency goes beyond the farmer. Our constituency goes to the infrastructure of agriculture where more people work, where more families are supported than on the farm itself. Our constituency is broader than just the farm. Our constituency is rural America.

The way that the Congress has always helped rural America is by priming the pump, and the pump is our farms. The pump is primed by making it possible for the farmer to move and sell his goods. Those who are involved in the sale, storage, movement, insurance, and all the other elements of the production of the goods, whether it is either chemicals, or seeds, or oil and gas, and all the other elements that go into the business of farming is as important as the farms themselves. More people work in the infrastructure than do on the farm.

Those who say that loan rates should be high so that we are unable to command a substantial export share, would condemn rural America to inactivity. So it is the purpose of this amendment to continue loan rates in their competitive march. That does not necessarily mean downward because in the case of wheat I think that loan rates will not go down.

But this bill would establish for wheat a base of $2.44 a bushel under which the loan could not go. It is not likely that the loan will go under that rate because of the market price of the 5 preceding years. But, nevertheless, if markets dictate that it should go lower, then it should go lower. And indeed the farmer will be protected because we are not changing the target price in this amendment.

The same goes for corn, which is an extraordinary crop. Let me refer to another chart, Mr. President. As you see in corn, which is an 8 billion bushel crop, 30 percent is exported. That is about 2½ billion bushels. And while 64 percent of wheat is exported, all of the wheat production is not as much as the 30 percent that is exported in corn. The entire wheat crop is only somewhat over 2 billion bushels and the export of corn is 2½ billion bushels.

All of that activity is extraordinarily important to rural America, and all of that activity will be more likely to continue if loan rates are made competitive on world markets and if loan rates can continue to reflect the marketplace. That is the essence of this amendment; that loan rates be able to continue their march in response to markets, that loan rates not be artificially give a floor, that loan rates be able to reflect the marketplace and the international needs of our friends and customers abroad.

So that is the purpose of this amendment, to remove the floor, to allow the marketplace to work. This is a market-oriented amendment. I trust that my colleagues will see it for what it is intended, and indeed it is intended to really gear up rural America and make it a viable, aggressive, productive, and profitable area of our country which it so badly needs to be.

Mr. President, I yield the floor and reserve the remainder of my time.

The PRESIDING OFFICER (Mr. KERRY). Who yields time? If no one yields time, time will be charged to both sides, equally divided.

Mr. LEAHY. Mr. President, I yield myself such time as I may need.

Mr. President, first I should note that once I have spoken, I hope that if there are others who wish to speak they might do so. I will then request whether there is the possibility of yielding back the remainder of the time. I mention that so Senators will be alerted that we could vote on this amendment before the time is used up.

Mr. President, as I have said many, times here on the floor on other amendments, we worked very hard in committee to get this final bill out; months and months of meetings, many weekends, and evenings. Several times the staff worked around the clock. We traveled to a dozen or more States, traveled thousands of miles, held hundreds of hours of hearings, and received thousands of pages of testimony.

What we came out with was a basic compromise. This is not the bill that I would have written had I been the only person to vote on it. I am sure it is not the bill the Senator from Minnesota would have written were he the only one to vote on it. But we cannot have 100 bills here on the floor. We can have only one. And this one balanced as many interests as we could, and so many of the things that are in this bill are a result of that kind of balance. That is the reality.

Now we can unravel that whole balance and we will be here until mid-Oc-

tober, perhaps, having votes, trying to put back together what the committee has spent months to craft. I am not sure the Senate is well served by that, and I know the American people are not well served by that. It makes far more sense to try to get this bill through the Senate and then when we go to conference, following the budget summit, we will know whether we are going to have to make major changes.

A number of people wanted to raise loan rates, not lower then. The House, incidentally, has already taken action to raise loan rates. We reached a compromise to freeze loan rates. We make the Secretary think a little bit about whether or not he should make the Finley reduction. We actually give him a fair amount of flexibility.

I think it is a fair compromise. I must say that the amendment before us unravels that compromise and in unraveling that it starts an avalanche throughout the whole bill that will unravel many, many other compromises. I can tell you if we take this amendment, I can see others coming in here with amendments to raise loan rates or to change a number of other things.

So, I will oppose the amendment. I urge Members to support what the committee has done. Otherwise, I think we open the door to a flood of amendments and a complete rewrite of the bill. I must say, Mr. President, having worked on this bill since the beginning of this year, going through all those meetings to try to craft this farm bill, if we have to take it apart and put this Rubik's cube back together again, we will be here well into next month on this issue alone and we will still have it to do all over again after the budget summit.

I yield to the Senator from Indiana such time as he may need.

The PRESIDING OFFICER. The Senator from Indiana is recognized.

Mr. LUGAR. Mr. President, I come to join the chairman in a common plea. With regard to the amendment before us, I believe the amendment, in terms of the economics that the Senator from Minnesota described, is a sound amendment. Clearly the loan rate program of the Federal Government with regard to agriculture ought to be related to markets. Floors are related to markets. The 5-year average ought to be able to go down as well as up. It seems to me the economics of what he says are unexceptionable.

The dilemma, it seems to me, of the amendment coming at this point is that the whole loan rate structure of agriculture has been discussed at very great length in the Senate Agriculture Committee. The chairman does not overstate the situation by describing days and weeks and, as a matter of fact, on the loan rate structure itself, as I recall, the better part of a month was consumed as Senators on both sides of the aisle tried to come to a compromise, which is a part of the legislation in front of us now.

Mr. President, let me for the sake of the record state that because we will probably be making this argument subsequently on other amendments that come from other directions, the amendment of the distinguished Senator from Minnesota is one I find agreeable. I think it is sound economics, and therefore I am reluctant to oppose it. I suspect on occasion amendments may come in that I do not think are very sound, and I would be much less reluctant to oppose.

But the chairman is correct. We have wrestled with at least three cardinal issues in the bill: The loan rate structure, the target price structure, and the set-aside acreage proposition. Throughout all of the negotiations within the committee, I took a position that we ought not increase target prices. We ought not increase loan rates. For the sake of a competitive America, we ought not increase the set-aside of economically efficient acres that are competitive with the rest of the world.

I felt very strongly about all three of those points, which all members of the committee will certainly attest to. I felt if we went in the wrong direction of higher target prices, higher loan rates, and more set-asides, that I would oppose the bill. I would suggest we not have a 5-year bill. We would be better off with a 1-year bill continuing current policy rather than making a mistake for 5 years into the future.

My judgment on this was not arbitrary. Clearly, I foresee the continuation of income rising in agriculture America in the next 5 years; it ought to be the same as for the last 5, if we follow the basic principles of the 1985 farm bill. And essentially we are doing that in this legislation.

But it is also true, Mr. President, we are not considering the agriculture bill in a vacuum. We are considering it at a time that the President of the United States has met, today, with leaders in this body—Senator MITCHELL and Senator DOLE and distinguished Members of the House—at a summit on the economy to talk about very grave cuts in domestic and military programs, to talk about the potential increase of taxes.

To be considering on this floor higher target prices, higher loan rates, more of the trends at least that were fashionable in some farm bills of the past all in the name of helping agriculture and helping the country, it seems to me would be a very bad mistake historically, as well as in the timeframe in which we work.

I appreciate the fact the committee has reported a bill in which target prices are frozen for 5 years, they were not increased; a bill in which the loan rate structure at the top was not increased; and in which set-asides if anything have been decreased; and in which there is a certain degree of flexibility, although not nearly so much as I hope we can finally achieve by the time we have completed work with the House in conference or completed work on the floor.

That is a very substantial achievement, Mr. President.

The Senator from Minnesota comes with the proposition clearly we would be more competitive in this world if we followed the market as opposed to the structures that we have created in the loan rate situation.

As I said at the outset, I do not disagree with the theoretical economics of this. I observe that members of our committee did find the need for a floor below which loan rates would not fall was very important in terms of their support of this legislation. They finally accepted my proposition that loan rates should not go up. But a majority of Senators also accepted the thought that loan rates should not fall beneath the floor of the current year.

We had a further argument, Mr. President, about the so-called Finley loan rate proposition in which the Secretary of Agriculture may reduce loan rates below this floor by 20 percent and, on that proposition, a whole structure of a compromise was built that may be debated further during the course of this. But I shall support the compromise that was reached, difficult as that structure may be for all of us to understand, and certainly there are opponents to it simply on the theoretical economic side as well as the practical side.

But we reached a compromise, Mr. President, finally, on the loan rate business. It appears to me the amendment of the Senator would undermine that compromise. I would just signal that in the same way I will speak against the amendment of my friend from Minnesota in which I basically find a great deal of merit, I would speak equally strongly against those who want to raise target prices, if they should come along, or those who want to unravel the loan rate structure in another way, or those who want to set aside large amounts of land in America, hoping somehow prices will rise if supplies are curtailed. I think all of these measures would be sorely wrong at this point.

So, reluctantly, Mr. President, I must oppose the amendment of the Senator from Minnesota, and I do so in solidarity with the chairman of our committee, Senator LEAHY. We have worked together to try to fashion a bipartisan farm bill. We appreciate the support that our efforts have been given by Members on both sides of the aisle.

This, in a way, is the first significant test of a delicate compromise on the loan rate, target price, set-aside situa-

tion. Therefore, I am certain it will be met at least with vigor by both the chairman and by myself, and that is my testimony presently.

I yield.

The PRESIDING OFFICER. Who yields time? The Senator from Minnesota.

Mr. BOSCHWITZ. Mr. President, I would like to return to the amendment. I say to my friend, the chairman of the committee, we should certainly be ready to vote on this within moments and conclude this amendment before lunch.

Mr. President, there are a couple of things I have not said about the amendment that I wanted to mention as well. First, it saves $581 million, a most significant point. It may well be we are going to have to come to this, as the distinguished chairman said; we are going to have to come to this as a result of the budget reconciliation process at some later date. Perhaps in the conference when we get together with the House. But it saves a very significant amount of money.

Second, the administration supports this amendment and supports the move toward a more market-oriented farm bill.

I agree with my friend from Indiana, and also with the distinguished chairman, the senior Senator from Vermont, when they say the committee worked hard in order to bring the bill forward that is now before the Senate.

The committee worked day and night. The staff worked more nights than did the Senators, but we, indeed, put in some very long hours, had internal conferences, and this bill, like every other bill that comes before the Senate, is a compromise. I recognize that. The distinguished chairman also knows that not only is the Senator's right but a Senator's duty to come to the floor and seek to improve a bill as he sees it. That is, indeed, what I am seeking to do.

I understand that some feel they must abide by the compromise and seek to do good work later on in conference or be compelled to do it later on due to the stringencies of the budget.

But it is important, also, Mr. President, that this amendment be brought to the floor. Most of our colleagues are not terribly well-informed about the very arcane nature of agricultural programs. It has a vocabulary all of its own. It has concepts that befuddle the reasonable mind very often. It has programs that are extraordinarily complex, as are most programs of Government.

One of the ways of clarifying them and making them less complex and one of the ways of achieving that is through the efforts of greater market orientation.

Also, if we are to move to a freer and fairer world trade, a greater market orientation is demanded in the farm bill of 1990. I heard my friend, the Senator from New Jersey, speak this morning about the Europeans, as I have spoken about the European Community and its Common Agricultural Policy.

This chart shows the changes that have occurred in the European Community. In the middle seventies, it was the largest importer of grain. In 1977-78, it was an importer of almost 20 million metric tons of grain, which would be approximately 700 million bushels. Now it is a net exporter of more than 700 million bushels of grain. It subsidizes those exports to the tune of many, many billions of dollars.

If we are going to return to a greater fairness in world trade, we need a greater market orientation in the 1990 farm bill. Agriculture in world trade is not like industrial goods. Industrial goods flow quite freely in international trade. Agriculture is protected in every conceivable way. It is subsidized in ways that boggle the mind, whether it is through direct subsidies, whether it is through subsidies of transportation, whether it is through some type of sanitary subsidy or restraint. The number of ways of affecting agricultural trade are endless.

The way that we are going to stop the European Community in the long run from upsetting world markets is by having a more market-oriented approach in the United States. By having a more market-oriented approach in the United States, we raise the cost of the European Community's subsidies. They are now at approximately $55 billion a year, not counting the extra costs that are imposed upon the consumers. We have put great pressure upon the Europeans. We need to continue to put great pressure on the Europeans if we are to open up world trade.

Opening up world trade is beneficial not only to American farmers, but to farmers of the Third and Fourth World countries. Where does this 20 million tons of grain go? It goes to the Third and Fourth World countries, to the Egypts, to the Nigerias, to the countries of the world where farmers are very fragile; where farmers do not have any government support; where, interestingly enough, even though farmers are the majority of the population, it is the people in the cities where revolutions are made; where the people in the cities are subsidized with low costs of bread and low costs of farm products.

Those farmers who are just hanging on in the Third and Fourth World countries suddenly find their markets invaded by subsidized commodities either from the United States and, to a much greater degree, from Europe. So we drive down agricultural prices in those countries with our subsidies and bring ruination to farmers in the Third and Fourth World who really are hanging on by their fingernails.

That is part of the overriding purpose of my approach to the 1990 farm bill: to make it more market-oriented, to put greater pressure on the Europeans, to continue the launch away from this vast array of complicated subsidies that are part of world agriculture of the developed world, but not of the undeveloped world or the underdeveloped portions of the world. That is really the case for market orientation in agriculture.

So this amendment would continue the 1985 farm bill. It would continue the 1985 farm bill in a way that will, indeed, not only benefit American agriculture and benefit agricultural trade, but will meet the great approval of the American farmers.

As I said in my earlier remarks, if you ask farmers what they want in the 1990 farm bill, they say, why not just continue the 1985 farm bill, because it has been successful. It has not been the only element in agriculture that has brought success in the agricultural sphere, but it has been an important element in agriculture in bringing about the success of the most recent years.

This amendment would continue the most basic element of the 1985 farm bill, market orientation in loan rates, a competitive orientation in loan rates. That is why I am offering it today, even though I recognize that this bill, as it comes to the floor, is a compromise that reflects a great deal of hard work by the chairman of the committee, whom I much admire and who, I think, has done a terrific job in bringing the bill in this form to the floor.

I say the same for my friend, the senior Senator from Indiana, as well. They have worked hard. There is no question about that. But compromises are a way of bringing legislation to the floor. Because they have worked hard, because it is a compromise, as is every bill that comes to this floor, does not mean that out of hand we must accept that bill and vote against every amendment.

Mr. President, I urge the adoption of this amendment and I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Do all Senators yield back their time?

Mr. BOSCHWITZ. I am prepared to yield back my time.

Mr. LEAHY. I yield back the remainder of my time.

The PRESIDING OFFICER. All time is yielded back. The question is on agreeing to amendment No. 2336 of the Senator from Minnesota. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Utah [Mr. GARN] and the Senator from Pennsylvania [Mr. SPECTER] are necessarily absent.

I further announce that the Senator from South Dakota [Mr. PRESSLER] is absent due to a death in the family.

The result was announced—yeas 32, nays 65, as follows:

[Rollcall Vote No. 167 Leg.]

YEAS—32

Armstrong	Gorton	Murkowski
Bond	Gramm	Nickles
Boschwitz	Hatch	Roth
Bradley	Heinz	Rudman
Chafee	Helms	Simpson
Cohen	Humphrey	Stevens
D'Amato	Kasten	Symms
Danforth	Lautenberg	Wallop
Dole	Mack	Warner
Domenici	McCain	Wilson
Durenberger	McClure	

NAYS—65

Adams	Ford	Lugar
Akaka	Fowler	McConnell
Baucus	Glenn	Metzenbaum
Bentsen	Gore	Mikulski
Biden	Graham	Mitchell
Bingaman	Grassley	Moynihan
Boren	Harkin	Nunn
Breaux	Hatfield	Packwood
Bryan	Heflin	Pell
Bumpers	Hollings	Pryor
Burdick	Inouye	Reid
Burns	Jeffords	Riegle
Byrd	Johnston	Robb
Coats	Kassebaum	Rockefeller
Cochran	Kennedy	Sanford
Conrad	Kerrey	Sarbanes
Cranston	Kerry	Sasser
Daschle	Kohl	Shelby
DeConcini	Leahy	Simon
Dixon	Levin	Thurmond
Dodd	Lieberman	Wirth
Exon	Lott	

NOT VOTING—3

Garn	Pressler	Specter

So the amendment (No. 2336) was rejected.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MITCHELL. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate is not in order. The Senate will be in order.

UNANIMOUS-CONSENT AGREEMENT

Mr. MITCHELL. Mr. President, I will momentarily make a unanimous-consent request for the Senate to proceed to consideration of the resolution concerning the ethics investigation of Senator DURENBERGER. I have over the past several days discussed the scheduling of the matter with the distinguished Republican leader, with the chairman of the Ethics Committee and the vice chairman of the Ethics Committee, Senators HEFLIN and RUDMAN, as well as with Senator DURENBERGER himself. The committee report and several of the volumes of the hearings were filed in the Senate and available for all Senators as of 3:20 p.m. on yesterday afternoon. Although the 48-hour rule is not in effect in this instance, were it to be in effect, the Senate would then, absent unanimous consent to the contrary, be in a position to take the matter up at 3:20 p.m. on tomorrow, Wednesday, July 25.

I encourage all Senators to review the report and so much of the hearings as they deem appropriate and I believe that in light of the committee's resolution and the interest of the Senate in a prompt and fair disposition of this matter that we should proceed to consideration of the resolution on tomorrow.

As I indicated, I have made my decision following consultation with Senator DOLE, Senator HEFLIN, Senator RUDMAN, and Senator DURENBERGER. I ask and encourage each Member of the Senate to be present during consideration of the resolution. This is a very important matter for Senator DURENBERGER himself, for the Ethics Committee, for the ethics process, and for the Senate as an institution. In order to discharge his or her duties in a fair and responsible way, I think it important and appropriate that each Senator be present to hear the presentation by the chairman and vice chairman of the Ethics Committee and, of equal if not greater importance, to hear directly and in person from Senator DURENBERGER himself, should he choose to address the Senate during the consideration of the resolution.

Accordingly, Mr. President, I now ask unanimous consent that at 3:30 p.m. on Wednesday, July 25, the pending business be temporarily laid aside and the Senate proceed to the consideration of Calendar No. 705, Senate Resolution 311, a resolution concerning the Select Committee on Ethics investigation of Senator DAVID F. DURENBERGER.

The PRESIDING OFFICER. Is there objection?

Mr. DOLE. Mr. President, reserving the right to object, and I will not object, I want to underscore what the majority leader has stated and indicate that we have cleared this request with the Senator from Minnesota [Mr. DURENBERGER]. It is a very important matter. I thank the majority leader for his expeditious procedure to get it to us at the earliest possible time, give us time to take a look at the reports. It is a very important matter. I have no objection to the request.

Is there objection? Hearing none, it is so ordered.

MORNING BUSINESS

Mr. MITCHELL. Mr. President, I now ask unanimous consent that there now be a period for morning business and that Senator JEFFORDS be recognized to address the Senate; that following the completion of his remarks, Senator AKAKA be recognized to address the Senate; and that upon the completion of Senator AKAKA's remarks the Senate stand in recess as under the previous order to accommodate the party conferences until the hour of 2:15 p.m.

The PRESIDING OFFICER (Mr. LEAHY). Is there objection? Hearing none, it is so ordered.

The Senator from Vermont [Mr. JEFFORDS] is recognized.

A REVIEW OF FEDERAL DAIRY POLICY

Mr. JEFFORDS. Mr. President, I am asking for this time to discuss the farm bill and in particular the dairy provisions of the farm bill. I think the most remarkable thing with respect to the farm bill this time is the fact that the dairy title is not the center of attention. When I was in the House for some 14 years, the dairy program in the farm bills during that period of time was always the number one controversial area. Everyone, including the media focused on the problems of the dairy program.

The debate on the 1990 farm bill offers us a good opportunity to review the effectiveness of Federal farm programs. Therefore, I would like to take this opportunity to briefly discuss the effects of our Federal Dairy Program on farmer income, milk prices and supplies and on the ongoing problem of surpluses.

As most of my colleagues know, during my tenure in Congress I have been deeply involved and concerned with the shaping of dairy policy. Not only does it represent a major economic contributor in my State of Vermont, it is also one of the largest and most productive sectors of our agricultural economy, with annual cash receipts totaling $18 billion.

When I first entered Congress in 1975, the dairy industry was beset with low farm prices and incomes and high costs for feed and other production inputs. In an effort to stabilize prices, and to avoid the roller coaster effect of low prices and high levels of surpluses followed by tight supplies and higher prices, Congress instituted a system of providing semiannual adjustments to the support prices as part of the 1977 farm bill.

Although this worked reasonably well in stabilizing farm prices and farm incomes, it led to increased levels of milk production over the next 2 or 3 years.

By 1981, dairy cow numbers had substantially increased, causing higher production levels and a buildup of dairy surplus stocks. In an effort to

deal with this problem, the 1981 farm bill instituted a set of triggers relating the minimum support level to the size of the CCC purchases. This was a major departure from traditional price support policy under which price changes were tied directly to parity. In addition it used an assessment to cut cost, but at the same time gave hope for a big price bonus.

Although I was not a member of the 1981 farm bill conference committee that instituted these changes in calculating the support price, there was a fundamental problem in establishing a program that only called for price cuts based upon levels of CCC purchases. It did not deal with the basic problem that was facing the dairy industry—cow numbers—too many cows.

Following this change in the 1981 farm bill, further legislation was enacted in 1982 which froze support price for 2 years, and provided for assessments of producers totaling $1 per hundredweight to help offset rising Government costs for CCC purchases. However, history has clearly shown that milk production levels do not respond well or quickly to price cuts, and during the period of 1981-83, cow numbers actually increased from 11.1 to 11.5 million head, although surplusses and program costs went down. But the program was successful; its period of operation was too short to have any lasting effect. The short period had to be agreed to to get any supply management program.

By 1983, dairy surplus purchases increased from about $247 million in fiscal year 1979, to a high of $2.7 billion. In response to these increased costs, Congress initiated the Milk Diversion Program, which paid farmers to reduce milk production for a 15-month period. An assessment on producers was utilized to help offset the cost of the program. This largely remedial measure did result in a reduction in cow numbers and milk production levels, however, the effect was only temporary. It did show that the combination of supply management and price cuts could be successful.

It was not until the 1985 farm bill that Congress established a program which effectively dealt with the problem. The program included two important features that would not only significantly reduce milk production levels, but substantially reduce Government costs and at the same time improve farm incomes as well.

The 1985 farm bill authorized the Dairy Termination Program which allowed dairy farmers to sell their entire herds and to keep their dairy facilities out of use for a period of 5 years. At the same time, Congress authorized price re-reductions in the support program to also help lower incentives for milk production.

In order to help pay for the Dairy Termination Program, Congress authorized assessments on producers as well. This combination of price cuts, coupled with major reductions in cow numbers, was one of the most effective farm programs ever enacted.

The theory behind the whole herd buyout was to "cull cows not farmers." It provided a smooth transition for those who wanted to retire or change their farming operations while at the same time avoiding the more volatile and savage approach of pure price cuts.

First of all, let us take a look at what happened. In July 1989, the U.S. General Accounting Office issued a report on the Dairy Termination Program which examined its overall impact and cost-effectiveness. Among the key findings of the GAO report were the following:

The DTP reduced milk production by 39.4 billion pounds during the period of 1986-90. It had its greatest impact in 1987, when it reduced production by 11 billion pounds, a decrease of more than 8 percent of our national production.

The DTP reduced Federal purchases of dairy surpluses by 38.1 billion pounds during the same period.

The program accepted bids from 14,000 producers, resulting in a reduction of 1.62 million head of dairy cattle.

Most significantly, the DTP resulted in a net savings to the government of $2.4 billion.

Assessments to dairy farmers of $667 million helped to pay 38 percent of the cost of the entire program.

GAO determined from this information that the DTP was a cost-effective program.

Let us examine this in graphic form. These are not my charts. They are not some we are using to give the best light to the program. This is a GAO chart. This indicates and demonstrates forcefully what the impact is. The top bars are what would have happened if we had not had the Dairy Termination Program. What did happen is shown by these shaded bars on the chart. It is much, much smaller, as you can see. So the surpluses we would have had without the Dairy Termination Program would have been huge, and we would be swimming in butter, cheese, and milk. However, it worked so well that we got production way down. As a result, it stayed down, in combination with price cuts which went along with it. We had brought the program under control.

Equally as important as the reduction in cow numbers, lowered milk production, and decreased government costs was the increase in farm income of $6.6 billion made possible by enhancing the price received for milk.

Therefore, a supply management program such as the DTP would be far more effective than straight price cuts in addressing overproduction problems in the future. However, I would recommend the following modifications be considered for any future buyout programs,

First, future buyouts should be structured to remove herds only in those areas that are overproducing.

Second, consideration should be given to a buyout under which the USDA would set a bid price to prevent the unfairness created by the past program, where accepted bids ranged from $3.50 per hundredweight to $22.50 per hundredweight.

Third, a heifer buyout should be studied as an option for achieving small reductions of up to 1 billion pounds of production.

Fourth, exports of dairy cattle under the Export Enhancement Program, which was established in the 1985 farm bill, should be encouraged in conjunction with any future buyout program. Every effort should be made to advise dairy cattle exporters and cooperators in advance of a buyout so that the export potential can be maximized.

Fifth, beef producers, feed lot operators, and the futures markets should be made aware of provisions in the program that protect the beef industry from buyout beef entering the market.

Sixth, any future buyouts should be phased in over a period of time to protect beef producers.

IMPACT OF DTP ON THE BEEF INDUSTRY

I would like to expand on my previous points five and six regarding the impacts of the DTP on the beef industry. Much has been said about the effects of the DTP on the cattle industry. The 1985 farm bill included strong measures to protect beef producers from downward pressure on beef prices due to the DTP. In fact upward pressures were created. USDA was required to purchase and remove from the market excess beef resulting from the DTP. The program was to be phased in slowly over a period of 18 months. Unfortunately, information about this phase-in did not reach beef producers, feed lot owners, or the futures markets.

The Beef Purchase Program removed 400 million pounds of red meat from the market, which represented all cows removed from production under the DTP. An additional benefit to beef producers resulted from this program since about 65,860 head of cattle were exported, not slaughtered, under the DTP. Due to these exports, USDA bought roughly 16 million pounds of red meat above what was attributable to the DTP. Further, the purchasers included cull cows that would have been on the market even if the DTP had not taken place.

Despite these facts, and despite the steps Congress took to protect the beef industry, beef prices dropped for

a short period in April 1986. Beef producers maintained that the DTP was solely responsible for this price decline and sought compensation from Congress for their losses during this period.

Again, let me show my colleagues—this is not my chart—this is a chart designed by the Department of Agriculture, which indicates what happened to beef prices during this period of time. If my colleagues will take a close look at it, let me point out some things.

First of all, beef was in difficult time. This point right here, this is decade-low beef prices, September 1985. This was 6 months before the Dairy Termination Program. It was at a figure of $49.10 on average for all beef. The utility cows were the only cattle prices affected. You get hamburger meat from the slaughter of dairy cows. The price was lower than that, and it goes up and down with other beef prices.

What happened? During this period of time of the Dairy Termination Program, carefully note, the overall impact during that period of time was a significant, not substantial, rise in beef prices. In fact, in March 1989, the decade-high beef prices occurred.

My colleagues will also notice in this period of time, during the Dairy Termination Program, there is a little falloff here. But also notice during a similar period, during other years, there is that kind of a spring falloff. However, there is a little blip in here. This is a 2-week period which occurred in April 1980.

In addition, a study by the General Accounting Office released in November 1987 concluded that low consumption and weaker than anticipated beef markets combined with unwarranted concerns about the DTP caused an overreaction in the futures markets that drove the beef prices down. It also concluded that better communication between USDA and the Commodity Futures Trading Commission could have helped reduce market disruption. Another study by the Congressional Research Service (86-160 ENR) came to many of the same conclusions. Some Members of Congress also observed that the beef industry should have better informed the markets about their provisions to protect their beef industry, particularly since industry representatives helped draft these portions of the legislation.

It should also be noted that beef prices were lower in 1985, before the DTP, than at any time during or after the DTP. The present outlook for the beef industry remains very favorable and prices have never been higher. The DTP deserves some of the credit for the improved prices for beef. Some 1.6 million dairy cattle that would have otherwise been competing in beef markets during the life of the 1985 farm bill were removed.

In addition to these benefits a beef promotion program was also initiated the year of the DTP's commencement to help increase sales of red meat.

Despite all of these safeguards, the beef industry has steadfastly maintained that the DTP was largely responsible for the downturn in beef prices following the announcement of the program on March 28, 1986. However, the evidence does not substantiate that claim. Dairy beef competes most directly with utility grade beef. During the period of following the announcement of the DTP on March 28, the price for utility cows dropped from $37.50 per hundredweight on March 27, to a low of $32.25 per hundredweight on April 9. However, by April 17, the price for utility cows was back up to $37.25, and to the March 27 level of $37.50 by April 24. Given the number of utility cows slaughtered during that short time period, and fully charging all reductions in prices to the DTP, the actual cash loss is approximately $15.4 million, as opposed to the $5 billion loss claimed by the beef industry.

It appears that these larger losses were incurred by futures traders who believed the beef market would be depressed. When that did not happen some of these futures traders were caught short. These losses were on the commodities markets caused by misinformation or lack of information not the true program design. It is important that the true story of what actually happened as the result of the dairy herd buyout be discussed fully and that the facts be presented for everyone to judge. To prevent consideration of a most successful program because of a failure of USDA to provide sufficient information to beef producers and the futures markets is not a good reason to not utilize this program again. It foregoes an opportunity to save billions of dollars in the future.

FUTURE DAIRY PROGRAMS

I would now like to turn my attention to the future. Our experience in past policies and programs should enable us to identify what will work and what will not work. We know, for example that price cuts by themselves are not effective in reducing milk production unless they are used in combination with other approaches such as the Dairy Termination Program. In addition there are a number of other important considerations regarding the 1990 farm bill. They include: Changing incentives to discourage greater production of butterfat; encouraging greater protein production in milk in recognition of the tremendous consumer response to cheese and other protein based milk products; ensuring that the dairy program operates at a budget level of at least $725 million, and that funds not used in CCC purchases be made available for the School Lunch Program, TEFAP and other nutrition programs; and ensuring that prices for butter do not drop so rapidly as to cause increases in other dairy products such as nonfat powder which could result in substitution by casein and other lower quality protein products.

We also have on the horizon BST, hovine somatotropin. If that is approved, and it is on the verge of being approved, it could result in increased dairy production of 15 to 20 to 30 percent per cow per year. If that occurred and should be generally used we are going to have a huge surge in supply. What can we do about it? We are going to be very limited without the ability to have something like the Dairy Termination Program.

Second, we have other innovations—the ability to separate male and female sperms, so instead of getting 50 percent bulls and 50 percent heifers you can get all heifere, which again could create an upsurge, reduce prices perhaps, reduce costs to consumers, but create a real surplus problem.

Another matter that is of concern to me is that we have to be careful that we do not let the program be totally driven by deficit considerations. We must work on that aspect as well.

Overall, the dairy industry is in pretty good shape. My main concern is that on the supply management side we are going to be so limited in the ability to be able to stop surges in supply that we run into problems in the future. Right now things look great. The price is up. We do not have a surplus except in butter. Things are working well.

So I just want to let the body know that I intend to offer some amendment. Obviously, it is very controversial when you get to the Dairy Termination Program, but I think it is important we get the facts out because the facts are on the side of the dairy farmers and we should not be precluded from being able to handle, as we have successfully in the last 5 years, problems of the future.

Two tier pricing is another thing that is not precluded by the bill. We ought to talk a little bit about that. And also some other aspects. But primarily right now the dairy industry is in good shape. It has done an excellent job in handling its own problems, and all we ask is that we not be precluded from using succeessful programs of the past.

Mr. President, I thank the chair for the time to be able to bring these matters to the attention of the body, and I look forward to further action on the floor. I yield the floor.

The PRESIDING OFFICER. Under the previous order, the Senator from Hawaii [Mr. AKAKA], is recognized.

(By unanimous consent, the remarks of Mr. AKAKA appear in the debate on amendment No. 2314.)

RECESS UNTIL 2:15 P.M.

The PRESIDING OFFICER. Under the previous order, the Senate stands in recess until the hour of 2:15 p.m.

Thereupon, the Senate, at 1:25 p.m., recessed until 2:15 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer [Mr. SANFORD].

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. KERREY. Mr. President, I ask unanimous consent that I be allowed to speak as if in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KERREY. I thank the Chair.

CAMBODIA

Mr. KERREY. Mr. President, I rise today to discuss a number of things in relation to Cambodia once more. There are a number of things coming together that at least are of interest to me, and I in particular direct my comments to my colleagues who are concerned about the issue, as well as to the administration that just made a significant change of policy toward the Cambodians.

First of all, today there is a delegation of six that arrived from the United States in Phnom Penh to have discussions with the Cambodian Government about American remains of those missing in action. This will provoke most certainly an emotional response in people like myself and others who will get a bit upset and wonder why this was not done earlier. We are not altogether pleased about withholding of this kind of information.

In addition, there was an article in the New York Times this morning that was written by Steven Erlanger, who described the ASEAN nations' irritation. The foreign ministers were upset with the change in position of the United States. They believe in fact what it would do is encourage the Khmer Rouge militarily that the United States was meaning to vacate the seat at the United Nations and that they were of the opinion that what this would do would be precisely the opposite of what the administration hoped would occur.

Third, Secretary of State Baker will be in Indonesia on Friday as a follow-up to this meeting of the foreign ministers to discuss the Cambodian policy, among other things. I urge the administration to stay the course in particular on their policy to vacate at the United Nations and to try, as a consequence of that vacation, to isolate the Khmer Rouge diplomatic community.

I urge the administration to go further, in fact, and be even more bold than they have and to say directly to the Chinese that we want you to discontinue your supplying the Khmer Rouge. We are going, in fact, the next step. As a part of our policy, we should be saying to the Communists: We are going to lift the Trading with the Enemy Act restrictions. We are going to exchange some representation between ourselves and the Government of Cambodia without recognizing in fact the Government of Cambodia. Our object in fact is to have an independent nation that is independent of Vietnam and all its neighbors, and free and independent.

If we make that move, it will enable us to feel comfortable when we see the pictures that were in the New York Times on Sunday. I urge my colleagues to look at those pictures. You wonder as to whether or not we can go to another permanent five meeting and wonder whether or not we ought to figure this thing out.

The fact of the matter is children are dying on the border of Cambodia and Thailand. Mines have been placed by the Chinese, by the Hun Sen government, and God knows who else, has placed mines upon this border. It is a human tragedy going on day in and day out. And it is possible for the United States of America to contribute to the end of that tragedy if we rise, as I hear in the words of Secretary Baker, that he is about ready to do, and not be concerned about those of us who are going to be angry at the Cambodian Government withholding these remains, not be concerned about the ASEAN nations not particularly liking this particular change in policy. We need to advance further.

I urge the administration to consider exchanging some diplomatic representations so we can know what is going on there; to go further than that and lift the Trading with the Enemy Act restrictions so we begin to influence the policy in that particular region of the world and continue, I think, the course that the administration at least appears to be heading on today.

I yield the floor.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KERRY. Mr. President, I ask unanimous consent I be permitted to speak as if in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

CAMBODIA

Mr. KERRY. Mr. President, first of all, I want to join my colleague, the Senator from Nebraska, in his comments. He has helped significantly to draw attention to the issue of Cambodia and the remaining issues to resolve in Vietnam over the course of these recent months.

I also want to underscore the importance of this moment for the administration. I wish the administration had announced the other day that they were planning to talk to Hun Sen. My hope is that, having been so willing to talk with the Chinese 1 month after Tiananmen Square and with countless others in the world with whom we disagree, they would avail themselves of this opportunity.

ROSE FITZGERALD KENNEDY

Mr. KERRY. Mr. President, on Sunday, July 22, a very special American—and proudly, a very special daughter of Massachusetts—celebrated her 100th birthday.

Rose Fitzgerald Kennedy, as we all know, is mother of a beloved President of the United States, two inspirational U.S. Senators, 9 remarkable children, 29 grandchildren, and 22 great grandchildren.

Her 100 years have been nothing less than extraordinary—moments of triumph and tragedy, learning and teaching, giving and receiving—an unfaltering commitment to family—to children—to standards and values—and through it all a faith in God which has held her steady in times of darkness and grateful in times of blessing—of which there were many.

Her 100 years seem to have always been public because she was born into a life of public service and public concern. And what a service and expression of concern it has been.

Her father, the famous John Francis "Honey Fitz" Fitzgerald, was Mayor of Boston, and one of Massachusetts' leading politicians. When she was a young girl, Rose Kennedy participated enthusiastically in her father's career and simultaneously managed to carve out her own niche as the Belle of Boston, a young woman full of energy and purpose.

While her father's achievements at that time made her life comfortable, her roots always kept her close to her family's humble beginnings and she never stopped working for working people. The dignity of the individual was at the core of her upbringing and so it was to be with each of her own children. As the daughter of the Mayor she started early in life to work to "improve the lot of others"—a phrase we have come to know well—and to guarantee that her children would learn and live that credo as well.

It is one thing for any of us to merely contemplate the loss of one of our own children. It is surely hard to imagine the pain and struggle for survival after such a loss. Rose Kennedy guided and inspired her family, her friends and her followers through such a loss—not once, but four times—Kathleen killed in an airplane accident; Joseph heroically fighting for country; Jack and Bobby to the bullets of crazed assassins—all representing

more talent lost and pain inflicted than we would have thought anyone could endure.

Rose Kennedy set an example to the Nation about sacrifice and hope and faith. But more than the losses she helped us endure there were the gifts she helped us enjoy. In President and Senators, in all her family she has inspired a credo which reflected her respect for life and her compassion for people less fortunate.

To be sure there have been in these 100 years the recognizable public accomplishments: the creation after World War II of a foundation which to this day is dedicated to improving the lives of children with particular focus on the needs of the mentally retarded. Her commitment of an enormous amount of personal energy to the work of the Foundation, becoming a leading spokeswoman for child health care and for the mentally handicapped; the fact that she raised 3 sons who became Senators—all of whom contested for the Presidency and one who won it; the fact that her children and family have affected so many lives in so many ways. These are extraordinary achievements by themselves.

But perhaps the greatest measure of her 100 years is the vision and sense of family she has shared with everyone. With her special passion and commitment for her family so publicly played out she has helped pass on one of the greatest of our traditions which is at the center of American life.

As Rose Kennedy approached her 90th birthday, she revealed the lesson which she most hoped to impart to her family, "I hope that when they contemplate the past, they will understand that they also inherited a duty to that nation which sheltered and nourished their ancestors. For I believe as I was taught, that when great blessings are received, large obligations are owed." Rose Kennedy has been a blessing to the Nation and we do indeed have an obligation to her and great gratitude for what she has accomplished. I know my colleagues join in wishing this past week, an extremely happy birthday on her 100th birthday to Rose Fitzgerald Kennedy.

Mr. LEAHY. What is the parliamentary situation?

The PRESIDING OFFICER. Right now, under the previous agreement, the Senator from Rhode Island is to be recognized for an amendment, with 90 minutes equally divided.

Mr. LEAHY. I ask unanimous consent that I be allowed to proceed as in morning business for 1 minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

CAMBODIA

Mr. LEAHY. Mr. President, the distinguished Senator from Nebraska [Mr. KERREY], had some very cogent comments on Cambodia earlier. I recommend that all Senators listen carefully to what he had to say. I certainly intend to give strong consideration to the comments of Senator KERREY and the views of Senator MITCHELL on Thursday when the foreign aid bill comes before the Appropriations Subcommittee on Foreign Operations. I do not know exactly what position I will take at that time. But I find the argument which Senator KERREY, of Nebraska, and Senator MITCHELL made to be very, very compelling, indeed.

FOOD, AGRICULTURE, CONSERVATION AND TRADE ACT OF 1990

The Senate continued with the consideration of the bill.

AMENDMENT NO 2337

(Purpose: To modify the honey price support subtitle)

Mr. CHAFEE. Mr. President, on behalf of myself and the Senator from Massachusetts, Mr. KERRY, and Senator PELL, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Rhode Island [Mr. CHAFEE], for himself, Mr. KERRY, Mr. PELL, Mr. LAUTENBERG, and Mr. BRADLEY, proposes an amendment numbered 2337.

Mr. CHAFEE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Beginning on page 350, strike line 1 and all that follows through page 352, line 6, and insert the following new subtitle:

Subtitle C—Honey

SEC. 1041. HONEY PRICE SUPPORT.

Title II of the Agricultural Act of 1949 (7 U.S.C. 1446 et seq.) (as amended by section 1017 of this Act) is further amended—

(1) in section 201 (7 U.S.C. 1446), by striking subsection (b); and

(2) by adding at the end the following new section:

"SEC. 208. HONEY PRICE SUPPORT.

"(a) 1991 THROUGH 1994 CROPS.—For each of the 1991 through 1994 crops of honey, the price of honey shall be supported through loans, purchases, or other operations at such level as is determined to be appropriate by the Secretary.

"(b) 1995 AND SUBSEQUENT CROPS.—Beginning with the 1995 crop of honey, the price of honey shall not be supported through loans, purchases, or any other operations.".

SEC. 1042. RESEARCH ON HONEYBEE DISEASES.

(a) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) diseases affecting the entire honeybee population impact on the ability of honeybees to carry out crop pollination and honey production, and therefore impact negatively on beekeepers, producers and consumers; and

(2) certain diseases (such as those caused by tracheal mite, varroa mite, and the Africanized honeybee) pose a threat to the continued well-being of the general honeybee population, and thus merit further study.

(b) RESEARCH.—Notwithstanding any other provision of law, the Secretary of Agriculture shall give priority attention to the funding of research regarding the diseases referred to in subsection (a) that are affecting the honeybee population.

Mr. CHAFEE. Mr. President, today I am offering the Senate an unusual opportunity to restate its views on an expensive program which is in our current farm program; namely, the U.S. Honey Price Support Program. The Senate voted to end this in 1985, but that amendment, which was adopted by the Senate, was dropped in conference. There were some slight changes made in the program, but basically the program is back with us again.

Mr. President, what my amendment does is to phaseout over 4 years the Federal Honey Price Support Program. This is a good amendment, and I urge its adoption.

Mr. President, why do we have a honey program? Let me go back just a minute if I might. The honey program grew out of the difficulties, if you can believe it, of World War II. All this took place nearly 50 years ago.

During the war, sugar was rationed and honey became a highly sought after sugar substitute. Furthermore, the beeswax produced by honey bees was important to use to waterproof ammunition and military equipment. So honey was, therefore, in high demand in the early 1940's, during the war. And honey bee colonies and domestic honey production grew by leaps and bounds. In fact, honey was characterized, if you can believe it, as war essential.

However, that is no longer true for a variety of reasons. Since then, substitutes have been developed for beeswax that are more economical and much easier to produce. So the beeswax as war essential argument is gone.

America returned to peacetime in 1945 and 1946, and honey prices dropped dramatically. So what should happen but the honey-producing industry turned to Congress for help. The result was the establishment of a Honey Price Support Program in the Agricultural Act of 1949.

The overall purpose of the act was to provide economic stability in several agricultural crops. It is important to remember what the purpose of the Honey Price Support Program was. It was to ensure an adequate supply of honey bees for the purpose of pollinating many fruits, seed, nut, and vegetable crops. That was the rationale.

How did the original program work? Support for honey was accomplished through the nonrecourse loans to the honey producers. Through the U.S. Department of Agriculture, Agricul-

ture Stabilization and Conservation Service, the ASCS, loans were provided at any one of 2,800 ASCS offices on the basis of the honey that was produced domestically.

This is the way the program worked. Participants were allowed to borrow an amount at the specified loan rate up to 90 percent of the honey pledged as collateral. The Secretary of Agriculture was directed to set the loan rate at between 60 and 90 percent of parity. Parity, as my colleagues know, is a measure of the purchasing power of commodities today compared to the purchasing power in the early 1900's. The loan rates differed slightly depending upon the quality of the honey but the average had to equal the specified support price.

All that is a mass of words, of complexity. This the way it worked. Honey was put up as collateral to the Commodity Credit Corporation. There it was put into storage. The honey producer then waited to see when the market would be good for selling the honey. If the market never looked good enough to enable the borrower to repay the loan, the borrower simply forfeited the honey to the CCC [Commodity Credit Corporation], and the loan was considered repaid. This is the way the system worked. They put up the honey as collateral for a loan. They could take it out again if the price of honey rose. But the price was set so high by the Commodity Credit Corporation that there was no point in redeeming it.

In other words, as we can see in this chart, this shows by millions of pounds how the Commodity Credit Corporation was storing up this honey, which was turned in to it.

We had 6 million pounds in 1980. Then it jumped to 35 million pounds. Then it jumped in 1982 to 74 million pounds. This is really a pretty good deal for the honey producers. Then in 1983 it went up to 106 million pounds; in 1984, 105 million pounds—over 100 million pounds. This stuff was pouring out of the CCC storage area.

We see in 1985 forfeitures then began to drop, and I will explain how that worked. Do not think this was salvation. Yes, it dropped but the cost to the Government, on the other hand, in dollar output, increased.

I will review this briefly. At the start of the 1980's, as I said, support prices rose above both the domestic and the world honey prices and honey began to be forfeited to the Commodity Credit Corporation for the first time in a decade. It started with a very modest amount, 6 million pounds. The next year it went up sixfold, to 35 million. Then it doubled to 74 million. All this occurred in the early 1980's.

By 1984, as I pointed out on the chart here, the annual CCC stock of honey had reached an alarming 105.8 million pounds, a phenomenal increase since 1980. This represented 98 percent of all honey under loan.

People would take it, get a loan, get a nice, handsome loan, see the honey price was not anywhere near that and leave it.

Mr. LEAHY. Mr. President? Will the Senator yield for an unanimous-consent request?

Mr. CHAFEE. Oh, yes.

Mr. LEAHY. Mr. President, I ask unanimous consent the time in opposition to the amendment be controlled by the Senator from South Dakota [Mr. DASCHLE].

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHAFEE. Mr. President, I wonder if the Chair would be good enough to let me know when I have used 20 minutes of my time.

The dollar amount is in this chart here, which is the second chart. We see how the total outlays in dollars, net Government expenditures, began to go up. In 1980 it was a little less than $9 million, then up it went to $48 million in 1983—$90 million in 1984.

This is an ironic twist, when we get into the Government dealing in these agricultural products. There is an ironic twist here. So much honey was being forfeited to the CCC, as I pointed out here, this is practically all the honey being produced in the United States by any substantial producers. It was all going to the Government.

So what happened? Imports started flowing into the country. There was a dramatic increase. In 1980 when they first started selling to the Community Credit Corporation, the price was right. So what happened? In come the imports to take the place of all the honey that was going into storage. We can see it reached its peak in 1985 when some changes were made in the program, which I will briefly discuss.

This predicament called for corrective action. That was the year that then-Senator QUAYLE had his amendment which would abandon price supports over a 3-year period. But that was not adopted. It was adopted here, but it was jettisoned in conference by our conferees.

So then the Government, through its own people, said we will try to fix this. What they did was to lower the support of prices by 5 percent a year for the 1986 to 1990 crop. So far so good. But the law that they put through at that time also authorized the Secretary to issue honey marketing loans.

We are going to get bogged down with these agricultural terms. This is a Byzantine area. But all I know is it ends up costing the taxpayers of the United States a ton of money.

The new marketing loan system, which is in effect today, means that the producers can give up their honey as collateral at a certain set loan rate. They turn it in to the Government at a fixed price—let us say 56 cents a pound—and then they can wait and see. This is a heads we win, tails the Government loses, proposal. Heads the producers win, tails the Government loses.

They turn in their honey to the Government at a collateral price at 56 cents a pound, let us say. They wait and see what they can get on the market. Meanwhile it is costing the Government 14 cents a pound just to store and handle the recording—14 cents a pound, to put this into storage.

The producer then waits to see whether to buy back their honey at a lower rate. They do not have to buy it back at 56 cents a pound. They could buy it back at a lower rate and resell it on the market, or forfeit, just leave it there and call it even. Let me illustrate.

You are a honey producer. You store your crop with the CCC, the Commodity Credit Corporation. You receive a loan rate of 56 cents a pound. You then wait to see what the market will be like that year. By the way, it is expensive for you to store the honey, so you have the Government store it.

Well, let us say it is a good year. You cannot get 56 cents a pound from your honey, but it is close.

So you buy back our honey, that is pay off your loan to the CCC, but you do not buy it back at 56 cents a pound; you buy it back at that year's set repayment level, say, 36 cents a pound. And you pay a minimal interest charge. So you sell it for 56 cents or get a loan for 56 cents from the Government; then the price is lower, so you get it back and pay them 36 cents. That is considered a payoff of the loan, and if you can sell it for 38 cents for each year, you keep the money.

How is that for a wonderful arrangement?

With the adoption of this system, the forfeitures to the CCC ended. That is what we see here. In 1985, we see the forfeitures going down. They reached 105 million pounds in 1984 and then they gradually dropped. In 1988, they were down to 13 million pounds. My colleagues might say, "boy, this system is really working." The only trouble is, look over here at what it is costing the Federal Government. This is the net cost. In 1988, even though the Commodity Credit Corporation only has 13 million pounds, the problem has not been solved because the cost to the Government is up to $100 million that particular year.

It is true that imports have slowed dramatically. I show that in my other chart and people say, that is pretty good. And that is nice. But meanwhile, look at the cost. So while we try to fix one thing, we are causing a problem in another area.

39-059 O-91-27 (Pt. 13)

Before 1985, our costs lay tribute to the fact we had to buy millions of pounds of honey. Today our costs lie in the fact we take a loss, about 20 cents a pound, when we redeem the loans with the honey program participants. Let us run over the figures. What is this costing? I am not going to suggest to anybody here that if we end price supports for honey, the Federal deficit is going to be solved. Of course not. But what I do say to my colleagues is a little bit here, a little bit here, and we can reduce Federal expenditures.

In 1988, the Federal Government spent $100 million on this program, as I show. In 1989, they spent $42 million. The costs this year are not going to be $42 million; according to CBO, they are going to bounce up to $68 million. Over the past 5 years, the program has cost $385 million in total.

I know that the distinguished Presiding Officer is interested in education. That was long his hallmark while he was Governor of the great State of North Carolina. He might be interested to know that what we have spent on price supports for honey over the past 5 years would have permitted in each of those years 27,000 children to be enrolled in Head Start. To me that is a pretty good investment. I would rather have 27,000 children in each of the past 5 years enrolled in Head Start than I would be helping a very few honey producers make a lot of money from the Federal Government.

Let us go in to see who we are helping under this program. Nothing particular else touches the hearts of Senators more than helping a family farmer. Some might say, "Well, it may be expensive, but, by golly, we are doing something for the poor family farmer in America. Is that so? Let us look.

The GAO did a report on this whole subject of price supports for honey in 1985, which has subsequently been updated. What did they show? The figures are the same today. They showed that there are 212,000 beekeepers in the United States of America. Those beekeepers fell into three categories: The hobbyists, that is one who owns 1 to 25 colonies of bees. There are 200,000 of those. So that leaves 12,000 who are not hobbyists. Then you have your part-time beekeeper who has 25, perhaps up to 299 colonies. There are 10,000 of these part timers. So there are 200,000 of the hobbyists, and 10,000 of the part timers, so that is 210,000 out of the 212,000. Finally, there are the commercial beekeepers who own 300 or more colonies and they number about 2,000 individuals or farms.

So out of the grand total of 212,000, 99 percent of them do not participate in this program. One percent of all American beekeepers are in the program. So we are not spending $42 million or $100 million to take care of 212,000 beekeepers. We are spending that amount on 2,100 beekeepers. I might note that of that group, 1 percent, in other words, 1 percent of 1 percent, or one-tenth of 1 percent of all the beekeepers in the United States are getting the lion's share of the Federal moneys.

Now we are right down to where the rubber hits the road. This program is helping about 2 dozen beekeepers in the United States of America, one-tenth of 1 percent of all beekeepers. In 1984, five producers—five producers, and I hope those who oppose this amendment are listening—five producers, each received Federal loans ranging from $612,000 to $912,000. In 1987, during our consideration of the emergency supplemental bill, it was pointed out on this floor that 20 beekeepers would be getting $6 million in benefits. That is no family farmer. That is no poor fellow we are trying to help keep body and soul together down at the old 40-acre homestead.

We actually enacted, but unfortunately it was later repealed in the reconciliation bill, that no farmer would get more than $250,000. We put that into law. But that was deleted in the 1987 Reconciliation Act by some sleight of hand which most who were involved with this were not aware of.

There are lobbying groups involved with this subject. There are two of them, and perhaps some our colleagues have been visited by them: The American Honey Producers Association or the American Beekeeping Federation. My colleagues might think, these are representing all the beekeepers in the United States of America. The American Honey Producers Association has a budget of $100,000 and a membership of how many? There are 210,000 beekeepers. How many belong to the American Honey Producers Association out of the 210,000 beekeepers, I ask? The answer is 600. Not 6,000, and not 60,000. Six hundred.

Now let us look at the other organization. I have just referred to the American Honey Producers Association. Now look at the American Beekeeping Federation.

The PRESIDING OFFICER. The Senator is advised that 20 minutes has expired.

Mr. CHAFEE. I appreciate the Chair so informing me. If I can have another notice at the end of 20 minutes, I will appreciate it.

The American beekeepers have a membership of 150,000. How many are members in the American Beekeeping Federation, 1,800. Not 18,000. Out of 212,000 beekeepers in the United States of America, the two groups have a total membership of 2,400.

What is the interest of these groups? Representing the interest of beekeepers before legislative bodies. In 1988, there was a Congressional Quarterly article about these two groups entitled "Spirited Lobbying." These spirited lobbyists certainly get all over this Hill.

I would like to get back to a point that is clearly going to be raised here, and that is, pollination. The opponents to this bill are going to say if this legislation passes, there will not be any more bee colonies in the United States and we will not be able to pollinate through bees those fruits and seeds and vegetables where pollination through bees is important.

The answer to that is nonsense. It just is not so. In 1985, the GAO released a comprehensive report. As I say, here it is. Here is the report of the GAO that studied this whole subject in detail, and nothing substantial has changed since then. This is what the GAO said: "Since the program was started in 1950, the bee population has shifted to States where honey is produced, yet where there is less need for pollination."

The GAO then went on to say beekeepers are migrating to Midwestern States to take advantage of abundant floral sources from which they can produce honey.

They are not migrating to where the pollination of crops is required. Many of the States that lost honeybees are actually States that need pollination services. So what have they done? They rent bees for pollination. There is an industry set up to take care of pollination. These producers are strictly involved with producing honey and taking advantage of a very sweet Federal program.

Almost 90 percent of U.S. honey production is placed under loan with the Government. Think of that, 90 percent of the production in the United States is going into these programs where they can get loans, get it stored, get it back if they want it, leave it there. Either way they are winners.

So, Mr. Pesident, we have disposed of the various arguments. We have disposed of the pollination argument. We have disposed of the fact that there will not be any bees because the honey producers will go broke because of this program. They will not go broke. They can compete in the world. And they ought to. There is no need for the U.S. taxpayers to be putting up $100 million to support this program.

In conclusion, Mr. President, I would like to read from an update of the GAO report which comments on this very legislation, the 1990 farm bill. This is what the GAO says on the update to their 1985 report:

> The honey price support program should be phased out by accelerating reductions in the price support program and legislatively mandating a termination date.

Just what my legislation does.

Background: The U.S. honey program is designed to stabilize prices and maintain sufficient bee populations for pollinating food and fiber crops. Since 1952, the U.S. Department of Agriculture has used nonrecourse loans to support honey prices at between 60 and 75 percent of parity. The program supports relatively few producers. Presently 2,000 commercial beekeepers, those who own 300 or more colonies, produce 60 percent of the annual average of 200 million pounds of honey.

Analysis. The honey program is no longer needed to ensure crop pollination because producers of crops requiring pollination have ready access to bees through rental or ownership.

In addition, since the program began, beekeepers have generally emphasized honey production over crop pollination. The principal purpose of the honey program now is to support beekeepers' income, according to the U.S. Department of Agriculture. Program costs remain high because high support prices induced increased production. After initially declining through 1987, Government costs increased to about $100 million in 1988, largely because of the largest honey crop in 5 years. Honey production will probably remain at a relatively high level because the price support program still provides a very strong incentive.

Suggestions for congressional consideration from the GAO: Nothing has changed since our earlier report of 1985 to cause us to reconsider our recommendation. The program still serves little public purpose but to raise the income of relatively few producers at a high cost to the public. Legislatively mandating a termination date for the honey program would save as much as $40 million to $100 million annually depending on the size of the honey crop.

Mr. President, I think the argument is pretty clear. This is a program that is strictly tailored to a very few wealthy individuals who are getting very substantial payments, close to $1 million apiece under this program.

I think, as it was said by the initial men who landed on the Moon: "One small step forward for mankind." That is what this amendment is—a small but important step forward. A savings of $100 million could do a lot for this Nation and certainly it would set the tone as we proceed into the budget discussions subsequently in the latter part of this summer and the early fall.

I thank the Chair. I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from South Dakota.

Mr. DASCHLE. Mr. President, I yield myself such time as I might consume.

Mr. President, the distinguished Senator from Rhode Island, as he always does, has laid out his case extremely well. I find myself in strong disagreement with much of his characterization, and I hope over the course of the next few minutes I can clarify and provide a more accurate characterization of the program.

Let me emphasize one thing before I make a number of significant clarifications with regard to the program. That is, we are talking about a loan program pure and simple. For anyone who wants to understand the scope of this program, the effect of this program, the consequences of the program, that is the essence of what they ought to understand. This is a loan program. Loans are paid back. In one form or another, they are paid back.

I might also emphasize that the loan cap for honey is no different than any other program. It is exactly the same. Whether it is wheat or corn, any one of the programs that we have for which a loan program exists, the cap is the same. So we are not making any special exemption for honey producers.

The third point I would make: First, it is loan. Second, there is a cap—is that the cap is simply not working. When I say "not working," let me clarify that. Because the cap is working so well in many respects and because the costs of production are going up so dramatically, we are losing honey producers. Our honey production is going down. If the program were so lucrative, we would see a boom in honey production. We would see an explosion. We would see all kinds of honey production out there as a result of the profitability, the opportunity that this program provides.

The fact is that with the cap and with the dramatic increase in production costs and with the reduction, I might say, of 22 percent since 1985 in the loan amount, honey producers, frankly, are going broke. Honey producers today virtually are being driven out of existence. Those points need to be made before we say anything else.

If it is such a good program, why are there not more commercial honey producers? If it is such a good program, how is it that the loan cap is the same as any other program and the loan itself has gone down by 22 percent since 1985. If it is such a good program, then why is it we are seeing a real decline in both production and numbers across the country?

The beekeeping industry's significance to the rest of agriculture is often overlooked, and frankly, Mr. President, even maligned. Beekeeping, pure and simple, is vital to American agriculture. The U.S. Government has supported the price of honey since 1950, some 40 years, by providing a market price stability to honey producers to encourage them to maintain sufficient honeybee populations to pollinate important agricultural crops. That is the thing of which I do not think people are completely aware. There are two purposes for the honey program. First, obviously, is to provide support for a valuable commodity, a commodity that has an important role, and in some cases provides a source of nutrition. Far more than was the case 40 years ago, honey is a commodity that is even in greater demand.

But the other point is the role that our honeybees play in pollination. More than 140 cultivated crops either require or benefit from bee pollination, including millions of acres of fruits, vegetables, oilseeds, and legume seed crops.

Pollination provided by honeybees has increased in importance to farmers in recent years as urbanization and other pressures in the environment have reduced the availability of other natural pollinators.

The United States is a net importer of honey. While we can import honey, the fact is we cannot import pollination. A vast majority of pollination is provided free to the public through the random movement of bees. It is not unreasonable that the public pay for this pollination through a loan program to keep this pollination service available.

A study last year by Cornell University placed the value added to pollinated crops by the U.S. honeybee at $9.7 billion. This chart depicts it. The Cornell University study showed that the total effect of the honey program is $9.7 billion. USDA figures, which are the basis for this chart, say $9.3 billion.

The cost of the program is estimated by USDA at about $60 million. At last year's cost of $47.1 million, the ratio of value added to cost last year was 237 to 1. The ratio of the value of the program to the cost of the program is 237 to 1. I daresay I do not know of a program that exists within the whole farm bill where we can cite a statistic like that, a comparison like that; value to cost, 237 to 1.

Bee culture is practiced throughout the United States in areas with widely different types of plants and florae. Some beekeepers move their colonies sometimes 30 times or more a year, from several miles of several thousand miles, to provide pollination services or increase honey production.

Consumers benefit indirectly from the honey program because of its influence in maintaining sufficient honeybee colonies, so that many important food and fiber crops are pollinated.

An estimated 15 percent of the plant derived portion of the human diet comes from plants dependent upon or benefited by insect pollination. Much of the beef and dairy products consumed in the United States are produced from insect pollinated legumes. About one-third of the human diet is derived directly or indirectly from insect pollinated plants.

The value of the honeybees as pollinators far exceeds the value of honey and beeswax produced. That is an important point.

The distinguished Senator from Rhode Island did a very good job of laying out his statistical point of view, and the annual progression in the cost of the honey program. But that tells

part of the story. This is the rest of the story: A $9.3 or $9.7 billion value to the country that frankly could not exist, were it not for the program as we have it today.

Honeybees provide benefits for not only the crops that I have mentioned, but also for home gardens, orchards, and other natural ecosystems.

If the price support program is withdrawn or reduced, the supply of honeybee colonies will be jeopardized and much of the U.S. agriculture that depends upon pollination clearly will be hurt.

Honey production provides the incentives for beekeepers to maintain strong colonies of bees during the many months of the year that bees are not involved in commercial pollination.

The Honey Price Support Program has enabled beekeepers to continue operations and provide vital pollinating services while also assuring consumers of a stable supply of nutritious honey at reasonably prices. Any decline in the number of honeybee colonies that may result from changes in the honey program will directly affect the number of honeybees available for pollination.

Of most concern will be pollination of those agricultural crops that require large concentrations of bees for a commercial crop. It is unlikely that the areas where these crops are grown contain a sufficient number of wild bees or other pollinating insects or honeybees managed by local beekeepers to provide adequate pollination without the assistance of some commercial beekeepers.

While some farmers maintain a small number of honeybee colonies to pollinate their crops, it is frankly unlikely that large producers of field crops would have the expertise, the labor, the capital, the investment, or the bee pasture needed to permanently maintain large numbers of honeybee colonies.

Some who criticize the program point to a General Accounting Office report that concluded that the program is not needed to ensure crop pollination. However, there were serious flaws in the arguments for discontinuing the loan program. GAO looked only at the benefits of honeybees for pollinating crops for producers that provide cash rent and overlooked the benefits to wildlife, home gardeners, the environment, and other agricultural producers who do not pay rent for pollination.

The committee farm bill freezes the honey loan rate at the current level. That is an important point to make as well. I said a few minutes ago that the program, which was changed in 1985 under the farm bill that was authorized that year, cut farm program benefits for honey by 22 percent. So we are already at three-fourths of what we were at in 1985, not even taking into account the cost of production. If you add the cost of production into that, an additional 20 percent perhaps, now you have a 50-percent reduction in the availability of program benefits to beekeepers from where they were in 1985.

In 1989, the total cost of the program was $41.7 million. As I said, this represents a 50-percent reduction in the cost in 5 years. Loans to the appliable price-support rate are made available to honey producers and honey producers and honey-marketing cooperatives.

Let me emphasize this, Mr. President. A lot of the benefits derived through this program go to cooperatives, not to individual payments, individual producers. Those cooperatives take whatever benefit they are given, emphasizing again there is a loan at a cap of $250,000; take whatever loan benefits they get and distribute them among their cooperative members.

So with loans, producers can store their honey and wait for a more advantageous market price. When loan recipients choose to sell their honey in the marketplace, the loan principal is repaid with interest. That needs to be emphasized. This is not a freebie. This is not a loan given and paid back at no interest to the Federal Government. The interest is paid like any other loan. Interest is paid by the producer.

An option contained in the 1985 farm bill allows beekeepers at the discretion of the Secretary to repay their loans at a rate that is lower than the announced loan rates. The marketing loan is very similar in that respect to cotton and rice. When a lower loan repayment option is in effect, however, the interest is not charged and the price support loans and the $250,000 limit is in effect for loan forfeitures.

In 1985, the farm bill included a compromise that dropped the parity formula for setting the support level and replaced it with a progressively lower support level. These provisions were put in place to make domestic honey more competitive in export markets, reduce forfeiture and lower Government costs. That is exactly what happened. Government expenditures have gone down by 50 percent; forfeitures have gone down; the cost of the program and the support to producers has gone down.

In fact, since 1988, honey stocks have fallen to 20.8 million pounds, 9 percent of the 1987 crop. The Commodity Credit Corporation announced plans to terminate honey donations to the domestic program in March of 1988. Honey from the inventory continued to be supplied to the School Lunch Program and stocks rose slightly again. But since February of last year, stocks have again been decreasing.

Mr. President, despite the importance of bee colonies—and I again emphasize the tremendous advantage that pollinators provide to so many other crops—the number frankly has been declining at disastrous rates. Since the peak in 1947, 5.9 million, the number has dropped so the most recent estimate of 3.2 million colonies, based upon beekeepers with at least 5 or more colonies. The decline in colonies is connected to the decline in the price for honey—pure and simple.

Since 1981, the average price of honey has declined from a record 63.2 cents per pound to about 50 cents per pound, largely due to the declining support price. The loan rate for honey has been reduced by 18 percent just in the last couple of years.

Meanwhile, the cost of honey production has been rising. Honey producers are also facing increasing competition from imports of honey through countries such as China, and they are faced with a number of new threats. Two mites currently are devastating the industry, and no viable control measures are available at this time. The Africanized or so-called killer bees are expected to arrive in southern Texas soon. As the industry deals with the economic impact of these threats now is a poor time to make other changes that will weaken the industry.

The cost to beekeepers to maintain nonaggressive colonies through the breeding programs will be substantial. If there is not a viable honey industry, there will not be enough beekeepers available to provide the first line of defense to control the invasion of Africanized bees. As a result, the cost of containing the invasion by Federal, State, and local authorities, without beekeepers, will far exceed the cost of the loan program itself.

Keep in mind, we are talking about less than $40 million. Last year it was $41.7 million. Contrary to arguments that honey producers are well off, testimony from a Michigan State University entomologist before the Agriculture Committee showed that most commercial beekeepers are currently operating at a loss. I really think that is important for everyone to understand. Because of the arrangement placed upon the beekeeping industry, currently, the vast majority of beekeepers are operating at a loss.

The commercial beekeepers are, frankly, in the worst financial condition they have been in for many years. The average yield per colony does not allow a return on investment, or in some cases even a reasonable salary. Beekeeping supplies and equipment costs are rising at, or higher than, the inflation rate.

Even with the program, commercial beekeepers are losing $4 on every colony they operate. The program represents a mere 20 percent of their income today. Without that, beekeep-

ers would be losing even more money. A number of commercial beekeepers have gone out of business in the past year. I guarantee, if we continue to reduce the support price and limit participation in the program, many more commercial beekeepers face a similar fate.

You have heard, or will hear, that the program benefits only a few beekeepers. The distinguished Senator from Rhode Island made that point again this afternoon. But the beekeepers who participate in the program are precisely the ones who are commercial operators. Everyone with an apple tree in his backyard is not operating a fruit orchard. Likewise, everyone with a bee colony is not a commercial beekeeper. The 6,200 commercial beekeepers who participate in the honey board programs account for 99 percent of the honey produced in the United States.

You also have heard that honey producers are receiving large payments. But I emphasize, as I have throughout my entire presentation, that to reach the $250,000 cap, which, first of all, is in line with every other commodity, but in order to do that with beekeepers, a beekeeper must have at least 16,000 colonies producing more than 1.6 million pounds of honey, and employ 16 to 20 full-time workers. For those who are listening, I think it is important that we reemphasize that. A beekeeper, in order to reach that $250,000 cap, oftentimes reached by one farmer who is a corn producer, one farmer who may be a wheat producer, one farmer who may be a soybean producer, a similar situation regarding beekeeping would require that someone have at least 16 to 20 full-time workers. Try to pay 16 or 20 full-time workers with a $250,000 loan cap. See how many you can hire for that at minimum wage. That 16 or 20 full-time workers are going to have to maintain 1.6 million pounds of honey in order to be eligible for that $250,000 cap.

It makes that cap look mighty small when you think about it. The average commercial operation is, frankly, much smaller. The average commercial operation has 2,400 colonies, not 16,000. The most an operation of that size may receive from the program is half of the maximum loan benefit amount. Keep in mind that beekeeping is extremely labor intensive. As I indicated, 16 or 20 employees are needed to manage an operation that would entitle a producer to $250,000. The average commercial operation with 2,400 colonies is supporting a family and at least three full-time employees and their families. So you have four families operating with the average 2,400 Colony Program in the country today. I realize that $125,000 may sound like a lot of money for one person, but when it is spread out over the cost of operation, providing for four families and all of the costs that we have already discussed, it is not enough to cover the expenses. As the University of Michigan expert told the committee, honey producers today are going broke.

So it is clear, Mr. President, that commercial beekeeping is vital to American agriculture. Its benefits far outweigh the cost of the program. The honey industry has seen its prices drop, while its costs are rising. It is struggling against imports and new threats. It is not the picture people want to paint of it. Commercial beekeepers are not getting rich off the program; they are going broke. They are losing money. The average beekeeper receives from the program far below the maximum payment. Commercial beekeepers support not only themselves, but other families, through the jobs that they provide.

Mr. President, I do not think, in all the years we have examined this program, the case for a value-to-cost ratio could be made for any other commodity program.

I end as I started. We are talking about $9.3 billion in value, about $41 million in cost. Given the impact, given the tremendous problems that our industry is having in honey today, I think the committee bill addresses the Honey Program as it should. It is fair. It freezes support prices for 5 years and ensures for the next couple of years that beekeepers are going to have the same opportunities to maintain some viability that other commodities have as well. With that, I retain the remainder of my time.

I ask, how much time do I have?

The PRESIDING OFFICER. The Senator as 23 minutes, 48 seconds.

Mr. DASCHLE. I retain the remainder of my time.

Mr. CHAFEE. Mr. President, as always, the distinguished Senator from South Dakota does a good job with a bad case. I pay tribute to him for that, because he is persuasive while working with very, very limited facts on his side.

First, I want to stress that I appreciate why he is here, because the two Dakotas are the bulk of the producers of honey. Indeed, Senator PRESSLER, who unfortunately could not be here today, spoke vigorously against this amendment when it was presented by then-Senator QUAYLE in 1985, and if he were here today, Senator PRESSLER likewise would oppose this amendment. Being from South Dakota, naturally, he fights against this, because it presents difficulties to a small group of farmers that they have in their State.

I want to say this, Mr. President, that we have to get back to why this program was set up. I will just read from the RECORD at the time that it was originated. This was in 1949. They are talking about pollination:

> It appears obvious to the committee that if these vitally important insects are to be maintained in sufficient numbers to pollinate our crops, the beekeeping industry must have immediate assistance.

They were not interested in producing honey. They were interested in the pollination challenges that the country faced.

Mr. President, since then, there has grown up a whole industry of traveling beekeepers, those who move their hives around and pollinate where required. So this is not a question of eliminating pollination prospects for the country, if we end the Honey Support Program. That really has nothing to do with it. That is the first point. Indeed, if you read the GAO reports, the GAO reports stress that there are active beekeepers who will take care of the pollination problems in the country. So we should set that aside. I know it is a nice, heart-rending argument, but the fact is that it is not accurate.

The second point that the distinguished Senator from South Dakota makes is that we have to be able to fight against the killer bees and the mites. Well, Mr. President, he is just giving the back of his hand to 212,000 beekeepers in the United States. I do not know why he just brushes them aside. He says these are small potatoes; most of these people are small honey people; they do not count. They do not count when it comes to going to get the big dollars. It is true, they are not in the program. As I mentioned before, out of 212,000 beekeepers in the country, only 2,100 are involved with getting some money from the Federal Government.

By the way, Mr. President, it is all right to talk about $40 million, but the truth of the matter is that over the past 5 years, this program has been much closer to the $100 million a year than to $40 million per year in cost.

The point I want to make is that if we say that, OK, those hobbyists are out, and there are 200,000, then you have the part-time beekeepers, just as there are plenty of part-time wheat growers in the United States of America.

So there are plenty of part-time beekeepers and these people are not just fiddling around on the fringes with a couple of hives set up out there. They have between 25 and 299 bee colonies. So they are people to be reckoned with. They are people who are deeply into the bee business. Maybe they are working at another job, but they have plenty of farmers who do that in America, as the distinguished Senator from South Dakota could relate himself.

So when we talk about the onslaught of the killer bees, and if this program goes down the tubes we are not going to have anybody to resist them because it might affect 2,100

beekeepers out of 212,000. It just does not hold up.

Mr. President, I believe that the point we have started with here, that pollination is taken care of, that we can take care of resisting the mites, and, indeed, I point out that in our very legislation the provision that I have submitted here says:

Sense of Congress. It is the sense of Congress that diseases affecting the entire honey bee population impact on the ability of bees to carry out crop pollination and honey production.

Certain diseases such as those caused by the two mites the Senator mentioned, and the Africanized honey bee pose a threat to the continuing well-being of the general honey bee population and thus merit further study.

So this urges that type of study take place, and the proper place to do that is the U.S. Department of Agriculture.

Mr. President, I believe we have made a strong case here. I said right from the beginning this is not going to solve the budgetary problems of the United States of America. Our problems are far deeper than $100 million. But it is $100 million that can go to better purposes than to take care of a very, very few people who are getting a lot out of the program.

Perhaps the distinguished Presiding Officer was not here when I talked of the U.S. Department of Agriculture studies in 1984, and there is nothing that has changed substantially since this. Particularly, as you note in the GAO report, they said five producers each receive Federal loans ranging from $612,000 to $912,000, nearly $1 million.

Two of our colleagues pointed this out when we were discussing an emergency supplemental in 1987, that 20 beekeepers would be getting $60,000 in benefits under the honey program.

So I hope my colleagues who have been listening to this will bear in mind that this is a chance to really save some money for the U.S. Government.

I point out that there are a lot of desires of different Senators for use of Federal moneys. Of course, one of the uses would be to reduce the deficit. I refer once again to the amount of money that could be used for a particular purpose that appeals, I know, to the hearts of the Presiding Officer and also of the distinguished Senator from South Dakota.

In 5 fiscal years the program has spent $385 million. That is about $70 million a year. In those 5 fiscal years, we could have used that money to put 27,000 additional children into the Head Start Program.

I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from South Dakota.

Mr. DASCHLE. Mr. President, the distinguished Senator makes a good case with regard to the relevancy of cost, $41 million. I would like to see Head Start fully funded, and that is an issue and argument we will have to make another time.

Forty-one million dollars does not buy gas for the B–2 bomber. We are talking about an amount of money here that is negligible in the overall cost of things, even as we consider the limited cost of the farm program this year. Whether it is $10.5 billion or $9 billion, whatever amount we ultimately come up with, it may be less than $9 billion. Out of that $9 billion or $8½ billion for farm programs we are talking about $41 million last year for the honey program.

Just so everyone understands, the number of colonies that the average honey producer has is around 2,400, as I said a few minutes ago. They yield about 90 pounds per colony. According to the Michigan State University report from last year those 2,400 colonies producing that kind of yield had a net business loss of $9,356.41.

Why do we have 212,000 beekeepers and only 2,000 belong to the program? They cannot afford it, that is why. In many cases they do not want to put up with the paperwork, they do not want to have to go through all the problems associated with being a part of the honey program. So it should not come as any surprise that we only have 2,000 out of 212,000. Maybe we ought to have more but a lot of these honey producers, frankly, cannot afford it, not when they are losing $9,356 on an average honey operation.

The other issue I bring up, and the distinguished Senator from Rhode Island mentioned it a couple times, we have a lot of very small honey producers. That is because really you have two segments within the industry. You have the full-time operators, the people whose heart and soul are in this and they hire a couple people to help them. The average, of course, as I indicated earlier, is three families working with them in order to make it. It is a very labor-intensive operation, if you are going to do it full time. That is one set of honey producers.

They are the ones who really produce the total value we are talking about here. We have a lot of hobby honey producers, who have one or two colonies out there. They may live on the farm or in town, they have a few colonies for hobby farms and nothing else out there, trying to produce a little bit of honey.

So you have to take that into account when you consider these numbers. And certainly people who studied the honey industry and looked at the trends in this country recognize that fact.

I know the distinguished Senator from North Dakota wants to speak and I yield whatever time he may consume at this time.

The PRESIDING OFFICER. The Senator from North Dakota.

Mr. CONRAD. Mr. President, I first thank my distinguished colleague from South Dakota for doing a superb job of defending the honey program here on the floor of the U.S. Senate.

I say to our colleague from Rhode Island that he has argued, as always, with feeling. He has argued fervently here. I must say to him when he argues that he is going to save the taxpayers of this country money by eliminating this program, he is dead wrong. In fact if he were successful here this afternoon he would cost the taxpayers of this country substantially.

Mr. President, I had the opportunity to chair a hearing before the Senate Agriculture Committee on the question of the honey program.

For 3 or 4 hours we heard at great length testimony, not just from honey producers, but more importantly from those who benefit from the pollination services of the honey industry.

Mr. President, the chart that was shown by the Senator from South Dakota says it all. USDA has estimated the benefit to the U.S. economy at $9.3 billion a year as a result of the pollination services of the honeybee. That is the value to this economy.

Mr. President, if we did not have a honey program, we would have to go invent one. We would have to go invent one in order to have the pollination that is necessary for this Nation's fruit, vegetables, and flowers.

I have said on this floor before, agriculture is an American success story. Why is it that when we go to the supermarket we are able to have an incredible choice of fruits and vegetables before us no matter where you are in the United States? And why is it that if you go anywhere in Eastern Europe, or you go to the Soviet Union, you see people standing around a block waiting to buy a fresh piece of fruit, waiting to find vegetables for sale?

Well, Mr. President, the reason is simply this: we have a system of agriculture that produces the result. One of those small but important parts of the system is what those honeybees do that are in hives all across America, because those little bees pollinate the crops that lead to the enormous productivity of the American fruit, vegetable, and flower industry. That is the reality.

Now some may say, well, if we did not have these honeybees in the protected hives, the wild bees would do the job. Mr. President, I thought that myself until I had the advantage of sitting through a hearing and finding out what is happening in America. The wild bee population in this country is being decimated, absolutely wiped out by the varroa mite. The varroa mite could eliminate wild bee populations in this country in the next

3 years. The fact is we have a major threat on our hands in America and most of us do not even know about it. And, of course, why would we? Why would anyone know that we have a pest and a parasite that is attacking the bee population all across this country that could decimate the wild bee population in 3 years. But it is happening.

Mr. President, if we do not have a bee population to go out and pollinate that fruit crop, that vegetable crop, those flowers, we are going to have to reconstruct a bee population nationwide at enormous costs.

Mr. President, I think it might be instructive just to relate a study that was done—I think the Senator from South Dakota referred to it—by Dr. Roger Hoopingarner of the Department of Entomology at Michigan State University. He indicated just how fragile this whole situation is. Let me just quote from it. He says:

If we continue the trend of reducing support prices, I feel that many commercial beekeepers will go out of business. This will be a severe economic blow to Michigan's agriculture. Most of our fruit and vegetable crops need honey bee pollination for profitable production. This pollination service is provided by commercial beekeepers, as these are the beekeepers that can move colonies on-time, and in the numbers for good pollination.

Beekeepers could raise their pollination fees to offset the loss of income from honey. However, past practices have shown that this demand is very elastic and increased prices have reduced the number of colonies rented, or the fruit growers have sought out cut-rate prices. In two or three years varroa mites will eliminate all feral colonies, and then the fruit and vegetable growers will also face severe losses from poor pollination. By that time replacing a viable beekeeping industry will be very difficult because of the high start-up costs.

Mr. President, I ask unanimous consent to have printed in the RECORD the estimates that the doctor made of annual operating costs and revenue, and typical bee keeping operations that shows a net business loss of $9,000 a year under the current program for a typical beekeeper, a loss of $9,000 a year and the conclusion of the learned professor that commercial beekeepers in the United States are in serious financial difficulty. Most of them appear to be existing on preestablished equity.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ECONOMIC STATUS OF THE U.S. BEEKEEPING INDUSTRY

(By Roger Hoopingarner)

OVERVIEW

The commercial beekeepers, of the United States, are in serious financial difficulty. Most of them appear to be existing on preestablished equity. The average yields per colony do not allow a return on investment, or in some cases even a reasonable salary. Beekeeping supplies and equipment costs are rising at, or higher than, the inflation rate.

Historically, honey sales have supported the industry. Pollination fees can provide some additional income. However, past performance indicates that demand for honey bee colonies for pollination is elastic, i.e., increased pollination fees have reduced the demand for colonies.

The vast majority of pollination is provided free to the public because of the random movement of bees from an apiary. It seems reasonable, to me, that the public pay for this pollination through the price-support subsidy program.

BEEKEEPING COST SURVEY

In 1986 and 1988 I sent a management-cost questionnaire to commercial beekeepers. They were located fairly evenly across the country. However, 10 to 12 states represent the majority of those surveyed primarily because of the availability of mailing lists. The respondents included in the survey account for greater than 7 percent of the total honey production of the country. Thus, I feel that the data presented from the survey represents an accurate estimate of the costs and status of the beekeeping industry. The summary chart from this survey is included as Appendix A.

YEARLY COST ANALYSIS

I have incorporated the data from the survey into a spreadsheet analysis program of a beekeeping operation. The basis of the inventory for the operation is colonies housed in used equipment. It is impossible for a beekeeper to make interest payments if new equipment were used. The dollar difference between new and used equipment to operate a colony is over $100/colony. This loss in equity between the cost of new and used equipment has been paid for by previous beekeepers that have gone out of the business.

The yearly summary of business expenses for the "average" beekeeper is given in Table 1. The table uses values derived from the survey. Averages may not be the best criteria for this analysis, however it does give a equitable basis for comparisons.

Table 2 gives the income statement for this average beekeeper. If we use a median honey yield of 83 pounds instead of the average of 90 pounds, this operation would lose more money. We used the 1990 projected average honey support price of 53 cents/pound. To compound the problem, most of the expenses on table 1 are the expenses of 1988 (the period covered by the survey). If we had current figures, or inceased the values by 8 or 10 percent (two-years inflation), then the average beekeeper would not break even unless the per colony yield increases at least 8 percent. An increase of that amount, in per colony yields, would be just the opposite of the long time honey yields. They have been generally declining for many years. A fact that points out quite clearly that Federal support of prices has not caused an over production of honey.

I have given the owner-operator a yearly salary of $20,000—a sum that is very modest. Under the average expenses of Table 1 a beekeeper can not make a return on his investment. In fact is losing money. If we delete all interest payments the operation is able to return to the black. That makes it clear that beekeepers are existing on equity established during a previous period.

If we continue the trend of reducing support prices, I feel that many commercial beekeepers will go out of business. This will be a severe economic blow to Michigan's agriculture. Most of our fruit and vegetable crops need honey bee pollination for profitable production. This pollination service is provided by commercial beekeepers, as these are the beekeepers that can move colonies on-time, and in the numbers for good pollination. The sideline and hobby beekeepers can not leave their other jobs in order to move their colonies to orchards and fields.

Beekeepers could raise their pollination fees to offset the loss of income from honey. However, past practices have shown that this demand is very elastic and increased prices have reduced the number of colonies rented, or the fruit growers have sought out cut-rate prices. In two or three years varroa mites will eliminate all feral colonies, and then the fruit and vegetable growers will also face severe losses from poor pollination. By that time replacing a viable beekeeping industry will be very difficult because of the high start-up costs.

TABLE 1.—*Average yearly costs of a beekeeping operation*

Apiary Rental	$2,130.00
Antibiotics, Miticides	10,378.50
Honey Strg. (Pails, Brls)	2,930.40
Apiary Registration	355.00
Queens (33 percent of 6.50)	5,232.50
Pkg. Bees (4 percent per year)	2,783.88
Sugar for Syrup	9,230.76
Comb Found. Replacement	3,750.91
Hive Body Replacement	300.37
Electricity	1,098.99
Phone	610.50
Water	146.52
Heat (Gas or Oil)	610.50
Paint	61.05
Travel II at 52 mi. at 0.245	9,949.94
Interest at 11 percent	32,310.18
Depreciation (20 and 5 yr)	19,930.95
Misc. Expenses	374.90
Beekpg. Assoc., Etc.	198.85
Apairy Maintenance	488.40
Honey Promotion [HRPCIO]	1,927.47
Salary (Owner)	20,000.00
Labor, Bee Management	23,199.00
Labor, Extracting	3,516.48
F.I.C.A	5,158.95
Beekeeping Ins. ($500 ded.)	1,854.62
Bldg. and Vehicle Ins.	2,625.00
Health Insurance	5,160.00
Workers Comp. Ins.	1,203.40
Property Tax	2,500.00
License Fees	25.00
Bottling Labor at .047/lb	1,270.55
Sales Cost; Adv., Travel	1,621.98
Jars, Labels, Misc.	6,758.25
Interest Btlng. Equipt.	401.65
Deprec. Btlng. Equipt.	334.71
Total	180,430.15

TABLE 2.—*Income: Honey, wax and pollination*

Honey Yield/Colony	90
Total Honey (Lbs.)	219,780
Percent Honey Bottled (Retail)	12.3
Support Price	0.53
Wholesale at Support	$101,288
Ave. Retail (Cs. or Btl)	$1.35
Retail Sales	$36,494
Wax Price	0.85
Wax at 1.7 lbs./col.	$3,528.69
Pollination Fee/Colony	$23.00
Colonies for Pollination	1,294
Income from Pollination	$29,762
Income (Wholesale)	$104,817

Income from Retail	$36,494
Total Gross Income	$171,073
Net Income:	
Number of Colonies	2,442
Honey Yield/Colony (lbs.)	90
Net Business Loss	−$9,356.41
Percent Loss on Invest	−3.19

Mr. CONRAD. Mr. President, let me just sum up by saying if we fail to protect this program on the floor of the U.S. Senate today, we will have thrown away one of the finest investments we make as a public body. Less than $60 million a year has been put into this program and we get a return, according to USDA—this is not the estimate of the beekeepers, this is not the estimate of anybody but the U.S. Department of Agriculture, who says we benefit to the tune of $9.3 billion a year. That is a rate of return, Mr. President, if I am not mistaken, that is dramatically in excess of anything we see anywhere else in our society.

Mr. President, after hearing the testimony of those who provided testimony before the Committee on Agriculture, I am convinced that we could make a very serious mistake if we decided to do in this Nation's honey program, not because of its effect on the honey producers, although obviously they would be decimated, but far more importantly because of what we would do to fruit, vegetable, and flower industries of America, industries that have been so successful and such a key part of our national economy.

With that, I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. CHAFEE. Mr. President, the distinguished Senator was talking about how the loss in the program is going down and indeed how the supports are going down. I would point out that the Senate legislation before us provides that we not go down on the price supports of honey. In other words, currently the loan rate is at 56.86 cents per pound. Under the provision that we have before us, it would stay at that, rather than going down where it is set to go down, and indeed as it is in the House legislation, go down to 53.8 cents. In other words, the program was to drop 3 cents a pound. And so we are not in a situation where: "Don't worry folks, gradually this program is being eliminated. It is going to cost less." It cost less, as you see in some of these charts. Here, as I point out, in 1988 it was $100 million and in 1989 it was $42 million.

That is not quite accurate. Now what they are proposing to do in the bill before us is to reverse that course, to say no, we are not going to keep sliding down these price supports; we are going to stay at the 1989 figure. That is the first point.

The second point is that where, as we look at this chart and see $100 million in 1988 was the cost of the program and $40 million in 1989, that does not mean that the cost of the program is going down. Indeed, it is predicted by the very organization, the CBO, that makes predictions for us, Congress—they predict that next year it will not be $40 million. In 1990 it will, this current fiscal year, be $68 million. As I pointed out over the 5-year period it has cost $350 million, which is about averaging $70 million a year.

So, do not think this program is costing less. It is not. Indeed the way they have set it up it will not go down.

The distinguished Senator from North Dakota has somehow tied in the whole survival of agriculture in the Nation to this price support program. There is a man who will step right up and make a bold claim. And there is probably something to that. I forgot how, but somehow for a measly investment of $100 million we are saving $19 billion.

First of all, as the Senator knows, a great deal of pollination in this country does not take place by bees. It takes place by wind, by insects.

Second, I would harken to the GAO report. This is what they said. This is not some scientist who was brought in from the University of Michigan knowing in advance just how he is going to testify. For every scientist from the University of Michigan I suspect we could haul one in from the University of Arizona or Berkeley or someplace who would say exactly the opposite thing. We have all had these experts, you get five and I will get five, weigh them, and they will go anywhere you want.

Mr. CONRAD. Will the Senator yield?

Mr. CHAFEE. On the Senator's time.

Mr. DASCHLE. I will be happy to yield time to the Senator from North Dakota.

Mr. CONRAD. I would like to point out to my dear friend from Rhode Island the expert we cited for the $9.3 billion of benefits from pollination is not any scientist from any university. It is the U.S. Department of Agriculture.

I point out to my friend it is the administration of our friend from Rhode Island that currently controls the U.S. Department of Agriculture. They are the ones who have told us the benefit, yearly, to American agriculture is $9.3 billion from the pollination services of the bees.

Mr. CHAFEE. Mr. President, I would appreciate it if I am notified when I have 4 minutes to go. How much time do I have left, Mr. President?

The PRESIDING OFFICER. The Senator has 5 minutes and 8 seconds.

Mr. CHAFEE. When I have 3 minutes left I will appreciate it if I am notified.

Mr. President, that may well be. But there is no suggestion on this floor that by ending the price support program there is not going to be any pollination. Indeed, if I might I will quote from the GAO. They are not tilted either way. They are not trying to save the program or get rid of it. They were told to investigate it and they said Congress should eliminate the mandatory program because the program is no longer needed to ensure crop pollination because producers of crops that require honey bee pollination are already renting or own their own honey bees. They view the cost as another cost of production, similar to fertilizer, fuel, and labor.

So, Mr. President, it is a great rationale on which to hang their hats, those who support this program. And I do not blame them. The only trouble is, "it ain't so." It sounds good, but it is just not accurate. And they can repeat it and repeat it. Indeed, we have all become more familiar with pollination over the past few hours. But the fact of the matter is there is going to be crop pollination, there are going to be plenty of bees available for that. And this honey price support program has nothing to do with that.

I reserve the remainder of my time.

Mr. DASCHLE. Mr. President, how much time do I have?

The PRESIDING OFFICER. The Senator has 9 minutes and 45 seconds.

Mr. DASCHLE. Mr. President, it is so. The fact is we can take the statistics and figures offered by the distinguished Senator from Rhode Island and come to whatever conclusion we want. But whatever argument he may use, the facts clearly speak for themselves. This is a loan program which is no different in many respects, especially as related to the cap, than we have in any other farm program, whether it is corn, whether it is wheat, whether is is cotton or rice. We have a loan program that limits payments to farmers of $250,000. It also is a program that benefits the country in far greater proportion to its cost. We are talking about 237 to 1, Mr. President. I daresay there is not another program in the country that provides these benefits for that cost.

The cost on an annual basis to the taxpayers in this country comes out to about $5.80 a person. For $5.80 per person we have a $9.3 billion pollination value; we have a program providing one of the most valuable and nutritious sweeteners we have in the country; we have a program that provides an industry with a much needed safety net, much like we have for virtually every other program; and we have a program, frankly, that is not working to the extent we would like only in that it is not keeping up with the cost of inflation.

The distinguished Senator said we are reversing policy here in the 1990 farm bill. The fact is we are not reversing anything. We have taken a hit by about 50 percent since 1985. If we take the 22-percent cut in the amount of benefits that a farmer is entitled to, add to that inflation over the last 5 years of about 25 percent, we have a 50-percent reduction in the availability of payments in terms of their cost of living over the last 5 years.

We have said enough is enough. After we cut 50 percent of it out, how much deeper can we go? We already have a study that says the average honey producer is losing $10,000 a year. What we said is we have cut it far enough; we are going to freeze it now. By freezing it we are not saying, as we do with defense spending and some other programs around here, a freeze is a cost-of-living allowance increase. We are freezing at what the 1990 rate is.

From here on out, every honey producer is going to have to absorb the cost of production. We may see a 20- or 30-percent increase in their cost of production over the next 5 years and, guess what, the honey producer is going to have to eat every bit of it. Every amount of that cost of production increase over the next 5 years they are going to have to take on themselves.

What other program, what other benefit we provide in the Federal Government, is going to ensure that for the next 5 years they are not going to get one cost of living dollar in increase? So that is a cut. It could be a 25- or 30-percent cut in the next 5 years. That is what we are talking about. Add that cut to the $9,000 these guys are losing right now and what does that do to prospects for honey production and pollination and the kinds of benefits we have talked about here for the last hour and a half?

So I hope, Mr. President, people will see fit to leave well enough alone; to understand that this program, for what it costs, is a tremendous value. Five bucks a person per year to see that honey production, pollination production, and the opportunities to provide a nutritious food on the markets in plentiful supply is done with the success that we have had for the last 50 years.

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Does the Senator wish to yield back the remainder of his time?

Mr. DASCHLE. I will be prepared to yield back the remainder of my time if the distinguished Senator from Rhode Island is prepared to do so as well.

Mr. CHAFEE. Mr. President, I have how much time left?

The PRESIDING OFFICER. The Senator has 3½ minutes.

Mr. CHAFEE. Mr. President, I want to make a couple of concluding remarks, if I might. It seems to me this is a very important vote. This vote is not something that is going to wrench the hearts and the political position of every Senator in this body. There are a few Senators from States where the honey bees and the honey producers are very important. We recognize that. Indeed, as I mentioned, Senator PRESSLER feels strongly about that. Senator PRESSLER is unable to be here today, unfortunately.

But the real question, it seems to me, when we are struggling with these tremendous deficits that the Nation faces is can we end a program that the objective observers that we hire to go out and look and come back with reports, namely, the GAO, have said should be ended.

Mr. President, I am not asking a sudden termination, a drop of the guillotine. I am saying that this program should be phased out over 4 years. Not 3 years, like the Quayle amendment we voted on in 1985, but a 4-year period. Can we really hike up our britches and get something done to benefit the Nation?

It is a program that costs in the area of from $40 million to $100 million a year, depending upon how much honey is produced, a program that is not needed for pollination of crops. That has been clearly stated many, many times in the reports that we have read. It is a program that benefits one-tenth of 1 percent of the honey producers of America. One-tenth of 1 percent, 2,100 people, are the ones who benefit from this program. Out of 212,000 honey producers in America, 2,100 are the ones who are getting this $40 to $100 million a year.

I just hope, Mr. President, that we will support this amendment, and I ask my colleagues to do so. It is a small step forward.

Thank you, Mr. President. I reserve the remainder of my time.

The PRESIDING OFFICER. Does the Senator reserve his time?

Mr. CHAFEE. I am not sure I have much.

The PRESIDING OFFICER. The Senator has over a minute.

Mr. DASCHLE. How much time do I have, Mr. President?

The PRESIDING OFFICER. The Senator has 5 minutes.

Mr. DASCHLE. Mr. President, I will not use it all, and I intend to yield a couple minutes to the distinguished Senator from Florida.

Let me say, the distinguished Senator from Rhode Island has made reference on more than one occasion to the fact it is understandable that a Senator from South Dakota would be supporting the program because of the producers in my State. I must say obviously that is a motivation. I hope he would not ascribe purely parochial or political interests to my motivation in defending the program.

I do not know how many confectioners, how many sugar users, how many candy bar companies there may be in Rhode Island. I do not care. This is not a point, and I am not going to ascribe motivation to the distinguished Senator from Rhode Island. The fact is this program can be debated and can be substantiated and supported on the basis of its value to agriculture, specifically, and to the country as a whole. For $41 million, we are getting a good deal. For $41 million, we are providing a program that provides some stability, some opportunity for economic viability, and clearly a program that far outweighs its costs when one calculates the value.

I yield 2 minutes to the distinguished Senator from Florida.

Mr. GRAHAM. Mr. President, I thank the Senator.

I appreciate the opportunity to make a few remarks on behalf of an industry that is very important to my State. Florida is one of the leading States in the Nation in terms of the production of honey. We have some 8,000 beekeepers in our State, 500 of whom depend on honey as their total source of livelihood.

Mr. President, I believe what we have here is an industry in transition. It is a small industry. It is an industry which in the past has been subject to tremendous fluctuations in price as a function of the instability of both the market and the unpredictability of levels of production.

What we are trying to do through this program is to create a stable economic environment leading toward this industry's greater orientation toward the market as opposed to subsidy as the basis of its economic well-being.

I am pleased that there has now been established in my State and in others special boards to promote the use and sale of honey. The same kinds of aggressive efforts at market development and promotion, which have been so effective in other crops, are now being applied to the production of honey.

I believe those efforts, given time, will bring stability to this industry, which is our objective.

I also believe, Mr. President, that some of the secondary contributions of this should not be understated. While in a State such as ours, honey production represents $12 to $15 million of annual income, our State department of agriculture has estimated that this industry contributes $2 billion to our total agriculture through the pollination of other crops.

It is not by accident that some of the major honeybee producing areas in our State are adjacent, integral to our citrus producing areas. There is a very

symbiotic relationship between these two industries. So it is improper, in my judgment, to characterize this as being a small, maybe even suggesting small to the point of irrelevant, industry, when it is striving to become stronger, more significant on its own, and is making significant contributions to other areas of agriculture.

I urge the defeat of this amendment.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. DASCHLE. Mr. President, I yield 1 minute to the Senator from North Dakota.

Mr. CONRAD. Mr. President, the able Senator from Rhode Island has repeatedly said the honey program benefits 2,000 honey producers out of some 200,000 honey producers in the country. I will just make the point to my colleague and the other colleagues who are in the Chamber: The honey program benefits 250 million Americans.

Again, I want to repeat, the U.S. Department of Agriculture says the pollination benefit from these bees is $9.3 billion a year. If we did not have this program, we would have to invent it.

Mr. HEINZ. Mr. President, I rise in support of the amendment of the Senator from Rhode Island [Mr. CHAFEE]. This amendment would eliminate one of the sweetest deals for one of the smallest group of Americans engaged in agricultural activity: The Nation's 2,100 commercial beekeepers.

Established in 1949, the honey program mainly provides beekeepers with low interest operating loans whose collateral is the honey expected to be produced. The value of the collateral is set by law. The Government, in effect, loans money out to beekeepers and says that if the beekeeper can't sell the honey produced we will forgive the loan and take the honey.

The program was designed to increase the number of bee colonies in order to stimulate pollination of crops. A secondary purpose was to insure a sufficient supply of domestically produced honey. It has failed on both counts. The number of bee colonies has declined steadily—down some 24 percent between 1949 and 1985. In addition, the high price support led to an increase in imports of honey from abroad while domestic honey production stagnated.

During the 1985 farm bill, I supported an amendment by our Vice President, then-Senator DAN QUAYLE, to eliminate what he called the millionaire bees club. The amendment won overwhelming support on the Senate floor but the House maintained the program and the Senate conferees accepted the House provision in conference. Despite the clear sentiment of the Senate to end this sweetheart deal, the committee bill before us continues the honey price support at nearly 57 cents a pound for the next 5 years. Enough is enough.

The trends so abundantly clear in 1985 have persisted since passage of the 1985 farm bill. The number of colonies has declined another 25 percent. The level of import penetration from low cost honey producers remains high and honey has steadily lost out to other sweetners in the marketplace. Mr. President, this program does not advance its stated objectives.

What the program does achieve is to transfer a lot of taxpayers' money to a handful of beekeepers.

Over the last 5 years, our honey support program has cost the Federal Government an average of $77 million a year. That's more than $37,000 a year for each of the 2,100 commercial beekeepers in the program. For some of those beekeepers, the benefit has been even more substantial. The Congressional Research Service estimates that almost 10 percent of the total Federal benefits from this program went to 1 percent of the participating beekeepers.

What do we do with the honey we buy, Mr. President? Why do we give it away to foreign countries as part of our food assistance programs. There is no market for honey at 57 cents a pound in this country or any other.

There is absolutely no justification for this program. It has been the subject of two critical studies by the General Accounting Office.

It is time to end the hive talk and bee good to the taxpayer. I urge my colleagues to support the Chafee amendment.

Mr. LAUTENBERG. Mr. President, I rise as a cosponsor of this amendment to phase out the Honey Price Support Program.

The Honey Program, Mr. President, serves the special interests of 2,100 beekeepers, about 1 percent of all beekeepers, who received $385 million from the Government in the past 5 fiscal years.

The taxpayers, Mr. President, are getting stung.

Mr. President, by almost any objective standard, the Honey Program should be phased out. It serves virtually no public purpose and costs taxpayers significant sums. That's not just my view, it's also the view of the General Accounting Office, which has urged that it be completely phased out.

When the Honey Program was established in 1949, Mr. President, it was justified as necessary to ensure an adequate supply of honey bees for crop pollination. That may or may not have been a credible argument in 1949 but, from all indications, it isn't now.

The GAO specifically found that the program is unnecessary to ensure pollination. According to GAO, producers of seed and fruit crops to which bee pollination is important either keep their own bees or pay others to do so. There thus is not real need for the Honey Program. And at a time of huge Federal deficits, this kind of waste is just intolerable.

In conclusion, Mr. President, the Honey Program is a prime example of wasteful Federal spending that benefits a fortunate few at the expense of everyone else. It should be abolished.

I urge my colleagues to support this amendment.

Mr. KERRY. Mr. President, I am pleased to be Senator CHAFEE's principal cosponsor on this amendment to phase out the Honey Subsidy Program. In this time of budget deficits, it is clear that program cuts are needed. This program is one that supports relatively few producers and, according to the Government Accounting Office [GAO], should be phased out. GAO reports that the program, originally created to stablize prices and to ensure sufficient bee populations to pollinate crops, is no longer needed.

Of about 200,000 beekeepers nationwide, only 2,100 participate in this program. Over the past 5 years, these 2,100 beekeepers received $385,000,000. That translates to about $185,000 each. Furthermore, Mr. President, 10 percent of this money goes to only 1 percent; that means that last year, about 22 beekeepers each received $200,000.

We cannot ask the American taxpayers to pay for a program that is no longer necessasry and that benefits so few. I very strongly urge my colleagues to support this amendment.

Mr. CHAFEE. Mr. President, I am ready to vote, if others want to yield back their time.

Mr. DASCHLE. Mr. President, I am prepared to yield back my time.

Mr. CHAFEE. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. DASCHLE. Mr. President, I make a motion to table the amendment. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. There being no further debate, the question is on agreeing to the motion of the Senator from South Dakota. The yeas and nays have been ordered. The clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Utah [Mr. GARN] is necessarily absent.

I further announce that the Senator from South Dakota [Mr. PRESSLER] is absent due to a death in the family.

The result was announced—yeas 46, nays 52, as follows:

[Rollcall Vote No. 168 Leg.]

YEAS—46

Adams	Domenici	Lieberman
Akaka	Durenberger	Lott
Baucus	Exon	Mack
Bond	Ford	McClure
Boren	Fowler	Mikulski
Boschwitz	Gore	Pryor
Breaux	Graham	Riegle
Bumpers	Grassley	Rockefeller
Burdick	Harkin	Sanford
Burns	Heflin	Sasser
Byrd	Hollings	Shelby
Cochran	Inouye	Simpson
Conrad	Johnston	Symms
Cranston	Kerrey	Wallop
Daschle	Kohl	
DeConcini	Leahy	

NAYS—52

Armstrong	Hatfield	Nickles
Bentsen	Heinz	Nunn
Biden	Helms	Packwood
Bingaman	Humphrey	Pell
Bradley	Jeffords	Reid
Bryan	Kassebaum	Robb
Chafee	Kasten	Roth
Coats	Kennedy	Rudman
Cohen	Kerry	Sarbanes
D'Amato	Lautenberg	Simon
Danforth	Levin	Specter
Dixon	Lugar	Stevens
Dodd	McCain	Thurmond
Dole	McConnell	Warner
Glenn	Metzenbaum	Wilson
Gorton	Mitchell	Wirth
Gramm	Moynihan	
Hatch	Murkowski	

NOT VOTING—2

Garn	Pressler

So the motion to lay on the table the amendment (No. 2337) was rejected.

Mr. CHAFEE. I move to reconsider the vote.

Mr. WALLOP. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island [Mr. CHAFEE] is recognized.

Mr. CHAFEE. I wonder, since we had a vote on the tabling motion, could we vitiate the yeas and nays on the adoption of the amendment and do that by a voice vote?

Mr. DASCHLE. I have no objection to doing that.

Mr. LEAHY. Mr. President, I ask unanimous consent that the yeas and nays be vitiated.

Mr. CHAFEE. Going back a minute, did we have a motion to reconsider and was that adopted?

The PRESIDING OFFICER. The motion to reconsider was laid on the table.

Mr. LEAHY. I ask unanimous consent that the yeas and nays be vitiated on the pending amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The question is on agreeing to the amendment of the Senator from Rhode Island.

The amendment (No. 2337) was agreed to.

Mr. LEAHY. Mr. President, I wonder if we can have order.

The PRESIDING OFFICER. The Senator from Vermont is correct. Can we have order in the Chamber.

Mr. LUGAR. I move to reconsider the vote by which the amendment was agreed to.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Vermont is recognized.

Mr. LEAHY. Mr. President, if we can have order. We are moving along, and I advise my colleagues that a number of amendments that we once thought might come up are not going to, and that is welcome news. That is at least a day's worth of amendments that are gone. I urge my colleagues that have amendments that will not require rollcall votes to bring them up and seek short time agreements.

In the meantime, some who have amendments that they feel may be noncontroversial, see Senator LUGAR, or myself, or both of us, and we will see if it is possible to clear some of those for action. If we do have a number cleared, we can probably take them up very quickly, after the next vote or during the next break in proceedings. Now would be the time to do it.

I, again, urge Senators to come forward with their amendments. We have not wasted time in quorum calls today. If we can keep moving at this pace, there is the possibility of completing the bill this evening. I think that may be wishful thinking, but if we go very late tonight, we certainly will be within shooting distance of completion.

Mr. GRASSLEY addressed the Chair.

The PRESIDING OFFICER. The Senator from Iowa.

CARGO PREFERENCE

Mr. GRASSLEY. Mr. President, yesterday I spoke to a provision of the bill that is not talked about much here, but that is the cargo preference provsions of the bill. I spoke yesterday about cargo preference in the maritime industry, as well as the GATT negotiations going on.

I want to continue to address this issue, because I think I need to bring to my colleagues' attention some undue pressure being used, and I think I have advice for my colleagues on what they can do to stand by that pressure.

I want to spend a moment to address an issue relating to a letter that I received, which I am sure my Senate colleagues received as well, from the District 2 Marine Engineers Beneficial Association—Associated Maritime Officers, which is part of the AFL-CIO. The letter makes reference to a so-called cargo preference compromise included in the 1985 farm bill. I spoke to that compromise yesterday.

It also contained a threat to Senators that read, "If agribusinesses continue to attack our industry, we, along with the labor movement, will do our best to eliminate their subsidies altogether." I read that to mean, if CHUCK GRASSLEY or any of the rest of us attack cargo preference, then the labor movement will help eliminate farm programs. That is a threat. If I want to see that the farmers of Iowa are protected adequately, I better not say anything about cargo preference.

I first want to discuss how I believe Members of Congress should handle such threats from labor union leaders. I think no better example to be offered than to share with my colleagues what Democrat Congressman DAVID OBEY of Wisconsin had to say when the maritime leaders tried to coerce House Members to support cargo preference. You can find the full text of Congressman OBEY's comments on page H7273 of the October 19, 1989, CONGRESSIONAL RECORD.

But the following is a portion of what Congressman OBEY told the pro-cargo preference union leader:

> But when an official such as yourself tries to persuade me on this or any other issues, based on threats or intimidation, I can have only one response: Go to hell in a handbasket and take your single-issue approach to politics with you. If I have to choose between the interests of my constituents and your endorsement, I will stick with my constituents and you can stick your roll-call and your endorsement in your nearest ear.

I say bravo, Congressman OBEY.

Mr. President, I cannot help but wonder, as I see more and more of our farm State Senators and Congressmen getting nervous from these threats and intimidations from union bosses. I have to encourage them to have the courage to stand up and defend the interests and well-being of their farm constituents, and I think that means opposing cargo preference for all the reasons I gave yesterday and just to repeat a couple of those: They relate to the fact that the maritime union, the maritime industry as well, does not want maritime restrictions negotiated at GATT. I argue that we ought to be negotiating those for the benefit of the American economy, the same way that we would be negotiating agricultural subsidies at the same time which are being negotiated over there.

We have had people in this body and in the other body argue in defense of cargo preference stating that because the number of farmers are dwindling we dare not anger the maritime union supporters in Congress.

So I have to ask my question of colleagues: Since when should we legislate based upon fear, instead of upon merit?

This dwindling numbers argument is meaningless as far as I am concerned. In other words, arguing that the number of farms are going down and

so we have to have the help of a broad base of interest in this country if we are going to protect the interest of the farmers because cargo preference protects the high price jobs of a few thousand seafarers. In sharp contrast, there are over 2.1 million farms in America, most of which benefit either directly or indirectly from farm programs.

Furthermore, there are 11.3 million Americans who either live on farms, work on farms, or get income from farms. In fact, there are as many family and hired workers on farms as the combined payrolls of transportation, the automobile industry, and the steel industry. Moreover, agriculture is America's largest employer with 20 million people working in one agriculture sector or another—from growing food to selling it at the grocery store and other retail outlets.

I would dare say that out of 435 congressional districts there are at least 40 which would fall into the same category of having some farmers in their district.

So if indeed our farm programs will be jeopardized by a debate that scrutinizes cargo preference, and hopefully modifies it, then it will be because Senators and Congressmen are paying more attention to the threats and demands of the maritime industry than they are to the needs of their constituents.

Can we honestly believe that simply because Congress wants to take a close look at the value of cargo preference—and that is what I based my argument on yesterday—that the labor bosses will force Senators and Congressmen to ignore their own agricultural constituents? I do not believe so.

Remember what I just said, there are 11.3 million Americans who live on, work on, or derive income from farms. Remember that there are more family and hired workers on farms than all the workers in transportation, auto industry, and the steel industry combined.

Yet labor leaders and the maritime industry use threats and intimidation thinking that they can force Congress to vote against the interests of 11.3 million people, simply because some of us have grave concerns about the value of cargo preference, a back-door, hidden subsidy that lines the pockets of a few thousand seafarers.

If you remember yesterday I put a challenge to my colleagues. The challenge was that if you honestly feel that cargo preference is a very valuable subsidy, because none of us can claim to be subsidy free—I do not stand here and claim to be subsidy free—this whole bill we are working on is an example of subsidies for one segment of the economy, but my challenge to you at that time was to consider in terms of the value, let us account for, let us appropriate for, because getting the cost of it is not the easiest thing to do. I think as we go on in this debate I will show how difficult that is as time goes on. Mr. President, I have faith in my Senate and House colleagues to be able to proceed with a debate over cargo preference without cowering to these threats.

I am confident that we can discuss cargo preference openly and that is the way I approached this issue this year, and I have to say that it was not the way that I approached it last year when we had a vote on it because, quite frankly, there was an awful lot of learning about cargo preference in the process of opening up the debate to where we bring it up for discussion in what I hope is an intellectual exchange of ideas and discussions, and maybe no agreement, but we need to order this debate in order to establish Government policy that is based upon merit and one that we can account for and know exactly what it costs, because when you vote for subsidies in these farms programs you know exactly what they cost.

If my colleagues find themselves waivering under some sort of pressure, then I ask you to simply look at Congressmen OBEY's courageous remarks for inspiration.

I yield the floor.

The PRESIDING OFFICER (Mr. CONRAD). The Senator from Idaho.

AMENDMENT NO. 2338

(Purpose: To allow cargo preference requirements to be lifted if determined to prevent the completion of an agricultural sale from the United States.)

Mr. SYMMS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho [Mr. SYMMS] proposes an amendment numbered 2338.

At the end of title XI, insert the following new section:

SEC. . PREVENTION OF LOST SALES.

If the Secretary certifies that, upon good evidence, a sale of domestic agricultural commodities pursuant to an export activity subject to the requirements of section 901(b)(1) of the Merchant Marine Act of 1936 (46 U.S.C. 1101 et seq.) may fail to be made because of the requirements of that Act, the Secretary may waive those requirements with respect to that sale effective 10 days immediately following the date of certification.

Mr. SYMMS. Mr. President, I just announced to the managers of the bill that I appreciate the fact that the managers of the bill are working on a couple of my noncontroversial amendments. This amendment may or may not require a rollcall vote. I will be willing to enter into a very brief time agreement. But in the interim I will just address what this amendment is about and why I am offering it.

I believe that it was appropriate to offer it now after the fine remarks of the distinguished senior Senator from Iowa [Mr. GRASSLEY] insofar as his discussion about cargo preference and how it impacts us.

Mr. President, those of us in the Pacific Northwest who are primarily exporters of soft white wheat feel that we got the short end of the stick on the by-sea program in the past couple years and most went out to the gulf and New Orleans, but we also had problems with cargo preference that made us less competitive and lost some sales to the Pacific rim that we believe we should have had with soft white wheat that we lost to Australia, Canada, and others.

So this amendment simply brings some intellectual honesty to the debate over applying cargo preference requirements to agricultural sales.

National public opinion polls shows the public faith in the Congress is not very high. Part of the reason for that is that the American people do not see their Congress maintaining any intellectual integrity on a variety of issues. We complain about the deficit, but nothing seems to happen. We criticize foreign investors and then tie down our own investment community. We lament the influx of imported goods, and then strangle our own domestic industries with costly regulation. We castigate our own lack of competitiveness overseas, and then, in the midst of our efforts to sell a few bushels of grain we prohibit the use of the lowest cost freight.

Now, once again, we are on the verge of sucking and blowing with the same breath, and that is hard to do. It does not work. We cannot have it both ways. We are trying to enact a farm bill that portends to assist American farmers to become more internationally competitive. But we burden our export assistance with costly cargo preference requirements.

In a recent letter to one of our colleagues in the other body, Secretary of Agriculture Yeutter said this of cargo preference requirements:

When contemplating expanding cargo preference requirements, it is important to realize that these increased shipping costs are not simply passed on to a captive foreign buyer * * * [It also] results in a reduction in U.S. farm income, a rise in the cost of our support programs and larger budget outlays. This is in direct conflict with the overall U.S. objectives of increased agricultural exports, lower budget deficits, and providing food assistance to poor nations.

Expansion of cargo preference clearly may erode the level of U.S. agricultural exports, at the expense of American farmers and taxpayers, while not addressing the problems facing the U.S. merchant marine.

Mr. President, that is the comment of Clayton Yeutter, Secretary of Agriculture. I think that is very succinct, to the point, accurate. Cargo preference, if we are going to hold steadfast-

ly rigid to it, is not consistent with U.S. agriculture policy to help the farmer, to help poorer nations that need the food, and to help our competitiveness, to help our exports and overall raise net farm incomes, and therefore raise revenues to the Federal Treasury and lower the Federal budget deficit.

Mr. President, it is time to prove the public opinion polls wrong—to take command of an issue and address it forthright and head on—with no equivocation or play. If we want to export U.S. farm products, let us export U.S. farm products. That is why I offer this amendment.

I am offering the amendment for one simple reason. That is to allow the Secretary of Agriculture to waive cargo preference requirements in instances where the United States would otherwise lose the agriculture sale because of those requirements. So it gives some flexibility to the Secretary. It would not be in effect at all times. We would still have the general cargo preference in effect most of the time, as long as we can get the sales. But if cargo preference is going to cost us a sale, the Secretary would be able to waive the requirements within 10 days so that we would not lose that sale.

Mr. President, this will help get us out of the habit that we have been in on confusing our constituents, confusing our policies, confusing our trading partners with what our policy is, by undercutting the attempt to achieve one goal in a mad rush to achieve others. We have lost foreign trade opportunities. It benefits no one in the United States, especially not our ports, not our maritime industry. My amendment would simply keep us from shooting ourselves in the foot, so to speak, as we try to expand our foreign agriculture markets overseas.

Mr. President, I yield the floor.

Ms. MILULSKI. Mr. President, I rise in opposition to the amendment of the Senator from Idaho, but I wish for my remarks to be generally focused on the issue of cargo preference as a whole.

Mr. President, I am a Senator not only from Maryland, but I hope I am a Senator for Maryland. Many of my Marylanders earn a very honest living every day by getting up and going to work on Maryland farms, growing everything from corn and tomatoes to poultry and other important products.

But, Mr. President, I got my start in politics by representing the blue-collar workers in Baltimore, the shipyard workers and the dock workers, the people who get up and put on their socks every day and get out there and go to work. And I regret that the tone set by the senior Senator from Idaho in his remarks is really pitting one American worker against the other.

Mr. President, I happen to believe that when America provides any subsidy at all, it should be sure that all Americans have the opportunity to work and benefit from those Government investments. I really do not like the tone that is so harsh and so scathing and so critical when it comes to talking about America's merchant marine. I would never want to hear any disparaging remark made about an American farmer, particularly the small farmer who tills the soil so that people in our cities and throughout the world can eat.

So I hope, when we discuss this issue, we do not talk about it in a way, or conceptualize in a way, that pits one American worker against another.

Mr. SYMMS. Will the Senator yield?

Ms. MIKULSKI. No, I will not yield.

Let me talk about who these people are. They are people who build the ships, and they are people who sail the ships. Let me tell you at another time in American history how they were called tools of the labor bosses, or referred to as some kind of goon squad on the docks, which I resent deeply. Roosevelt called them the heroes in dungarees.

Mr. President, why did he call them the heroes in dungarees? Because during World War II, it was the gallant men in our merchant marines that kept our boys overseas fed, clothed, and with enough bullets and tanks to save Western civilization.

That is who those heroes in dungarees were. They sailed out on the North Atlantic or they sailed across the Pacific to back our Marines and to back our guys in the Army with some modest convoy protection. And many of them lie in the deep today, but they served their country. Nobody called them tools of the union bosses then, when they were trying to back our boys there.

And then once again they stepped forward and helped make sure we provided the cargo necessary to our people in Korea when we were fighting to save the 39th parallel. When our own generals did not have our act together, the American merchant marine stepped up once again to back the American military.

Then we were in that hell hole called Vietnam, and once again American merchant seamen put on their dungarees and where out backing our boys at the Mekong Delta and many of the other awful sites there in Vietnam. Now the war is over, so we think. Now we do not think we need them. We do not need those shipbuilders anymore.

We once had thriving shipyards in Baltimore. During World War II, we turned out one Liberty ship a week—one Liberty ship a week. And now we scrimp and scrap to try to get a little rinkydink repair work in the Bethlehem steel yard. I have to fight like the dickens to keep the Coast Guard yard open, and so on, and so here we have it.

Now we know that in the future if there is any type of military conflict, it will not be a big one. It will be like Panama; it will be regional conflict. And we know with our rapid deployment force, they cannot go another 30 days unless they are backed up by convoys. And guess who we are going to want to man those convoys? The heroes in dungarees; the heroes in dungarees that have been ridiculed and excoriated, and so on here. Let me tell you, I am for those heroes in dungarees in peacetime, as I am in wartime.

And now I want to say a word about labor. It is real fashionable now to bash labor. You know when we talk about the shipyard workers in Poland—and you all know my unabashed support for the shipyard workers in the docks—why is it OK to extol the free labor movement in a Gdansk shipyard, but ridicule it in Baltimore, MD?

Why is it some guy named Kowalewski in Gdansk, it is OK to organize him with another guy named Walesa, but it is not OK for a Kowalewski in Baltimore to organize and get a cargo preference bill. I do not get it, Mr. President, I do not get it.

I will tell you what I do get. I get jobs. If we want a free market, then let us eliminate all the subsidies, let us eliminate all the subsidies in agriculture, all the maritime. Let us go free market. But do not say it is OK to subsidize one group of Americans so they can have jobs and a living wage and a future for their children, and not talk about subsidizing the very industry we need for a sealift capacity.

When all is said and done, I want our American farms to prosper, and I want us to be able to export American food. They do not like us very much around the world these days, but they like us a lot better when we sail into some foreign port where there has been a famine or a plague, and we come in with American food, flying under an American flag. And when we can do that, we can all hold our heads up high and the taxpayers will think they have gotten a dollar's worth of services for a dollar's worth of taxes.

So, Mr. President, let me just say, regardless of how this debate goes, I hope we will conduct ourselves in a civilized manner, and at the very least, remember those heroes in dungarees, the men I respect.

Mr. President, I yield back the floor.

Mr. SYMMS. Mr. President, I just want to comment on one thing. No. 1, in no way would it be the intention of the Senator from Idaho to be critical or to disparage the brave men and women who participated in the U.S. American merchant marine.

No. 2, I say to the Senator from Maryland, as long as we have sales going, this amendment will have no

impact. But if we are going to lose the sales and the waiving of cargo preference can save the sales, the Secretary would have that flexibility to waive cargo preferences in order to get a sale.

That would mean, then, that all the shipyard dockworkers, loaders, longshoremen in the Port of Baltimore or the Port of New Orleans, or from wherever the wheat was going out or the rice or whatever the product was, that they would at least have the jobs. If they are loading the foreign vessel, they would at least have the work to load the foreign vessel, and the farmers would have that opportunity.

All I am trying to say is, in this Senate, all too often one week we talk about our lack of competitiveness and then the next week we refuse to let ourselves be competitive. That is all I am asking for. I think the issue is very clear.

I do not know how many speakers there are who wish to speak on it, but at the appropriate time, unless they are going to accept the amendment, and I take it they are not, I would be willing to vote right away.

The PRESIDING OFFICER. The Senator from Hawaii.

Mr. INOUYE. Mr. President, at the end of World War II, the merchant fleet of the United States ruled the seven seas. Over 70 percent of the ships that were afloat at that moment carried the American flag. We were the rulers of the world. If you wanted to carry cargo from any point in the United States to any other point on this Earth, the chances are you would have had to call upon a United States ship to carry your cargo. Those were heady days, Mr. President. We had just witnessed a great victory in both oceans and now we are prepared not only to rule this land but to send forth the message of democracy throughout the world.

Today, less than 5 percent of the cargo that leaves the United States in foreign trade, or comes into the United States, is carried by an American ship—less than 5 percent. Of the countries on this planet, we rank No. 14. Keep in mind, in 1945 the Soviet Union had no fleet whatsoever; they were all at the bottom of the sea. The British had no fleet; they were all at the bottom of the sea. The Japanese, absolutely no fleet.

The Chinese, none. We had the fleet. But we decided, in our moment of magnanimity, to give assistance to all. For example, we said, in the interests of a free economy, we will open up to bid the carriage of mail. No other country opens up its carriage of mail to bidding. Can you imagine the Soviet Union permitting some other country to carry its mail? Or the British permitting something other than the British fleet to carry their mail? We are the exception.

Who do you think carries our mail and has been carrying our mail for the last 12 years across the Atlantic? The Polish Steamship Co., because they underbid our companies. They were able to do so because the Polish Steamship Co. is owned by the Polish Government. As you know, at that time they did not have to worry about labor unions.

Mr. President, after many, many years, at the initiative of the U.S. Senate, we passed the minimal cargo preference law which says that any commodity paid for by the U.S. Government and taxpayers of the United States will be carried on American ships, but not 100 percent of it, just 50 percent. Fifty percent of our foreign aid that goes to Africa, Asia, South America is carried upon American ships—50 percent; the remaining 50 percent on foreign bottoms.

So we come across the strange sight where grain grown on American soil, paid for by American taxpayers, is carried on a Communist ship and shipped to Africa. So the stevedore unloading this grain looks up at the ship and says, "Thank you, Communists."

This amendment may sound fine, but it will only weaken the cargo preference law. I hope the Senate will study this very carefully. We have not had a hearing on this. It comes within the jurisdiction of the Merchant Marine Committee, but I am certain we have never had a hearing on that. Let us not weaken the fleet any further. Let us try to restore the grandeur of our fleet.

Now, if I may put on another cap, as chairman of the Defense Appropriations Committee, we do not have sea lift capacity to carry our troops overseas, if such becomes necessary, because we do not have the bottoms. If we pass this amendment, this will be the beginning of the final demise of the merchant fleet. Let us not do it, Mr. President. I think we have gone as low as we can afford to go.

I would like to see the day when American goods are carried on American ships. It need not be 100 percent, but at least 10 percent. Today it is less than 5 percent. Let us turn it around. Let us not go further backward.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, I do not intend to address the broader question of the merchant marine but rather the narrow issue that the Symms amendment brings before us. The issue is simply if there are agricultural sales to be made—in this case not humanitarian shipments, but commercial sales of American produce—and those sales cannot be made because American merchant ships are not available for the shipping of that produce and therefore we lose the sale to another country, the amendment calls for the Secretary of Agriculture to have the ability to waive the cargo preference situation and allow the ship of another country to carry off our exports in order that we make the sale.

In my judgment, Mr. President, it is a commonsense amendment, at least if we were to put on our other hats as people interested in the balance of trade of the United States, as indeed we are. We have argued, as a matter of fact, how important it is that America's exports increase, all exports of all sorts. We know, obviously, that agricultural exports bear a very large burden right now in terms of improving American exporting ability, in terms of improving our balance of payments with other countries. But it is a fact, Mr. President, that the failure of American ships to be available, the lateness factor, has been a very sizable problem for our commercial sales. It has even been a very sizable problem in the cargo preference clause with regard to the humanitarian food shipments that may be discussed in a later amendment.

For example, in the years 1988-89, U.S.-flagged liners lifted 22.5 percent of title II tonnage, the humanitarian aid tonnage, late under USDA's standards of lateness. Those standards were at least 30 days after the time the shipment was ready to be shipped. U.S.-flagged liners lifted 42 percent of U.S. title II tonnage late under the private voluntary organization standard of lateness.

The fact is, Mr. President, there were certainly not enough American merchant ships available at the time. It is not an argument against building more, against strengthening the industry, against strengthening the number of longshoremen available.

The fact simply remains that these vessels are not available. American sales are being lost. The intent, as I read the Senator's amendment, is that we cannot afford to lose agricultural sales; that in the event there are not American cargo ships available at the time, the Secretary ought to have the ability to waive the cargo preference and to get on with the shipping so that we make the sale.

I hope the majority of Members will agree with that logic, with the common sense at least, and would likewise trust that the Secretary will exercise good judgment in this respect. That is why the amendment is centered upon him in determining what is best in the national interest and to act accordingly.

For these reasons, Mr. President, I suggest that this is a logical amendment, an amendment that will boost our exports, that will reduce our trade disadvantages and our balance of trade situation, vis-a-vis the world, and that the amendment should be adopted. I yield the floor.

The PRESIDING OFFICER (Mr. KOHL). The Senator from Idaho.

Mr. SYMMS. Mr. President, I thank the distinguished Senator from Indiana, the ranking Republican on the committee, for his remarks. I quite agree with him, and I appreciate his insight into what this Senator is trying to accomplish with this amendment.

This in no way is going to hurt anybody unless we lose a sale. And then it will simply mean that there will be a little bit of flexibility to maybe help make us a little more competitive.

We have had the problem in the Pacific Northwest where in some cases American bottoms were not available. We could not get the ships; therefore, we lost the sales. In some cases, because of the price, we lost the sales. It just adds one little, teeny, narrow, as the Senator from Indiana said, smidgeon of flexibility which might help wheat producers or rice producers or other producers of exportable agricultural products to be just a little more competitive.

We are not talking about the competing, necessarily, of American longshoremen versus New Orleans, or Maryland versus Seattle or Portland. We are talking about the United States competing against Canada, competing against Australia, Argentina, Brazil, other wheat-producing countries, Western Europe.

I hope the Senate will accept the amendment. I am prepared to go to a vote on the amendment. I assume the committee is not prepared to accept it. If they are prepared to accept it, I will not ask for a record vote. Otherwise, I am prepared to ask for the yeas and nays.

What is the intention of the leadership?

Mr. PRYOR. Mr. President, I was just going to ask a couple questions about this, if I might, of the distinguished Senator from Idaho.

Mr. SYMMS. Certainly. I yield the floor.

Mr. PRYOR. Mr. President, I would like to ask my very good friend, the Senator from Idaho, about cargo preference. I must say I am temporarily managing the bill for Senator LEAHY. He will be back momentarily. I am trying to educate myself. It seems like every few years we have a little squabble here on the floor about cargo preference and it is not my bag. Let me, if I might, ask this question or two.

It is my understanding, and please correct me if I am wrong, that cargo preference only applies in an instance of Public Law 480, a Food for Peace Program transaction. Am I correct in this?

Mr. SYMMS. For the most part, I think that is correct, but I might ask the Senator from Indiana, who has far more expertise in this than I have.

Mr. PRYOR. If I might also ask another question; it is my understanding that under the GSM Program, also under the EEP Program, that cargo preference is not applicable in these cases; am I correct?

Mr. SYMMS. I am not sure I know the answer to that.

Mr. PRYOR. Mr. President, what I am trying to ascertain is, do we have any example of a loss of an agricultural sale in the Food for Peace Program? If there is, I would like to know about it. I do not know that there ever has been a loss of a sale because of the unavailability of American ships.

Mr. INOUYE. Will the Senator yield?

Mr. PRYOR. I will be glad to yield.

Mr. SYMMS. I say to my colleague we lost sales from the Pacific Northwest because of the cargo preference and the shortage of ships. Those sales may have been gained by the Port of New Orleans, the Senator would have to admit, which does not quite address the other part of my amendment, which addresses the competitive side and the flexibility of the Secretary.

Mr. PRYOR. Mr. President, I think some true authority is about to rise and answer some of these questions. At this point, I will yield the floor.

The PRESIDING OFFICER. The Chair recognizes the Senator from Indiana.

Mr. LUGAR. Mr. President, let me suggest—and I will yield to others who have additional opinions on this—essentially the sales we are talking about are all Public Law 480 sales. But there are title I sales that are subsidized sales, and title II, the donated sales.

In some of the argumentation I gave, I referred to title II. These are the cases where the PVO, the private volunteer organizations, felt that lateness was present 44 percent of the time, whereas USDA said 22 percent of the time, nonavailability. Subsidized sales are different categories all together, but all does come under the Public Law 480 situation.

Mr. INOUYE. Will the Senator yield?

Mr. PRYOR. Mr. President, I do not think that I retain the floor. I think the Senator from Idaho retains the floor.

Mr. SYMMS. I yield the floor.

The PRESIDING OFFICER. The Senator from Hawaii.

Mr. INOUYE. Mr. President, I believe the Senator from Indiana is correct. These are Public Law 480 type sales. But the word "sales" may be the wrong word to use because the foreign country is not buying that aid, they are receiving that aid as gain from the United States. We taxpayers are buying the grain from the farmer, and it is being shipped—50 percent of that is being shipped on American bottoms.

So the United States is buying from America. We have never lost the sales.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Louisiana.

Mr. BREAUX. Mr. President, perhaps Members are watching on their TV monitors. The amendment of the Senator from Idaho really goes to the heart of the Cargo Preference Program for agricultural exports that the United States makes. It is important to bear in mind that this is not a unique program to the United States. There is something like 55 countries around the world that are engaged in agricultural exports, and of those 55, 52 of them have cargo preference programs for either all of their cargo that they export, or certainly a large percentage of their cargo.

I think it is important, as we talk about cargo preference, to understand how much we are talking about.

I happen to serve as chairman of our Merchant Marine Subcommittee. In that capacity, I did not even realize how little we were talking about. This chart shows how little of agricultural exports that this country makes actually is covered by the cargo preference law. This chart clearly shows that of all of the food that is being exported in America, only this little small sliver, about 3.2 percent, goes out under any kind of a cargo preference. All of the rest represents agricultural products that are exported every year from the United States that goes on any ship that the shipper wants to send it on.

In addition to that, none of the commercial transactions has to go out under any kind of a cargo preference. They can ship it in a rusty bucket. That is the cheapest they can possibly find and cross their fingers and hope it gets there some kind of way.

The point is that of all the products we ship, only 3.2 percent, as an average, have to go out under any kind of a cargo preference, and none of the commercial exports that we send out is covered by the cargo preference law. Commercial transactions are free to ship it anyway they want.

My point is that, No. 1, we are not talking about a lot of the cargo. No. 2, almost all of the countries that export agricultural products in the world have a cargo preference program. They have it for the same reason we have it, Mr. President: In order to encourage a healthy merchant marine that a country may need in times of a national emergency. This little 3 percent, I daresay, does not adversely affect agricultural exports in this country at all.

The third point I would like to make is that when the consideration of the farm bill in 1985 was underway some compromises were reached with members of the Agriculture Committee as well as those who are interested in ag-

riculture. I represent the State of Louisiana, a very large agricultural State. The largest industry in Louisiana is, indeed, agriculture. We also have ports, and they are very important to our economy as well.

But the point I would make at this point is that when we decided in 1985 that we were going to have extra export programs to encourage additional agricultural exports, a compromise was reached. The compromise was very simple—that none of these blended credit programs where we use a combination of money and assistance to allow other countries to buy agricultural products from the United States would be eligible or required to be shipped under cargo preference.

The other half of that compromise, Mr. President, was that we were going to increase the amount of cargo preference on our food aid commodities that were being sent to 75 percent from the current level at that time of 50 percent, but that additional 25 percent was not going to even come out of the budget of the Department of Agriculture. It was going to come out of the budget of the Department of Transportation.

Therefore, an effective, solid, and I think fair compromise was reached which is being attacked today. I would note that the attack is not coming from the members of the Agriculture Committee who participated in that compromise. I think they are, indeed, living up to the letter and the spirit of the compromise that was reached back in 1985, that I think is working, indeed, very well.

It is interesting that some people who attack cargo preference, our colleagues and our friends from the agriculture community, sometimes say, well, we should not be subsidizing transportation.

I can argue that we are giving help and assistance to the farmers of America. Some would even argue that that is subsidizing agriculture in America. I do not think it is bad. I think it is good. I think the farm programs work. They produce a healthy farmer, a healthy agriculture economy, but we cannot argue that it does not come without some Government assistance and Government participation to ensure a healthy farm economy. This little 3 percent sliver of all of the farm products that are exported from the United States is also a Government-aided program to help another segment of our society, and that is the transportation segment of our society.

Another point, Mr. President, I think bears consideration. I somehow feel that something is wrong if we have a load of soybeans being shipped, say, to the Soviet Union and it comes in in a Soviet ship. I think it somehow loses its identity. Somehow when they unload a Soviet vessel, people from their country feel it is their grain and their materials that are being off loaded. I think it says something about the success of this country economically and commercially and says something about our farm economy when an American ship carrying an American flag with an American crew pulls up in that Soviet port and off loads American grain. It makes a statement about the success of this country, and I think it is one that we should continue to make.

That little 3 percent of the total amount helps us make that statement, and it helps us maintain a strong U.S. merchant marine. And it, indeed, helps us maintain a strong agricultural community in this Nation. This program is vital to the survival of the maritime industry. To say we are going to help the agriculture community in this country but while we do that we are going to kick the maritime community in the teeth I think is not good public policy for this country.

It is working. It is a compromise and we should not be trying to fix something that simply is not broke. It is a program of which I think we can all be proud of, I hope my colleagues will reject any effort to weaken or destroy the cargo preference for agricultural products.

I yield the floor.

Mr. COCHRAN. Mr. President, I rise to compliment the distinguished Senator from Louisiana for his statement explaining the compromise that was reached as a part of the 1985 farm bill between maritime interests and agriculture interests.

The compromise put at rest some of the controversy that had swirled around the application of the Cargo Preference Act to certain agriculture shipments.

As Senators will remember, at that time there was litigation being undertaken to try to define through court decisions, the extent to which the Cargo Preference Act applied to certain blended credit or concessionary sales shipments of the United States. It was clear that the law applied to certain Public Law 480-type shipments, but the new export enhancement programs were sort of up in the air as to whether or not they would be shipped under the Cargo Preference Act. Maritime industries were claiming they were covered and the Department of Agriculture and the Maritime Administration had to allocate a certain percentage of those shipments to U.S.-flag vessels. The agriculture interests and the Department of Agriculture specifically argued that cargo preference did not apply, and so there was this disagreement, and very bitter controversy which was being litigated. A district court judge ruled that in certain cases the maritime industry was correct.

One result of this ruling was that the Department of Agriculture began backing away from using the tool of export enhancement because of the threat of litigation or other controversy about whether or not the shipments would be by U.S.-flag vessels.

This is one illustration why the Congress in 1985 tried to put this issue to rest and agree in the Senate, as we did by a vote of 70 to 30, on a compromise arrangement which phased in a higher percentage of shipments under cargo preference for Public Law 480 programs, defined other programs that would not be covered by cargo preference, and then give effect to that compromise in the 1985 farm bill by statutory law so there would be an end to the litigation, and an end to the bitter controversy over this issue.

I am afraid, if the Senate adopts this amendment, we will begin unraveling that agreement and that compromise and the statutory solution to the problems which have been swirling around the Cargo Preference Act since 1954. It has been an issue of some very sharp disagreement and bitter controversy, but I think everybody would agree that during the past 4 years under the compromise there has been less difficulty and less uncertainty in the departments that have jurisdiction over these laws than ever before.

So why go in and start tampering with this section of the bill and try to improve upon an agreement that really is working very well for American agriculture and the U.S. maritime industries and our customers all over the world. We have seen in the last year, Mr. President, U.S. agriculture exports rise to a value of $40 billion. This is good for our economy, good for our farmers, and good for our shippers and U.S. maritime interests.

We are on the right track in dealing with some of these problems. I know there is still a lingering concern among some Senators that this agreement could be improved. It might be improved in some way. But I would hate to see us just impulsively adopt an amendment that might sound good.

I suggest the Senate would be wise to reject the amendment.

Mr. GRASSLEY addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Iowa.

Mr. GRASSLEY. Mr. President, for the benefit of my colleagues, and not just addressing the Symms amendment, I want to quote from an OMB staff review, May 1982, entitled "U.S. Maritime Programs and Policy." The title, cover page, refers to the "Office of Management and Budget, Special Studies Division, Economics and Government."

I am quoting from the executive summary. I am just going to speak to the major conclusions:

The objectives established in the Merchant Marine Act of 1970 of maintaining or increasing the market share for U.S.-flag liner, non-liner and tanker operations have not been achieved. The U.S.-flag share of the non-liner vessel markets continued to decrease through the 1970's. While the U.S. share of liner shipping as a percentage of total liner tons increased over the 70's, the U.S. share of the total value of liner cargo decreased from 28 to 27 percent. Also, during this period the U.S. share of the world liner container fleet tonnage dropped from 45 to 20 percent.

The second major conclusions:

The objective of stimulating efficiency in the U.S. merchant marine industries has not been achieved. U.S. crew sizes aboard subsidized vessels continue to exceed the crews used by major foreign maritime industries on comparable vessels.

In addition, even after establishing a wage index system in the 1970 Act to bring down crew costs relative to other U.S. workers, U.S. crew wage costs continue to be the highest in the world, often twice as high as the foreign competition. U.S. shipbuilding costs continue to be among the highest in the world, with a cost differential between U.S. and foreign costs exceeding 50 percent for many commercial vessels.

The third conclusion:

Economic justifications for Federal assistance to the merchant marine industries are weak. Balance of payments, employment and public revenue benefits derived from the subsidy programs are all negligible when viewed in the context of the national economy and contributions to the national economy of non-subsidized industries. While the industry and MARAD have attempted to quantify economic benefits, fundamental flaws of past analyses have not been addressed. Recent analyses fail to distinguish the proportion of the direct and indirect economic benefits that are attributable to the subsidies. In addition, they do not take into account the opportunity costs or potential benefits foregone as a result of resources being utilized in the shipping and shipbuilding industries. When all factors are considered, little evidence is available on economic grounds which would justify the provisions of public support to the shipping and shipbuilding industries.

The fourth conclusion:

National security arguments provide little justification for provision of public assistance to the merchant marine industries.

This will probably address maybe some of the points that Senators INOUYE and MIKULSKI make.

Navy ship construction, private ship overhaul and repair work are sufficient to maintain the shipbuilding and repair mobilization base determined to be required in case of a national emergency. For the U.S. shipping industry it is somewhat more difficult to translate the National Security findings of this report into specific recommendations regarding public assistance. Most of the major arguments advanced in support of assisting the U.S. merchant marine for national security reasons are seriously flawed. In a short term war (less than 30 days), the U.S.-flag merchant marine fleet as currently configure is not likely to have an impact on the outcome because vessels do not have the speed nor are they the type of vessels likely to be required. In a longer term conflict, the presence of a U.S.-flag fleet does provide a margin of safety not exactly duplicated in non-U.S. sources of sealift. However, there is no basis for believing that non-U.S. flag sealift resources would not be available for U.S. use in times of war or peace. Much of the world's free world tonnage is controlled by U.S. allies. The seriousness of the risks the merchant marine may assist the nation to avoid are impossible to measure with accuracy. While there is little evidence that these risks are very great, ultimately, a willingness to assume any national security risk is a question of political judgment.

This is the last conclusion reached in this report.

There is a need for change in the current structure of Federal assistance to the U.S. maritime industry. It is the recommendation of this study that the Department of Transportation review and redefine national goals and objectives for the U.S. maritime industry. If a direct subsidy program is advisable, approaches to improve the efficacy of the current program must be examined.

As I stated twice before in the last 4 or 5 days, Mr. President, I am saying to my colleagues that there may be a subsidy legitimate for the maritime industry. It is very hard to account for that subsidy. It is very difficult to get figures for the total. You might get figures for parts of it. But for the total cost, it is very difficult to get it.

None of us are innocent of voting for subsidies in this body because this whole agriculture bill is filled with those types of subsidies. All I am saying to those people who support subsidies for the maritime industry is that we ought to get those costs up front so that they can be accounted for.

I am also suggesting that based on some testimony before the House of Representatives by Vice Adm. Kent Carroll, the value of the subsidy for our maritime programs for national security is questioned.

That is not CHUCK GRASSLEY saying this. This is Vice Adm. Kent Carroll.

There may again be a legitimacy for our maritime industry for national defense purposes. But we have been emphasizing that for several decades. We have been losing our capability. There is a suggestion of about only 200 ships out of 568 that are capable of any value for defense purposes.

So I think we need to take that into consideration. You will find that some of the vessels that are used to ship the grain that is involved—that is the question behind the amendment by Senator SYMMS because his amendment deals specifically with the shipment of grain—are not at all satisfactory for the shipment of military equipment.

So we ought to think in terms of, yes, maybe there is a justified reason for maintaining the subsidy. The costs ought to be open, budgeted up front; it ought to be considered by this body on the same basis that we consider costs for agriculture programs. Second, if national security is one of the goals of the subsidy, then we have not been spending that money very well.

I just bring this to my colleagues' attention with the hope of getting them to consider, as I am forced to consider often, certain agriculture programs, the value of them, and whether or not they need to be adjusted; fine tuned.

We are doing that in this agriculture bill that is before us right now. I think that sometime down the road, and it can be now, but sometime we ought to consider those reviews on the same basis. We cannot accept the position taken by the Senator from Mississippi [Mr. COCHRAN] that a compromise would work out in 1985, and do not question that compromise at any time in the future.

The whole 1985 farm bill was a compromise. But we go through the reauthorization of a farm bill now, and in the future we will, and the annual appropriations are reviewed every year. That whole 1985 farm bill was a compromise, but it does not keep us from reviewing it and fine tuning it. That is what we are about.

I yield the floor.

Mr. BREAUX. Will the Senator yield for a question?

Mr. GRASSLEY. I am willing to yield. I hope I can answer your question.

Mr. BREAUX. The Senator quoted a number of facts and statistics from a study. No. 1, can the Senator tell the Senate how old the study is, and what happened since the date of the study regarding the cost differential?

Mr. GRASSLEY. I did not try to hide the date of the study. I pointed out that it was in a May 1982 U.S. Maritime Programs and Policy. It is an OMB staff review, Office of Management and Budget, Special Studies Division, Economics and Government. That is from the cover page.

Mr. BREAUX. If the Senator will address the second part of the question. Since it is an 8-year-old study, can the Senator tell the Senate what happened with those costs that he has cited over the last 8 years, because our indication indicated by the chart here is that the differential in shipping on a U.S. vessel as opposed to a foreign vessel continued dramatically to come down and become closer to commercial costs; is that correct?

Mr. GRASSLEY. That is true. We are still losing market share. Our percentage of world business for the maritime industry is going down. So there are still problems, even with that decreasing cost, I say to the Senator from Louisiana. There are still problems, and we have to do something to be more competitive.

Mr. SARBANES addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Maryland.

Mr. SARBANES. I rise in opposition to the amendment——

Mr. LEAHY. Will the Senator yield a moment?

Mr. SARBANES. Yes.

Mr. LEAHY. For the purposes of scheduling, I think most people have spoken. It is coming close to time for a vote. Obviously, we do not want to cut off anybody. I wonder if the Senator might give us an idea about how long he is going to be.

Mr. SARBANES. A couple of minutes. Is the Senator going to move to table?

Mr. LEAHY. I understand there is going to be a tabling motion. I did not want to cut the Senator off, but he will be 3 minutes?

Mr. SARBANES. I will be very brief. I am anxious to help the chairman and ranking member move the business of the committee along, and I am rising to defend what the committee has done and to oppose this effort to change its handiwork.

Mr. President, the distinguished Senator from Iowa said there may be legitimacy. Let me say that in my view there is legitimacy. We have had an arrangement here; let us be frank about it. But this bill is $18 billion in farm payments. We are trying to get just a crumb off of that table in order to help sustain the American merchant marine.

The way we are proposing to do it is the way other countries all around the world do it to our disadvantage. They have very complicated arrangements for carriage in their own bottoms. That is how a lot of them have been able to sustain their merchant marines, and they maintain it not only for national security purposes, but economic security purposes as well.

We face a difficult problem with an erosion in the strength of our merchant marine. Right after World War II, it was tops in the world. Now we know the figures of what happened to it. One way of sustaining it is to assure it a certain amount of carriage with respect to cargo. That is what this arrangement has done over the years.

To come here now and to seek to drop it and to alter it in such a way as to have a negative impact on our ability to help them keep in operation, an important sector of our economy, seems to me to be a very counterproductive thing to do.

I need not recount the history of the importance of the merchant marine in security terms, but one of the arguments that has not been adequately developed, which I think we will increasingly focus on in the years to come, is its importance in economic security terms, not only in defense security terms, but also in economic security terms. And it is very clear that a number of other major powers in the world recognize this importance and make efforts to sustain their merchant marine, including using in one form or another a cargo preference approach, the requirement that a certain amount of the tonnage moving in and out of that country be carried in the flagships of that country.

That is all this arrangement requires, that a certain percentage of the goods to be shipped be carried in American flagships. It is one clear way of sustaining an American shipping industry. I submit to any Member of the Senate that if one seriously contemplates or entertains the total loss of such a shipping industry and then thinks of what the impact of that will be on the operations of the American economy, and on the American position internationally, both in defense security and economic security terms, it is a development that no one in this body would wish to see happen.

This arrangement has prevailed for a number of years. I think it is justified clearly on its merits. I have difficulty understanding how those who are in this very legislation receiving—because it is judged to be to our national interests. I am not quarreling with the underlying premise of the bill as it provides support for the agricultural sector, but why we now have this effort to deny some modicum of support to the shipping sector is beyond me.

I very much hope this amendment will be defeated.

Mr. BREAUX. Mr. President, the Senator from Maryland has made a number of very wise observations about the program.

I will conclude my comments by saying that it is important for all of our Members to understand the cargo preference we are talking about, that none of it applies to any commercial exports of agricultural products. We are only talking about using our ships for exporting agricultural products that go out under our export assistance programs. It is not affecting, in any way, commercial sales. They can go out on any ship they want.

If using a Government program, and to purchase U.S. agricultural products, at least 3.2 percent should be required to go out on American vessels.

I have discussed this with the distinguished senior Senator from Mississippi, and I do not know if there are any other speakers. I am prepared to move to table the amendment of the Senator from Idaho unless someone seeks recognition.

Mr. HOLLINGS. Mr. President, I rise in opposition to the amendment being offered today that would decrease the percentage of food aid cargo that is subject to the cargo preference requirements—that is cargo that must be carried on U.S.-flag vessels. I support maintaining the current U.S. cargo preference requirements as those requirements were agreed to by agriculture and maritime interests in the cargo preference compromise of 1985.

The 1985 compromise provided that the amount of food aid cargo that would be subject to cargo preference would be increased from 50 to 75 percent. In exchange for increasing the amount of cargo subject to cargo preference, which benefited the maritime interests, certain export programs of the Department of Agriculture and the Commodity Credit Corporation were excluded from the requirements. The result of excluding those programs from cargo preference was that hundreds of millions of dollars of cargo was exempted from any cargo preference requirements.

The cargo preference compromise has worked well for both agricultural and maritime interests. The groups that supported the compromise in 1985 continue to support the compromise today. I fully support both the agricultural and maritime interests and their agreement on the issue of cargo preference. I fail to see what purpose would be served by unravelling that compromise at this time.

I believe we should set this issue aside and get on with the business of the farm bill which is of great importance to my State. Cargo preference has not been changed by the farm bill that is before us. I see no reason to insert into this debate on the farm bill an issue as contentious as that of cargo preference, especially when there is a compromise in place that all parties still ascribe to.

Mr. President, I, therefore, oppose any change in the current cargo preference requirements and urge that we return to those issues germane to the farm bill.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, I yielded a moment to the distinguished Senator from Mississippi. But first I want to make a couple of points.

First of all, this has been a spirited discussion on cargo preference. There are, at least to my knowledge, two amendments that will arise later in the course of the farm bill debate that go back to the cargo preference situation.

I would alert Senators, however they feel on the issue, that the committee debated, and the Senate ultimately will debate a Great Lakes preference amendment in due course, and/or an amendment that would reduce from 75 percent to 50 percent the percentage of humanitarian aid shipments coming under the cargo preference requirements.

So those two are still coming down the pike.

Second, the Senator from Louisiana is correct that we are now talking about straight commercial sales. But under title I the subsidized sales do in fact involve profit to some Americans and companies. Granted there is a sub-

sidy and it is not a straight sale. But, as the Senator from Hawaii observed, sales need to be defined more correctly; title I is not a 100-percent commercial sale, but it is a subsidized sale in which there is some benefit.

Having said that, my impression is that the distinguished Senator from Mississippi is prepared to make a motion, and I will yield the floor.

The PRESIDING OFFICER. Has the Senator from Louisiana made a motion?

Mr. BREAUX. There is a motion to table before the Senate, and I reassert it.

The PRESIDING OFFICER. The question is on the motion to table.

Mr. COCHRAN. Mr. President, my understanding is the Senator from Idaho wanted to have the yeas and nays, so I ask for the yeas and nays in his behalf.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Louisiana to lay on the table the amendment of the Senator from Idaho.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Massachusetts [Mr. KENNEDY] is necessarily absent.

I further announce that, if present and voting, the Senator from Massachusetts [Mr. KENNEDY], would vote "yea."

Mr. SIMPSON. I announce that the Senator from New York [Mr. D'AMATO] and the Senator from Utah [Mr. GARN] are necessarily absent.

I further announce that the Senator from South Dakota [Mr. PRESSLER] is absent due to a death in the family.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 62, nays 34, as follows:

[Rollcall Vote No. 169 Leg.]

YEAS—62

Adams	Gore	Moynihan
Akaka	Gorton	Murkowski
Bentsen	Graham	Nunn
Biden	Hatfield	Packwood
Bingaman	Heflin	Pell
Bradley	Heinz	Pryor
Breaux	Hollings	Reid
Bryan	Inouye	Riegle
Bumpers	Jeffords	Robb
Burdick	Johnston	Rockefeller
Byrd	Kerry	Sanford
Cochran	Kohl	Sarbanes
Cohen	Lautenberg	Sasser
Cranston	Leahy	Shelby
Daschle	Levin	Simon
DeConcini	Lieberman	Specter
Dixon	Lott	Stevens
Dodd	Mack	Warner
Ford	Metzenbaum	Wilson
Fowler	Mikulski	Wirth
Glenn	Mitchell	

NAYS—34

Armstrong	Durenberger	McCain
Baucus	Exon	McClure
Bond	Gramm	McConnell
Boren	Grassley	Nickles
Boschwitz	Harkin	Roth
Burns	Hatch	Rudman
Chafee	Helms	Simpson
Coats	Humphrey	Symms
Conrad	Kassebaum	Thurmond
Danforth	Kasten	Wallop
Dole	Kerrey	
Domenici	Lugar	

NOT VOTING—4

D'Amato	Kennedy
Garn	Pressler

So, the motion to lay on the table the amendment (No. 2338) was agreed to.

Mr. INOUYE. Mr. President, I move to reconsider the vote.

The PRESIDING OFFICER. The motion to reconsider has been made.

Mr. BREAUX. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. There will be order in the Senate. The chair recognizes the Senator from Illinois.

Mr. DIXON. Mr. President, I want to say on behalf of many Senators from the Midwest, representing the so-called Great Lakes States area, that the record will show that we voted to table the amendment offered by my friend from Idaho. We have done that, Mr. President, in the distinct understanding that negotiations and discussions continue between our Senators and others, who are discussing at this point in time an accommodation by which there will still be shipping for the Great Lakes as part of the agreement that is ultimately entered into on this farm bill. That is our understanding, Mr. President.

While an accommodation has not yet been reached may I say the distinguished senior Senator from Hawaii, who I see is on the floor, some years ago when this last debate was carried on for some days, was very accommodating. Some of us from the Midwest continue to be in the position of expressing, from time to time, our deep appreciation to the senior Senator from Hawaii for the accommodation some years ago.

We want some kind of accommodation to continue. That is in discussion now, Mr. President. But I know I speak for the occupant of the chair, my friend from Ohio, my colleague from Illinois, my friend from Michigan, and others I visited with about this issue. We have supported this motion to table because of our belief that an accommodation for the Great Lakes will take place. Were it not for that, Mr. President, I want it clearly understood I would not support the cargo preference laws if they continue to work against the interests of the Great Lakes, against the interests of Midwest agriculture, and against the interests of our States.

The PRESIDING OFFICER. The chair recognizes the Senator from Ohio.

Mr. GLENN. Mr. President, I seek recognition just to associate myself with the remarks of the distinguished Senator from Illinois. He stated our situation correctly. We hope we can work out an accommodation on this. The staffs are meeting. We are going to meet this evening on this. We hope we can have some agreement later tonight, at the very latest early tomorrow morning. This is very important to our part of the country. I just wanted to associate myself with the remarks of my distinguished colleague, Senator DIXON.

The PRESIDING OFFICER (Mr. WIRTH). Who seeks recognition? The Senator from Idaho.

Mr. SYMMS. If the majority leader seeks recognition, I will yield the floor to him.

The PRESIDING OFFICER. The Chair recognizes the majority leader.

Mr. MITCHELL. Mr. President, I will momentarily propound a unanimous-consent request in an effort to schedule amendments for the next 3 hours, to permit those Senators who wish to attend other events—and I have had several requests in that regard—to do so, which would result in a 3-hour window, with votes occurring shortly after 9 p.m. It will involve one amendment by the distinguished Senator from South Dakota [Mr. DASCHLE] with an hour and a half time agreement; followed by an amendment by the Senator from Montana [Mr. BAUCUS], also with an hour and a half time agreement.

As soon as I get the information regarding those amendments I will propound that request. It will be momentarily. If accepted, the effect will be that there will be a window of about 3 hours with votes occurring shortly after 9 p.m. Senators should be aware we will continue late in the evening as previously announced and there will be further amendments thereafter. I want to commend the managers for the progress being made and the cooperation of Senators. Good progress has been made and I think we will, hopefully, be able to finish this bill in the near future.

Mr. LUGAR. Will the leader yield for a question?

Mr. MITCHELL. Yes, sir.

Mr. LUGAR. Will the leader include in his order——

Mr. DIXON. May we have order, Mr. President. We cannot hear.

The PRESIDING OFFICER. The Senator is correct. The Senate will be in order. Senators wishing to converse will please retire to the Cloakroom.

Mr. LUGAR. Mr. President, I wanted to request of the leader information as to whether his order might include two amendments by the distin-

guished Senator from South Dakota, first an amendment I understand which will be of a fairly short duration, and then a second amendment that would have an hour-and-a-half time agreement. Finally does the order include a third piece of business, the amendment by the Senator from Montana which would be a 2-hour amendment. Is that correct?

Mr. MITCHELL. I have been advised that the Senator form Montana has agreed to an hour and a half. He did not tell me that himself.

Mr. LEAHY. I advise the distinguished majority leader, Mr. President, if he will yield on that point, I discussed this with the distinguished Senator from Montana. He assured me an hour and a half will be agreeable to him.

Mr. DIXON. Will the manager yield? Or the majority leader yield? I just wanted to say to the majority leader, while my friend, the distinguished senior Senator from Iowa, is on the floor, that I am cosponsoring with him, along with my distinguished colleague from Illinois, a flexibility amendment. I do not know if the managers have talked with him, but speaking for this Senator, I am prepared to go at any time and with a reasonably short span of time. I cannot speak for my friend from Iowa, but I should think in not more than an hour, we ought to be able to dispose of that. I wonder what his view is of that. Maybe we can do it tonight.

Mr. GRASSLEY. I would like to talk to the Senator privately about it.

Mr. DASCHLE. Will the majority leader yield?

Mr. LEAHY. If the majority leader will yield to me a moment, while the Senator from Iowa and the Senator from Illinois are discussing this privately, I wonder if they might also consider a half-hour time agreement evenly divided.

Mr. DASCHLE. I do not know if the Senator is referring to my amendment. I ask the majorty leader as he propounds the unanimous-consent request. I do not expect an amendment to be offered as an amendment to my amendment, but I would prefer that no amendments be offered and that that be part of the unanimous-consent request.

Mr. MITCHELL. It is my intention to include that.

Mr. LUGAR. May I ask a question of the leader? With regard to the second amendment by Senator DASCHLE dealing with target prices and limits for corn and wheat, clearly I would like to reserve the right to offer a second-degree amendment with regard to the other two program crops. So I would appreciate there not being a unanimous-consent request that precluded that situation.

Mr. MITCHELL. Obviously, any Senator can object to an agreement. I gather what I have now been told is that if I include a prohibition on second-degree amendments, the Senator from Indiana will object, and if I do not include such an agreement, the Senator from South Dakota will object. It seems to me, Mr. President, a futile gesture for me to propose the agreement until the Senators have an opportunity to talk.

Mr. LEAHY. Mr. President, can we have order? I am standing 2 feet from the leader and I cannot hear him.

The PRESIDING OFFICER. The Senate will be in order.

Mr. MITCHELL. In light of this, Mr. President, might I suggest that the Senator from South Dakota and the managers discuss the matter. As soon as they reach a resolution of that, I will propound the request. I think that probably best serves the interest of the Senate.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, I regret to inform Senators that we have been unable to reach an agreement on the scheduling of amendments for the next few hours that would have permitted a window of time within which Senators could have been assured that no votes would occur.

Accordingly, I think so as not to delay consideration any further, it is best that we proceed with consideration of further amendments.

It is my understanding that Senator DASCHLE is prepared to offer an amendment regarding payment limit with respect to which there is no controversy, and it will be accepted. That will take just a few moments.

Then Senator DASCHLE will be willing to offer an amendment on target prices for wheat and feed grains with respect to which there is controversy and no agreement is possible. So we will just start on that amendment and we will have to proceed.

Senator BAUCUS had been prepared to offer his amendment. I am going to ask consent simply when he offers his amendment there be 90 minutes equally divided in the usual form, with no second-degree amendments in order thereto. That does not lock in a time. It simply says when he does bring it up, it will be under a time agreement, which I understand is acceptable to all concerned.

Mr LUGAR. That arrangement is correct.

Mr. MITCHELL. Accordingly, Mr. President, I ask unanimous consent that when Senator BAUCUS offers his amendment on target prices, there be 90 minutes equally divided in the usual form with no amendments in order thereto.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. MITCHELL. That is the extent of the agreement which we have been able to obtain, and I think in order not to further delay the Senate, it is best that we simply proceed now to consideration of the amendments by Senator DASCHLE, and as the debate progresses we will attempt to keep Senators informed on the schedule for the remainder of the evening.

I thank my colleagues for their time and consideration.

I yield the floor.

AMENDMENT NO. 2339

(Purpose: To Strengthen the Payment Limitation Provisions)

Mr. DASCHLE. Mr. President, I have an amendment at the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from South Dakota [Mr. DASCHLE] proposes an amendment numbered 2339.

Mr. DASCHLE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 328, between lines 12 and 13, insert the following new subsections:

(d) IRREVOCABLE TRUSTS.—Section 1001(5)(B)(ii) of such Act (7 U.S.C. 1308(5)(B)(ii)) is amended by adding at the end the following new subparagraph:

"(III) Notwithstanding any other provision of law, to be considered a separate person under this section, an irrevocable trust (other than a trust established prior to January 1, 1987) must not allow for modification or termination of the trust by the grantor, allow for the grantor to have any future, contingent, or remainder interest in the corpus of the trust, or provide for the transfer of the corpus of the trust to the remainder beneficiary in less than 20 years from the date the trust is established except in cases where the transfer is contingent on the remainder beneficiary achieving majority or is contingent on the death of the grantor or income beneficiary.".

(e) MINIMAL BENEFICIAL INTERESTS.—Section 1001A(a)(2) of such Act (7 U.S.C. 1308-1(a)(2)) is amended by striking "10 percent" and inserting "5 percent".

(f) INFORMATION.—The Food Security Act of 1985 is amended by inserting after section 1001C (7 U.S.C. 1308-3) the following new section:

"SEC. 1001D. INFORMATION.

"(a) EXCESS PAYMENTS TO INDIVIDUALS.—

"(1) DEVELOPMENT OF DATA.—The Secretary of Agriculture shall develop a database pertaining to individuals receiving direct payments in excess of the statutory limitation of $50,000 prescribed in section 1001(1).

"(2) PUBLICATION OF REPORT.—Not later than 180 days after the date of enactment of this section, and annually thereafter, the Secretary shall publish a report based on the information collected under paragraph (1) that includes—

"(A) the percentage of individuals eligible for direct deficiency payments receiving payment in excess of $50,000;

"(B) the percentage of direct deficiency payments in excess of $50,000 made to individuals attributed by principal crop;

"(C) the amount of direct deficiency payments by commodity that would have been made in the absence of any payment limitations;

"(D) the names of individuals receiving direct deficiency payments in excess of $50,000, and the total amount of payments received in the applicable year by each such individual;

"(E) a description of the bases on which individuals are eligible to receive the excess payments;

"(F) the percentage of eligible individuals who decline to participate in commodity programs because of the limitation on direct payments; and

"(G) other pertinent information, including any recommendations for changes in law or regulation to provide for equitable administration of payment limitations, as determined by the Secretary.

"(b) VIOLATIONS.—

"(1) IN GENERAL.—The Secretary shall submit an annual report to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate providing information on the extent to which there are violations of the payment limitations and restrictions contained in sections 1001 through 1001C.

"(2) CONTENTS.—The report shall contain—

"(A) the names of individuals found to be in violation of such sections:

"(B) the amount of payments received in violation of such sections by the individuals; and

"(C) any recommendations for changes in law or regulation to prevent the violations.".

(g) EDUCATION PROGRAM.—Such Act is amended by inserting after section 1001D (as added by subsection (f) of this section) the following new section:

"SEC. 1001E. EDUCATION PROGRAM.

(a) IN GENERAL.—The Secretary shall carry out a payment provisions education program for appropriate personnel of the Department of Agriculture and members and other personnel of local, county, and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)), for the purpose of fostering more effective and uniform application of the payment limitations and restrictions established under sections 1001 through 1001C.

"(b) TRAINING.—The education program shall provide training to the personnel in the fair, accurate, and uniform application to individual farming operations of the provisions of law and regulation relating to the payment provisions of sections 1001 through 1001C.

"(c) ADMINISTRATION.—The State office of the Agricultural Stabilization and Conservation Service shall make the initial determination concerning the application of payment limitations and restrictions established under sections 1001 through 1001C to farm operations consisting of more than 5 persons, subject to review by the Secretary.

"(d) COMMODITY CREDIT CORPORATION.—The Secretary shall carry out the program provided under this section through the Commodity Credit Corporation.".

Mr. DASCHLE. Mr. President, we have already had considerable debate on the notion that excessive payments go to so-called fat cat farmers. The Senate correctly rejected the approach proffered by Senator REID to address this issue. Simply shutting out from the farm programs farmers and ranchers with gross revenues in excess of some arbitrary amount does not address the issue appropriately. I am pleased that the Senate has decided to reject such an approach.

However, many Members legitimately continue to raise the issue of whether unwarranted excessive payments are going to wealthy individuals. I believe that the answer is somewhat unclear. What I do know, however, is that the mechanisms we have currently in place in the form of payment limitations are a more appropriate way to control any problems that still exist. Any efforts to further control payments should be based on tightening up the current framework of payment limitations, rather than implementing new and illogical means tests.

During 1987, the Congress responded to the many accounts of flagrant abuses of the payment limitations that were in place at the time. We have all read stories about Mississippi Christmas trees, through which large, wealthy farmers did successfully evade the current rules. As part of the 1987 budget reconciliation legislation, we implemented widespread reform of the payment limitation statutes that should have addressed these loopholes. That legislation had a 2-year phase in becoming fully effective with the 1989 crop.

Since the legislation is so new it is hard to be certain how effective it has been in eliminating abuses. However, in the conversations I have had with the personnel of the Department of Agriculture, I have been persuaded that these reforms have indeed been very effective. In fact, it is interesting to note that the fat cat abuse stories that have appeared in the press recently as we have been working on this new farm bill, have relied on data from the period before the current rules were in place.

Before you begin to assume that this statement is a defense of the status quo, let me assure you that it is quite the opposite. The amendment I am offering today will further tighten up the rules we put in place in 1987.

In researching this issue, two things became very clear: First, USDA is only now beginning to have at its disposal sufficiently detailed data to adequately assess the effectiveness of their regulations and procedures; and second, while the 1987 legislation made great improvements to the enforcement of payment limitations, there remain some minor loopholes, that while probably not leading to significant abuse, should be closed off.

This amendment statutorily eliminates the loopholes that allows individuals to use irrevocable trusts as a short-term reorganization tool to create additional entities that are eligible to receive payments. Under the amendment, any irrevocable trust that is established and qualifies as an entity for payments, would have to be established for a minimum of 20 years. By placing such a long life span on the trust, individuals will be dissuaded from using trusts to create entities simply for the purpose of getting additional Government payments. This is a procedure that USDA has begun to implement and should be codified in law.

The second loophole that this amendment closes relates to the beneficial interests a person may hold in entities which receive payments. Under the 1987 reforms, a person was restricted to receiving payments from a maximum of three entities. However, largely to relieve the potential administrative burden on the Department of Agriculture in enforcing these provisions and to avoid excesssive reporting requirements for individuals that may hold minor interests in corporations and the like holding farming interests, an exception was made that allowed USDA to ignore beneficial interests in an entity that were smaller than 10 percent.

An individual would have to be very energetic to use this exemption to get payments from more than three entities. However, it is entirely possible and likely that some individuals would specifically create entities in which they had a 9.9 percent interest. Therefore this interest would not count toward their eligibility and would entitle them to a maximum of 9.9 percent of $50,000, or $4,950 for each entity so created. This annual amount is probably larger than the legal costs involved in reorganizing one's legal status, so it is probably not too cynical to assume that the exemption could be abused.

This exemption was established as part of the 1987 reforms to be effective by the 1989 crop year. So it is likely that any reorganizations to take advantage of the exemption will have occurred by now. My amendment is designed to catch any individuals that might have intentionally used this exemption to circumvent the intention of the law. The amendment simply reduces the exemption of minimal beneficial interests from 10 to 5 percent. Thus, USDA will be able to catch any individuals that have created a bunch of entities in which they have 9.9 percent interests. By reducing the exemption to 5 percent, payment limit evad-

ers will be caught and the administrative and personal burdens created by eliminating the exemption altogether will be avoided.

As anyone who has studied this issue will know, these provisions are extremely complex and tracking and enforcing them is even more complex. The remaining provisions of this amendment are designed to improve USDA's ability to enforce these important laws and provide for themselves and the public at large a better understanding of the effectiveness and impact of these laws.

The amendment directs USDA to further improve the database they are developing to track payments to individuals and provide more complete reporting on implementation of the law. USDA is instructed to annually publish information relating to the percentage of individuals eligible for payments receiving payments in excess of $50,000; the percent of payments in excess of $50,000 attributable to each commodity; the amount of payments by commodity that would have been made in the absence of any payment limitations; and the names of individuals legally receiving payments in excess of $50,000, together with the amount of payments they received in that year, and a description of the bases upon which they are eligible to receive excess payments.

USDA is also directed to report to Congress on actual violations of the law that they uncover and make any recommendations on possible changes to the law or regulations to eliminate further violations. Finally, the amendment establishes an ongoing training program for USDA and county and State committee personnel to ensure that they have adequate background and expertise in implementing these complex laws.

Mr. President, many of my collegues have asked me in recent days what can be done to stop huge payments going to wealthy individuals. Often they have quoted examples of abuse that occurred prior to enactment of the 1987 legislation. So hopefully, the level of abuse that they are concerned about has already been greatly reduced. The Department of Agriculture certainly believes this to be the case. However, we can always try harder, and that is what this amendment is about. So I would urge all of my colleagues to support this effort to further reform the payment limitation statutes. It is this kind of legislation that will ensure the continued integrity of our farm programs.

Mr. LEAHY addressed the Chair.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. Mr. President, this amendment has been cleared on this side. We have no objection to it.

The PRESIDING OFFICER. Is there further debate on the amendment?

Mr. LUGAR. Mr. President, we commend the distinguished Senator from South Dakota for this amendment. It clearly is an important reform.

So much of the debate on farm legislation has centered upon the evasiveness of the $50,000 limitation, the so-called Christmas tree structures, ways in which people have not honored clearly the spirit of the law in an attempt to contrive a new letter of the law. We believe that the reforms that the Senator has offered are important, and on our side we support the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment?

Mr. DASCHLE. Mr. President, we can move to a vote briefly. Let me just thank both of my colleagues again for their cooperation and continued effort to improve the bill.

This is not an hour that we normally find many people on the floor. Under normal conditions, I would have asked for a rollcall vote because, I think, as the distinguished Senator from Indiana has indicated, so much of the debate in the committee and off the floor and in various places in Washington has been focused on this very issue. Are we providing too many benefits to large farmers? I must say if ever we have been able to tighten this legislation, we have certainly been able to do it in the last couple of years.

This amendment will strengthen that. This amendment provides an opportunity to tie down those payment limits even more, and provide us an opportunity to do something that is done in Federal contracts already; that is, publish the information concerning the amount of money provided to large recipients of Federal funds.

So this amendment clearly will allow a lot of people who may have some misgivings about whether indeed we are reforming the farm bill this year adequate confidence that indeed we are.

So I will not ask for a rollcall vote. And will just emphasize the importance of this amendment, and my sincere hope that, as we go through conference, we will be able to retain this language; and make sure that for the foreseeable future we do what we all say we intend to do; and, that is, improve this legislation from an administrative point of view.

With that, I yield the floor.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Dakota.

The amendment (No. 2339) was agreed to.

Mr. DASCHLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Who seeks recognition?

Mr. LEAHY. Mr. President, parliamentary inquiry. What is the regular order?

The PRESIDING OFFICER. There is currently no amendment pending.

Mr. DASCHLE addressed the Chair.

The PRESIDING OFFICER. The Senator from South Dakota.

Mr. LEAHY. If the Senator will withhold for just a moment, the Senator from Vermont does not intend to ask for the regular order, but I wonder if we could let the Chair rule first, to advise the Senate first what the regular order is. I hope those who are watching the monitors might listen to what he says.

The PRESIDING OFFICER. The Chair would note that were someone to call for the regular order, the regular order would be the Conrad amendment, which has been set aside.

Mr. LEAHY. Absent the Conrad amendment, what would be the regular order?

The PRESIDING OFFICER. Consideration of any amendment which may be offered by any Member of the Senate.

Mr. LEAHY. If there is no amendment pending, what would be the regular order?

The PRESIDING OFFICER. Were no amendments to be offered, then anybody might move to third reading of the bill.

Mr. LEAHY. Mr. President, the Senator from South Dakota was gracious enough to let me go through the series of parliamentary inquiries. I yield.

AMENDMENT NO. 2340

(Purpose: To require the Secretary of Agriculture to conduct a loan rate study)

Mr. DASCHLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from South Dakota [Mr. DASCHLE] proposes an amendment numbered 2340.

Mr. DASCHLE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 349, line 25, insert the following new section:

SEC. . LOAN RATE STUDY.

(a) IN GENERAL.—In the case of the annual programs established for each of the 1992 through 1995 crops of wheat, feed grains, upland cotton, and rice under section 107A, 105A, 103A, and 101A of the Agricultural Act of 1949 (as amended by section 301, 401, 501, and 601 of this Act), respectively, the

Secretary of Agriculture shall study the impact of—

(1) increasing the minimum loan and purchase level established the crop to—

(A) the corresponding established price level for the crop; or

(B) the projected average cost of production level for the crop; and

(2) eliminating deficiency payments for the crop.

(b) FACTORS.—In conducting the study, the Secretary shall analyze the impact of the actions described in subsection (a) on—

(1) the export market share for each commodity;

(2) Commodity Credit Corporation outlays for each commodity; and

(3) net farm income for each commodity.

(c) REPORT.—Not later than October 1, 1991, the Secretary shall submit a report that describes the results of the study conducted under this section to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

Mr. DASCHLE. Mr. President, I send an amendment in the second degree to the desk.

The PRESIDING OFFICER. Is the Senator from South Dakota asking to modify his amendment?

Mr. DASCHLE. The Senator from South Dakota offers an amendment in the second degree to the first amendment sent to the desk.

The PRESIDING OFFICER. The Senator has not lost his right to modify his initial amendment but cannot amend his own amendment.

Mr. LUGAR addressed the Chair.

The PRESIDING OFFICER. The Senator from Indiana.

AMENDMENT NO. 2341 TO AMENDMENT NO. 2340

Mr. LUGAR. Mr. President, I send an amendment to the desk in the second degree.

Mr. DASCHLE. Mr. President, a parliamentary inquiry. The Senator from South Dakota has sent an original amendment to the desk, and sent an amendment in the second degree to the desk which was not read.

It is my understanding that the amendment in the second degree has been received, and I intended to ask for the yeas and nays on that amendment.

The PRESIDING OFFICER. The second-degree amendment is not in order at this time.

Mr. DASCHLE. Mr. President, I ask for the yeas and nays on the amendment in the first degree, which has already been read.

The PRESIDING OFFICER. Is there a sufficient second?

There is not a sufficient second.

Mr. LUGAR. Mr. President, point of parliamentary inquiry. Was the Senator from Indiana in order in offering a second-degree amendment at this time, and would it be in order for the clerk to read the amendment?

The PRESIDING OFFICER. Yes, the Senator is in order to offer a second-degree amendment at this time.

Mr. LUGAR. Will the clerk please report the amendment.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Indiana [Mr. LUGAR] proposes an amendment numbered 2341 to amendment No. 2340.

The PRESIDING OFFICER. The amendment which the Senator from Indiana has sent up is inappropriately drafted and is a second-degree amendment. It is not in order in this form.

Mr. DASCHLE addressed the Chair.

The PRESIDING OFFICER. The Senator from South Dakota.

Mr. DASCHLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LUGAR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. DASCHLE. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

The assistant legislative clerk resumed the call of the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BRYAN). Without objection, it is so ordered.

Mr. LEAHY. Mr. President, what is the pending amendment?

The PRESIDING OFFICER. Amendment No. 2340, the amendment offered by Senator DASCHLE.

Mr. LEAHY. Mr. President, a further inquiry. No yeas and nays have been ordered on this or any other amendment; is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. LEAHY. Mr. President, I ask that we adopt the amendment.

The PRESIDING OFFICER. Is there further debate?

Mr. LUGAR. Mr. President, a point of clarification. The amendment that we are proceeding to vote on is a study amendment; is that correct?

The PRESIDING OFFICER. The Senator is correct. The amendment calls for a report not later than October 1, 1991.

Mr. LUGAR. I thank the Chair.

On our side, we accept the amendment and are prepared to vote.

Mr. DASCHLE. Mr. President, let me thank my colleagues again for accepting this amendment. It provides much needed information about the relationship between marketing loans and target prices. It is something we talked a good deal about in markup. I think it will go a long way in helping us make decisions down the road. I appreciate their support. Mr. President, I yield the floor.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2340) was agreed to.

Mr. LUGAR. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2342

(Purpose: To target deficiency payments and acreage limitation requirements for wheat and feed grains)

Mr. DASCHLE. Mr. President, I now have an amendment at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from South Dakota [Mr. DASCHLE] proposes an amendment numbered 2342.

Mr. DASCHLE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection it is so ordered.

The amendment is as follows:

On page 74, strike lines 19 through 22 and insert the following:

"(C) ESTABLISHED PRICE.—The established price for wheat for each of the 1991 through 1995 crops of wheat shall not be less than—

"(i) in the case of the first 12,500 bushels of wheat produced on a farm, $4.10 per bushel; and

"(ii) in the case of any additional bushels of wheat produced on the farm, $3.40 per bushel.

On page 88, line 14, insert "the portion of" after "to".

On page 88, line 15, before the period, insert the following: "in excess of the number of acres that would yield 4,000 bushels of wheat (using the farm program payment yield for the crop for the farm)".

Beginning on page 122, strike line 18 and all that follows through page 123, line 9, and insert the following:

"(C) ESTABLISHED PRICES.—

"(i) CORN.—The established price for corn for each of the 1991 through 1995 crops of corn shall not be less than—

"(I) in the case of the first 18,000 bushels of corn produced on a farm, $2.82 per bushel; and

"(II) in the case of any additional bushels of corn produced on the farm, $2.33 per bushel.

"(ii) OATS.—The established price for oats shall not be less than—

"(I) in the case of the first 10,000 bushels of oats produced on a farm, $1.59 per bushel for the 1991 crop, $1.69 per bushel for the 1992 crop, $1.79 per bushel for the 1993 crop, and $1.90 per bushel for each of the 1994 and 1995 crops; and

"(II) in the case of any additional bushels of oats produced on the farm, $1.32 per bushel for the 1991 crop, $1.40 per bushel for the 1992 crop, $1.49 per bushel for the 1993 crop, and $1.58 per bushel for each of the 1994 and 1995 crops.

"(iii) GRAIN SORGHUMS.—The established price for grain sorghums for each of the

1991 through 1995 crops of corn shall not be less than—

"(I) in the case of the first 12,000 bushels produced on a farm, $2.68 per bushel; and

"(II) in the case of any additional bushels of grain sorghums produced on the farm, $2.22 per bushel.

"(iv) BARLEY.—The established price for barley for each of the 1991 through 1995 crops of barley shall not be less than—

"(I) in the case of the first 10,000 bushels produced on a farm, $2.42 per bushel; and

"(II) in the case of any additional bushels of barley produced on the farm, $2.01 per bushel.

On page 123, line 10, strike "(iv)" and insert "(v)".

On page 136, line 23, strike "12.5" and insert "15".

On page 137, line 6, strike "12.5" and insert "15".

On page 137, line 17, insert "the portion of" after "to".

On page 137, line 19, before the period insert the following: "in excess of the number of acres that would yield 10,000 bushels of corn, 6,500 bushels of grain sorghums, 5,000 bushels of barley, and 5,500 bushels of oats, respectively (using the farm program payment yield for the respective crop for the farm)".

Mr. LEAHY. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There appears to be a sufficient second.

The yeas and nays were ordered.

Mr. LEAHY. Mr. President, I ask unanimous-consent that on this amendment there be 2 hours of debate, evenly divided in the usual fashion, and that no second-degree amendment be in order.

The PRESIDING OFFICER. You have heard the unanimous-consent request propounded by the floor manager. Is there discussion or debate? The Chair hearing none, the unanimous-consent request is agreed to.

Mr. LEAHY. Mr. President, I ask unanimous consent that the time for the proponents of the amendment be under the control of the Senator from South Dakota and the time in opposition be under the control of the Senator from Indiana.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DASCHLE. Mr. President, I yield myself such time as I may require.

Mr. President, as we have taken up the 1990 farm bill on the floor, I have already talked about my reasons for voting against the bill that was adopted in committee. While there are many positive features of this legislation, I have found it impossible to give it my full support because the bill does not provide adequate income protection for our Nation's producers of our most important staple commodities: wheat and feed grains.

As we brought the farm bill to the floor, I committed to try and improve the bill, and that is why I rise today to offer an amendment that will better target the provisions of the wheat and feed grains programs to family-sized farmers. In the Senate Agriculture Committee, I and many of my colleagues fought to increase target prices for the major program commodities. We were unsuccessful primarily because we were told that, in these times of overall budget deficits, there was no room to increase needed support to farmers.

Personally, I feel that, at a time when we are facing a $60 billion cost this year alone for bailing out the S&L's and when agriculture spending as a percent of the total budget is less than three-quarters of a percent, we still should be able to do more for the Nation's farmers. However, I recognize that these sentiments are not universally shared by my Senate colleagues. Therefore I am prepared to take a different approach, and that is what this amendment is about.

If we have only a fixed amount of funds available to spend on the wheat and feed grains provisions of the farm bill, then we should do our best to see that the benefits are targeted to the producers that are most in need of assistance. This amendment takes the current program and redistributes the benefits of the program to our small- and medium-sized family farmers without increasing Government expenditures.

Despite all the rhetoric about supposedly record levels of farm income, I know that our Nation's family farmers, including those in my own State of South Dakota, are still facing tough times. The steady decline in target prices and loan rates resulting from the 1985 farm bill, coupled with the inflationary pressures on producer's costs has had a devastating impact, particularly on family sized operations.

Since 1985, the target price for wheat has declined by almost 9 percent and the loan rate has plummeted by 26 percent. For the feed grains, target prices have been slashed by over 9 percent and loan rates have declined 23 percent. At the same time, prices farmers have received for their crops have declined, although this has been somewhat masked by the effects of 2 years of prolonged drought. Using USDA's estimate of market prices for 1992, when the temporary rise created by the droughts is expected to have vanished, corn prices will have dropped by 8 percent and wheat prices will have dropped by 6 percent in nominal terms. That does not take into account the effects of inflation.

So at the same time that producers are receiving less for their efforts in the market, we have also been taking away the supports they depend on. Many of our largest producers have been able to bear this assault on their livelihood, but for the smaller operations the situation has been disastrous. From 1985 to 1989, in just 4 short years, average farm size in this country has increased by 3.5 percent. Prior to the 1985 bill, it took not 4, but 8 years to see that large an increase in farm size. The 1985 act has led to smaller producers being gobbled up by larger operators at an alarming rate.

Is this the direction we want our farm policy to continue? I certainly do not think so. Sure, because of economies of scale and improved technologies there will always be some tendency for farms to get larger. The structure of agriculture must be allowed to evolve, but, at the same time, I see no reason to actively accelerate the concentration of land in the hands of a few through our policy actions.

Time and again when I travel through this country's small towns and rural areas, I am reminded of the important contributions our farmers and ranchers make toward their local economies. And it is not just the dollars they plow back into these small towns that count, but more importantly their physical presence and that of their children. As more and more farmers are pushed off the land, it becomes increasingly difficult for local communities to maintain schools and hospitals and other essential services.

Every farmer pushed off the land and into the city means fewer children in the next generation to keep the numbers high enough in the community to keep the school open. It is not unusual in my State of South Dakota for children to have to travel 40 miles in the morning to go to school and then travel the same 40 miles again to come home at night. At what point does this become an unreasonable price to pay for a family wanting to live in rural America? I suggest that we are at that point right now today. One important way to reverse this horrible trend is to keep our family farmers on their land, and the way to do that is to ensure that the benefits of our farm programs are targeted more effectively to these producers.

As I have talked to farmers across this country, I have heard many diverse views on the need for the farm programs. A reasonable number of producers say the Government is already more involved in agriculture than it ought to be. The interesting thing to note is that the producers that tell me this are more often than not the large scale operators who are bumping up against the payment limits and will not get any additional benefits if we were to raise price supports. These producers are already able to make it at the current levels of support.

However, these same operators will also tell me that I should fight to keep a program in place that will allow their smaller neighbors to stay in business and enable them to send their kids to the local school for the benefit

of the entire local community. If we are to do that, we should take these large operators at their word and redistribute the benefits of the program. Let us reduce their level of benefits, since they can survive without them, to help the smaller producers who are less able to cope with even increasing input costs and do not have the same economies of scale. We have an obligation to get the maximum amount of benefits possible from the farm programs to these producers.

We have already debated one amendment to this farm bill that claimed to target the benefits of the farm programs to the neediest producers. However, I, along with a majority of my colleagues, rejected the amendment because it did not legitimately address the targeting question. Cutting producers with gross revenues larger than some arbitary amount out of all programs benefits is no answer to the need to better target our assistance to producers.

Simply removing the largest producers from eligibility does nothing to improve the situation of those that remain eligible for benefits, quite aside from the point that a gross revenue test is an inappropriate way to determine eligibility for the program. A moderate-sized cattle producer with some crop land could be excluded from receiving benefits while a much larger grain farmer in less need of support, but with lower gross revenue, would continue to be eligible for program benefits. As I have mentioned, this approach has already been rejected by the Senate, so I urge all of my colleagues who supported the amendment of the Senator from Nevada because of its attempts to better target benefits to support this amendment that will actually get the job done and do it in a more equitable way.

While I would be happy to propose increases in target prices and loan rates to help support our family farmers, as I indicated at the beginning of my remarks, I am also mindful of the sentiment of the Senate that the farm bill we pass must live within our current budget baseline. I have therefore crafted this amendment so that it will have no net impact on that baseline. In fact, the Congressional Budget Office has indicated that this amendment is budget neutral relative to the farm bill baseline.

I would now like to take a moment to explain how the amendment works. Benefits are targeted to producers in two ways: First, the amendment creates a two-tier target price structure whereby the first portion of a producer's production of wheat and feed grains measured in bushels receives a higher target price than production in excess of the established bushel limit; and second, the amendment gives smaller producers the benefit of a targeted reduction in set-aside requirements by exempting their initial production from the set-aside. A bushel quantity is established for each crop that will be exempt from the ARP provisions of the program. This bushel quantity is then converted into a set number of acres for each producer based on the individual producer's program yield. This acreage is then held harmless from the acreage reduction requirement.

The first tier target prices established in this legislation are set 2.5 percent above the level currently in the bill. This percentage is approximately equal to the costs producers are expected to face in just the next year: Inflation at approximately 4.5 percent, less 2 percent in productivity gains equal 2.5 percent real increase in costs. We can expect similar increases in each year thereafter. But, bowing to the so-called budget constraints we face in order to maintain budget neutrality, this amendment modestly gives producers this increase only once, and then holds these target prices over the life of the bill.

It is important to emphasize that. This amendment modestly gives producers this increase only once, and then holds these target prices over the life of the bill.

This chart, Mr. President, outlines the amendment perhaps better than my explanation does rhetorically. We have a target price in the current provision of law which is $4. My amendment would increase the target price to $4.10 on the first 12,500 bushels.

The CBO projected market price is $3.02. My amendment does not change that. The deficiency payment rate would be 98 cents under the current position, but would be $1.08 under my amendment on the first 12,500 bushels and 38 cents on additional reduction. The acreage reduction percentage would be 5 percent under the current bill, 7 percent under my amendment, which holds harmless that first 100 acres of production.

The program base for a small producer in this example would be 300 acres; program yield estimated at 30 bushels to the acre. Under the current provision, a small producer would be alllowed $8,379 in program payments. Under my amendment, that payment, given the same number of acres, the same estimate of yield, would be $9,428. That is an increase of $1,049, or 13 percent from the current provision, a one-time 13-percent increase in target price support for farmers who are small producers.

I might emphasize, this is for all farmers—small producers and large producers alike. They are all going to benefit from this program. The large 800-acre producers, however, who would have received $22,344 under the current program, after they reach the threshold established in this amendment, would receive $16,985, a decrease of about 24 percent, or $5,386.

This amendment, as I indicated, is budget neutral for this reason. We are shifting part of the money from the large producers and the excess amounts, that are really adding to the cost of the farm program, would be shifted to the smaller producers on a one-time basis, providing a 13-percent increase in deficency payments.

The second component of this amendment, as I indicated, targets the impact of the acreage reduction program that may be in effect for wheat and feed grain crops, as I indicated in the chart. A bushel quantity is established for each crop that will be exempt from the ARP provisions of the program. The amendment establishes these quantities at 4,000 bushels for wheat, 10,000 bushels for corn, 6,500 bushels for sorghum, 5,000 bushels for barley, and 5,500 bushels for oats. This bushel quantity is then converted into a set number of acres for each producer based on each individual producer's program yield. This acreage is held harmless from the acreage reduction requirement. The bushel levels have been established bearing in mind the national average program yield for each of these crops, so that approximately the first 100 acres of a producer's base would be exempt from the set-aside requirements.

For example, if a 10 percent set-aside for wheat is in effect, a producer with a 200-acre wheat base would be required to set aside 10 acres, as opposed to 20 acres under current law, and a producer with a base of 400 acres would be required to set aside 30 acres, as opposed to 40 acres under current law. This provision will, therefore, further help to target the impacts of the wheat and feed grains program to family-size farmers. To maintain a nationwide reduction in production consistent with the ARP's that they are currently projecting before this amendment, USDA would simply be required to fractionally increase the uniform percentage reduction applied to each farm.

Thus, for example, to get the same supply control effect as a 5 percent ARP under the current law, the ARP on acreage subject to the reduction, following adoption of this amendment, might have to be increased, as I indicated on the chart, to 7 percent, according to CBO's analysis. However, the net effect of the amount of land taken out of production would be identical under both schemes. Let me reiterate that this provision in no way tries to increase the overall level of supply control in the operation of the wheat and feed grains programs. It simply redistributes the impact on individual producers of current supply control efforts. Under the amendment,

the impact of the set-aside would be felt progressively according to farm size.

To see the impact this amendment would have, I would like to run through some examples of how it would affect a representative farming operation in crop year 1991.

Turning to wheat first, the acreage reduction requirement is projected to be 5 percent, and CBO estimates a season average price of $3.02 per bushel. Thus, under the current bill, a producer with a 300-acre base and a program yield of 30 bushels per acre would have 8,550 bushels of wheat eligible for a deficiency payment of 98 cents per bushel—the difference between the $4 target price and the $3.02 market price—for a total deficiency payment of $8,379. A large operator with 800 acres of wheat base and the same program yield of 30 bushels per acre would have 22,800 bushels of program production and would receive a $22,344 deficiency payment.

Mr. President, I have outlined this example on the chart. Clearly, anyone who may have a question on the way it is calculated can clearly see the dramatic increase in opportunity this represents for small family farmers.

All of the small producer's production would be eligible for payment at a rate of $1.08 per bushel based on the new target price of $4.10, giving a payment of $9,428, a 13-percent increase over the provisions currently in the bill.

Secretary Yeutter, in his 13-page letter to the Senate outlining the administration's position on the Senate farm bill, said the administration wanted to work with the Senate to meet our budget targets and indicated that there was room for better targeting of program benefits. I hope the administration will be able to endorse this proposal, as I feel it addresses most of the concerns that they have raised about better targeting benefits.

One concern that is frequently raised about creating a two-tier target price mechanism is the incentives it creates for producers to reorganize their operations to maximize the number of bushels eligible for higher levels of support. This has probably been true of some of the schemes that have been discussed in the past where the disparity between the first and second tier prices has been very large, or where there is no target price protection at all in the second tier. However, as I have previously said, this is a modest amendment, and the examples I showed, illustrate the difference between the prices of the two tiers is relatively small. For example, in corn, the different tiers are set at $2.82 and $2.33 and in barley the two tiers receive prices of $2.42 and $2.01. Therefore, the incentive to reorganize has been minimized. In fact, the second tier price levels established in this proposal have been set deliberately low to accommodate a certain amount of slippage through possible reorganization and still maintain budget neutrality.

We have all heard all sorts of rhetoric from both sides of the aisle on the need to better target program benefits away from the largest producers and toward family-size operations. This amendment, together with my earlier amendment on payment limitations, will help us effectively achieve these laudable goals. Senators who think big, so-called fat cat, farmers receive too many benefits under farm programs should support this amendment. Senators who think program benefits should be better targeted to family-size farmers should support this amendment. Senators who think farmers deserve a modest cost-of-living adjustment, as recipients of other Government programs receive, even if it is for only 1 year, should support this amendment.

Finally, Senators who think that any targeting of benefits should be done so as not to increase the overall cost of the bill should support this amendment. In fact, Mr. President, I can see no legitimate reasons not to support this amendment, and I urge its adoption.

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time? If no one yields time, time will run equally.

Mr. DASCHLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum having been suggested, the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DASCHLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DASCHLE. Mr. President, I ask unanimous consent that time be allotted to both sides as the quorum call is called.

The PRESIDING OFFICER. Is there objection to the request? Hearing none, the request is agreed to.

Mr. DASCHLE. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. EXON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EXON. Mr. President, I ask that I may be allowed to proceed for not to exceed 3 minutes as if in morning business for the purpose of introducing legislation.

The PRESIDING OFFICER. Is there objection to the request of the Senator? The Chair hears none, and it is so ordered.

The Senator from Nebraska is recognized.

Mr. EXON. I thank the Chair.

(The remarks of Mr. EXON pertaining to the introduction of S. 2894 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. EXON. I yield the remaining time, if I might, to my colleague from Nebraska [Mr. KERREY].

The PRESIDING OFFICER. The Senator has 1 minute remaining.

Mr. KERREY. Mr. President, I ask unanimous consent that I be allowed to speak a full 5 minutes as if in morning business.

The PRESIDING OFFICER. Without objection the Senator's request is agreed to and, without objection, the time of the Senator as requested will not be charged to either side on the pending amendment.

Mr. KERREY. I thank the Chair.

(The remarks of Mr. KERREY pertaining to the introduction of S. 2894 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

FOOD, AGRICULTURE, CONSERVATION, AND TRADE ACT OF 1990

The Senate continued with the consideration of the bill.

Mr. EXON. Mr. President, I suggest the absence of a quorum.

Mr. LEAHY. Mr. President, will the Senator withhold?

Mr. EXON. I withhold the request.

Mr. LEAHY. The time will run equally as I understand on both sides. Is that correct?

The PRESIDING OFFICER. That is correct.

Mr. LEAHY. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRASSLEY. Mr. President, I just spoke to the Senator from South Dakota. I would like to speak not for a specific amount of time but to ask unanimous consent that the time I use be equally charged to both sides off the time that is coming out now. And I also express to the Senator from South Dakota, and I will express it to any other Member, that it is not my intention to dominate the floor, and that any time anybody else seeks recognition I will give up the floor.

So I ask unanimous consent.

The PRESIDING OFFICER. The Chair hears no objection, and without objection, it is agreed to.

The Senator may proceed.

Mr. GRASSLEY. Mr. President, I will offer an amendment sometime either later this evening or tomorrow, and that is on the general subject of farm program flexibility. I want to take some time to address some of the issues connected with flexibility as long as there is some time here that is not being used.

One of the first points that I would like to make is that there has been so much good said about the 1985 farm bill. And we are basically continuing in the 1990 farm bill the general premises of the 1985 farm bill, with some fine tuning. People raise the question, if the farm program of the last 5 years is working very well, and we are going to continue to use it for the next 5 years, why do we talk so much about flexibility? The question is raised if it is not broke, why bother to fix it?

It is true that farmers are doing better under the 1985 farm bill. Exports are up 50 percent since 1985-86. Crop surpluses have been worked down. Farm income is up. Farm debts are down.

But regardless of the positive results of the 1985 farm bill, flexibility will be a benefit if these conditions continue. It will be even more important if conditions worsen. No one really knows how agriculture markets will fair in the future, whether surpluses will return, or markets will remain tight as they currently are. Greater flexibility is the best strategy for dealing with this unpredictability, and this variability. Flexibility will allow farmers to respond more quickly and accurately to markets as they unfold.

There surely are many farmers who do not want or need greater production flexibility. There is nothing in our plan that is going to make anybody be more flexible if they do not want to be. But on the other hand, with flexibility, there is the opportunity for those farmers who want to reach out and take advantage of it to do so. These farmers may already be producing as profitably as possible. I am talking about those farmers who maybe do not need or do not want more flexibility, or their production choices may be limited by geography or climate, so they cannot make use of it even if we pass it.

But even so, Mr. President, there are many other farmers who would profit from flexibility. The reasons for pursuing flexibility are for these farmers and the adjustments that they would make if they had an opportunity to make these adjustments.

Under the flexibility proposal that I am suggesting, many farmers will grow more crops with a higher market price and less of a crop if there is a lower market price. Some may plant on land that would otherwise be idle.

The result of these actions is, first of all, greater production value for the producer; second, more economic activity for the rural communities that he lives in; and third, greater economic activity for the Nation. Finally, anybody who calls himself an environmentalist ought to appreciate the fact that there is going to be wiser use of chemical inputs with flexibility. Flexibility does encourage more crop rotation, hence less use of pesticides, insecticides, and commercial fertilizers.

Another point that tends to be brought up is that an individual farmer, having more choices seems like a deal you cannot miss. But when all farmers make the switch to a more profitable crop, everybody winds up losing. That is the argument.

Well, I think we can shatter that myth as well. There is, of course, no guarantee that greater flexibility will raise every farmer's profits. However, the current rigid programs virtually guarantee that no farmer will have the opportunity to pursue market-driven profits. Under flexibility, farmers can keep doing what they have been doing, or they can try something different, if it looks more profitable, based upon expected returns from the market.

Farmers will not continue their new planting activities, unless by continuing those new activities, the profit opportunity remains. This will happen even after the market reflects that other farmers may do the same thing. If farmers do try something different, many will be able to ensure profitability through forward contracting, through hedging in the future markets, or purchasing option contracts.

Suppose many farmers do expand production of a program crop and its price falls more than they may have expected that it would. These farmers may still be better off. They will continue to have income and price supports through the target prices and the loan rates that are in the bill. We do not affect them whatsoever.

But these farmers, by taking advantage of flexibility, even if there is a reduced price and they got the income protection, they are going to have more crop to market. The case for higher farm income is even clearer over the long term, if there is more flexibility. If U.S. farmers do not have the flexibility to capitalize on profitable sales, then foreign producers surely will.

For example, South American soybean producers took advantage of our rigid programs during the 1980's. The U.S. share of world trade in soybeans and other products dropped from 65 percent of the world market the United States had in the 1970's to only 35 percent this year. The more flexible we are, the more foreign production increasing will be deterred and the higher will be our share of world trade. Income over the long term is going to depend on who is using their resources to produce most effectively for the world market and who is not.

So because we do not have flexibility, Mr. President, I think you need to remember that foreign farmers benefit when American farmers lack the opportunity to respond to the marketplace. Of course, that even compounds the situation. The burning of the Amazon for land to be cleared for farming in South America is encouraged when our farmers do not respond to the marketplace; our soybean production goes down, because farmers are not planting soybeans because the farm program does not encourage that flexibility. And then those soybean acres go to South America—they benefit.

Mr. President, right now many people are concerned about the importation of oats into this country, and rightly so. We might as well be raising those oats here. Flexibility would allow that. Even more important, related to a larger money crop, there is soy oil being imported into the United States now from Brazil. We could just as well be raising those soybeans on American soil, and we could be exporting more than we are doing now. We would not have to be importing anything. Just consider the economic advantage that Brazilians have over the American producer, because they are able to import that soy oil into the United States even when there is a 22-percent import duty on it.

Well, another concern that we hear is that flexibility needs to be limited, because agriculture is inherently unstable. If flexibility is not limited, farmers will jump from crop to crop and destabilize markets.

Well, at the outset, the clearest answer to that is that we have to make choices as public officials, whether or not we think the marketplace works better or central planning works better. We ought to learn a lesson from the Eastern European countries, where they are abandoning their centrally planned economies in favor of the free market. We ought not to take the position in this body, or anyplace in the United States, that when you give farmers or any other business people the opportunity to respond to the marketplace, that somehow something bad is going to come out of it, and we are going to have destabilization as a result of it.

The Government destabilizes more than the free marketplace does. Concern that flexibility is destabilizing is then, unfounded. The inherent variability in agriculture markets stem from such things as changes in the weather and foreign demand, more so

than from planting mistakes made by the farmer.

I am willing to accept the fact that maybe sometime in responding to the market, some farmers, or a lot of farmers, might misjudge the markets and may be planting more of one crop than they should. But without a doubt, weather and foreign demand are more destabilizing than any mistakes that the farmer makes.

Decisions by Government create more instability than markets do, if those markets are left to work. In fact, during 1974 to 1981, a period when there were no crop specific acreage reduction programs, wheat and corn acreage was more stable than during the 1982 to 1989 period, when there was an ARP program. This was a period of, as we know, heavy Government involvement in agriculture and continuous acreage control. During 1974 to 1981, we did not have very much Government regulation on what farmers could or could not plant.

There is no evidence that Government can do better than farmers in determining what and how much is to be produced. The fundamental flexibility issue is, then, who should make the decision on what to plant? This is a very broad-based policy decision that we ought to be making right here. Is the farmer in a better position to do that, or the central planners at the U.S. Department of Agriculture? I think that we need to understand that the U.S. Department of Agriculture can administer any program we give them. The most rigid inflexible program that we pass in this Congress, they can administer. But, also, if we pass a program of more flexibility, that can also work very well.

The point is that, when left to respond to market prices and prospects, farmers will tend to stabilize markets, producing more when markets are tight, and less when something is in surplus. If it appears that farmers are about to make a wholesale excessive shift to one crop, cash and future markets would reflect the impending change, and that crop's price then would, of course, fall. Farmers would react to this by revising their production plans with greater flexibility.

That is what my amendment is all about—the Government's statutory announcement date for acreage reduction programs, which currently locks in acreage choices long before planting time. Farmers will be able to alter their plans even after the Government makes this change in its planned announcement. If weather and foreign demand change after planting and large surpluses result, my flexibility amendment allows the Secretary to revert to current programs and separate the crops from the NCA and impose crop specific acreage reductions and/or paid diversion programs.

I do not expect that scenario to happen because I believe that flexibility will work and in most instances there is not going to be any necessity for the Secretary to revert to current programs.

Another objection that is often raised to greater flexibility is that no flexibility proposal should let farmers receive deficiency payment from one crop when planting another crop. There is a suggestion made that farmers should have to earn a crop's payment by planting that crop. It has been that way for years where there has been a very close tie-in between the acres planted and the deficiency payment that the farmers received as a result of the target price support. But before that, that is before 1977, we only have to look back 13 years and beyond that there is a long history of producers being able to grow alternative crops on one's crop base acreage and still receive payments for that crop. For example, wheat, feed grains, and soybeans were interchangeable in the early 1970's and payments were determined by allotment, not by plantings.

The idea of making payments acre for acre, on what is grown, started with the Food and Agriculture Act of 1977. Since then, this idea of forcing farmers to grow to receive payments has been found to be a principal cause of the excessive use of production inputs, overproduction and uncontrollable program crops.

So if you look at the problems in agriculture today, they come from rigidity in the farm program. We did not have those problems when you look back to when there was a great deal of flexibility in what the farmer could plant. We are asking for a return to that period of time when a farmer could make more decisions based on the market, not based upon what politicians and bureaucrats here in Washington, DC, said.

The essential feature of the current system is that the producer makes a decision of what to produce by pitting the target price of one crop to the target prices of other crops or to the market price of nonprogram crops. The decision then is determined by Government-set target prices and not by the market price.

It would be far better to ensure payments to a producer based on cropping history and let the producer determine the planted acreage based on market prices in the individual producer's farming situation.

On another point, some people would raise the question that flexibility is decoupling and it is the first step towards turning farm programs into welfare programs. It is nothing but an excuse for cutting costs. My amendment does not cut any income support for any farmer and no farmer is forced to use flexibility, and if a farmer does not want to use flexibility he still gets the target price support. In fact under my flexibility, there are still deficiency payments being made.

So, it is not going to move us toward a welfare program. It is going to put more responsibility on the back on the individual farmer who takes advantage of it. It is going to rely more on his management decisions, and that is moving away from welfare programs.

Flexibility means more market orientiation in planting decisions whereas decoupling, for those Senators who are concerned about decoupling being the first step of flexibility, means payments that are unaffected by market prices or planting decisions. So flexibility has nothing to do with decoupling.

Under decoupling a producer would receive a fixed payment irrespective of what is produced. Under the USDA's suggestion that they made in a green book earlier, the producer would make production choices that would result in reduced government outlays. To a considerable extent, that is the philosophy behind Senator DIXON's and my amendment as well.

Flexibility could be catastrophic to some regions. I think our colleagues are going to want to impress upon us tomorrow that somehow some regions of the country would be benefited.

Mr. President, let me inquire, because I said I would give up the floor any time. I am willing to do that because I took it under an agreement with the Senator from South Dakota that I would speak and it would be charged to both sides equally. I yield the floor.

Mr. LEAHY. Mr. President, I do not want to cut off the Senator from Iowa, but I was going to upon his completion if he is completed. I see he is.

Mr. President, I ask unanimous consent that the distinguished senior Senator from Rhode Island [Mr. PELL] be recognized as though in morning business with the time consumed by the Senator from Rhode Island being charged equally to the proponents and opponents of the Daschle amendment.

The PRESIDING OFFICER (Mr. GORE). Without objection, it is so ordered.

The senior Senator from Rhode Island is recognized.

THE LEGACY OF INACTION

Mr. PELL. Mr. President, I rise in regard to a very serious situation now confronting the Stafford Student Loan Program. For the better part of a week, we have known that the Higher Education Assistance Foundation [HEAF] is in precarious financial shape.

This is serious news, indeed. HEAF is the largest guarantor in the Stafford Student Loan Program, guaran-

teeing about 15 percent of all loans that are made. It is the major multi-State guarantor, as well as the State guaranty agency in Kansas, West Virginia, Minnesota, Wyoming, Maine, and the District of Columbia.

It is no secret that HEAF has made some bad business decisions. It amassed a loan portfolio that was too heavily made up of loans to proprietary school students. And, it failed to take early corrective action when defaults at some schools in that sector of postsecondary education soared.

Over the past 3 years, HEAF has attempted to bring its loan portfolio into better balance and to trim its default rate. However, it acted too late. As a result, we are faced with a crisis of confidence that could affect the viability of the entire Stafford Student Loan Program.

The Department of Education has undertaken a central role in the situation. Since the news of the situation broke, it has sought to calm troubled waters with assurances that HEAF's problems will not affect the ability of students to obtain loans, of lenders to make those loans, or of guarantors to insure those loans. I congratulate the Secretary for those assurances.

Despite these assurances, the public has been subject for the better part of a week to rumors concerning the HEAF situation and a major crisis in the loan program. Those rumors have, without question, shaken the confidence of the public, financial institutions, and the Congress.

Unfortunately, the Department must bear some responsibility for heightening tensions. For beyond the Secretary's General assurances, the Department has yet to offer a program to solve the problems so dramatically reflected in HEAF's precarious financial condition. What we need now is more than assurances. We need a concrete proposal from the Department and we need it soon to quell concerns about the viability and health of the Stafford Student Loan Program.

The crisis accompanying the news of HEAF's financial difficulties once again raises the question of how the Stafford Student Loan Program has been administered. It is the question of whether or not there has been diligence in seeking strong, stern measures to control defaults and to stop those who would abuse the program.

It is important from the outset that one understand just how negligent the previous administration was in administering the Stafford Student Loan Program. It talked a good game, but its actions did not match its words. The former Secretary would decry, time and time again, the actions of students, schools, lenders, and guarantors. At the same time, however, oversight of the program languished. Program reviews and audits of schools, lenders, and guarantors dropped by more than one-half, from 1,977 in 1981 to 890 in 1986.

In other words, at the very time that we needed more and better enforcement of the law, we were getting precisely the opposite. The situation is not unlike law enforcement. You cannot expect to control crime when you cut the number of cops on the beat.

The Department also failed to exercise its powers over accreditation, eligibility, and certification to crack down on loan defaults. A school cannot participate in Federal student aid programs unless it is certified by the Department of Education, a process that involves the school being accredited by an accrediting organization recognized by the Secretary. Unfortunately, the Department has been lax in seeking to use those powers to rid the student aid programs of bad schools.

We are all too well aware of the very serious problem of increased defaults in the Stafford Student Loan Program. Defaults now cost the Federal Government almost $2 billion a year, a cost that is simply intolerable and one that threatens the viability of all Federal student aid programs.

We know that part of the increase in defaults is due to increased borrowing by those least able to repay, namely poor students who, faced with inadequate grant assistance, have had to borrow to pay for a postsecondary education. The story repeats itself again and again. A young man or woman from a poor family amasses a considerable debt in pursuing a higher education only to find that they cannot repay that debt, and they default.

But that is only part of the story. While there are community colleges and traditional 4-year institutions that have high default rates, the problem of defaults is most acute within the proprietary school sector. The vast majority of those schools are solid ones with owners who care deeply for the education and employment of their students. But there are a few schools, and a few lenders for that matter, whose practices have been reprehensive. They have shown a callous disregard for the hopes and dreams of poor students. They have used and abused those students. They have also used and abused their public trust. By abusing the Stafford Student Loan Program, they have sought to defraud and cheat the Federal Government. I have only contempt for such schools and their owners. They should not only be put out of business, but caught and prosecuted to the fullest extent of the law.

I am not saying that the Department of Education would necessarily have caught all who abused the loan program, but I am saying that diligent enforcement actions by the Department would undoubtedly have uncovered the problems earlier and enabled us to take immediate action. Their recent default regulations show promise of turning the situation around, but the legacy of inaction and neglect cannot be turned around in a few months.

Mr. President, the Senate's record in this area is superb. On four separate occasions over the past 3 years we have approved strong default legislation. Had we had our way, we would be facing a problem that would pale in comparison to the situation before us today.

Further, where the Pell grant in 1980 covered 41 percent of the cost of a college education, today it covers only 26 percent. Had Pell grants kept pace with the cost of living and the increased costs of a college education, it would not have been necessary for many students and families to go deeply into debt to pay education expenses.

Mr. President, it is without doubt that the problem with which we are confronted is very serious. But it is also a problem that goes well beyond the immediacy of the moment. The absence of solid program operation and oversight by an administration dedicated to drastic cutbacks and restructuring of student aid programs is a major reason that the current crisis is so severe.

Mr. President, the Senate takes a back seat to no one in its efforts to crack down in student loan defaults. With a unity of purpose and concern that transcends party lines and partisan differences, the Senate has again and again moved to confront the problem of loan defaults head on with stern, tough legislation. That is our ongoing responsibility, and I intend as chairman of the Education Subcommittee to stay the course that we have set.

In summary, I believe there are five areas where action is required. They include:

First, an immediate Education Department policy decision with respect to the HEAF situation so that order and confidence can be restored to the loan program;

Second, strong, effective enforcement of laws and regulations already on the books to rid the loan program of the abusers;

Third, adequate grant assistance, including increased appropriations for the Pell grant, to lessen the reliance upon borrowing to finance a college education;

Fourth, House passage of S. 568, the Senate-approved default legislation; and

Fifth, House agreement to the Senate-authored default provisions in S. 695, the President's education initiative.

In June 1987 I was joined by Senators Stafford, KENNEDY, HATCH, Matsu-

naga, DODD, SIMON, Stennis, FORD, BENTSEN, and HARKIN in introducing legislation that enabled a guaranty agency to withdraw its guarantee from any school that had a default rate in excess of 25 percent. That legislation passed the Senate as part of the omnibus trade bill. It was, as I said when I introduced the bill, "a particularly important way in which guaranty agencies can effectively and swiftly take action on schools that have alarmingly high default rates." It is a provision that would have been very helpful to the situation at hand, but it is also one on which we could not get agreement in conference with the House.

In December 1987 the Education Subcommittee held two hearings that focused specifically on the default problem. Those hearings resulted in legislation, S. 2647, that was introduced in March, 1988 by myself and Senators Stafford, KENNEDY, SIMON, HATCH, DODD, Weicker, MIKULSKI, Matsunaga, and METZENBAUM. It was unanimously reported out of the Committee on Labor and Human Resources in August and overwhelmingly approved by the full Senate in September.

That legislation required all schools, lenders, and guaranty agencies to implement a stringent default management plan if their default rate was more than 25 percent. Their participation in the loan program was at stake if they failed to do so.

The legislation also required the publishing of default rates for all schools, lenders, and guarantors. In addition, it included provisions for better collection procedures, improved reporting of defaulters to credit bureaus, and the withholding of academic transcripts for defaulters.

When House action on this legislation was not forthcoming, we reintroduced it again as S. 568 in March 1989, and passed it under unanimous consent. That legislation is still pending in the House.

When the new administration implemented its loan default regulations in 1989, it drew extensively upon the Senate-approved legislation. It is without question, however, that it would be far better if tough measures against defaulters were contained in law and not just in regulations.

When we considered the President's education initiative earlier this year, we included several provisions that would amplify and strengthen the regulations already issued by the Department. The House has now passed its version of S. 695 and returned it to the Senate with the request for a conference. I remain very hopeful that when the conference meets, differences can be worked out so that the legislation, including the Senate's default provisions, can go to the President for his signature yet this session.

Finally, I would be remiss if I did not point out that there is a very real correlation between loan defaults and the inadequacy of our Federal grant programs. The past decade was marked by a dramatic and unfortunate rise in borrowing. We began the last decade with the typical student aid package composed three-fourths of grants and only one-fourth loans. Today, it is precisely the opposite.

STUDENT LOAN PROGRAM—NEXT FOR BAILOUT?

Mr. SIMON. Mr. President, this morning USA Today carried a story with the headline "Student Loan Program—Next for Bailout," which unfortunately implies that the Federal student loan programs are next in line behind the savings and loan industry for a Federal bailout. There is reason to be concerned about the nearly $2 billion annually that we are spending on student loan defaults and the now tenuous financial situation of the largest guarantor in the Stafford Student Loan Program—the Higher Education Assistance Foundation. However, this kind of attention grabbing headline hurts, rather than helps, efforts to stem the drain on the Federal treasury due to student loan defaults.

One important point I would like to make, Mr. President, is that Congress and the Senate, in particular, have acted and continue to act in a responsible manner to bring student loan default costs under control. This is a complex and difficult problem that did not occur overnight and will not be solved overnight. But, in the past 5 years, Congress has taken significant and meaningful steps to prevent and control student loan defaults. Among these are passage of the 1986 higher education amendments which included 26 separate provisions aimed at reducing student loan defaults. These included provisions requiring multiple disbursements of loan proceeds; requirements for borrower education on their responsibilities regarding the loan; prohibitions on abusive lender practices; requirements for credit bureaus to be notified when a loan is in default; and prohibitions against defaulters from receiving any form of Federal student aid.

In 1987, I introduced S. 1931, the Student Loan Default Prevention and Debt Collection Act of 1987, to bring the default problem under control. This bill would impose critical new responsibilities on institutions, guarantors, and the Department of Education to reduce default rates. S. 1931 would require the Department of Education to present default rate statistics on an annual basis and to implement the national student loan data system. My bill also included requirements to ensure that students know they are receiving a loan and to improve exit counseling. Moreover, it would require the Department of Education to engage in more aggressive monitoring of eligible institutions.

Significant provisions from my bill were included in S. 2647, the Stafford Student Loan Default Prevention and Management Act, which the Senate passed in 1988. In addition, S. 2647 required schools, guarantee agencies, and lenders to implement a default management plan if their default rate exceeded 25 percent. The House of Representatives did not take up this measure, however, and a nearly identical bill, S. 568, was passed by the Senate in 1989.

When action on this measure languished, the Senate then added several provisions of S. 568 to the President's education proposals, S. 695, the Excellence in Education Act, and passed this bill on February 7, 1990. Among the 17 significant provisions in S. 695 designed to deal with the issue of defaults are provisions to: Prohibit granting student aid eligibility to any school that has had its accreditation terminated in the past 2 years; require that colleges be notified of former students who are delinquent who on their student loans; require the collection of additional borrower information on student loan applications; and clarify reporting requirements to credit bureaus for delinquent loans.

Moreover, in November 1989, Congress enacted into law new, tough provisions in the Omnibus Budget Reconciliation Act that severely restricted the ability of high default schools to participate in the Supplemental Loan Program. As a result, over 600 schools with default rates over 30 percent have been terminated from that program.

Mr. President, it is obvious that the Senate has moved aggressively to deal with these issues in a creative and comprehensive fashion. We are moving to use all the legislative tools available to us to address the student loan default problem. Senator PELL, Senator HARKIN, and others have shown tremendous leadership on these issues.

Next year, we will undertake a historic and comprehensive review of all of the student aid programs under the Higher Education Act. I am optimistic that we will move on a problem that compounds the student loan default problem and that is the insufficient funding of the Pell Grant Program. Sadly, the Pell Grant Program is no longer the cornerstone of our Federal student assistance portfolio. Now, Federal student aid policies force even the neediest students to borrow to finance their education. Offering low-income students the opportunity to acquire $10,000 or more in debt over 4 or 5 years is no real offer at all. Clearly, this is a situation that needs correc-

tion. In doing so, we can address multiple goals of reducing student loan defaults and improving access to higher education.

Much more can be done, Mr. President, both the prevent student loan defaults and to improve collection of current, outstanding loans. But, the suggestion that we have a problem on our hands that rivals the magnitude of the S&L scandal is an alarming headline grabber—aimed for shock value, not substance.

FOOD, AGRICULTURE, CONSERVATION, AND TRADE ACT OF 1990

The Senate continued with the consideration of the bill.

AMENDMENT NO. 2342

The PRESIDING OFFICER. Who yields time?

Mr. LUGAR. Mr. President, I yield myself as much time as I may require.

Mr. President, I want to make three tiers of arguments against this suggestion for two-tier target prices. The first set of arguments really pertain to the parliamentary situation that observers of this debate might have questioned or at least might have been curious about earlier this evening.

The distinguished Senator from South Dakota forwarded an amendment to the desk and followed that with another amendment and then an additional second-degree amendment. I perceive that his intent was to freeze out a second-degree amendment, on my part. And indeed in earlier colloquy with the distinguished Senator from South Dakota, I had indicated that we could not come to an agreement not to offer a second-degree amendment because farm program equity depended upon the amendment that I wished to offer; namely, that the two other program crops not in the Senator's amendment, cotton and rice, ought to be included in this equation.

There are four principal program crops, Mr. President. Wheat and corn are two of them, and they are the subject of this amendment. Curiously rice and cotton are exempted.

I would suggest one reason they were exempted from this consideration, Mr. President, was that a number of Senators coming predominantly from Southern States on our Agriculture Committee, and perhaps off the committee too, had very strong objection to the application by the Senator from South Dakota of his principles to the farm operations in their States.

The Senator from South Dakota, I believe, has a dilemma with regard to Southern Democrats, quite apart from Southern Republicans, and chose of course to exempt that problem from his amendment. I understand that, and I suspect the Senator in good grace did understand in early colloquy off the floor that I had a problem, too, mine centered upon making certain that we had equity.

In the course of these amendments, the distinguished Senator from South Dakota offered what turned out to be a study amendment as the amendment in the first degree. And, therefore, it turned out, for the benefit of those who were following the bidding at that point, that his attempt to amend that in the second degree failed because it did not correctly amend the study amendment. That was the same reason that my second-degree amendment needed to be rewritten—to be applicable. In the course of rewriting it, I was unable to regain the floor.

So, Mr. President, to make things very simple, I simply indicated to the distinguished Senator from South Dakota, the author of the amendment, that we would debate the issue on the basis of an increase in target prices. That is the basic issue. There are other issues, and they are interesting issues, but they have been selected carefully. And I want to unselect this process and get us back to the basic point, by dispatching all the parliamentary procedures. We are back to that point, and we are discussing an increase in target prices.

I must say, Mr. President, this incident is the first time in which our side of the aisle, our staff, really had no knowledge of the amendments that were to be offered. There has been, up to this point, a very good sharing of that information; a very good bipartisan movement of the farm bill. And this may have been simply an inadvertent exception to the rule but, Mr. President, when you are in a condition in which somebody suggests a first-degree amendment and then applies a second-degree amendment, and then tries to freeze out what everybody knows was coming, then I have my doubts about the condition. This is why I have described it in this detail.

I take it for granted, therefore, Mr. President, that it should comes as no surprise that I have a considerable degree of opposition to this whole proposal and the way that it has been approached this evening. I have indicated to the distinguished chairman of the committee, in addition to the Senator from South Dakota, that it appears that we are really into the heart of the matter as to whether this is the particular farm bill that may be passed this year. It is an argument we have had in the committee for quite a long while.

The position that I took in the committe and that ultimately a majority of the committee supported was there should be no increase in target prices. Now, that was not just an arbitrary finding, Mr. President. It is a situation as fundamental as the one our country faces at this particular moment.

Let me just move to a second phase of arguments, Mr. President, and these get away from the parlimentary conditions and our treatment of each other in this particular amendment to a basic fact of life in our country. The head of OMB, Mr. Richard Darman, wrote to members of the committee that our bill was as much as $25 billion over budget in a 5-year period of time.

I was startled by such an assertion. I appreciated that there clearly was a scoring by OMB and by the U.S. Department of Agriculture that might have put us $3.5 billion, maybe $5 billion over. The distinguished chairman of the committee, as one of the first actions in this debate, offered an amendment on behalf of the two of us to rectify the budget problem forthwith.

In the conference that I had with Mr. Darman, and the Secretary of Agriculture, later in the day, Mr. Darman stated, "You have met that problem. Your bill is at least at the budget level your own Senate Budget Committee suggested."

I said, "Well, apparently we have cured the problem."

He said, "No, you have not cured the problem. The problem is in the summit. The problem is in the sequester. If the summit does not finish by October 1st, or in whatever action is taken down the trail in a session to deal with the budget after the elections, a very painful sequester is likely."

The problem Mr. Darman saw was what he described as a $15 to $20 billion problem. In essence, in one way or another, at the time of the summit and its recommendations or in the sequester or in whatever arrangement finally Senators arrive at, reductions in agriculture of between $3 to $15 billion for the 5-year period of time; and perhaps more would be required.

So, Mr. President, we are talking about a very serious effort here to bring in a bill which at the very least meets the budget requirements that our own Budget Committee has suggested. But it should be known to Senators, and soon will be known to Senators, that a very differece set of propositions are going to occur. I think that was obvious at the time we were having the markup in the Agriculture Committee. This is why I suggested as a matter of common sense that when we came to the blank space in the bill establishing how much or how little should target prices be raised, we insert a zero. I said let us freeze these levels for 5 years so at a minimum we do not exacerbate the problem.

Mr. President, I appreciate that there may be persons, I hope they are not in this body, but there may be persons around the country who would say, why not raise target prices almost any amount you want to? Why not

have a joy ride at this point and say to the farmers of the country we are really doing a job for you? Why $4 wheat? Why not $6 wheat? We could pass that this evening. If the distinguished Senator really wants to raise target prices, why should we on our side of the aisle not say we will match you by a dollar upward, upward, and upward? Because it is not going to happen. It is going to crash in a heap.

I wish we did not have to have this debate again. We had it for 5 weeks in front of doors, behind closed doors, finally out in the open.

Certainly Senators are free if they want to, to try once again to raise target prices in a world in which the United States of America apparently has a deficit of at least $100 billion that has to be reduced this year. Even the modest $50 to $60 billion package proposed by some is difficult to come by, and in the face of this, Senators are still out here on the floor attempting to raise target prices.

Mr. President, I understand this is not the last amendment tonight that will attempt to do that, so what I say now is equally applicable to the Baucus amendment. That amendment goes on to raise target prices by the full cost of living, as I understand it, or some such formula, annually. It makes farmers whole. It literally is a COLA.

Mr. President, let me say that is money with a capital M. In fairness to the Daschle amendment, it is a fairly modest increase and there is, in further fairness, a difference of opinion. CBO says the Daschle amendment scores out at zero in terms of cost. The USDA says it is a $1.9 billion cost increase.

Mr. President, as I shall illustrate in a moment, USDA probably substantially understates the impact of this amendment upon the real world of farmers in Indiana or South Dakota as I know them and as I know how these programs are applied.

We are at a point, Mr. President, in which, if this amendment is adopted, or if the Baucus amendment is adopted, in my judgment present very critical blows to this particular bill. I do not want to be obscure, Mr. President. There really are no hidden amendments on our side at this point. Let me say, in the presence of everybody who happens to be witnessing this debate: If we are not able to come together in a bipartisan way, this bill will be revisited in a number of interesting ways. The distinguished chairman of this committee, to his credit, even prior to this speech, not as a result of it but prior to this speech, has said he will stand with me to defeat this amendment because he and I have worked together to try to bring about a bipartisan bill, and we think we have a good one.

There are alternatives to this bill, Mr. President. One alternative, and it is in the form of an amendment, printed, and prepared to be offered by a Senator on our side, is simply to substitute the 1985 farm bill for all that we have done. That solves the budgetary problem. And, furthermore, the 1985 farm bill had a decrease of target prices, year by year. It had some other clauses that in fact move more toward the market. That is an alternative. It might be one that our party would take seriously. It might be one we should try to implement.

Obviously, a second course of action is to go for a 1-year extension of that bill, if not for a 5-year extension, so that Senators can ponder the predicament and we can move our way through the rocks and shoals of the current budget situation.

I suspect, with either of these courses of action, there will be opposition, and the working through of those courses of action may take time. Mr. President, we are prepared to spend that time. It may be we shall not have a farm bill prior to this recess. Maybe we can see how the summit comes out first rather than the other way around. Maybe we will not match up in conference with the House, which I understand is due to conclude its work on Thursday.

My preference, obviously, Mr. President—and I shall not be obscure about that—is to proceed to a conclusion with this bill and to do so, hopefully, if not tonight, tomorrow; to get to conference; to retain some remarkable language with regard to conservation, the environment, and forestry, and international programs, and a whole lot of other things that are very important that are part of this legislation.

I would have thought, Mr. President, by this point, and given at least a clear path for this bill, Senators would have come to a conclusion that the feeling on our side that there should be no increase in target prices and no increase in loan rates and no further set-asides was one that could be shared. But, Mr. President, we are finally to have the last testing of that resolve, which is the Senator's right. There is no particular reason why the Senator, who opposed the whole idea of freezing these basic concepts, should be reconciled with it and should not have one last opportunity to address the situation.

Mr. President, let me approach a third set of arguments that pertain specifically to the Senator's amendment because there are some facets of this amendment that may have escaped the attention of many Members. The amendment excepts about 100 acres of farm base from set-asides to begin with, which is an interesting idea already. There are large numbers of small family farms—or farms that are not even family farms, that are hobby farms—that do not participate in farm programs.

Under this amendment, many are likely to decide that they want to do so. It is an attractive proposition. The target price is higher than it has ever been before. If a farmer does not have very many acres and can get an exemption from a set-aside for all of them, apparently up to 100, why not have a go at it? The normal wheat and corn farmer has a set-aside; that means a certain number of acres may not be planted. But the Senator's amendment takes care of that.

There is no reason why there cannot be a whole lot of sign-ups, people coming back into these programs and participating in the higher target price. As a matter of fact, Mr. President, this is the reason the bill increases in terms of its costs. By saying that you can only have the target price that has now escalated 2.5 percent on so many bushels of corn or so many bushels of sorghum or barley or oats or wheat, you invite people to rearrange their farming situations so that, in fact, all of their bushels qualify for payments.

I suspect there are some wheat farms, probably fewer corn farms, around the country that would find it difficult to rearrange in this way.

My suggestion, however, is that our calculations, are that the farm bill currently before us now, absent the Daschle amendment, puts the farmer who has 444 acres of wheat or more in better condition. In other words, if you have 444 acres of wheat, you will be better under the bill before this amendment. Likewise, if you have more than 191 acres of corn, you will be better off with the bill without the Daschle amendment.

Stated another way: Those who benefit under this amendment have less than 191 acres of corn, and less than 444 acres of wheat. Those are interesting cutoffs, but it seems to me important that people who are listening to this debate might calculate their self-interest and what is occurring to them in this proposition. Clearly, if you are not in the program currently and you have a hobby farm, if you sign up and the take the exemption not to have a set-aside, you are better off than you have ever been before. If this is really a hobby farm amendment, it hits it head on. It does a whale of a job for people who are not really family farmers at all. Ostensibly they are being assisted by this particular amendment.

Mr. President, I appreciate the sentiment that brought the amendment and in all fairness to the Senator, the problem of how to help the family farm has been before the committee this time and in the 1985 bill, the 1981 bill, 1977 bill, each of the previous bills addressed by this body.

I suggest that it probably will come to the attention of most Americans that farm prices and farm income have been increasing while target prices have been decreasing. This idea that somehow farm income in the aggregate or in the net is assisted by increasing target prices has proved erroneous.

That may be a revelation to many Americans who do not follow these programs closely, but I think not to most farmers. This is one reason why many surveys in my State indicate that from 35 to 40 percent of all farmers wish the Government would get out of all programs. And over another 30 percent are pleased with the 1985 bill and would be prepared to see it continued. Less than 20 percent indicate they want more money.

The Senator from South Dakota appeals to the 20, but not to the 75-plus. I suggest there are good reasons for that. Only 36 percent of Americans receive any payments under these programs; 64 percent of farming Americans receive no payments under these programs. So only a fairly large minority were even involved in the first place.

Mr. President, they have been involved in a way that has been very expensive to them, as well as to the Treasury of the country. Until we started lowering target prices and lowering loan rates, allowing the Secretary of Agriculture to make prices competitive, our exports had fallen off a very great deal. They have now been increasing very substantially. These have been the proven benefits of the 1985 farm bill, a bill which decreased target prices, which decreased loan rates. Now the Senator would reverse that process, even in the face of the budget situation that I have described.

Mr. President, I find the logic of the situation that brought forth this amendment incomprehensible, except with the thought that there are still persons in our society who believe that raising the target price, raising the Government price somehow brings more income.

I am saying, Mr. President, the evidence simply does not support that assertion. Superficially, a listener to this debate tonight might believe the Senator from South Dakota by offering $4.10 for a bushel of wheat as opposed to $4 is helping him out. Let me just assert that the evidence is that the farmer will not be helped. As a matter of fact, he will be injured by the process and for sure will be injured if you have very many acres of wheat. That is a fact given the formula that has been proposed here tonight.

So for all of these reasons, Mr. President, I hope that Senators will consider this amendment very, very carefully. It appears to me that this is a critical juncture in the farm bill debate. I have underlined it as clearly and as candidly as I know how. There is no subtlety in this argument whatsoever.

I shall make the same arguments on the next amendment, telegraphing ahead that we have identically the same predicament. Further, the next amendment was also offered in committee. We have been down that trail before. The Senator who offered it has a right for another day in court. He is about to have it.

But I made the point then, Mr. President, that in the parliamentary situation we had in the committee, the Republican votes were always fewer than the Democratic votes. The Republican votes on the floor are fewer than the Democratic votes. If it is the will of the majority to have higher target prices, higher loan rates, higher everything, in due course, those amendments can be carried.

I also point out, Mr. President, that the consequences of that action might result in no legislation. It might lead to a degree of satisfaction for a moment, an illusion that somehow income has been produced when, in fact, great difficulty had been produced.

I say, again, Mr. President, I look forward to working with the distinguished chairman for a strong bipartisan farm bill that we can carry into conference. I look forward to working with him, to doing the very best we can under the circumstances with the summiteers and with all those who would rearrange our predicament, either in the summit or under Gramm-Rudman-Hollings. We have some tough work ahead of us.

This country has a management of Republicans in the administration and Democratic leadership in the Congress. We perceive that; we accept those are the facts. That means that there must be very substantial bipartisan understanding. I will just say, Mr. President, the understanding on the part of the administration, leaving aside my own preferences, is that this farm bill needs to come in, at minimum, where the Senate Budget Committee said. To proceed in the way the amendment does tonight would do violence to that idea. It is an unacceptable proposition, even if there are votes in a partisan way to adopt it.

So I ask that that not occur. I thank the indulgence of the Chair in hearing out these complex arguments.

Mr. LEAHY addressed the Chair.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. Mr. President, I ask to speak on the time of the opponents of the amendment.

Mr. President, I will speak briefly. There has been a great deal of discussion of the bipartisan coalition that has put together this bill, and I am proud of that coalition. I would note on behalf of the distinguished Senator, my close friend from South Dakota, Senator DASCHLE, that he has not by proposing this amendment violated his position in forming such a coalition. The distinguished Senator from South Dakota was 1 of 5 Senators who voted against the bill as it came out of the committee. He was consistent throughout the debate, making clear the night of the vote on the bill his feelings on what should have been done differently. The amendment that he has offered is consistent with everything he said throughout the debate, throughout private discussions, and at the time of the vote.

Having said that, Mr. President, I have said before that if I wrote this farm bill and could simply pass it through the Senate and the House, I would write a different farm bill. Some sections of the bill would remain the same, but there would be a number of other areas that would be different. The same could be said of the distinguished Senator from Indiana, the distinguished Senator from South Dakota, the distinguished Presiding Officer, or any of the other Members of this body.

The fact is, however, Mr. President, we have only one bill before us. We have worked closely with Senators to craft this bill. The Senator from Indiana has been consistent, honest, forthright, and direct in what he wanted in the bill. There has never been a time that he has in any way withheld from me his ideas on what he wanted to do. There has never been a time when he has been anything but completely honest with me.

By the same token, Mr. President, I have done the same with him. Each of us has had to give up some of the positions we wanted to hold in this bill. We have attempted to do what we see as our responsibility to this great body, and that is to bring a highly complex and extremely expansive piece of legislation to the floor of the Senate. Although this bill is complex and expansive, this country and those who produce the food and fiber of this country would be much worse off without this important piece of legislation. I believe this is the most progressive farm bill I have seen in the 16 years I have been in the Senate. I have seen four farm bills during that time. This is certainly the most environmentally progressive farm bill. It is the most forward-looking farm bill in trying to determine alternative forms of agriculture and methods of growing food and planning for the next century. This bill looks directly at the problems that have developed in our Food For Peace Program, Public Law 480, and seeks to correct these problems. Again, I think this is one of the most progressive, forward-looking pieces of legislation since this great program

was founded a quarter of a century or more ago.

I could go through a whole list of other things, Mr. President, but I believe it would be a true shame and a great loss to this country if this progressive piece of farm legislation does not go through this body and does not go through conference, emerging in much the shape it is in now.

I rarely ever find myself in disagreement on rural or farm issues with the Senator from South Dakota, and perhaps at another time much of what he said could appeal to me—but not in this bill. We have, in effect, crated a Rubik's Cube where budget restraints and the sense of responsibility are interrelated with each commodity. This amendment would begin to change the face of that Rubik's Cube and would disrupt the delicate coalition we have put together.

I have heard rumors that there might be amendments to change the bill, including changes in target prices, loan rates, and cuts across the board. I hope that Senators who voted for this bill in committee would not consider such amendments as long as we who support the bill are able to maintain the votes on this floor.

So, Mr. President, I am prepared to stay here as many days and as many hours as are necessary. Perhaps it is my Vermont upbringing, but I seem to have been blessed with an extraordinarily strong constitution. I can stay as long as is necessary.

I do not think we are here for an endurance record. We are here to put together responsible legislation for this Nation. This legislation impacts our Nation's security and how we produce our food. It addresses what I believe is the greatest moral issue in this country—how to feed the millions of hungry Americans.

I believe that if the coalition we have put together starts to come apart, this bill will go on this week, and the next week. I say this based on the precedent set for the past four farm bills. We would then spend a couple weeks more on this bill, and maybe it would be set aside sometime in mid-August as we moved to the defense bill and the debt limit bill. Maybe we would come back to this bill trying to complete it before the Labor Day weekend.

I would be happy to do that. I might suggest, Mr. President, that having gone up and down that hill and having pushed this bill like Sisyphus pushing the rock up the hill, we are eventually going to end up at just about the point were we are now.

I can play the string out either way, Mr. President. I hope, however, that the Senate would realize the enormous amount of work that has gone in this bill, and would realize there was a lot more we might have done had we not had budget restraints. We have a good, solid bill, a bill that is within the means of the United States but also reflects the needs of those who produce the food and fiber of this country. I hope it will be supported.

Mr. DASCHLE addressed the Chair.

The PRESIDING OFFICER. The Senator from South Dakota.

Mr. DASCHLE. I inquire as to the amount of time that remains on both sides.

The PRESIDING OFFICER. The Senator from South Dakota has 21 minutes remaining; the Senator from Indiana has 6½ minutes remaining.

Mr. DASCHLE. Mr. President, I yield myself such time as I may consume not to exceed 15 minutes.

Mr. President, I understand the chairman's frustration, and I, like him, would like to see this legislation and the debate ultimately come to a close. But I must say also this is our last opportunity, maybe in 5 years, to redirect whatever commitment there is at the Federal level to ensure that farmers have some opportunity to maintain economic viability.

The fact is, I am thinking this may be the last opportunity. I cannot foresee a circumstance in the next couple of days, next year, the year after, when I will have the opportunity I have tonight to make as good a statement as I can about the direction we are taking in farm policy as we pass this legislation. So I understand his frustration, but I ask him and others to bear with us as we do the best we can to make the most of what we have.

Let me respond briefly to a couple of points made by the distinguished Senator from Indiana, one going back to the very first comment he made about lack of information. If he did not have the proper information, I apologize. It was not my intent to keep it.

We have been working almost up until the last minute. We have been pressed for the last several days to come forth with amendments. Unlike other Senators, in certain cases we have not felt totally prepared, but to accommodate the chairman and others, we have gone forth and offered our amendments. It is not my intention to prevent the Senator from Indiana from having the appropriate information to make his case.

Second, with regard to equity, the Senator indicated earlier that cotton and rice are to be treated the same as all other crops. The fact is they are not being treated the same. The fact is we have a marketing loan program for cotton and rice right at this moment. It has worked pretty well for the last 5 years. Some of us in wheat and feed grains would love very much to have a marketing loan program for wheat and feed grains. We are told we cannot afford it. We are told there are a lot of reasons why a marketing loan program will not work for wheat and feed grains. I disagree with that.

I indicated in the committee, as we offered our amendments, that you can make a solid case for a marketing loan program under these circumstances for wheat and feed grains. But we are told all crops are different.

Now we come to the floor. We are told there has to be equity, some kind of parity between wheat and feed grains and cotton and rice. If there has to be parity, maybe we ought to revisit the marketing loan concept for all crops. We are not going to do that tonight.

I guess the third point is one that is most important to me. We have been told time and again if only the budget would allow, how we could ensure that smaller farmers are going to be treated in a way that will ensure their long-term economic viability. It is the budget that is constraining us. It is the budget that is forcing us to make some of the decisions.

To a certain extent. I acknowledge budget constraints. They are there. They are real. We are dealing with a lot less money tonight than 5 years ago. We recognize that. We probably will deal with less in 1995 than we are dealing with in 1990. But if that is the case, it makes my amendment all the more important. As we divide up what shrinking pie there is, does it not make sense to do in agriculture what we do with just about every other program, including our tax structure: that is, make it more progressive? Do we not want to ensure that those benefits that are available help those who are in the position to use those benefits the most efficiently, the most productively, and make them the most economically viable? There is no doubt in my mind.

I will acknowledge the fact the bigger you are, the more you can benefit from volume efficiency. We recognize that to an extent. You can produce the millionth bushel at a cost less than you can maybe the hundred thousandth bushel. I doubt very much that anybody would dispute that.

So clearly there is a built-in advantage to size already. But why, if all we have is a shrinking budget pie tonight, help the big get even bigger? Why would we continue to ensure that these big producers around the country are going to benefit even more than the small producers? Why would we reverse that in farm policy when we do not do it in just about every other Federal program? That is what I am trying to do, simply acknowledge the fact that there is a need for progressivity.

There is a need to recognize that the benefits targeted are going to help small producers a whole lot more than they are going to help the big producers who have other ways in which to ensure their economic viability in the future.

I must remind my colleagues one more time tonight; it may be the last time I bring this up but it is worth repeating because it is so relevant to what I am doing tonight.

The Congressional Budget Office has indicated that if we do nothing, if we do what is suggested by the bill before us, the fact is we can expect 500,000 fewer family farms in 1995. We can expect that to happen.

Which do you think they are going to be? Are they going to be the 100,000-bushel farms? Are they going to be the 10,000-, the 15,000-, the 20,000-bushel farms? Or is there a good chance they are going to be the 200- or 300-acre farms? Who in here thinks it is going to be the large farms that are going to have difficulty surviving in the future?

We all know what is going to happen. Those 500,000 family farms are going to be the small ones. They are going to be the ones that keep these small towns operating. They are going to be the family farms that we have all said we support in creating farm policy.

The Senator from Indiana also indicated that this is going to mean some dramatic changes and shifts in planning patterns. I think he is right. I think there will be some shifts. But the Congressional Budget Office in their report to us said we have taken that into account as we created our budget neutrality tonight with this amendment.

We recognize there will be shifts. Those shifts are represented in the program as outlined in the chart I have discussed.

So the working information that we have, the information upon which we base our decisions budgetarily here in the Senate is from the Congressional Budget Office. The CBO has indicated that this amendment is budget neutral. I think we need to go by that. We have not other reason to dispute their figures.

We are told tonight that this is a deal buster. There have been all kinds of threats of going back to the 1985 farm bill, having a 1-year extension, maybe even taking this bill into August or September.

I suppose that the definition of a deal buster is a moving target, frankly. I did not hear anybody talk about a deal buster this afternoon when there was an amendment to strike the honey program from the farm program—strike it out entirely over a 4-year period of time. No one raised "deal buster" then. But the fact is tonight we do not have a honey program in this farm program after 4 years. It is going to be gone. Nobody raised a deal buster concern then, but the honey program was part of the deal.

I do not know what the agreement included and, frankly, I was skeptical at the time about whether we had any kind of a deal concerning all of the components of the bill. But certainly there was not a deal when it came to some of the issues that already have come up before the Senate.

We are told the distinguished Senator from Indiana indicated that farm income has increased. That has been documented.

However, I can recall so vividly a chart used by the distinguished Senator from North Dakota time and again depicting what farm income has done over the last five decades. That chart very clearly indicates that for the period of the eighties farm income is the lowest that it has ever been on record; farm income in the eighties is the worse it has ever been.

The distinguished Senator from Indiana has also indicated that raising target prices somehow is the only means we have by which we can raise income. I do not acknowledge that. I know income ought to be generated in the marketplace. I am hopeful that through some of the things we have done in the last couple of days we will generate more income in the marketplace. The fact is if we are going to create any kind of a, say, safety net for those farmers who need it the most, having an opportunity to target those benefits, the first 12,000 bushels of wheat, gives us the only opportunity to prevent many of these farmers from falling right through that safety net in the next 5 years.

We already know they are going to have to absorb a 20-percent reduction in the amount of money they are going to receive through the farm program. A 20-percent hit over the next 5 years. That is already a given. The question is how much more will they absorb if inflation through their costs of production goes up even more than 4 percent annually? The question is how much more will they absorb if inflation through their costs of production goes up even more than 4 percent annually? We could see a 30- to 40-percent increase in their cost of production, and how many family farmers are we going to have then?

Mr. President, I know that this is our last gasp, this is our last opportunity to do something to ensure that given the budgetary constraints, given the philosophical differences that exist between many on the side of the aisle, many on this side of the aisle, with regard to the value of the farm program and what it can means. Given all of that, I realize that we are running an uphill battle here.

We recognize that given the uphill battle we have against both managers of the bill that our chances of passing an amendment like this may be slim. But it is disconcerting to be from a State like mine, to travel through the countryside and know that some of the farms that are just hanging on right now will not be there next year.

They will not be there by the time we write another farm bill. And the small small towns that are relying upon those family farms will not be there either.

I guarantee you there are going to be Senators who will come in here and say we have to provide some assistance to these rural communities, a huge new rural development program, to make sure these small towns remain viable. Well, this is the best rural development program farm States could have. If those farmers do well, those small towns are going to do well. If they do well, we do not have to worry so much about economic development in the future.

So I hope that people will recognize the importance of this amendment to small family farms. I hope they recognize that we are going to be able to agree to this amendment without spending one additional dollar. I hope they are going to remember that if we fail in this, there really is no other opportunity to help, that our opportunity now will be lost. As we revisit this issue 5 years from now, I guarantee you we are going to be talking about a lot fewer farms than we are tonight.

I retain the remainder of my time.

Mr. CONRAD addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. DASCHLE. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 7½ minutes.

Mr. DASCHLE. I yield 5 minutes to the Senator from North Dakota.

Mr. CONRAD. I thank the Senator from South Dakota.

I rise tonight because I have heard again on the floor this evening things that deeply disturb me. I have heard from the other side that we cannot raise target prices, we cannot raise loan rates. Over and over a line is drawn in the sand saying you cross over that line and we are done; we take up our marbles and go home.

Mr. President, I thought this business of legislating was built on compromise, but over and over, as we have gone through the writing of a farm bill, we have been presented with ultimatums. I submit that it would be possible for others to issue ultimatums as well, for others to say, for example, if we do not raise target prices, if we do not raise loan rates, there will be no farm bill. But that has not been the process that some of us have engaged in.

Instead, we have sought to reach accommodation, to write a farm bill that was responsible to taxpayers, as well as meeting the needs of farm producers.

Mr. President, I think for those who are watching and listening to this debate tonight, they ought to know that the fact is, this bill lowers target

prices; it lowers target prices, because it freezes them for wheat at $4 a bushel for the next 5 years.

Mr. President, I wish that I could freeze the expenses that farmers face when they go to the store to buy the things that they need. There is not a person that would not understand that if their wages are frozen for the next 5 years, they are, in effect, taking a cut.

Perhaps we need to remind people of what has happened over the last 5 years. Five years ago target prices in this country were not $4 a bushel; they were $4.38 cents a bushel 5 years ago. We have taken a 10-percent cut, plus the effect of inflation over the last 5 years, another 20 percent. So farmers who grow wheat in this country have taken a cut of 30 to 35 percent over the last 5 years. Now they are being told, well, guess what, gang, get ready to take another 20 percent.

Mr. President, if we were above the cost of production in terms of the target price, maybe you could understand that logic. For the last 2 years we have been below the cost of production in terms of the prices our farmers get. I do not know of another industry that could long survive when they are receiving below the cost of what is required to produce the product that they put on the market.

Make no mistake, the result of this will be fewer farmers. The result of this will be further decline in the rural economy. The result of this will be more of Main Street in rural America boarded up. The result of this will be more people leaving rural States. The result of this will be more economic hardship and real pain, because what it comes down to tonight, Mr. President, is that we are talking about people, people on the land, struggling to make a living, who are hurting. In my State it is estimated that 30 percent of the farmers are on the brink of bankruptcy. Tonight we are asked to make choices. Are we going to help those people stay on the land, or are we going to push them off? Those are the choices that are left to us tonight.

Mr. LUGAR addressed the Chair.

The PRESIDING OFFICER. The Senator from Indiana is recognized.

Mr. LUGAR. How much time do I have?

The PRESIDING OFFICER. The Senator has 6½ minutes remaining.

Mr. LUGAR. Mr. President, we are not talking about people on this side of the aisle. I hope we are all talking about people on both sides of the aisle. Agriculture is a serious business. The bill that has been brought by the committee as a whole to the floor seeks to enhance the incomes of people, seeks to keep people on the farms. To assert anything different is to take, I suppose, a position that one can absolutely predict the future.

I simply say, my assertion is that the farm bill of 1985 produced more income during the last 2 years than ever before, and that is documented.

Mr. President, the idea of 500,000 people leaving farms is based in large part, I suspect, on problems with statistically determining who is a farmer to begin with—under the CBO definition, a farmer is anybody in America selling 1,000 dollars' worth of farm produce each year. There are effectively 300,000 farmers with incomes of $100,000 or more and another 400,000 between $40,000 and $100,000 totalling about 700,000 farmers involved in commercially viable agriculture.

Mr. President, essentially we are trying to keep everybody who wants to farm viable, but I think we must do that by enhancing our markets. We do that by increasing exports. We do that by helping out in research, as to how inputs might be less expensive and the bottom line heftier.

Mr. President, to give the idea this is the last chance for farming America for 5 years seems to me as a bold assertion, unsupported by any real evidence. I believe that a bipartisan majority of our committee found a very good road for agriculture for the next 5 years and fashioned a very good bill.

Our predicament at this point is simply, as the Senator from South Dakota says, to get through this last gasp of persons who have a different idea. I do not think the evidence supports that their ideas would lead to greater prosperity for more farmers, small or large.

Let me just say that each one of us has had to compromise a good bit, and the distinguished chairman of the committee alluded to this fact earlier on. I have worked with him in trying to fashion those compromises.

Let me be very explicit. Today I stood on the floor and suggested to Senators that although I felt the distinguished Senator from Minnesota [Mr. BOSCHWITZ] made an excellent argument with regard to loan rates, he suggested that what goes up must come down and that, an average of 5 years ought to prevail. That is essentially the loan rate provisions of the farm bill of 1985.

The fact is that in our committee we agreed to have a floor for those loan rates, the floor being current levels. In the same way we are freezing target prices, at current levels. I thought the distinguished Senator from Minnesota made a lot of sense. But I sensed, as did the distinguished chairman of the committee, since we had talked a lot about loan rates, that we had talked a lot about target prices, that we were getting pretty close to the quick. Thus, I voted "no" on that amendment, as did a dozen Senators on our side of the aisle, and it was fairly, decisively defeated.

Mr. President, I am hopeful that we are going to hold together on this vote and on any other attempt to change the loan rate or target price picture, whether it be favorable to my side of the aisle or the other side of the aisle. We all can think of ways in which our economic theory might work and we can all think of ways to unravel a bill that seems to me to be very close to a very successful completion, and one in which we can take considerable pride. It is a pro-agricultural America bill. It will enhance income in our country.

Let me just simply add, realistically—I have also added in my arguments earlier on—the fact is we are not dealing in a vacuum. If we were simply left tonight with this bill and we completed action, the results for farmers in America would be trumpeted. However, realistically, we know that this is not the end of the trail; that elsewhere in this city, members of the summit meet. If they are not successful, Gramm-Rudman-Hollings comes in October 1. It is seeking to raise target prices in the midst of what clearly is going to be budget reduction, in which agriculture will share not an inordinate amount. And I will stand with the distinguished chairman to make certain, along with other members of the committee, that no more than our fair share is suffered in that process. But it is going to happen.

Mr. President, in the face of that, to assert that somehow or other by raising target prices tonight we are saving agricultural America, or a certain number of farmers, and so forth, is to fly in the face of the total reality we see all about us.

Mr. President, I am hopeful the amendment will be defeated, as well as any other attempts to change the target prices upward. And I would suggest that we are very close to a successful completion that I hope will not be disrupted.

I understand the distinguished Senator from Mississippi would like to be heard on the bill. I yield to him 2 minutes.

The PRESIDING OFFICER (Mr. EXON). The Senator has 31 seconds remaining.

The Senator from Mississippi is recognized for that period of time.

Mr. COCHRAN. Mr. President, let me add a word. The fact is that the committee has worked very, very hard to craft this legislation, and anyone of us on the committee could come in with an amendment at this point on the floor and make a persuasive argument that the bill could be improved.

After months and months of very, very hard work, I hope that the Senate will give the committee the benefit of the doubt and vote for the committee's position on this bill, and reject the amendment that is being offered.

The PRESIDING OFFICER. All time assigned to the Senator from Indiana has expired. The Senator from South Dakota has 2 minutes and 28 seconds.

Mr. DASCHLE. I yield back the remainder of my time.

The PRESIDING OFFICER. All time has expired or has been yielded back.

The question is on agreeing to the amendment of the Senator from South Dakota. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CRANSTON. I announce that the Senator from Massachusetts [Mr. KENNEDY] is necessarily absent.

Mr. SIMPSON. I announce that the Senator from New York [Mr. D'AMATO] and the Senator from Utah [Mr. GARN] are necessarily absent.

I further announce that the Senator from South Dakota [Mr. PRESSLER] is absent due to a death in the family.

The PRESIDING OFFICER. The Chair will remind the Senate we are 5 minutes over the required voting time. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 24, nays 72, as follows:

[Rollcall Vote No. 170 Leg.]

YEAS—24

Akaka	Glenn	Metzenbaum
Biden	Harkin	Mitchell
Bingaman	Hollings	Pell
Bryan	Kerry	Reid
Burdick	Kohl	Riegle
Conrad	Lautenberg	Rockefeller
Daschle	Levin	Simon
Fowler	Lieberman	Wirth

NAYS—72

Adams	Exon	McClure
Armstrong	Ford	McConnell
Baucus	Gore	Mikulski
Bentsen	Gorton	Moynihan
Bond	Graham	Murkowski
Boren	Gramm	Nickles
Boschwitz	Grassley	Nunn
Bradley	Hatch	Packwood
Breaux	Hatfield	Pryor
Bumpers	Heflin	Robb
Burns	Heinz	Roth
Byrd	Helms	Rudman
Chafee	Humphrey	Sanford
Coats	Inouye	Sarbanes
Cochran	Jeffords	Sasser
Cohen	Johnston	Shelby
Cranston	Kassebaum	Simpson
Danforth	Kasten	Specter
DeConcini	Kerrey	Stevens
Dixon	Leahy	Symms
Dodd	Lott	Thurmond
Dole	Lugar	Wallop
Domenici	Mack	Warner
Durenberger	McCain	Wilson

NOT VOTING—4

D'Amato	Kennedy
Garn	Pressler

So the amendment (No. 2342) was rejected.

Mr. LUGAR. Mr. President, I move to reconsider the vote.

Mr. MITCHELL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER (Mr. DASCHLE). The majority leader is recognized.

Mr. MITCHELL. Mr. President, I ask unanimous consent that Senator GRASSLEY be recognized to offer an amendment on flexibility, and that there be a time limitation for debate of 1 hour, equally divided in the usual form, and that no second-degree amendments be in order thereto.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

Mr. MITCHELL. Mr. President, accordingly, Senator GRASSLEY will now offer his amendment on flexibility. There will be 1 hour of debate, equally divided. Upon the use or yielding back of time there will be a vote on the Grassley amendment this evening.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2343

Mr. GRASSLEY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislation clerk read as follows:

The Senator from Iowa [Mr. GRASSLEY] for himself, Mr. SIMON, Mr. BOSCHWITZ, Mr. DIXON, and Mr. KASTEN proposes an amendment numbered 2343.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 89, beginning with line 18, strike out everything down through line 3 on page 91 and insert the following:

"'(F) PLANTING PROGRAM CROPS, OILSEEDS, OR OTHER CROPS ON REDUCED ACREAGE.—

"'(i) IN GENERAL.—Subject to clause (ii), the producers on a farm may plant a program crop, an oilseed, a conserving use crop, or any other crop considered appropriate by the Secretary, on not more than one-half of the reduced acreage on the farm.

"'(ii) LIMITATION.—If the producers on a farm elect to plant a program crop or other approved crop on reduced acreage under this subparagraph, the amount of the individual program acreage on which a producer would otherwise be eligible to receive deficiency payments shall be reduced by such amount as the Secretary determines appropriate. If the producers on the farm are participating in a program established for more than one program crop, the Secretary may prorate the reduction in individual program acreage based on the acreage planted or considered planted on the farm to all such program crops.'"

On page 91, beginning with line 17, strike out everything down through line 9 on page 92 and insert the following:

"'(ii) LIMITATION.—If the producers on a farm elect to plant or harvest an approved crop on reduced acreage under this subparagraph, the amount of the individual program acreage on which a producer would otherwise be eligible to receive deficiency payments shall be reduced by such amount as the Secretary determines appropriate. If the producers on the farm are participating in a program established for more than one program crop, the Secretary may prorate the reduction in individual program acreage based on the acreage planted or considered planted on the farm to all such program crops.'"

On page 92, line 21, strike out "options" and insert "option".

On page 92, beginning with line 22, strike out everything down through line 3 on page 93.

On page 93, line 4, strike out "(C)" and insert "(B)".

On page 94, beginning with line 10, strike out everything down through line 13 on page 95.

On page 95, line 14, strike out "(E)" and insert "(C)".

[FEED GRAIN PROGRAM]

On page 138, beginning with line 23, strike out everything down through line 8 on page 140 and insert the following:

"'(F) PLANTING PROGRAM CROPS, OILSEEDS, OR OTHER CROPS ON REDUCED ACREAGE.—

"'(i) IN GENERAL.—Subject to clause (ii), the producers on a farm may plant a program crop, an oilseed, a conserving use crop, or any other crop considered appropriate by the Secretary, on not more than one-half of the reduced acreage on the farm.

"'(ii) LIMITATION.—If the producers on a farm elect to plant a program crop or other approved crop on reduced acreage under this subparagraph, the amount of the individual program acreage on which a producer would otherwise be eligible to receive deficiency payments shall be reduced by such amount as the Secretary determines appropriate. If the producers on the farm are participating in a program established for more than one program crop, the Secretary may prorate the reduction in individual program acreage based on the acreage planted or considered planted on the farm to all such program crops.'"

On page 140, beginning with line 22, strike out everything down through line 14 on page 141 and insert the following:

"'(ii) LIMITATION.—If the producers on a farm elect to plant or harvest an approved crop on reduced acreage under this subparagraph, the amount of the individual program acreage on which a producer would otherwise be eligible to receive deficiency payments shall be reduced by such amount as the Secretary determines appropriate. If the producers on the farm are participating in a program established for more than one program crop, the Secretary may prorate the reduction in individual program acreage based on the acreage planted or considered planted on the farm to all such program crops.'"

On page 142, line 2, strike out "options" and insert "option".

On page 142, strike out lines 3 through 9.

On page 142, line 10, strike out "(C)" and insert "(B)".

On page 143, beginning with line 15, strike out everything down through line 19 on page 144.

On page 144, line 20, strike out "(E)" and insert "(C)".

On page 145, line 1, strike out "(F)" and insert "(D)".

[COTTON PROGRAM[

On page 194, beginning with line 5, strike out everything down through line 14 on page 195 and insert the following:

"'(F) PLANTING PROGRAM CROPS, OILSEEDS, OR OTHER CROPS ON REDUCED ACREAGE.—

"'(i) IN GENERAL.—Subject to clause (ii), the producers on a farm may plant a program crop, an oilseed, a conserving use crop, or any other crop considered appropriate by the Secretary, on not more than one-half the reduced acreage on the farm.

"'(ii) LIMITATION.—If the producers on a farm elect to plant a program crop or other approved crop on reduced acreage under this subparagraph, the amount of the individual program acreage on which a producer would otherwise be eligible to receive deficiency payments shall be reduced by such amount as the Secretary determines appropriate. If the producers on the farm are participating in a program established for more than one program crop, the Secretary may prorate the reduction in individual program acreage based on the acreage planted or considered planted on the farm to all such program crops.'"

On page 196, strike out lines 4 through 21 and insert the following:

"'(ii) LIMITATION.—If the producers on a farm elect to plant or harvest an approved crop on reduced acreage under this subparagraph, the amount of the individual program acreage on which a producer would otherwise be eligible to receive deficiency payments shall be reduced by such amount as the Secretary determines appropriate. If the producers on the farm are participating in a program established for more than one program crop, the Secretary may prorate the reduction in individual program acreage based on the acreage planted or considered planted on the farm to all such program crops.'"

On page 197, line 8, strike out "options" and insert "option".

On page 197, strike out lines 9 through 15.

On page 197, line 16, strike out "(C)" and insert "(B)".

On page 198, beginning with line 21, strike out everything down through line 25 on page 199.

[RICE PROGRAM]

On page 237, beginning with line 14, strike out everything down through line 24 on page 238 and inserts the following:

"'(F) PLANTING PROGRAM CROPS, OILSEEDS, OR OTHER CROPS ON REDUCED ACREAGE.—

"'(i) IN GENERAL.—Subject to clause (ii), the producers on a farm may plant a program crop, an oilseed, a conserving use crop, or any other crop considered appropriate by the Secretary, on not more than one-half the reduced acreage on the farm.

"'(ii) LIMITATION.—If the producers on a farm elect to plant a program crop or other approved crop on reduced acreage under this subparagraph, the amount of the individual program acreage on which a producer would otherwise be eligible to receive deficiency payments shall be reduced by such amount as the Secretary determines appropriate. If the producers on the farm are participating in a program established for more than one program crop, the Secretary may prorate the reduction in individual program acreage based on the acreage planted or considered planted on the farm to all such program crops.'"

On page 239, beginning with line 14, strike out everything down through line 6 on page 240 and insert the following:

"(ii) LIMITATION.—If the producers on a farm elect to plant or harvest an approved crop on reduced acreage under this subparagraph, the amount of the individual program acreage on which a producer would otherwise be eligible to receive deficiency payments shall be reduced by such amount as the Secretary determines appropriate. If the producers on the farm are participating in a program established for more than one program crop, the Secretary may prorate the reduction in individual program acreage based on the acreage planted or considered planted on the farm to all such program crops."

On page 240, line 19, strike out "options" and insert "option".

On page 240, beginning with line 21, strike out everything down through line 2 on page 241.

On page 241, line 3, strike out "(C)" and insert "(B)".

On page 242, beginning with line 5, strike out everything down through line 8 on page 243.

On page 243, line 9, strike out "(E)" and insert "(C)".

[GENERAL PLANTING FLEXIBILITY]

On page 318, beginning with line 21, strike out everything down through line 22 on page 320 and insert the following:

"'SEC. 505. PLANTING FLEXIBILITY.

"'(a) FLEXIBLE CROP ACREAGE.—

"'(1) FLEXIBILITY AUTHORITY.—Notwithstanding any other provision of this Act, the Secretary shall permit producers on a farm to plant for harvest up to 25 percent of (A) the crop acreage base established on the farm for each program crop, and (B) the historical oilseed planting on the farm to—

"'(i) any program crop;

"'(ii) any oilseed; or

"'(iii) any conserving use crop, or any other crop, considered appropriate by the Secretary.

Acreage planted to such approved crops shall be referred to as 'flexible crop acreage'.

"'(2) DEFICIENCY PAYMENT BENEFITS.—For the purposes of determining deficiency payments under this Act, flexible crop acreage under paragraph (1) shall be considered to be planted to the program crop for which such approved crop is substituted.

"'(3) BASE PROTECTION.—For the purposes of determining the normal crop acreage and crop acreage bases, any flexible crop acreage under paragraph (1) shall be considered to be planted to the program crop or oilseed for which such approved crop is substituted. The Secretary shall ensure that the crop acreage bases and the normal crop acreage established for the farm are not increased due to such plantings.

"'(b) SPECIAL NONRECOURSE LOANS FOR SOYBEANS AND OTHER OILSEEDS.—Notwithstanding any other provision of this Act, the Secretary shall support the price of the quantity of soybeans and other oilseeds produced on flexible crop acreage as provided in this section.

"'(1) LOAN LEVELS AND RELATED PROVISIONS FOR SOYBEANS.—Notwithstanding any other provision of law, the provisions of law in effect under this Act for the establishment of the level of loans and purchases for the 1990 crop of soybeans shall be applicable to the establishment of the level of loans and purchases for the quantity of soybeans produced on flexible crop acreage during the 1991 through 1995 crop years.

"'(2) LOAN LEVELS FOR OTHER OILSEEDS.—Notwithstanding any other provision of this Act, the level of loans and purchases for the quantity of sunflower seed, canola, rapeseed, safflower, or flaxseed produced on flexible crop acreage during the 1991 through 1995 crop years shall be such level as the Secretary determines is fair and reasonable in relation to the loan level established for soybeans under this subsection.

"'(c) LIMITATION ON BENEFITS.—Except as provided in subsection (a)(2), the Secretary shall not make program benefits, other than price support loans authorized under this Act for program crops and under this section for soybeans and other oilseeds, available to producers with respect to a program crop or oilseed planted on flexible crop acreage under subsection (a).'"

On page 89, strike out lines 12 through 17 and insert the following:

"'(E) INDIVIDUAL FARM PROGRAM ACREAGE.—Except as otherwise provided in subsection (c), the individual farm program acreage shall be the acreage planted on the farm to wheat for harvest and any flexible crop acreage that is considered planted to wheat under section 505, within the permitted wheat acreage for the farm as established under this paragraph.'"

On page 138, strike out lines 17 through 22 and insert the following:

"'(E) INDIVIDUAL FARM PROGRAM ACREAGE.—Except as otherwise provided in subsection (c), the individual farm program acreage shall be the acreage planted on the farm to feed grains for harvest and any flexible crop acreage that is considered planted to feed grains under section 505, within the permitted feed grain acreage for the farm as established under this paragraph.'"

On page 193, beginning with line 23, strike out everything down through line 4 on page 194 and insert the following:

"'(E) INDIVIDUAL FARM PROGRAM ACREAGE.—Except as otherwise provided in subsection (c), the individual farm program acreage shall be the acreage planted on the farm to upland cotton for harvest and any flexible crop acreage that is considered planted to upland cotton under section 505, within the permitted upland cotton acreage for the farm as established under this paragraph.'"

On page 237, strike out lines 8 through 13 and insert the following:

"'(E) INDIVIDUAL FARM PROGRAM ACREAGE.—Except as otherwise provided in subsection (c), the individual farm program acreage shall be the acreage planted on the farm to rice for harvest and any flexible crop acreage that is considered planted to rice under section 505, within the permitted rice acreage for the farm as established under this paragraph.'"

Mr. GRASSLEY. Mr. President, I yield 3 minutes to the Senator from Illinois [Mr. SIMON] because he asked to speak first.

Mr. President, could we have order, please?

The PRESIDING OFFICER. The Senate will be in order. The Senator deserves to be heard on his amendment. Senators will cease audible conversation.

Mr. SIMON. Mr. President, I say to my colleagues in the Senate, I rise as a cosponsor of the Grassley amendment, and let me say to my colleagues this is an amendment that ought to carry overwhelmingly. I understand the Sen-

ator from Minnesota offered a somewhat similar amendment in the committee.

This amendment, No. 1, saves money. It ought to appeal to all of us. No. 2, it gives farmers flexibility so that they can plant a little more soybeans, oats, whatever it is they want to plant. Third, it helps our balance-of-trade problem. We are not producing enough soybeans. We are, believe it or not, importing oats in a major way, a nation that used to export oats. It has all three of those things.

Then what is wrong with this legislation? There is fear, frankly and candidly, on the part of our friends who grow wheat that it is going to suppress the price of wheat. But let me say to my colleagues, as someone who lives at Route 1, Makanda, IL, and I say that to my wheat-growing colleagues from States like North Dakota and other States, farmers in Illinois are not going to shift from corn to wheat. They are going to shift to soybeans; they are going to shift to oats; they are going to shift to a product that, frankly, gives them more income than wheat.

I think this is a superb amendment. I would like to claim credit for it. Our colleague from Iowa is the sponsor of it, but I am pleased to be a cosponsor. I hope we can get the votes to adopt it. I think it makes eminent good sense.

I yield back my time to the Senator from Iowa.

Mr. GRASSLEY. Mr. President, I ask unanimous consent to add Senator BOSCHWITZ as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRASSLEY. Mr. President, I hope Senator LEAHY is around. I want to refer to a statement Senator LEAHY made. So under the rules of the Senate, I would like to make him aware.

I want to make a statement by repeating some words that Senator LEAHY made in the CONGRESSIONAL RECORD on November 19, 1989. This is just part of the statement: "I have said repeatedly that planting flexibility is a litmus test the 1990 farm bill must pass."

These are Senator LEAHY's words: "I have said repeatedly that planting flexibility is a litmus test that the 1990 farm bill must pass. I do not know of a single member of the committee that would oppose more planting choices for farmers. Greater flexibility is needed. Our producers are hamstrung and reacting to market signals by the current program. It is impossible for a farmer to practice good rotation practices when he or she"——

Mr. LEAHY. Mr. President, may we have order please? The Senator is quoting a speech of mine I assume I gave but do not recall. I might recognize it more if I could hear it. May we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. GRASSLEY. "It is impossible for a farmer to practice good rotation practices when he or she is forced by a program to plant corn year after year, in and year out. The lack of planting flexibility in the current program"—that would be the 1985 farm bill—"has caused American agriculture to lose market share for oilseeds and oats and increase the level of chemicals in our soil and ground water."

There is not a thing about the statement that I just quoted that I find any fault with. But it lays out very well the purpose of our amendment because what we heard from the farmers over the last year-and-a-half is that there is a review of the 1985 farm bill, and as we were making preparation for a 1990 farm bill, the No. 1 thing we heard from the farmers of America was that the 1985 farm bill needs more flexibility.

Senator LEAHY was responding to that in the introduction of a bill that he and Senator LUGAR were putting in in November of 1989. I thank him for making those statements.

The bill that we have before us is better than the bill of 1985. But it basically guarantees base protection. It was really instituted in the 1988 drought legislation. It guarantees the continuation of that, but it does not guarantee flexibility, and the amendment that we have before us now, is true flexibility giving the farmers of America the opportunity to respond to marketplaces, to say no to central planning from the U.S. Department of Agriculture, the same as the Eastern European countries have said no to central planning, and to say yes to farmers' ability to respond to the marketplace that is retarded now because the present program dictates to a great degree what farmers may plant.

This bill saves $1.1 billion, and it is environmentally sound because it encourages crop rotations; it encourages smaller quantities of pesticides to be used and less commercial fertilizer to be used. These are the natural results of crop rotation.

If my colleagues are against this amendment, they are for high input sustainable agriculture. If they are against this amendment, they cannot really say that they want to clean up the environment. And if they are against this amendment, they must want to promote the sales of more pesticides, more insecticides, and more commercial fertilizers. Flexibility is the No. 1 issue in the farm bill. It has been that way the last 2 years, and it is still that way as we go to final passage of this legislation.

The fundamental question then is whether or not we have respect for farmers to make the judgment.

Foreign farmers benefit from a farm bill in America that does not give farmers the opportunity to respond to market forces.

Let me assure you as the Amazon forest burns and as more land in Brazil is put into soybean production, it is a direct result of few acres of soybeans planted in the United States. Three million acres less of soybean land in the United States—land in the United States that was once planted to soybeans, but is not being planted to soybeans because of the lack of flexibility in the 1985 farm bill. If you approve of the burning of forests in the Amazon, if you approve of the Brazilian farmers planting more soybeans because we are not able to supply the world market, then do not cry to me about imports coming into this country. Soy oil from Brazil is coming into this country right now. Do not cry to me when oats are coming into this country; when we give the individual farmers of America an opportunity to respond to the free market forces, we will be planting more of those crops in America. Instead of importing them, we would be exporting them.

Mr. SYMMS. Is the Senator prepared to answer a question?

Mr. GRASSLEY. Yes.

Mr. SYMMS. I appreciate what the Senator is saying. It sounds like a very interesting amendment that I may wish to support, but I do have one question. What happens to the livestock producer? Can you be paid to set land aside and then put it into forage and allow livestock to graze on it and then still get a stipend?

Mr. GRASSLEY. Yes. We call that in our amendment conserving acres, and that could be alfalfa, other crops as well, and so consequently you would be able to do that.

Mr. SYMMS. You would be able to grow alfalfa hay and have it baled, and so forth.

Mr. GRASSLEY. Yes.

Mr. SYMMS. And have it paid for.

Mr. GRASSLEY. Yes.

Mr. SYMMS. That causes some consternation in some parts of my State where there are single crop producers and it happens to be alfalfa hay for dairies.

Mr. GRASSLEY. It should not cause any consternation because when you do not have flexibility you have problems such as what has happened in the soybean market—the United States had 65 percent of the world trade of soybeans, and that was during the 1970's—during the 1980's our share has gone down to 50 percent. It has been picked up by other countries, primarily Brazil. It seems to me, if you are going to be concerned about the income of the farmer over the long haul, it depends upon the ability to respond to world markets and the farmer. A farmer who is in a position to respond to world markets is going to be the person that is in the right

place at the right time to capitalize on the increase in market activity.

Mr. SYMMS. I hear what the Senator is saying. What is the answer to the nonprogram crop farmer who grows one crop, and it is alfalfa hay, and they do not participate in Government programs and then you are paying somebody else to grow alfalfa? Is there any plan in this long range how you offset that?

Mr. GRASSLEY. Look at what happened when we discourage conservation farming. We have had cattle numbers go down as a result of it. It has not been good for the cattle industry any more than it has been good agriculture.

Mr. SYMMS. I thank the Senator.

Mr. GRASSLEY. Flexibility is going to save money, but that is not our motivation is farm programs with flexilbity to offer the same level of income support as the inflexible farm programs do. Gramm-Rudman may reduce target prices. We do not know that to be a fact but some people think it will when we get the budget done. There is nothing in flexibility that is going to reduce farmers' income.

Some people are concerned that this might have an adverse impact upon some regions of the country. Their argument being that farmers from one region of the country might be hurt because they have limited cropping opportunities. My answer to my colleagues from those sections of the country, is if in fact that is true, give your farmers an opportunity to make the choice. Do not substitute your judgment for that of your farmers.

With target prices and crop bases protected as it is in our amendment, you might be pleasantly surprised that individual farmers will try if allowed to do their own thing. You could have in your section of the country a cultural bias to certain crops.

I have been talking to Senator GORTON about wheat in Washington. He said there is no alternative. Maybe it is the case with cotton in Mississippi. We have put ourselves into an awful pickle with the rigid farm programs that come out of Congress and out of the USDA so that farmers plant according to that program. So over a period of years you can build up a feeling that you can plant only one or a few crops in a particular region.

Only 5 or 10 years ago the average farmer in my State had alfalfa, oats, soybeans, permanent pasture and corn, and then the heavy emphasis upon the corn base led to the plowing up a lot of land that never should have been plowed up. A lot of soil eroded that could have been saved if there had been less emphasis on base building.

Mr. KERREY. Will the Senator yield?

Mr. GRASSLEY. Yes, I yield.

Mr. KERREY. I hear the Senator talking about this rigid system that we have. Is the Senator from Iowa familiar with the origin of this rigid crop specific basing system that most of us would like to change?

Mr. GRASSLEY. Yes. It was in the 1977 farm bill.

Mr. KERREY. No, that is not correct.

Mr. GRASSLEY. Let me suggest to the Senator before 1977, the distribution of income support was based not on acres. You could have interchanging of the planting of soybeans, oats, corn, and other crops and still get your support. It was in 1977 that Congress tied in target prices and the payment with acreages.

Mr. KERREY. That is correct.

Mr. GRASSLEY. As opposed to allotment.

Mr. KERREY. The Senator from Iowa is correct, but I urge the Senator from Iowa and other colleagues who are interested in this history to look at the crop specific basing issue because that is when the rigidity came into the system. It came in as a consequence of an amendment offered on April 29 of 1981. It was not until the 1981 farm bill reinforced by the 1985 farm bill that we had rigidity in the system. If you voted for the bill in 1981 and the bill in 1985, you supported rigidity in crop specific basing.

Mr. GRASSLEY. Mr. President, I reclaim my time.

Critics of the Grassley-Dixon amendment have charged that our amendment decouples farm program payments from production.

To reach this conclusion requires a somewhat distorted view of decoupling. Decoupling has been around for a long time as a farm policy option.

Decoupling farm program payments means giving farmers a specified payment regardless of the market price for the commodity.

The Grassley-Dixon amendment ties payments on flex acres to current program deficiencies. This ensures that payments to farmers are based upon market prices, not the historical level of payments a farmer has received.

If market prices for program crops rise, the payments received on flexed acres will decrease. This type of market link should preclude the conclusion that payments have been decoupled from the market.

One of the biggest fears about decoupling was that if you had static farm payments, farm spending was more likely to get the budget ax.

Under the Grassley-Dixon amendment, a farmer's payment is not unrelated to the market, but is tied to the target price. Any cuts in the support the farmer receives from the Government, would be moderated by the size of the cut in target prices. And that is something I don't want to see happen any more than some of my colleagues on the Agriculture Committee.

There is one other reason the Grassley-Dixon amendment is not decoupling. By granting commodity loans to the flex crops on program acres, we are maintaining the tie between the price support mechanism and the commodity planted.

There is a change from the flexibility option considered in the Senate Agriculture Committee markup and helps maintain the link between program payments and planted acres.

The Grassley-Dixon amendment would mean savings in deficiency payments. Each farmer would have remained eligible for deficiency payments on the same number of acres, but with fewer acres of corn, corn prices would rise, decreasing the margin between the market and target prices.

This plan would have meant farmers got a greater percentage of their income from the market as opposed to the government. To me, Mr. President, that is not decoupling—that is flexibility.

I want to talk about the savings associated with our flexibility amendment.

The USDA has projected that the Grassley-Dixon flexibility amendment will save $1.1 billion over and above the savings already scored in the Senate bill for flexibility.

And unlike many amendments which are aimed at additional savings, we aren't stealing this money from the farmer's pocket.

One of the main points of discussion I heard while sitting in on the Agriculture Committee's markups was the interest of committee members to ensure that a majority of a farmer's income came from the marketplace.

By providing deficiency payments to farmers on the portion of their base which can be planted to other crops, farmers will be able to weigh the market price for the program commodity against the market price for the desired crop. If the market does not provide a greater return, the farmer will not switch production. Thus, we will ensure that farm income will be maintained, even though Government payments will be reduced.

So now that we know this amendment will not have a negative effect upon farm income, lets discuss where the savings will come from.

Under the Grassley-Dixon amendment, the number of acres in the program that are eligible for deficiencies will remain constant.

Where the savings come into effect, however, is that we will see additional oilseed and other crops produced that will decrease the supply of program crops.

From there, it becomes a question of simple economics.

As the supply goes down, the increased market price will decrease the size of the deficiency.

The result will be savings in program crop expenditures.

Mr. President, I ask unanimous consent that this letter from USDA be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF AGRICULTURE,
Washington, DC, July 24, 1990.

Hon. CHARLES E. GRASSLEY,
U.S. Senate,
Washington, DC.

DEAR CHUCK: In contrast to the Senate and House base protection proposals, your amendment would allow planting decisions on a substantial amount of acreage to be based solely on expected market returns and crop rotation needs. Although we still prefer a wider degree of flexibility, we support your approach. We think that in the aggregate the effects of your amendment on crop production and prices would be similar to our Green Book proposal or the program proposed last year by Senators Leahy and Lugar.

Compared to the Senate Committee proposal for base protection, Commodity Credit Corporation (CCC) outlays would be less under your amendment. We estimate that these savings would total $1.1 billion for fiscal years 1991-95. However, this estimate is conditioned upon the Department having discretionary authority to set payment acre trade-offs as specified under your Flexi-ARP Program. It is important that the discretionary authority your amendment provides on Flexi-ARP tradeoffs be preserved.

Compared to the estimates in the recently completed Mid-session Review baseline, your amendment would likely result in more production of soybeans and less production of feed grains. Production of cotton and wheat could be slightly higher as well. The biggest change would be in soybean production. This would allow the United States to regain some of the export market share in soybeans and soybean products that was lost in the 1980's.

Except for soybeans, the changes in world trade and U.S. exports would be minimal compared to the Mid-session Review. However, it is essential to remember that evaluating any flexibility proposal with respect to a baseline (where a given future path of prices is specified) causes many to overlook the key beneficial effects of flexibility. The true benefits of flexibility come from the quick adjustments that farmers can make to produce more of crops that are in tight supply and less of crops in excess supply. Individual farmers will benefit by producing crops with higher market returns, and the Nation will benefit from having adequate supplies of individual crop commodities for export and domestic use.

The cost savings to farmers and the environmental benefits of your flexibility amendment would result mostly from the increased rotation of corn and soybeans. Take for example a corn-soybean grower who substitutes soybeans for corn. For each acre switched from corn to soybeans, a Corn Belt farmer would save around $50 in fertilizer and chemical expenses while a Southeast farmer would save around $45. Another example is the rice grower in the Delta who could save about $45 in fertilizer and chemical expenses for each acre of rice switched to wheat and nearly $65 for each acre switched to soybeans. And, there are certainly many other substitution possibilities at the farm level that would reduce input costs for the farmers and prove beneficial to the Nation's soil conservation and water quality efforts. Whether these adjustments are made also depends on how farmers view market returns from these crops, and this is something that will vary from year to year.

As you know, it is hard to come up with a quantitative estimate of environmental benefits that result from flexibility, but we know that benefits would be forthcoming. This would happen because, if for no other reason, many farmers will find their bottom line improved when they are able to adopt the cost-cutting and environmentally sound rotations that current law discourages them from undertaking. Even continuous crop soybean producers could use flexibility to help with such problems as nematode infestation being allowed to plant program crops.

We were greatly disappointed with both the Senate and House proposals for base protection. Your amendment is a vast improvement for farmers, and it has our support. If we can be of further assistance, please let us know.

Sincerely,

CLAYTON YEUTTER,
Secretary.

Mr. GRASSLEY. I have already spoken on the basics of our crop flexibility plan.

But I am as concerned, if not more so, about the agronomics of flexibility. I have here a letter from the Environmental Protection Agency in support of this amendment.

The EPA says, in their letter dated yesterday, "Current rules governing the commodity programs create barriers to the adoption of environmentally sound agricultural practices. The environmental consequences of monocultural production include increased soil erosion and agricultural chemical use."

As most of you know, I am a farmer by profession. I was taught the principles of farming at a very young age. One of these principles was sound crop rotation.

On my farm we have always attempted to properly rotate our crops. But Government programs have locked me, as well as other producers, into planting crops on the basis of our given crop bases. This further limits traditional crop rotations.

Crop rotations are a very important part of basic farming practices. They limit the need for pesticides and fertilizer. I feel strongly that we must encourage farmers to combine responsible stewardship of natural resources with farm profitability.

EPA reiterates the importance of crop rotations. "* * * rotating corn with soybeans virtually eliminates the need for corn rootworm insecticides, while simultaneously reducing fertilizer requirements."

In their letter, EPA also addresses the advantages of paid flexibility. They feel that the current Senate language, although providing base protection, does not encourage farmers to break out of the monoculture base planting that the program normally requires. Our plan will provide farmerse with the economic incentive to build a program of sound crop rotation.

EPA and USDA both feel that the Agriculture Committee's proposal will allow producers to rotate crops, but will not provide them with the economic incentive to do so. Our amendment will encourage farmers to take advantage of crop rotations to lower input costs.

In many ways the agronomic benefits of this program outweigh the budget savings, and underscore the benefits of marketplace dollars in farmers' pockets. Again, I urge my colleagues in the Senate to support this amendment.

Mr. President, I ask unanimous consent that letters from EPA and eight commodity organizations be printed in the RECORD at this point.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY,
Washington, DC, July 23, 1990.

Hon. CHARLES GRASSLEY,
U.S. Senate, Washington, DC.

DEAR SENATOR GRASSLEY: In response to your letter of July 20, 1990, I would like to express my views on the environmental benefits of the "Flexibility Amendment" you have offered to the Food, Agriculture, Conservation, and Trade Act of 1990. Current rules governing the commodity programs create barriers to the adoption of environmentally sound agricultural practices. Base acreage requirements encourage producers to grow the same crops year after year. The environmental consequences of monocultural production include increased soil erosion and agricultural chemical use. Allowing producers to respond to market signals on a percentage of their base acres will result in a greater use of crop rotations which is turn will lead to environmental benefits.

The environmental benefits associated with crop rotations are numerous. Crop rotation, as opposed to monocultural production, reduces the need for pesticides and fertilizers. For example, rotating corn with soybeans virtually eliminates the need for corn rootworm insecticides, while simultaneously reducing fertilizer requirements. The reductions in pesticide and fertilizer use reduce the potential for conamination of surface water and ground water from these chemicals. Ecological risks and food safety risks may also be reduced. Crop rotation also has the effect of reducing soil erosion and increasing soil tilth. Reducing soil erosion is crucial in many areas for controlling sediment and phosphorus loadings to streams and rivers.

The Administration endorsed complete (or 100%) planting flexibility in the Green Book earlier this year. Under the Administration proposal, deficiency payments would be made to producers on the "flex" acres. Secretary Yeutter and I have also written to Senators Leahy and Lugar encouraging them to adopt this position in the commodity provisions of the farm bill. Unfortunately, the bill now before the Senate (S. 2830) includes a much less aggressive flexibility

option. The current Senate version would allow for flexibility on only 25% of program base acres. Deficiency payments would not be made on the "flex" acres. The Committee proposal will allow producers to rotate part of their base with a crop other than their "base" crop. However, because deficiency payments will not be made on these acres, producers may still face a significant economic barrier to utilizing this option. Thus the environmental benefits of the Senate's current flexibility proposal will be seriously limited.

Under your proposal, deficiency payments will be made on the "flex" acres. This will remove an economic barrier to participation in the flexibility option. Although your amendment does not completely embrace the Administration position, it clearly has greater environmental advantages than the current flexibility proposal in the Senate bill (S. 2830). I look forward to working with you on this and other issues of importance to agriculture and the environment.

Sincerely yours,

WILLIAM K. REILLY.

July 16, 1990.

Hon. CHARLES E. GRASSLEY,
U.S. Senate, Washington, DC.

DEAR SENATOR GRASSLEY: As Presidents of the largest state of corn and soybean associations, as well as, the largest corn/soybean production state, we have an intense interest in what happens in farm policy.

As Congress prepares for its final discussion of the 1990 Food Security Act we feel it is extremely important that Iowa's corn and soybean producers are provided with the ability to maximize their income potential from the marketplace by being allowed to have the freedom of flexibility in their crop plantings. For this reason, we encourage and support your efforts to achieve meaningful flexibility in the 1990 Food Security Act.

Meaningful flexibility means allowing farmers to make planting decisions based on market needs instead of government program signals on all, or at least a significant percentage, of their acreage without being penalized in the form of lower government support or program security.

If only "one-way" flexibility is granted, Iowa producers will be at a distinct disadvantage in their ability to capitalize on new market opportunities. There are numerous opportunities for Iowa producers to expand opportunities in corn and soybeans. One of these is the increased demand for corn-derived ethanol, which has resulted from the proposed Clean Air Legislation.

Another opportunity to expand is Iowa's soybean producers' interest in responding to the 3% to 5% world market growth in soybeans each year. If the market signals the need for more of a particular commodity, farm program policy should not limit the profit opportunities for a producer to shift acres to the crop which offers better economic returns.

Farm programs that do not provide this kind of ability to repond to market signals and profit opportunities do not serve the needs of the U.S. farmer, but instead serves the wants of our competitors to take markets from U.S. agriculture. This is particularly offensive to our corn and soybean farmers who spend millions of producer checkoff dollars each year to develop markets that we can not or may not be able to fill due to contradictory farm program signals.

If we do not accomplish this policy objective, the costs will be enormous in terms of lost farm income, jobs, trade and stress to related livestock and other industries. This is not to mention environmental, conservation and agronomic problems that already exist and will become worse due to the lack of meaningful flexibility in U.S. agriculture.

Senator, we thank you for your efforts and we stand ready to work with you to accomplish this important policy objective.

Sincerely,

LISLE COOK,
President, Iowa Corn Growers Association.
ROY BARDOLE,
President, Iowa Soybean Association.

IOWA CATTLEMEN'S ASSOCIATION,
Ames, IA, July 20, 1990.

Hon. CHARLES E. GRASSLEY,
Hart Senate Office Building, Washington, DC.

DEAR SENTOR GRASSLEY: The Iowa Cattlemen's Association supports the Grassley Flexibility Amendment and commend you for offering it on the floor of the Senate.

For several years the Iowa Cattlemen's Association, with support of other Midwest cattlemen's associations, have advocated this type of additional provision to the Farm Bill. It just makes common sense to encourage proper seeding and management of conservation crops on ARP acres. In addition, it would be revenue generating and encourage farmer-cattlemen in the Midwest to evaluate their needs in a businesslike manner. The environmental community should be pleased and supportive of such an amendment also.

We will be contacting other Midwest cattlemen's associations encouraging them to support you also.

Keep up the good work.

Sincerely,

MARSHALL KING,
President.

ILLINOIS CORN GROWERS ASSOCIATION,
Bloomington, IL, July 20, 1990.

Hon. CHARLES E. GRASSLEY,
U.S. Senate, Washington, DC.

DEAR SENATOR GRASSLEY: The membership of the Illinois Corn Growers Association strongly supports the Grassley-Dixon flexibility amendment to the farm bill.

Flexibility to the Illinois corn producer means we can be more productive and efficient farmers. In turn, our corn will be more competitive in the world market and in the U.S. for current and future products.

Thank you for your leadership on the farm bill.

Sincerely,

DARYL REID,
President.

MISSOURI CORN GROWERS ASSOCIATION,
Jefferson City, MO, July 20, 1990.

Hon. CHARLES E. GRASSLEY,
U.S. Senate, Washington, DC.

DEAR SENATOR GRASSLEY: The Missouri Corn Growers Association (MCGA) is in complete support of the proposed flexibility amendment that we understand you and Senator Dixon will be offering next week. We certainly appreciate your interest and concern. If we can be of assistance in helping to support the amendment in any way, please let us know.

Again, thanks for your support.

Sincerely,

PHIL AYLWARD,
President.

OHIO CORN GROWERS ASSOCIATION,
Marion, OH, July 20, 1990.

Hon. CHARLES E. GRASSLEY,
U.S. Senate, Washington, DC.

DEAR SENATOR GRASSLEY: The Ohio Corn Growers Association strongly supports your flexibility amendment for the 1990 Farm Bill.

We believe it is very important to let farmers make their own planting decisions based on good conservation practices which includes crop rotations, chemical and fertilizer applications and market signals.

The 1990 Farm Bill is a very important piece of legislation for not only argiculture, but for the entire population of the U.S. We truly appreciate your leadership in getting farm legislation passed that will keep the agricultural industry strong as we face the challenges of the 90's.

Thanking you for your dedicated support.

Sincerely yours,

JAMES C. MITCHELL,
President.
MICHAEL L. WAGNER,
Executive Director.

VIRGINIA CORN GROWERS ASSOCIATION,
Richmond, VA, July 23, 1990.

Mr. KEITH HEARD,
National Corn Growers Association, Washington, DC.

DEAR KEITH: The Virginia Corn Growers Association has a very wide variety of growing conditions, length of growing seasons and climatic forces that impact farming in Virginia. Our State is somewhat unusual due to the variety of land types too, since we have coastal lands, plains and mountains. Therefore, it is very important to our membership to have all the flexibility possible in making planting decisions on crop rotation.

We urge other members of the United States Senate to support the Grassley-Dixon amendment.

Sincerely,

LEWIS ASHTON III,
President.

MEMORANDUM—SUPPORTING THE PRODUCTION AND MARKETING OF KENTUCKY CORN

To: Senator Charles Grassley, U.S. Senate, Washington, DC.
From: Kentucky Corn Growers Association, Richard Jones, President.
Date: July 20, 1990.
Re: Grassley-Dixon Flexibility Amendment.

The Kentucky Corn Growers Association strongly supports the Grassley and Dixon flexibility Amendment. This Amendment will allow farmers to make planting decisions based on marketing signals and good crop rotation practices rather than according to the dictates of the farm program.

KANSAS CORN GROWERS ASSOCIATION,
July 23, 1990.

Hon. CHARLES E. GRASSLEY,
Hart Senate Office Building, Washington, DC.

DEAR SENATOR GRASSLEY: The Kansas Corn Growers Association would like to go on record of support for your "flexibility" amendment. The ability of our states corn growers to make planting decisions on market factors is extremely important. Crop rotation is a significant management tool in our state as well. We applaud your efforts on our behalf in these areas.

Your work on this issue is to the benefit of corn growers across this country as well

as those here in Kansas. On behalf of those I represent, thank you.

Sincerely,

JERE WHITE,
Executive Director.

NATIONAL CORN GROWERS ASSOCIATION,
Washington, DC, July 23, 1990.

Hon. CHARLES E. GRASSLEY,
U.S. Senate, Washington, DC.

DEAR SENATOR GRASSLEY: One of the key issues throughout the development of the 1990 farm bill has been crop planting flexibility—removing government farm program barriers that keep farmers from following market signals in making their cropping choices.

The Senate Agriculture Committee touched on the question of flexibility in the farm bill it reported by allowing farmers to plant on their program crop acreage oilseeds or other program crops. But the committee failed to fully answer the question since it did not allow program crops such as corn to be grown on oilseed acreage. This one-way base shift does not deserve to be called flexibility.

As the farm bill is debated on the floor this week, Senators Chuck Grassley and Alan Dixon will attempt to correct this situation. Their amendment will allow full two-way flexibility on 25 percent of a farmer's current program crop bases and land historically planted to soybeans and other oilseeds. To help remove the influence of government programs in planting decisions, the Grassley-Dixon amendment would continue to make deficiency payments on program crop acreage switched to other crops.

The amendment is much like the Freedom Flexibility proposal of the National Corn Growers Association. Although Freedom Flexibility has drawn fire from some in agriculture who claim it removes the linkage between production and payments, it is important to note that the deficiency payments under the Grassley-Dixon amendment would continue to be directly based on actual market prices and past production history. We believe these payments on flexed acreage would be quite effective in encouraging planting of soybeans on program crop base acres while at the same time giving farmers the opportunity to plant corn on soybean land.

Our analysis shows total aggregate acreage shifts under a Grassley-Dixon-type system would be minimal and would not severely affect any single crop. However, the genuine flexibility it provides will give individual producers maximum latitude in selecting the cropping mix that is right for their operations in economic, soil conservation and other environmental terms, regardless of their base situation. It will also allow for the production of more corn if necessary in the future. This is a significant concern of our organization since new oxygenated fuel provisions in a compromise set of Clean Air Amendments could substantially increase demand for ethanol, which is made from corn, before the end of the 1990 farm bill.

Finally, USDA estimates the amendment could save in excess of $1 billion over and above the savings projected to be yielded by the one-way acreage shift provisions in the committee bill. Congress can ill afford to ignore such impressive savings at a time when farm program spending is in jeopardy.

The Agriculture Committee, led by Chairman Leahy and Senator Lugar, is to be commended for its diligent work on the farm bill within this difficult budgetary environment. NCGA is generally supportive of the bill, such as the marketing loan provisions, but we do urge you to support the important Grassley-Dixon amendment on flexibility.

Sincerely,

ALAN KEMPER,
President.

The PRESIDING OFFICER (Mr. DECONCINI). The Senator from Iowa has the floor.

Mr. GRASSLEY. How much time do I have?

The PRESIDING OFFICER. The Senator from Iowa has 13 minutes.

Mr. GRASSLEY. I better reserve my time for Senator Dixon.

The PRESIDING OFFICER. Who yields time?

Mr. LEAHY. Mr. President, how much time does the Senator from Vermont have under his control?

The PRESIDING OFFICER. The Senator from Vermont has 29 minutes and 36 seconds remaining.

Mr. LEAHY. Mr. President, I would say for my colleagues that we debated an amendment very similar to this one in the committee. As I recall, and the Senator from Nebraska may recall, we rejected it on a 5-to-13 vote.

So I would be very much against this amendment. In fact, I think we had a letter from the distinguished Senator from Iowa which was put in the RECORD on this issue, if I am correct.

We decided to reject the same provision on a strong, bipartisan vote. I believe nearly half of the Republicans on the committee voted in opposition to the provision. I also opposed it.

Mr. President, having said that, do the flexibility provisions go as far as some would like in the bill? Of course not. Other Members of course would say they go much further than they want them to go. The fact is it was one more instance where we had to take the concerns expressed by the Members of various parts of the country to reach a compromise between those concerned with hurting some nonprogram crops and those who wanted no limits on producers' options.

I intend to support the compromise package as reported by the committee. I urge other Senators to do so. It is supported by a majority of the Republicans and Democrats on the committee.

If you are trying to make up your mind how to vote, I suggest this. First, the amendment is a budget buster. CBO estimates that it would cost $530 million, half a billion dollars, and we are fighting like made to save $5 million, $10 million, $20 million here and there in this bill.

It takes some complicated programs that are like a tinker toy set to begin with and it makes them even more complex. They are not going to be able to administer this program. I defy especially this Agriculture Department to administer it.

Look at some of the things that could happen. You could see reduced oil seed planting, and double payments on acreage. I think that undercuts the effectiveness of the acreage limitation programs. There are a whole lot of other reasons, Mr. President, but for those I will oppose it.

Mr. President, on the Grassley amendment, I have a letter from the National Association of Wheat Growers in which they say "Dear Mr. Chairman: On behalf of the members of the National Association of Wheat Growers, I would like to register our concerns about an amendment to be offered by Senators GRASSLEY and DIXON to the 1990 farm bill." Then it goes on to say why they oppose it.

I also have a letter from the National Cotton Council of America who say, "We want to express our strong opposition to the Grassley-Dixon decoupling amendment." It also goes on at some length why they are opposed to it.

In addition, I also have a letter from the U.S. Rice Producers legislative group on the Grassley-Dixon amendment which says, "The U.S. Rice Producers Legislative Group is opposed to this amendment. We hope that the * * * amendment will be defeated."

Mr. President, I ask unanimous consent that these three letters be included in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NATIONAL ASSOCIATION
OF WHEAT GROWERS,
Washington, DC, July 24, 1990.

Hon. PATRICK LEAHY,
Chairman, Senate Committee on Agriculture, Nutrition and Forestry, Washington, DC.

DEAR MR. CHAIRMAN: On behalf of the members of the National Association of Wheat Growers (NAWG) I would like to register our concerns about an amendment to be offered by Senators Grassley and Dixon to the 1990 Farm Bill.

The members of NAWG have been supportive of S. 2830 as reported by the Committee. We believe the extensive efforts of the committee members to balance the very divergent needs and concerns of a wide variety of agricultural commodities and geographic regions should not be undone. As you know, wheat producers approached the base flexibility debate in a very cautious manner, largely because many wheat farmers do not have economically or agronomically viable alternative crops to raise. In fact, our resolutions endorsed 15 percent base shifting as a reasonable approach to responding to flexibility needs.

Wheat producers have been steadfastly opposed to any effort to sever the linkage between a deficiency payment and the production of the given commodity—commonly referred to as decoupling. As you know, the Committee considered at length the question of making deficiency payments on "flexed" acres and defeated the proposal. We would hope that the full Senate would recognize the Committee's prior consideration of this matter and defeat the Grass-

ley-Dixon proposal to provide decoupled deficiency payments on flexibility acres.

Thank you for your leadership throughout the farm bill process. We look forward to continuing to work with you on this and other issues of importance to the American wheat producer.

Sincerely,

DEL WIEDEMAN,
President.

NATIONAL COTTON COUNCIL OF AMERICA,
Washington, DC, July 24, 1990.

Hon. PATRICK LEAHY,
Chairman, Agriculture, Nutrition, and Forestry Committee, Washington, DC.

DEAR MR. CHAIRMAN: On behalf of the National Cotton Council of America, this is to convey our support for the flexibility provisions approved by the Committee and included in S. 2830. We also want to express our strong opposition to the Grassley-Dixon decoupling amendment.

We believe the Committee's flexibility provisions more than adequately address the criticism that the 1985 legislation was inflexible. By eliminating modified—cross compliance, producers will be able to plant program crops in response to market signals without losing benefits on their primary crop. The TOP program allows producers the option to develop cropping patterns suited to each individual operation based on economic and environmental factors. Finally, the ability of "flex" 25 percent of each crop acreage base in response to factors such as market income and rotation will activate a program similar to the provisions of the 1985 farm bill which were never implemented by the Secretary of Agriculture.

While proponents of the Grassley-Dixon decoupling amendment stress simplicity, the amendment would be complex and confusing to producers and a nightmare to administer. For example, while the Committee's flexibility provisions build on familiar concepts, the decoupling—flexibility proposals could result in soybeans produced *on the same farm being eligible for two separate loans programs.* Further, the provisions would radically distort traditional programs by providing deficiency payments unrelated to actual production but based on frozen payment yields and historical crop acreage basis. Also, producers could react directly opposite to the projections used to establish acreage-reduction levels because of the artificial incentives associated with decoupling. The artificial incentive of decoupling could have the effect of destroying strong markets while providing payments for an unrelated crop. It is important to note that the Committee's provisions link carryover levels to ARP levels, however, with decoupling the tendency would be to establish ARP's on a budget basis more than a supply basis.

The Grassley-Dixon decoupling proposal would create confusion, be literally impossible to administer and would ultimately totally disrupt the operation of a successful farm program. Finally, consider the first newspaper article featuring a photograph of soybeans and an accompanying article explaning to an urban population that this crop receives a cotton target payment.

We urge the Senate to reject the Grassley-Dixon decoupling amendment and confirm the balanced provisions included in the Committee's proposal.

Sincerely,

TOMMY R. FUNK,
President.

U.S. RICE PRODUCERS LEGISLATIVE GROUP,
Stuttgart, AR, July 24, 1990.

Hon. PATRICK LEAHY,
Chairman, Agriculture, Nutrition and Forestry Committee, U.S. Senate Washington, DC.

DEAR MR. CHAIRMAN: We understand that Senators Grassley and Dixon are sponsoring an amendment that ostensibly would provide additional flexibility for the production of crops.

The U.S. Rice Producers Legislative Group is opposed to this amendment. The amendment essentially provides for decoupling and adds many administrative difficulties to an already complex program. We believe that sufficient flexibility is provided in the committee bill and endorse its provisions as the most effective way of accomplishing that objective.

We hope that the Grassley/Dixon amendment will be defeated.

Sincerely,

STEWART E. JESSUP,
Chairman.

Mr. LEAHY. Mr. President, I reserve the remainder of my time.

Several Senators addressed the Chair.

Mr. GRASSLEY. Mr. President, I yield 5 minutes to the Senator from Minnesota.

The PRESIDING OFFICER. The Senator from Minnesota is recognized.

Mr. BOSCHWITZ. Mr. President, at this point I would like to put another letter into the RECORD. I hear my good friend, the chairman of the committee, putting in letters from various sources. So I will put one in from the Minnesota Corn Growers Association that indeed supports the amendment that is now before us. I ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MINNESOTA CORN GROWERS ASSOCIATION,
Kasson, MN, July 23, 1990.

Re Flexibility Amendment, 1990 Farm Bill.
To: The Honorable Senator Grassley and the Honorable Senator Dixon.

The Minnesota Corn Growers Association supports your flexibility amendment to the 1990 Farm Bill. Farmers need to make planting decisions on market signals and crop rotation practices rather than the farm program. Flexibility could also be good for the environment as it would lessen the need for certain crop protection agents used in monoculture systems.

I have personally experienced the restraints placed on us by the farm programs. The last eight years I have planted my maximum allowed base acres of wheat and corn only because of program payments. This has necessitated the use of corn insecticide because of planting corn on corn. This practice of monoculture lowers yields as well as subjects the environment to unnecessary crop protection agents because rotation is not possible on all my acres.

I personally and as representative of the Minnesota Corn Growers, support your flexibility amendment.

Sincerely,

BRUCE WELLER,
President.

Mr. BOSCHWITZ. Mr. President, there is a history of making payments regardless of what is planted. In fact, 1978 was the first year that deficiency payments were made according to current plantings. I see my friend from Nebraska is gone, but I would be happy to debate this with him about when this whole business began. But from 1965 to 1973 farmers could freely substitute wheat and feed grains on wheat and feed grain bases or allotments and still receive direct payments on the basis of historical plantings.

In 1972-73, soybeans could be planted or wheat or feed grain bases with the original payments and from 1974-77 a farmer had to plant at least 90 percent of the allotment to become eligible for full target price protection. So this has happened before.

It really is time that farmers are given the flexibility to do it once again.

I say that the only real farmer that we have here in the Senate is the sponsor of this amendment, Senator GRASSLEY, who is a corn and soybean farmer—also has hogs. I think he is the only Member of the Senate who goes home on the weekends. He tells me he works the fields, slops the hogs, and has a sense of what this amendment will mean.

While the distinguished chairman says that there is going to be a cost to this amendment, the USDA says that this amendment will save $3.5 billion compared to current law and save $1.1 billion compared to the bill that we have before us. If the Department of Agriculture cannot administer this law, it seems strange that they should be in support of this amendment.

Flexibility really is the basis of what farmers would like in the 1990 farm bill. As I have said at other points in this debate, farmers have told me, if you do nothing else, extend the 1985 farm bill. When they talk about what they would like beyond that, they have talked about flexibility. There have been a number of polls taken of farmers that have shown figures in the 80 percentiles, and indeed above 80 percent of the farmers who have been questioned have been in favor of the idea of flexibility.

Some say, and I know that my friends in wheat producing States say that more wheat is going to be grown in the corn and soybean areas, that they do not have the flexibility in some of the northern tier States, and that there will be more wheat on the market. The result is that prices will go down.

In my State, and I would say same for Iowa, for my friend, Senator GRASSLEY, very frankly, you cannot get a high enough wheat yield unless you put in enormous amounts of input. You cannot get high enough

yield in order to switch the corn land, soybean land, which is far more valuable than wheat land, to switch it into those other crops. It would be highly unlikely and improbable. When flexibility existed during the periods that I spoke of, it did not occur at that time either.

One of the most important points that was made by my friend from Iowa was that environmentally, this is the soundest amendment that we are dealing with in this farm bill. In the event that we do this and allow flexibility, that will have great conservation value for the land of the United States. It will reduce the incentives to use inputs. It will reduce the incentive to use chemicals. Flexibility is something that agriculture badly needs in this country.

The PRESIDING OFFICER. The Senator has used the time.

Mr. BOSCHWITZ. I ask my friend from Iowa if I could have another minute.

Mr. GRASSLEY. I yield 1 more minute.

The PRESIDING OFFICER. The Senator yields 1 more minute.

Mr. BOSCHWITZ. Flexibility is what the farmers of the United States have said through polls, and in the case of Minnesota farmers, hundreds have said to me that flexibility is a desirable tool.

As a matter of fact, the ideas of flexibility started in 1988, started with respect to oats, and I am so pleased that my friend from Iowa and the two Senators from Illinois support this amendment. I see my friend from Illinois is here on the floor.

As Senator SIMON said, it is unlikely that soybean land will be switched into wheat.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. GRASSLEY. I yield 3 minutes to Senator DOLE.

Mr. DOLE. Mr. President, throughout this year's ongoing deliberation of the 1990 farm bill, several relatively new issues have received much of our attention. The Senate Agriculture Committee has spent many hours debating and listening to testimony on such issues as conservation and environment, loan rates, and target prices. But perhaps one of the most important issues to farmers, and certainly the most overdue, has been the issue of planting flexibility.

Crop rotation has long been recognized as a prudent agronomic practice which builds soil nutrients and reduces the need for fertilizer and pesticide application. Aside from environmental benefits and the accompanying reduced chemical inputs cost, planting flexibility allows a producer to plant alternative crops according to market signals rather than an arbitrary target price.

Under current commodity programs, farmers are unable to take advantage of crop rotations because they lose historical base acreage by shifting to alternative crops. This results in continuous cropping of the same crop year after year. Farmers realize the environmental impact of continuous cropping, and want the planting freedom which flexibility provides.

Producers also do not like having their hands tied by Government programs dictating what they can and cannot plant. Planting flexibility, in effect, emphasizes managerial capability and a return to independent decisionmaking. The flexibility proposals advanced so far have ranged from the normal crop acreage concept of 100 percent flexibility to very limited base substitution. The Senate committee package which we are now considering allows 25 percent flexibility on program crop acreage, with loan eligibility but no deficiency payments.

While the 25-percent flexibility represents what many feel is a workable compromise, producer participation is questionable. By choosing to take advantage of rotating on flexible acreage, the producer must forgo his deficiency payment eligibility. Without that payment, the producer must find some other economic incentive for which to rotate. The market return of the alternative crop must make up for the loss of that guaranteed payment. Those who know farming also know that such margins are not lasting and rarely exist for agricultural commodities.

Farmers need meaningful flexibility. The committee bill has given farmers something by taking something away. Farmers want the opportunity to utilize crop rotations, but not if the economics preclude their use. A flexibility program which does not allow payments on alternative crops may not be a workable solution unless the environmental benefits are great enough to offset the loss of the deficiency payment. And that is becoming increasingly unlikely since most erodible and environmentally sensitive lands are now enrolled in the conservation reserve program or devoted to conserving uses.

The Grassley amendment is a step in the right direction. It allows a producer to make planting decisions based on market prices and environmental benefits while protecting his historical base and payments. It is a workable program which farmers will use to establish alternative crops, and benefits the environment and farm income as well.

I yield back any time.

The PRESIDING OFFICER. Who yields time?

Mr. GRASSLEY. Mr. President, how much time do I have?

The PRESIDING OFFICER. The Senator has 4 minutes 55 seconds.

Mr. GRASSLEY. I yield to the Senator from Illinois whatever time he needs.

Mr. DIXON. I thank my friend from Iowa.

Mr. President, in town hall meetings, as well as in conversations with farmers and environmental groups across my State, the most common complaint I hear against the 1985 farm bill is that it is too restrictive. Farmers are denied the ability to respond to market signals, or rotate crops, without abandoning the farm programs and future program benefits.

The lack of planting flexibility in the 1985 law was a major reason our share of the soybean export market fell, even though market returns for soybeans were better than corn. In 1970, the United States had 80 percent of the soybean export market, and today we have only 37 percent.

Illinois farmers tell me that they need the flexibility to plant for the market. In addition, they want the freedom to rotate crops in order to enhance their soil productivity, and to control insect pests without excessive use of chemical pesticides.

The amendment that Senator GRASSLEY and I are offering tonight will permit farmers to make these important planting decisions. Although the committee bill provides for some flexibility, we believe that it is important to offer producers more meaningful options. The committee bill offers base protection but fails to provide essential income protection to our producers. Telling farmers they can plant other crops, but to do so that must sacrifice their payments is not really much flexibility at all.

Our flexibility proposal would maximize the benefits to farmers by offering them continued eligibility for deficiency payments, as well as an opportunity to make a decent profit in the marketplace. Farmers will be able to compare the market price of the program crop to the market price of the substitute crop, and base their planting decisions on economic returns.

Our amendment would also permit farmers to plant the program crop on a portion of historic oilseed acres without giving up the program benefits on the base acres. We believe that this option will encourage producers to stay in the program when market signals are calling for more of the program crop.

At the same time, the amendment, Mr. President, limits flexibility to 25 percent of the program based on historic oilseed acres. This cap will prevent producers from responding in concert to strong market signals and overproducing in a given market.

The USDA strongly supports this amendment. According to the Secretary of Agriculture, my friend Clayton Yeutter:

The true benefits of flexibility come from the quick adjustments that farmers can make to produce more of the crops that are in tight supply and less of crops in excess supply. Individual farmers will benefit by producing crops with higher market returns, and the Nation will benefit from having adequate supplies of individual crop commodities for export and domestic use.

Mr. President, in conclusion, the Illinois farmers, the Illinois corn producers, the Illinois Farm Bureau, and others generally support this amendment, and I want to conclude by telling my colleagues three things: If you want to cast one good vote tonight, listen to this. You vote for this bill, and you vote for the farmer. You vote for this bill, and you vote for the environmentalists, because the environmentalists are for this bill, as well as the farmer.

Mr. President, this is the most wonderful part of all. Your vote for this bill, and over the life of this piece of legislation, will save the taxpayers of America $1.5 billion. So when you come over in a moment to vote, remember: One, you serve the farmers of America; two, you vote for the environmentalists of America; and three, you save the taxpayers of America $1.5 billion.

Mr. President, this is the best deal the Senate is going to get all year, and I suggest that we support the Grassley-Dixon-Simon amendment.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. KERREY addressed the Chair.

The PRESIDING OFFICER. The Senator from Vermont has 24 minutes.

Mr. LEAHY. The Senator from Nebraska seeks time.

Mr. KERREY. Yes; if I could get 4, 5 minutes.

Mr. LEAHY. I yield 5 minutes to the Senator from Nebraska.

Mr. KERREY. Mr. President, with respect to what my friend from Illinois said, this is bad, this is a bad deal for most of the farmers; it may be a good deal for some. It is only good for the budget because, conveniently, USDA tried to get this in through a committee and concluded magically that this is going to save money. CBO says it is not going to save some money.

It is not a good deal in general for the environment, for the reasons my distinguished colleague from Idaho cited earlier. Those who were already planting those crops are going to get penalized in this proposition.

Let me make a couple of comments on the proposal. First, I disagree with the historical representation of my colleague from Iowa that the problem began in 1977. I am sure that the record will show that the crop-specific basic system was objected to in the hearings that I held, and lots of people have held, began in 1981.

And the flexibility that is being asked for by farmers is only one thing that my farmers are asking me for. It is important that our colleagues listen to this. They are not just asking for flexibility. If I were to summarize simply what farmers are saying, they would say, if you could get the loan rates up a little or at least cut off the decline being proposed in the current system, just raise targets a little bit, not a lot, a little bit, get flexibility in the system, we would like it.

We attempted, as a matter of fact, in the first proposal to do all three of those things. We were told by USDA it was too expensive, 1 percent of total budget was too much for production agriculture. So we tried to adjust it in all 3 years and reached the compromise that we achieved. And as to flexibility, we attempted to provide 100-percent flexibility by having a market loan for soybeans at 6¼ under the circumstances that USDA objected to any increase in the marketing loan bringing soybeans in because they did not like that, they scored that as costing too much money, and they said they would not accept it. When they find something they like, which is essentially a decoupling program that they like, then they find out magically it is going to save money.

This amendment is bad for most producers in America. It may be good for some corn growers. It is not good for most producers. This will not encourage good environmental usage in the main and most assuredly is not likely to be something that will save money.

I believe the committee compromise does not provide the flexibility we would like. The USDA and Secretary Yeutter accepted 6¼ marketing loan. We could come out with full flexibility and do precisely what my friends from Illinois and Iowa are trying to accomplish with this amendment. With the restrictions that USDA placed on us, we were severely limited.

I urge my colleagues to vote against this amendment for all of these reasons. It is not good for the farmer, it is not good for the taxpayer, and will not be good for the environment.

Mr. COCHRAN. Will the Senator yield me time?

Mr. LEAHY. How much time do I have?

The PRESIDING OFFICER. Twenty-one minutes.

The Senator from Mississippi.

Mr. COCHRAN. Mr. President, I listened to the debate and I recall the discussion we had on this issue in the Agriculture Committee.

One thing I hope Senators will notice is that the bill that is before the Senate provides a flexibility opportunity for farmers, and it ensures that their rights to participate in future program benefits will be protected. I heard the Senator from Illinois stress that as a reason for voting for this amendment.

What this amendment would really bring to the corn farmers of America is an opportunity not just to protect future program benefits, but to continue to receive current deficiency payments, even though they were not planting corn in that crop year. Think about that. If you had a corn base of 100 acres, for example, and you decided to plant 25 percent of it to soybeans, in this crop year, under this amendment you could still get a corn deficiency payment from the Government; money paid to you for growing corn which you never planted.

This amendment is an incentive, in effect, to plant something other than the program crop for which you have a base. It is a boon to those who have a corn base, an opportunity to divert some of that to another crop. Simply put, corn farmers could get the market price for a soybean crop, for example, up to 25 percent of their base acreage and still get a deficiency payment for growing corn when they did not even plant corn on 25 percent of their acreage.

Think about the effect this amendment would have if you were a farmer in my State of Mississippi and you had no corn base, but were dependent upon soybean production as your sole means of livelihood. Mississippi soybean farmers do not have the option of getting a deficiency payment on part of their crop. You have to grow soybeans, and if Midwestern farmers are induced to grow more soybeans, they will increase the supply. This will have a tendency to depress market prices, and those who are not as well off in terms of corn base will end up losing money and be driven out of the soybean business.

This is the fear we have in my part of the country, Mr. President, and why we urge the Senate to look very carefully at this amendment. It is not an increase in flexibility for farmers, but an opportunity for corn farmers to receive a deficiency payment on their corn base, while planting up to 25 percent in soybeans. This would be very detrimental to soybean farmers.

This is something I hope the Senate will look very carefully at before we agree on it.

I urge this amendment be rejected, Mr. President.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. Mr. President, how much time does the Senator from North Dakota want?

Mr. CONRAD. Three minutes.

Mr. LEAHY. I yield 3 minutes to the Senator from North Dakota.

The PRESIDING OFFICER. The Senator from North Dakota is recognized.

Mr. CONRAD. I thank the chairman.

Let me just say, Mr. President, this amendment reminds me of the book catch-22. Some of you who read that

book no doubt recall that when Yossarian learned that you could grow a crop and get paid for not growing it, he kind of liked that idea, and he said, "You know, I got some hogs I would like to raise. But if I had to actually raise the hogs, then it would not be so attractive, but if I could fail to raise hogs and get paid for it I would like to do that. In fact, I've got a lot of hogs I would like not to raise in order to get paid." And you know, if you take this to its ultimate conclusion, it really becomes an absurdity. You get paid for not doing something. The more you do not do, the more you get paid.

Mr. President, this amendment is just fundamentally flawed because what could occur here is that we would be allowing people to go out, plant whatever they want, keep the deficiency payment for corn even though they were not growing corn, go out and plant other commodities and create an unfairness for those commodities.

Let me give an example. My State is primarily a wheat-producing State. There are other parts of this country that have gone from producing wheat to producing corn because that was a better return. But now with frozen target prices, if this amendment were passed, we could see areas that have been corn country, previously wheat country, go back to producing wheat because it is much less costly to produce wheat, thereby increasing the supply of wheat and dropping the price.

Mr. President, this most assuredly is an amendment that has many unintended consequences. I urge my colleagues to oppose it and maintain the compromise that has been fashioned in the Senate Agriculture Committee.

I yield the floor.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. Mr. President, I know the Senator from Alabama wishes some time. How much time do I have remaining?

The PRESIDING OFFICER. The Senator has 15 minutes and 20 seconds.

Mr. LEAHY. I yield 5 minutes to the Senator from Alabama.

The PRESIDING OFFICER. The Senator from Alabama is recognized.

Mr. HEFLIN. Mr. President, I oppose this amendment. In our committee's deliberations we were very concerned about administrative difficulties inherent in any flexibility proposal. The authors of this amendment seem unconcerned that their scheme cannot be administered. The amendment provides that a soybean farmer could have two different loan programs applicable to one crop of soybeans. This could not be administered unless we dyed soybeans different colors. Soybeans dyed blue might get the higher loan rate. Soybeans dyed red might get the low loan rate. An understanding of how these programs are administered would convince anyone that this dual loan rate will not work.

I worked in the committee, and I have looked at various commodities that we have. I do not have the exact figures, but I am close to being accurate, certainly in the ballpark, when I say that of the total amount of farm subsidies that are paid by the Government, almost one-half go to corn farmers. You look at the other commodities, they are very small percentages as compared to the corn farmers. This program would increase and probably mean that close to 55 or 60 percent of all of the subsidies for the farm program would go to corn farmers.

We have worked over a long period of time to work out a balanced program in agriculture, a balanced program dealing with corn and other feed grains which keep it at a level where the corn farmer is assured through target prices that he can make a living. But the program has also been designed where the users of feed grains, primarily corn, will not be disastrously affected.

If the corn farmers' prices rise tremendously, it means that the chicken farmers, the cattle raisers, the dairy herds, the catfish, the hogs, others have to pay higher feed grain costs and therefore it cuts back on their profit.

If you can achieve a balance where the users of feed grain do not have to pay a tremendous price for their feed grain and can make a profit and, at the same time, achieve a balance where the corn growers and other feed grain growers can make a profit, you have a balanced program that protects both the raisers of feed grain and corn and the users of feed grain and corn. This amendment takes that out of balance.

Now there is another problem in this, particularly from my State and the Southern States. In dealing with flexibility, it means that you are going to have a greater supply of soybeans. We need a somewhat greater supply. But you also have to look at such matters as, what are the yields?

In the South and in my State, the average yields of soybeans per acre are about 25 bushels. In certain areas in the North, the yields can go to 50, can go to 45, and in many places and instances will double the yields that exist. Therefore, as the yields go up, greater quantities of soybeans produced and sold, it means the price comes down.

There is a certain level that the cost of production is uniform. Whether it be in the West or the North or the South, they will not vary much. But when the price of soybeans goes down to a level below $6, it will mean in many places that the cost of production is not reached.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. HEFLIN. So I say there are a lot of problems dealing with this. I think this is an ill-advised amendment and I recommend to the Members of the Senate that you vote against it.

Mr. LEAHY. Mr. President, there are so many things wrong with this amendment. I heard the distinguished Senator from North Dakota speak of the imaginary hog argument; the distinguished Senator from Alabama has spoken of the soybeans dyed red and blue. There is a memo from one of my staff that said it is just like Howard Hughes' *Spruce Goose.* It looks good on paper, but it belongs in the hangar. And that is about what we have here.

Mr. President, I know the distinguished Senator from Iowa [Mr. GRASSLEY] is out of time, but I have been advised that one of his supporters needs 30 seconds to put a statement in the RECORD. I yield on the time I have reserved, 30 seconds to the distinguished Senator from Wisconsin [Mr. KASTEN].

Mr. KASTEN. I thank the chairman.

Mr. President, as an original cosponsor, I rise in strong support of the amendment by the senior Senator from Iowa [Mr. GRASSLEY].

This farm bill offers a golden opportunity for the Senate to craft a Federal agricultural policy that is responsive to national needs. By granting farmers more planting flexibility, we will make a big step in this direction.

I have long supported crop flexibility. It makes sense—both economically and environmentally—to allow farmers to flex out of part of their program base in order to grow a crop that is high in demand in the marketplace.

In my discussions with farmers throughout Wisconsin, particularly corn and soybean growers, meaningful crop flexibility has consistently been their No. 1 concern. This amendment is supported by the Wisconsin Corn Growers and Soybean Growers Association.

Under present farm programs, farmers are boxed in by unreasonable constraints. The evidence of the past decade bears this out. The United States market share of soybeans has been consistently worn away by South American competition.

The oat bran craze at the end of the eighties is another example. Consumer demand for oat products soared. But, because farmers were locked into their program crops and faced losing their program base acreage or deficiency payments if they were to grow anything else, America wouund up doubling its imports of oats between 1987 and 1989. This misguided policy must change.

Furthermore, crop flexibility will encourage soil conservation on our Nation's farms. Flexibility will result in crop rotation which is recognized as one of the most successful means of soil conservation.

By retaining farmers' deficiency payments and maintaining their base history, this amendment will offer real incentive for crop flexibility—much more than what is in the bill. By allowing farmers to make market-based planting decisions on 25 percent of both their program based acres and historical oilseed acres we will finally achieve meaningful flexibility. This will be good for the farmer, for the consumer and for the future generations of farmers and consumers who will need nutrient-rich soil on which to grow.

Mr. President, this amendment makes good sense. It has the support of the USDA, the EPA and commodity groups like corn and soybeans. Furthermore, the USDA estimates that this bill would reduce overall farm program costs by $1.5 billion.

I urge the acceptance of this amendment.

Mr. LEAHY. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 7 minutes and 30 seconds remaining.

Mr. LEAHY. Mr. President, I yield such time to the Senator from Iowa [Mr. HARKIN] as he may need.

Mr. HARKIN. Mr. President, I appreciate the distinguished Senator yielding.

Mr. President, I have listened to the debate and, of course, I studied the amendment by my friend from Iowa. I must admit that I have some mixed views about this amendment. On the one hand, I want to increase planting flexibility as far as possible for our farmers. I think we should and I think that is a proper way to go.

Earlier this year, I introduced a bill, along with Senator CONRAD, Senator DASCHLE, Senator KERREY, and Senator EXON that would have provided maximum flexibility and would have gotten us back to a normal crop acreage type of system that basically was in the 1977 farm bill that we heard discussed. If we could have gotten the marketing loan for soybeans up to the $6.00 to $6.25 range, I think that would have been the preferable way to go because it would have provided maximum flexibility for our farmers. But we got shot down by the budget considerations and by the Department of Agriculture on that. So we came up with the flexibility program that we have in the bill right now.

As I said, I do have some mixed thoughts about the amendment offered by my colleague from Iowa. But the serious questions I have about it really revolve around this: No. 1, if we provide this 25-percent flexibility for oilseeds planting and still pay the deficiency payment on program crop base acres that have not been planted to soybeans, I am concerned that farmers will then plant so many soybeans because of this proposal that it will put downward pressure on soybean prices, as my colleague from Alabama said, and thus increase the cost of the oilseeds marketing loan program in the bill, and thus cost us more money.

I think that may be what CBO was getting at when it said this amendment possibly cost us a half billion dollars.

The second problem I have with this amendment has to do with soil erosion. In many States in our part of the country, if farmers are going to take 25 percent of their corn base and plant some other crop on it say, soybeans, they are going to take their worst ground. They are going to take their least productive ground, because they are going to save their most productive ground for corn, that is, take their least productive ground and put it in soybeans and that is going to cause a lot more soil erosion. The payment scheme in this amendment would encourage that.

So I suspect a lot of farmers would be plowing up and planting soybeans on land that should not be planted to soybeans.

Now the third problem I have with the amendment has to do with penalizing those farmers who have practiced good conservation over the years. Let us say I am a farmer and I have had a good crop rotation program. I have planted a good share of my land, let us say, in alfalfa. But my neighbor down the road tore up the whole farm and planted corn on it year after year and has a big corn base.

This amendment would say to my neighbor down the road: "You caused all this erosion, but now if you take some of your land, up to 25 percent of your corn base, and put it in alfalfa, not only will you get the money from the alfalfa, but you are also going to get a deficiency payment for the corn you did not grow."

And the farmer down the road who has been practicing good conservation says, "What about me? I have been practicing good conservation and now I am getting penalized." I think that would cause a lot of hard feelings in the countryside among farmers who have been practicing good conservation.

I also am concerned about another provision of the amendment. Not much has been said about it, but the amendment, as I understand it, would allow planting 25 percent of the farm's historical oilseed acreage, let us say, to corn. If that happens, again, I am concerned about the stocks levels of corn and what that may mean in the future, if farmers may plant over their corn base by switching away from soybean planting this could occur perhaps in the South or other parts of the country where they may want to plant some corn but have little or no corn base, or even in the Corn Belt.

Those are the problems I have with the amendment. My biggest problem is basically the one concerning conservation: that the farmer who practiced good conservation gets nothing. The farmer who tore up the whole farm—just planted corn year after year—gets a benefit from this amendment. And, second, I am concerned the amendment gives farmers too much encouragement to take corn ground and plant it to soybeans; they will be inclined to shift the worst ground and that will be the most erosion prone ground.

Those are the basic problems I have with the amendment. Again, I know what my colleague is driving at: More flexibility. I wish we could get the normal crop acreage program back into effect, and that would be the best of all possible worlds, but obviously the budget and the Department of Agriculture would not let us do that.

I yield the floor.

The PRESIDING OFFICER. The Senator from Vermont has 2 minutes and 6 seconds.

Mr. LEAHY. Does anybody else wish to speak to this amendment?

I yield back the remainder of my time.

I understand all time has been exhausted on the other side.

The PRESIDING OFFICER. The Senator from Vermont is correct.

Mr. LEAHY. I yield the remainder of my time.

Mr. President, I move to table the amendment. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. There being no further debate, the question is on agreeing to the motion of the Senator from Vermont. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Massachusetts [Mr. KENNEDY] and the Senator from Maryland [Ms. MIKULSKI], are necessarily absent.

Mr. SIMPSON. I announce that the Senator from Utah [Mr. GARN] is necessarily absent.

I further announce that the Senator from South Dakota [Mr. PRESSLER] is absent due to a death in the family.

The results was announced, yeas 66, nays 30, as follows:

[Rollcall Vote No. 171 Leg.]

YEAS—66

Adams	Exon	Lott
Akaka	Ford	Mack
Baucus	Fowler	McClure
Bentsen	Glenn	Metzenbaum
Biden	Gore	Mitchell
Bingaman	Gorton	Moynihan
Boren	Graham	Nunn
Bradley	Gramm	Packwood
Breaux	Harkin	Pell
Bryan	Hatfield	Pryor
Bumpers	Heflin	Reid
Burdick	Heinz	Riegle
Burns	Helms	Robb
Byrd	Hollings	Rockefeller
Cochran	Inouye	Roth
Cohen	Johnston	Sanford
Conrad	Kerrey	Sarbanes
Cranston	Kerry	Shelby
Daschle	Lautenberg	Symms
DeConcini	Leahy	Warner
Dodd	Levin	Wilson
Domenici	Lieberman	Wirth

NAYS—30

Armstrong	Grassley	Murkowski
Bond	Hatch	Nickles
Boschwitz	Humphrey	Rudman
Chafee	Jeffords	Sasser
Coats	Kassebaum	Simon
D'Amato	Kasten	Simpson
Danforth	Kohl	Specter
Dixon	Lugar	Stevens
Dole	McCain	Thurmond
Durenberger	McConnell	Wallop

NOT VOTING—4

Garn	Mikulski
Kennedy	Pressler

So the motion to lay on the table the amendment (No. 2343) was agreed to.

Mr. MITCHELL. I move to reconsider the vote.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MITCHELL. Mr. President, for the information of Senators, I am about to propound a unanimous-consent agreement that if accepted would permit us to conclude now for the evening and resume in the morning with two amendments scheduled, debate of 1 hour and 15 minutes equally divided on each, and then two votes at noon. So the Senate would begin at 9:30 on the amendments, with two amendments to be taken in order, but the votes to be stacked to occur at noon. The first would be an amendment by Senator BAUCUS on cost of production and then the amendment by the Senator from Delaware, Senator ROTH, on peanuts.

Accordingly, Mr. President, I ask unanimous consent that when the Senate returns to consideration of the farm bill tomorrow morning at 9:30, Senator BAUCUS be recognized to offer an amendment regarding cost of production; that there be 1 hour and 15 minutes of debate on that amendment equally divided in the usual form and that no second-degree amendments be in order; that following the debate on the Baucus amendment, Senator ROTH be recognized to offer his amendment on the peanut program, that there be 1 hour and 15 minutes of debate on that amendment equally divided in the usual form, and that no second-degree amendments be in order; that upon the completion of debate on the Roth amendment, without any intervening action or debate, the Senate proceed to vote on or in relation to the Baucus amendment; that immediately following the vote on the Baucus amendment, the Senate proceed without any intervening action or debate to vote on or in relation to the Roth amendment.

The PRESIDING OFFICER. Is there objection?

Mr. HEFLIN. Reserving the right to object, I was not told we were going to bring up the peanut matter. I do not think the timeframe on that is long enough. We will need at least an hour on our side in regards to the peanut matter.

Mr. MITCHELL. Since the Senator was prepared to debate tonight, would the Senator from Delaware be prepared to offer the amendment and at least begin the debate tonight and then conclude it tomorrow morning?

Mr. HEFLIN. I need an hour on my side. I do not know about the others. Maybe they want a shorter time.

Mr. MITCHELL. What I am suggesting is that if we can agree on 2 hours of debate equally divided, 45 minutes of which, equally divided, would occur tonight and then 1 hour and 15 minutes of which would occur equally divided tomorrow morning as previously scheduled. That way Senators will get their full 2 hours in if they choose to do so.

Mr. HEFLIN. The problem is there is nobody to hear what you say.

Mr. LEAHY. Mr. President, the chairman will be here listening intently. I will take notes.

Mr. HEFLIN. That is the problem.

Mr. MITCHELL. Mr. President, I amend my request to ask that time on the Roth amendment be 2 hours equally divided, all other provisions of the unanimous-consent agreement to be the same as previously stated.

The PRESIDING OFICER. Is there objection to the revised unanimous-consent request? The Chair hears none and it is so ordered.

Mr. MITCHELL. Thank you, Mr. President. There will be no further rollcall votes this evening.

The PRESIDING OFFICER. The Senator from Washington.

AMENDMENT NO. 2344

Mr. GORTON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment of the Senator from Washington.

The legislative clerk read as follows:

The Senator from Washington [Mr. GORTON] proposes an amendment numbered 2344.

Mr. GORTON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Amend line 19 of page 924 of S. 2830 by striking "or pistachios" and inserting "pistachios, or apples".

Mr. GORTON. Mr. President, this amendment simply allows an addition of four other commodities in the bill, an apple import marketing order to be entered as and when there is a domestic marketing order which is not imminent in that connection and subject to the amendment already adopted, proposed by the Senator from Indiana [Mr. LUGAR] that will require U.S. Trade Representative approval of any import marketing order in order that they be consistent with GATT; approved on both sides.

The PRESIDING OFFICER. Is there debate on the amendment?

Mr. LEAHY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. BREAUX). The absence of a quorum has been suggested. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, I ask unanimous consent that we lay aside the amendment by the Senator from Washington State, with the understanding that it will not in any way prejudice his ability to bring the amendment back up.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2345

(Purpose: To establish a task force on farm safety, to provide grants for research on issues concerning farm safety, and for other purposes)

Mr. DURENBERGER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Minnesota, [Mr. DURENBERGER], for himself and Mr. GRASSLEY, proposes an amendment numbered 2345.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The text of the amendment is printed in today's RECORD under "Amendments Submitted".)

Mr. DURENBERGER. Mr. President, last November the world-class

marathon runner Dick Beardsley was transferring corn to a crib on his Minnesota dairy farm when his coveralls became caught in a tractor. By the time his wife found him, Dick's leg was wrapped around the tractor's power shaft. Luckily, his leg was not broken or mangled, but his knee was severely damaged. Because of this accident, Dick Beardsley, the man who came in second in the Boston Marathon in 1982, will never run the way he had before.

This incident is not unique. It happens every day on farms throughout America. There are about 50 agricultural deaths per 100,000 compared to an annual death rate for all industries of 11 deaths. In 1986, there were 1,900 agricultural deaths, 300 of them children and most of them were machine-related. In addition, there are approximately 170,000 disabling farm injuries each year causing pain and suffering, costing millions of dollars in health costs, disrupting lives and families. This all makes agriculture the most dangerous occupation in America.

Mr. President, the amendment I am offering is similar to the Farm Injury Prevention and Treatment Act of 1990 that Senator BOSCHWITZ and I introduced earlier this month. It addresses the farm safety in four ways: Government resources will be better focused, farm machinery will be made safer, farm injuries will receive better treatment, and rehabilitation, and accident prevention information will be better disbursed.

Since I introduced the original bill it has been made better by the constructive additions offered by Senators GRASSLEY, COCHRAN, and HARKIN. I appreciate their assistance.

My amendment is simple. It will streamline the Nation's farm safety research and education efforts by creating a 17-member intergovernmental, interdisciplinary task force of experts. The task force, based in the Department of Agriculture, will advise the Secretaries of Agriculture and Health and Human Services on how best to address the vexing problem of farm safety. And, Mr. President, there is a farm safety problem.

The task force will also conduct a national study of the problem. Senator GRASSLEY was very helpful in drafting this portion of the amendment. By doing a national study the task force will identify the extent and nature of the problem. Once this is better known the Federal Government and other concerned organizations can better focus their resources.

In addition, the amendment will direct additional resources to the treatment, care, and rehabilitation of farmers injured in farming accidents. Senator HARKIN has assumed an important leadership role in this area, providing useful building blocks for the amendment.

Yet, Mr. President, as we all know preventing accidents from occurring is our most important weapon against farm injuries. This calls for better education. My amendment will also focus the Government's attention and resources in this area. Senator COCHRAN provided essential input into the education portion.

An integral part of solving the problem is making farm machinery safer. No matter how safe they are, I believe more can be done. Toward this end, the amendment requires the task force to study the tractor rollover problem—the No. 1 killer—and develop recommendations on how best to address the problem. It does not mandate rollover protection systems, although I believe their use is very important.

To push farm machinery safety even further, my amendment will create farm machinery engineering research grants. These grants will provide seed money for engineering research that will hopefully make machines safe under all use conditions.

To conclude, Mr. President, my amendment will streamline and focus this Government's resources and attention on a problem that deserves it. Farm accidents have taken and disrupted too many lives. It is about time the Federal Government recognized this problem and took steps to solve it. My amendment does this, and does it in a way that is nonintrusive to the farmer and will get the job done.

The PRESIDING OFFICER. Is there further debate?

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. GRASSLEY. Mr. President, I am a cosponsor of Senator DURENBERGER's amendment. I thank him very much for including several amendments that I was concerned about in this provision.

Mr. President, agriculture, with 50 agricultural deaths per year per 100,000 total deaths, is one of the more hazardous occupations. Perhaps it is the most hazardous. It is particularly distressing that many of the agricultural deaths and injuries each year involve children. Therefore, it is certainly time we focused more closely on farm safety as a public policy problem.

There has been considerable interest in the problem of farm safety in my own State of Iowa. In fact, a group of occupational health and safety experts at the University of Iowa has worked hard to help get farm safety on the national agenda. I think they have been successful in doing that as we see from the inclusion in the farm bill of provisions which try to address farm safety questions.

I want to comment briefly on several provisions that Senator DURENBERGER has included in his amendment at my request.

The first provision would modify section 1495, the farm safety education section introduced earlier this year as separate legislation by Senator COCHRAN with my support.

Section 1495 authorizes a program of general health promotion activities and a program of farm safety education. For the Farm Safety Education Program, the Secretary is authorized to make grants for programs of farm safety education. The purpose of this program is to reduce the incidence of injury and death by providing information and training about agricultural workplace hazards.

The changes in this program that I have offered, first, would require the Secretary to establish a priority listing of farm injury and disease-related hazards, and to award grants based on those priorities. In other words, the Secretary would have the responsibility of awarding grants so as to have an impact on the most important farm injuries and disease-related hazards.

Second, this amendment would require the Secretary to establish specific accident and illness reduction objections so the success of the program can be evaluated.

And third, the provision requires the education programs established pursuant to grants awarded by the Secretary to focus on prioritized health and accident hazards that affect persons in rural areas.

Mr. President, I think that these changes in the farm safety and health education parts of the bill are simple and straight-forward. They try to make sure that the Department focuses its activities on the most important agricultural injuries and diseases.

The other provisions I suggested would make modifications to the legislation Senator DURENBERGER introduced July 17, and which he is offering as an amendment to the farm bill today.

Specifically, they would do several things. First, they would provide a grant authority to the Secretary of Agriculture to enable the Secretary to make grants to public and private institutions to gather and provide regional information relevant to the national study of agricultural safety issues which will be undertaken by the task force established by the bill.

One of the things we do not want to lose sight of is that there may be considerable regional variation in the incidence of particular workplace hazards. This grant authority will ensure that the Secretary gets appropriate information on farm safety from different regions of the country.

Second, they would require that the Secretary of Agriculture make sure that the Agriculture Extension Service is informed of deficiencies in farm safety programs operating around the country which are discovered by the

research and analysis undertaken by the task force. It will also require the Secretary to coordinate and disseminate farm safety information through the Agricultural Extension Service.

Finally, they would require the Secretary of Agriculture to request the Commerce Department to include questions relating to agricultural accidents and farm safety in the 1992 census of agriculture.

Mr. President, I am pleased to support Senator DURENBERGER's amendment, and pleased that I could suggest several ways it could be improved.

Mr. LEAHY. Mr. President, farm health and safety is an area in which Senator HARKIN has been a leader, not only as a member of the Senate Committee on Agriculture, but also as chairman of the Senate Appropriations Labor-HHS-Education Subcommittee. Last year, in the fiscal year 1990 Labor-HHS-Education appropriation bill, Senator HARKIN started a farm health and safety initiative. This initiative provided funding to the Centers for Disease Control for surveillance to identify health and injuries problems faced by farm families, research to develop ways and means to lessen the hazards of farming, and funding to provide for the dissemination of information through the Department of Agriculture's extension service. I know the distinguished Senator from Iowa, and farm health and safety is a matter near and dear to his heart, I appreciate his efforts to address this problem throughout our negotiations.

Mr. LUGAR. Mr. President, on our side, we commend the distinguished Senators from Minnesota and Iowa for a very constructive amendment. We ask for its adoption.

The PRESIDING OFFICER. Is there further debate on the amendment?

Mr. LEAHY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, I support the amendment also of the distinguished Senator from Minnesota.

The PRESIDING OFFICER. Is there further debate on the amendment?

If there be no further debate, the question is on agreeing to the amendment of the Senator from Minnesota.

The amendment (No. 2345) was agreed to.

Mr. DURENBERGER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2346

(Purpose: To require the conduct of a study concerning the handling of biological pesticides)

Mr. LEAHY. Mr. President, I send an amendment to the desk on the part of Senator LEVIN and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Vermont [Mr. LEAHY], for Mr. LEVIN, proposes an amendment numbered 2346.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 981, between lines 11 and 12, add the following new subtitle:

Subtitle D—Miscellaneous Provisions

SEC. 1771. BIOLOGICAL PESTICIDE HANDLING STUDY.

(a) STUDY.—Not later than September 30, 1992, the National Academy of Sciences shall conduct a study of the biological control programs and registration procedures utilized by the Food and Drug Administration, the Animal and Plant Health Inspection Service, and the Environmental Protection Agency.

(b) DEVELOPMENT OF PROCEDURES.—Not later than 1 year after the completion of the study under subsection (a), the agencies and offices described in such subsection shall develop and implement a common process for reviewing and approving biological control applications that are submitted to such agencies and offices that shall be based on the study conducted under such subsection and the recommendation of the National Academy of Sciences, and other public comment.

Mr. LEVIN. Mr. President, I am offering an amendment which I understand has been cleared on both sides. The amendment requires the National Academy of Sciences [NAS] to conduct a study of the biological pest control programs and registration procedures used by the Food and Drug Administration [FDA], the Animal and Plant Health Inspection Service [APHIS], and the Environmental Protection Agency [EPA]. Based on this study, the three agencies are required to develop and implement a common process for reviewing and approving biological control applications.

In plain language, biological pest control means good bugs that eat bad bugs. Using this method will help farmers reduce chemical pesticide use and should help reduce overall costs of production.

Unfortunately, using this efficient method of pest control has proven difficult in the past because of overlapping agency jurisdictions and regulations. The most famous case occurred at a grain elevator in Texas not long ago. A good bug seller sought and received permission from the U.S. Department of Agriculture to sell his bugs to a grain elevator operator to clean out the bad bugs in his stored grain. Things went along fine, until the FDA came in after the good bugs were introduced and seized three hundred bushels remaining in the storage area, claiming that its jurisdiction over the use of food additives required it to approve the use of these good bugs. This action caused the Texas Department of Agriculture to get involved and eventually, with the addition of the EPA's input, the situation came to a grinding halt, with the grain going nowhere. Finally, after almost a year of deliberation the FDA declared that the grain could be sold, despite the presence of good bugs.

Now, the three agencies appear to be slowly coming together to resolve their differences, but I think it is important that an independent body such as the National Academy of Sciences review the progress and the programs. NAS' independence will provide for a more objective basis, away from the agencies' jurisdictions, from which to develop a common program that will ensure a safe, sound, and scientifically accurate process and make it easier for good bug sellers to get swift and full consideration for selling their pest control products.

The PRESIDING OFFICER. Is there further debate on the amendment?

Mr. LUGAR. Mr. President, we support the Levin amendment on our side.

The PRESIDING OFFICER. Is there further debate on the amendment?

If there be no further debate, the question is on agreeing to the amendment.

The amendment (No. 2346) was agreed to.

Mr. LUGAR. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SYMMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2347

(Purpose: To facilitate the use of pesticides that are registered for agricultural minor uses and to establish the Inter-Regional Research Project Number 4 (IR-4 Program)

Mr. LEAHY. Mr. President, I send an amendment to the desk on behalf of Mr. GRAHAM, Mr. ADAMS, Mr. INOUYE, Mr. MACK, and Mr. HOLLINGS, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Vermont [Mr. LEAHY], for Mr. GRAHAM (for himself, Mr. ADAMS,

Mr. INOUYE, Mr. MACK, and Mr. HOLLINGS), proposes an amendment numbered 2347.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 981, between lines 11 and 12, insert the following new subtitle:

Subtitle D—Minor Use Pesticides

CHAPTER 1—REGISTRATION OF PESTICIDES FOR AGRICULTURAL MINOR USES

SEC. 1771. DATA IN SUPPORT OF REGISTRATION.

Section 3(c)(2)(A) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136a(c)(2)(A)) is amended by inserting after the third sentence the following new sentence: "The Administrator shall not require a person to submit, in relation to a registration or reregistration of a pesticide for minor agricultural use under this Act, any field residue data from a goegraphic area where the pesticide will not be registered for such use.".

SEC. 1772. REDUCTION OR WAIVER OF FEES FOR PESTICIDES REGISTERED FOR MINOR AGRICULTURAL USES.

Section 4(i)(5) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136a-1(i)(5)) is amended by adding at the end thereof the following:

"In the case of a pesticide that is registered for a minor agricultural use, the Administrator may reduce or waive the payment of the fee imposed under this section if the Administrator determines that the fee would significantly reduce the availability of the pesticide for the use.".

SEC. 1773. VOLUNTARY CANCELLATION.

Section 6(f) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136d(f)) is amended—

(1) by striking paragraph (1) and inserting the following new paragraph:

"(1) VOLUNTARY CANCELLATION.—

"(A) A registrant may, at any time, request that a pesticide registration of the registrant be canceled or amended to terminate one or more pesticide uses.

"(B) Before acting on the request, the Administrator shall publish in the Federal Register a notice of the receipt of the request and provide for a 30-day period in which the public may comment.

"(C) In the case of a pesticide that is registered for a minor agricultural use, if the Administrator determines that the cancellation or termination of uses would adversely affect the availability of the pesticide for use, the Administrator—

"(i) shall publish in the Federal Register a notice of the receipt of the request and make reasonable efforts to inform persons who so use the pesticide of the request; and

"(ii) may not approve or reject the request until the termination of the 90-day period beginning on the date of publication of the notice in the Federal Register, and

"(iii) may waive the 90-day period upon the request of the registrant or if the Administrator determines that the continued use of the pesticide would pose an unreasonable adverse effect on the environment.

"(D) Subject to paragraph (3)(B), after complying with this paragraph, the Administrator may approve or deny the request,"; and

(2) by adding at the end the following new paragraph:

"(3) TRANSFER OF REGISTRATION OF PESTICIDES REGISTERED FOR MINOR AGRICULTURAL USES.—In the case of a pesticide that is registered for a minor agricultural use:

"(A) During the 90-day period referred to in paragraph (1)(C)(ii), the registrant of the pesticide may notify the Administrator of an agreement between the registrant and a person or persons (including persons who so use the pesticide) to transfer the registration of the pesticide, in lieu of canceling or amending the registration to terminate the use.

"(B) An application for transfer of registration, in conformance with any regulations the Administrator may adopt with respect to the transfer of the pesticide registrations, must be submitted to the Administrator within 30 days of the date of notification provided pursuant to subparagraph (A). If such an application is submitted, the Administrator shall approve the transfer and shall not approve the request for voluntary cancellation or amendment to terminate use unless the Administrator determines that the continued use of the pesticide would cause an unreasonable adverse affect on the environment.

"(C) If the Administrator approves the transfer and the registrant transfers the registration of the pesticide, the Administrator shall not cancel or amend the registration to delete the use, or rescind the transfer of the registration, during the 180-day period beginning on the date of the approval of the transfer, unless the Administrator determines that the continued use of the pesticide would cause an unreasonable adverse effect on the environment.

"(D) The new registrant of the pesticide shall assume the outstanding data and other requirements for the pesticide that are pending at the time of the transfer.".

SEC. 1774. PEST CONTROL.

Section 28 of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136w-3) is amended—

(1) by inserting "(a) IN GENERAL.—" before "The Administrator,"; and

(2) by adding at the end thereof the following new subsections:

"(b) MINOR USE PESTS.—

"(1) IN GENERAL.—The Administrator, in cooperation with the Secretary of Agriculture, shall identify—

"(A) pests affecting minor-use crops that must be brought under control; and

"(B) chemical control measures available to control the pests described in subparagraph (A) and biological and other alternative control measures available to control the pests.

"(2) REPORT.—The Secretary of Agriculture shall, not later than 180 days after the date of enactment of this section and annually thereafter, prepare a report and send the report to the Administrator. The report shall—

"(A) describe in detail the pests and measures of pest control described in subparagraphs (A) and (B) of paragraph (1);

"(B) identify areas of pest control at risk of losing effectiveness due to—

"(i) an insufficient number of registered pesticides; or

"(ii) resistance by a pest to pest control measures; and

"(C) describe in detail research efforts, including agricultural extension programs, to develop effective pest control to address the areas of pest control described in subparagraph (B).

"(D) identify those crops likely to be affected by the lack of access to pesticides for minor agricultural use and identity through research, * * * pest control measures.

"(c) INTEGRATED PEST MANAGEMENT.—The Administrator, in cooperation with the Secretary of Agriculture, shall develop approaches to the control of pests based on integrated pest management that respond to the needs of producers who use pesticides for minor agricultural uses.".

SEC. 1775. CONFORMING AMENDMENTS TO TABLE OF CONTENTS.

The table of contents in section 1(b) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. prec. 121) is amended—

(1) by striking out the item relating to section 6(f)(1) and inserting in lieu thereof the following new item:

"(1) Voluntary cancellation.";

(2) by adding at the end of the item relating to section 6(f) the following new item:

"(3) Transfer of registration of pesticides registered for minor agricultural uses.";

and

(3) by striking the items relating to section 28 and inserting the following new items:

"Sec. 28. Pest Control.

"(a) In general.

"(b) Minor use pesticides.

"(1) In general.

"(2) Report.

"(c) Integrated pest management.".

CHAPTER 2—INTER-REGIONAL RESEARCH PROJECT NUMBER 4 (IR-4 PROGRAM)

SEC. 1776. FINDINGS.

Congress finds that—

(1) the Inter-Regional Research Project Number 4 (IR-4 program) is a national research program intended to facilitate the registration of pesticides for minor agricultural uses where use volume does not justify commercial development;

(2) the main beneficiaries of the IR-4 project are growers who use the pesticides to produce crops that are eaten daily (such as vegetables, fruits, and nuts) and other plants (such as vegetables, fruits, and nuts) and other plants (such as ornamental plants, floral crops, trees, and turf grass), and consumers who benefit from a plentiful, safe, and inexpensive domestic food supply;

(3) as the result of insufficient funding, the IR-4 program has a backlog of 1,200 requests for new uses;

(4) section 4 of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 236a-1) requires the reregistration of over 4,000 currently labled uses;

(5) about 1,000 priority minor use needs will not be supported for reregistration by industry; and

(6) given this level of responsibility, the IR-4 program will be unable to fulfill its important mission without additional funding resources.

SEC. 1777. INTER-REGIONAL RESEARCH PROJECT NUMBER 4 (IR-4 PROGRAM).

Section 2 of the Act entitled "An Act to facilitate the work of the Department of Agriculture, and for other purposes", approved August 4, 1965 (7 U.S.C. 450i), is amended—

(1) by redesignating subsections (e) through (i) as subsections (f) through (j), respectively;

(2) by inserting after subsection (d) the following new subsection:

"(e)(1) The Secretary of Agriculture shall establish an Inter-Regional Research Project Number 4 hereinafter referred to in this section as the 'IR-4 Program') to assist

in the collection of residue and efficacy data in support of—

"(A) the registration or reregistration of minor use pesticides under the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136 et seq.); and

"(B) tolerances for residues of minor use chemicals in or on raw agricultural commodities under sections 408 and 409 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 846a).

"(2) The Secretary shall carry out the IR-4 program in cooperation with the Administrator of the Environmental Protection Agency, State agricultural experiment stations, colleges and universities, extension services, private industry, and other interested parties.

"(3) In carrying out the IR-4 program, the Secretary shall give priority to registrations, reregistrations, and tolerances for pesticide uses related to the production of agricultural crops for food use.

"(4) As part of carrying out the IR-4 program, the Secretary shall—

"(A) participate in research activities aimed at reducing residues of pesticides registered for minor agricultural use;

"(B) develop analytical techniques applicable to residues of pesticides registered for minor agricultural use, including automation techniques and validation of analytical methods; and

"(C) coordinate with other programs within the Department of Agriculture and the Environmental Protection Agency designed to develop and promote biological and other alternative control measures.

"(5) The Secretary shall prepare and submit, to appropriate Committees of Congress, a report on an annual basis that contains—

"(A) a listing of all registrations, reregistrations, and tolerances for which data has been collected in the preceding year;

"(B) a listing of all registration, reregistrations, and tolerances for which data collection is scheduled to occur in the following year, with an explanation of the priority system used to develop this list;

"(C) a listing of all activities the IR-4 program has carried out pursuant to paragraph (4).

"(6) The Secretary shall submit to Congress within one year a report detailing the feasibility of requiring recoupment of the costs of developing residue data for registrations, reregistrations or tolerances under this program. This recoupment shall only apply to those registrants which make a profit on said registration, reregistration or tolerance subsequent to residue data development under this program. This report shall include:

(a) an analysis of possible benefits to the IR-4 program of such a recoupment;

(b) an analysis of the impact of such a payment on the availability of registrants to pursue registrations or reregistrations of minor use pesticides; and

(c) recommendations for implementation of such a recoupment policy.

"(7) There are authorized to be appropriated $25,000,000 for fiscal year 1991, and such sums are as necessary for subsequent fiscal years to carry out this section."

"(3) By inserting in subsection (g) following "subsection (b)" the phrase "and subsection (e)."."

The PRESIDING OFFICER. Is there debate on the amendment?

If not, the question is on agreeing to the amendment of the Senator from Florida.

The amendment (No. 2347) was agreed to.

Mr. LUGAR. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Are there further amendments?

AMENDMENT NO. 2348

(Purpose: To authorize the Secretary of Agriculture to address the control of grasshoppers and other pests on existing conservation reserve program land.)

Mr. LEAHY. Mr. President, I send an amendment to the desk on behalf of Mr. SYMMS and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Vermont [Mr. LEAHY], for Mr. SYMMS, proposes an amendment numbered 2348.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 545, after line 23, insert the following new subsection:

"(c) EFFECTIVE CONTROL ON EXISTING CONTRACTS.—(1) Not later than 180 days after enactment of the Food, Agriculture, Conservation, and Trade Act of 1990, the Secretary of Agriculture shall identify the land already enrolled in the environmental conservation acreage reserve program under chapter 2 of subtitle D which is most likely to incur a crop pest infestation that adversely impacts surrounding commercial farm land.

(2) Notwithstanding the requirements of substitle D, immediately after complying with paragraph (1) the Secretary of Agriculture may—

(A) offer to the owners or operators who hold contracts for land identified under paragraph (1) the following terms for renegotiation of those contracts:

(i) continuation of the contract unaltered except that the responsibility for controlling crop pests on contracted lands as necessary to prevent adverse economic damage to surrounding farm land shall be assumed by the contract holder, or

(ii) termination of the contract with no further annual rental payment, and with a penalty not to exceed one hundred percent of the cost-sharing payment made pursuant to subsection 1234(a), as determined by the Secretary of Agriculture; or

(B) establish any other procedures to control such pest infestations on such lands.

Upon establishing such terms of procedures, the Secretary may specify a period of time, not to exceed three months, in which an owner or operator must notify the Secretary of which terms or procedures will be accepted.

(3) An owner or operator offered renegotiation terms pursuant to paragraph (2) who notifies the Secretary of Agriculture of acceptance of the terms of subparagraph (2)(A)(i), shall receive an increased annual rental payment as determined by the Secretary to be fair and equitable.

(4) At the Secretary's discretion, the control of insect pests on acreage identified in paragraph (1) to avoid adversely impacting surrounding commercial farmland may be considered a conservation measure or practice for the purposes of subsection 1234(b).

Mr. SYMMS. Mr. President, my amendment addresses a critical problem we are facing right now in the State of Idaho—the uncontrolled infestation of crickets and grasshoppers generated off farmland that has been enrolled in the Federal Conservation Reserve Program.

I do not know how many of my colleagues have seen the damage that a grasshopper infestation can do, but it can be devastating. The hoppers can get so thick that they devour entire farm fields, literally covering the roads and ditches, to the point of becoming a traffic hazard. Several years ago Senator MCCLURE and I worked to obtain in the law a provision to require the Federal Government to control these pests as they arise on Federal forest and BLM lands. But now a new problem has come up—the farmland that the Federal Government leases as part of its conservation reserve has been prime breeding ground and forage for these pests. And the Federal lease agreement makes no provision for who or how to control them.

Fortunately, the Senate Agriculture Committee has incorporated in its reported bill language which requires any new "conservation reserve" lease agreement to specify that the farmer who owns the ground must control the pests arising on it. For the future, therefore, farmers can build the price of pest control into the annual rental payment in their bid for participation in the program. But that still does not address the millions of acres already leased for CRP.

The amendment I am offering allows the Secretary of Agriculture to go back and renegotiate those leases in areas where pest problems are likely. As soon as the Secretary determines where those areas are, he may offer CRP—enrolled farmers a choice: They can either begin to assume responsibility for controlling the grasshoppers and other pests on their CRP land, they can accept a penalty and terminate their contracts, or the Secretary may design some other control option. If they choose to stay in the program, they may be given a higher rental payment to reflect the added pest control costs.

This procedure assigns the task of controlling pests to the right entity, the farmer who owns the land. But it is also fair, giving farmers who originally bid assuming they wouldn't have to pay for pest controls a chance to either leave the progam, to receive a higher payment to reflect added costs, or to accept other options provided by the Secretary.

Also, so as to further increase the arsenal of the Secretary against economic infestations coming off CRP lands, my amendment includes discretionary authority for the Secretary to include pest control among those other activities that are cost-shared on Federal land. This authority may be more cost effective and practical, especially in some cases where a widespread rangeland pest control program is already being conducted by the Federal Government.

I hope my colleagues will see this proposal as the sensible and necessary provision that it is, and I encourage its swift adoption.

The PRESIDING OFFICER. Is there further debate on the amendment?

Mr. LUGAR. Mr. President I support the Symms amendment on this side.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Idaho.

The amendment (No. 2348) was agreed to

Mr. LUGAR. I move to reconsider the vote.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2349

(Purpose: To instruct the Secretary of Agriculture to seek to avoid favoring one class of wheat over another in the course of implementing export enhancement programs)

Mr. LEAHY. Mr. President, I send an amendment to the desk on behalf of Mr. SYMMS and Mr. MCCLURE and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Vermont [Mr. LEAHY], for Mr. SYMMS (for himself, and Mr. MCCLURE), proposes an amendment numbered 2349.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 466, line 16, insert the following: "(10) AVOIDANCE OF PREFERENTIAL APPLICATION. When using the authorities of this section to promote the export of wheat, the Secretary shall make reasonable efforts to avoid giving a preference to one class of wheat disproportionately more than another.".

Mr. SYMMS. Mr. President, the Export Enhancement Program established in the 1985 farm bill has been and continues to be a vital tool for regaining America's agricultural export markets lost because of the subsidized and unfair trading practices of some of our international competitors.

In recent years, however, a number of wheat exporters in the Pacific Northwest have raised the concern that the benefits of the Export Enhancement Program may be going disproportionately to some wheat varieties, and not to others. They point for example to the proportionately larger carryover of soft white wheat that has not been receiving the benefit of many EEP contract sales.

Now, to a certain extent, what wheat variety is sold under EEP depends on what the purchasing nations are requesting. Nevertheless, the Secretary of Agriculture has many authorities at his disposal to promote certain varieties, and these authorities may be employed to make the distribution of EEP benefits more equitable.

While my amendment recognizes that sales will ultimately be dictated by demand, it encourages the Secretary to do what he can to avoid disproportionately applying EEP benefits to one wheat variety over another.

The PRESIDING OFFICER. Is there further debate?

Mr. LUGAR. Mr. President, we commend the Senator for this amendment and support it on our side.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Idaho.

The amendment (No. 2349) was agreed to.

Mr. LEAHY. I move to reconsider the vote.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2350

(Purpose: To provide a preference to land in States that have adopted quantitative agricultural pollution reduction goals for inclusion in the conservation reserve)

Mr. LEAHY. Mr. President, I send an amendment to the desk on behalf of Mr. SARBANES and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Vermont [Mr. LEAHY], for Mr. SARBANES, proposes an amendment numbered 2350.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 516, line 21, strike out "and".

On page 516, line 23, strike out both periods and the end quotation marks and insert in lieu thereof "; and".

On page 516, after line 23, insert the following new subparagraph:

"(G) take into consideration the existence of watersheds experiencing actual and significant adverse water quality or habitat effects related to agricultural production activities, including such environmentally sensitive areas as the basins of the Chesapeake Bay and the Great Lakes, particularly where there are active State programs working to protect such watersheds. In utilizing the authority granted under this subparagraph, the Secretary shall attempt to maximize water quality and habitat benefits in such watersheds by promoting a significant level of enrollment of lands containing watersheds in the program under this chapter by whatever means the Secretary determines appropriate and consistent with the purposes of this chapter.".

Mr. SARBANES. Mr. President, today I rise to offer an amendment to the conservation title of the 1990 farm bill. The amendment encourages the Secretary of Agriculture, in implementing the Conservation Reserve Program [CRP], to take into consideration the need to protect sensitive watersheds like the Chesapeake Bay and the Great Lakes, particularly where there are active State programs working to protect such watersheds. This amendment is needed to encourage increased participation of the Chesapeake Bay area States of Maryland, Pennsylvania, and Virginia, among others, in the farm bill's conservation programs, and ensure that the CRP's enrollment is more evenly distributed. The amendment would also have the added benefit of encouraging other States and regions to adopt quantitative agricultural pollution reduction goals and helping to meet natural water quality improvement goals.

Nationwide, the CRP has contributed significantly to ongoing soil conservation efforts. Unfortunately, in the Chesapeake Bay area States, the program has fallen far short of its potential. Nationwide participation rates for the CRP approach 33 percent on average. In other words, about one in three American farmers enroll in the CRP. In the Bay States, however, on average, fewer than 1 in 10 eligible farmers has enrolled land in CRP. Pennsylvania, Virginia, and Maryland rank among the 15 States with the highest concentration of highly erodible land [HEL]. Yet, Maryland farmers have enrolled only 5.5 percent of eligible acreage; Pennsylvania has 6.4 percent participation; and Virginia has 11 percent of eligible land enrolled. As of the ninth signup period, only 225,000 acres have been enrolled in CRP out of a total amount of land eligible in our region of more than 3.3 million acres.

According to the committee report accompanying the farm bill, "Most of the land enrolled in the program is located in the wind-erosion prone areas of the Great Plains, partly as a result of the relatively high conservation reserve rental rates paid in this region." Already some 34 million acres of the 40 to 45 million authorized by Congress have been enrolled in the program. Unless further steps are taken soon to encourage Bay State farmers to participate, the program will be fully subscribed. By encouraging the Secretary to give preference to land within States which have adopted quantitative agricultural pollution reduction goals, we can help ensure that

CRP enrollment is more equitable among the States.

The committee report accompanying the farm bill points out that "While the overall successes of the conservation reserve program are substantial, fewer gains have been made in the other objectives of the program as established in the 1985 Food and Security Act than were possible, particularly in the area of water quality."

The fact is, the greatest water quality benefits from the CRP can be achieved in regions like the Chesapeake Bay. EPA has determined that the 11 million acres of agricultural land within the Chesapeake Bay watershed account for nearly one-third of the phosphorus and about three-fifths of the nitrogen entering the bay each year. Excessive quantities of these nutrients pollute the water and are a key cause of the bay's decline. CRP is one of the best available programs to reduce the flow of these pollutants to the bay. Indeed, Maryland, Pennsylvania, Virginia, the District of Columbia and the Federal Government through the EPA, have agreed to reduce these pollutants by 40 percent by the year 2000, and the States are relying heavily on the CRP to reach this ambitious water quality goal.

CRP's water quality potential is heightened because the lands eligible for enrollment cause a disproportionate impact on the bay. Areawide, the 1.5 million acres of highly erodible lands currently in production account for less than 15 percent of the total farmland, but are responsible for about 75 percent of all cropland erosion. In addition, farmland runoff from farms directly adjoining streams, rivers, or the bay is much more likely to actually end up in the water as pollution.

Unfortunately, because of the low participation rates, the Bay States are losing out in water quality benefits. Lost water quality benefits amount to approximately, 4 million pounds of nitrogen and 0.6 million pounds of phosphorus each year. My amendment would help meet the objective of improving water quality and go a long way toward cleaning up the bay.

Mr. LEAHY. Mr. President, this is a good amendment, and I support it.

Mr. LUGAR. Mr. President, we are pleased to support the amendment on our side.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Maryland.

The amendment (No. 2350) was agreed to.

Mr. LUGAR. I move to reconsider the vote.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2351

(Purpose: To improve the economic, community, and educational well-being of rural America, and for other purposes)

Mr. LEAHY. Mr. President, I send to the desk an amendment on behalf of Mr. HEFLIN, Mr. MCCONNELL, Mr. BAUCUS, Mr. CONRAD, Mr. ROCKEFELLER, Mr. BINGAMAN, Mr. PRESSLER, Mr. MITCHELL, Mr. SANFORD, Mr. HARKIN, and Mr. SHELBY and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Vermont, Mr. LEAHY, for himself, Mr. HEFLIN, Mr. MCCONNELL, Mr. BAUCUS, Mr. CONRAD, Mr. ROCKEFELLER, Mr. BINGAMAN, Mr. PRESSLER, Mr. MITCHELL, Mr. LEAHY, Mr. SANFORD, Mr. HARKIN, and Mr. SHELBY, proposes an amendment numbered 2351.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The text of the amendment is printed in today's RECORD under "Amendments Submitted.")

Mr. HEFLIN. Mr. President, last August the Senate passed an important rural development bill, S. 1036, the Rural Partnerships Act of 1989. On March 22 of this year, the House passed a companion bill, H.R. 3581.

Because of the press of other business, including the farm bill that is before us today, it has been impossible for the House and Senate to conference on these separate rural development measures.

Mr. President, rural economic development is too important to postpone. The amendment I am offering today would add the provisions of the rural development bill which are under the jurisdiction of the Agriculture Committee, as a title of the 1990 farm bill.

Many of our rural communities have suffered serious economic turmoil during the past decade. Particularly hard hit have been the farm economy, natural resources and energy-related industries, and low-skill manufacturing.

There is no one answer that every community can use to achieve economic vitality. However, there are common threads. First of all, the leadership for rural development must be taken by local community organizations—rural electric cooperatives, counties, econimic development districts, and other local entities. These organizations must provide the leadership, expertise, and commitment. Without these elements of local leadership and commitment, development efforts are not likely to be successful.

The Federal role is important but relatively minor. It is to provide technical expertise and assistance and modest amounts of capital to encourage and leverage private capital.

This is the exact approach we have taken in S. 1036. It is a sound approach. It is an approach that will help our rural communities. It merits inclusion in the bill that is before us today.

Mr. ROCKEFELLER. Mr. President, I rise to express my support for this amendment, offered by the senior Senator from Alabama, which would attach the provisions of the Rural Partnership Act to the pending farm legislation. As a cosponsor of the amendment, I am proud to join in this effort to try to pass the Rural Partnership Act into law. The same provisions were approved by the Senate as a separate bill in August of last year. In essence, today we are trying with this amendment to get the bill moving again and headed for enactment.

West Virginia and rural America are waiting—and unfortunately, they have been waiting for a long time for the resources and assistance that this legislation proposes. When the Senate passed the Rural Partnership Act last year, we affirmed our commitment to channeling needed help to rural areas for economic development, job creation, and growth. But this measure has been stalled, and some important new programs sidelined.

Mr. President, the Rural Partnership Act, contained in this amendment, is a response to the needs of rural Americans. A quarter of the people in our Nation live in the rural regions of our country, and they deserve far more attention and assistance than they have been getting. The Senate's Rural Partnership Act recognizes those challenges and offers new ideas and fresh approaches to address the problems of rural communities.

I would like to call special attention to a small, but meaningful initiative included in the provisions of this amendment: the "Rural Business Incubator Loan Fund." The incubator fund, which is designated to be placed within the Rural Electrification Administration, is designed to promote economic development through the creation and expansion of business incubators.

I strongly support the idea of the Rural Incubator Loan Fund, and hope that we will see rural communities and States take full advantage of it. When the Rural Partnership Act was before the Senate last year, I offered an amendment which was unanimously accepted that modified the underlying provision so that my own State, West Virginia, and several others would have full access to the fund.

My amendment would simply expand the eligibility for the Rural Business Incubator Loan Fund to enable the few States which do not have a network of electric cooperatives

to participate. West Virginia and other States with just one electric cooperative, or those States that do not have any cooperatives, would have effectively been shut out of this particular program if the bill were to remain in its current form. My amendment changes that by naming "nonprofit entities" as a category of qualified applicants in those States that do not have two or more electric cooperatives. These nonprofit entities must meet all the same requirements established in the bill to compete for grant or loan money from the incubator fund.

Therefore, my amendment ensures that every State has a chance to participate in this new, innovative program. I am pleased that with this amendment all States—including West Virginia—will be able to participate in this small but important program.

Business incubators are in exciting new tool for economic development in rural America. An incubator is a facility designed to help get new businesses started on the right foot. In an incubator, new startup businesses share the facility and many overhead costs. By sharing costs for a few years, first-time entrepreneurs have a better chance to become established in their community. Once a business is established, it moves out of the incubator on its own creating an opportunity for another entrepreneur.

Several years ago, I sponsored a conference to make business and government officials in my State more aware of the business incubator approach and how to set one up. I have since been enormously proud to watch the concept spread. There are now several business incubators open and running in West Virginia, and other was in various planning stages. Incubators stimulate new business and new hope; they are a worthwhile investment to spur growth and jobs in rural areas throughout the country.

Economic development is expensive, and often a struggle. But it is essential for our country as a whole to invest in rural economic development and improve the basic infrastructure in our small communities; building road, opening rural health clinics, and establishing sewage treatment facilities. These projects are vital to improving the quality of life, and critical to jobs and economic development in rural America.

Jobs do not come to areas without water and sewage treatment. Companies do not locate on back roads. Families do not move to communities if they lack good schools or nearby health care facilities. Without new investments in basic infrastructrue, rural America will continue to be left out of economic prosperity. We cannot allow the people who live in West Virginia and other rural areas to be left behind our urban centers.

The rural Partnership Act is an innovative package with key provisions to increase funding for sewage treatment and direct that funding to small, needy areas. It also includes provisions to strengthen our telecommunication network in rural America with special programs targeted toward schools, hospitals, and rural businesses.

This amendment is an important step toward helping West Virginia and other rural areas. We should attach it to this farm bill and take this important step forward in improving and expanding assistance to families and communities throughout rural America.

The PRESIDING OFFICER. Is there further debate?

Mr. LUGAR. Mr. President, this amendment is essentially a restructuring of S. 1036, the rural development bill. We believe that very constructive action has occurred in reshaping some of the portions of that bill, and therefore we are pleased to support the amendment.

The PRESIDING OFFICER. Is there further debate? The question is on agreeing to the amendment of the Senator from Alabama.

The amended (No. 2351) was agreed to.

Mr. LEAHY. I move to reconsider the vote.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Are there other amendments?

AMENDMENT NO. 2352

Mr. LEAHY. Mr. President, I send to the desk an amendment on behalf of the senior Senator from Texas [Mr. BENTSEN] and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Vermont [Mr. LEAHY], for Mr. BENTSEN, proposes an amendment numbered 2352.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In S. 2830, in the appropriate place insert the following:

Section 1231 of the Food Security Act of 1985 (16 U.S.C. 3831) is amended by adding at the end thereof the following new subsection:

"(k) For purposes of determining the eligibility of land to be placed in the conservation reserve established under this chapter, land shall be considered planted to an agricultural commodity during a crop year if an action of the Secretary prevented land from being planted to the commodity during the crop year.".

Mr. LEAHY. Mr. President, this amendment would allow land to be considered planted for the purpose of eligibility in the Conservation Reserve.

It was passed by the Senate in 1987. I think it made sense in 1987, and I think it makes sense now. I have discussed it with the Senator from Texas and have no objection to the amendment.

The PRESIDING OFFICER. Is there further debate?

Mr. LUGAR. Mr. President, we agree with the distinguished chairman that this was a part of the Farm Credit Act of 1987, a commendable amendment then, and now we look forward to supporting it.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Texas.

The amendment (No. 2352) was agreed to.

Mr. LEAHY. I move to reconsider the vote.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CONSUMER PRODUCTS SAFE TESTING ACT

Mr. KOHL. Mr. President, I commend my distinguished colleague from Nevada, Mr. REID, for his leadership in bringing the Consumer Products Safe Testing Act to the Senate floor.

I strongly support the intent of this legislation. Its objective is to reduce the number of animals needlessly sacrificed in products testing laboratories each year. This is clearly an area where our country must make progress. The horrors of the lethal-dose 50 test, which would be restricted by this legislation, are infamous. By nearly all accounts, the use of the so-called Classic LD50 is of limited scientific value. The Food and Drug Administration does not require this test. The National Toxicology Program does not use this test. And a number of European countries, as well as Japan, have strictly limited the use of the LD50. Nonetheless, these nations continue to produce safe, high-quality consumer products and pharmaceuticals. I believe that we must at least consider the possibility of enacting legislation to bring our Nation's products testing standards to the same ethical and scientific plane.

I would like to emphasize, however, that I do not believe that we are in a technological position to eliminate the use of animals in either product testing or biomedical research. I remain unconvinced that we have the ability to unilaterally substitute current animal research models with alternative techniques, such as computer or cell and tissue culture models. Based on testimony from both the scientific and consumer products communities, I believe that there are instances in which LD50 continues to be necessary. The legislation before us attempts to balance the concerns of those who

have long opposed the unnecessary use of the LD50 test with those who seek to use the test to assure the highest standards of product safety. While the proposal before us is not perfect, this is an issue that we do need to resolve and I support the effort of my good friend from Nevada.

HUMANE TREATMENT FOR ANIMALS—REID AMENDMENT NO. 2331

Mr. MACK. Mr. President, I would like to take a moment to address an issue which we voted on last night which I know is very important to many of my constituents in Florida. That issue is animal welfare and the vote I cast on the Senator from Nevada, Mr. REID's, amendment last night. I am in full agreement with my colleague from Nevada that we should work to end all cruelty to animals. This includes discontinuing the use of tests that are needlessly inhumane and which serve no valuable purpose. However, this was not the case with the amendment by the Senator from Nevada. While I too support humane treatment of animals, I have also been very involved and care deeply about the fight to end cancer. The American Heart Association testified against Senator REID's amendment before the Senate Commerce Committee as the amendment would prohibit the use of important medical testing. Additionally, Secretary Sullivan states in a letter sent to me yesterday that adoption of this amendment could curtail important cancer research. For this reason alone, I voted against the amendment. However, I want to reiterate that I support Senator REID's amendment in concept, and I hope very much that modifications can be made to the provision so that I can lend my full support to this important matter in the future. Thank you, Mr. President.

COHEN AMENDMENT ON FLEXIBILITY ACREAGE

Mr. GRAHAM. Mr. President, I rise to speak in support of the Cohen amendment to exclude nonprogram crops from the flexibility program contained in the Senate farm bill.

I would like to make several points:

First, the original intent of the flexibility concept excluded nonprogram crops. In fact, the House of Representatives, farm bill contains a flexibility program which is limited to program crops.

Second, unlike program crops, fruit and vegetable farmers do not grow for a guaranteed market. When their markets are destabilized—which is a real possibility under the existing language—they have no Government programs to fall back on.

Third, finally, Florida, as the leading domestic producer of many fruits and vegetables, is just now beginning to recover from the effects of a devastating freeze this past winter. We cannot now deal another blow to an industry extremely sensitive to market pressures.

For these reasons, I cannot support the concept of flexibility unless fruits and vegetables and other nonprogram crops are exempted and commend the Senator from Maine for offering this very sensible solution.

THE FLORIDA SUGAR INDUSTRY'S COMMITMENT TO GREATLY REDUCE THEIR POLLUTING RUNOFF INTO THE EVERGLADES ECOSYSTEM

Mr. GRAHAM. Mr. President, will the chairman engage in a colloquy with the Senator from Florida regarding the Florida sugar industry's commitment to help improve the health of the Everglades ecosystem?

Mr. LEAHY. Certainly.

Mr. GRAHAM. I know that given his knowledge about the Everglades, he shares my concern that we must restore and preserve this unique ecological system. The Everglades are under attack on a variety of fronts. The single biggest threat to its health, however, involves water. The Everglades are being starved of water, and what little water the area does get is heavily polluted, primarily with phosphorus. Thus, assuring an adequate supply of high quality water is vital to ensuring the survival of this national treasure, would the Senator from Vermont not agree?

Mr. LEAHY. Absolutely.

Mr. GRAHAM. Scientists who have studied the problem estimate that over 200 tons of phosphorus are running off from the Everglades agricultural area south of Lake Okeechobee into adjacent State water conservation areas, a national wildlife refuge, a national preserve, and ultimately into Everglades National Park where it is causing tremendous damage to native flora and fauna. The primary source of this pollution is the sugar cane fields that dominate the agricultural area. Thus, would the Senator also agree that the Florida sugar industry must assume a major portion of the responsibility to improve both the quantity and quality of the water they discharge?

Mr. LEAHY. I agree completely with the Senator. The industry must participate fully in a comprehensive program to undo the damage they have done.

Mr. GRAHAM. The Senator will be interested, then, in the results of the discussions I have had with the Florida sugar industry to redress this problem. The sugar growers acknowledge that a prompt reduction of at least 75 percent, or 150 tons of phosphorus, is needed. Their leaders have personally committed to me that they will implement mechanisms on their own land to achieve up to half of this reduction. I understand that they have also committed to providing a substantial portion of the funds to purchase buffering lands to filter out the balance of the pollutants needed to meet this 150-ton goal.

Mr. LEAHY. I want to compliment the Senator from Florida on his efforts to get the industry to stop being part of the problem and becoming a part of the solution. May I ask a question about this remedial plan?

Mr. GRAHAM. Surely.

Mr. LEAHY. How much does the Senator think the total effort will cost?

Mr. GRAHAM. While estimates vary, I understand a comprehensive program will cost upwards of $80 million, plus a much smaller amount each year for operations and maintenance. The Florida sugar industry is reviewing a proposal whereby they would fund half of the cost. Given the size of this undertaking reducing the sugar industry's loan rate will not make the Florida growers any more willing or able to fulfill these responsibilities.

Mr. LEAHY. I understand that reducing onsite runoff of phosphorus and setting aside lands to act as "kidneys" to absorb nutrients are pollution control techniques that are still evolving. What will happen if, after the sugar growers implement their plan, they do not achieve the 150-ton goal?

Mr. GRAHAM. I have full confidence that industry would implement additional measures to fulfill their commitment. A prime option for them would be to acquire additional lands for the buffering system. They will not, however, withhold water to let the pollutants settle out or inject it as a way to increase the quality.

Mr. LEAHY. I understand that the Florida sugar growers have yet to actually put this commitment in writing. What can we in Congress do to ensure that they will follow through with their promises to the Senator from Florida?

Mr. GRAHAM. I recently met with the leaders of the Everglades coalition to discuss our options. The Everglades coalition is an umbrella organization of environmental groups, public interest groups, and citizens established with my support when I was governor to serve as the watchdogs and advocates for the whole Everglades system. I considered several proposals. One of the most effective would be to tie Florida sugar's continued participation in the Federal allotment and loan programs to their compliance with State water quality standards.

Mr. LEAHY. That would be a very effective tool to ensure the farmers' adherence to environmental standards.

Mr. GRAHAM. I agree. However, before Congress considers such a legislative proposal, I believe it is only fair to give the Florida sugar growers an opportunity to fulfull their commitment. Thus, I would like to see if the outlines of a comprehensive water improvement management plan cannot be hammered out among all of the in-

terested parties in the next few months.

Mr. LEAHY. I think that would be fair. Will the Senator from Florida keep me apprised of the progress of these efforts?

Mr. GRAHAM. I would be happy to, and I thank the Senator for continued interest and desire to help us preserve this vital natural area of my State.

Mr. McCONNELL. Mr. President, during the past decade our Nation has enjoyed tremendous economic growth and prosperity. Inflation has been tamed, unemployment has decreased to its lowest levels in many years and our economy has enjoyed a sustained expansion that is unparalleled.

These national trends give us cause to rejoice. They demonstrate and confirm that the management of our national economy is sound and that we are on the right course. Unfortunately, the economic prosperity of the past decade has not been enjoyed in all areas of our country. The most striking example is our rural areas.

Far too many rural communities have faced wrenching economic problems at the same time our national economy has experienced unprecedented growth and prosperity. For the most part, the rural communities experiencing these problems are those which lack diversity in their economies. Particularly vulnerable are those rural areas that rely on agriculture, mining, or energy-related industries and low skill manufacturing for most of their income.

Mr. President, I am proud to represent the State of Kentucky, but I want to share some statistics with my colleagues which trouble me deeply: 34 of Kentucky's 120 counties are classified as persistently poor, meaning the median per capita incomes in these counties have been in the bottom fifth of a ranking for all U.S. counties since 1950. Based on Department of Commerce data, U.S. per capita personal income in 1988 was $16,490. The average per capita income for rural Kentuckians was $10,794—$10,794 is more than one-third below the average for the United States.

Above all else, rural development is an economic issue. For several years the combination of slower economic growth and a net loss of population has pushed rural Kentucky and rural America into a gradually worsening economic situation.

As these people leave rural America, and they continue to leave at a rate of nearly 400,000 people per year, the economic base of our small towns and communities erodes. It is imperative that the momentum shift to a growing economic base for rural America and I believe this legislation provides that kind of boost.

The need for economic diversity that can occur with rural development efforts is clear. This is a major lesson of the past decade. Diversity is essential if a community is to moderate the ups-and-downs of a dominant industry.

There has been no lack of interest in developing new policy, but there has been a lack of focus and coordination of effort. If a rural development initiative is to be effective the Federal, State, and local governments must be involved and working together to the mutual benefit of those in need. There are many organizations that have a sincere interest in rural areas and most should be encouraged and allowed to participate in any rural policy that is created.

Mr. President, these issues were considered last year when we developed S. 1036, the Rural Partnerships Act of 1989, which passed the Senate on August 2 of last year.

The provisions developed and supported in S. 1036 are based on encouraging local entities—rural electric cooperatives, counties, chambers of commerce, economic development districts, and others—to provide leadership in assisting their local communities to build a diversified economic base, and to improve the quality of life and economic opportunities for rural Americans. If a rural development initiative is to be effective everyone must be involved and working together for the mutual benefit of those in need.

The characteristics of rural America are changing rapidly. The long-help philosophies of how to best deal with the problems that exist in the rural communities may not still be true and now is the time for some very significant and meaningful changes in the policies and tools at all levels of government.

The amendment would include, as part of the 1990 farm bill, the provisions of S. 1036 under the jurisdiction of the Agriculture Committee. This bill is a product of continued efforts and constructive thinking by all members of the Agriculture Committee. In my judgment, it would aid the rural economy tremendously and I believe it belongs in the 1990 farm bill.

Mr. President, the citizens of rural Kentucky deserve the same opportunities for prosperity and the same quality of life as citizens of the largest cities of our Nation. The inclusion of the rural development amendment in the farm bill will be a major step in ensuring that our rural citizens share in the economic growth of our country.

LOAN RATE FOR SUGAR

Mr. KERREY. Mr. President, just so no one is under the illusion that a unilateral cut in the U.S. loan rate for sugar will translate into lower prices for the kid who buys a Snickers bar or higher wages for the guy who's wielding a machete in any sugar cane field around the globe, I ask unanimous consent to have printed in the RECORD at the end of my statement an article from yesterday's Philadelphia Inquirer entitled "Bitter Lives in Philippine Sugar Fields."

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KERREY. The heading on the second page of this article perhaps best describes the situation facing field workers on the sugar cane plantations in most countries of the world: "Philippine Sugar Fields: Low Wages and Bitterness Amidst the Plenty."

The article tells how more than half of Philippine sugar workers earn less than the minimum wage of $3.25 per day, even as the owners of these massive plantations continue to accumulate larger profits with which to maintain their private security forces and comfortable lifestyle. As the article notes, "strong sugar profits have fueled an investment boom that never seems to trickle down to most sugar workers."

The article concludes by quoting one worker who says he "would love nothing more than a piece of land he could call his own," so that he could plant rice, which is what his family eats three times a day, or perhaps sugar, since the mill is still there.

[From the Philadelphia Inquirer, July 23, 1990]

BITTER LIVES IN PHILIPPINE SUGAR FIELDS

(By Vernon Loeb)

BACOLOD, PHILIPPINES.—Out in the sugar fields, Ricardo Bantad and his fellow laborers are members of the National Federation of Sugar Workers.

By lunch time, they will have earned about 66 cents each. They are demanding that the planter pay them the minimum wage of 73.50 pesos—that's $3.25 a day.

Back in Bacolod city, dozens of well-dressed businessmen and their wives crowd around blackjack tables at the Casino Filipino, where dealers lay down cards and cashiers scoop up crisp, new 500-peso notes.

A three-star hotel has just gone up a block away in an entertainment district full of outdoor cafes and restaurants with names such as Et Cetera. There is a Shakey's pizza parlor and a cinema featuring a Tom Hanks movie.

Such is the schizophrenic quality of life these days in "Sugarlandia," where strong sugar profits have fueled an investment boom that never seems to trickle down to most sugar workers—more than half of whom still work for less than the meager minimum wage.

The island of Negros in the central Philippines is a classic illustration of the country's ills—a landed elite lording over multitudes of landless peasants, an overdependence on sugar, an entrenched communist insurgency and a long history of human rights abuses.

And the place hasn't changed much since Corazon C. Aquino became president four years ago, despite having what is generally considered to be one of the most progressive provincial administrations in the Philippines.

"This is an island where there is tremendous social injustice," said one Western diplomat. "It is an island racked by injustice."

A breeze rustles the tops of tall sugar cane stalks, making a whoosh that sounds like waves lapping the shore. *Carabaos*, or water

buffalo, cool off in the Matabang River, submerged except for their horns, eyes and noses.

Ricardo Bantad's bamboo hut is perched on a nearby bluff. It looks out over a small valley of terraced rice paddies that Bantad and his neighbors have planted between the cane fields to supplement their income.

"We eat rice three time a day, with vegetables—we call it *gabi*," Bantad says. "It grows wild by the side of the river, with big leaves. We used to have a lot of chickens, but now, no more. One of my children got sick and I had to sell them to get medicines. We eat no meat, but sometimes, once a week—on payday—we eat dried fish—we call it *oga*."

Bantad, 39, a tanned, wiry man, is acting president of the National Federation of Sugar Workers at Hacienda Alasigan in Silay city, about 45 minutes from Bacolod. Bantad says the hacienda is owned by a man named Jesse Granada, who leases the land to someone else. Bantad's father worked for Granada's father.

Bantad works in the fields with his wife and three of his seven children, ages 19, 17 and 14. The 13-year-old, Elsie, looks after Raymond, the newborn, when they are at work. They often hear Raymond crying for his mother's breast as they walk home through the fields at lunch time.

Together, the five can earn the equivalent of about $22 a week, on which the nine of them survive.

Is it a fair wage?

"I cannot say for certain," says Armando Aurilio, on of Bantad's neighbors and the union's secretary, "because we do not see the owner—we are only dealing with his accountant."

Another demand of the union members is to meet with the man for whom they work, face to face.

Even if all the sugar planters started paying the minimum wage, according to Rafael L. Coscolluela, vice governor of Negros Occidental province, it would only alleviate the most dire instances of poverty.

Alleviating injustice, Coscolluela said, would require aggressive implementation of Aquino's land-reform law, which requires that all large parcels of land be redistributed to those who actually work the land.

But the Aquino administration's performance so far has been dismal, Coscolluela said. The government hasn't even acquired 70,000 acres—about 10 percent of the arable land—that sugar planters have offered to sell, he said. The rest would have to acquired against the will of the owners, at best a problematic proposition.

Most planters have private security forces, and many are also protected by the Philippine military, which in the past has interfered with civilian land-reform officials at the planters' behest.

Government troops and private paramilitary forces have also made life difficult for the sugar workers' union. More than 60 of its organizers and officials have been killed since its founding in the early 1970s, according to union leaders.

"A . . . bullet costs 18 pesos," said Serge Cherniguin, the union's vice president. "That could provide a family of six with one meal. You know, the sugar planters, they feed their dogs better than their sugar workers. And yet they feel as though they have already given their workers the moon."

It is little wonder that Negros is a hotbed of the communist New People's Army (NPA), which made headlines recently by kidnapping an American Peace Corps volunteer and a Japanese aid worker.

The NPA had been relatively quiet here before the kidnappings. Since then, it has been on a rampage, killing at least 20 police and civilians in ambushes. Thirty NPA members recently killed a prominent sugar planter and his bodyguard north of Bacolod.

"There is an enormous amount of violence on this island," the Western diplomat said, noting that seven Philippine military battalions and artillery and helicopter gunships are deployed here.

There are conflicting theories for the sudden surge of NPA activity.

Retired Archbishop Antonio Y. Fortich said the recent string of encounters "is a sign of disgust and unrest on the part of the people."

"Unemployment, the minimimum-wage law and land reform have not been touched," Archbishop Fortich said. "These are all tall orders."

Coscolluela and Western diplomats see it much differently, describing the recent attacks as a sign of NPA concern that its support is being eroded by local government successes in the countryside.

"On the other hand," Coscolluela added, "we can't say the NPA doesn't have breeding grounds for recruitment, because many of the ills still exist. We need to continue to bring ourselves to the people, because that is what the NPA is doing as well. We're fighting for their hearts and minds."

Ricardo Bantad and the other union leaders squat on their haunches in the morning sun outside Bantad's bamboo hut, talking about the prospects of genuine land reform in Negros.

Like most rural Filipinos, Bantad speaks cautiously to strangers.

But not Danilo Adrias, 39, the union's vice president.

"The NPA is working for the interests of the poor people," he blurts out. "If the NPA comes and tries to organize the people in the right way, we will work with them. If they organize the people in the wrong way, we will not.

"We are poor," he goes on. "Most of the profit goes to the owners, not the workers. But we are controlled. We cannot do anything."

Adrias would love nothing more than a piece of land he could call his own.

"I would plant rice, and maybe sugar, since the milling company would still be there," he says.

"If there is land to the people, there will be no more insurgency," Adrias says. "Even the NPA will agree to cultivate the land. And if there is no land to the people, everything will stay the same.

Mr. LEAHY. Mr. President, I think we have done about enough of the farm bill for one day. In fact, I am pleased with what we have done. We have had a very, very good day. I thank all Senators for their help, and I commend not only the endurance but the expertise of Senator LUGAR. I hope that what we have done today sets the stage for being able to bring this bill to finality, perhaps on the next legislative day.

Again, I encourage Senators to enter into time agreements, and if they are willing to cut back on those time agreements as they go along that will help.

MORNING BUSINESS

Mr. LEAHY. Mr. President, I ask unanimous consent that there be a period for morning business with Senators permitted to speak therein.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE HOUSE

ENROLLED JOINT RESOLUTION SIGNED

At 3:14 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the Speaker has signed the following enrolled joint resolution:

H.J. Res. 577. Joint resolution designating the month of November 1990 as "National American Indian Heritage Month".

The enrolled joint resolution was subsequently signed by the President pro tempore [Mr. BYRD].

MEASURES PLACED ON THE CALENDAR

The Committee on Commerce, Science, and Transportation was discharged from the further consideration of the following bill; which was placed on the calendar:

S. 15. A bill to amend the Public Health Service Act to improve emergency medical services and trauma care, and for other purposes.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. KENNEDY, from the Committee on Labor and Human Resources, with an amendment in the nature of a substitute:

S. 2628. A bill to amend the Public Health Service Act to reauthorize certain National Institute of Mental Health grants and to improve provisions concerning the State comprehensive mental health services plan, and for other purposes (Rept. No. 101-389).

S. 2629. A bill to amend the Public Health Service Act to extend the immunization program for vaccine-preventable diseases, and for other purposes (Rept. No. 101-390).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. BENTSEN, from the Committee on Finance:

Stanford G. Ross, of the District of Columbia, to be a Member of the Boards of Trustees of the Federal Hospital Insurance Trust Fund; the Federal Old Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund; and the Federal Supplementary Medical Insurance Trust Fund for a term of four years; and

David M. Walker, of Virginia, to be a Member of the Boards of Trustees of the Federal Hospital Insurance Trust Fund; the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund; and the Federal Sup-

plementary Medical Insurance Trust Fund for a term of four years.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. CRANSTON:

S. 2890. A bill for the relief of Abby Cooke; to the Committee on the Judiciary.

By Mr. WIRTH:

S. 2891. A bill to authorize and direct an exchange of lands in Colorado; to the Committee on Energy and Natural Resources.

By Mr. WIRTH (for himself and Mr. HEINZ):

S. 2892. A bill to amend the Solid Waste Disposal Act to provide management standards and recycling requirements for spent lead-acid batteries; to the Committee on Environment and Public Works.

By Mr. LIEBERMAN (for himself and Mr. DODD):

S. 2893. A bill to facilitate and assist in the economic adjustment and industrial diversification of workers, communities, and businesses adversely affected by the termination or reduction of defense contracts or the realignment or closure of defense facilities; to the Committee on Finance.

By Mr. EXON (for himself and Mr. KERREY):

S. 2894. A bill to authorize appropriations for the West North Central highway system serving the West North Central region and for other purposes; to the Committee on Environment and Public Works.

By Mr. MOYNIHAN (for himself and Mr. D'AMATO):

S. 2895. A bill to provide for the renegotiation of certain leases of the Seneca Nation, and for other purposes; to the Select Committee on Indian Affairs.

By Mr. CRANSTON:

S. 2896. A bill to reorganize the agencies of the United States involved in migration affairs into a new Agency for Migration Affairs; to the Committee on Governmental Affairs.

By Mr. LEVIN (for himself and Mr. KOHL, Mr. HARKIN, Mr. GRASSLEY, Mr. SIMON, and Mr. KASTEN):

S. 2897. A bill to esablish a small business technology transfer demonstration program with the Community College Association for Technology Transfer (or for other purposes); to the Committee on Small Business.

By Mr. JOHNSTON (for himself, Mr. COCHRAN, Mr. PRYOR, Mr. GRAMM, Mr. BREAUX, Mr. BENTSEN, Mr. BUMPERS, Mr. DANFORTH, Mr. BOND, Mr. LOTT, Mr. CRANSTON, and Mr. WILSON):

S.J. Res. 353. Joint Resolution to designate September of 1991 as "National Rice Month"; to the Committee on the Judiciary.

By Mr. GLENN (for himself, Mr. PRYOR, Mr. HEINZ, Mr. BRADLEY, Mr. WARNER, Mr. D'AMATO, Mr. BURDICK, Mr. JOHNSTON, Mr. SHELBY, Mr. REID, Mr. GRASSLEY, Mr. PRESSLER, Mrs. KASSEBAUM, Mr. WILSON, Mr. BENTSEN, Mr. DODD, and Mr. CRANSTON):

S.J. Res. 354. Joint resolution designating November 18-24, 1990, and November 17-23, 1991, as "National Family Caregivers Week"; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. CRANSTON:

S. 2890. A bill for the relief of Abby Cooke; to the Committee on the Judiciary.

RELIEF OF ABBY COOKE

Mr. CRANSTON. Mr. President, I am today introducing a private relief bill on behalf on Mrs. Abby Cooke, a citizen of Taiwan. Mrs. Cooke is the widow of Timothy A. Cooke, a Vietnam veteran and Peace Corps volunteer, and the mother of a 5-year-old daughter, Kathryn Sun Cooke, who is a U.S. citizen.

Mrs. Cooke became a widow in August 1985, when her husband died of lung cancer at the age of 39 in San Gabriel, CA. They had been married for only 1 year when Mr. Cooke was diagnosed with the fatal disease, and they decided to relocate to California for Mr. Cooke to seek treatment and to be closer to his family.

Mr. and Mrs. Cooke met in Taipei, Taiwan, where Mr. Cooke was teaching English and studying Chinese. They were married in Taiwan on April 22, 1984, and again in San Gabriel, CA, on August 27, 1985, 2 days prior to Mr. Cooke's death. Mr. Cooke also signed his wife's permanent residency petition, but it was not filed prior to his death. Like many other couples, the Cookes had assumed that a marriage ceremony in the United States and the signed petition were sufficient to assure Mrs. Cooke of U.S. permanent residency. Mrs. Cooke soon learned the unfortunate fact that these actions had been invalidated by her husband's death.

Mrs. Cooke and her daughter have been residing in Alhambra, CA, with Mr. Cooke's parents since their arrival in the United States. Mr. and Mrs. Cooke had always intended to return to the United States and raise their daughter here. In fact, they had planned to return to California in June 1985, as soon as Mrs. Cooke completed her degree in journalism in Taiwan. As the spouse of a U.S. citizen, Mrs. Cooke would have had little difficulty obtaining permanent residency in the United States if her husband had survived. Now, her only alternative to private legislation is to wait until her daughter reaches the age of majority so she can petition on her mother's behalf.

I believe that this is a clear and compelling case for which private legislation is both appropriate and necessary. Mrs. Cooke has no viable alternative, and she has arrived at this situation through no fault of her own. I am hopeful that my colleagues will join me in supporting this bill.

By Mr. LIEBERMAN (for himself and Mr. DODD):

S. 2893. A bill to facilitate and assist in the economic adjustment and industrial diversification of workers, communities, and businesses adversely affected by the termination or reduction of defense contracts or the realignment or closure of defense facilities; to the Committee on Finance.

DEFENSE REALIGNMENT AND WORKER ASSISTANCE ACT

Mr. LIEBERMAN. Mr. President, I rise today to introduce the Defense Realignment and Worker Assistance Act of 1990, a bill designed to assist in the economic adjustment of workers, communities and businesses adversely effected by the reduction of U.S. defense spending.

Throughout our history the level of U.S. defense spending has fluctuated greatly in response to a variety of threats to our national security. In 1944, during the peak of World War II, defense spending represented approximately 39.2 percent of our total GNP; in 1953, during the Korean war, defense spending represented approximately 14.4 percent of total GNP; and in 1968, during the Vietnam war, defense spending rose to 9.6 percent of GNP.

More recently, between the years 1979 and 1986, the United States waged what we may be able to describe as the final battle of the cold war. U.S. defense spending rose from 4.8 to 6.5 percent of GNP—the largest peace time build up in our history. In fact, Mr. President, in 1989 the Federal Government spent approximately $300 billion for defense, and if we adjust this figure for inflation it represents roughly the same amount as at the 1953 Korean war peak and the 1968 Vietnam war peak.

Unlike most other conflicts, however, the cold war was not fought on the battlefields, on the oceans, or in the skies. This was a war of wills and minds. Our strategy rested on the premise that the United States must have a technological edge in order to offset either the numerical advantage or unpredictable nature of our adversaries. As such, an important part of the war was fought in factories and laboratories throughout the country, and the soldiers included not only the armed services, but some of America's finest engineers, and scientists, and skilled workers.

Now, in significant part due to their efforts, democratization and economic reform are emerging in both Eastern Europe and the Soviet Union, and the United States may be on the verge of declaring victory in this first cold war.

If so, the United States no longer needs to place the "containment of communism" as our top spending priority. We will have the opportunity to reevaluate our national defense needs and reorder our national spending priorities. I believe, as others have indicated, that we may be able to reduce the defense budget by as much as 25 percent over the next 5 years. If this is accomplished we will surely have the opportunity to address many domestic issues that have for too long been ignored.

These opportunities will be both refreshing and exciting, but, it is important to remember that the actions we take to reduce the level of defense spending will have broad and direct ramifications for the workers, communities, and businesses who, for reasons of national security, have become economically dependent on defense programs.

The legislation I am introducing attempts to minimize this impact by creating a bridge, if you will, to provide for an orderly transition, and a unified governmental response to reduce levels of defense spending.

Mr. President, this legislation is important for many reasons. First, I believe the Federal Government has a compelling obligation to mitigate the economic distress caused directly by its actions. I believe America's defense workers are, in a way, veterans of the cold war and thus deserve our assistance during this time of transition. Why should those who worked so hard to guarantee our security during times of conflict now be forced to pay the price for peace?

Second, we have already made an enormous investment, both directly and indirectly, in our defense infrastructure. In the past we have evaluated levels of defense spending on either national security or budgetary grounds. It is clear, however, that since defense industries now represent a major part of the our remaining industrial, technological, and manufacturing base, it will be essential to make these decisions on economic grounds as well. Thus, in order to protect this investment and our economic future, we will need to appraise our manufacturing and industrial base and then assess how best to effectuate a successful transition. If possible, cutbacks in this area should be undertaken so as to not adversely affect, and whenever possible to enhance, our industrial and technological capabilities. If we disregard this step, an important part of our economic future will surely be at risk.

And finally, as our inability to compete in the international marketplace becomes more and more apparent, it is in our best interest to retain and reuse one of the finest trained and highly skilled work forces in the world—our defense workers—highly qualified and motivated—a pearl of the American work force. They can and should play an important role in the peaceful economic wars that lay ahead.

Just as it was in our national interest to spend billions and billions of dollars on defense over the last decade, I believe it is now very much in our national interest to provide for an orderly transition and enact diversification legislation concurrent with reductions in defense spending.

Mr. President, I know of the need to assist in the transition of defense workers and industries from firsthand experience. Throughout the cold war, as it was in the Revolutionary War and in other conflicts involving our Nation, Connecticut has been an arsenal of democracy. My State receives approximately $5.8 billion in direct defense expenditures and another $4.2 billion in indirect defense expenditures. On a per capita basis, that amounts to approximately $3,100 per resident which results in approximately 5.5 percent of Connecticut's work force employed in defense or defense-related jobs.

Thousands of my constituents have been working in round-the-clock shifts to produce submarines, tanks, helicopters, and military aircraft engines—all the best in the world.

Mr. President, we will face a number of issues as we debate the fiscal year 1991 budget—a crippling budget deficit, a chronic trade deficit, the savings and loan bailout, and an array of domestic issues demanding our time and attention. This, in combination with the global crumbling of communism, suggests that our defense budget must be reduced. What I am saying with this legislation is that we can do this one of two ways—either we can cut programs, troops and contracts without regard for the consequences of our actions, or for a relatively low cost, we can protect our investment in both our work force and our factories and provide for an orderly, less painful, transition to the more peaceful environment that lies ahead.

Mr. President, the legislation I am introducing today:

Calls for a study so we can better understand the extent to which and how diversification of defense industries to nondefense production can be accomplished;

Creates a Presidential Council on Economic Diversification to coordinate the efforts of Federal agencies and programs for the purpose of assisting communities, workers, and businesses in economic diversification;

Establishes a Defense Industrial Diversification Account for businesses wishing to diversify from relying primarily on defense contracts to becoming more integrated into the civilian sector. This account would function much like an I.R.A;

Establishes within the Small Business Administration a permanent Office of Small Business Diversification, and creates a small business diversification guaranteed loan or grant program;

Requires employee notification be given for qualified employees 90 days prior to any layoff, provides severance pay for 1 year equal to 65 percent of average State manufacturing salary for durable goods, and provides basic health benefits for one year;

Amends title III of the Job Training Partnership Act to increase the Federal set-aside for displaced workers and modifies the formula used to disburse funds to States;

Allows qualified defense workers who have been laid off to withdraw funds from their individual retirement account to pay the principal or interest on a mortgage of his or her primary residence or for the rental costs of his or her primary residence;

Identifies communities that will be substantially and seriously affected by defense layoffs and allows impacted communities to be eligible for title IX community planning grants under the Economic Development Administration;

Establishes an Office of Commercial and Defense Product Integration in the Department of Defense to implement policies and procedures designed to achieve a better integration of commercial production processes and defense procurement practices and which will promote diversification by defense firms, as well as reduce the cost of defense products;

Establishes a Commission on Military Budget Reform to study the desirability and feasibility of Congress instituting a 3-year budget cycle for defense contracting. This multiyear approach can have the effect of reducing unit costs, increasing efficiency, and protecting jobs.

I believe this legislation provides a formula to address the defense diversification issue in an orderly, coherent, and comprehensive manner, so that the American economy can be helped, not hurt by the process.

Mr. President, I ask unanimous consent that a section-by-section summary of the bill and the text of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2893

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Defense Realignment and Worker Assistance Act of 1990".

SEC. 2. FINDINGS AND PURPOSES.

(a) FINDINGS.—The Congress finds that—

(1) as a result of recent reductions in international tension, and developments in

both Eastern Europe and the Soviet Union, the United States is likely to reevaluate its national defense needs, national spending priorities are likely to be reordered, and defense budgets are likely to decline, which will reduce or eliminate some defense or defense related programs;

(2) reductions in defense expenditures will likely result in the termination or reduction of defense contracts, or the closure or realignment of defense facilities, thus adversely affecting many defense workers, local economies, and small businesses;

(3) between 1979 and 1986, national defense spending rose from 4.8 percent to 6.5 percent of the Gross National Product, which, adjusted for inflation, was roughly the same as at the 1953 Korean War peak and the 1968 Vietnam War peak;

(4) since 1986, defense spending growth has slowed and the defense share of the Gross National Product fell to 5.9 percent in 1989, and it is likely that the defense share of the budget will continue to fall throughout the 1990's;

(5) as a result of the Department of Defense requiring unique specifications for nearly all procured parts and equipment, many defense contractors and subcontractors are forced to specialize in defense work, although many of their products could have applications in the civilian sector;

(6) these unique specifications often force the Department of Defense to pay five to ten times more for parts and equipment;

(7) it would be both fiscally prudent and beneficial for the diversification effort for the Department of Defense to, when appropriate, adopt policies to promote greater integration between the commercial and defense sectors;

(8) one reason for the prohibitively high unit cost of military parts and equipment is the current annual budget process which makes it difficult for firms to plan over the long term;

(9) high unit costs not only reduce efficiency, but also reduce the amount of parts and equipment the military can purchase;

(10) some form of multi-year budgeting can have the effect of reducing unit costs, increasing efficiency, and protecting jobs;

(11) defense industries represent an important segment of the industrial and technology base of the United States and cutbacks in this area should be undertaken so as to not adversely affect, and whenever possible to enhance, this industrial and technology base;

(12) the existence of a large defense facility or defense related industry often requires a network of smaller defense and defense related industry facilities in the same geographical area thus magnifying the instability created in the region's economy and workforce by any reduction in defense spending;

(13) the Federal Government has a compelling obligation to mitigate economic distress for defense workers, local economies, and small businesses who, for reasons of national security, have become economically dependent on defense programs;

(14) predictions about defense reduction suggest these reductions will occur at a relatively quick pace over the next several years, thus it would be prudent to promptly begin the planning process for the economic diversification and conversion of local economies and small businesses;

(15) in 1978, President Jimmy Carter signed Executive Order 12049 which created the Economic Adjustment Committee to provide coordinated Federal economic adjustment assistance necessitated by changes in Department of Defense activities; and

(16) a number of Federal agencies and programs presently engage in economic assistance activities in response to defense or defense related expenditure shifts, including community assistance and worker retraining.

(b) PURPOSE.—It is the purpose of this Act—

(1) to facilitate and assist in the economic adjustment and industrial diversification of workers, communities, and businesses adversely affected by the termination or reduction of defense contracts or the realignment or closure of defense facilities;

(2) to provide for a unified and comprehensive governmental response to reduced levels of defense spending; and

(3) and to minimize job and economic loss due to reduced levels of defense spending by providing adjustment assistance to workers, communities, and small businesses largely dependent on defense spending.

SEC. 3. DEFINITIONS.

(a) DEFENSE AGENCY.—The term "defense agency" means the Department of Defense, the nuclear weapons division of the Department of Energy, the National Aeronautics and Space Administration, the Coast Guard, and any other agency of the Government to the extent such agency conducts military or other defense related operations.

(b) DEFENSE CONTRACT.—The term "defense contract" means any contract or subcontract entered into between a person or nonprofit organization, including subcontractors, components manufacturers, suppliers and service contractors, and a defense agency to provide material or defense related operations.

(c) DEFENSE CONTRACTOR.—The term "defense contractor" means any facility engaged in the furnishing of defense material pursuant to the terms of a defense contract.

(d) DEFENSE FACILITY.—The term "defense facility" means any private plant or other establishment, or part thereof, used under a defense contract or engaged in the production, repair, modification, storage, or handling of defense material, or any Government-owned or Government-leased facility, including bases, forts, shipyards, and depots.

(e) QUALIFIED DEFENSE FACILITY.—The term "qualified defense facility" means any defense facility at least 60 percent of the gross revenues of which are attributable to defense contracts.

(f) SUBSTANTIALLY AND SERIOUSLY AFFECTED COMMUNITY.—The term "substantially and seriously affected community" means any community—

(A) which has, within its administrative and political jurisdiction, 1 or more defense facilities; and

(B) in which the curtailment, completion, elimination, or realignment of a defense contract or program or the realignment or closure of any defense facility results in a workforce reduction, over a 12-month period, of 250 or more employees (including parttime employees) who in the aggregate work at least 10,000 hours per week, exclusive of hours of overtime.

(g) QUALIFIED SMALL MANUFACTURING FIRM.—The term "qualified small manufacturing firm" means any facility which—

(1) employs less than 500 employees;

(2) is independently owned and operated;

(3) is not dominant in its field of operation;

(4) has gross revenues consisting of at least 50 percent value-added manufacturing activity;

(5) has gross revenues consisting of at least 60 percent defense contracts; and

(6) can demonstrate that such facility has either recently experienced or will experience the cancellation of a defense contract causing the significant reduction in the volume of defense work in relation to the total defense work in such facility.

TITLE I—INDUSTRIAL DIVERSIFICATION STUDY

SEC. 101. STUDY AND REPORT REQUIRED.

(a) STUDY.—The Secretary of Commerce, in consultation with the Administrator of the Small Business Administration, the Secretary of Defense, and the Director of the Defense Advanced Research Projects Agency (DARPA) shall study the extent to which diversification of defense industries to non-defense production can be effectuated.

(b) CONTENTS OF STUDY.—The study shall include—

(1) an inventory of the number and type of manufacturing firms in the United States that individually receive annual defense contracts totaling over $2,000,000;

(2) an historical analysis of the percentage of the Nation's Gross National Product directly related to defense spending and the role of such defense spending in the economy;

(3) a geographic inventory of the regions of the United States most dependent on defense spending, including an analysis of the effect that potential cuts in defense spending will have on the economies of these regions;

(4) an analysis of the potential effect that defense cutbacks will have on both the Nation's technological base and industrial base, including—

(A) the amount of the defense budget allocated for basic and applied research and development purposes and the effect of defense reductions on such research and development, including the effect on civilian and strategic defense basic and applied research and development; and

(B) an inventory of the extent of and nature of the civilian-use advanced technologies that have developed as a result of defense-sponsored research in the last 10 years and the effects of potential defense cutbacks on the future of such civilian technologies; and

(5) an evaluation and recommendations, on a defense industry sector-by-sector basis, on how diversification to non-defense production can be carried out, including a review of which sectors can undertake such diversification, which sectors should be particularly encouraged to undertake diversification for reasons of protecting the Nation's technological and industrial base and meeting civilian research and development needs, and recommendations for the government's role in assisting such diversification.

(c) REPORT.—The Secretary of Commerce shall report the results of the study required under subsection (a) to the President Pro Tempore of the Senate and the Speaker of the House of Representatives not later than the date which is 12 months after the date of the enactment of this Act.

(d) AUTHORIZATION OF APPROPRIATIONS.—There is hereby authorized to be appropriated such sums as may be necessary to carry out the study and report required under this section.

TITLE II—PRESIDENTIAL COUNCIL ON ECONOMIC DIVERSIFICATION AND ADJUSTMENT

SEC. 201. ESTABLISHMENT.

(a) IN GENERAL.—There is hereby established in the Executive Office of the President the Council on Economic Diversification and Adjustment (hereafter in this Act referred to as the "Council") which shall be composed of—

(1) the Secretary of Labor;

(2) the Secretary of Commerce;

(3) the Secretary of Defense;

(4) the Secretary of Housing and Urban Development;

(5) the Secretary of Transportation;

(6) the Secretary of Energy;

(7) the Director of the Office of Management and Budget;

(8) the Administrator of the Small Business Administration;

(9) the Chairman of the Council of Economic Advisers;

(10) 4 representatives of the business-management community to be appointed by the President, 2 of whom shall be appointed from defense related businesses and 2 from non-defense related businesses; and

(11) 4 representatives of labor union organizations to be appointed by the President.

(b) CO-CHAIRPERSONS.—The Secretaries of Commerce and Labor shall co-chair the Council, shall preside over meetings of the Council, and shall designate a member of the Council to preside in the absence of the co-Chairpersons.

(c) VACANCIES.—Vacancies in the membership of the Council described in paragraphs (10) and (11) of subsection (a) shall be filled in the same manner as original appointments are made. Vacancies in the membership of the Council shall not affect the authority of the remaining members to execute the functions of the Council.

(d) COMPENSATION.—Members of the Council described in paragraphs (10) and (11) of subsection (a) shall be reimbursed for travel and per diem in lieu of subsistence expenses during the performance of duties of the Council in accordance with subchapter I of chapter 57 of title 5, United States Code.

SEC. 202. OFFICE OF ECONOMIC DIVERSIFICATION AND ADJUSTMENT.

(a) ESTABLISHMENT.—(1) There is hereby established an Office of Economic Diversification and Adjustment (hereafter in this title referred to as the "Office") within the Executive Office of the President to provide necessary staff support for the Council.

(2) The Office shall be headed by a Director who shall be appointed by the President and be compensated at the rate provided for GS-18 of the General Schedule under section 5332 of title 5, United States Code.

(3) The Director may appoint and fix the compensation of such personnel as the Director deems advisable. The Director may procure temporary and intermittent services to the same extent authorized by section 3109 of title 5, United States Code.

(4) The Director may secure directly from any executive department, agency or other instrumentality of the Government, information, suggestions, estimates, and statistics to carry out this Act, and each such entity shall furnish information directly to the Office upon request made by the Director.

SEC. 203. DUTIES.

(a) IN GENERAL.—The Council shall—

(1) carry out the programs provided for in this Act;

(2) identify defense related impact problems of States, metropolitan areas, or communities that require assistance;

(3) disseminate information furnished by the Secretary of Defense under subsection (b) to the appropriate Federal, State, and local agencies or authorities as soon as the proposed or pending change described in such notice is known;

(4) notify areas that are eligible for community or worker economic adjustment assistance;

(5) prepare development strategies and action plans to coordinate Federal, State, and local economic adjustment efforts;

(6) encourage the preparation of concrete plans for civilian related, private enterprise, and public projects which address vital areas of national concern such as transportation, housing, education, environment, and health care;

(7) develop means to strengthen and make uniform the methods for conducting and reporting the economic impact analyses of community requirements for Federal economic adjustment resources before contract cancellation or termination, or defense facility closing;

(8) develop and coordinate information on federally funded projects, agency programs, and funding possibilities, including loans and loan guarantees, pertaining to economic diversification and adjustment;

(9) establish priorities for the distribution of funds available for economic diversification and adjustment based on an assessment of the needs of substantially and seriously affected communities and workers;

(10) establish and maintain a clearinghouse to facilitate the exchange of information among Federal, State, and local officials involved in the resolution of business, worker, and community adjustment problems, including the results of studies, technical information, and sources of public and private financing;

(11) prepare and distribute an economic diversification and adjustment handbook which shall include—

(A) a detailed directory and discussion of currently available Federal programs that promote economic development and help to minimize the dislocation of workers, communities, and industries;

(B) an explanation of the basic issues involved in the diversification process for workers, communities, and businesses;

(C) an outline of the basic requirements for a program of professional retraining of technical personnel in order to effectively reorient such personnel to the prevailing conditions of research, product design, and production operations within non-defense related facilities;

(D) an outline of the basic requirements for the length and nature of occupational retraining for production workers and junior level administrative employees;

(E) illustrative case studies of successful conversion to efficient non-defense related production, or references thereto; and

(F) directories, by geographic region and area of specialization, of organizations and individual consultants in fields such as marketing, facilities design, organization, production engineering, and engineering economy whose major professional experience has been in non-defense related activity.

(b) INFORMATION ON CHANGES IN DEFENSE SPENDING.—(1) The Secretary of Defense shall notify the Council 1 year in advance of a pending or proposed change in defense spending that would affect employment in the defense industry, including—

(A) reduction, technical changes, or elimination of a program by Congress, the Secretary of Defense, the Office of Management and Budget, or the President;

(B) termination or slowdown of a research and development or procurement contract; and

(C) closure of a defense facility.

(2) The Secretary of Defense shall furnish the Council with projected future defense spending levels and contract progress reports.

SEC. 204. THE PRESIDENT'S ANNUAL ECONOMIC DIVERSIFICATION AND ADJUSTMENT REPORT.

The Council shall submit an annual report to Congress on economic diversification and adjustment that shall include the following:

(1) A detailed discussion of currently available Federal programs, including appropriation and staff levels, that promote economic development and help to minimize the dislocation of workers, communities, and industries.

(2) An explanation of the basic issues involved in the retraining, reorientation, and reorganization of personnel.

(3) A detailed discussion of available programs within the Export-Import Bank of the United States and the Department of Commerce concerning the international marketplace, export opportunities, and financing packages.

(4) A description of assistance packages, initiated by the Council, to communities which have suffered economic disruptions and worker dislocation caused by defense cutbacks.

SEC. 205. AUTHORIZATION OF APPROPRIATIONS.

There is hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this title.

TITLE III—DEFENSE INDUSTRIAL DIVERSIFICATION ACCOUNTS

SEC. 301. DEFENSE INDUSTRIAL DIVERSIFICATION ACCOUNTS.

(a) IN GENERAL.—Chapter 77 of the Internal Revenue Code of 1986 (relating to miscellaneous provisions) is amended by adding at the end thereof the following new section:

"SEC. 7523. DEFENSE INDUSTRIAL DIVERSIFICATION ACCOUNTS.

"(a) AGREEMENT RULES.—Any eligible corporation (as defined in subsection (j)(1)) may enter into an agreement with the Secretary under, and as provided in, this section to establish a defense industrial diversification account (hereafter in this section referred to as the 'account'). Any agreement entered into under this section shall be for the purpose of providing qualified plant and equipment in the United States or the retraining of employees, for the purpose of converting qualified defense facilities from predominately relying on defense contracts to non-defense lines of business, and shall provide for the deposit in the account of the amounts agreed upon as necessary or appropriate to provide for qualified withdrawals under subsection (f). The deposits in the account, and all withdrawals from the account, whether qualified or nonqualified, shall be subject to such conditions and requirements as the Secretary may by regulations prescribe or as set forth in such agreement.

"(b) CEILING ON DEPOSITS.—

"(1) LIMIT DURING FIRST 5 YEARS.—The amount deposited under subsection (a) in the account for any of the first 5 taxable years following the taxable year in which an

agreement was entered into shall not exceed the sum of—

"(A) the amount allowable as a deduction under section 167 for such year with respect to eligible plant and equipment which is related to the eligible corporation's defense production;

"(B) the net proceeds from—

"(i) the sale or other disposition of any such eligible plant and equipment, or

"(ii) insurance or indemnity attributable to any such eligible plant and equipment, and

"(C) the receipts from the investment or reinvestment of amounts held in such account.

"(2) LIMIT AFTER 5 YEARS.—The amount deposited under subsection (a) in the account for any taxable year after such 5th taxable year shall not exceed the amount specified in paragraph (1)(C).

"(c) REQUIREMENTS AS TO INVESTMENTS.—

"(1) IN GENERAL.—Amounts in any account established under this section shall be kept in the depository or depositories specified in the agreement and shall be subject to such trustee and other fiduciary requirements as may be specified by the Secretary.

"(2) LIMITATION OF ACCOUNT INVESTMENTS.—Amounts in an account may be invested only in interest-bearing securities approved by the Secretary; except that, if the Secretary consents thereto, an agreed percentage (not in excess of 60 percent) of the assets of the account may be invested in the stock of domestic corporations. Such stock must be currently fully listed and registered on an exchange registered with the Securities and Exchange Commission or a national securities exchange and must be stock which would be acquired by prudent men of discretion and intelligence in such matters who are seeking a reasonable income and the preservation of capital. If at any time the fair market value of the stock in the account is more than the agreed percentage of the assets in the account, any subsequent investment of withdrawal from the account, shall be made in such a way as to tend to restore the account to a situation in which the fair market value of the stock does not exceed such agreed percentage.

"(3) INVESTMENT IN CERTAIN PREFERRED STOCK PERMITTED.—For purposes of this subsection, if the common stock of a corporation meets the requirements of this subsection and if the preferred stock of such corporation would meet such requirements but for the fact that it cannot be listed and registered as required because it is nonvoting stock, such preferred stock shall be treated as meeting the requirements of this subsection.

"(d) NONTAXABILITY OF DEPOSITS.—

"(1) IN GENERAL.—For purposes of this title—

"(A) gain from a transaction referred to in subsection (b)(1)(B) shall not be taken into account if an amount equal to the net proceeds from such transaction is deposited in the account,

"(B) the earnings (including gains and losses) from the investment and reinvestment of amounts held in the account shall not be taken into account,

"(C) the earnings and profits of any corporation (within the meaning of section 316) shall be determined without regard to this section and section 7518, and

"(D) in applying the tax imposed by section 531 (relating to the accumulated earnings tax), amounts while held in the account shall not be taken into account.

"(2) ONLY QUALIFIED DEPOSITS ELIGIBLE FOR TREATMENT.—Paragraph (1) shall apply with respect to any amount only if such amount is deposited in the account pursuant to the agreement and not later than the time provided in regulations.

"(e) ESTABLISHMENT OF SUBACCOUNTS.—

"(1) IN GENERAL.—Within the account established pursuant to this section 3 subaccounts shall be maintained—

"(A) the capital subaccount,

"(B) the capital gain subaccount, and

"(C) the ordinary income subaccount.

"(2) CAPITAL SUBACCOUNT.—The capital subaccount shall consist of—

"(A) amounts referred to in subsection (b)(1)(A),

"(B) amounts referred to in subsection (b)(1)(B) other than that portion thereof which represents gain not taken into account by reason of subsection (d)(1)(A),

"(C) the percentage applicable under section 243(a)(1) of any dividend received by the account with respect to which the person maintaining the account would (but for subsection (d)(1)(B)) be allowed a deduction under section 243, and

"(D) interest income exempt from taxation under section 103.

"(3) CAPITAL GAIN SUBACCOUNT.—The capital gain subaccount shall consist of—

"(A) amounts representing capital gains on assets held for more than 1 year and referred to in subsection (b)(1)(B) or (b)(1)(C), reduced by

"(B) amounts representing capital losses on assets held in the account for more than 1 year.

"(4) ORDINARY INCOME SUBACCOUNT.—The ordinary income subaccount shall consist of—

"(A)(i) amounts representing capital gains on assets held for 1 year or less and referred to in subsection (b)(1)(B) or (b)(1)(C), reduced by

"(ii) amounts representing capital losses on assets held in the account for 1 year or less,

"(B) interest (not including any tax-exempt interest referred to in paragraph (2)(D)) and other ordinary income (not including any dividend referred to in subparagraph (D) of this paragraph) received on assets held in the account,

"(C) ordinary income from a transaction described in subsection (b)(1)(B), and

"(D) the portion of any dividend referred to in paragraph (2)(C) not taken into account under such paragraph.

"(5) CAPITAL LOSSES ONLY ALLOWED TO OFFSET CERTAIN GAINS.—Except on termination of an account, capital losses referred to in paragraph (3)(B) or in paragraph (4)(A)(ii) shall be allowed only as an offset to gains referred to in paragraph (3)(A) or (4)(A)(i), respectively.

"(f) PURPOSES OF QUALIFIED WITHDRAWALS.—

"(1) IN GENERAL.—A qualified withdrawal from the account is one made in accordance with the terms of the agreement but only if it is for—

"(A) the acquisition, construction, or reconstruction of qualified plant and equipment,

"(B) the payment of the principal on indebtedness incurred in connection with the acquisition, construction, or reconstruction of qualified plant and equipment, or

"(C) the retraining or continued education of employees.

"(2) PENALTY FOR FAILING TO FULFILL ANY SUBSTANTIAL OBLIGATION.—Under joint regulations, if the Secretary determines that any substantial obligation under any agreement is not being fulfilled, the Secretary may, after notice and opportunity for hearing to the person maintaining the account, treat the entire account or any portion thereof as an amount withdrawn from the account in a nonqualified withdrawal.

"(g) TAX TREATMENT OF QUALIFIED WITHDRAWALS.—

"(1) IN GENERAL.—Any qualified withdrawal from an account shall be treated—

"(A) first as made out of the capital subaccount,

"(B) second as made out of the capital gain subaccount, and

"(C) third as made out of the ordinary income subaccount.

"(2) ADJUSTMENT TO BASIS WHERE WITHDRAWAL FROM ORDINARY INCOME SUBACCOUNT.—If any portion of a qualified withdrawal for plant and equipment is made out of the ordinary income subaccount, the basis of such plant and equipment shall be reduced by an amount equal to such portion.

"(3) ADJUSTMENT TO BASIS WHERE WITHDRAWAL FROM CAPITAL GAIN SUBACCOUNT.—If any portion of a qualified withdrawal for plant and equipment is made out of the capital gain subaccount, the basis of such plant and equipment shall be reduced by an amount equal to such portion.

"(4) ADJUSTMENT TO BASIS WHERE WITHDRAWAL PAYS PRINCIPAL ON DEBT.—If any portion of a qualified withdrawal to pay the principal on any indebtedness is made out of the ordinary income subaccount or the capital gain subaccount, then an amount equal to the aggregate reduction which would be required by paragraphs (2) and (3) if such withdrawal were a qualified withdrawal for a purpose described in such paragraphs shall be applied, in the order provided in joint regulations, to reduce the basis of plant and equipment owned by the person maintaining the account. Any amount of a withdrawal remaining after the application of the preceding sentence shall be treated as a nonqualified withdrawal.

"(5) ORDINARY INCOME RECAPTURE OF BASIS REDUCTION.—If any property the basis of which was reduced under paragraph (2), (3), or (4) is disposed of, any gain realized on such disposition, to the extent it does not exceed the aggregate reduction in the basis of such property under such paragraphs, shall be treated as an amount referred to in subsection (h)(3)(A) which was withdrawn on the date of such disposition. Subject to such conditions and requirements as may be provided in joint regulations, the preceding sentence shall not apply to a disposition where there is a redeposit in an amount determined under joint regulations which will, insofar as practicable, restore the account to the position such account was in before the withdrawal.

"(h) TAX TREATMENT OF NONQUALIFIED WITHDRAWALS.—

"(1) IN GENERAL.—Except as provided in subsection (i), any withdrawal from an account which is not a qualified withdrawal shall be treated as a nonqualified withdrawal.

"(2) ORDERING RULE.—Any nonqualified withdrawal from an account shall be treated—

"(A) first as made out of the ordinary income subaccount,

"(B) second as made out of the capital gain subaccount, and

"(C) third as made out of the capital subaccount.

For purposes of this section, items withdrawn from any subaccount shall be treated as withdrawn on a first-in-first-out basis;

except that (i) any nonqualified withdrawal for research, development, and design expenses incident to new and advanced plant and equipment, and (ii) any amount treated as a nonqualified withdrawal under the second sentence of subsection (g)(4), shall be treated as withdrawn on a last-in-first-out basis.

"(3) OPERATING RULES.—For purposes of this title—

"(A) any amount referred to in paragraph (2)(A) shall be included in income for the taxable year in which the withdrawal is made as an item of ordinary income,

"(B) any amount referred to in paragraph (2)(B) shall be included in income for the taxable year in which the withdrawal is made as an item of gain realized during such year from the disposition of an asset held for more than 1 year, and

"(C) for the period on or before the last date prescribed for payment of tax for the taxable year in which such withdrawal is made—

"(i) no interest shall be payable under section 6601 and no addition to the tax shall be payable under section 6651,

"(ii) interest on the amount of the additional tax attributable to any item referred to in subparagraph (A) or (B) shall be paid at the applicable rate (as defined in paragraph (4)) from the last date prescribed for payment of the tax for the taxable year for which such item was deposited in the account, and

"(iii) no interest shall be payable on amounts referred to in clauses (i) and (ii) of paragraph (2).

"(4) APPLICABLE RATE.—For purposes of paragraph (3)(C)(ii), the applicable rate of interest for any nonqualified withdrawal shall be the rate established in section 6621(a)(2).

"(5) AMOUNT NOT WITHDRAWN FROM ACCOUNT AFTER 12 YEARS FROM DATE OF AGREEMENT TAXED AS NONQUALIFIED WITHDRAWAL.—

"(A) IN GENERAL.—The applicable percentage of any amount which remains in an account at the close of the 10th, 11th, or 12th taxable year following the taxable year in which an agreement was entered into shall be treated as a nonqualified withdrawal in accordance with the following table:

"If the amount remains in the account at the close of the:	The applicable percentage is:
10th taxable year ...	20 percent
11th taxable year ...	60 percent
12th taxable year ...	100 percent

"(B) EARNINGS TREATED AS DEPOSITS.—The earnings of any account for any taxable year (other than net gains) shall be treated for purposes of this paragraph as an amount remaining in the account for such taxable year.

"(C) AMOUNTS COMMITTED TREATED AS WITHDRAWN.—For purposes of subparagraph (A), an amount shall not be treated as remaining in an account at the close of any taxable year to the extent there is a binding contract at the close of such year for a qualified withdrawal of such amount with respect to an identified item for which such withdrawal may be made.

"(D) AUTHORITY TO TREAT EXCESS FUNDS AS WITHDRAWN.—If the Secretary determines that the balance in any account exceeds the amount which is appropriate to meet the account's program objectives, the amount of such excess shall be treated as a nonqualified withdrawal under subparagraph (A) unless the person maintaining the account develops appropriate program objectives within 3 years to dissipate such excess.

"(6) NONQUALIFIED WITHDRAWALS TAXED AT HIGHEST MARGINAL RATE.—

"(A) IN GENERAL.—In the case of any taxable year for which there is a nonqualified withdrawal (including any amount so treated under paragraph (5)), the tax imposed by chapter 1 shall be determined—

"(i) by excluding such withdrawal from gross income, and

"(ii) by increasing the tax imposed by chapter 1 by the product of the amount of such withdrawal and the highest rate of tax specified in section 11.

With respect to the portion of any nonqualified withdrawal made out of the capital gain subaccount during a taxable year to which section 1201(a) applies, the rate of tax taken into account under the preceding sentence shall not exceed 34 percent.

"(B) TAX BENEFIT RULE.—If any portion of a nonqualified withdrawal is properly attributable to deposits (other than earnings on deposits) made by the taxpayer in any taxable year which did not reduce the taxpayer's liability for tax under chapter 1 for any taxable year preceding the taxable year in which such withdrawal occurs—

"(i) such portion shall not be taken into account under subparagraph (A), and

"(ii) an amount equal to such portion shall be treated as allowed as a deduction under section 172 for the taxable year in which such withdrawal occurs.

"(C) COORDINATION WITH DEDUCTION FOR NET OPERATING LOSSES.—Any nonqualified withdrawal excluded from gross income under subparagraph (A) shall be excluded in determining taxable income under section 172(b)(2).

"(i) CERTAIN CORPORATE REORGANIZATIONS.—Under joint regulations, transfer of an account from one person to another person in a transaction to which section 381 applies may be treated as if such transaction did not constitute a nonqualified withdrawal.

"(j) DEFINITIONS.—For purposes of this section—

"(1) ELIGIBLE CORPORATION.—The term 'eligible corporation' means any qualified defense facility as defined in section 3(5) of the Defense Realignment and Worker Assistance Act of 1990.

"(2) ELIGIBLE PLANT AND EQUIPMENT.—The term 'eligible plant and equipment' means any plant and equipment used for the production of parts, goods, or materials referred to in paragraph (1).

"(3) QUALIFIED PLANT AND EQUIPMENT.—The term 'qualified plant and equipment' means new or modernized plant and equipment which will be used for the production of parts, goods, or materials referred to in paragraph (1).

"(4) RETRAINING.—The term 'retraining' means any employer-sponsored activity designed to prepare or further prepare individuals for firm-related employment.

"(5) JOINT REGULATIONS.—The term 'joint regulations' means the regulations prescribed under subsection (k).

"(k) RECORDS; REPORTS; CHANGES IN REGULATIONS.—Each person maintaining an account under this section shall keep such records and shall make such reports as the Secretary or the Secretary of Defense shall require. The Secretary and the Secretary of Defense shall jointly prescribe all rules and regulations, not inconsistent with the foregoing provisions of this section, as may be necessary or appropriate to the determination of tax liability under this section. If, after an agreement has been entered into under this section, a change is made either in the joint regulations or in the regulations prescribed by the Secretary under this section which could have a substantial effect on the rights or obligations of any person maintaining an account under this section, such person may terminate such agreement.

"(l) DEPARTMENTAL REPORTS AND CERTIFICATION.—

"(1) IN GENERAL.—For each calendar year, the Secretary shall provide the Secretary of Defense, within 120 days after the close of such calendar year, a written report with respect to the accounts established under this section.

"(2) CONTENT OF REPORTS.—Each report shall set forth the name and taxpayer identification number of each person—

"(A) establishing an account during such calendar year;

"(B) maintaining an account as of the last day of such calendar year;

"(C) terminating an account during such calendar year;

"(D) making any withdrawal from or deposit into (and the amounts thereof) an account during such calendar year; or

"(E) with respect to which a determination has been made during such calendar year that such person has failed to fulfill a substantial obligation under any account agreement to which such person is a party."

(b) MINIMUM TAX TREATMENT.—Section 56(c) of the Internal Revenue Code of 1986 (relating to adjustments applicable to corporations) is amended by adding at the end thereof the following new paragraph:

"(4) DEFENSE INDUSTRIAL DIVERSIFICATION ACCOUNTS.—In the case of a defense industrial diversification account established under section 7523—

"(A) subparagraphs (A) and (B) of section 7523(d)(1) shall not apply, and

"(B) no reduction in basis shall be made under subsection (g) with respect to the withdrawal from the account of any amount to which subparagraph (A) applies."

(c) CLERICAL AMENDMENT.—The table of sections for chapter 77 of the Internal Revenue Code of 1986 is amended by adding at the end thereof the following new item:

"Sec. 7523. Defense industrial diversification accounts."

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after the date of the enactment of this Act.

TITLE IV—SMALL BUSINESS DIVERSIFICATION

SEC. 401. SMALL BUSINESS ADMINISTRATION COMMITTEE ON DEFENSE AND ECONOMIC DIVERSIFICATION.

(a) ESTABLISHMENT.—There is established in the Small Business Administration a Committee on Defense and Economic Diversification (hereafter in this title referred to as the "Committee") which shall be composed of—

(1) the Chief Counsel for Advocacy;

(2) the Associate Deputy Administrator for Finance, Investment, and Procurement;

(3) the Associate Deputy Administrator for Management and Administration;

(4) the Associate Deputy Administrator for Special Programs;

(5) the Director of the Office of Economic Diversification and Adjustment (established under section 202 of this Act);

(6) 2 representatives of the small business-management community to be appointed by the Administrator of the Small Business Ad-

ministration, 1 of whom shall be appointed from a defense related small business and 1 from a nondefense related small business; and

(7) 2 representatives of labor union organizations to be appointed by the Administrator of the Small Business Administration.

(b) CHAIRPERSON.—The Associate Deputy Administrator for Finance, Investment, and Procurement shall chair the Committee, shall preside over meetings, and shall designate a member of the Committee to preside in the absence of the Chairperson.

(c) VACANCIES.—Vacancies in the membership of the Committee described in paragraphs (6) and (7) of subsection (a) shall be filled in the same manner as original appointments are made. Vacancies in the membership of the Committee shall not affect the authority of the remaining members to execute the functions of the Committee.

(d) COMPENSATION.—Members of the Committee described in paragraphs (6) and (7) of subsection (a) shall be reimbursed for travel and per diem in lieu of subsistence expenses during the performance of duties of the Committee in accordance with subchapter I of chapter 57 of title 5, United States Code.

SEC. 402. ESTABLISHMENT OF SMALL BUSINESS ADMINISTRATION OFFICE OF ECONOMIC DIVERSIFICATION.

(a) IN GENERAL.—There is established in the Small Business Administration an Office of Economic Diversification (hereafter in this title referred to as the "Office") to provide staff support for the Committee.

(b) DIRECTOR.—The Office shall be headed by a Director who shall be a civilian appointed by the Administrator of the Small Business Administration and shall report directly to the Associate Deputy Administrator for Finance, Investment, and Procurement. The Director shall be compensated at the rate provided for GS-18 of the General Schedule under section 5332 of title 5, United States Code.

(c) COMPENSATION.—The Administrator of the Small Business Administration may appoint and fix the compensation of such personnel for the Office as the Administrator deems necessary and appropriate.

SEC. 403. DUTIES.

(a) IN GENERAL.—The Committee shall—

(1) carry out the programs provided for in title V of this Act;

(2) identify defense related problems of small businesses that require assistance;

(3) disseminate information furnished by the President's Office of Economic Diversification and Adjustment, the Secretary of Defense, and any other Federal agency or official that may be useful to small business concerns;

(4) prepare a plan for coordinating the efforts of the Small Business Administration and the Administration's programs for assisting firms adversely affected by defense cutbacks;

(5) collect and disseminate information on—

(A) the issues involved with small business diversification;

(B) successful diversification cases of small business firms;

(C) retraining programs available to small business firms;

(D) available venture and seed capital programs;

(E) available management assistance programs; and

(F) available loan and loan guarantee programs;

(6) work with representatives from the President's Office of Economic Diversification and Adjustment to assist small businesses in finding alternative procurement opportunities with Federal agencies; and

(7) coordinate all efforts with the President's Office of Economic Diversification and Adjustment.

SEC. 404. AUTHORIZATION OF APPROPRIATIONS.

There is hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this title.

TITLE V—SMALL BUSINESS ASSISTANCE

SEC. 501. SMALL BUSINESS DIVERSIFICATION LOAN PROGRAM.

(a) IN GENERAL.—The Administrator of the Small Business Administration (hereafter in this title referred to as the "Administrator") is empowered to make either loans or grants, either directly or in cooperation with banks or other financial institutions through agreements to participate on an immediate or deferred (guaranteed) basis, to a qualified small manufacturing firm to assist such firm to diversify from defense related to nondefense related business.

(b) LOAN AND GRANT LIMITS AND MATCHING CONTRIBUTIONS.—Pursuant to subsection (a), the Administrator is authorized to make loans or grants in an amount not exceeding the lesser of—

(1) $40,000 for each qualified small manufacturing firm, or

(2) an amount equal to the sum of—

(A) the amount of private capital which such firm has committed for the purposes described in subsection (e), plus

(B) the amount of private capital which such firm can demonstrate it has spent for the purposes described in subsection (e) during the 6-month period preceding its application for a loan or grant under subsection (a).

(c) PARTICIPATION.—In agreements to participate in loans on a deferred (guaranteed) basis, such participation by the Administrator shall be not less than 100 percent of the amount provided for in subsection (b).

(d) LIMITATIONS.—(1) No qualified small manufacturing firm shall be deemed eligible for any loan or grant pursuant to this title unless such firm demonstrates to the satisfaction of the Administrator that not later than 2 years after such firm receives such loan or grant, at least 60 percent of such firm's gross revenues will be derived from nondefense related business.

(2) No financial assistance shall be extended pursuant to this title if the applicant can obtain credit or financial assistance elsewhere, including other programs of the Federal Government, and including loan and loan guarantee programs of the Small Business Administration.

(3) No qualified small manufacturing firm shall be eligible for any loan or grant pursuant to this title unless the Administrator determines that the recipient will use such loan or grant for the purposes described in subsection (e).

(e) PURPOSES AND USES OF LOAN AND GRANT FUNDS.—

(1) PURPOSES FOR WHICH LOANS AND GRANTS USED.—Loans and grants made pursuant to this title shall be used—

(A) to assist qualified small manufacturing firms to diversify from defense related to nondefense related business, and

(B) to put such firms in a position where such firms can qualify for either private or commercial financing, or for financing under section 7(a) of the Small Business Act (15 U.S.C. 636(a)) for nondefense related business.

(2) SPECIFIC USES.—Loans or grants made pursuant to this title may be used to—

(A) conduct market research and analysis,

(B) develop an alternative use or business plan,

(C) conduct basic or applied research and development for nondefense lines of business,

(D) strategic planning, and

(E) prototype development.

SEC. 502. REGULATIONS.

The Administrator shall promulgate regulations to carry out the purposes of this title.

SEC. 503. AUTHORIZATION OF APPROPRIATIONS.

There is hereby authorized to be appropriated such sums as may be necessary to carry out the purposes of this title.

TITLE VI—ECONOMIC ADJUSTMENT ASSISTANCE FOR EMPLOYEES

SEC. 601. NOTIFICATION.

(a) IN GENERAL.—An employer or defense agency shall not order a closing or the significant workforce reduction in a defense facility, which is prompted by the cancellation of a defense contract, or the significant reduction in the volume of defense work in relation to total defense work in such facility, until the end of a 90-day period after the employer or defense agency serves written notice of such an order—

(1) to each representative of the affected employees as of the time of the notice or, if there is no such representative at that time, to each affected employee; and

(2) to the State dislocated worker unit (designated or created under title III of the Job Training Partnership Act [29 U.S.C.A. 1651 et seq.]) and the chief elected official of the unit of local government within which such closing or layoff is to occur.

(b) SIGNIFICANT WORKFORCE REDUCTION.—For the purposes of subsection (a) the term "significant workforce reduction" means any reduction in workforce which results in an employment loss (as defined in section 2(a)(6) of the Worker Adjustment and Retraining Notification Act (29 U.S.C. 2101(a)(6)) at the single site of employment during any 30-day period for—

(1) at least 50 employees (excluding any part-time employees), if such employees constitute at least 33 percent of the workforce (excluding any part-time employees), or

(2) at least 300 employees (excluding any part-time employees).

(c) REGULATIONS.—The Secretary of Labor, after consultation with the Council on Economic Diversification, shall promulgate regulations to implement and ensure enforcement of this section.

(d) ENFORCEMENT.—Nothing in this section shall prevent the imposition of sanctions under the Worker Adjustment and Retraining Notification Act (29 U.S.C. 2101 et seq.).

SEC. 602. CERTIFICATION.

(a) IN GENERAL.—All worker displacements, as defined in subsection (b), affecting workers employed by a defense contractor or civilian workers employed by the Armed Services, shall be reported by the management of the defense facility to the Office of Economic Diversification and Adjustment and the State employment security agency acting as agent of the Secretary of Labor for the administration of the program under this title.

(b) WORKER DISPLACEMENT.—The displacement of any worker who demonstrates that—

(1) he or she has permanently lost his or her employment due to—

(A) the cancellation of a defense contract affecting the defense facility at which he or she is employed,

(B) the significant reduction in the volume of defense work in relation to total defense work in such facility, or

(C) the significant workforce reduction or closure of a defense facility, and

(2) such employment loss has occurred within the period beginning 6 months before and ending 1 year after causal action, described in subparagraph (A), (B), or (C) of paragraph (1)

shall, for purposes of subsection (a), be deemed to be a displacement attributable to that action.

(c) The Office of Economic Diversification and Adjustment in cooperation with the Department of Labor shall certify eligibility, for the benefits available under this title, of workers suffering displacement as defined in subsection (b) based on regulations established by the Council on Economic Diversification and Adjustment, after consultation with the Secretary of Labor.

SEC. 603. BENEFITS.

(a) IN GENERAL.—Any worker certified pursuant to section 602 of this Act as eligible for adjustment benefits by reason of such worker's displacement from a defense facility shall be entitled, for the 12-month period following displacement, commencing from the date of such displacement, to the following benefits:

(1) SEVERANCE PAY.—Compensation, on a weekly basis, sufficient, when added to any benefits which such worker receives or is entitled to receive for such weekly period under any Federal or State unemployment compensation program or any plan of such worker's employer providing for such benefits by reason of such worker displacement, and any earnings during such weekly period from other employment, to maintain an income at a level equal to 65 percent of the average annual manufacturing salary for durable goods (based on a 40-hour workweek), in the State where the affected facility is located as determined by the State Department of Labor, for the calendar year ending before that worker's displacement.

(2) HEALTH BENEFITS.—The Council on Economic Diversification and Adjustment shall promulgate regulations to provide minimum health insurance benefits for any worker and the immediate family members of the worker (if not otherwise covered by an insurance policy) for a period of time not to exceed 1 year when combined with any policy provided by an employer following a workers' displacement. For the purpose of this paragraph, these benefits may be provided pursuant to Federal regulation by any Federal or State agency or through direct payment to the displaced worker in connection with paragraph (1) of this subsection.

(b) MINIMUM HEALTH INSURANCE.—For the purposes of paragraph (2) of subsection (a), the term "minimum health insurance" means a benefit package which includes coverage for—

(1) 100 percent of inpatient and outpatient hospital costs;

(2) 75 percent of the usual and customary rate (hereinafter referred to as "UCR") for inpatient and outpatient physician surgical services;

(3) 75 percent of the inpatient and outpatient physician medical costs;

(4) 75 percent of the inpatient and outpatient maternity costs;

(5) 100 percent of the costs of outpatient accidental injury care rendered within 72 hours of injury;

(6) 60 percent of the UCR for inpatient or outpatient mental condition or substance abuse treatment for up to 28 days inpatient stay and 25 outpatient visits per year; and

(7) 100 percent of the UCR for well child care for children up to age 6.

The package shall include an annual deductible of $250.00 per person or $500.00 per family from the costs of the minimum health insurance coverage described in this subsection (other than the coverage described in paragraph (7)).

SEC. 604 RETRAINING.

(a) REALLOTMENT.—(1) Section 302 of the Job Training Partnership Act (29 U.S.C. 1652) is amended—

(1) in subsection (a)(1), by striking "80 percent" and inserting "75 percent";

(2) in subsection (a)(2), by striking "20 percent" and inserting "25 percent",

(3) in subsection (b)(2)(A), by striking "25 percent" and inserting "23.3 percent" and by striking "75 percent" and inserting "70 percent", and

(4) in subsection (b)(2)(B), by striking "25 percent" and inserting "30 percent" and by striking "section 462(e)" and inserting "subsections (e) and (g) of section 462".

(b) DATA ON DISPLACED DEFENSE WORKERS.—Section 462 of the Job Training Partnership Act (29 U.S.C. 1752) is amended by adding at the end thereof the following new subsection:

"(g)(1) The Secretary shall develop, in coordination with the Council on Economic Diversification and Adjustment, statistical data relating to permanent dislocation of defense workers due to reductions in defense expenditures, termination or reduction of defense contracts (as defined in section 3(b) of the Defense Realignment and Worker Assistance Act of 1990), or the closure or realignment of defense facilities (as defined in section 3(d) of such Act). Among the data to be included are—

"(A) the number of defense facilities affected;

"(B) the number of defense workers displaced;

"(C) the location of affected defense facilities; and

"(D) the types of defense facilities involved.

"(2) The Secretary shall publish a report based upon such data as soon as practicable after the end of each calendar year. Such report shall include a comparison of data contained therein with contemporary data used by the Bureau of Labor Statistics in determining the annual employment and unemployment rates of the United States and an analysis of whether defense workers are being adequately counted in such employment statistics. Such report shall also include an analysis of alternative methods for reducing the adverse effects of displacement of defense workers, not only on the individual worker, but on the surrounding community.".

SEC. 605. STATE AGREEMENTS.

(a) IN GENERAL.—The Council on Economic Diversification and Adjustment shall, on behalf of the United States, enter into an agreement with a State, or with any agency administering the unemployment compensation law of any State approved by the Secretary of Labor under section 3304 of the Internal Revenue Code of 1986, which—

(1) as agent of the Council, shall upon certification and other determinations required in section 602 of this Act, make such payments and provide such benefits as are authorized by section 603 of this Act, on the basis provided for in this Act, and shall otherwise cooperate with the Council and other State agencies in carrying out the provisions of this Act; and

(2) shall be reimbursed for all benefits paid pursuant to such agreement and all administrative and operational costs incurred in carrying out such agreement.

(b) AGREEMENT PAYMENTS.—(1) There shall be paid to each State or State agency which has an agreement under this section, either in advance or by way of reimbursement, as may be determined by the Council, such sum as the Council estimates the agency will be entitled to receive under such agreement for each calendar month, reduced or increased, as the case may be, by the amount by which the Council finds that its estimates for any prior calendar month were greater or less than amounts which should have been paid to the agency. Such estimates may be made upon the basis of statistical sampling, or other method as agreed upon by the Council and the State or State agency.

(2) The Council shall from time to time certify to the Secretary of the Treasury for payment to each State or State agency which has an agreement under this section sums payable to such State or State agency under paragraph (1) of this subsection. The Secretary of the Treasury, prior to audit or settlement by the General Accounting Office, shall make payments to the State or State agency, in accordance with such certification, from the Defense Economic Adjustment Fund.

(3) All money paid a State or State agency under any such agreement shall be used solely for the purposes for which it is paid; and any money so paid which is not used for such purposes shall be returned, at the time specified in such agreement, to the Defense Economic Adjustment Fund.

(c) BENEFITS ABSENT ON AGREEMENT.—In any case involving a worker entitled to benefits under section 603 of this Act who is in a State with respect to which there is no agreement pursuant to this section, the Secretary of Labor shall, under regulations prescribed by the Secretary, administer such benefits on behalf of such worker. The Secretary of Labor, in administering such benefits, shall, from time to time, certify to the Secretary of the Treasury for payment to such worker the amounts of such benefits to such worker and the Secretary of the Treasury shall make payments to such worker, in accordance with such certification, from the Defense Economic Adjustment Fund.

SEC. 606. LIMITATION ON BENEFITS.

In no case shall any displaced worker be eligible for benefits under section 603(a) of this Act unless such worker agrees—

(1) to maintain, on a current basis, during the period of such worker's displacement, an active registration with the Secretary of Labor or an appropriate State employment agency, as the case may be, and

(2) to accept any employment described in section 608(1) of this Act.

No such benefits shall be paid under this Act to any worker who fails to maintain such registration or to accept such employment.

SEC. 607. TREATMENT OF UNEMPLOYMENT COMPENSATION.

In no case shall any adjustment benefits paid pursuant to this Act be taken into consideration in determining eligibility for, or the amount of, unemployment compensation under any Federal or State unemployment compensation law.

SEC. 608. TERMINATION OF BENEFITS.

Adjustment benefits paid pursuant to this title shall terminate at the earlier of—

(1) the date on which a worker eligible for benefits obtains employment providing compensation equal to 65 percent of the average annual manufacturing salary for durable goods (based on a forty-hour workweek), in the State where the affected facility is located as determined by the State Department of Labor, for the calendar year ending before that worker's displacement, or

(2) 1 year after displacement.

SEC. 609. REGULATIONS.

The Council on Economic Diversification and Adjustment, after consultation with the Secretary of Labor, shall promulgate regulations to carry out the provisions of this title.

SEC. 610. DEFENSE ECONOMIC ADJUSTMENT FUND.

(a) ESTABLISHMENT.—There is established in the Treasury of the United States a trust fund to be known as the Defense Economic Adjustment Fund.

(b) AUTHORIZATION OF APPROPRIATIONS TO THE FUND.—The Secretary of the Treasury, in consultation with the Director of the Office of Management and Budget, shall determine for each fiscal year the projected savings in that fiscal year in defense spending that will result from the curtailment or termination of defense contracts and the closing and realignment of defense facilities. There is authorized to be appropriated to the Fund for each of the 7 fiscal years beginning after the date of the enactment of this Act an amount equal to—

(1) 10 percent of such projected savings for the previous fiscal year, plus

(2) such additional amounts as may be necessary to carry out the purposes of section 101 of this Act and to enable the Secretary of the Treasury to make the payments described under sections 603 and 605 of this Act.

(c) AUTHORIZATION OF APPROPRIATIONS FROM THE FUND.—Amounts in the Fund shall be available, as provided in appropriation Acts, to carry out the purposes of section 101 of this Act and to make the payments described under sections 603 and 605 of this Act.

SEC. 611. INDIVIDUAL RETIREMENT ACCOUNT WITHDRAWAL.

(a) EXEMPTION FROM PROHIBITED TRANSACTION RULES.—Section 4975 of the Internal Revenue Code of 1986 (relating to tax on prohibited transactions) is amended by redesignating subsection (i) as subsection (j) and by inserting after subsection (h) the following new subsection:

"(i) SPECIAL RULE FOR QUALIFIED DEFENSE WORKERS.—

"(1) IN GENERAL.—The prohibition provided in subsection (c) shall not apply to any qualified defense worker for a 1 year period from such worker's date of layoff if such worker uses the funds for—

"(A) the payment of the principal or interest on a mortgage of such worker's primary residence; or

"(B) for the rental expenses on his or her primary residence.

"(2) QUALIFIED DEFENSE WORKER DEFINED.—For the purposes of this subsection, the term 'qualified defense worker' means any worker who demonstrates that—

"(A) he or she has permanently lost his or her employment due to—

"(i) the cancellation of a defense contract affecting the defense facility at which he or she is employed,

"(ii) the significant reduction in the volume of defense work in relation to total defense work in such facility, or

"(iii) the significant workforce reduction or closure of such facility, and

"(B) such employment loss has occurred within the period beginning 6 months before and ending 1 year after the causal action, as described in clauses (i), (ii), or (iii) of subparagraph (A).

"(3) DEFINITIONS.—For purposes of this subsection, the terms 'defense contract', 'defense facility', and 'significant workforce reduction' shall have the meanings given such terms by sections 3(b), 3(d), and 601(b) of the Defense Realignment and Worker Assistance Act of 1990, respectively.".

TITLE VII—COMMUNITY ECONOMIC ADJUSTMENT PLANNING

SEC. 701. NOTIFICATION.

(a) IN GENERAL.—Upon release of the President's budget or any announcement of the realignment or closure of any qualified defense facility, the Secretary of Defense, acting through the Council on Economic Diversification and Adjustment, shall promptly notify any State or local government which may be affected by—

(1) the realignment or closure of any qualified defense facility; or

(2) the slowdown, termination, or cancellation of any defense contract,

which is proposed in, or would likely result from any proposal contained in, such budget or in such announcement.

(b) NOTIFICATION OF COMMUNITIES AFFECTED BY DEFENSE REALIGNMENT BEFORE DATE OF ENACTMENT.—In addition to the requirement of subsection (a), the Secretary of Defense shall provide notice pursuant to such subsection to any community likely to be affected by any action described in paragraph (1) or (2) of such subsection which was proposed in any budget of the President which was released or announced before the date of the enactment of this Act.

SEC. 702. ELIGIBILITY OF COMMUNITIES FOR ECONOMIC ADJUSTMENT PLANNING ASSISTANCE.

(a) IN GENERAL.—Any community which—

(1) is likely to be a substantially and seriously affected community upon the implementation of realignment or closure of any qualified defense facility, or the slowdown, termination, or cancellation of any defense contract (including any action for which notice was provided pursuant to section 701(b) of this Act); and

(2) complies with the requirements of subsection (b),

shall be eligible for economic adjustment planning assistance under section 703 of this Act.

(b) ANALYSES AND FORECASTS.—(1) Any community which seeks to become eligible for economic adjustment planning assistance shall prepare—

(A) an analysis and forecast of the effect any action described in paragraph (1) or (2) of section 701(a) of this Act will have on the local economy and workforce; and

(B) a proposal for an economic adjustment plan that addresses the community economic adjustments appropriate to reduce the adverse effect of any such action.

(2) Analyses, forecasts, and proposals for economic adjustment plans prepared pursuant to paragraph (1) shall be submitted to the Council for review and comment before the end of the 4-month period beginning on the date the Secretary of Defense provides notice under subsection (a) or (b) of section 701 of this Act.

(3) Any analysis and forecast prepared pursuant to paragraph (1)(A) shall include a specific estimate of the increase in unemployment projected as a result of any action described in paragraph (1) or (2) of section 701(a) of this Act for the most appropriate geographic or governmental entity for which reliable statistics are compiled.

(4) The economic assumptions, methodology, and analyses used to produce any estimate referred to in paragraph (3) shall be made part of any planning documentation submitted to the Council pursuant to paragraph (2).

(c) DETERMINATION OF ELIGIBLE COMMUNITIES; ANNUAL LISTS.—(1) The Council shall—

(A) review the material submitted under subsection (b)(2) by any community and determine whether such community meets the requirement of subsection (a) for eligibility for economic adjustment planning assistance; and

(B) publish a list annually of communities eligible for economic adjustment planning assistance under this title at the time the list is prepared.

(2) If the Council—

(A) determines under paragraph (1)(A) that any community is not eligible for economic adjustment planning assistance under this title; or

(B) fails to include any community in the annual list published under paragraph (1)(B),

the community may petition the Council for review of such determination or inclusion in such list, as the case may be.

(3) The Council shall promptly review any petition filed under paragraph (2).

SEC. 703. COMMUNITY ECONOMIC ADJUSTMENT PLANNING ASSISTANCE.

(a) IN GENERAL.—Any community which has been determined by the Council under section 702(c) to be eligible for economic adjustment planning assistance shall be eligible for assistance under section 2391(b) of title 10, United States Code.

(b) CONFORMING AMENDMENT.—Section 2391(b)(6) of title 10, United States Code, is amended by striking "$2,000,000" and inserting "$20,000,000".

SEC. 704. COMMUNITY ECONOMIC ADJUSTMENT ASSISTANCE.

Any substantially and seriously affected community shall be eligible for economic adjustment assistance authorized under title IX of the Public Works and Economic Development Act of 1965.

TITLE VIII—COMMERCIAL AND DEFENSE PRODUCTION INTEGRATION

SEC. 801. INTEGRATION OF COMMERCIAL PRODUCTION PROCESSES AND DEFENSE PROCUREMENT PRACTICES

(a) OFFICE OF COMMERCIAL AND DEFENSE PRODUCTION INTEGRATION.—Title 10 of the United States Code is amended—

(1) by redesignating chapter 149 as chapter 150, and

(2) by adding after chapter 148 the following new chapter 149:

"CHAPTER 149—INTEGRATION OF COMMERCIAL AND DEFENSE PRODUCTION

"Sec.

"2509. Office of Commercial and Defense Production Integration.

"§2509. Office of Commercial and Defense Production Integration

"(a) ESTABLISHMENT.—There is established within the Department of Defense an office to be known as the Office of Commercial and Defense Production Integration. The office shall be under the Under Secretary of Defense for Acquisition.

"(b) PURPOSES; DUTIES.—(1) The Office of Commercial and Defense Production Integration shall develop and implement policies, practices, and procedures designed to achieve an effective integration of commercial production processes and defense procurement practices. A procurement practice or procedure shall be considered to achieve effectively the integration of a commercial production process and a defense procurement practice if the practice or procedure—

"(A) increases the use of commercial products in defense procurement;

"(B) increases commercial-style competition in defense procurement practices;

"(C) lowers defense acquisition costs by streamlining the defense product acquisition process; or

"(D) encourages integrated processes for manufacturing civilian and defense products; or

"(E) encourages research and development of products having civilian and military applications.

"(2) The policies, practices, and procedures referred to in paragraph (1) shall require, to the maximum extent practicable—

"(A) the elimination of unique military specifications in the procurement of defense products;

"(B) the adoption of military product specifications that are compatible with existing or evolving commercial product specifications;

"(C) the adaptation of military products and systems to permit the effective utilization of existing or evolving commercial products;

"(D) the identification of commercial suppliers that have exhibited historically high standards of product quality and reliability in commercial or defense production;

"(E) maximum participation by such qualified suppliers in the defense procurement process; and

"(F) increased emphasis on supply quality.

"(c) NONDEVELOPMENTAL ITEMS.—The Office of Commercial and Defense Production Integration shall assist the Under Secretary of Defense for Acquisition in carrying out the duties of the Under Secretary under section 2325 of this title, relating to the procurement of nondevelopmental items.".

(b) CONFORMING AMENDMENTS.—(1) Section 2325(a) of title 10, United States Code, is amended—

(A) by striking "and" at the end of paragraph (2);

(B) by striking the period at the end of paragraph (3) and inserting in lieu thereof "; and"; and

(C) by inserting after paragraph (3), the following new paragraph:

"(4) such requirements achieve effective integration of commercial production processes and military procurement practices.".

(2) The items relating to chapter 149 in the table of chapters at the beginning of subtitle A, and at the beginning of part IV of subtitle A, of title 10, United States Code, are each amended to read as follows:

"149. Integration of Commercial and Defense Production ..... 2509".

SEC. 802. REGULATIONS

Not later than six months after the date of enactment of this Act, the Secretary of Defense shall prescribe such regulations as may be necessary to carry out the amendments made by section 801 of this Act.

SEC. 803. DEMONSTRATION PROJECTS

(a) DEMONSTRATION PROJECTS.—(1) The Secretary of Defense, acting through the Office of Commercial and Defense Production Integration, shall conduct not less than three projects designed to demonstrate the feasibility of achieving effective integration of commercial production processes and military procurement practices.

(2) The projects referred to in paragraph (1) shall commence not later than six months after the date of enactment of this Act and continue thereafter for not longer than one year.

(b) PROJECT PROPOSALS.—Not less than 30 days before the commencement of each project referred to in subsection (a), the Secretary shall notify Congress of the proposed demonstration project. The Secretary shall include in the notice—

(1) a description of the scope and structure of the project; and

(2) an evaluation of the means by which the project will achieve effective integration of commercial production processes and military procurement practices.

(c) PROJECT REPORTS.—Not later than 60 days after the termination of each project referred to in subsection (a), the Secretary shall submit a report to Congress evaluating the extent to which the project achieved effective integration of commercial production processes and military procurement practices, together with such recommendations for additional legislation as the Secretary determines necessary to carry out more effectively the purposes described in section 801 of this Act.

TITLE IX—COMMISSION ON MILITARY BUDGET REFORM

SEC. 901. ESTABLISHMENT OF COMMISSION

(a) IN GENERAL.—There is established a commission to be known as the Commission on Military Budget Reform (referred to in this Act as the "Commission").

(b) MEMBERS.—The Commission shall consist of 12 members, appointed as follows:

(1) Four to be appointed by the Secretary of Defense.

(2) Four to be appointed by the President pro tempore of the Senate.

(3) Four to be appointed by the Speaker of the House of Representatives.

(c) TERMS AND VACANCIES.—Members shall be appointed for the life of the Commission. Any vacancy occurring in the membership of the Commission shall not affect the powers of the Commission and shall be filled in the same manner in which the original appointment was made.

(d) CHAIRMAN AND VICE CHAIRMAN.—The Commission shall elect a Chairman and Vice Chairman from among its members.

(e) MEETINGS.—The Commission shall convene its first meeting within 30 days after the first date on which all members of the Commission have been appointed. Thereafter, the Commission shall meet at the discretion of its Chairman or at the call of a majority of its members.

(f) QUORUM.—Seven members of the Commission shall constitute a quorum, but a lesser number may hold hearings.

(g) COMPENSATION AND TRAVEL EXPENSES.—A member of the Commission may not be paid compensation for service performed as a member of the Commission. However, members of the Commission shall be allowed travel expenses, including per diem in lieu of subsistence, at rates authorized for employees of agencies under subchapter I of chapter 57 of title 5, United States Code, while away from their homes or regular places of business in the performance of services for the Commission.

SEC. 902. DUTIES

(a) STUDY.—The Commission shall conduct a study to determine the desirability and feasibility of Congress instituting a three year budget cycle program for the Department of Defense under which—

(1) the President would submit to Congress a proposed budget for the Department of Defense for three separate consecutive fiscal years;

(2) the Congress would enact separate legislation authorizing funds for the Department of Defense for three consecutive fiscal years and appropriating funds for that purpose for two consecutive fiscal years;

(3) in each fiscal year after enactment of the initial three year budget, the President would submit to Congress a proposed budget for the Department of Defense for the fiscal year following the last fiscal year of the previous budget for the Department of Defense; and

(4) in each fiscal year after the enactment of the initial legislation authorizing funds for three consecutive fiscal years and appropriating funds for two consecutive fiscal years, Congress would enact legislation authorizing funds for the fiscal year following the last fiscal year for which funds were authorized in the previous budget referred to in paragraph (3) and would enact legislation appropriating funds for the fiscal year following the last fiscal year for which funds were appropriated in the previous budget referred to in that paragraph.

(b) SPECIFIC MATTERS TO BE CONSIDERED.—In carrying out the study referred to in subsection (a), the Commission shall specifically consider the following:

(1) the advantages and disadvantages of such a program;

(2) the amount of savings that will likely result from such a program;

(3) the effects that such a program would likely have—

(A) on the activities and programs of the Department of Defense;

(B) on both short-range and long-range planning for national security; and

(C) on foreign military sales;

(6) the favorable and adverse effects that multiyear defense budget programs have had on the defense budget processes in foreign nations that have adopted such programs; and

(7) alternative means of carrying out a multiyear defense budget program.

(c) REPORT.—The Commission shall submit to the Secretary of Defense and Congress a report on the results of the study carried out under this Act, together with such comments and recommendations as the Commission considers appropriate, not later than 12 months after the date of the first meeting of the Commission under section 901(e) of this Act.

SEC. 903. POWERS OF COMMISSION

(a) MEETINGS AND HEARINGS.—For purposes of carrying out this Act, the Commission or, on the authorization of the Commission, any subcommittee or member thereof, may hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence as is appropriate.

(b) OBTAINING INFORMATION FROM FEDERAL AGENCIES.—The Commission may secure di-

rectly from any department or agency of the United States such information as the Commission may require to carry out its duties under this Act. Upon request of the Chairman of the Commission, the head of such department or agency shall furnish such information to the Commission.

SEC. 904. ADMINISTRATIVE PROVISIONS

(a) STAFF.—(1) The Commission may appoint and fix the compensation of such personnel as may be necessary, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, except that the compensation of any employee of the Commission may not exceed a rate equivalent to the rate payable under GS-18 of the General Schedule under section 5332 of such title.

(2) Upon request of the Commission, the head of any Federal agency is authorized to detail to the Commission, on a reimbursable basis, any of the personnel of such agency to assist the Commission in carrying out its duties under this Act and such detail shall be without interruption or loss of civil service status or privilege.

(b) USE OF EXPERTS AND CONSULTANTS.—The Commission may obtain the services of experts and consultants in accordance with the provisions of section 3109 of title 5, United States Code, but at rates for individuals not to exceed the daily equivalent of the minimum annual rate of basic pay payable for GS-16 of the General Schedule under section 5332 of such title.

SEC. 905. TERMINATION OF COMMISSION

The Commission shall expire 30 days after the date on which the report of the Commission is submitted to the Secretary of Defense and Congress.

SEC. 906. AUTHORIZATION OF APPROPRIATIONS.

There is hereby authorized to be appropriated such sums as may be necessary to carry out the purposes of this title.

SUMMARY OF THE DEFENSE REALIGNMENT AND WORKER ASSISTANCE ACT OF 1990

An act to assist in the economic adjustment and industrial diversification of workers, businesses and communities adversely affected by the termination or reduction of defense or defense related contracts or the closure of military installations.

TITLE I—INDUSTRIAL DIVERSIFICATION STUDY

Requires the Department of Commerce, in consultation with the Department of Defense, the Small Business Administration, and the Defense Advanced Research Projects Agency (DARPA) to perform a study on the extent to which and how diversification of defense industries to non-defense production can be accomplished.

TITLE II—PRESIDENTIAL COUNCIL ON ECONOMIC DIVERSIFICATION

Establishes a Council on Economic Diversification in the Office of the President to coordinate the efforts of Federal agencies and programs for the purpose of assisting communities, workers, and businesses in adjusting to cutbacks in defense programs.

Membership includes: the secretaries of Labor, Commerce, Defense, Housing and Urban Development, Transportation, Energy, the Director of the Office of Management and Budget, the Administrator of the Small Business Administration, the Chairman of the Council of Economic Advisers, four representatives of the business-management community to be appointed by the President, two of whom shall be appointed from defense-related businesses and two from non-defense-related businesses; and four representatives of labor union organizations to be appointed by the President. The council is co-chaired by the secretaries of Commerce and Labor.

TITLE III—DEFENSE INDUSTRIAL DIVERSIFICATION ACCOUNT

Establishes a Defense Industrial Diversification Account for defense businesses wishing to become more integrated into the civilian sector. It would function much like an I.R.A.

This title would allow a firm which is at least 60% reliant on defense contracts to deposit a portion of its profits into the account, tax free, for the purposes of investing in new nondefense plant and equipment or for the retraining or continued education of its workforce.

Deposits would be limited to the amount of a firm's defense-related depreciable assets. These investments could be made for a period of five years. The withdrawals could occur for 10 years. If the money were withdrawn for purposes other than those specifically stated, then the money would be fully taxed and a 10% penalty would be added.

TITLE IV / TITLE V—SMALL BUSINESS DIVERSIFICATION

Establishes within the Small Business Administration a permanent Office of Small Business Diversification. The purpose of this office is to identify the problems associated with defense cutbacks, for small defense-dependant businesses. The office would also serve to coordinate the efforts of the Small Business Administration and its programs for assisting firms adversely affected by defense cutbacks.

Creates a small business diversification guaranteed loan or grant program. Loans, guaranteed loans, or grants are capped at $40,000 for qualified small firms and require a 1:1 match from the firm.

Specific uses for the loan, guaranteed loan, or grant may include but shall not be limited to conducting market research or analysis for non-defense products, development of an alternative use or non-defense business plan, basic or applied research and development for non-defense lines of business, strategic planning, or non-defense prototype development.

Program is designed to promote diversification of small defense manufacturers and to qualify firms, if needed, for other S.B.A. loan guarantee programs or commercial lending sources.

TITLE VI—ECONOMIC ADJUSTMENT ASSISTANCE FOR EMPLOYEES

Employee notification is required for qualified employees 90 days prior to layoff.

Employees who can demonstrate that job displacement was the result of the loss or major reduction of a defense contract or the closing or re-alignment of a military installation are entitled to the following benefits:

(1) Severance pay for one year equal to 65% of average state manufacturing salary for durable goods. (Combines unemployment compensation + corporate severance pay + govt contribution)

(2) Health Benefits for one year providing a basic health insurance package.

Amends Title III of the Job Training Partnership Act (Displaced Worker Title). It increases Federal set-aside for displaced workers and modifies the formula used to disburse funds to States to factor in defense-related lay-offs.

Also allows qualified defense workers who have been laid-off to withdraw funds from their Individual Retirement Account to pay the principal or interest on a mortgage of his or her primary residence or for the rental costs of his or her primary residence. This should help enable them to keep their homes.

TITLE VII—COMMUNITY ECONOMIC ADJUSTMENT PLANNING

Identifies communities that will be substantially and seriously affected by defense lay-offs. (loss of more than 250 employees)

Increases the total funding available for community planning grants presently authorized by the Office of Economic Adjustment from $2,000,000 to $20,000,000.

Allows substantially and seriously impacted communities to be eligible for Title IX Community Planning Grants under the Economic Development Administration.

TITLE VIII—COMMERCIAL AND DEFENSE PRODUCT INTEGRATION

Establishes an Office of Commercial and Defense Product Integration in the Department of Defense to implement policies and procedures designed to achieve a better integration of commercial production processes and defense procurement practices. These two sectors have been largely segregated due to the Defense Department practices that require special specifications for nearly all items. As a result, even though some products and processes could be used by both defense and non-defense sectors, they often are not. The defense sector isn't able to take advantage of the lower costs and greater efficiency of joint production to stretch defense dollars further, and defense firms too often are not able to develop civilian product lines.

TITLE IX—COMMISSION ON MILITARY BUDGET REFORM

One reason for the prohibitively high unit cost of military parts and equipment is the annual budget process which makes it difficult for firms to plan over the long term. High unit costs reduce both efficiency and the amount of equipment the military can purchase. This title establishes a Commission on Military Budget Reform to study the desirability and feasibility of Congress instituting a three year budget cycle for defense contracting. The commission will determine whether the multi-year approach can have the effect of reducing unit costs, increasing efficiency, and protecting jobs.

FUNDING

Establishes a fund in the Treasury of the United States. The Secretary of the Treasury, in consultation with the Director of the Office of Management and Budget, will determine each fiscal year the projected savings in that fiscal year in defense spending that will result from the curtailment or termination of defense contracts and the closing or realignment of military installations. There is authorized to be appropriated to the Fund for the next fiscal year an amount equal to 10 percent of such projected savings for the previous fiscal year. Amounts in the fund are used to make payments pursuant to Title I and VI.●

● Mr. DODD. Mr. President, I rise today to join my colleague from Connecticut, Senator LIEBERMAN, in introducing a bill to help defense industries diversify and to provide assistance to

workers and communities heavily affected by cuts in our defense budget.

The dislocation we face in moving to the next stage of our defense posture is in some ways as profound as the wholesale revisions taking place in Eastern Europe and the Soviet Union. The changes for the United States and Eastern Europe are both promising and present great potential for economic growth and world peace. However, logic dictates that we ensure that changes in our defense posture do not result in unemployment lines and a weakened economy here at home.

While the changes are exciting and encouraging and hold hope for a more peaceful world, any reduction in our defense capability must be undertaken prudently. We must consider the potential impact cuts will have on the economies of our States and the Nation. A reduction in our defense spending will have costs. The anticipated costs are why I join Senator LIEBERMAN today in introducing the Defense Realignment and Worker Assistance Act of 1990. A reduction in defense spending will result in lost jobs and failing businesses. Communities will feel the economic impact. Small and large businesses alike will be forced to scale back or shut down.

The causes of the dislocations we expect to occur lie in the development of world politics. They are not the fault of any of our workers or managers. They are not from bad business decisions, low productivity or inadequate workmanship. Businesses and workers will be adversely affected by defense cuts when the apparent ending of the cold war is due in large part to their work. Is it fair that they suffer for their contribution to our national security? Of course not. The least we can do is to help them adjust to more peaceful times. An investment on the part of the Federal Government, the employer for many thousands of civilian defense workers, in diversification efforts will have long term benefits for our national and economic security.

The theme of diversification is not new. Some of us have been discussing its merits since the late 1970's. Today, however, the possibility of a "peace dividend" has made the benefits of diversification even greater for States and industries heavily dependent on Federal defense dollars. While it is out of the realm of Federal responsibility to force companies to diversify, we can provide breaks to companies who choose to do so.

The Defense Realignment and Worker Assistance Act of 1990 is a comprehensive initiative aimed at easing the transition for business, communities and workers to an economy less dependent on federal defense dollars.

The measure would offer assistance to defense workers adversely affected by the termination or reduction of defense or defense-related contracts or the closure of military installations by extending severance pay, health and child care services and providing for retraining programs. For businesses choosing to diversify or convert, this act would provide for a tax break for larger industries and guaranteed loans or grants for small businesses. Communities would benefit from an increase in funding for community planning grants for the purposes of economic adjustment. Moreover, the bill mandates a study of the feasibility of the diversification of defense industries. The measure establishes a Presidential council to coordinate diversification efforts. The last two titles provide for: First, an effort by the Department of Defense to encourage defense industries to adopt commercial production processes; and second, a commission on military budget reform that would study the feasibility of extending the budget cycle to 3 years for defense contracting. This final proposal would help defense industries plan in advance for reduced Federal dollars.

These proposals will enable us to take a progressive, foresighted approach to reduced Federal defense spending. We need to confront these challenges head on and convert them to opportunities in the 21st century.

I comment my colleague, Senator LIEBERMAN, for designing a balanced diversification measure that benefits businesses, workers and communities alike—all veterans of the cold war. In closing, I urge my colleagues to join me in cosponsoring this measure.●

By Mr. EXON (for himself and Mr. KERREY):

S. 2894. A bill to authorize appropriations for the West North Central highway system serving the West North Central region, and for other purposes; to the Committee on Environment and Public Works.

AUTHORIZATION OF FUNDS FOR WEST NORTH CENTRAL HIGHWAY SYSTEM

Mr. EXON. Mr. President, today with my colleague Senator KERREY I am introducing major legislation to authorize funds for badly needed infrastructure improvements for highways and bridges in the Midwest region of our Nation.

The bill authorizes a one-time amount; for fiscal year 1992 from the highway trust fund of $660 million for the seven States in the U.S. Census Bureau's West North Central region, commonly known as the Midwest. These States are Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota.

HIGHWAY TRUST FUNDS

The Gramm-Rudman law has prevented Nebraska and several other States from receiving the highway funds that they are rightfully due. Gramm-Rudman has held hostage more than $660 million in highway trust funds that by law can only be used to repair roads and bridges. The Gramm-Rudman law, with its accounting gimmicks froze the trust funds and created more than a $7 billion surplus which has been used to hide the true size of the budget deficit while our bridges and roads deteriorate. My bill will release the funds to repair roads and bridges, the only purpose for which the funds were collected.

The amount of funds for this bill is determined based on the historical share of highway funds received by these Midwestern States applied against the estimated uncommitted balance in the highway trust fund at the end of the current highway authorization bill. That balance has been estimated at $7 billion according to testimony before the Senate Transportation Appropriations Subcommittee.

The Midwest has received 9.4 percent of the trust fund since the fund's origin in 1956, so the same protion of the trust fund balance is set aside by this bill for Midwestern highways and bridges. That same method is also used for determining the share for each individual State. For example, the State of Nebraska's share would be about $61 million.

The funds authorized by this bill are intended as an additional amount on a one-time basis to catch up on the backlog of Midwestern highway and bridge needs. The States would have flexibility to determine their own highway-related priorities for use of the funds, depending on the particular needs in each State.

However, in order to encourage regional cooperation among the Midwestern States on their highway and bridge plans, the bill calls for the States to cooperatively prepare their plans for use of the funds to encourage emphasis on the overall economic development of the Midwest region as a whole. The regular Federal-aid highway programs would continue to apply and not be affected by this one-time shot of funds.

In other words, this bill simply proposes to give back to these States their share of the highway trust fund balance that has been held hostage due to Gramm-Rudman law budget politics, so the money can be used for highways and bridges, as Congress originally intended. Of course, I also support freeing the hostage highway trust fund money for the entire Nation. Unfortunately, efforts toward that end have been frustrated.

Therefore, perhaps what cannot be accomplished on a large scale can be accomplished one piece at a time.

I note that my colleagues Senator BYRD and Senator ROCKEFELLER have proposed similar legislation to jump start the Appalachian region's highway program and free up hostage

highway funds. I applaud my colleagues for their work in this area and view the legislation being introduced today as complementary.

Our Nation's deteriorating infrastructure in all regions badly needs this investment, which is the exact purpose for which Federal gasoline and other highway taxes are levied in the first place.

In the Midwest, while needs for new construction still exist, the far greater problem is repair and maintenance of existing highways and bridges.

For example, Nebraska was the first State in the Nation to complete its portion of the Interstate Highway System during the time I served as Governor. While Nebraska has been at times ahead of other States in the progress of construction efforts, the flip side of that coin is that the pavement and bridges have had longer exposure to wear and tear.

A particular problem in the Midwest is deficient bridges. According to the Federal Highway Administration, Midwestern States as a group rank very high in the percentage of deficient bridges. For example, according to FHWA statistics, 56 percent of Nebraska's bridges are either structurally or functionally deficient, which ranks Nebraska 8th highest in the Nation in percent of deficient bridges.

Mr. President, I look forward to working with my colleagues to address these urgent highway and bridge needs and free the hostage trust funds.

I ask unanimous consent that a copy of the bill, a chart on bridge needs, and a chart on funds received by Midwestern States be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2894

Be it enacted by the Senate and House of Representatives of the United States of America in Congress Assembled, That (a) notwithstanding any other provision of law, the Secretary of Transportation is authorized to assist in the construction, resurfacing, restoring, rehabilitating, and reconstructing of the highway and bridge system and local access roads and bridges serving the States of the West North Central region.

(b)(1) There are authorized to be appropriated to the Secretary of Transportation to carry out this section out of the Highway Account of the Highway Trust Fund (established by section 9503(a) of the Internal Revenue Code of 1986) $660,000,000 for fiscal year 1992.

(2) Funds appropriated pursuant to paragraph (1) are authorized to remain available until expended.

(c) Obligation limitations for Federal-aid highway and highway safety construction programs shall not apply to obligations made under this section, except where the provision of law establishing the limitation specifically amends or limits the applicability of this paragraph.

(d) Federal assistance to any construction project under this section shall not exceed 80 percent of the costs of such project.

(e)(1) The Secretary of Transportation shall apportion funds made available under this section to each State of the West North Central region on the basis of a percentage equal to the percentage that that State's estimated project costs bear to the total estimated project costs for all States of the West North Central region.

(2) The States of the West North Central region shall cooperatively develop and jointly submit to the Secretary of Transportation a list of the estimated project costs, calculated as of September 30, 1990.

(3) In determining the list of estimated project costs, each State shall be allocated a share of such costs to be funded by Federal assistance authorized by this section based on its historical ratio of Federal-aid apportionments from the Highway Account of the Highway Trust Fund.

(f) For purposes of this section—

(1) the term "West North Central region" shall mean the States of Nebraska, Iowa, Minnesota, South Dakota, North Dakota, Missouri, and Kansas; and

(2) the term "estimated project costs" means the costs of highway projects for which Federal assistance is authorized by this section.

SEC. 2. Projects eligible for assistance under section 1 shall also be eligible for funds available under laws applicable to the construction and maintenance of Federal-aid highways and bridges and be subject to the same terms and conditions required by such laws.

NUMBER AND PERCENT OF DEFICIENT BRIDGES,[1] STATES OF WEST NORTH CENTRAL REGION

State	Total bridges	Total deficient	Percent deficient	State rank
Iowa	25,865	12,376	48	15th
Kansas	25,648	12,733	50	12th
Minnesota	12,994	3,698	28	35th
Missouri	23,682	15,065	64	2d
Nebraska	15,843	8,794	56	8th
North Dakota	5,283	3,041	58	7th
South Dakota	6,822	3,190	47	16th

HISTORICAL SHARE AND BILL'S SHARE OF HIGHWAY FUNDS

State	Highway funds apportioned since 7-1-56 (Percent) [1]	Approximate bill share
Iowa	$3,250,257,000 (1.470)	$102,960,000
Kansas	2,908,793,000 (1.315)	92,400,000
Minnesota	4,805,515,000 (2.173)	152,460,000
Missouri	4,980,685,000 (2.252)	158,400,000
Nebraska	1,922,763,000 (0.869)	60,720,000
North Dakota	1,420,593,000 (0.642)	44,880,000
South Dakota	1,541,132,000 (0.697)	48,840,000

[1] Source: Federal Highway Administration (historical data).

Mr. KERREY. I rise as an original cosponsor of the legislation of the senior Senator from Nebraska. This actually is connected to an effort that the distinguished Presiding officer has been trying to call to the attention of this Nation, that we are building up a large reserve in the Highway Trust Fund, using it to pay the current bills and simply are not investing in our future.

I must say, as a person who has taken advantage of the interstate highway system, that makes me feel as if I am not treating my children as well as I ought to. I have made a lot of money because my parents invested in the interstate highway system.

I made a trip to Western Europe in December, and I must tell my colleagues and others if you go to the Federal Republic of Germany, and if you go to Western Europe today, you will see that they have made investments in their infrastructure.

The reason the Federal Republic of Germany is as strong as it is today in their economy is they have made those investments.

I must in addition to strongly supporting and applauding the senior Senator from Nebraska, Senator EXON's proposal, which I proudly join as a cosponsor, call my colleagues attention to the fact that in fact the United States of America is underinvesting in its infrastructure. Secretary of Transportation Skinner had a good plan until he ran into Dick Darman on the way to presenting the plan to the President: toned the thing down to the point where we are not going to be prepared in the 21st century. We are not going to be prepared economically to do the things all of us want to be able to do.

This bill addresses some urgent needs in the Midwest. What I hope it does as well is call attention to the urgent need in the rest of the Nation as the Presiding Officer has done with his efforts to get highway trust funds released to the States so they can be spent and invested in our highways. Not for us, I might point out, but for our children—the same as our parents invested in us. It is an economic investment that will give its return tomorrow, not an expenditure that is made to satisfy some urgent need today.

So I again thank the senior Senator from Nebraska for identifying this. He was a Governor for 8 years and understands how important these investments are. I hope my colleagues will join not only in this effort but in the effort of the distinguished Presiding Officer as well.

By Mr. MOYNIHAN (for himself and Mr. D'AMATO):

S. 2895. A bill to provide for the renegotiation of certain leases of the Seneca Nation, and for other purposes; to the Select Committee on Indian Affairs.

SENECA NATION SETTLEMENT ACT

Mr. MOYNIHAN. Mr. President, I am most pleased to join with my colleague Senator D'AMATO in introducing a bill to provide compensation to the Seneca Nation of Indians for inequities resulting from past lease agreements with the city of Salamanca, NY. Ninety percent of Salamanca is built on land leased from the Seneca Nation.

The involvement of the Federal Government in these lease arrange-

ments spans more than a century. In 1875, Congress approved leases from the Senecas of Cattaraugus County, NY, to several railroads. The renewal of these leases was again approved by Congress in 1890 for a term of 99 years. The terms, however, did not include any provision for rent increases. Consequently, the Seneca Nation still receives 1890's rents. Some of the lessees, now many of the homeowners and businesses in the city of Salamanca, paid as little as $1 per year. These leases, some 3,000, are to expire on February 19, 1991.

We took advantage. We did not provide fair value for these leases. We now ought to meet our responsibilities to the Senecas. The agreement reached among Salamanca, New York State, Congressman HOUGHTON, and the Senecas calls for a $60 million payment; $35 million from the Federal Government and $25 million from New York State.

Mr. President, this is much needed compensation for a greatly deserving people. I do hope we can give expedited consideration to this bill. I ask unanimous consent that the bill be printed in the RECORD.

These being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2895

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Seneca Nation Settlement Act of 1990".

SEC. 2. FINDINGS AND PURPOSES.

(a) CITY OF SALAMANCA AND CONGRESSIONAL VILLAGES.—The Congress finds and declares that:

(1) Disputes concerning leases of tribal lands within the city of Salamanca and the congressional villages, New York, have strained relations between the Indian and non-Indian communities and have resulted in adverse economic impacts affecting both communities.

(2) Some of the significant historical events which have led to the present situation include—

(A) beginning in the mid-nineteenth century, several railroads obtained grants or leases of rights of way through the Allegany Reservation without Federal authorization or approval and on terms which did not adequately protect the interests of the Seneca Nation;

(B) after construction of these railroads, Allegany Reservation lands were leased to railroad employees, persons associated with the railroads, residents of the city and farmers without Federal authorization or approval and on terms which did not adequately protect the interests of the Seneca Nation;

(C) none of these leases had Federal authorization or approval and, after the courts ruled these leases invalid, Congress enacted the Act of February 19, 1875 (18 Stat. 330), confirming existing leases of Allegany Reservation lands, authorizing further leasing by the Seneca Nation, and making the confirmed leases renewable for a twelve year period;

(D) the Act of September 30, 1890 (26 Stat. 558), amended the 1875 Act by substituting a renewal term of "not exceeding ninety-nine years" for the original renewal term of twelve years;

(E) in 1952 the Seneca Nation filed a claim with the Indian Claims Commission against the United States for use of improper lease fees, and in 1977 a settlement was reached regarding such claim, providing for the payment of $600,000 to the Seneca Nation covering the period beginning in 1870 to the end of 1946.

(3) An analysis of historic land values indicates that the payments made under the original lease agreement and under the settlement described in paragraph (2)(E) were well below the actual lease value of the property.

(4) The approaching expiration of the Salamanca and congressional village leases on February 19, 1991, has created significant uncertainty and concern on the part of the city of Salamanca and Salamanca residents, and among the residents of the congressional villages, many of whose families have resided on leased lands for generations.

(5) The future economic success of the Seneca Nation, city, and congressional villages is tied to the securing of a future lease agreement.

(6) The Federal and State governments have agreed that there is a moral responsibility on the part of both governments to help secure a fair and equitable settlement for past inequities.

(b) PURPOSE.—It is the purpose of this Act—

(1) to effectuate and support the Agreement between the city, Seneca Nation, and congressional villages;

(2) to assist in resolving the past inequities involving the 1890 leases and to secure fair and equitable compensation for the Seneca Nation based on the impact of these leases on the economy and culture of the Seneca Nation;

(3) to provide a productive environment between the Seneca Nation and lessees for negotiating the leases provided for under the Agreement;

(4) to provide stability and security to the city and the congressional villages, their residents, and businesses;

(5) to promote the economic growth of the city and the congressional villages;

(6) to promote economic self-sufficiency for the Seneca Nation and its members;

(7) to promote cooperative economic and community development efforts on the part of the Seneca Nation and the city; and

(8) to avoid the potential legal liability on the part of the United States that could be a direct consequence of not reaching a settlement.

SEC. 3. DEFINITIONS.

For the purposes of this Act—

(1) the term "1890 lease" means a lease made by the Seneca Nation which is subject to—

(A) the Act entitled "An Act to authorize the Seneca Nation of New York Indians to lease lands within the Cattaraugus and Allegany reservations, and to confirm existing leases" approved February 19, 1875 (chap. 90, 18 Stat. 330); and

(B) the Act entitled "An Act to authorize the Seneca Nation of New York Indians to lease lands within the Cattaraugus and Allegany Reservations, and to confirm existing leases" approved September 30, 1890 (chap. 1132, 26 Stat. 558);

(2) the term "Agreement" means the document executed by the Seneca Nation and the city entitled "Agreement between the Seneca Nation of Indians and the City of Salamanca", including the appendix to the Agreement;

(3) the term "city" means the city of Salamanca, New York;

(4) the term "lessee" means the holder of an 1890 lease which either expires in 1991 or is one of the leases listed in document 1 of the Technical Documents, including any lessee who holds an 1890 lease by reason of assignment, inheritance, or other manner as provided by the Act referred to in paragraph (1)(A);

(5) the term "memorandum of understanding" means an agreement between the State and the United States pertaining to the payment of the funds to be provided pursuant to this Act, which memorandum of understanding reflects an agreement between the Seneca Nation and the State concerning a mechanism and schedule of payments for the funds described in section 6(c);

(6) the term "Secretary" means the Secretary of the Interior;

(7) the term "Seneca Nation" means the Seneca Nation of Indians of the Allegany, Cattaraugus, and Oil Spring Reservations;

(8) the term "State" means the State of New York;

(9) the term "Technical Documents" means the documents which comprise the appendix to the Agreement; and

(10) the term "congressional villages" means the villages of Carrollton, Great Valley, and Vandalia in the State of New York.

SEC. 4. NEW LEASES AND EXTINGUISHMENT OF CLAIMS.

(a) NEW LEASES.—If the Seneca Nation offers new leases in accordance with the Agreement, this Act shall apply with respect to the Seneca Nation. The Seneca Nation shall supply copies of such leases to the Secretary and shall certify in writing that it has supplied the Secretary with copies of written offers to all lessees entitled to an offer.

(b) EXTINGUISHMENT OF CLAIMS.—The Seneca Nation shall execute appropriate documents relinquishing all claims against the United States, the State, the city, the congressional villages, and all prior lessees for payment of annual rents prior to February 20, 1991, with respect to all prior and existing leases.

(c) EFFECTIVE DATE OF LEASES.—The offers, and any acceptances thereto, referred to in subsection (a) and the relinquishment of claims referred to in subsection (b) shall not be binding on the Seneca Nation until after the later of the dates on which (1) Congress, and (2) the legislature of the States, appropriates the amount of funds set forth in section 6 or the Seneca Nation and the State agrees upon a schedule and mechanism for payments for funds pursuant to section 6(c). Such agreement shall render the offers, acceptances, and the relinquishment effective so long as the payments are made as agreed upon by the Seneca Nation and the State.

SEC. 5. RESPONSIBILITIES AND RESTRICTIONS.

(a) SENECA NATION.—The Congress finds that the Seneca Nation is solely responsible for negotiation of the leases under the Agreement in its own interest and approval of any such lease by the United States is not required.

(b) LESSEES.—The Congress finds that—

(1) the lessees of leases with the Seneca Nation are responsible for representing

their own interest in lease negotiations with the Seneca Nation; and

(2) nothing in this Act shall be construed to prevent the lessees from collectively negotiating with the Seneca Nation regarding such leases, whether through informal groups or as delegations formally sanctioned by either the States or local governments.

(c) UNITED STATES.—(1) The United States shall not serve in a capacity to approve leases of the Seneca Nation; and

(2) Federal funds may not be obligated or expended, directly or indirectly, for annual payments under any such lease, except for funds that may be available under a conventional, nation-wide program.

(d) STATE.—(1) The State shall not serve in a capacity to approve leases of the Seneca Nation.

(2) State funds may not be obligated or expended, directly or indirectly, for annual payments under any such lease.

SEC. 6. SETTLEMENT FUNDS.

(a) IN GENERAL.—In recognition of the findings and purposes specified in section 2, the settlement funds provided pursuant to this Act shall be provided by the United States and the State. The Secretary may not obligate or expend funds provided under subsection (b) until the Secretary determines that there is an agreement upon and signed memorandum of understanding.

(b) FUNDS PROVIDED BY UNITED STATES.—

(1) CASH PAYMENT.—The Secretary shall pay to the Seneca Nation the amount of $30,000,000, which is the Federal share of the cash payment of the settlement.

(2) ECONOMIC DEVELOPMENT.—(A) In addition to the amount provided under paragraph (1), the Secretary shall pay to the Seneca Nation the amount of $5,000,000 to be used for the economic and community development of the Seneca Nation, including the city of Salamanca, which is an integral part of the Seneca Nation's Allegany Reservation. Such amount shall be deposited by the Secretary, administered, and disbursed in accordance with subparagraph (B).

(B)(i) The sum of $2,000,000 shall be deposited in a separate interest bearing account of the Seneca Nation. The account shall be administered, and the principal and interest thereon disbursed, by the Seneca Nation in accordance with a plan approved by the Council of the Seneca Nation to promote the economic and community development of the Seneca Nation. Until the principal is expended pursuant to such plan, the income accruing from such sum shall be disbursed to the treasurer of the Seneca Nation on a quarterly basis to fund tribal government operations and to provide for the general welfare of the Seneca Nation and its members. The Seneca Nation may in its discretion add the accrued income to the principal.

(ii) The sum of $3,000,000 shall be deposited in an escrow account which shall be owned by the Seneca Nation. The escrow agent shall be selected by agreement of the Seneca Nation and the city. The escrow account shall remain in existence for a period of ten years from the date on which the principal is deposited or until all payments provied for under section V.D. of the Agreement have been made. The escrow account shall be held and disbursed for economic and community development as set forth in section V.D. of the Agreement. Upon the expiration of the ten-year period, the $3,000,000 principal shall be disbursed in accordance with an plan approved by the Council of the Seneca Nation to promote the economic and community development of the Seneca Nation.

(c) FUND TO BE PROVIDED BY THE STATE.—The State, in accordance with its laws and regulations, shall provbide the sum of $16,000,000 in cash payments and $9,000,000 for economic or community development subject to the provisions of the memorandum of understanding.

(d) TIME OF PAYMENTS.—The payments by this section on the part of the United States shall be made within 30 days of the Secretary's determination that the Seneca National has complied with section 4. If the Secretary determines that the Seneca Nation has not complied with section 4, he shall advise the Seneca Nation in writing of all steps it must take to comply.

(e) LIMITATION.—The only amounts available to carry out this Act shall be those amounts specifically appropriated by the Congress on the legislature of the State to carry out this Act.

SEC. 7. CONDITIONS PRECEDENT TO PAYMENT OF UNITED STATES AND STATE FUNDS.

Amounts may not be expended from—

(1) the $30,000,000 and the $5,000,000 provided by the United States under section 6(b), and

(2) the $16,000,000 and $9,000,000 provided by the State under section 6(c),

until after the authorized officials of the Seneca Nation execute new leases with all lessees who accept the Seneca Nation's offer of a net lease, as filed with the Secretary under section 4(a), and execute appropriate documents relinquishing all claims for payment of annual rents prior to February 20, 1991, with respect to such leases.

SEC. 8. MISCELLANEOUS PROVISIONS.

(a) LIENS AND FORFEITURES, ETC.—Subject to subsection (b), the provisions of section 7 of the Indian Tribal Judgment Funds Use and Distribution Act (25 U.S.C. 1407) shall apply to any payment of funds authorized to be appropriated under this Act and made to individual members of the Seneca Nation. None of the payments, funds, or distributions authorized, established, or directed by this Act, and none of the income derived therefrom, which may be received under this Act by the Seneca Nation or individual members of the Seneca Nation, shall be subject to levy, execution, forfeiture, garnishment, lien, encumbrance, seizure, or State or local taxation.

(b) ELIGIBILITY FOR GOVERNMENT PROGRAMS.—None of the payments, funds or distributions authorized, established, or directed by this Act, and none of the income derived therefrom, shall affect the eligibility of the Seneca Nation or its members for, or be used as a basis for denying or reducing funds under, any Federal program.

(c) LAND ACQUISITION.—Any land acquired by the Seneca Nation with funds appropriated pursuant to this Act shall be held in restricted fee status by the Seneca Nation, and shall be subject to section 2116 of the Revised Statutes (25 U.S.C. 177). As designated by the Secretary, based on the proximity of the land acquired to the Seneca Nation's reservations, land acquired may become a part of and expand the boundaries of the Allegany Reservation, the Cattaraugus Reservation, or the Oil Spring Reservation in accordance with the procedures established by the Secretary for this purpose.

SEC. 9. LIMITATION OF ACTION.

Notwithstanding any other provision of law, any action to contest the constitutionality or validity under law of this Act shall be barred unless the action is filed on or before the date which is 180 days after the date of enactment of this Act. Exclusive jurisdiction over any such action is hereby vested in the United States District Court for the Western District of New York.

SEC. 10. AUTHORIZATION OF APPROPRIATIONS.

There is authorized to be appropriated such sums as may be necessary to carry out this Act.

Mr. D'AMATO. Mr. President, I join with Senator MOYNIHAN in introducing legislation which will help to resolve a longstanding lease issue between the Seneca Nation and the city of Salamanca in New York State. Our legislation is called the Seneca Nation of New York Settlement Act. Our colleague, Representative HOUGHTON, is introducing identical legislation in the House today.

Roughly 90 percent of the city of Salamanca lies inside of the Allegany Reservation, home to the Seneca Indians. Back in 1892, the people of Salamanca entered into a 99-year lease with the Senecas. The terms of the lease required annual payments of $17,000 to the Senecas. The lease is set to expire in February 1991.

For nearly a decade, the Senecas and the city of Salamanca have been negotiating the terms for a new lease. The disagreements that have characterized the negotiations over the past 10 years created an air of uncertainty about the city's future that has discouraged investment and depressed real estate prices. Earlier this month, the parties finally reached agreement on the terms of the new lease. Our legislation embodies this agreement.

The agreement consists of two parts:

First, future lease agreements: These agreements must be resolved by the city of Salamanca and the Seneca Nation. The Federal and State governments will not directly or indirectly subsidize any future lease agreements.

Second, $60 million for past lease payment inequities: $25 million from New York State and $35 million from the Federal Government.

Three million from the Federal portion of the $60 million settlement will be set aside in an interest-bearing account—with the principal to be untouched and the interest targeted at economic development in the Salamanca area. Specifically: First, one-third of the interest is to be used by the Joint Venture Commission for Economic Development. This organization has equal representation from the city and the nation; and second, two-third's of the interest is to be used by the city of Salamanca for economic development—whether it be capital improvements or money used to attract new businesses.

This legislation is important to the Seneca people as well as the city of Salamanca. I urge my colleagues to join with myself and Senator MOYNIHAN in expeditiously moving this bill through the Senate.

By Mr. CRANSTON:

S. 2896. A bill to reorganize the agencies of the United States involved in migration affairs into a new Agency for Migration Affairs; to the Committee on Governmental Affairs.

MIGRATION AFFAIRS REORGANIZATION ACT

Mr. CRANSTON. Mr. President, today a very important report was presented to Congress by the Commission for the Study of International Migration and Cooperative Economic Development. As some of my colleagues may recall, Congress established this bipartisan commission under the auspices of the Immigration Reform and Control Act of 1986 [IRCA] to investigate the "push factors" that cause persons to flee their own countries and illegally immigrate into the United States. The report, entitled "Unauthorized Migration: An Economic Development Response," is the culmination of a 3-year study of these push factors.

Mr. President, the Commission's conclusions make excellent sense. Stemming illegal immigration to this country will never be a reality if we rely solely on border controls and the continued enforcement of the Failed Employer Sanctions Program. Rather, an effective solution will require a combination of strategies, both at home and abroad.

One Commission idea in particular merits the serious consideration of the Congress—the establishment of an independent agency with jurisdiction over immigration and refugee matters. I am today introducing legislation to establish an Agency for Migration Affairs, which would consolidate most of the immigration and refugee functions that are currently being handled or mishandled by a myriad of Federal Bureaus. At present, there are at least five agencies that have jurisdiction over some area of migration policy. These agencies and their various bureaus are often not working in coordination with each other; in fact, they sometimes duplicate each others functions.

Mr. President, I represent a State with the single largest immigrant and refugee populations in the Nation. California is home to over 6 million legal immigrants, an estimated 500,000 refugees, and, though it is difficult to calculate, 500,000 undocumented aliens. I have endured with my constituents the frustrations of dealing with a patchwork of ineffective Federal bureaucracies in resolving extremely complex problems—some of which are life threatening. I have also witnessed the inexplicable separation of our domestic and foreign policies with respect to migration consequences. In my view this is shortsighted and contrary to common sense.

The legislation I introduce today would elevate immigration and refugee policy to a national priority by reorganizing the currently fragmented government structure into one cohesive entity. An independent Agency for Migration Affairs would infuse this area of policymaking with the direction and leadership that are lacking at present. My bill would also promote the coordination of U.S. domestic and foreign policy agendas—A major concern for the Commission. It is time the administration and Congress consider the potential migration consequences of major decisions in the areas of trade, development, and foreign relations when formulating those policies.

Mr. President, once again I applaud the Commission for its excellent report and look forward to working with my colleagues in the Senate in implementing this and other recommendations made by the Commission.

By Mr. LEVIN (for himself, Mr. KOHL, Mr. HARKIN, Mr. GRASSLEY, Mr. SIMON, and Mr. KASTEN);

S. 2897. A bill to establish a small business technology transfer demonstration program with the Community College Association for Technology Transfer (or for other purposes); to the Committee on Small Business.

DEMONSTRATION PROGRAM TO PROMOTE TECHNOLOGY TRANSFER

● Mr. LEVIN. Mr. President, I am introducing legislation today with several of my colleagues that will establish a regional demonstration program to promote technology transfer and the modernization of small business manufacturing. This legislation is a small step in a direction that this country needs to take. We need to develop a better relationship between the Federal Government and small businesses that are trying to upgrade their capability to use new and high technology manufacturing.

In a hearing that I held last year, as chairman of the Senate Small Business Subcommittee on Innovation, Technology and Productivity, witnesses testified that this Nation's small businesses are suffering. Small businesses are the primary source of innovation and growth in our economy. Yet, a number of factors are quenching their fire to expand. Number one among their concerns in adopting or developing new technologies that will help them perform and compete better, is having a trained work force capable of using these new applications.

Without the ability of small businesses to assimilate and implement innovative technologies, America risks dropping behind in the technology-driven race to the 21st century. Since small businesses created 60 percent of all new jobs between 1976 and 1986, competitive small businesses are critical to our future economic well being.

Education and training are integral to helping small businesses acquire and use technology, but they are expensive in both time and money. One national survey indicated that more than half of all businesses were having difficulty finding technically skilled personnel. An appropriate role for Government is to supply programs that can make education and training readily available to small businesses and their employees.

Right now, there are more than 30 Federal programs which seek to stimulate the transfer, the adoption, or improve the efficiency of technology through direct technical assistance, grants, or other mechanisms. But of these and the other 170 organizations providing some kind of direct assistance to small- and medium-sized businesses, there is no Federal program dealing specifically with the modernization of small and medium-sized manufacturers, and only 13 such State programs.

Small businesses, especially manufacturers, need technical assistance and resources to maintain a competitive edge in today's global economy. The small business work force needs training and education in the uses of high technology at the local level.

The Community College Association for Technology Transfer [CCATT] is a consortium of 16 Midwestern community and technical colleges that exists primarily to assist small- and medium-sized businesses in adopting new technologies. This is a role unlike any I have ecountered and fits the need that I mentioned earlier. CCATT, therefore, would conduct the demonstration program, through the Small Business Administration, because of its uniqueness and its mission.

The bill requires SBA to establish a 2-year demonstration program using CCATT to provide small businesses in the region around each college with education, training, the technical assistance with respect to technology transfer and manufacturing applications. SBA would be authorized to spend $20 million on the program, to be distributed among the members on a merit basis. Grand Rapids Junior College and Jackson Community College in Michigan are members of CCATT and would be part of the demonstration program. At the end of the 2 years, SBA and Congress will assess the program's success and consider extending it. It may be that this program could lead to a whole network of technology extension service centers across the country, if it is a success.

We as a nation face a tremendous challenge. The only way to do that is to continue to modernize our work force and our small businesses. Constantly evolving technology is a fact of today's and tomorrow's economy.

Mr. President, I ask unanimous consent that a copy of the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2897

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CONGRESSIONAL FINDINGS.

The Congress finds that—

(1) The Small Business Administration has a mission to promote the transfer of technology to small businesses.

(2) Small businesses, which supply at least two-thirds of the parts used by major manufacturing companies in the United States, play a crucial role in the national economy.

(3) Encouragement and maintenance of technologically advanced small manufacturers is essential to the Nation's economic well-being and security, and to giving the Nation a strong competitive position in the world.

(4) The efficient and effective use of advanced manufacturing technology by small businesses can increase productivity by as much as 60 percent.

(5) In order to successfully introduce and utilize advanced technology in the workplace, small businesses require available and affordable education, training, and technical assistance for their workers and managers.

(6) Community and technical colleges can provide the critical education, training, and technical assistance in technology transfer for commercialization and application needed by small businesses to be more porductive and to compete more effectively.

(7) The Federal Government can stimulate and assist in the development of small business technology modernization efforts by supporting innovative coalitions of community and technical colleges which extend across State boundaries and involve a regional network in partnership with business and industry.

(8) The Community College Association for Technology Transfer (hereafter in this Act referred to as "CCATT"), is a coalition currently composed of 16 community and technical colleges.

(9) CCATT is committed to revitalizing the regional economy and has proposed a unique cooperation demonstration program involving industry, business, and government in a regional approach to technology transfer and application for small businesses.

SEC. 2. SMALL BUSINESS TECHNOLOGY TRANSFER DEMONSTRATION PROGRAM.

(a) ESTABLISHMENT.—There is established a Small Business Technology Transfer Demonstration Program (hereafter in this Act referred to as "Program") to be administered by the Administrator of the Small Business Administration (hereafter in this Act referred to as "Administrator"). To carry out the purpose of such Program, the Administrator is requested to enter into a contract with CCATT (or, if such organization is not available, another organization with appropriate qualifications).

(b) PURPOSE OF PROGRAM.—The purpose of the Program is to provide small businesses with education, training, and technical assistance with respect to technology transfer and application through CCATT (or other appropriate organization).

(c) ACTIVITIES.—The CCATT (or other appropriate organization) shall develop a regional demonstration program. Each participating community college will provide small businesses in its area with training and assistance with respect to—

(1) technological innovations,

(2) statistical process control,

(3) computer-assisted design,

(4) computer-assisted manufacturing and computer-integrated manufacturing,

(5) implementation and deployment of telecommunications and other interactive systems, and

(6) other new equipment and advanced manufacturing processes.

SEC. 3. USE OF SMALL BUSINESS DEVELOPMENT CENTERS AND OTHER RESOURCES.

The Administrator shall use to the maximum extent feasible the Small Business Development Centers and other available resources to facilitate CCATT (or other appropriate organization) in carrying out the purposes of this Act.

SEC. 4. GUIDELINES.

The Administrator shall, after consultation with CCATT (or other appropriate organization), develop guidelines for allocation of funds to members of CCATT (or other appropriate organization). Allocation of funds shall be based on a merit review process, including consideration of a demonstrated commitment and ability to conduct the types of activities described in section 2(c).

SEC. 5. REPORT TO CONGRESS.

Not later than June 30, 1993, the Administrator shall report to the Committees on Small Business of the Senate and the House of Representatives on the results of the demonstration Program and shall make recommendations regarding extension and expansion of this Program to other regions in the country.

SEC. 6. AUTHORIZATION.

There are authorized to be appropriated to the Small Business Administration $20,000,000 for fiscal years 1991 and 1992 to carry out the demonstration Program established by this Act.●

● Mr. KOHL. Mr. President, I rise today to join my distinguished colleague from Michigan [Mr. LEVIN] in the introduction of a bill to establish a demonstration program for technology transfer using the Community College Association for Technology Transfer [CCATT]. The proposal is an important step for a coalition of 2-year colleges in the Midwest, which is working to revitalize the economy of the Midwestern States. Through this unique cooperative effort among business, industry, and Government, we are hopeful that we can modernize our suffering manufacturing base.

One goal of the consortium is to provide technical assistance to small- and medium-sized firms. In the early 1980's, U.S. industry took a nosedive. Since then, large firms have had the resources to retool in order to become more competitive, but small firms have needed help in modernizing. Many small firms lack the resources needed for undertaking a major revamping on an individual basis. Oftentimes, in order to modernize, whole manufacturing systems are needed—which are often too expensive and too risky for small firms to attempt. For example, employing laser applications or using robotics requires an investment in resources many small firms are unable to make. Small- and medium-sized firms face the tremendous risk of losing everything if an attempt to stay at the cutting edge, and thus be competitive, fails. For an industry to modernize, it may need to employ whole new systems, rather than simply replacing outmoded equipment with new equipment.

Technical colleges have always had a special relationship with industry and oftentimes advisory councils representing industry have assisted technical colleges. If small- and medium-sized industries continue to experience the decline observed in the early 1980's, the Nation's technical colleges will also suffer as they lose the advice and assistance local industry has often provided. Therefore, community colleges are working to find ways to help U.S. industry remain competitive.

For example, community colleges across the country are developing expertise in specific technological programs for specific industry needs. The Community College Association for Technology Transfer offers a way to link the resources from these technical colleges in the Midwest in order to best meet the needs of a particular industry, regardless of its geographic location.

Four colleges from Wisconsin are part of this consortium: Gateway Technical College in Kenosha, Milwaukee Area Technical College in Milwaukee, Northcentral Technical Collete in Wausau, and Western Wisconsin Technical College in La Crosse.

There are a number of areas in which these technical colleges are planning to expand their offerings to small business and industry. For example, the Gateway Technical College plans to increase its contributions to technology transfer through a modern metallurgical and materials science laboratory. This laboratory would provide access to equipment and materials necessary for small companies which would not otherwise have access to these resources.

The Northwest Technical College, nationally recognized for its laser technology program, plans to set up an automated testing facility to assist companies to set up, debug, and test new equipment, while providing the technological assistance the college has to offer.

The Western Wisconsin Technical College will be setting up an interactive telecommunications network. This network will facilitate the exchange of information and ideas among the business community throughout the Midwest. The following would be included: Information of a technical nature, assisting companies in modernization efforts; referrals to appropriate technical support; and information regarding international marketing.

The Milwaukee Area Technical College [MATC] will be developing a shared manufacturing center. This will allow small- and medium-sized businesses to have access to modern, automated manufacturing along with equipment training. In addition, training and staff at MATC would be available to assist these companies.

If American industry is to again be a leader in worker productivity, with efficiently produced goods of the highest quality, our Nation's resources must be fully and efficiently utilized. The technical colleges in the Community College Association for Technology Transfer are already contributing to that effort.●

By Mr. JOHNSTON (for himself, Mr. COCHRAN, Mr. BREAUX, Mr. BENTSEN, Mr. BUMPERS, Mr. DANFORTH, Mr. BOND, Mr. LOTT, Mr. CRANSTON, and Mr. WILSON):

S.J. Res. 353. Joint resolution to designate September of 1991 as "National Rice Month"; to the Committee on the Judiciary.

NATIONAL RICE MONTH

● Mr. JOHNSTON. Mr. President, on behalf of myself and Senator COCHRAN, I am pleased to introduce today legislation to designate September 1991 as "National Rice Month." While we in Louisiana have long understood the importance of this vital cereal grain, it is my hope that this designation will prove helpful in assuring the preservation and continued prosperity of our domestic rice industry and an increased knowledge and understanding of the importance of rice to the entire United States.

Here in the United States, rice is the fifth most valuable food crop, worth over $2 billion each year, and is critical to the economies of Southern, Midwestern, and Western States. While this represents a very large quantity of domestically produced rice, particular attention is paid to both quality and efficiency. In cooperation with the U.S. Department of Agriculture, each of the rice-growing States has a major rice research center to facilitate the development of high-yielding varieties which have the characteristics required by rice processors and consumers. I have had the opportunity to visit our rice research station back home in Crowley, LA, and I was amazed at their work. In fact, thanks to the efforts of the many scientists and farmers who continually strive to improve the quantity and quality of rice produced here in the United States, American rice has become the standard of quality worldwide.

Mr. President, rice is not only important to our great Nation but is in fact one of the world's most important foods, with an estimated 3.3 billion people consuming rice every day as a principle source of energy. Fortunately, U.S. rice producers have been able to capitalize on the enormous world rice trade, which totals an estimated $3.5 billion, by annually exporting tons of rice worth over $1 billion to the countries of Europe, the Middle East, and the Far East as well. Naturally, this favorable balance of trade has had a tremendous impact on the American economy by increasing the total volume of rice produced, milled, and packaged, and thereby creating many jobs and other economic opportunities in industries both directly and indirectly related to our domestic rice industry. In fact, USDA studies show that for each $1 in U.S. exports, an additional $1.65 in associated economic activity is created here in the United States.

Although rice has been cultivated in the United States since the 1600's, American consumption of rice has historically lagged well behind that of the rest of the world. However, this trend has begun to change, and as we develop healthier eating habits, many of us are finally discovering the secrets known for centuries by others around the globe—rice is economical, convenient, packed with important complex carbohydrates, and is virtually fat and cholesterol free. Accordingly, domestic rice consumption has soared and now accounts for over 50 percent of total U.S. production.

This is certainly an encouraging start, but I believe an even greater public awareness will not only benefit American rice farmers but consumers as well. This resolution will help in achieving this goal. I therefore respectfully request that my colleagues here in the Senate join me in recognizing the importance of this wholesome, nutritious food by designating September 1991 as "Naitonal Rice Month."●

By Mr. GLENN (for himself, Mr. PRYOR, Mr. HEINZ, Mr. BRADLEY, Mr. WARNER, Mr. D'AMATO, Mr. BURDICK, Mr. JOHNSTON, Mr. SHELBY, Mr. REID, Mr. GRASSLEY, Mr. PRESSLER, Mrs. KASSEBAUM, Mr. WILSON, Mr. BENTSEN, Mr. DODD, and Mr. CRANSTON):

S.J. Res. 354. Joint resolution designating November 18-24, 1990, and November 17-23, 1991, as "National Family Caregivers Week"; to the Committee on the Judiciary.

NATIONAL FAMILY CAREGIVERS WEEK

● Mr. GLENN. Mr. President, today, along with Senators PRYOR, HEINZ, BRADLEY, WARNER, D'AMATO, BURDICK, JOHNSTON, SHELBY, REID, GRASSLEY, PRESSLER, KASSEBAUM, WILSON, BENTSEN, DODD, and CRANSTON, I am introducing Senate Joint Resolution 354 designating the week of Thanksgiving as "National Family Caregivers Week." Congresswoman OLYMPIA SNOWE has introduced an identical resolution, House Joint Resolution 525, in the House of Representatives. Since this measure has been enacted for 4 consecutive years, it is being introduced as a 2-year resolution.

Between 80 and 90 percent of the care received by older Americans come from family members, most often wives, daughters, and daughters-in-law. These caregivers face a variety of difficulties, including caring for one's children and parents simultaneously, or providing care 7 days a week while holding a full-time job. An increasing number of caregivers are found among the elderly themselves, as individuals take on the responsibility of caring for their spouses. The services performed by family caregivers, which include home maintenance, shopping, and personal care, usually prevent or at least delay the receiver's need for institutional care.

The physical, emotional, and financial stress experienced by caregivers is often extreme. The effects of that stress may be manifested in worker absenteeism and a decline in productivity. Many individuals, unable to meet the conflicting demand placed upon them, make the decision to give up their jobs altogether.

As the population continues to age, more and more family members will become caregivers for the elderly. We must work to find methods of alleviating the stress which these caregivers bear. Programs such as adult day care, transportation for the elderly, respite care, and support groups are essential and should be expanded to aid caregivers in providing the best quality of life for both themselves and their family members.

"National Family Caregivers Week" demonstrates our support and recognition of the vital role played by caregivers in the lives of our Nation's elderly. It also provides an opportunity to focus on ways of assisting caregivers in performing this role at less personal cost to themselves. I urge my colleagues in the Senate to join me in supporting this joint resolution to recognize these worthy individuals.

Mr. President, I ask that the text of the Resolution be printed in the RECORD at this point.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 354

Whereas the number of Americans who are age 65 or older is growing;

Whereas there has been an unprecedented increase in the number of persons who are age 85 or older;

Whereas the incidence of frailty and disability increases among persons of advanced age;

Whereas approximately 5.2 million older persons have disabilities that leave them in need of help with their daily tasks, including food preparation, dressing, and bathing;

Whereas families provide older persons help with such tasks, in addition to provid-

ing between 80 and 90 percent of the medical care, household maintenance, transportation, and shopping needed by older persons;

Whereas families who give care to older persons face many additional expenses, including the costs of home modifications, equipment rental, and additional heating;

Whereas 80 percent of disabled elderly persons receive care from their family members, most of whom are their wives, daughters, and daughters-in-law, who often must sacrifice employment opportunities to provide such care;

Whereas the role of the aged spouse as a principal caregiver has generally been understated;

Whereas family caregivers are often physically and emotionally exhausted from the amount of time and stress involved in caregiving activities;

Whereas family caregivers need information about available community resources;

Whereas family caregivers need respite from the strains of their caregiving roles;

Whereas the contributions of family caregivers help maintain strong family ties and assure support among generations; and

Whereas there is a need for greater public awareness of and support for the care that family caregivers are providing: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress asembled, That November 18-24, 1990, and November 17-23, 1991, are each designated "National Family Caregivers Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such weeks with appropriate programs, ceremonies, and activities.●

● Mr. D'AMATO. Mr. President, I rise today in support of important legislation that would designate November 18-24, 1990, and November 17-23, 1991, as National Family Caregivers Week. I commend my distinguished colleague from Ohio, Senator GLENN, for his sponsorship of this worthy legislation.

For the last 4 years, Congress has voted to designate Thanksgiving week as "National Family Caregivers Week." Once again, we have the opportunity to show our appreciation to those who dedicate their time as well as their physical and emotional energy to caring for elderly, disabled relatives in their homes.

It cannot be too strongly emphasized how many sacrifices caregivers make in order to take care of family members who are often unable to show their appreciation. The emotional toll of witnessing a once alert and vibrant relative's mental health deteriorate due to Alzheimer's disease and the physical toll of caring for a disabled family member day and night are enormous. In addition, caregivers often suffer economic hardship when they have to reduce the number of hours they work in order to spend time with relatives, yet also face medical expenses associated with caring for relatives at home.

Currently, families provide older persons with between 80 and 90 percent of the care that they require. These caregivers should receive the recognition they deserve. It is appropriate that during a week when we give thanks for the most important things in our lives, we should show our national appreciation for those who dedicate their lives to helping those less fortunate. I strongly urge immediate passage of this resolution.●

ADDITIONAL COSPONSORS

S. 1224

At the request of Mr. BRYAN, the name of the Senator from Minnesota [Mr. BOSCHWITZ] was added as a cosponsor of S. 1224, a bill to amend the Motor Vehicle Information and Cost Savings Act to require new standards for corporate average fuel economy, and for other purposes.

S. 1384

At the request of Mr. DASCHLE, the name of the Senator from Colorado [Mr. WIRTH] was added as a cosponsor of S. 1384, a bill to amend title XVIII of the Social Security Act to provide direct reimbursement under part B of Medicare for nurse practitioner or clinical nurse specialist services that are provided in rural areas.

S. 1651

At the request of Mr. MCCAIN, the name of the Senator from Minnesota [Mr. BOSCHWITZ] was added as a cosponsor of S. 1651, a bill to require the Secretary of the Treasury to mint coins in commemoration of the 50th anniversary of the United States Organization.

S. 1660

At the request of Mr. BRYAN, the name of the Senator from Rhode Island [Mr. PELL] was added as a cosponsor of S. 1660, a bill relating to telephone operator consumer services, and for other purposes.

S. 1671

At the request of Mr. COATS, the name of the Senator from Utah [Mr. HATCH] was added as a cosponsor of S. 1671, a bill to amend title X of the Public Health Service Act to authorize a program of grants to States for family planning programs, and for other purposes.

S. 1766

At the request of Mr. DANFORTH, the name of the Senator from Vermont [Mr. JEFFORDS] was added as a cosponsor of S. 1766, a bill to amend titles XVIII and XIX of the Social Security Act to require providers of services under such titles to enter into agreements assuring that individuals receiving services from such providers will be provided an opportunity to participate in and direct health care decisions affecting such individuals.

S. 1834

At the request of Mr. LIEBERMAN, the names of the Senator from Arkansas [Mr. PRYOR], the Senator from Arkansas [Mr. BUMPERS], the Senator from Massachusetts [Mr. KERRY], the Senator from Alabama [Mr. SHELBY], and the Senator from Connecticut [Mr. DODD] were added as cosponsors of S. 1834, a bill to recognize and grant a Federal charter to the organization known as the Supreme Court Historical Society.

S. 1946

At the request of Mr. CRANSTON, the name of the Senator from Ohio [Mr. GLENN] was added as a cosponsor of S. 1946, a bill to amend various provisions of law to ensure that services related to abortion are made available in the same manner as are all other pregnancy-related services under federally funded programs.

S. 1974

At the request of Mr. INOUYE, the name of the Senator from Massachusetts [Mr. KENNEDY] was added as a cosponsor of S. 1974, a bill to require new televisions to have built in decoder circuitry.

S. 2044

At the request of Mr. BIDEN, the name of the Senator from Maryland [Ms. MIKULSKI] was added as a cosponsor of S. 2044, a bill to require tuna products to be labeled respecting the method used to catch the tuna, and for other purposes.

S. 2051

At the request of Mr. HEFLIN, the name of the Senator from Tennessee [Mr. GORE] was added as a cosponsor of S. 2051, a bill to amend the Social Security Act to provide for more flexible billing arrangements in situations where physicians in the solo practice of medicine or in another group practice have arrangements with colleagues to "cover" their practice on an occasional basis.

S. 2100

At the request of Mr. CRANSTON, the name of the Senator from Iowa [Mr. HARKIN] was added as a cosponsor of S. 2100, a bill to increase the rates of compensation for veterans with service-connected disabilities and the rates of dependency and indemnity compensation for the survivors of certain disabled veterans; to amend title 38, United States Code, to improve veterans' compensation, health-care, insurance, and housing programs, and to provide for transitional group residences for veterans recovering from substance-abuse disabilities; and for other purposes.

S. 2186

At the request of Mr. MCCONNELL, the name of the Senator from Virginia [Mr. WARNER] was added as a cosponsor of S. 2186, a bill to repeal the provisions of the Revenue Reconciliation Act of 1989 which require the withholding of income tax from wages paid for agricultural labor.

S. 2222

At the request of Mr. BRADLEY, the name of the Senator from Delaware [Mr. BIDEN] was added as a cosponsor of S. 2222, a bill to amend the Internal Revenue Code of 1986 with respect to the tax treatment of payments under life insurance contracts for terminally ill individuals.

S. 2319

At the request of Mr. GARN, the name of the Senator from Alaska [Mr. MURKOWSKI] was added as a cosponsor of S. 2319, a bill to amend the Federal Deposit Insurance Act and the Federal Credit Union Act to protect the deposit insurance funds, to limit the depository institutions, credit unions, and other mortgage lenders acquiring real property through foreclosure or similar means, or in a fiduciary capacity, and for other purposes.

S. 2413

At the request of Mr. KERRY, the name of the Senator from New Jersey [Mr. LAUTENBERG] was added as a cosponsor of S. 2413, a bill to make eligibility standards for the award of the Purple Heart currently in effect applicable to members of the Armed Forces of the United States who were taken prisoner or taken captive by a hostile foreign government or its agents or a hostile force before April 15, 1962, and for other purposes.

S. 2479

At the request of Mr. LEVIN, the names of the Senator from Illinois [Mr. SIMON], the Senator from Rhode Island [Mr. PELL], the Senator from New Mexico [Mr. BINGAMAN], the Senator from Colorado [Mr. WIRTH], the Senator from Kansas [Mrs. KASSEBAUM], the Senator from Vermont [Mr. LEAHY], the Senator from Massachusetts [Mr. KERRY], the Senator from Iowa [Mr. HARKIN], the Senator from Kentucky [Mr. FORD], the Senator from Wisconsin [Mr. KOHL], the Senator from Illinois [Mr. DIXON], and the Senator from Arkansas [Mr. BUMPERS] were added as cosponsors of S. 2479, a bill to reduce funding for the MX Rail-Garrison Missile System.

S. 2489

At the request of Mr. LEAHY, the name of the Senator from Oregon [Mr. HATFIELD] was added as a cosponsor of S. 2489, a bill to improve the nutritional health of needy Americans, to provide emergency food assistance, to authorize several vital nutrition programs, and for other purposes.

S. 2551

At the request of Mr. SYMMS, the name of the Senator from Indiana [Mr. COATS] was added as a cosponsor of S. 2551, a bill to clarify the application of the Internal Revenue Code of 1986 with respect to personal use of airplanes.

S. 2602

At the request of Mr. METZENBAUM, the name of the Senator from Iowa [Mr. HARKIN] was added as a cosponsor of S. 2602, a bill to amend the Public Health Service Act to provide assistance for biomedical and health services research, treatment programs and for other purposes relating to Alzheimer's disease and related disorders.

S. 2640

At the request of Mr. DASCHLE, the name of the Senator from North Dakota [Mr. BURDICK] was added as a cosponsor of S. 2640, a bill to amend title XVIII of the Social Security Act to prevent fraud and abuse and encourage competition in the sale of medicare supplemental insurance.

S. 2653

At the request of Mr. BURNS, the name of the Senator from Texas [Mr. GRAMM] was added as a cosponsor of S. 2653, a bill to permit States to waive application of the Commercial Motor Vehicle Safety Act of 1986 with respect to vehicles used to transport farm supplies from retail dealers to or from a farm, and to vehicles used for custom harvesting, whether or not such vehicles are controlled and operated by a farmer.

S. 2677

At the request of Mr. LAUTENBERG, the names of the Senator from Oregon [Mr. HATFIELD], and the Senator from New York [Mr. MOYNIHAN] were added as cosponsors of S. 2677, a bill to extend for 2 years the operation of sections 599D and 599E of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1990.

S. 2689

At the request of Mr. HEINZ, the name of the Senator from Massachusetts [Mr. KERRY] was added as a cosponsor of S. 2689, a bill to amend title XVIII of the Social Security Act to provide for medicare coverage of the costs of home hemodialysis staff assistance, and for other purposes.

S. 2709

At the request of Mr. BOSCHWITZ, the names of the Senator from Oklahoma [Mr. BOREN], and the Senator from South Carolina [Mr. THURMOND] were added as cosponsors of S. 2709, a bill to amend the Internal Revenue Code of 1986 to provide that certain expenses of travel, meals, and lodging of members of the National Guard or reserve units of the Armed Forces will be allowable as deductions in computing adjusted gross income.

S. 2737

At the request of Mr. ARMSTRONG, the names of the Senator from New Mexico [Mr. DOMENICI], the Senator from Kentucky [Mr. MCCONNELL], the Senator from Kansas [Mrs. KASSEBAUM], the Senator from North Carolina [Mr. HELMS], the Senator from Louisiana [Mr. BREAUX], the Senator from North Dakota [Mr. BURDICK], the Senator from New Mexico [Mr. BINGAMAN], the Senator from Georgia [Mr. NUNN], and the Senator from Massachusetts [Mr. KERRY] were added as cosponsors of S. 2737, a bill to require the Secretary of the Treasury to mint a silver dollar coin in commemoration of the 38th anniversary of the ending of the Korean War and in honor of those who served.

S. 2789

At the request of Mr. GORE, the name of the Senator from Illinois [Mr. SIMON] was added as a cosponsor of S. 2789, a bill to authorize appropriations for the Earthquake Hazards Reduction Act of 1977, and for other purposes.

S. 2793

At the request of Mr. AKAKA, the name of the Senator from Maryland [Ms. MIKULSKI] was added as a cosponsor of S. 2793, a bill to amend the United States Institute of Peace Act to honor the memory of the late Spark M. Matsunaga, United States Senator from the State of Hawaii, and for other purposes.

S. 2797

At the request of Mr. HATCH, the names of the Senator from Colorado [Mr. WIRTH], and the Senator from Arizona [Mr. MCCAIN] were added as cosponsors of S. 2797, a bill to repeal provisions of law regardig employer sanctions and unfair immigration-related employment practices, to strengthen enforcement of laws regarding illegal entry into the United States, and for other purposes.

S. 2801

At the request of Mr. DOLE, the names of the Senator from Nebraska [Mr. EXON], and the Senator from Florida [Mr. GRAHAM] were added as cosponsors of S. 2801, a bill to direct the Secretary of Health and Human Services to phase in the update to the area wage index used to determine the amount of payment made to a hospital under Part A of the Medicare program for the operating costs of inpatient hospital services for inpatient discharges occurring during fiscal year 1991, and for other purposes.

S. 2813

At the request of Mr. GRAHAM, the name of the Senator from Tennessee [Mr. GORE] was added as a cosponsor of S. 2813, a bill to authorize the minting of commemorative coins to support the training of American athletes participating in the 1992 Olympic Games.

S. 2846

At the request of Mr. JOHNSTON, the name of the Senator from Louisiana [Mr. BREAUX] was added as a cosponsor of S. 2846, a bill to authorize and direct the Secretary of the Interior to conduct a study of the feasibility of establishing a unit of the National Park System to interpret and commemorate the origins, development, and progression of jazz in the United States, and for other purposes.

SENATE JOINT RESOLUTION 287

At the request of Mr. PELL, the names of the Senator from North Carolina [Mr. SANFORD], the Senator from Wisconsin [Mr. KOHL], and the Senator from Hawaii [Mr. AKAKA] were added as cosponsors of Senate Joint Resolution 287, a joint resolution requesting the President of the United States to negotiate agreements to achieve early prohibition of nuclear explosions.

SENATE JOINT RESOLUTION 292

At the request of Mr. PELL, the name of the Senator from New Jersey [Mr. LAUTENBERG] was added as a cosponsor of Senate Joint Resolution 292, a joint resolution to designate the year 1991 as the "Year of the Lifetime Reader."

SENATE JOINT RESOLUTION 309

At the request of Mr. BIDEN, the names of the Senator from Nevada [Mr. REID], the Senator from New York [Mr. MOYNIHAN], the Senator from North Dakota [Mr. BURDICK], the Senator from Montana [Mr. BAUCUS] the Senator from Oklahoma [Mr. BOREN], the Senator from Arkansas [Mr. BUMPERS], the Senator from Arizona [Mr. DECONCINI], the Senator from Florida [Mr. GRAHAM], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Michigan [Mr. LEVIN], the Senator from South Carolina [Mr. HOLLINGS], the Senator from Alabama [Mr. SHELBY], the Senator from Nevada [Mr. BRYAN], the Senator from Illinois [Mr. DIXON], the Senator from Texas [Mr. BENTSEN], the Senator from Connecticut [Mr. DODD], the Senator from Tennessee [Mr. GORE], the Senator from Alabama [Mr. HEFLIN], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Ohio [Mr. METZENBAUM], the Senator from Maryland [Ms. MIKULSKI], the Senator from Ohio [Mr. GLENN], the Senator from Nebraska [Mr. KERREY], the Senator from Virginia [Mr. ROBB], the Senator from Rhode Island [Mr. PELL], the Senator from Illinois [Mr. SIMON], the Senator from Washington [Mr. ADAMS], the Senator from Hawaii [Mr. AKAKA], the Senator from Hawaii [Mr. INOUYE], the Senator from Indiana [Mr. COATS], the Senator from New Mexico [Mr. DOMENICI], the Senator from Wyoming [Mr. SIMPSON], the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from Utah [Mr. GARN], the Senator from Utah [Mr. HATCH], the Senator from Wisconsin [Mr. KASTEN], the Senator from Idaho [Mr. MCCLURE], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Alaska [Mr. MURKOWSKI], the Senator from Alaska [Mr. STEVENS], the Senator from New York [Mr. D'AMATO], the Senator from Vermont [Mr. JEFFORDS], the Senator from Indiana [Mr. LUGAR], the Senator from Florida [Mr. MACK], the Senator from Oregon [Mr. HATFIELD], the Senator from Mississippi [Mr. COCHRAN], the Senator from Pennsylvania [Mr. SPECTER], the Senator from Virginia [Mr. WARNER], and the Senator from Rhode Island [Mr. CHAFEE] were added as cosponsors of Senate Joint Resolution 309, a joint resolution designating the month of October 1990 as "Crime Prevention Month."

SENATE JOINT RESOLUTION 327

At the request of Mr. MURKOWSKI, the names of the Senator from Missouri [Mr. BOND], the Senator from North Dakota [Mr. CONRAD], the Senator from New Mexico [Mr. DOMENICI], the Senator from Indiana [Mr. COATS], the Senator from Illinois [Mr. DIXON], the Senator from Florida [Mr. GRAHAM], the Senator from Utah [Mr. GARN], the Senator from Georgia [Mr. NUNN], the Senator from Alabama [Mr. SHELBY], the Senator from Hawaii [Mr. AKAKA], the Senator from Massachusetts [Mr. KERRY], the Senator from Arizona [Mr. MCCAIN], the Senator from Idaho [Mr. MCCLURE], the Senator from Michigan [Mr. RIEGLE], the Senator from Maryland [Mr. SARBANES], the Senator from Delaware [Mr. ROTH], the Senator from Connecticut [Mr. LIEBERMAN], the Senator from Virginia [Mr. ROBB], the Senator from Vermont [Mr. LEAHY], the Senator from South Carolina [Mr. THURMOND], and the Senator from Iowa [Mr. GRASSLEY] were added as cosponsors of Senate Joint Resolution 327, a joint resolution designating September 21, 1990, as "National POW/MIA Recognition Day," and recognizing the National League of Families POW/MIA flag.

SENATE JOINT RESOLUTION 329

At the request of Mr. KASTEN, the names of the Senator from Virginia [Mr. WARNER] and the Senator from California [Mr. WILSON] were added as cosponsors of Senate Joint Resolution 329, a joint resolution to designate the week of June 17, 1990 through June 23, 1990 as "National Week to Commemorate the Victims of the Famine in Ukraine, 1932-1933," and to commemorate the Ukrainian famine of 1932-1933 and the policies of Russification to suppress Ukrainian identity.

SENATE CONCURRENT RESOLUTION 141

At the request of Mr. KENNEDY, the name of the Senator from Oregon [Mr. HATFIELD] was added as a cosponsor of Senate Concurrent Resolution 141, a concurrent resolution expressing the sense of the Congress regarding the deterioriating human rights situation in Kenya.

SENATE RESOLUTION 231

At the request of Mr. BRADLEY, the names of the Senator from Oregon [Mr. PACKWOOD] and the Senator from Virginia [Mr. WARNER], were added as cosponsors of Senate Resolution 231, a resolution urging the submission of the Convention on the Rights of the Child to the Senate for its advice and consent to ratification.

AMENDMENTS SUBMITTED

FOOD, AGRICULTURE, CONSERVATION, AND TRADE ACT OF 1990

COHEN (AND OTHERS) AMENDMENT NO. 2335

Mr. COHEN (for himself, Mr. LEVIN, Mr. CONRAD, Mr. MITCHELL, Mr. BURDICK, Mr. CRANSTON, Mr. SYMMS, Mr. RIEGLE, Mr. MACK, and Mr. GRAHAM) proposed an amendment to the bill (S. 2830) to extend and revise agricultural price support and related programs, to provide for agricultural export, resource conservation, farm credit, and agricultural research and related programs, to ensure consumers of an abundance of food and fiber at affordable prices, and for other purposes, as follows:

On page 316, line 23, after the word "crop", insert the following: "(or any fruit or vegetable crop (including potatoes and edible beans) not designated as an industrial or experimental crop by the Secretary)";

On page 319, line 7, after the word "oilseed" add the following: ", industrial crops and experimental crops (as designated by the Secretary)";

On page 319, line 8, replace the period at the end of the line with a comma and add the following: "except any fruit or vegetable crop (including potatoes and edible beans) not designated as an industrial or experimental crop by the Secretary.".

BOSCHWITZ AMENDMENT NO. 2336

Mr. BOSCHWITZ proposed an amendment to the bill S. 2830, supra, as follows:

On page 67, line 17, strike "nor below $2.44 per bushel".

On page 68, lines 11 and 12, strike "nor below $2.44 per bushel".

On page 115, line 6, strike "nor below $1.96 per bushel".

On page 115, line 25, strike "nor below $1.96 per bushel".

CHAFEE (AND OTHERS) AMENDMENT NO. 2337

Mr. CHAFEE (for himself, Mr. KERRY, Mr. PELL, and Mr. LAUTENBERG) proposed an amendment to the bill S. 2830, supra, as follows:

Beginning on page 350, strike line 1 and all that follows through page 352, line 6, and insert the following new subtitle:

Subtitle C—Honey

SEC. 1041. HONEY PRICE SUPPORT.

Title II of the Agricultural Act of 1949 (7 U.S.C. 1446 et seq.) (as amended by section 1017 of this Act) is further amended—

(1) in section 201 (7 U.S.C. 1446), by striking subsection (b); and

(2) by adding at the end the following new section:

"SEC. 208. HONEY PRICE SUPPORT.

"(a) 1991 THROUGH 1994 CROPS.—For each of the 1991 through 1994 crops of honey, the price of honey shall be supported

through loans, purchases, or other operations at such level as is determined to be appropriate by the Secretary.

"(b) 1995 AND SUBSEQUENT CROPS.—Beginning with the 1995 crop of honey, the price of honey shall not be supported through loans, purchases, or any other operations.".

SEC. 1042. RESEARCH OF HONEYBEE DISEASES.

(a) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) diseases affecting the entire honeybee population impact on the ability of honeybees to carry out crop pollination and honey production, and therefore impact negatively on beekeepers, producers and consumers; and

(2) certain diseases (such as those caused by tracheal mite, varroa mite, and the Africanized honeybee) pose a threat to the continued well-being of the general honeybee population, and thus merit further study.

(b) RESEARCH.—Notwithstanding any other provision of law, The Secretary of Agriculture shall give priority attention to the funding of research regarding the diseases referred to in subsection (a) that are affecting the honeybee population.

SYMMS AMENDMENT NO. 2338

Mr. SYMMS proposed an amendment to the bill S. 2830, supra, as follows:

At the end of Title XI, insert the following new section:

SEC. . PREVENTION OF LOST SALES.—If the Secretary certifies that, upon good evidence, a sale of domestic agricultural commodities pursuant to an export activity subject to the requirements of section 901(b)(1) of the Merchant Marine Act of 1936 (46 U.S.C. 1101 et seq.) may fail to be made because of the requirements of that Act, the Secretary may waive those requirements with respect to that sale effective 10 days immediately following the date of certification.

DASCHLE AMENDMENT NO. 2339

Mr. DASCHLE proposed an amendment to the bill S. 2830, supra, as follows:

On page 328, between lines 12 and 13, insert the following new subsections:

(d) IRREVOCABLE TRUSTS.—Section 1001(5)(B)(ii) of such Act (7 U.S.C. 1308(5)(B)(ii)) is amended by adding at the end the following new subparagraph:

"(III) Notwithstanding any other provision of law, to be considered a separate person under this section, an irrevocable trust (other than a trust established prior to January 1, 1987) must not allow for modification or termination of the trust by the grantor, allow for the grantor to have any future, contingent, or remainder interest in the corpus of the trust, or provide for the transfer of the corpus of the trust to the remainder beneficiary in less than 20 years from the date the trust is established except in cases where the transfer is contingent on the remainder beneficiary achieving majority or is contingent on the death of the grantor or income beneficiary.".

(e) MINIMAL BENEFICIAL INTERESTS.—Section 1001A(a)(2) of such Act (7 U.S.C. 1308-1(a)(2)) is amended by striking "10 percent" and inserting "5 percent".

(f) INFORMATION.—The Food Security Act of 1985 is amended by inserting after section 1001C (7 U.S.C. 1308-3) the following new section:

"SEC. 1001D. INFORMATION.

"(a) EXCESS PAYMENTS TO INDIVIDUALS.—

"(1) DEVELOPMENT OF DATA.—The Secretary of Agriculture shall develop a database pertaining to individuals receiving direct payments in excess of the statutory limitation of $50,000 prescribed in section 1001(1).

"(2) PUBLICATION OF REPORT.—Not later than 180 days after the date of enactment of this section, and annually thereafter, the Secretary shall publish a report based on the information collected under paragraph (1) that includes—

"(A) the percentage of individuals eligible for direct deficiency payments receiving payment in excess of $50,000;

"(B) the percentage of direct deficiency payments in excess of $50,000 made to individuals attributed by principal crop;

"(C) the amount of direct deficiency payments by commodity that would have been made in the absence of any payment limitations;

"(D) the names of individuals receiving direct deficiency payments in excess of $50,000, and the total amount of payments received in the applicable year by each such individual;

"(E) a description of the bases on which individuals are eligible to receive the excess payments;

"(F) the percentage of eligible individuals who decline to participate in commodity programs because of the limitation on direct payments; and

"(G) other pertinent information, including any recommendations for changes in law or regulation to provide for equitable administration of payment limitations, as determined by the Secretary.

"(b) VIOLATIONS.—

"(1) IN GENERAL.—The Secretary shall submit an annual report to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate providing information on the extent to which there are violations of the payment limitations and restrictions contained in sections 1001 through 1001C.

"(2) CONTENTS.—The report shall contain—

"(A) the names of individuals found to be in violation of such sections:

"(B) the amount of payments received in violation of such sections by the individuals; and

"(C) any recommendations for changes in law or regulation to prevent the violations.".

(g) EDUCATION PROGRAM.—Such Act is amended by inserting after section 1001D (as added by subsection (f) of this section) the following new section:

"SEC. 1001E. EDUCATION PROGRAM.

(a) IN GENERAL.—The Secretary shall carry out a payment provisions education program for appropriate personnel of the Department of Agriculture and members and other personnel of local, county, and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)), for the purpose of fostering more effective and uniform application of the payment limitations and restrictions established under sections 1001 through 1001C.

"(b) TRAINING.—The education program shall provide training to the personnel in the fair, accurate, and uniform application to individual farming operations of the provisions of law and regulation relating to the payment provisions of sections 1001 through 1001C.

"(c) ADMINISTRATION.—The State office of the Agricultural Stabilization and Conservation Service shall make the initial determination concerning the application of payment limitations and restrictions established under sections 1001 through 1001C to farm operations consisting of more than 5 persons, subject to review by the Secretary.

"(d) COMMODITY CREDIT CORPORATION.—The Secretary shall carry out the program provided under this section through the Commodity Credit Corporation.".

DASCHLE AMENDMENT NO. 2340

Mr. DASCHLE proposed an amendment to the bill S. 2830, supra, as follows:

On page 349, line 25, insert the following new section:

SEC. . LOAN RATE STUDY.

(a) IN GENERAL.—In the case of the annual programs established for each of the 1992 through 1995 crops of wheat, feed grains, upland cotton, and rice under section 107A, 105A, 103A, and 101A of the Agricultural Act of 1949 (as amended by section 301, 401, 501, and 601 of this Act), respectively, the Secretary of Agriculture shall study the impact of—

(1) increasing the minimum loan and purchase level established the crop to—

(A) the corresponding established price level for the crop; or

(B) the projected average cost of production level for the crop; and

(2) eliminating deficiency payments for the crop.

(b) FACTORS.—In conducting the study, the Secretary shall analyze the impact of the actions described in subsection (a) on—

(1) the export market share for each commodity;

(2) Commodity Credit Corporation outlays for each commodity; and

(3) net farm income for each commodity.

(c) REPORT.—Not later than October 1, 1991, the Secretary shall submit a report that describes the results of the study conducted under this section to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

LUGAR AMENDMENT NO. 2341

Mr. LUGAR proposed an amendment to amendment No. 2340 proposed by Mr. DASCHLE to the bill S. 2830, supra; as follows:

Insert at the appropriate place:

(a) On page 178, strike lines 23 and 24, and on page 179, strike lines 1 and 2 and insert:

"(C) ESTABLISHED PRICE.—For each of the 1991-1995 crops of cotton, the established price available to producers shall be established as follows:

"(i) for 1-80,000 pounds of production, not less than $0.747 per pound, and

"(ii) for greater than 80,000 pounds of production, not less than $0.60 per pound.

(b) On page 192, line 23, insert "the portion of" after "to".

(c) On page 192, line 25, before the period, insert the following: "in excess of the number of acres that would yield 80,000 pounds of cotton (using the farm program payment yield for the crop for the farm)".

(d) On page 224, strike lines 1-4 and insert:

(e) On page 236, line 10, insert "the portion of" after "to".

(f) On page 236, line 11, before the period, insert the following: "in excess of the number of acres that would yield 5500 hundredweight of rice (using the farm program payment yield for the crop for the farm)".

"(C) ESTABLISHED PRICE.—For each of the 1991-1995 crops of rice, the established price available to producers shall be established as follows:

"(i) For 1-5500 hundredweight of production, not less than $10.98 per hundredweight, and

"(ii) For greater than 5500 hundredweight of production, not less than $9.10 per hundredweight."

DASCHLE AMENDMENT NO. 2342

Mr. DASCHLE proposed an amendment to the bill S. 2830, supra; as follows:

On page 74, strike lines 19 through 22 and insert the following:

"(C) ESTABLISHED PRICE.—The established price for wheat for each of the 1991 through 1995 crops of wheat shall not be less than—

"(i) in the case of the first 12,500 bushels of wheat produced on a farm, $4.10 per bushel; and

"(ii) in the case of any additional bushels of wheat produced on the frarm, $3.40 per bushel.

On page 88, line 14, insert "the portion of" after "to".

On page 88, line 15, before the period, insert the following: "in excess of the number of acres that would yield 4,000 bushels of wheat (using the farm program payment yield for the crop for the farm)".

Beginning on page 122, strike line 18 and all that follows through page 123, line 9, and insert the following:

"(C) ESTABLISHED PRICES.—

"(i) CORN.—The established price for corn for each of the 1991 through 1995 crops of corn shall not be less than—

"(I) in the case of the first 18,000 bushels of corn produced on a farm, $2.82 per bushel; and

"(II) in the case of any additional bushels of corn produced on the farm, $2.33 per bushel.

"(ii) OATS.—The established price for oats shall not be less than—

"(I) in the case of the first 10,000 bushels of oats produced on a farm, $1.59 per bushel for the 1991 crop, $1.69 per bushel for the 1992 crop, $1.79 per bushel for the 1993 crop, and $1.90 per bushel for each of the 1994 and 1995 crops; and

"(II) in the case of any additional bushels of oats produced on the farm, $1.32 per bushel for the 1991 crop, $1.40 per bushel for the 1992 crop, $1.49 per bushel for the 1993 crop, and $1.58 per bushel for each of the 1994 and 1995 crops.

"(iii) GRAIN SORGHUMS.—The established price for grain sorghums for each of the 1991 through 1995 crops of corn shall not be less than—

"(I) in the case of the first 12,000 bushels produced on a farm, $2.68 per bushel; and

"(II) in the case of any additional bushels of grain sorghums produced on the farm, $2.22 per bushel.

"(iv) BARLEY.—The established price for barley for each of the 1991 through 1995 crops of barley shall not be less than—

"(I) in the case of the first 10,000 bushels produced on a farm, $2.42 per bushel; and

"(II) in the case of any additional bushels of barley produced on the farm, $2.01 per bushel.

On page 123, line 10, strike "(iv)" and insert "(v)".

On page 136, line 23, strike "12.5" and insert "15".

On page 137, line 6, strike "12.5" and insert "15".

On page 137, line 17, insert "the portion of" after "to".

On page 137, line 19, before the period insert the following: "in excess of the number of acres that would yield 10,000 bushels of corn, 6,500 bushels of grain sorghums, 5,000 bushels of barley, and 5,500 bushels of oats, respectively (using the farm program payment yield for the respective crop for the farm)".

GRASSLEY AMENDMENT NO. 2343

Mr. GRASSLEY proposed an amendment to the bill S. 2830, supra; as follows:

On page 89, beginning with line 18, strike out everything down through line 3 on page 91 and insert the following:

"'(F) PLANTING PROGRAM CROPS, OILSEEDS, OR OTHER CROPS ON REDUCED ACREAGE.—

"'(i) IN GENERAL.—Subject to clause (ii), the producers on a farm may plant a program crop, an oilseed, a conserving use crop, or any other crop considered appropriate by the Secretary, on not more than one-half of the reduced acreage on the farm.

"'(ii) LIMITATION.—If the producers on a farm elect to plant a program crop or other approved crop on reduced acreage under this subparagraph, the amount of the individual program acreage on which a producer would otherwise be eligible to receive deficiency payments shall be reduced by such amount as the Secretary determines appropriate. If the producers on the farm are participating in a program established for more than one program crop, the Secretary may prorate the reduction in individual program acreage based on the acreage planted or considered planted on the farm to all such program crops.'"

On page 91, beginning with line 17, strike out everything down through line 9 on page 92 and insert the following:

"'(ii) LIMITATION.—If the producers on a farm elect to plant or harvest an approved crop on reduced acreage under this subparagraph, the amount of the individual program acreage on which a producer would otherwise be eligible to receive deficiency payments shall be reduced by such amount as the Secretary determines appropriate. If the producers on the farm are participating in a program established for more than one program crop, the Secretary may prorate the reduction in individual program acreage based on the acreage planted or considered planted on the farm to all such program crops.'"

On page 92, line 21, strike out "options" and insert "option".

On page 92, beginning with line 22, strike out everything down through line 3 on page 93.

On page 93, line 4, strike out "(C)" and insert "(B)".

On page 94, beginning with line 10, strike out everything down through line 13 on page 95.

On page 95, line 14, strike out "(E)" and insert "(C)".

[FEED GRAIN PROGRAM]

On page 138, beginning with line 23, strike out everything down through line 8 on page 140 and insert the following:

"'(F) PLANTING PROGRAM CROPS, OILSEEDS, OR OTHER CROPS ON REDUCED ACREAGE.—

"'(i) IN GENERAL.—Subject to clause (ii), the producers on a farm may plant a program crop, an oilseed, a conserving use crop, or any other crop considered appropriate by the Secretary, on not more than one-half of the reduced acreage on the farm.

"'(ii) LIMITATION.—If the producers on a farm elect to plant a program crop or other approved crop on reduced acreage under this subparagraph, the amount of the individual program acreage on which a producer would otherwise be eligible to receive deficiency payments shall be reduced by such amount as the Secretary determines appropriate. If the producers on the farm are participating in a program established for more than one program crop, the Secretary may prorate the reduction in individual program acreage based on the acreage planted or considered planted on the farm to all such program crops.'"

On page 140, beginning with line 22, strike out everything down through line 14 on page 141 and insert the following:

"'(ii) LIMITATION.—If the producers on a farm elect to plant or harvest an approved crop on reduced acreage under this subparagraph, the amount of the individual program acreage on which a producer would otherwise be eligible to receive deficiency payments shall be reduced by such amount as the Secretary determines appropriate. If the producers on the farm are participating in a program established for more than one program crop, the Secretary may prorate the reduction in individual program acreage based on the acreage planted or considered planted on the farm to all such program crops.'"

On page 142, line 2, strike out "options" and insert "option".

On page 142, strike out lines 3 through 9.

On page 142, line 10, strike out "(C)" and insert "(B)".

On page 143, beginning with line 15, strike out everything down through line 19 on page 144.

On page 144, line 20, strike out "(E)" and insert "(C)".

On page 145, line 1, strike out "(F)" and insert "(D)".

[COTTON PROGRAM]

On page 194, beginning with line 5, strike out everything down through line 14 on page 195 and insert the following:

"'(F) PLANTING PROGRAM CROPS, OILSEEDS, OR OTHER CROPS ON REDUCED ACREAGE.—

"'(i) IN GENERAL.—Subject to clause (ii), the producers on a farm may plant a program crop, an oilseed, a conserving use crop, or any other crop considered appropriate by the Secretary, on not more than one-half the reduced acreage on the farm.

"'(ii) LIMITATION.—If the producers on a farm elect to plant a program crop or other approved crop on reduced acreage under this subparagraph, the amount of the individual program acreage on which a producer would otherwise be eligible to receive deficiency payments shall be reduced by such amount as the Secretary determines appropriate. If the producers on the farm are participating in a program established for more than one program crop, the Secretary may prorate the reduction in individual program acreage based on the acreage planted or considered planted on the farm to all such program crops.'"

On page 196, strike out lines 4 through 21 and insert the following:

"'(ii) LIMITATION.—If the producers on a farm elect to plant or harvest an approved crop on reduced acreage under this subparagraph, the amount of the individual program acreage on which a producer would otherwise be eligible to receive deficiency payments shall be reduced by such amount as the Secretary determines appropriate. If the producers on the farm are participating in a program established for more than one program crop, the Secretary may prorate the reduction in individual program acreage based on the acreage planted or considered planted on the farm to all such program crops.'"

On page 197, line 8, strike out "options" and insert "option".

On page 197, strike out lines 9 through 15.

On page 197, line 16, strike out "(C)" and insert "(B)".

On page 198, beginning with line 21, strike out everything down through line 25 on page 199.

[RICE PROGRAM]

On page 237, beginning with line 14, strike out everything down through line 24 on page 238 and inserts the following:

"'(F) PLANTING PROGRAM CROPS, OILSEEDS, OR OTHER CROPS ON REDUCED ACREAGE.—

"'(i) IN GENERAL.—Subject to clause (ii), the producers on a farm may plant a program crop, an oilseed, a conserving use crop, or any other crop considered appropriate by the Secretary, on not more than one-half the reduced acreage on the farm.

"'(ii) LIMITATION.—If the producers on a farm elect to plant a program crop or other approved crop on reduced acreage under this subparagraph, the amount of the individual program acreage on which a producer would otherwise be eligible to receive deficiency payments shall be reduced by such amount as the Secretary determines appropriate. If the producers on the farm are participating in a program established for more than one program crop, the Secretary may prorate the reduction in individual program acreage based on the acreage planted or considered planted on the farm to all such program crops.'"

On page 239, beginning with line 14, strike out everything down through line 6 on page 240 and inserts the following:

"(ii) LIMITATION.—If the producers on a farm elect to plant or harvest an approved crop on reduced acreage under this subparagraph, the amount of the individual program acreage on which a producer would otherwise be eligible to receive deficiency payments shall be reduced by such amount as the Secretary determines appropriate. If the producers on the farm are participating in a program established for more than one program crop, the Secretary may prorate the reduction in individual program acreage based on the acreage planted or considered planted on the farm to all such program crops."

On page 240, line 19, strike out "options" and insert "option".

On page 240, beginning with line 21, strike out everything down through line 2 on page 241.

On page 241, line 3, strike out "(C)" and insert "(B)".

On page 242, beginning with line 5, strike out everything down through line 8 on page 243.

On page 243, line 9, strike out "(E)" and insert "(C)".

[GENERAL PLANTING FLEXIBILITY]

On page 318, beginning with line 21, strike out everything down through line 22 on page 320 and insert the following:

"'SEC. 505. PLANTING FLEXIBILITY.

"'(a) FLEXIBLE CROP ACREAGE.—

"'(1) FLEXIBILITY AUTHORITY.—Notwithstanding any other provision of this Act, the Secretary shall permit producers on a farm to plant for harvest up to 25 percent of (A) the crop acreage base established on the farm for each program crop, and (B) the historical oilseed planting on the farm to—

"'(i) any program crop;

"'(ii) any oilseed; or

"'(iii) any conserving use crop, or any other crop, considered appropriate by the Secretary.

Acreage planted to such approved crops shall be referred to as 'flexible crop acreage'.

"'(2) DEFICIENCY PAYMENT BENEFITS.—For the purposes of determining deficiency payments under this Act, flexible crop acreage under paragraph (1) shall be considered to be planted to the program crop for which such approved crop is substituted.

"'(3) BASE PROTECTION.—For the purposes of determining the normal crop acreage and crop acreage bases, any flexible crop acreage under paragraph (1) shall be considered to be planted to the program crop or oilseed for which such approved crop is substituted. The Secretary shall ensure that the crop acreage bases and the normal crop acreage established for the farm are not increased due to such plantings.

"'(b) SPECIAL NONRECOURSE LOANS FOR SOYBEANS AND OTHER OILSEEDS.—Notwithstanding any other provision of this Act, the Secretary shall support the price of the quantity of soybeans and other oilseeds produced on flexible crop acreage as provided in this section.

"'(1) LOAN LEVELS AND RELATED PROVISIONS FOR SOYBEANS.—Notwithstanding any other provision of law, the provisions of law in effect under this Act for the establishment of the level of loans and purchases for the 1990 crop of soybeans shall be applicable to the establishment of the level of loans and purchases for the quantity of soybeans produced on flexible crop acreage during the 1991 through 1995 crop years.

"'(2) LOAN LEVELS FOR OTHER OILSEEDS.—Notwithstanding any other provision of this Act, the level of loans and purchases for the quantity of sunflower seed, canola, rapeseed, safflower, or flaxseed produced on flexible crop acreage during the 1991 through 1995 crop years shall be such level as the Secretary determines is fair and reasonable in relation to the loan level established for soybeans under this subsection.

"'(c) LIMITATION ON BENEFITS.—Except as provided in subsection (a)(2), the Secretary shall not make program benefits, other than price support loans authorized under this Act for program crops and under this section for soybeans and other oilseeds, available to producers with respect to a program crop or oilseed planted on flexible crop acreage under subsection (a).'"

On page 89, strike out lines 12 through 17 and insert the following:

"'(E) INDIVIDUAL FARM PROGRAM ACREAGE.—Except as otherwise provided in subsection (c), the individual farm program acreage shall be the acreage planted on the farm to wheat for harvest and any flexible crop acreage that is considered planted to wheat under section 505, within the permitted wheat acreage for the farm as established under this paragraph.'"

On page 138, strike out lines 17 through 22 and insert the following:

"'(E) INDIVIDUAL FARM PROGRAM ACREAGE.—Except as otherwise provided in subsection (c), the individual farm program acreage shall be the acreage planted on the farm to feed grains for harvest and any flexible crop acreage that is considered planted to feed grains under section 505, within the permitted feed grain acreage for the farm as established under this paragraph.'"

On page 193, beginning with line 23, strike out everything down through line 4 on page 194 and insert the following:

"'(E) INDIVIDUAL FARM PROGRAM ACREAGE.—Except as otherwise provided in subsection (c), the individual farm program acreage shall be the acreage planted on the farm to upland cotton for harvest and any flexible crop acreage that is considered planted to upland cotton under section 505, within the permitted upland cotton acreage for the farm as established under this paragraph.'"

On page 237, strike out lines 8 through 13 and insert the following:

"'(E) INDIVIDUAL FARM PROGRAM ACREAGE.—Except as otherwise provided in subsection (c), the individual farm program acreage shall be the acreage planted on the farm to rice for harvest and any flexible crop acreage that is considered planted to rice under section 505, within the permitted rice acreage for the farm as established under this paragraph.'"

GORTON AMENDMENT NO. 2344

Mr. GORTON proposed an amendment to the bill S. 2830, supra; as follows:

Amend line 19 of page 924 of S. 2830 by striking "or pistachios" and inserting "pistachios, or apples".

DURENBERGER AMENDMENT NO. 2345

Mr. DURENBERGER proposed an amendment to the bill S. 2830, supra; as follows:

At the appropriate place, insert the following new subtitle:

Subtitle _____—Farm Safety

SEC. _____01. SHORT TITLE.

This subtitle may be cited as the "Farm Injury Prevention and Treatment Act of 1990".

SEC. _____02. FINDINGS.

Congress finds that—

(1) data developed by the National Safety Council indicate that farming is one of the most dangerous occupations in the United States;

(2) farmers face unique severe injuries that threaten both the lives and livelihoods of farmers;

(3) the public needs to fully understand the causes of, extent of, or solutions to, problems of injury to farmers;

(4) it serves the national interest to increase medical treatment and rehabilitation services for farm injuries;

(5) it serves the national interest to increase public knowledge about farm safety issues and the impact of farm safety on rural health; and

(6) it serves the national interest to improve coordination among the many government agencies with jurisdiction over farm safety issues.

SEC. _____03. DEFINITIONS.

As used in this subtitle:

(1) FARMER.—The term "farmer" includes a farmer, rancher, family member of a farmer or rancher who is involved in the op-

eration of the farm or ranch, child of a farmer or rancher, and seasonal employee of a farmer or rancher.

(2) FARM ACCIDENT.—The term "farm accident" means an unplanned incident that—

(A) may result in a farm injury; and

(B) is determined by the Task Force to be a farm accident.

(3) FARM ILLNESS.—The term "farm illness" means a chronic condition causing impaired function that—

(A) results from a farm injury; and

(B) is determined by the Task Force to be a farm accident.

(4) FARM INJURY.—The term "farm injury" means a traumatic or toxic exposure injury to a farm worker that is determined by the Task Force to be a farm injury, including—

(A) an injury that results from improper design or construction of a building, machine, or equipment; and

(B) an intentional injury, including an injury that results from assaultive or abusive action, or suicide.

(5) LAND GRANT UNIVERSITY.—The term "land grant university" means a land grant university established under the Act of July 2, 1862 (known as the "First Morrill Act"; 12 Stat. 503, chapter 130; 7 U.S.C. 301 et seq.) or under the Act of August 30, 1890 (known as the "Second Morrill Act"; 26 Stat. 419; 7 U.S.C. 321 et seq.).

(6) TASK FORCE.—The term "Task Force" means the Farm Safety Task Force, established in section _____04(a).

(7) TOXIC EXPOSURE INJURY.—The term "toxic exposure injury" means an injury that results from inhalation or contact with chemical, organic, or infectious substances or with electrical or thermal sources.

(8) TRAUMATIC INJURY.—The term "traumatic injury" means an injury that results from acute or repetitive subacute stresses to the human body.

SEC. _____04. TASK FORCE.

(a) ESTABLISHMENT.—There is established in the Department of Agriculture a Farm Safety Task Force, to serve as an advisory panel of experts to the Secretary of Agriculture and HHS.

(b) MEMBERSHIP.—The Task Force shall be composed of 17 members, including—

(1) the Secretary of Agriculture;

(2) the Secretary of Health and Human Services; and

(3) 15 other members appointed by the Secretary of Agriculture, in consultation with the Secretary of Health and Human Services, including—

(A) 3 individuals from other Federal, State, and local government agencies that conduct programs related to agriculture, occupational safety, or health, such as the Department of Labor, or other agencies determined to be appropriate by the Secretary of Agriculture and the Secretary of Health and Human Services;

(B) 3 individuals from among individuals nominated by national agricultural organizations;

(C) 3 individuals who shall represent the interests of—

(i) the farm machinery industry; and

(ii) other industries affected by issues of farm safety that have an interest in, and a potential to contribute to, the formulation of national policy related to farm safety, as determined by the Secretary of Agriculture and the Secretary of Health and Human Services;

(D) 3 individuals with medical experience related to treatment of farm injuries; and

(E) 3 private citizens.

(c) CO-CHAIRPERSONS.—The Secretary of Agriculture and the Secretary of Health and Human Services shall serve as the Co-chairpersons of the Task Force.

(d) TERM OF OFFICE.—The Secretary of Agriculture shall appoint members of the Task Force under subsection (b)(3) for terms of 3 years, except that the Secretary of Agriculture shall appoint one-third of the original members for a term of 1 year, and one-third for a term of 2 years.

(e) VACANCIES.—The Secretary of Agriculture shall fill any vacancy in the membership of the Task Force in the same manner as the original appointment. The vacancy shall not affect the power of the remaining members to execute the duties of the Task Force.

(f) QUORUM.—A quorum shall consist of 9 members of the Task Force, except that 7 members may conduct a hearing.

(g) MEETINGS.—The Task Force shall meet at the call of the Co-chairpersons or a majority of the members of the Task Force.

(h) COMPENSATION AND REIMBURSEMENT OF EXPENSES.—

(1) COMPENSATION.—Each member of the Task Force who is not an employee of the Federal Government shall receive compensation at a rate not to exceed the daily equivalent of the rate specified for GS-18 of the General Schedule under section 5332 of title 5, United States Code, for each day the member is engaged in the performance of duties for the Task Force.

(2) TRAVEL EXPENSES.—Each member of the Task Force shall receive travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons employed intermittently in the Government service, for each day the member is engaged in the performance of duties away from the home or regular place of business of the member.

(i) FEDERAL ADVISORY COMMITTEE ACT.—The Federal Advisory Committee Act (5 U.S.C. App.) shall not apply to the Task Force.

(j) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to pay the administrative expenses of the Task Force $250,000 for each of fiscal years 1991 through 1995.

SEC. _____05. STAFF AND CONSULTANTS.

(a) STAFF.—

(1) APPOINTMENT AND COMPENSATION.—The Secretary of Agriculture and the Secretary of Health and Human Services may appoint and determine the compensation of such staff as the Task Force determines to be necessary to carry out the duties of the Task Force.

(2) LIMITATIONS.—The rate of compensation for each staff member shall not exceed the daily equivalent of the rate specified for GS-18 of the General Schedule under section 5332 of title 5, United States Code for each day the staff member is engaged in the performance of duties for the Task Force. The Secretary of Agriculture and the Secretary of Health and Human Services may otherwise appoint and determine the compensation of staff without regard to the provisions of title 5, United States Code, that govern appointments in the competitive service, and the provisions of chapter 51 and subchapter III of chapter 53 of title 5, United States Code, that relate to classification and General Schedule pay rates.

(b) EXPERTS AND CONSULTANTS.—

(1) SERVICES AND COMPENSATION.—The Secretary of Agriculture and the Secretary of Health and Human Services may obtain and compensate such temporary and intermittent services of experts and consultants in accordance with section 3109(b) of title 5, United States Code, as the Task Force determines to be necessary to carry out the duties of the Task Force.

(2) LIMITATION.—The rate of compensation for each expert or consultant shall not exceed the daily equivalent of the rate specified for GS-18 of the General Schedule under section 5332 of title 5, United States Code for each day the expert or consultant is engaged in the actual performance of duties for the Task Force.

(3) INTENT OF CONGRESS.—It is the intent of Congress that the Secretary of Agriculture and the Secretary of Health and Human Services shall obtain the services of experts and consultants from State agencies, land grant universities, and other organizations that gather farm accident and injury information in accordance with this subsection whenever appropriate in order to use existing expertise and information concerning farm accidents and injuries.

(c) DETAIL OF FEDERAL EMPLOYEES.—On the request of the Task Force, the Secretary of Agriculture and the Secretary of Health and Human Services shall detail, without reimbursement, any of the personnel of the Department of Agriculture or the Department of Health and Human Services to the Task Force as the Task Force determines to be necessary to carry out the duties of the Task Force. Any detail shall not interrupt or otherwise affect the civil service status or privileges of the Federal employee.

(d) TECHNICAL ASSISTANCE.—On the request of the Task Force, the Secretary of Agriculture and the Secretary of Health and Human Services shall provide, without reimbursement, such technical assistance and administrative support services to the Task Force as the Task Force determines to be necessary to carry out the duties of the Task Force.

(e) OBTAINING INFORMATION.—The Secretary of Agriculture and the Secretary of Health and Human Services may secure directly from any Federal agency information necessary to enable the Task Force to carry out the duties of the Task Force, if the information may be disclosed under section 552 of title 5, United States Code. Subject to the previous sentence, on the request of the Secretary of Agriculture and the Secretary of Health and Human Services, the head of the agency shall furnish the information to the Task Force.

SEC. _____06. ORGANIZATION.

(a) MEMORANDUM OF AGREEMENT.—Not later than 4 months after the date of enactment of this subtitle, the Secretary of Agriculture and the Secretary of Health and Human Services shall develop and enter into a Memorandum of Agreement that shall, at a minimum—

(1) identify the resources and programs of the Department of Agriculture, the Department of Health and Human Services, and other Federal, State, and local programs, that relate to farm safety issues;

(2) coordinate the resources and programs, including education and information dissemination, of the Department of Agriculture and the Department of Health and Human Services existing on the date of enactment of this subtitle with the research and grant programs established by sections _____08 through _____14;

(3) develop and establish appropriate minimum standards for the responsibilities of the Department of Agriculture and the Department of Health and Human Services to

the Task Force, including provision of staff to the Task Force to develop recommendations on research and grant proposals, and perform the administrative work of the Task Force;

(4) develop a budget for the activities of the Task Force;

(5) provide that, in the event of a disagreement between the Task Force and the Secretary of Agriculture with respect to any research program established by section _____08 or _____09 the decision of the Secretary of Agriculture shall be final; and

(6) provide for an annual review of the memorandum of agreement by the Secretary of Agriculture and the Secretary of Health and Human Services.

(b) CONSULTATION.—The Secretary of Agriculture and the Secretary of Health and Human Services shall, in developing the Memorandum of Agreement under subsection (a), consult with and solicit the comments of the heads of other Federal, State, and local programs that relate to farm safety issues.

(c) PUBLICATION.—The Memorandum of Agreement established in accordance with subsection (a) shall be submitted to Congress and published in the Federal Register not later than 6 months after the date of enactment of this subtitle.

(d) COORDINATION.—The Task Force shall coordinate and serve as a clearinghouse for Federal farm safety outreach and education programs.

(e) PRIORITY.—The Task Force shall make recommendations * * * the scope and priority of each of the research and grant programs established by sections _____08 through _____14.

SEC. _____07. CENSUS OF AGRICULTURE.

The Secretary of Commerce shall include questions relating to agricultural accidents and farm safety in the 1992 Census of Agriculture.

SEC. _____08. FARM ACCIDENT PREVENTION STUDY.

(a) STUDY.—

(1) SUBJECT.—The Task Force shall—

(A) conduct a nationwide study of the frequency and the types of farm accidents that involve farmers;

(B) gather and provide relevant regional information on farm accidents; and

(C) perform tasks determined by the Secretary of Agriculture to be needed to acquire and analyze the information required to be collected under subparagraphs (A) and (B).

(2) ANALYSIS.—In conducting the study described in paragraph (1), the Task Force shall—

(A) analyze farm accidents involving—

(i) farm equipment and machinery;

(ii) agricultural chemicals;

(iii) livestock;

(iv) farm buildings; and

(v) children;

(B) differentiate between farm accidents that are related to agricultural employment and farm accidents that are not related to agricultural employment; and

(C) use recognized scientific and analytical methods.

(b) GRANTS.—To assist in the conduct of the study under subsection (a), the Task Force shall make special grants under section 2(c)(1) of the Act of August 4, 1965 (7 U.S.C. 4501) to public and private institutions to gather and provide relevant regional information, and to perform such other tasks determined needed by the Secretary relating to the items specified in paragraph (a).

(c) STUDY RESULTS.—

(1) DEFICENCIES IN EXISTING PROGRAMS.—The Secretary of Agriculture shall use the information gathered under subsection (a) to inform the Agricultural Extension Service of the adequacies or deficiencies of existing farm safety programs operating within various regions of the country.

(2) DISSEMINATION.—The Secretary of Agriculture, acting through the Agricultural Extension Service, and in cooperation with agricultural organizations, State departments of agriculture, machinery manufacturers, and land grant universities, shall coordinate and disseminate information relating to farm safety programs that are targeted at farmers, ranchers, and their employees.

(3) ADMINISTRATIVE RECOMMENDATIONS.—The Task Force shall review the information gathered in accordance with subsection (a) and submit to appropriate Federal agencies the findings and conclusions of the Task Force about the adequacy or deficiency of existing farm safety programs operating within various regions of the country, including recommendations for administrative reform.

(4) REPORT TO CONGRESS.—Not later than January 1, 1993, the Task Force shall submit a report to the President, the Committee on Agriculture of the House of Representatives, and the Committee on Agriculture, Nutrition, and Forestry of the Senate describing the findings and conclusions of the study required by subsection (a), including recommendations for legislative reform.

(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section $5,000,000 for each of fiscal years 1991 through 1995.

SEC. _____09. TRACTOR ROLL-OVER STUDY AND REQUIREMENTS.

(a) STUDY.—

(1) SUBJECT.—The Task Force shall conduct a study of protective roll-over devices for tractors. In particular, the Task Force shall examine—

(A) the safety benefits of various protective devices;

(B) the costs associated with various protective devices;

(C) appropriate minimum guidelines for protective devices;

(D) practical and feasible means of encouraging farmers and farm machinery manufacturers to install protective devices on farm machinery; and

(E) practical and feasible means of discouraging users of farm machinery from inhibiting or overriding safety devices.

(2) REPORT.—Not later than 12 months after the date of enactment of this subtitle, the Task Force shall submit to the Committee on Agriculture of the House of Representatives, the Committee on Agriculture, Nutrition, and Forestry of the Senate, and the Secretary of Agriculture a written report of its findings and conclusions from the study conducted under paragraph (1), including recommendations for administrative and legislative reform.

(b) REQUIREMENTS.—If Congress has not passed legislation concerning tractor roll-over protective devices 6 months after the date the Task Force has submitted the report described in subsection (a)(2), the Secretary of Agriculture shall issue regulations to implement the recommendations of the Task Force contained within the report specified in subsection (a)(2).

(c) AUTHORIZATION OF APPROPRIATIONS.—

(1) STUDY.—There are authorized to be appropriated for purposes of carrying out subsection (a) $1,000,000 for fiscal year 1991.

(2) REQUIREMENTS.—There are authorized to be appropriated for purposes of carrying out subsection (b) $500,000 for each of the fiscal years 1992 through 1995.

SEC. _____10. FARM MACHINERY ENGINEERING RESEARCH GRANTS.

(a) ESTABLISHMENT.—The Task Force shall establish a Farm Safety Fund and is authorized, in accordance with appropriation Acts, to award grants from the Fund to eligible entities to pay for the Federal share of conducting research on farm machinery safety engineering.

(b) USE OF GRANTS.—Entities shall use grants provided under this section to—

(1) conduct research on engineering designs and protective devices to improve the safety of farm machinery;

(2) implement the designs and install the devices on farm machinery; and

(3) test the designs and devices.

(c) AWARD OF GRANTS.—

(1) PEER REVIEW.—The Task Force shall obtain peer review of research proposals, and shall seek the widest participation of qualified scientists in the Federal Government, State governments, colleges and universities, and the private sector to perform the review. The results of the review shall be presented to the Task Force.

(2) PRIORITY.—The Task Force shall award grants under this section in accordance with the priority established by the Task Force in accordance with section _____06(e), and shall give priority to applicants that—

(A) receive non-Federal funding;

(B) are land grant universities;

(C) propose research designs that demonstrate a high likelihood of adaptability to existing and future farm machinery; or

(D) propose research designs that address user or behavioral actions that inhibit current safety devices.

(3) AWARDS.—The Task Force shall award grant funds from the Farm Safety Fund on a majority vote of the Task Force. Either the Secretary of Agriculture or the Secretary of Health and Human Services may veto a disbursement.

(4) LIMITATION ON AMOUNT.—In awarding a grant to an entity under subsection (a), the Task Force may—

(A) make individual grants of up to $250,000; and

(B) make total awards of up to $500,000 within any 3-year period.

(d) APPLICATION.—To be eligible for a grant under subsection (a), an entity shall submit an application to the Task Force at such time, in such manner, and containing such agreements, assurances, and information, as the Task Force determines to be necessary to carry out this section. At a minimum, the application shall contain—

(1) a research proposal;

(2) an assurance that the entity will submit periodic reports to the Task Force containing a description of the progress made and findings obtained by the study; and

(3) an assurance that the entity will obtain at least 50 percent of the costs of conducting research from non-Federal funds.

(e) ELIGIBILITY.—The Task Force shall establish eligibility criteria for an entity, including a land grant university, to receive grants under subsection (a).

(f) FEDERAL SHARE.—The Federal share of grants provided under this section shall be not more than 50 percent.

(g) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Farm Safety Fund for purposes of carrying out this section $5,500,000 for each of the fiscal years 1991 through 1995.

SEC. ____11. GRANTS TO IMPROVE THE RECOGNITION, CARE, AND REHABILITATION OF FARM INJURIES.

(a) ESTABLISHMENT.—The Secretary of Health and Human Services, acting through the Centers for Disease Control and in consultation with the Task Force, shall make grants, on a competitive basis, to States and other entities to carry out activities to improve the identification, treatment, and rehabilitation of farm injuries and farm illnesses.

(b) USE OF GRANTS.—An entity shall use grants awarded under subsection (a) to—

(1) develop guidelines, standards, and protocols governing the identification, treatment, and rehabilitation of farm injuries and farm illnesses; and

(2) develop training materials and conduct training for paramedical, medical, nursing, and allied therapy personnel in the subject matter of the guidelines, standards, and protocols.

(c) AWARD OF GRANTS.—The Secretary of Health and Human Services shall award grants under this section in accordance with the priority established by the Task Force in accordance with section ____06(e). The Secretary of Agriculture may veto a disbursement.

(d) APPLICATION.—To be eligible for a grant under subsection (a), an entity shall submit an application to the Secretary of Health and Human Services at such time, in such manner, and containing such agreements, assurances, and information as the Secretary of Health and Human Services determines to be necessary to carry out this section. At a minimum, the application shall contain assurances that the entity will submit periodic reports to the Secretary of Health and Human Services and to the Task Force containing—

(1) guidelines, standards, and protocols developed in accordance with subsection (b)(1); and

(2) a description of the training conducted in accordance with subsection (b)(2).

(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section $15,000,000 for each of the fiscal years 1991 through 1995.

SEC. ____12. GRANTS TO STUDY INJURY MECHANISMS AND REHABILITATION PROCESSES.

(a) ESTABLISHMENT.—The Secretary of Health and Human Services, acting through the Director of the National Institutes of Health and in consultation with the Task Force, shall award grants to, and enter into cooperative agreements with, public and private nonprofit entities to support a full range of research and development projects concerning farm injury mechanisms, and healing and rehabilitation processes for farm injuries.

(b) USE OF GRANTS.—An entity shall use grants awarded under subsection (a) to establish research and development projects involving—

(1) basic and clinical research, including longitudinal and consortium-type multidisciplinary and clinical trials, on the causes of farm injuries;

(2) biomedical and behavorial studies on the causes of farm injuries;

(3) projects that take a multidisciplinary approach to preventing a specific farm injury; or

(4) demonstrations of advanced methods of diagnosing, preventing, treating, and managing farm injuries.

(c) AWARD OF GRANTS.—

(1) PEER REVIEW.—The Director of the National Institutes of Health shall obtain peer review of research proposals, and shall seek the widest participation of qualified scientists in the Federal Government, State governments, colleges and universities, and the private sector to perform the review. The results of the review shall be presented to the Director of the National Institutes of Health.

(2) PRIORITY.—The Director of the National Institutes of Health shall award grants under this section in accordance with the priority established by the Task Force in accordance with section ____06(e).

(d) APPLICATION.—To be eligible to receive a grant or enter into a cooperative agreement under this section, an entity shall submit an application to the Director of the National Institutes of Health at such time, in such manner, and containing such agreements, assurances, and information as the Director and the Task Force determine to be necessary to carry out this section. At a minimum, the application shall contain—

(1) a research proposal; and

(2) an assurance that the entity will submit periodic reports to the Director and the Task Force containing a description of the progress made and the findings obtained by the research or development project.

(e) CONSULTATION AND COORDINATION.—In carrying out the provisions of this section, the Director of the National Institutes of Health shall consult with the Director of the National Institute on Neurological and Communicative Disorders and Stroke, the Director of the National Institute of Arthritis and Musculoskeletal and Skin Diseases, the Secretary of Agriculture, and the Directors of other relevant Institutes and Public Health Service Agencies.

(f) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section $20,000,000 for each of fiscal years 1991 through 1995.

SEC. ____13. GRANTS TO INCREASE THE AVAILABILITY AND QUALIFICATIONS OF CLINICAL STAFF AND RESEARCHERS IN FARM OCCUPATIONAL HEALTH.

(a) ESTABLISHMENT.—The Secretary of Health and Human Services, in consultation with the Task Force, shall award grants to and enter into cooperative agreements with public and private nonprofit entities to increase the availability and qualifications of clinical staff and researchers in farm occupational health.

(b) USE OF GRANTS.—An entity shall use grants awarded under subsection (a) to establish programs to—

(1) attract new practitioners to careers in aspects of occupational medicine that include farm injury prevention, treatment, and rehabilitation; and

(2) attract new or young researchers to careers in fields involving clinical applications and research on the biomedical, behavorial, and rehabilitative aspects of farm injuries.

(c) AWARD OF GRANTS.—The Secretary of Health and Human Services shall award grants under this section in accordance with the priority established by the Task Force in accordance with section ____06(e).

(d) APPLICATION.—To be eligible to receive a grant or enter into a cooperative agreement under this section, an entity shall submit an application to the Secretary of Health and Human Services at such time, in such manner, and containing such agreements, assurances, and information as the Secretary of Health and Human Services and the Task Force determine to be necessary to carry out this section. At a minimum, the application shall contain assurances that the State will submit periodic reports to the Secretary of Health and Human Services and to the Task Force containing a description of the programs established in accordance with subsection (b).

(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section $2,000,000 for each of fiscal years 1991 through 1995.

SEC. ____14. FARM SAFETY EDUCATION.

(a) ESTABLISHMENT.—The Secretary of Agriculture, in consultation with the Task Force, shall make grants to States and other entities for the establishment of farm safety education programs concerning safety in the workplace.

(b) USE OF GRANTS.—Entities shall use grants awarded under subsection (a) to provide to farmers—

(1) information and training concerning—

(A) reduction of occupational injury and death rates;

(B) reduction and prevention of exposure to farm chemicals;

(C) reduction of agricultural respiratory diseases and dermititis;

(D) reduction and prevention of noise induced hearing loss;

(E) occupational rehabilitation of farmers with physical disabilities;

(F) farm accident rescue procedures for emergency medical technicians and nonprofessionals; and

(2) appropriate rural health and safety information resources from the Rural Information Center, established at the National Agricultural Library.

(c) The Secretary, in consultation with the Task Force shall award grants under this subparagraph based on a prioritized listing of farm injury and disease-related hazards. The Secretary shall establish specific accident and illness reduction objectives and procedures to evaluate the improvement in farm safety and health achieved under this paragraph. The prioritized listing and objectives shall be reviewed periodically by the Secretary.

"PRIORITIZATION OF EFFORTS.—Educational programs conducted with grants awarded under this paragraph shall systematically focus on prioritized health and accident hazards that affect persons in rural areas.".

(d) COORDINATION OF PROGRAMS.—Education programs funded by grants awarded in under subsection (a) shall be coordinated with State offices of rural health or other entities determined by the Secretary of Agriculture and the Task Force to be appropriate.

(e) AWARD OF GRANTS.—The Secretary of Agriculture shall award grants under this section in accordance with the priority established by the Task Force in accordance with section ____06(e).

(f) APPLICATION.—To be eligible for a grant under subsection (a), an entity shall submit an application to the Secretary at such time, in such manner, and containing such agreements, assurances, and information as the Secretary and the Task Force determine to be necessary to carry out this section. At a minimum, the application shall contain an assurance by any State applicant that, if the State contains a land-grant university,

including Tuskegee University, the State and the land-grant university shall mutually determine the type of rural health and safety education program needed in the State.

(g) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section, $5,000,000 for fiscal year 1991, $10,000,000 for fiscal year 1992, $15,000,000 for fiscal year 1993, and $20,000,000 for fiscal year 1994 and each subsequent fiscal year. Amounts appropriated under this subsection shall remain available until expended.

SEC. ____15. TERMINATION AND REPEAL.

(a) TERMINATION.—Effective September 30, 1995, the Task Force shall be abolished, and all programs established by this subtitle shall terminate.

(b) REPEAL.—Effective September 30, 1995, this subtitle shall be repealed.

LEVIN AMENDMENT NO. 2346

Mr. LEAHY (for Mr. LEVIN) proposed an amendment to the bill S. 2830, supra, as follows:

On page 981, between lines 11 and 12, add the following subtitle:

Subtitle D—Miscellaneous Pr)visions

SEC. 1771. BIOLOGICAL PESTICIDE HANDLING STUDY.

(a) STUDY.—Not later than September 30, 1992, the National Academy of Sciences shall conduct a study of the biological control programs and registration procedures utilized by the Food and Drug Administration, the Animal and Plant Health Inspection Service, and the Environmental Protection Agency.

(b) DEVELOPMENT OF PROCEDURES.—Not later than 1 year after the completion of the study under subsection (a), the agencies and offices described in such subsection shall develop and implement a common process for reviewing and approving biological control applications that are submitted to such agencies and offices that shall be based on the study conducted under such subsection and the recommendation of the National Academy of Sciences, and other public comment.

GRAHAM (AND OTHERS) AMENDMENT NO. 2347

Mr. LEAHY (for Mr. GRAHAM, for himself, Mr. ADAMS, Mr. INOUYE, Mr. MACK, and Mr. HOLLINGS) proposed an amendment to the bill S. 2830, supra, as follows:

On page 981, between lines 11 and 12, insert the following new subtitle:

Subtitle D—Minor Use Pesticides

CHAPTER 1—REGISTRATION OF PESTICIDES FOR AGRICULTURAL MINOR USES

SEC. 1771. DATA IN SUPPORT OF REGISTRATION.

Section 3(c)(2)(A) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136a(c)(2)(A)) is amended by inserting after the third sentence the following new sentence: "The Administrator shall not require a person to submit, in relation to a registration or reregistration of a pesticide for minor agricultural use under this Act, any field residue data from a goegraphic area where the pesticide will not be registered for such use.".

SEC. 1772. REDUCTION OR WAIVER OF FEES FOR PESTICIDES REGISTERED FOR MINOR AGRICULTURAL USES.

Section 4(i)(5) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136a-1(i)(5)) is amended by adding at the end thereof the following:

"In the case of a pesticide that is registered for a minor agricultural use, the Administrator may reduce or waive the payment of the fee imposed under this section if the Administrator determines that the fee would significantly reduce the availability of the pesticide for the use.".

SEC. 1773. VOLUNTARY CANCELLATION.

Section 6(f) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136d(f)) is amended—

(1) by striking paragraph (1) and inserting the following new paragraph:

"(1) VOLUNTARY CANCELLATION.—

"(A) A registrant may, at any time, request that a pesticide registration of the registrant be canceled or amended to terminate one or more pesticide uses.

"(B) Before acting on the request, the Administrator shall publish in the Federal Register a notice of the receipt of the request and provide for a 30-day period in which the public may comment.

"(C) In the case of a pesticide that is registered for a minor agricultural use, if the Administrator determines that the cancellation or termination of uses would adversely affect the availability of the pesticide for use, the Administrator—

"(i) shall publish in the Federal Register a notice of the receipt of the request and make reasonable efforts to inform persons who so use the pesticide of the request; and

"(ii) may not approve or reject the request until the termination of the 90-day period beginning on the date of publication of the notice in the Federal Register, and

"(iii) may waive the 90-day period upon the request of the registrant or if the Administrator determines that the continued use of the pesticide would pose an unreasonable adverse effect on the environment.

"(D) Subject to paragraph (3)(B), after complying with this paragraph, the Administrator may approve or deny the request,"; and

(2) by adding at the end the following new paragraph:

"(3) TRANSFER OF REGISTRATION OF PESTICIDES REGISTERED FOR MINOR AGRICULTURAL USES.—In the case of a pesticide that is registered for a minor agricultural use:

"(A) During the 90-day period referred to in paragraph (1)(C)(ii), the registrant of the pesticide may notify the Administrator of an agreement between the registrant and a person or persons (including persons who so use the pesticide) to transfer the registration of the pesticide, in lieu of canceling or amending the registration to terminate the use.

"(B) An application for transfer of registration, in conformance with any regulations the Administrator may adopt with respect to the transfer of the pesticide registrations, must be submitted to the Administrator within 30 days of the date of notification provided pursuant to subparagraph (A). If such an application is submitted, the Administrator shall approve the transfer and shall not approve the request for voluntary cancellation or amendment to terminate use unless the Administrator determines that the continued use of the pesticide would cause an unreasonable adverse affect on the environment.

"(C) If the Administrator approves the transfer and the registrant transfers the registration of the pesticide, the Administrator shall not cancel or amend the registration to delete the use, or rescind the transfer of the registration, during the 180-day period beginning on the date of the approval of the transfer, unless the Administrator determines that the continued use of the pesticide would cause an unreasonable adverse effect on the environment.

"(D) The new registrant of the pesticide shall assume the outstanding data and other requirements for the pesticide that are pending at the time of the transfer.".

SEC. 1774. PEST CONTROL.

Section 28 of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136w-3) is amended—

(1) by inserting "(a) IN GENERAL.—" before "The Administrator,"; and

(2) by adding at the end thereof the following new subsections:

"(b) MINOR USE PESTS.—

"(1) IN GENERAL.—The Administrator, in cooperation with the Secretary of Agriculture, shall identify—

"(A) pests affecting minor-use crops that must be brought under control; and

"(B) chemical control measures available to control the pests described in subparagraph (A) and biological and other alternative control measures available to control the pests.

"(2) REPORT.—The Secretary of Agriculture shall, not later than 180 days after the date of enactment of this section and annually thereafter, prepare a report and send the report to the Administrator. The report shall—

"(A) describe in detail the pests and measures of pest control described in subparagraphs (A) and (B) of paragraph (1);

"(B) identify areas of pest control at risk of losing effectiveness due to—

"(i) an insufficient number of registered pesticides; or

"(ii) resistance by a pest to pest control measures; and

"(C) describe in detail research efforts, including agricultural extension programs, to develop effective pest control to address the areas of pest control described in subparagraph (B).

"(D) identify those crops likely to be affected by the lack of access to pesticides for minor agricultural use and identity through research, * * * pest control measures.

"(c) INTEGRATED PEST MANAGEMENT.—The Administrator, in cooperation with the Secretary of Agriculture, shall develop approaches to the control of pests based on integrated pest management that respond to the needs of producers who use pesticides for minor agricultural uses.".

SEC. 1775. CONFORMING AMENDMENTS TO TABLE OF CONTENTS.

The table of contents in section 1(b) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. prec. 121) is amended—

(1) by striking out the item relating to section 6(f)(1) and inserting in lieu thereof the following new item:

"(1) Voluntary cancellation.";

(2) by adding at the end of the item relating to section 6(f) the following new item:

"(3) Transfer of registration of pesticides registered for minor agricultural uses.";

and

(3) by striking the items relating to section 28 and inserting the following new items:

"Sec. 28. Pest Control.

"(a) In general.

"(b) Minor use pesticides.
"(1) In general.
"(2) Report.
"(c) Integrated pest management.".

CHAPTER 2—INTER-REGIONAL RESEARCH PROJECT NUMBER 4 (IR–4 PROGRAM)

SEC. 1776. FINDINGS.

Congress finds that—

(1) the Inter-Regional Research Project Number 4 (IR–4 program) is a national research program intended to facilitate the registration of pesticides for minor agricultural uses where use volume does not justify commercial development;

(2) the main beneficiaries of the IR–4 project are growers who use the pesticides to produce crops that are eaten daily (such as vegetables, fruits, and nuts) and other plants (such as vegetables, fruits, and nuts) and other plants (such as ornamental plants, floral crops, trees, and turf grass), and consumers who benefit from a plentiful, safe, and inexpensive domestic food supply;

(3) as the result of insufficient funding, the IR–4 program has a backlog of 1,200 requests for new uses;

(4) section 4 of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 236a–1) requires the reregistration of over 4,000 currently labled uses;

(5) about 1,000 priority minor use needs will not be supported for reregistration by industry; and

(6) given this level of responsibility, the IR–4 program will be unable to fulfill its important mission without additional funding resources.

SEC. 1777. INTER-REGIONAL RESEARCH PROJECT NUMBER 4 (IR–4 PROGRAM).

Section 2 of the Act entitled "An Act to facilitate the work of the Department of Agriculture, and for other purposes", approved August 4, 1965 (7 U.S.C. 450i), is amended—

(1) by redesignating subsections (e) through (i) as subsections (f) through (j), respectively;

(2) by inserting after subsection (d) the following new subsection:

"(e)(1) The Secretary of Agriculture shall establish an Inter-Regional Research Project Number 4 hereinafter referred to in this section as the 'IR–4 Program') to assist in the collection of residue and efficacy data in support of—

"(A) the registration or reregistration of minor use pesticides under the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136 et seq.); and

"(B) tolerances for residues of minor use chemicals in or on raw agricultural commodities under sections 408 and 409 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 846a).

"(2) The Secretary shall carry out the IR–4 program in cooperation with the Administrator of the Environmental Protection Agency, State agricultural experiment stations, colleges and universities, extension services, private industry, and other interested parties.

"(3) In carrying out the IR–4 program, the Secretary shall give priority to registrations, reregistrations, and tolerances for pesticide uses related to the production of agricultural crops for food use.

"(4) As part of carrying out the IR–4 program, the Secretary shall—

"(A) participate in research activities aimed at reducing residues of pesticides registered for minor agricultural use;

"(B) develop analytical techniques applicable to residues of pesticides registered for minor agricultural use, including automation techniques and validation of analytical methods; and

"(C) coordinate with other programs within the Department of Agriculture and the Environmental Protection Agency designed to develop and promote biological and other alternative control measures.

"(5) The Secretary shall prepare and submit, to appropriate Committees of Congress, a report on an annual basis that contains—

"(A) a listing of all registrations, reregistrations, and tolerances for which data has been collected in the preceding year;

"(B) a listing of all registration, reregistrations, and tolerances for which data collection is scheduled to occur in the following year, with an explanation of the priority system used to develop this list;

"(C) a listing of all activities the IR–4 program has carried out pursuant to paragraph (4).

"(6) The Secretary shall submit to Congress within one year a report detailing the feasibility of requiring recoupment of the costs of developing residue data for registrations, reregistrations or tolerances under this program. This recoupment shall only apply to those registrants which make a profit on said registration, reregistration or tolerance subsequent to residue data development under this program. This report shall include:

(a) an analysis of possible benefits to the IR–4 program of such a recoupment;

(b) an analysis of the impact of such a payment on the availability of registrants to pursue registrations or reregistrations of minor use pesticides; and

(c) recommendations for implementation of such a recoupment policy.

"(7) There are authorized to be appropriated $25,000,000 for fiscal year 1991, and such sums are as necessary for subsequent fiscal years to carry out this section."

"(3) By inserting in subsection (g) following "subsection (b)" the phrase "and subsection (e).".

SYMMS AMENDMENT NO. 2348

Mr. LEAHY (for Mr. SYMMS) proposed an amendment to the bill S. 2830, supra, as follows:

On page 545, afte line 23, insert the following new subsection:

"(c) EFFECTIVE CONTROL ON EXISTING CONTRACTS.—(1) Not later than 180 days after enactment of the Food, Agriculture, Conservation, and Trade Act of 1990, the Secretary of Agriculture shall identify the land already enrolled in the enviromental conservation acreage reserve program under chapter 2 of subtitle D which is most likely to incur a crop pest infestation that adversely impacts surrounding commercial farm land.

(2) Notwithstanding the requirements of subtitle D, immediately after complying with paragraph (1) the Secretary of Agriculture may—

(A) offer to the owners or operators who hold contracts for land identified under paragraph (1) the following terms for renegotiation of those contracts:

(i) continuation of the contract unaltered except that the responsibility for controlling crop pests on contracted lands as necessary to prevent adverse economic damage to surrounding farm land shall be assumed by the contract holder, or

(ii) termination of the contract with no further annual rental payment, and with a penalty not to exceed one hundred percent of the cost-sharing payment made pursuant to subsection 1234(a), as determined by the Secretary of Agriculture; or

(B) establish any other procedures to control such pest infestations on such lands.

Upon establishing such terms or procedures, the Secretary may specify a period of time, not to exceed three months, in which an owner or operator must notify the Secretary of which terms or procedures will be accepted.

(3) An owner or operator offered renegotiation terms pursuant to paragraph (2) who notifies the Secretary of Agriculture of acceptance of the terms of subparagraph (2)(A)(i), shall receive an increased annual rental payment as determined by the Secretary to be fair and equitable.

(4) At the Secretary's descretion, the control of insect pests on acreage identified in paragraph (1) to avoid adversely impacting surrounding commercial farmland may be considered a conservation measure or practice for the purposes of subsection 1234(b).

SYMMS (AND McCLURE) AMENDMENT NO. 2349

Mr. LEAHY (for Mr. SYMMS, for himself and Mr. MCCLURE) proposed an amendment to the bill S. 2380, supra, as follows:

On page 466, line 16, insert the following:
"(10) AVOIDANCE OF PREFERENTIAL APPLICATION.—When using the authorities of this section to promote the export of wheat, the Secretary shall make reasonable efforts to avoid giving a preference to one class of wheat disproportionately more than another."

SARBANES AMENDMENT NO. 2350

Mr. LEAHY (for Mr. SARBANES) proposed an amendment to the bill S. 2380, supra, as follows:

On page 516, line 21, strike out "and".

On page 516, line 23, strike out both periods and the end quotation marks and insert in lieu thereof "; and".

On page 516, after line 23, insert the following new subparagraph:

"(G) take into consideration the existence of watersheds experiencing actual and significant adverse water quality of habitat effects related to agricultural production activities, including such environmentally sensitive areas as the basins of the Chesapeake Bay and the Great Lakes, particularly where there are active State programs working to protect such watersheds. In utilizing the authority granted under this subparagraph, the Secretary shall attempt to maximize water quality and habitat benefits in such watersheds by promoting a significant level of enrollment of lands containing watersheds in the program under this chapter by whatever means the Secretary determines appropriate and consistent with the purposes of this chapter.".

HEFLIN (AND OTHERS) AMENDMENT NO. 2351

Mr. LEAHY (for Mr. HEFLIN, for himself, Mr. MCCONNELL, Mr. BAUCUS, Mr. CONRAD, Mr. ROCKEFELLER, Mr. BINGAMAN, Mr. PRESSLER, Mr. MITCHELL, Mr. LEAHY, Mr. SANFORD, Mr. HARKIN, and Mr. SHELBY) proposed an amendment to the bill S. 2830, supra, as follows:

Viz:

On page 1081, after line 10, add the following new title:

TITLE ____—RURAL DEVELOPMENT

SEC. ____01. SHORT TITLE.

This title may be cited as the "Rural Partnerships Act of 1990".

SEC. ____02. FINDINGS AND PURPOSE.

(a) FINDINGS.—Congress finds that—

(1) the economic well-being of rural America is vital to overall national growth and prosperity;

(2) many rural areas suffer from a lack of industrial and business diversity;

(3) rural poverty and unemployment rates are significantly higher than metropolitan rates, and rural per capita income is substantially lower than metropolitan per capita income;

(4) the lack of access to advanced telecommunications in rural areas impedes economic growth; and

(5) a more robust rural economy will make the United States more competitive in world markets.

(b) PURPOSE.—It is the purpose of this title to promote a national rural development strategy, through procedures flexible enough to allow for regional and local differences, to promote the growth and economic diversification of rural America, to improve rural telecommunications, and to increase business, educational, and employment opportunities in rural America.

Subtitle A—Rural Business and Job Creation

CHAPTER 1—RURAL PARTNERSHIPS INVESTMENT BOARD

SEC. ____05. DEFINITIONS.

As used in this chapter:

(1) APPROVED LOCAL BUSINESS.—The term "approved local business" means a local business that is approved to receive assistance from the revolving fund of an eligible entity as provided under the provisions of this chapter.

(2) ELIGIBLE ENTITY.—The term "eligible entity" means—

(A)(i) a nonprofit private corporation or a public entity that is—

(I) the governing body of each public regional organization (such as the governing body of an economic development district) that is chartered or otherwise organized under State law for the purpose of promoting economic development;

(II) the agency of each State that is primarily responsible for rural economic development programs within the State;

(III) the governing body of a county or other political subdivision of a State;

(IV) the governing body of a town or township within a State; or

(V) an incorporated public organization or a nonprofit private community development corporation, or similar nonprofit private organization, that is chartered or otherwise organized under State law for the purpose of promoting economic development; or

(ii) an Indian tribe (as defined in section 4(b) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b)), any Indian organization or entity chartered under the Act of June 18, 1934 (25 U.S.C. 1001 et seq.), commonly known as the "Indian Reorganization Act", or any tribal organization (as defined in the section 4(c) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b(c)); and

(B) an entity described in subparagraph (A) that—

(i) possesses the powers reasonably necessary to perform the functions and activities described in this chapter;

(ii) has a professional staff and management ability (including adequate accounting, legal, and business servicing abilities or experience); and

(iii) meets any other requirements established by the Board to carry out this chapter.

(3) INVESTMENT BOARD.—The term "Investment Board" or "Board" means the Rural Partnerships Investment Board established in section ____06(a).

(4) LOCAL BUSINESS.—The term "local business" means—

(A) a business concern, located in a rural area, that—

(i) is incorporated or otherwise organized under State law so that financial records and accounts are maintained regarding the business concern separate and apart from records and accounts not related to that business concern; and

(ii) is independently or cooperatively (not including borrowers under the Rural Electrification Act of 1936) owned and operated as defined by the Board; or

(B) an individual who plans to organize and operate an entity of the type described in subparagraph (A); and

that meets any additional requirements that are established by the Board to carry out the intent of this Act.

(5) RURAL AREA.—The term "rural area" means all territory of a State that is not within the outer boundary of any city or town, having a population of 20,000 or more based on the latest decennial census of the United States, and any neighboring urbanized area as defined by the Board.

(6) RURAL FUND.—The term "Rural Fund" or "Fund" means the Rural Business Investment Fund established under section ____07(a).

(7) SECRETARY.—The term "Secretary" means the Secretary of Agriculture, unless otherwise specified in this Act.

(8) STATE.—The term "State" means each of the 50 States of the United States.

SEC. ____06. RURAL PARTNERSHIPS INVESTMENT BOARD.

(a) ESTABLISHMENT.—There is established a "Rural Partnerships Investment Board" to provide lines of credit to eligible entities to enable such entities to establish, maintain, or expand revolving funds that are used to make or guarantee loans, or to make capital investments in new or expanding local businesses in conjunction with loans or investments made by banks (as defined in section 2(c) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(c))), insured savings and loan institutions (as defined in title IV of the National Housing Act, as amended (12 U.S.C. 1724 et seq.)), State owned banks whose deposits are backed by the full faith and credit of the State, or community development credit unions chartered by the National Credit Union Administration under the authority of the Federal Credit Union Act (12 U.S.C. 1751 et seq.).

(b) BOARD OF DIRECTORS.—

(1) IN GENERAL.—The Board of Directors of the Investment Board shall consist of—

(A) the Administrator of the Rural Electrification Administration;

(B) the Administrator of the Farmers Home Administration;

(C) the Administrator of the Extension Service of the Department of Agriculture; and

(D) two members who shall be experienced in rural development and related matters to be appointed by the President with the advice and consent of the Senate, of which each member shall be from a separate political party.

(2) CHAIRPERSON.—The Chairperson of the Board shall be elected by the members of the Board from among the Board members who are Administrators under subparagraphs (A) through (C) of paragraph (1), and shall serve for a 2-year period. Such Chairperson may serve consecutive terms.

(3) VACANCIES.—Vacancies on the Board shall be filled in the same manner as the vacant position was previously filled.

(4) CHIEF EXECUTIVE OFFICER.—A chief executive officer shall be selected by the Board and shall serve at the pleasure of the Board.

(5) QUORUM.—A quorum shall consist of three members of the Board. All decisions made by the Board shall require an affirmative vote of a majority of the members.

(6) COMPENSATION.—Members of the Board—

(A) specified under subparagraphs (A), (B), and (C) of paragraph (1) shall receive reasonable allowances for necessary expenses of travel, lodging, and subsistence incurred in attending meetings and other activities of the Investment Board, as set forth in the bylaws issued by the Board of Directors, except that such level shall not exceed the maximum fixed by subchapter 1 of chapter 57 of title 5, United States Code, for officers and employees of the United States; and

(B) appointed under subparagraph (D) of paragraph (1) shall receive compensation for the time devoted to meetings and other activities at a daily rate not to exceed the daily rate of compensation prescribed for level III of the Executive Schedule under section 5314 of title 5, United States Code, and reasonable allowances for necessary expenses of travel, lodging, and subsistence incurred in attending meetings and other activities of the Investment Board, as set forth in the bylaws issued by the Board of Directors, except that such level shall not exceed the maximum fixed by subchapter 1 of chapter 57 of title 5, United States Code, for officers and employees of the United States.

(7) RULES AND RECORDS.—The Board shall adopt such rules and procedures as it may consider appropriate for the transaction of the business of the Investment Board, and shall keep permanent and accurate records and minutes of its acts and proceedings.

(c) POWERS OF THE INVESTMENT BOARD.—The Investment Board shall be a body corporate that shall have the power to—

(1) operate under the direction of its Board;

(2) adopt, alter, and use a corporate seal, which shall be judicially noted;

(3) provide for one or more officers, employees, and agents, as may be necessary, define their duties, and require surety bonds or make other provisions against losses occasioned by acts of such persons;

(4) hire, promote, compensate, and discharge officers and employees of the Investment Board, without regard to title 5, United States Code, except that no such officer or employee shall receive an annual rate of basic pay in excess of the rate prescribed for level III of the Executive Schedule under section 5314 of title 5, United States Code;

(5) prescribe by its Board its bylaws, that shall be consistent with law, and that shall provide for the manner in which—

(A) its officers, employees, and agents are selected;

(B) its property is acquired, held, and transferred;

(C) its general operations are to be conducted; and

(D) the privileges granted by law are exercised and enjoyed;

(6) with the consent of any executive department or independent agency, use the information, services, staff, and facilities of such in carrying out this chapter;

(7) enter into contracts and make advance, progress, or other payments with respect to such contracts;

(8) sue and be sued in its corporate name, and complain and defend in courts of competent jurisdiction;

(9) acquire, hold, lease, mortgage, or dispose of, at public or private sale, real and personal property, and otherwise exercise all the usual incidents of ownership of property necessary and convenient to its operations;

(10) modify or consent to the modification of any contract or agreement to which it is a party or in which it has an interest under this chapter;

(11) make such rules and regulations as the Board determines necessary and appropriate to carry out the authority vested in the Board under this Act;

(12) procure the temporary (not in excess of 2 years) or intermittent services of experts or consultants or organizations thereof, without regard to the civil service and classification laws and without regard to section 5 of title 41, at rates not to exceed the daily equivalent of the highest rate payable under section 5332 of title 5, United States Code, including traveltime, and while such individual is away from the home or regular place of business of such individual, travel expenses as authorized under section 5703 of title 5, United States Code; and

(13) exercise other powers as set forth in this chapter, and such other incidental powers as are necessary to carry out its powers, duties, and functions in accordance with this chapter.

SEC. ____07. ESTABLISHMENT OF INVESTMENT FUND.

(a) ESTABLISHMENT.—

(1) IN GENERAL.—There is established in the Treasury of the United States a fund for the use of the Board in carrying out the provisions of this chapter that shall be known as the "Rural Business Investment Fund".

(2) AVAILABILITY.—The Fund established under paragraph (1) shall be available to the Board to provide lines of credit for revolving funds to be operated by approved eligible entities to serve local businesses in rural areas.

(b) USE.—

(1) LINES OF CREDIT.—Amounts contained in the fund established under subsection (a) shall be used by the Board to provide lines of credit in amounts determined appropriate by the Board, but in no event shall any such line of credit exceed $750,000 annually (up to a total amount of $2,250,000) to an approved eligible entity. Each line of credit shall be made available over a period of time established by the Board for each such entity, but in no event shall any such period of time extend beyond the date on which the Investment Board is terminated under section ____08(n).

(2) EXCEPTION.—Notwithstanding paragraph (1), if the approved eligible entity is the agency of any State that is primarily responsible for the rural economic development programs within such State, the Board may provide a line of credit to such agency in an amount that shall not exceed $1,250,000 annually (up to a total amount of $3,750,000) in the manner described in paragraph (1).

(3) AMOUNTS DRAWN FROM LINE.—Amounts drawn from each line of credit by each approved eligible entity shall be used solely as provided under this chapter and shall be drawn only as needed to provide loans, investments, or to carry out a guarantee.

(c) APPLICATIONS OF ELIGIBLE ENTITIES FOR LINES OF CREDIT.—

(1) FEDERAL REGISTER NOTICES.—The Board shall publish notices of solicitations for applications for lines of credit in the Federal Register and such notices shall contain—

(A) the application procedures established by the Board;

(B) the application requirements of paragraph (3);

(C) the deadlines for submission of applications (which in no event shall be less than 150 days after the publication of the applicable notice);

(D) a copy of all available response forms;

(E) a summary of the functions of the Board regarding applications; and

(F) other information determined appropriate by the Board.

(2) SUBMISSION AND CONSIDERATION.—An eligible entity that desires to receive a line of credit under this chapter shall submit an application to the Board at such time, in such form, and containing such information and documentation, including a description of the areas to be served, as the Board shall prescribe under paragraph (1), and the Board shall consider each such application based on the requirements of this chapter.

(3) ELIGIBLE ENTITY.—

(A) MATCHING FUNDS OR LETTERS OF INTENT.—In order for an application to be considered for approval by the Board for a line of credit, each eligible entity that submits an application shall—

(i) certify in writing that it shall use such funds as part of a revolving fund to invest in, and make or guarantee loans to, local businesses in accordance with this chapter; and

(ii)(I) agree to provide matching funds (Federal funds shall not be used to satisfy such matching requirement) in amounts that are at least equal to the amount of the line of credit to be provided by the Board, that shall be in the form of—

(aa) cash or cash equivalents; or

(bb) letters of credit in favor of the eligible entity issued or submitted by banks, savings and loan associations, insurance companies, similar Federally regulated financial institutions, State owned banks, local or State government or private philanthropic foundations, as determined appropriate and acceptable by the Board; or

(II) demonstrate, through procedures determined appropriate and acceptable by the Board, that banks, savings and loan associations, or community development credit unions, as defined in section ____06(a), are prepared to participate with the eligible entity in a lending, guarantee, or investment program for the benefit of local businesses, and that the total financial commitment demonstrated by the letters of intent or other documents is at least equal to the value of the line of credit for which the eligible entity is applying.

(B) EXCEPTION FOR CERTAIN ELIGIBLE ENTITIES.—

(i) LOW PER CAPITA INCOME AREAS.—If the average per capita income level of the identified rural areas served by an eligible entity is less than 70 percent of the national average per capita income for the most recent year for which such information is available, each such eligible entity shall only be required to match 50 percent of the funds provided by the Board in the same manner as described in paragraph (3)(A)(ii) (I) or (II). A list of the average per capita income and population of each county in the United States that contains rural areas, and the national average per capita income for such year, shall be published in the Federal Register and otherwise made available by the Board to the public.

(ii) INDIAN TRIBAL COUNCIL PARTICIPATION.—

(I) IN GENERAL.—Community or tribal development corporations operated by Federally recognized tribal councils that desire to administer a local revolving fund may participate in the program established under this chapter if such corporations meet the rules and procedures established under this chapter, that are determined by the Board to be pertinent.

(II) ESTABLISHMENT OF SPECIAL RULES AND PROCEDURES.—

(aa) IN GENERAL.—Not later than 220 days after the date of enactment of this Act, the Board shall establish rules and procedures to enable such community or tribal development corporations serving rural areas located on Federally recognized reservations (including former reservations in Oklahoma) to participate in the program established under this chapter through the operation of revolving funds used for investing in, and making or guaranteeing loans to, new or expanding local businesses.

(bb) CONTENTS.—Rules and procedures established under item (aa) shall be established to ensure that development corporations that receive Federal lines of credit under this chapter serve needy reservation areas, including areas that have low per capita income, high unemployment, high poverty rates, depressed or lagging local economies, and other factors determined appropriate by the Board.

(III) MATCHING REQUIREMENTS.—The requirements of subsection (c)(3) and section ____08(d) concerning the provision of matching funds and the requirement of partnerships for loans, and any related matching requirements, shall not apply to the development corporations receiving assistance under this clause.

(4) REAPPLICATION FOR LINES OF CREDIT.—

(A) IN GENERAL.—An eligible entity that has received a line of credit under this section may reapply in subsequent years for additional lines of credit if the Board makes a determination that—

(i) the applicant has demonstrated that the funds previously allocated under such line of credit have been substantially obligated and that additional demand for lending, investment, or guaranteed funding exists in the service area of the applicant;

(ii) the applicant will meet the matching requirements under subsection (c)(3); and

(iii) the applicant has administered the revolving fund consistent with this chapter and has the capacity to administer additional funds in the same manner.

(B) PRIORITY.—Eligible entities qualified to receive an initial line of credit or that will serve a service area not served by another entity shall receive priority over any applicant seeking a second or subsequent line of credit.

(5) MONITORING COMPLIANCE.—The Board shall establish procedures to monitor the compliance of each eligible entity partici-

pating in the program authorized by this chapter with the requirements of this chapter.

(6) ELIGIBLE ENTITY REVOLVING FUND REQUIREMENT.—To be eligible to receive a line of credit from the Rural Fund, the applicant eligible entity shall—

(A) demonstrate its ability or potential capacity to make sound business, lending, and investment decisions and to provide business counseling and technical assistance;

(B) demonstrate its ability to operate consistent with the requirements of this chapter and to increase the availability of credit in rural areas to promote the creation or expansion of viable businesses in rural areas;

(C) identify the proposed service area and define a strategy for serving that area that should describe such characteristics as similar industrial, labor, or other markets, similar geographic or socioeconomic conditions, or other related considerations, and, to the extent that such area includes any towns or townships, such towns or townships shall be served in their entirety;

(D) provide an assurance that its service area will consist of—

(i) any or all rural areas within a county where the median household income of each such county is less than the Statewide nonmetropolitan median household income; or

(ii) identified rural areas within a county, in which the median household income of each such county is equal to or greater than the Statewide nonmetropolitan median household income, if the median household income of each rural city, town or township to be served, and each separate contiguous rural area to be served, is less than the Statewide nonmetropolitan median household income or identified rural areas within a State in which the average per capita income is less than 70 percent of the nationwide per capita income; or

(iii) any county where the net migration population loss is at least 5 percent or greater from April 1, 1980, to July 1, 1987, as reported by the Census Bureau of the Department of Commerce; and

(E) provide a notification that an application has been filed with the Board to each county or other local unit of government having jurisdiction over some or all of the proposed service area under procedures developed by the Board.

(7) FACTORS IN APPROVAL OF APPLICATIONS.—In determining which applications to approve, and the maximum amount of funds to be offered in each line of credit, the Board shall grant a preference to eligible entities—

(A) that have experience in serving local credit or equity needs and in making sound business and investment decisions, or that have the ability to serve such needs and make such decisions;

(B) whose boards of directors, or governing bodies if no such board exists, are composed of a cross-section of individuals (such as individuals with business, community development or regional development backgrounds, or individuals who are State, local or county government officials, or individuals involved in banking, financial, or other investment activities);

(C) that are likely to stimulate significant job creation or retention and new business creation or business expansion per dollar of funds provided under this section;

(D) that submit applications that demonstrate the ability and willingness to provide continuing technical and management assistance, training, financial and business guidance, and planning, to local businesses;

(E) that demonstrate that the activities of the eligible entity are consistent with State, county or local goals, whichever is applicable, regarding long-term economic growth and community development;

(F) that submit applications containing a comprehensive investment strategy, developed in consultation with the applicable State, regional council or government, and county or other general purpose unit of local government; and

(G) that propose to serve a service area—

(i) whose unemployment or poverty rates exceed the Statewide nonmetropolitan average;

(ii) with special needs arising from actual or threatened severe unemployment arising from economic dislocation; or

(iii) that includes any county in which the net migration population loss is at least 5 percent or greater from April 1, 1980, to July 1, 1987, as reported by the Census Bureau of the Department of Commerce.

(8) GEOGRAPHIC SPREAD.—

(A) IN GENERAL.—In awarding lines of credit under this section the Board shall attempt, as much as reasonably practicable and consistent with sound financial judgment, to assure that all rural regions of the United States benefit from such awards.

(B) MINIMUM AMOUNT OF FUNDS.—After considering the availability of qualified applications, and if consistent with good investment practices and the other requirements of this chapter, the Board shall approve the application of at least one eligible entity in each of at least 45 States. The Board shall, to the maximum extent practicable and appropriate, ensure that eligible entities that are approved by the Board in any given State receive at least $750,000 (per State) out of the funds provided under subsection (d). In addition, to the maximum extent practicable the Board shall approve the applications of at least two eligible entities in each State containing an approved eligible entity.

(C) MAXIMUM AMOUNT OF FUNDS.—The total amount of funds provided under this chapter to eligible entities in any State shall not exceed $10,000,000.

(D) SPECIAL PROGRAM.—

(i) IN GENERAL.—The Board shall issue regulations to establish a program that targets the benefits of the Federal lines of credit provided under this section to those rural areas and residents with special needs.

(ii) LIMITS.—If consistent with sound investment practices, not less than 5 percent, nor more than 15 percent, of the funds appropriated under subsection (d) shall be issued to eligible entities that will serve—

(I) local businesses located in very distressed rural areas, as defined by the Board, that may include areas with special needs arising from actual or threatened severe unemployment which results from economic dislocation; and

(II) local businesses that provide beneficial services to rural residents such as improved medical, hospital, or health care, licensed day care facilities or centers, improved services for the handicapped, the disabled, the elderly or other needy individuals, improved educational opportunities, improved public transportation services for needy individuals, or other related services as determined appropriate by the Board.

(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated $100,000,000 in fiscal year 1991, $86,000,000 in fiscal year 1992, $67,000,000 in fiscal year 1993, and $47,000,000 in fiscal year 1994 to be made available to the Rural Fund and the Board for the purpose of carrying out this chapter. Amounts appropriated under this subsection shall remain available until expended or until the Board is terminated.

(e) RELOCATION AND REFINANCING.—The Board shall establish rules and procedures to prohibit eligible entities from using the assistance received under this chapter for loans and investments, or for issuing guarantees, that would—

(1) facilitate the relocation of a local business from one community to another;

(2) refinance the existing debt of a local business, except that such refinancing may be undertaken with such assistance if it is undertaken in conjunction with a substantial expansion effort by the local business; or

(3) significantly reduce the viability of an existing business engaged in substantially the same business activities in the same community.

SEC. ____08. LOCAL REVOLVING FUNDS.

(a) ESTABLISHMENT.—

(1) IN GENERAL.—Each eligible entity approved by the Board to participate in the program established under this chapter shall establish a local revolving fund account in which to deposit—

(A)(i) amounts received from the Fund under this chapter;

(ii) any local matching funds described under section ____07(c)(3)(A); and

(iii) any profits or income, repayments of loans, proceeds from the sale of equity investments, or other gains or returns on investments or loans, derived from the activities of the revolving fund established under this subsection; less

(B) reasonable operating expenses or losses incurred in administering such fund.

(2) PLACE OF ESTABLISHMENT.—Each local revolving fund established under this subsection may be established in one or more member banks of the Federal Reserve System, any Federally insured State nonmember bank (as defined in section 3(b) of the Federal Deposit Insurance Act (12 U.S.C. 1813(b))), or any State owned bank whose deposits are backed by the full faith and credit of the State, and the funds, except as used as authorized in subsection (b), shall be held in cash and receive interest or be invested in direct obligations of the United States or in obligations guaranteed by the United States or an agency thereof.

(b) USE OF FUND.—Amounts in a local revolving fund may be used—

(1) to provide loans or equity capital, or loan guarantees, to approved local businesses as authorized in this chapter, under procedures established by the Board;

(2) to cover the costs of providing training, business or financial planning, or management or technical assistance to approved local businesses in amounts that do not exceed amounts or levels described in standards established by the Board;

(3) if financial investments are made in the eligible entity in accordance with section ____07(c)(3)(A)(ii)(I) (aa) or (bb), to provide for a return of capital to non-Federal investors in the revolving fund, except that if such revolving fund experiences capital or other losses the share of returned capital under this paragraph shall be proportionately, or otherwise appropriately reduced to reflect such losses, under procedures established by the Board; or

(4) to cover reasonable operating or capital expenses, losses, or for other charges as prescribed in rules or standards established by the Board.

(c) DECISIONS CONCERNING FUNDING.—Eligible entities that receive a line of credit under section _____07 shall make case-by-case determinations concerning applications submitted by each local business for loans, equity capital or loan guarantees, under general procedures and requirements established by the Board.

(d) REQUIREMENT OF PARTNERSHIPS FOR LOANS OR INVESTMENTS.—Funds in each local revolving fund shall be loaned, invested, or used to provide a guarantee, only if one or more banks, savings and loan institutions, or community development credit unions, under procedures established by the Board, match each investment or loan made by each such revolving fund to each such local business, on at least a dollar-for-dollar basis, or provide the funds for the loans that are guaranteed by such local revolving fund.

(e) INVESTMENT SIZE LIMITS.—

(1) IN GENERAL.—

(A) AMOUNT PER LOCAL BUSINESS.—The amount of Federal funds provided from any revolving fund for use in making loans or investments, or available regarding each guarantee, shall not exceed $250,000 in any given calendar year, to any single approved local business or to other local businesses that are financially connected or otherwise related to such local business as defined by the Board.

(B) OTHER SOURCES.—The provisions of this chapter shall not limit the total amount of loans, investments, or guarantees from sources other than eligible entities that each local business may receive.

(C) PROCEDURES.—In implementing this paragraph the Board shall develop procedures to establish, impute, or determine the amount of Federal funds that shall be considered available in the revolving funds created by approved eligible entities.

(2) INELIGIBILITY.—Any local business that employs 100 or more employees shall not be eligible to receive assistance from a local revolving fund that receives assistance under this chapter.

(f) SUBORDINATED INTEREST OF LOCAL REVOLVING FUND.—If a bank, savings and loan association, or a community development credit union has made an investment or loan in a local business in conjunction with an investment or loan made out of the revolving fund of an approved eligible entity, the amount invested or loaned by such revolving fund in such local business may be subordinated, to any degree, and in any manner.

(g) OTHER INVESTORS.—A bank, savings and loan association, community development credit union, similar Federally regulated financial institution, State owned bank, local or State government, private philanthropic foundation, or other entity that contributes capital to an eligible entity that receives Federal assistance under this chapter may establish contractual arrangements with such eligible entity concerning the return of such investments in the local revolving fund consistent with subsection (b)(3).

(h) ADDITIONAL CAPITAL.—The Board shall promulgate regulations that provide each participating eligible entity with a sufficient amount of time to obtain additional capital, lines of credit, or letters of intent, if any investor, pursuant to the contract with the eligible entity under subsection (g), withdraw some or all of its investment.

(i) CONTINUATION OF LINE OF CREDIT.—A line of credit provided to an approved eligible entity under section _____07 for use in a local revolving fund shall continue to be available to be drawn upon until the Investment Board is terminated or until the line of credit is canceled, revoked, or suspended by the Board or the Secretary as described in section _____09 or subsection (l).

(j) CONTINUATION OF BUSINESS PROMOTION ACTIVITIES.—The Federal assistance provided to each eligible entity under this chapter shall become the property of each such entity on the termination of the Investment Board if—

(1) the eligible entity that administers the local revolving fund has operated the fund in a manner that is consistent with this chapter as determined by the Board; and

(2) the eligible entity contracts with the Secretary to continue to provide lending, investment, and guarantee assistance consistent with this chapter.

(k) DEVELOPMENT OF MONITORING PROCEDURES.—On the date on which the Investment Board is terminated, the Secretary shall act in place of the Board and shall monitor the operations of eligible entities that receive Federal assistance under this chapter which continue to exist on the date the Board is terminated.

(l) REFUND OF FUNDS.—Notwithstanding subsection (j), and in addition to any actions taken under section _____09, if the Secretary finds that the purpose of any eligible entity is no longer to promote business development in a manner consistent with this chapter, the Secretary shall revoke the approval of the eligible entity, obtain a refund in an amount equal to the amount of funds drawn out of the Federal line of credit issued to the eligible entity together with an appropriate amount of interest on such amount, as determined by the Secretary, and succeed to, or acquire the rights, privileges, assets, investment and payments due from such eligible entity as described in section _____09(h).

(m) ANNUAL REPORTS TO THE BOARD.—

(1) IN GENERAL.—Each eligible entity that receives assistance under this chapter shall annually prepare and submit to the Board, at such time, and in such form as the Board may require, a report describing the financial condition of the eligible entity, and the investments, cash revenues, income from investments, loans made, equity positions taken, guarantees issued, losses sustained or taken, any training, business, or technical assistance, or financial planning provided, operating expenses, loss rates, and such other matters as the Board determines appropriate concerning the eligible entity.

(2) POST TERMINATION.—After the Board terminates under subsection (n), the reports required under paragraph (1) shall be submitted to the Secretary who shall stand in the same position as the Board.

(n) TERMINATION OF BOARD.—The Investment Board established by section _____06(a) shall terminate on the last day of the 5th calendar year following the date of enactment of this chapter and the Secretary shall act in place of such Board.

SEC. _____09. COMPLIANCE AND ENFORCEMENT.

(a) REVOCATION OR CANCELLATION OF LINE OF CREDIT AND REFUND.—

(1) GROUNDS FOR REVOCATION.—A line of credit shall be revoked or suspended by the Board, and a full or partial refund of the Federal investment, together with an appropriate amount of interest, shall be requested by the Board—

(A) for false statements knowingly made in any written statement required under this chapter, or under any regulation or Federal Register notice issued under this chapter;

(B) if any written statement required under this chapter, or under any regulation or Federal Register notice issued under this chapter, fails to state a material fact necessary in order to make the statement not misleading in the light of the circumstances under which the statement was made;

(C) for willful or repeated violation of, or willful or repeated failure to observe, any provision of this chapter;

(D) for willful or repeated violation of, or willful or repeated failure to observe, any rule or regulation authorized under this chapter; or

(E) for violation of, or failure to observe, any cease and desist order issued by the Board under this subsection.

(2) CANCELLATION OF LINE OF CREDIT.—Notwithstanding any actions taken under paragraph (1), the Board may cancel any prospective payments to be made from any approved line of credit under this chapter if the Board determines that the eligible entity participating in the program established under this chapter made investments or acted in a manner that was inconsistent with the provision of this chapter.

(3) CEASE AND DESIST ORDERS.—Where an eligible entity has not complied with any provision of this chapter, or of any regulation issued pursuant thereto, or is engaging or is about to engage in any acts or practices that constitute or will constitute a violation of such chapter or regulation, the Board may order such entity to cease and desist from such action or failure to act. The Board may further order such entity to take such action or to refrain from such action as the Board determines necessary to ensure compliance with this chapter and the regulations issued thereunder.

(4) ORDER TO SHOW CAUSE, CONTENTS, AND HEARING.—

(A) ORDER.—Prior to revoking or suspending a line of credit under paragraph (1) or (2), or issuing a cease and desist order under paragraph (3), the Board shall serve on the eligible entity an order to show cause why an order revoking or suspending the line of credit or a cease and desist order should not be issued.

(B) CONTENTS.—An order to show cause under subparagraph (A) shall contain a statement of the matters of fact and law asserted by the Board and the legal authority and jurisdiction under which a hearing is to be held, and shall state that a hearing will be held before the Board at a time and place stated in the order.

(C) HEARING.—If after a hearing under subparagraph (B), or a waiver thereof, the Board determines on the record that an order revoking or suspending the line of credit, or a cease and desist order should be issued, or an order requiring a refund of the Federal investment in addition to reasonable interest thereon should issue, the Board shall promptly issue such order, which shall include a statement of the findings of the Administration and the reasons for such findings and specify the effective date of the order, and shall cause the order to be served on the entity.

(5) SUBPOENA OF PERSONS, BOOKS, PAPERS, AND DOCUMENTS; FEES AND MILEAGE; ENFORCEMENT.—

(A) SUBPOENA.—The Board may require by subpoena the attendance and testimony of witnesses and the production of all books, papers, and documents relating to the hearing from any place in the United States.

(B) FEES AND MILEAGE.—Witnesses summoned before the Board shall be paid by the party at whose instance such witnesses

were called the same fees and mileage that are paid witnesses in the courts of the United States.

(C) ENFORCEMENT.—In the case of disobedience to a subpoena under this paragraph, the Board, or any party to a proceeding before the Board, may invoke the aid of any court of the United States in requiring the attendance and testimony of witnesses and the production of books, papers, and documents.

(6) PETITION TO MODIFY OR SET ASIDE ORDER; FILING, TIME AND PLACE, ADMINISTRATION TO SUBMIT RECORD; ACTION OF COURT; REVIEW.—

(A) IN GENERAL.—An order issued by the Board under this subsection shall be final and conclusive unless not later than 30 days after the service thereof the eligible entity appeals to the United States court of appeals for the circuit in which such corporation has its principal place of business by filing with the clerk of such court a petition praying that the order of the Board be set aside or modified in the manner stated in the petition.

(B) FILING.—

(i) LEAVE OF COURT.—After the expiration of the 30-day period referred to in subparagraph (A), a petition may be filed only by leave of court on a showing of reasonable grounds for failure to file the petition prior to the expiration of such period.

(ii) CERTIFICATION.—The clerk of the court shall, on filing, cause a copy of the petition to be delivered to the Board and the Board shall certify and file in the court a transcript of the record on which the order was entered. If prior to the filing of such record the Board amends or sets aside its order, in whole or in part, the petitioner may amend the petition within such time as the court may determine, after providing notice to the Board.

(C) STAY OR SUSPENSION OF ORDER.—The filing of a petition for review under this paragraph shall not of itself stay or suspend the operation of the order of the Board, but the court of appeals in its discretion may restrain or suspend, in whole or in part, the operation of the order pending the final hearing and determination of the petition.

(D) ACTION BY COURT.—The court may affirm, modify, or set aside the order of the Board.

(E) ADDITIONAL EVIDENCE.—

(i) DETERMINATION.—If the court determines that the just and proper disposition of the case requires the taking of additional evidence, the court shall order the Board to reopen the hearing for the taking of such evidence, in such manner and on such terms and conditions as the court may consider appropriate.

(ii) FINDINGS.—The Board may modify its findings as to the facts, or make new findings, by reason of the additional evidence taken under this subparagraph, and it shall file its modified or new findings and the amendments, if any, of its order, with the records of such additional evidence.

(F) CONSIDERATION OF OBJECTIONS.—No objection to an order of the Board shall be considered by the court unless the objection was argued before the Board or, if it was not so argued, unless there were reasonable grounds for failure to do so.

(G) REVIEW.—The judgment and decree of the court affirming, modifying, or setting aside any such order of the Board shall be subject only to review by the Supreme Court of the United States on certification or certiorari as provided in section 1254 of title 28.

(7) ENFORCEMENT OF ORDER.—If the entity against which or against whom an order is issued under this subsection fails to obey the order, the Board may apply to the United States Court of Appeals, within the circuit where the entity has its principal place of business, for the enforcement of the order, and shall file a transcript of the record on which the order complained of was entered. On the filing of the application the court shall cause notice thereof to be served on the entity. The evidence to be considered, the procedure to be followed, and the jurisdiction of the court shall be the same as is provided in paragraph (6) for applications to set aside or modify orders.

(b) INVESTIGATIONS AND EXAMINATIONS.—

(1) AUTHORITY.—

(A) IN GENERAL.—The Board may conduct such investigations as the Board considers necessary to determine whether an eligible entity has engaged in any acts or practices that constitute or will constitute a violation of any provision of this chapter, or of any regulation issued under this chapter, or of any order issued under this section.

(B) FILING OF STATEMENTS.—The Board shall permit any individual to file a statement with the Board that is in writing, under oath or otherwise as the Board shall determine, as to all the facts and circumstances concerning the matter to be investigated.

(C) SUBPOENA.—For the purpose of any investigation under this subsection, the Board may administer oaths and affirmations, subpoena witnesses, compel their attendance, take evidence, and require the production of any books, papers, and documents that are relevant to the inquiry. Such attendance of witnesses and the production of any such records may be required from any place in the United States.

(D) REFUSAL TO OBEY.—In case of contumacy by, or refusal to obey a subpoena issued to, any individual, including an entity or corporation, the Board may invoke the aid of any court of the United States within the jurisdiction of which such investigation or proceeding is carried on, or where such individual resides or carries on business activity, in requiring the attendance and testimony of witnesses and the production of books, papers, and documents, and such court may issue an order requiring such individual to appear before the Board, to produce records, if so ordered, or to give testimony touching the matter under investigation.

(E) CONTEMPT.—A failure to obey an order of the court under this subsection shall be punishable by such court as a contempt thereof. All process in any such case may be served in the judicial district where such individual is an inhabitant or wherever such individual may be found.

(2) EXAMINATIONS AND REPORTS.—

(A) EXAMINATIONS.—An eligible entity under this chapter shall be subject to examinations made by the Board through examiners selected or approved by the Board, and the cost of such examinations, including the compensation of the examiners, may in the discretion of the Board be assessed against the entity examined and when so assessed shall be paid by such entity.

(B) REPORTS.—Such entities shall prepare and submit reports to the Board at such times and in such form as the Board may require.

(3) EXAMINATIONS.—Each eligible entity shall be examined and audited at least once every 2 years, under procedures established by the Board, to determine whether or not such entity has been operated in a manner consistent with this chapter and in an otherwise lawful manner, except that the Board may waive the examination requirement for up to 1 additional year if, in its discretion, the Board determines that such a delay would be appropriate based on the prior operating experience of the entity, the contents and results of the last examination and the management expertise of the entity.

(c) INJUNCTIONS OR OTHER ORDERS.—

(1) GROUNDS AND JURISDICTION OF COURT.—Whenever, in the judgment of the Board an eligible entity has engaged or is about to engage in any acts or practices that constitute or will constitute a violation of any provision of this chapter, or of any regulation under this chapter, or of any order issued under this section, the Board may apply to the proper district court of the United States or a United States court located in any jurisdiction subject to the laws of the United States, for an order enjoining such acts or practices, or for an order enforcing compliance with such provision, rule, regulation, or order. Such court shall have jurisdiction over such actions and, on a showing by the Board that such entity has engaged in or is about to engage in such acts or practices, may issue a permanent or temporary injunction, restraining order, or other order without bond.

(2) EQUITY JURISDICTION OF CORPORATION AND ASSETS.—In any proceeding under this section the court as a court of equity may, to such extent as it considers necessary, declare that such court has exclusive jurisdiction over the entity and the assets thereof, wherever located. Such court shall have jurisdiction in any such proceeding to appoint a trustee or receiver to hold or administer under the direction of the court the assets so possessed.

(3) TRUSTEESHIP OR RECEIVERSHIP.—The Board shall have authority to act as trustee or receiver of an entity under this section. On request by the Board, the court may appoint the Board to act in such capacity unless the court determines such appointment to be inequitable or otherwise inappropriate because of the special circumstances involved.

(d) UNLAWFUL ACTS AND OMISSIONS BY OFFICERS, DIRECTORS, EMPLOYEES, OR AGENTS.—

(1) VIOLATION OF CHAPTER.—Wherever an eligible entity violates any provision of this chapter or regulation issued under such chapter by reason of the failure of such entity to comply with the terms thereof, or by reason of such entity engaging in any act or practice that constitutes or will constitute a violation thereof, such violation shall be considered to be a violation and an unlawful act on the part of any individual who, directly or indirectly, authorizes, orders, participates in, or causes, brings about, counsels, aids, or abets in the commission of any acts, practices, or transactions that constitute or will constitute, in whole or in part, such violation.

(2) BREACH OF FIDUCIARY DUTY.—It shall be unlawful for any officer, director, employee, agent, or other participant in the management or conduct of the affairs of an eligible entity to engage in any act or practice, or to omit any act, in breach the fiduciary duty of such individual or such officer, director, employee, agent, or participant, if, as a result thereof, the entity has suffered or is in imminent danger of suffering financial loss or other damage.

(3) DISQUALIFICATION OF OFFICERS AND EMPLOYEES.—Except on the written consent of the Board, it shall be unlawful—

(A) for any individual to take office as an officer, director, or employee of an eligible entity, or to become an agent or participate in the conduct of the affairs or management of an eligible entity, if—

(i) such individual has been convicted of a felony, or any other criminal offense involving dishonesty or breach of trust; or

(ii) such individual has been found civilly liable in damages, or has been permanently or temporarily enjoined by an order, judgment, or decree of a court of competent jurisdiction, by reason of any act or practice involving fraud or breach of trust; or

(B) for any individual to continue to serve in any of the above-described capacities, if—

(i) such individual is convicted of a felony, or any other criminal offense involving dishonesty or breach of trust; or

(ii) such individual is found civilly liable in damages, or is permanently or temporarily enjoined by an order, judgment, or decree of a court of competent jurisdiction, by reason of any act or practice involving fraud or breach of trust.

(e) PENALTIES AND FORFEITURES.—

(1) IN GENERAL.—Except as provided in paragraph (2), an eligible entity that violates any regulation or written directive issued by the Board requiring the filing of any regular or special report under this chapter, shall forfeit and pay to the United States a civil penalty of not more than $100 for each and every day of the continuance of the corporation's failure to file such report, unless the entity demonstrates that such failure is due to reasonable cause and not due to willful neglect. The civil penalties provided for in this subsection shall accrue to the United States and may be recovered in a civil action brought by the Board.

(2) EXEMPTION.—The Board may through rules and regulations, or on application of an interested party, at any time previous to a failure under paragraph (1), by order, after notice and opportunity for hearing, exempt in whole or in part, any entity from the provisions of paragraph (1), on such terms and conditions and for such period of time as the Board determines necessary and appropriate, if the Board finds that such action is not inconsistent with the public interest or the protection of the Board. The Board may for purposes of this subsection make any alternative requirements appropriate to the situation.

(f) JURISDICTION AND SERVICE OF PROCESS.—Any suit or action brought under this section by the Board to enforce any liability or duty created by, or to enjoin any violation of, this chapter, or any rule, regulation, or order promulgated thereunder, shall be brought in the district wherein the eligible entity maintains its principal office, and process in such cases may be served in any district in which the defendant maintains its principal office or transacts business, or wherever the defendant may be found.

(g) SUBSTITUTION OF SECRETARY.—On the termination of the Board, the Secretary shall stand in place of the Board and shall possess all the powers, privileges and rights regarding compliance and enforcement described in this section and in section ____08.

(h) REVOCATION, SUSPENSION, OR TERMINATION.—If the approval of any eligible entity to participate in this program is revoked, suspended, or terminated, or if the activities of the eligible entity otherwise end, the Board, or the Secretary, upon the termination of the Board, shall—

(1) possess all the rights and privileges of such eligible entity;

(2) succeed to the assets of such eligible entity to the extent necessary to obtain a refund of any amounts due to the Board, or the Secretary;

(3) be entitled to receive any payments due to such eligible entity from any local businesses on any outstanding loans; and

(4) take over any equity investment held by such eligible entity.

CHAPTER 2—RURAL CAPITAL ACCESS PROGRAM

SEC. ____10. PURPOSE.

It is the purpose of this chapter to create a Rural Capital Access Program within the Department of Agriculture to encourage lending institutions to provide loans to certain businesses in rural areas.

SEC. ____11. DEFINITIONS.

As used in this chapter:

(1) FUND.—The term "Fund" means the Rural Capital Access Fund established under section ____12(b).

(2) PROGRAM.—The term "Program" means the Rural Capital Access Program established under section ____12(a).

(3) RURAL AREA.—The term "rural area" means all territory of a State that is not within the outer boundary of any city or town, or neighboring urbanized area as defined by the Board, having a population of 20,000 or more based on the latest decennial census of the United States.

(4) SECRETARY.—The term "Secretary" means the Secretary of Agriculture.

(5) STATE.—The term "State" means each of the 50 States of the United States.

SEC. 112. RURAL CAPITAL ACCESS.

(a) ESTABLISHMENT OF PROGRAM.—The Secretary shall establish a program to be known as the "Rural Capital Access Program" through which the Secretary shall provide incentives to lending institutions to encourage such institutions to provide new loans to certain businesses in rural areas.

(b) ESTABLISHMENT OF FUND.—

(1) IN GENERAL.—The Secretary shall establish and maintain a fund to be known as the "Rural Capital Access Fund" that shall serve as a reserve account to protect lending institutions that participate in the Program from losses associated with certain loans.

(2) AMOUNTS IN FUND.—The Fund established under paragraph (1) shall contain amounts received under this subtitle from the Federal Government, participating lending institutions, and eligible borrowers. The amounts obligated to the Fund shall remain in the Fund until expended.

SEC. ____13. AUTHORIZATION OF APPROPRIATIONS.

(a) IN GENERAL.—To carry out this chapter there are authorized to be appropriated $15,000,000 in fiscal year 1991, $20,000,000 in fiscal year 1992, $30,000,000 in fiscal year 1993, $40,000,000 in fiscal year 1994, and $60,000,000 in fiscal year 1995.

(b) AMOUNTS NOT TO REMAIN AVAILABLE.—The amounts appropriated during each fiscal year pursuant to paragraph (1), that are not obligated to the Fund during such fiscal year, shall not remain available for use under the Program after the fiscal year for which such sums are appropriated.

(c) ADMINISTRATIVE EXPENSES.—No funds appropriated under this chapter shall be used for the administrative expenses of State agencies or institutions participating in the Program.

SEC. ____14. ALLOCATION.

(a) IN GENERAL.—Of the amounts appropriated under section ____13, the Secretary shall allocate to each State at the beginning of each fiscal year an amount for use under the Program equal to an amount that bears the same ratio to the total amount of such appropriation as the number of individuals residing in rural areas in such State bears to the number of individuals residing in rural areas in all States.

(b) REALLOCATION.—Any portion of the allocation under subsection (a) for use within a State during a fiscal year that the Secretary determines is not obligated to the Fund by June 1 of such fiscal year shall be released by the Secretary for obligation under the Program in connection with loans made in any other State.

SEC. ____15. ADMINISTRATION OF THE PROGRAM.

(a) NOTIFICATION AND APPLICATION.—

(1) IN GENERAL.—A State that desires to participate in the Program shall notify the Secretary in writing of its intent to participate, and shall provide such information as the Secretary shall require, including a designation of the State agency or private institution that shall administer the Program within the State.

(2) PRIVATE INSTITUTION.—If a State fails to—

(A) submit a notification to the Secretary within 6 months after the date of enactment of this Act; or

(B) designate a State agency or private institution to administer the Program;

a private institution within such State may apply to the Secretary to participate in the Program on behalf of such State. Within a reasonable period of time following the receipt of such application, the Secretary shall approve such institution for participation in the Program unless good cause exists to reject such application. If more than one such application is received from institutions within the State, the Secretary shall select from among the applicants one institution to participate in the Program.

(3) DUTIES.—The participating State agency or private institution shall—

(A) promote the Program within the State;

(B) recruit lending institutions within the State to participate in the Program;

(C) enter into agreements with participating lending institutions that outline the rights and obligations of such institutions;

(D) encourage participating lending institutions to use the Program to expand the funding activity of such institutions in rural areas and avoid displacing commercial loans that could otherwise be made without the incentives provided under the Program; and

(E) maintain such books and records of its activities under the Program, as specified by the Secretary and grant the Secretary reasonable access to such books and records.

(b) ELIGIBLE LENDING INSTITUTIONS, BORROWERS, AND LOANS.—

(1) ELIGIBLE LENDING INSTITUTIONS.—To be eligible to participate in the Program, a lending institution must be legally able to make loans within rural areas in the State.

(2) ELIGIBLE BORROWERS.—An eligible borrower must be a corporation, partnership, joint venture, sole proprietorship, retail business, cooperative, individual, or any other entity, whether profit or nonprofit, that conducts or is planning to conduct business in a rural area of a State.

(3) ELIGIBLE LOAN.—To be eligible for protection under this chapter a loan made by an eligible lending institution shall—

(A) be made to an eligible borrower;

(B) be used by the borrower for economic activity that is located in a rural area;

(C) not be used for the construction or purchase of residential property;

(D) not be used to finance any real estate purchase primarily for investment purposes, without developing or improving such real estate, or without intending to use such real estate in connection with the business of the borrower;

(E) not be an existing loan of the lending institution (or an affiliate of such institution) that is not in the Program unless the institution increases the outstanding balance of such loan and places the refinanced loan into the Program only to the extent that the principal of such loan is increased;

(F) not be made to a director, officer, or principal shareholder of the lender or a member of the immediate family of a director, officer, or principal shareholder of the lender; and

(G) not exceed $3,000,000.

SEC. ____16. OPERATION OF THE PROGRAM.

(a) LOAN PROCESS.—A lending institution that enters into an agreement with the administering agency or institution may make loans to eligible borrowers and such loans shall be protected by the subaccounts contained in the Fund.

(b) CREATION OF SUBACCOUNTS.—

(1) IN GENERAL.—A subaccount shall be created in the Fund for each lending institution that enters into an agreement with the administering agency or institution that shall contain amounts derived from contributions made by the lending institution, the borrower, and the Federal Government.

(2) CONTRIBUTIONS.—

(A) MINIMUM.—The minimum contributions in connection with any eligible loan to the subaccount of a lending institution under this subsection shall be—

(i) an amount equal to not less than 1.5 percent of the amount of the loan to be paid by the borrower;

(ii) an amount equal to the amount contributed under clause (i) to be paid by the lending institution; and

(iii) an amount equal to the amounts paid under clauses (i) and (ii) to be paid by the Secretary.

(B) MAXIMUM.—The maximum contributions in connection with any eligible loan to the subaccount of a lending institution under this subsection shall be—

(i) an amount equal to not greater than 3.5 percent of the amount of the loan to be paid by the borrower;

(ii) an amount equal to the amount contributed under clause (i) to be paid by the lending institution; and

(iii) an amount equal to the amounts paid under clauses (i) and (ii) to be paid by the Secretary.

(C) DETERMINATION.—The amount of the contribution to be made by a borrower in connection with any eligible loan made under the Program shall be established through an agreement between the lender and the borrower.

(3) INTEREST.—The subaccount of each lending institution shall earn interest at a rate equal to the current average market yield on outstanding marketable obligations of the United States.

(4) WITHDRAWAL.—A lending institution shall only be permitted to withdraw funds from the subaccount of such institution to reimburse such institution for losses suffered on eligible loans made under the Program.

(c) PROCEDURE.—

(1) NOTIFICATION.—After entering into an agreement with the administering agency or institution to participate in the Program, a lending institution shall notify such agency or institution before concluding a loan agreement to provide an eligible loan to any eligible borrower to ensure that the Secretary has sufficient funds available for use in such State to pay the contribution required of the Secretary under subsection (b)(2).

(2) TIME FOR PAYMENTS OF CONTRIBUTIONS.—

(A) LENDING INSTITUTION AND BORROWER.—The lending institution shall pay the required contribution, and collect and pay the required contribution of the borrower, to the administering agency or institution not later than 10 working days after the applicable loan agreement is entered into.

(B) TRANSFER TO SECRETARY.—Not later than 5 working days after the receipt of funds under subparagraph (A), the administering agency or institution shall transfer such funds to the Secretary.

(C) SECRETARY.—As soon as practicable after the administering agency or institution transmits the contributions required under subsection (b)(2) to the Secretary, such contributions and the matching funds required to be provided by the Secretary, shall be deposited by the Secretary into the subaccount of the institution created within the Fund in accordance with subsection (b)(1).

(d) CLAIMS AGAINST THE FUND.—

(1) DETERMINATION OF CHARGEOFFS.—A lending institution shall determine when and how much to charge off on a loan eligible for protection under this chapter in a manner that is consistent with the normal methods used by such institution for making such determinations concerning its commercial business loans not covered under the Program.

(2) FILING OF CLAIMS.—A lending institution shall file a claim for assistance under this chapter with the administering agency or institution at the time that such lending institution charges off all or part of an eligible loan.

(3) AMOUNT OF CLAIM.—

(A) IN GENERAL.—A claim filed by a lending institution under this subsection may include the full amount of the principal of the loan that is charged off, any interest accrued on the loan, and any out-of-pocket expenses incurred by such institution in connection with the loan.

(B) LIMITATION.—If the amount of a loan that is protected under this Program is less than the total amount of the loan principal charged off by the lender, the amount of principal and accrued interest that may be included in a claim shall not exceed the principal amount of such loan that is protected under the Program in addition to any accrued interest attributable to such principal.

(4) REVIEW OF CLAIMS.—

(A) IN GENERAL.—A claim submitted under this section shall be promptly delivered by the administering agency or institution to the Secretary who shall, not later than 20 days after the receipt of such claim, review the claim and make a payment to the lending institution from the subaccount of such institution in the amount of the claim.

(B) LIMITATION.—Except as provided in section ____18(c), the amount of payment made to a lender on any claim under this Program shall not exceed the total amount that such lending institution has in its subaccount in the Fund.

(C) GROUNDS FOR DENIAL OF CLAIM.—The Secretary shall only deny a claim submitted under this subsection, or a portion thereof, if the Secretary determines that the lending institution that submitted the claim has knowingly—

(i) violated a provision of this chapter;

(ii) violated a provision of the agreement of the institution with the administering agency or institution;

(iii) allowed interest to accrue on the loan for an unreasonable period of time after the loan became delinquent without taking prudent action to collect the principal; or

(iv) submitted a false claim.

(e) REVIEW BY THE SECRETARY.—The Secretary may review the operations of any lending institution that participates in the Program under this chapter.

SEC. ____17. INACTIVE LENDING INSTITUTIONS.

If, for a period of at least 24 consecutive months, the amount in the subaccount of a lending institution exceeds the outstanding balance of all loans of such institution protected under this Program, the Secretary may withdraw any such excess amounts so that the amount of funds remaining in the subaccount are equal to 100 percent of the outstanding balance of such loans. Such excess shall be transferred to a general account within the Fund to be utilized by the Secretary for other contributions under section ____16(b)(2).

SEC. ____18. INITIAL PROGRAM INCENTIVES.

(a) PURPOSES.—To encourage lending institutions to participate in the Program and to make eligible loans during the early stages of the implementation of the Program, the Secretary shall provide two special incentives as provided in subsections (b) and (c).

(b) ADDITIONAL CONTRIBUTION.—The Secretary shall contribute an amount, under section ____16(b)(2), equal to 150 percent of the amount of the contributions made by the lending institution and the borrower, in connection with any loan protected under the Program, with respect to the first $2,000,000 of principal on loans made by such institution that are protected under the Program.

(c) PAYMENT OF CLAIMS WITH FUTURE CONTRIBUTIONS.—

(1) AVAILABILITY.—The provisions of this subsection shall only apply to the first $5,000,000 of principal on loans made by a lending institution that are protected under the Program.

(2) INCENTIVE.—If a claim is filed under section ____16(d) on a loan that meets the requirement of paragraph (1), and at the time that such claim is made there is not a sufficient amount of funds in the claiming lending institution's subaccount to pay the full amount of such claim, the lending institution may withdraw all of the funds in such subaccount and, to the extent such institution continues to make eligible loans under this chapter that result in additional contributions to such subaccount, such institution may withdraw such additional funds from the subaccount at the time such funds are deposited as may be necessary to exhaust the full amount of any such claim.

(3) LIMITATION.—The Secretary shall limit withdrawals from the subaccount of any lender under this subsection so that the amount withdrawn by the lending institution to reimburse such institution for a prior claim, shall not exceed 75 percent of the amount in such subaccount immediately prior to such subsequent withdrawal.

CHAPTER 3—RURAL ECONOMIC DEVELOPMENT ADMINISTERED BY THE SECRETARY AND THE RURAL ELECTRIFICATION ADMINISTRATION

SEC. ____20. ASSISTANT ADMINISTRATOR FOR ECONOMIC DEVELOPMENT.

The Rural Electrification Act of 1936 is amended by adding after section 11 (7 U.S.C. 911) the following new section:

"SEC. 11A. ASSISTANT ADMINISTRATOR FOR ECONOMIC DEVELOPMENT.

"(a) APPOINTMENT.—The Administrator shall appoint an Assistant Administrator for Economic Development (hereinafter referred to in this Act as the 'Assistant Administrator') to carry out the programs of the Rural Electrification Administration concerning the involvement of rural electric and telephone systems in community and economic development.

"(b) APPOINTMENT FACTORS.—In appointing an Assistant Administrator, the Administrator shall consider the degree to which candidates possess—

"(1) knowledge of and experience in community and economic development programs and strategies;

"(2) the ability to develop and manage the specific programs and responsibilities of this office, as described in this Act;

"(3) the ability to work effectively with officials of Federal, State, and local governments, private, and other officials of development programs, as well as with borrowers of the Rural Electrification Administration and their associations; and

"(4) other factors as determined by the Administrator to be important in the successful execution of the responsibilities of the office of Assistant Administrator.

"(c) RESPONSIBILITIES AND STANDING.—The Assistant Administrator shall be—

"(1) responsible, unless otherwise provided by law, for the administration of the programs of the Rural Electrification Administration not directly related to the providing of electric or telephone service; and

"(2) compensated at a salary level that is not less than that of the Assistant Administrator for Electric and the Assistant Administrator for Telephone of the Rural Electrification Administration.

"(d) FUNDING.—Not less than 10 percent nor more than 20 percent of the salaries and expenses provided to the Administration during any fiscal year shall be used by the Assistant Administrator in carrying out the responsibilities of the Assistant Administrator as described in subsection (c), and such amounts shall remain available until expended.

"(e) TECHNICAL ASSISTANCE UNIT.—The Administrator shall establish a technical assistance unit to provide advice and guidance to borrowers concerning community and economic development activities permitted under this Act. From the amounts made available to the Assistant Administrator under subsection (d), not less than 1 percent of the salaries and expenses of the Rural Electrification Administration shall be made available to such technical assistance unit established in this section.".

SEC. ____21. DEFERMENT OF PAYMENT ON ECONOMIC DEVELOPMENT LOANS.

Section 12 of the Rural Electrification Act of 1936 (7 U.S.C. 912) is amended—

(1) by inserting "(a)" before "The Administrator"; and

(2) by adding at the end thereof the following new subsection:

"(b)(1) The Administrator shall permit any borrower to defer the payment of principal and interest on any insured or direct loan made under this Act under circumstances described in this subsection, notwithstanding any limitation contained in section 12(a), except that such deferment shall not be permitted based on the determination by the Administrator of the financial hardship of the borrower.

"(2)(A) In the case of deferments made to enable the borrower to provide financing to local businesses, the deferment shall be repaid in equal installments, without the accrual of interest, over the 60-month period beginning on the date of the deferment, and the total amount of such payments shall be equal to the amount of the payment deferred; and

"(B) In the case of deferments made to enable the borrower to provide community development assistance, technical assistance to businesses, or similar community, business, or economic development assistance, the deferment shall be repaid in equal installments, without the accrual of interest, over the 120-month period beginning on the date of the deferment, and the total of amount of such payments shall be equal to the amount of the payment deferred; and

"(3)(A) A borrower may defer its debt service payments only in an amount equal to an investment made by such borrower in community or economic development projects.

"(B) The amount of the deferment shall not exceed 50 percent of the cost of a community or economic development project financed under paragraph (2).

"(C) The total amount of deferments under this subsection during each of the fiscal years 1990 through 1993 shall not exceed 3 percent of the total payments received during such fiscal year from all borrowers on direct and insured loans made under this Act and shall not exceed 5 percent of such total payments in each subsequent fiscal year.

"(D) At the time of a deferment, the borrower shall make a cushion of credit payment in an amount equal to the amount of the payment deferred. Such payment shall not be reduced by the borrower below the level of the unpaid balance of the payment deferred. Subject to limitations established in annual appropriations Acts, such cushion of credit amounts and any other cushion of credit and advance payments of any borrower shall be included in the interest differential calculation provided by section 313 of this Act.

"(4) The Administrator shall undertake all reasonable efforts to permit the full amount of deferments authorized by this subsection during each fiscal year.".

SEC. ____22. WATER AND WASTE FACILITY FINANCING.

The Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)) is amended by adding after section 306, the following new section:

"SEC. 306A. ADDITIONAL WATER AND WASTE FACILITIES PROGRAM.

"(a) AUTHORITY.—

"(1) IN GENERAL.—The Secretary shall make loans to individuals or entities who are borrowers under title III of the Rural Electrification Act of 1936 (7 U.S.C. 930 et seq.), (hereinafter referred to in this section as the 'borrower') to enable such borrowers to provide water and waste facility services in areas served by such borrowers.

"(2) PROGRAMS.—The loan program established by the Secretary under this section shall be in addition to any programs administered under title III of the Rural Electrification Act of 1936 (7 U.S.C. 930 et seq.) and section 306 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926).

"(b) LIMITATION.—Loans made under subsection (a) shall not, unless otherwise specified by law, exceed an amount equal to 10 percent of the total amount of insured loans under the Rural Electrification Act of 1936 authorized during the fiscal year in which such loan is made for rural electrification and telephone purposes, or $40,000,000, whichever is less. Such limitations shall be in addition to the total amount of insured loans authorized for electrification and telephone purposes.

"(c) PRIORITY.—In reviewing applications for loans under this section the Secretary shall consider—

"(1) whether the loan is necessary to enable the communities to be served to comply with applicable Federal or State environmental laws;

"(2) whether the individuals residing in the area for which service is proposed, and any local government entities, are in favor of the borrower providing such services in the area;

"(3) the income, unemployment, and other characteristics of the area to be served;

"(4) the degree of deprivation faced by residents of the area to be served as a result of the lack of safe drinking water, adequate water supplies, sewage treatment and other waste disposal facilities;

"(5) the impact that the availability of safe water supplies, waste disposal and similar services would be likely to have on enhancing the prospects for economic growth within the area to be served;

"(6) the degree to which a loan that may be provided under this subsection is necessary to ensure that water and waste disposal services are available in the area to be served by such loan at costs that do not exceed those charged in other nearby areas;

"(7) the impact of the proposed loan on the retention of the property and service territory of the borrower, or in protecting the security given on outstanding loans provided to the borrower; and

"(8) whether the water and waste facility projects described in the application will duplicate any existing facilities, and whether the borrower will coordinate its water and waste facility operations with similar operations in the area, including efforts to achieve economies of scale through joint billing, collection, or other operations with nearby systems in order to reduce the costs, improve the operations, or otherwise assist such systems.

"(d) COORDINATION.—

"(1) OTHER PROGRAMS AND REQUIREMENTS.—

"(A) OTHER PROGRAMS.—The Secretary shall ensure that the program established under this section is coordinated with the programs authorized and established under section 306, and will attempt to coordinate the lending activities under this section with similar activities conducted by other entities.

"(B) REQUIREMENTS.—Loans made under this section shall be subject, in the same manner as loans made under section 306, to the provisions of section 306(a)(9) and 306(a)(10) (which require approvals by State water pollution control agencies), sections 306(a)(19) (A) and (B), (which include certain requirements in connection with the technical design and choice of materials for water and waste systems), and section 306(b) (which concerns the curtailment or limitation of service).

"(2) ASSIGNMENT OF DUTIES.—The Secretary shall determine whether the Rural Electrification Administration possesses greater expertise, as compared with the Farmers Home Administration, in the areas of utility accounting, utility management and financial analysis, advice and assistance, and other aspects of utility operations and engineering. If the Secretary determines that the Rural Electrification Administration possesses greater expertise in such areas, the Secretary shall require the Rural Electrification Administration to provide technical assistance, and assist in the processing of applications under this section.

"(3) PROHIBITION ON LIMITING ACCESS.—The Secretary shall establish rules and procedures that prohibit borrowers from conditioning or limiting access to, or the use of, any water and waste facility services that are financed under this section. Such rules and procedures shall be based on whether individuals or entities in the area for which such facility is proposed receive, or will accept, electric service from such borrower.

"(e) TERMS.—

"(1) IN GENERAL.—Loans made under this section shall be for the same repayment period as insured loans made by the Administrator of the Rural Electrification Administration to such borrowers under title III of the Rural Electrification Act of 1936 (7 U.S.C. 930 et seq.) and interest rates on loans made under this section shall not exceed the 5 percent interest rate on such insured loans as described in section 305 of the Rural Electrification Act of 1936 (7 U.S.C. 935).

"(2) INTEREST RATE.—The Secretary shall determine the interest rate to be charged on loans made under this section on the basis of—

"(A) ensuring that the cost to consumers for water and waste disposal services financed with loans provided under this section does not, to the extent possible, exceed rates charged in areas that are near the area served by the borrower;

"(B) the income and other characteristics of the individuals to be served through the provision of such loans; and

"(C) encouraging borrowers to obtain private sector capital, as provided for in subsection (f), to supplement loans made under this section.

"(f) PRIVATE SECTOR CAPITAL.—The Secretary shall require borrowers under this section to obtain private sector capital to supplement assistance made available under this section if—

"(1) the Secretary determines that—

"(A) it is appropriate to require use of such private capital, taking into account subparagraphs (A) and (B) of subsection (e)(2); and

"(B) the borrower is able to obtain revenues from the facilities to be financed to recover its cost, including the cost of such private capital; and

"(2) the borrower is able to obtain such private sector capital.

In order to facilitate the obtaining of such private capital, the Secretary may, on a case-by-case basis, reduce the interest rate on loans provided under this section when such reduction is appropriate and will enable the borrower to obtain such private capital.

"(g) APPROPRIATIONS.—The Secretary is authorized to make loans to the extent amounts are appropriated as provided under this section, except that during any fiscal year the amount of such loans, unless otherwise provided by law, shall not exceed 10 percent of the amount authorized for all insured loans under title III of the Rural Electrification Act of 1936 (7 U.S.C. 930 et seq.), or $40,000,000, whichever amount is less. Funds appropriated under this section shall remain available until expended.

"(h) REPAYMENT.—Appropriations made for purposes of this section shall be placed in a separate account. Advances on loans made under this section shall be made from such account, and payments on such loans shall be returned to the account for use by the account in making advances on future loans.

"(i) FULL USE.—The Secretary shall undertake all reasonable efforts to make full use, during each fiscal year, of any funds held by the account established under subsection (h), subject to limitations that loans for the purpose of this section shall not exceed 10 percent of the amount of loans made under title III of the Rural Electrification Act of 1936 (7 U.S.C. 930 et seq.) during any fiscal year, or $40,000,000, whichever amount is less, and subject to any other limitations that may be imposed by law, except that any repayments made during each fiscal year shall not be considered in computing such 10 percent or $40,000,000 limit.

"(j) REPLENISHMENT OF WATER AND WASTE FACILITY FUND.—

"(1) CALCULATION OF TOTAL AMOUNT OF LOANS.—At the end of each fiscal year the Secretary shall calculate—

"(A) the total amount of loans extended under this section during such fiscal year; and

"(B) the amount of water or waste facility loans extended to borrowers (as referred to in subsection (a)(1)) under section 306 of this Act.

"(2) TRANSFER OF AMOUNTS.—Notwithstanding the provisions of subsections (g) and (i), if any amounts appropriated under this section remain available at the end of any fiscal year, the Secretary shall transfer such available amounts to the fund used to make water or waste facility loans under section 306, to the extent of the amount of any loans made to borrowers under the Rural Electrification Act of 1936, under such section 306, and any such loan to such borrower made under section 306 shall be subject to the terms, conditions and other requirements of section 306A, and any such section 306 loan shall be repaid to the account established by subsection (h).".

SEC. ____23. RURAL ECONOMIC DEVELOPMENT.

The Rural Electrification Act of 1936 (7 U.S.C. 901 et seq.) is amended by adding at the end thereof the following new title:

"TITLE V—RURAL ECONOMIC DEVELOPMENT

"SEC. 501. ADDITIONAL POWERS AND DUTIES OF REA ADMINISTRATOR.

"The Administrator shall—

"(1) provide advice and guidance to electric borrowers under this Act concerning the effective and prudent use by such borrowers of the investment authority under section 312 to promote rural development;

"(2) provide technical advice, troubleshooting, and guidance concerning the operation of programs or systems that receive assistance under this Act;

"(3) establish and administer various pilot projects through electric and telephone borrowers that the Administrator determines are useful or necessary, and recommend specific rural development projects for rural areas;

"(4) act as an information clearinghouse and conduit to provide information to electric and telephone borrowers under this Act concerning useful and effective rural development efforts that such borrowers may wish to apply in their areas of operation and concerning State, regional, or local plans for long-term rural economic development;

"(5) provide information to electric and telephone borrowers under this Act concerning the eligibility of such borrowers to apply for financial assistance, loans, or grants from other Federal agencies and non-Federal sources to enable such borrowers to expand their rural development efforts;

"(6) promote local partnerships and other coordination between borrowers under this Act and community organizations, States, counties, or other entities, to improve rural development;

"(7) review the advice and recommendations of the Rural Educational Opportunities Board as established under section 601(f); and

"(8) administer a Rural Business Incubator Fund (as established under section 502) that shall provide technical assistance, advice, loans, or capital to business incubator programs or for the creation or operation of small business incubators in rural areas.

"SEC. 502. RURAL BUSINESS INCUBATOR FUND.

"(a) ESTABLISHMENT AND USE.—

"(1) ESTABLISHMENT.—There is established in the Treasury of the United States a revolving fund to be known as the Rural Business Incubator Fund (hereinafter referred to in this title as the 'Incubator Fund') to be administered by the Administrator.

"(2) USE.—The Incubator Fund shall be used to make grants and reduced interest loans to electric and telephone borrowers under this Act or to other non-profit entities that meet the requirements of this section, to promote business incubator programs or for the creation or operation of business incubators in rural areas as defined in this Act, and the rate of such loans shall not exceed the 5 percent rate as provided in section 305.

"(3) BUSINESS INCUBATOR.—Any business incubator that receives assistance under this title shall be a facility in which small businesses can share premises, support staff, computers, software or hardware, telecommunications terminal equipment, machinery, janitorial services, utilities, or other overhead expenses, and where such businesses can receive technical assistance, financial advice, business planning services or other support. Business incubator programs that provide assistance of the type described in this paragraph shall be eligible for assistance under this title even when such programs do not involve the sharing of premises.

"(b) APPLICATION FOR ASSISTANCE.—

"(1) ELIGIBILITY TO SUBMIT.—Borrowers under this Act that operate existing business incubators or that desire to operate such incubators or business incubator programs, and that meet the requirements established by the Administrator for obtaining grants or reduced interest loans under this section, may submit applications at such time, in such form, and containing such information as the Administrator shall require, for such grants or loans. Nonprofit entities that are not borrowers under title III shall be considered eligible borrowers for the purpose of this section if such entities are located in a State in which one or fewer electric borrowers are headquartered in such State.

39-059 O-91-30 (Pt. 13)

"(2) REQUIREMENTS.—Applications submitted under paragraph (1) shall, at a minimum—

"(A) contain an assurance that any incubator established or operated pursuant to this section will be operated on a not-for-profit basis; and

"(B) contain an assurance that it will be the policy of such incubator to encourage and assist businesses in graduating from the incubator and becoming viable business entities in the community and to inform participating businesses of this policy;

"(3) REVIEW.—In reviewing applications for assistance, the Administrator shall consider—

"(A) how effectively the incubator project will assist in the formation, growth, or improved efficiency of small businesses that will help diversify and develop the local economy; and

"(B) the amount of local support likely to exist for the incubator and the businesses to be assisted by such incubator, taking into account local contributions of business, financial, technical, technological or managerial expertise, and contributions of equipment or materials, local financial assistance, and other factors as determined appropriate by the Administrator.

"(c) FUNDING OF LOCAL INCUBATORS.—

"(1) BY BORROWER ESTABLISHING INCUBATOR.—

"(A) IN GENERAL.—A borrower that establishes or assists a business incubator under this section shall purchase Capital Term Certificates issued by the Incubator Fund in amounts equal to 10 percent of the amount of the grant, or 5 percent of the amount of the reduced interest loan, provided by the Administrator under this section.

"(B) REDEMPTION OF CERTIFICATES.—Each calendar year for the 10-year period beginning on the date that a grant or reduced interest loan is provided under this section, the Administrator shall redeem an amount equal to 10 percent of the Capital Term Certificates purchased by the borrower under subparagraph (A), without any payment of interest.

"(2) BY THE SECRETARY OF THE TREASURY.—The Secretary of the Treasury shall, subject to the limitations contained in annual appropriations Acts, provide funds for the capitalization of the Incubator Fund, and there are authorized to be appropriated amounts not to exceed $10,000,000 annually for such capitalization until the total of such capitalization shall equal $60,000,000. Such amounts shall remain available until expended by the Incubator Fund for the purposes of this section.

"(d) REPAYMENTS TO INCUBATION FUND.—All payments made on loans under this section, and all amounts provided under subsection (c), shall be placed in the Incubator Fund established by subsection (a) and shall be available to carry out the purposes of this section.

"(e) FULL USE.—The Administrator shall undertake all reasonable efforts to make full use, during each fiscal year, of any funds contained in the Incubator Fund established under subsection (a), consistent with the requirement that the Incubator Fund redeem Capital Term Certificates as provided by subsection (c). During each fiscal year, 10 percent of the amount contained in the Incubator Fund shall be made available to nonprofit entities, as provided under subsection (b), that are not borrowers under title III, except that if qualified applications from such entities are not received in an amount or at such times sufficient to utilize such 10 percent amount during each such fiscal year, the Administrator shall make the remainder of such amount available to other eligible borrowers during such fiscal year.".

SEC. ____24. PROMOTING RURAL DEVELOPMENT BY REA TELEPHONE BORROWERS.

To promote additional rural development by Rural Electrification Administration telephone borrowers, amounts invested by any such borrower for improved rural telecommunications facilities under programs established pursuant to section ____35, or other additional rural development efforts made under subtitle C, shall not be considered dividends or distributions of capital by the Rural Electrification Administration.

SEC. ____25. REVIEW OF PROGRAMS FOR BUSINESS INCUBATOR.

(a) POLICY OF THE UNITED STATES.—It is the policy of the United States that the Federal Government should encourage and support the development and operation of business incubator centers as a tool of economic and community development.

(b) ACTION BY SECRETARIES.—The Secretaries of Housing and Urban Development, Health and Human Services, Energy, Defense, Commerce, and Agriculture, and the Administrator of the Small Business Administration shall review existing regulations promulgated by their respective departments and agencies governing grants and loans for purposes of community development, business promotion, research and development, and export promotion and shall take such action as may be necessary to ensure that business incubator centers are eligible for such grants or loans.

(c) REPORT.—Not later than March 1, 1991, the head of each agency or department described in subsection (b) shall prepare and submit, to the appropriate Committees of the House of Representatives and to the Governmental Affairs Committee and other appropriate committees of the Senate, a report containing the findings of its review including—

(1) a description of existing Federal grant or loan programs the purpose of which is community development, business promotion, research and development, or export promotion for which business incubator centers are currently eligible;

(2) recommendations as to changes in existing law needed to make business incubator centers eligible for current Federal grant or loan programs for purposes of community development, business promotion, research and development, or export promotion; and

(3) recommendations for any additional legislation that may be required to foster and support business incubator centers.

(d) CONSULTATION.—In conducting the reviews under subsections (b) and (c), the heads of the agencies and departments shall regularly consult with representatives of incubator operators, officials of State and local government, and others involved in small business promotion and economic development.

(e) AVAILABILITY OF REPORTS.—The Administrator of the Small Business Administration shall ensure that any reports developed as the result of such reviews are made available to interested parties and to the general public.

Subtitle B—Enhancing Human Resources

SEC. ____31. PURPOSE.

It is the purpose of this subtitle to provide incentives for local telephone exchange carriers, and for rural community facilities or residents to improve the quality of phone service, to provide access to advanced telecommunications services and computer networks, and to improve rural opportunities.

SEC. ____32. GOALS.

It is a goal of the Federal government to make affordable advanced telecommunications available to rural residents, including services such as reliable facsimile document and data transmission, multifrequency tone signaling services, 911 emergency service with automatic number identification, interactive audio and visual transmissions, voicemail services designed to record, store, and retrieve voice messages, and other advanced telecommunications services.

SEC. ____33. DEFINITIONS.

As used in this subtitle:

(1) ADMINISTRATOR.—The term "Administrator" means the Administrator of the Rural Electrification Administration.

(2) COMMUNICATION SATELLITE GROUND STATION COMPLEX.—The term "communication satellite ground station complex" includes transmitters, receivers, and communications antennas at the Earth station site together with the interconnecting terrestrial transmission facilities (cables, line or microwave facilities) and modulating and demodulating equipment necessary for processing traffic received from the terrestrial distribution system prior to transmission via satellite and the traffic received from the satellite prior to transfer to terrestrial distribution systems.

(3) COMPREHENSIVE RURAL TELECOMMUNICATIONS PLAN.—The term "comprehensive rural telecommunications plan" means a plan submitted by an applicant for a grant under this subtitle. Each such plan shall include—

(A) a detailed explanation of the proposed rural telecommunications system, how such system is to be funded, and a description of the intended uses for grants received from the Administrator under this subtitle;

(B) an explanation of the manner in which such plan complies with any requirements imposed by the Administrator under this subtitle or otherwise imposed under section ____34;

(C) a listing of the proposed purchases or leases of telecommunications terminal equipment, telecommunications transmission facilities, data terminal equipment, interactive video equipment, computer hardware and software systems, and components that process data for transmission via telecommunications, computer network components, communication satellite ground station equipment, or any other elements of the telecommunications system designed to further the purposes of subtitle II, that the applicant intends to build or fund using the grant funds;

(D) an explanation of the special financial or other needs of the affected rural communities and of the applicants for such grant assistance;

(E) an analysis of the relative cost-benefit of proposals for leasing or purchasing of facilities, equipment, components, hardware and software, or other items; and

(F) a description of the consultations with the appropriate local telephone exchange carrier or carriers and the anticipated role of such carrier in the proposed telecommunications system.

(4) COMPUTER NETWORKS.—The term "computer networks" refers to computer hardware and software, terminals, signal conversion equipment including both modulators and demodulators, or related devices, used to communicate with other computers to

process and exchange data through a telecommunication network in which signals are generated, modified or prepared for transmission, or received, via telecommunications terminal equipment and telecommunications transmission facilities.

(5) DATA TERMINAL EQUIPMENT.—The term "data terminal equipment" refers to equipment that converts user information into data signals for transmission, or reconverts the received data signals into user information, and is normally found on the terminal of a circuit and on the premises of the end user.

(6) END USER.—The term "end user" means rural community facilities or persons associated with those facilities who participate in the programs established under this subtitle.

(7) FIBER-OPTIC CABLE.—The term "fiber-optic cable" means a bundle of optical transmission elements or waveguides usually consisting of a fiber core and fiber cladding that can guide a lightwave and that are incorporated into an assembly of materials that provide tensile strength and external protection.

(8) INTERACTIVE VIDEO EQUIPMENT.—The term "interactive video equipment" refers to equipment used to produce and prepare for transmission audio and visual signals from at least two distant locations such that individuals at such locations can verbally and visually communicate with each other, and such equipment includes monitors, other display devices, cameras or other recording devices, audio pickup devices, and other related equipment.

(9) SECRETARY.—The term "Secretary" means the Secretary of Agriculture.

(10) TELECOMMUNICATIONS TRANSMISSION FACILITIES.—The term "telecommunications transmission facilities" refers to those facilities that transmit, receive, or carry data between the telecommunications terminal equipment at each end of a telecommunications circuit or path. Such facilities include microwave antenna, relay stations and towers, other telecommunications antenna, fiber-optic cables and repeaters, coaxial cables, communication satellite ground station complexes, copper cable electronic equipment associated with telecommunications transmissions, and similar items as defined by the Administrator.

(11) TELECOMMUNICATIONS TERMINAL EQUIPMENT.—The term "telecommunications terminal equipment" refers to the assembly of telecommunications equipment at the end of a circuit, normally located on the premises of the end user, that interfaces with telecommunications transmission facilities, and that is used to modify, convert, encode or otherwise prepare signals to be transmitted via such telecommunications facilities or that is used to modify, reconvert or carry signals received from such facilities, the purpose of which is to accomplish the mission for which the circuit was established.

SEC. ____34. PROVISIONS RELEVANT TO TELECOMMUNICATIONS PROGRAMS.

(a) ADMINISTRATION.—The Administrator shall be responsible for the administration of this subtitle.

(b) RULEMAKING.—Not later than 160 days after the date of enactment of this Act, the Administrator shall promulgate final regulations, under the notice and comment rulemaking requirements described in section 553 of title 5, United States Code, that establish the telecommunications programs authorized in this subtitle.

(c) PRIORITY.—The Administrator shall establish procedures to target the benefits of this subtitle to the rural areas and grant applicants that demonstrate the need for such assistance, taking into consideration the relative needs of all applicants, the needs of the affected rural communities, and the financial ability of the applicants to otherwise secure or create the telecommunications systems.

(d) WAIVERS.—If the Administrator determines that a compelling need is present, the Administrator may modify any of the definitions described in section ____33.

(e) EXPEDITING COORDINATED TELEPHONE LOANS.—The Administrator shall establish and implement procedures to assure that applications for loans and advances of funds submitted by local exchange carriers under this subtitle—

(1) to enable such exchange carriers to provide advanced telecommunications services in rural areas; and

(2) that contain elements of any telecommunications project approved by the Administrator under this subtitle that will be completed by such local telephone exchange carriers but that is not covered by the grants issued under this subtitle;

shall receive expedited consideration and determination.

(f) GRANT APPROVAL PROCESS.—

(1) MODIFICATIONS.—The Administrator shall have the authority to request modifications or changes in any proposal described in a grant application submitted under this subtitle.

(2) LEVELS OF FUNDING.—

(A) IN GENERAL.—The Administrator may offer to fund grant applications under this subtitle at any levels that the Administrator considers appropriate but not exceeding any percentage levels described in this subtitle.

(B) CONSIDERATIONS.—The Administrator shall provide grant funding in amounts based on—

(i) the worthiness of the application;

(ii) the financial needs of the applicant for the grant assistance;

(iii) the need of the affected rural communities for the proposed projects; and

(iv) other factors determined appropriate by the Administrator;

after taking into consideration the nationwide demands for grant assistance and the cost-benefit of any proposed purchases or leases of telecommunications transmission facilities, telecommunications terminal equipment, computer network components, and other equipment or facilities.

(g) JOINT USE OF TELECOMMUNICATIONS TRANSMISSIONS FACILITIES.—In issuing regulations implementing this subtitle, and in requesting changes in, or approving applications for grants, the Administrator shall give a priority to the extent reasonable and appropriate to provide funding for such facilities that can be jointly shared regarding projects established under this subtitle.

(h) EXPEDITED LOANS FOR TELEPHONE TRANSMISSION FACILITIES.—

(1) IN GENERAL.—Grants to cover the costs of installing telecommunication transmission facilities shall not be provided to approved end users if the local telephone exchange carrier providing telephone service, as defined in section 203(a) of the Rural Electrification Act of 1936 (7 U.S.C. 924), will install such facilities through the use of expedited telephone loans as described in subsection (e) under the conditions and deadlines described in this section or through other financing procedures.

(2) NOTIFICATION OF LOCAL EXCHANGE CARRIER.—Applicants for grants for a rural telecommunications program established under this subtitle shall notify the appropriate local telephone exchange carrier regarding the application filed with the Administrator for assistance under this subtitle and shall attempt to work with such carrier in developing the rural telecommunications project.

(3) DEADLINE IMPOSED ON THE ADMINISTRATOR.—The Administrator shall, not later than 45 days after the receipt of the completed application, respond to such completed application for an expedited telephone loan. The Administrator shall notify the applicant in writing of its decision regarding each such expedited loan application.

SEC. ____35. RURAL COMMUNITY ACCESS TO ADVANCED TELECOMMUNICATIONS.

(a) PURPOSE.—

(1) IN GENERAL.—It is the purpose of the program established under this section to encourage and improve the use of telecommunications, computer networks, and related advanced technologies, by persons associated with end users, including students and teachers, medical professionals, small businesses, and other residents living in rural areas associated with rural community facilities in rural areas.

(2) GRANTS.—The program established under this section shall make grants available to end users to fund up to 100 percent of each comprehensive rural telecommunications plan as approved by the Administrator.

(b) GRANTS.—

(1) GENERAL AUTHORIZATION.—The Administrator is authorized to make grants to accomplish the purposes of the program established under this section in amounts that shall not exceed the levels set forth in paragraph (3).

(2) DISBURSEMENT.—In order to facilitate appropriate planning for, and continuity of the program established under this section, funds appropriated by Congress during a particular year may be committed by the Administrator for disbursement in a subsequent year or years, and funds appropriated and committed during a year may exceed the limitations described in paragraph (1). Funds appropriated pursuant to this section shall remain available until expended.

(3) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out the provisions of this subtitle, $25,000,000 in fiscal year 1991, $50,000,000 in each of the fiscal years 1992 and 1993, and $60,000,000 in each of the fiscal years 1994 and 1995. Amounts appropriated under this subsection shall remain available until expended.

(4) USE OF FUNDS.—Grants under this section shall be made available to end users to be used for facilities, equipment, activities, and other uses as described in the approved rural telecommunications plan to achieve the purpose of this section, including—

(A) the development and acquisition of instructional programming;

(B) the development and acquisition, through lease or purchase, of computer hardware and software, audio and visual equipment, computer network components, telecommunications terminal equipment, telecommunications transmission facilities, data terminal equipment, or interactive video equipment, and other facilities that would further the purposes of the programs authorized by this section;

(C) providing technical assistance and instruction for the development or use of such programming, equipment, or facilities; or

(D) other uses that are consistent with achieving the purposes of this section as approved by the Administrator.

(5) Under the conditions described in section ____34(i), expedited loans may also be provided, to carry out any medical link project, to local exchange carriers providing telephone service, as defined in section ____33(a) of the Rural Electrification Act of 1936 (7 U.S.C. 924(a)), to cover the costs of telecommunications transmission facilities.

(6) INFORMATIONAL EFFORTS.—The Administrator shall establish and implement procedures to carry out informational efforts to advise potential end users located in rural areas of each State about the program authorized by this section.

(7) LIMITS ON GRANTS.—Grants awarded under this section for an end user shall not be used for the salaries or expenses of an end user.

(c) REGULATIONS.—Not later than 160 days after the date of enactment of this Act, the Administrator shall, in addition to promulgating the regulations described in section ____34(b), establish a priority system for awarding grants to end users located in rural areas that are most in need of enhanced communications to carry out the purposes of this section.

Subtitle C—Focus on Rural America by the Department of Agriculture

SEC. ____41. EXTENSION SERVICE.

Section 502 of the Rural Development Act of 1972 (7 U.S.C. 2662) is amended by adding at the end thereof the following new subsection:

"(g) RURAL ECONOMIC AND BUSINESS DEVELOPMENT.—

"(1) IN GENERAL.—The Secretary shall establish an Extension Service rural economic and business development program to enable States or counties to employ specialists as Cooperative Extension Service staff of the State or county to assist individuals in creating new businesses, including cooperatives, or to assist existing businesses, and to assist such businesses regarding advanced telecommunications, computer technologies, technical or management assistance, business and financial planning, and other related matters, and to assist community leaders in community economic analysis and strategic planning.

"(2) FUNCTION OF SPECIALISTS.—Specialists employed under paragraph (1) shall provide economic development information and assistance concerning new business creation, business planning and advice, advanced telecommunications, business management, computer operations, and other technical assistance to community leaders and private sector entrepreneurs and cooperatives operating in the State or county that employs such specialists.

"(3) PROCEDURES AND LIMITATIONS.—The Secretary shall establish policies, procedures and limitations that shall apply to States and counties that desire to participate in the program established under this subsection. States and counties shall determine the types of rural economic and business development specialists that are needed by such States and counties. In States with land-grant colleges and universities eligible to receive funds under the Act of July 2, 1862 (7 U.S.C. 301 et seq.), and the Act of August 30, 1890 (7 U.S.C. 321 et seq.), including Tuskegee University, such eligible institutions shall mutually determine the types of rural economic and business development specialists needed.

"(4) PAYMENT OF SALARY.—The Secretary shall make grants to States and counties that participate in the program established under this section in an amount equal to 60 percent of the total amount of the salary paid to any specialists employed under such program, and the State or county shall provide funds for the remaining 40 percent of such salary. Land-grant colleges and universities eligible to receive funds under the Act of August 30, 1890 (7 U.S.C. 321 et seq.), including Tuskegee University, shall be exempt from the 40 percent salary matching requirement.

"(5) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated $5,000,000 in fiscal year 1991, $10,000,000 in fiscal year 1992, $15,000,000 in fiscal year 1993, and $20,000,000 in fiscal year 1994 and each subsequent fiscal year, to carry out this section. Amounts appropriated under this section shall remain available until expended.

"(6) COORDINATION.—The Secretary shall ensure that the activities of the Extension Service rural economic and business development program established under section 502(g) of the Rural Development Act of 1972 (7 U.S.C. 2662(g)) are coordinated with the Small Business Administration to ensure that there is no duplication of activities in any local area, county or region.".

SEC. ____42. RURAL DEVELOPMENT ASSISTANCE INFORMATION AND AVAILABILITY.

The Rural Development Act of 1972 (7 U.S.C. 2651 et seq.) is amended by adding at the end thereof the following new sections:

"SEC. 509. NEED AND AVAILABILITY OF RURAL DEVELOPMENT ASSISTANCE.

"(a) ESTABLISHMENT OF PROGRAM.—Not later than 180 days after the date of enactment of this section, the Secretary shall establish a program to study economically distressed counties in a variety of States that have high concentrations of nonmetropolitan counties with low per capita income or nonmetropolitan counties experiencing high rates of outmigration.

"(b) EVALUATION.—When conducting a study of counties under subsection (a), the Secretary shall evaluate the need of such counties for rural development assistance, the nature of the assistance needed, and the availability of such assistance.

"(c) REPORT.—Not later than September 30, of each of the fiscal years 1991 through 1994, the Secretary shall prepare and submit, to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, a report that contains the results of the studies and evaluations conducted under this section and on any action taken by the Secretary to improve economic conditions in rural counties.

"(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as may be necessary to carry out this section.

"SEC. 510. RURAL DEVELOPMENT ASSISTANCE INFORMATION.

"(a) ESTABLISHMENT OF PROGRAM.—The Secretary shall establish a program, to be operated in conjunction with the National Rural Information Center Clearinghouse established within the National Agricultural Library, to provide information to local rural communities, nonmetropolitan counties, and rural areas concerning rural development matters and the availability of Federal rural development assistance.

"(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as may be necessary to carry out this section.".

SEC. ____43. REPORT ON COORDINATION OF RURAL DEVELOPMENT ACTIVITIES.

Not later than September 1, 1991, the Secretary shall prepare and submit, to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, a report that contains the recommendations of the Secretary concerning better coordination of the rural development activities of the Farmers Home Administration, the Forest Service, the Soil Conservation Service, the Agricultural Research Service, the Agricultural Stabilization and Conservation Service, the Agricultural Cooperative Service, the Rural Electrification Administration, the Extension Service, and the Office of Transportation.

SEC. ____44. REPORT ON DATA PROCESSING FEASIBILITY IN RURAL AREAS.

(a) STUDY.—Not later than 90 days after the date of enactment of this Act, the Secretary shall conduct a study that—

(1) assesses the data processing functions administered by the Secretary;

(2) analyzes whether or not the current data processing functions of the Department of Agriculture, and the future processing functions, may be conducted in rural areas at similar or reduced costs; and

(3) assesses any other information that the Secretary determines appropriate to analyze the potential for locating current and expanded data processing jobs in rural areas.

(b) REPORT.—Not later than 270 days after the date of enactment of this Act, the Secretary shall prepare and submit, to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, a report that contains the results of the study conducted under subsection (a).

(c) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section $250,000.

Subtitle D—Rural Business and Emergency Assistance

SEC. ____45. LOCAL TECHNICAL ASSISTANCE GRANTS.

Section 306(a)(11) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)(11)) is amended to read as follows:

"(11)(A)(i) The Secretary may make grants, not to exceed $15,000,000 annually, to public bodies, private non profit community development corporations or entities, or such other agencies as the Secretary may select to enable such recipients—

"(I) to identify and analyze business opportunities, including opportunities in export markets, that will use local rural economic and human resources;

"(II) to identify, train, and provide technical assistance to existing or prospective rural entrepreneurs and managers;

"(III) to establish business support centers and otherwise assist in the creation of new rural businesses, the development of methods of financing local businesses, and enhancing the capacity of local individuals and entities to engage in sound economic activities; and

"(IV) to conduct regional, community, and local economic development planning and coordination, and leadership development.

"(ii) In awarding such grants, the Secretary shall consider, among other criteria to be established by the Secretary—

"(I) the extent to which the applicant provides development services in its rural service area; and

"(II) the capability of the applicant to carry out the purposes of this section.

"(iii) There are authorized to be appropriated to make grants under this subparagraph, $7,500,000 in each fiscal year.".

SEC. ____46. RURAL EMERGENCY ASSISTANCE LOANS.

Section 306(a)(11) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)(11)) (as amended by section ____45), is further amended by adding at the end thereof the following new subparagraph:

"(B)(i) The Secretary shall establish and implement a program to make loans for the benefit of any town or city that—

"(I) has a population of less than 20,000 individuals within its outer boundaries; and

"(II) is financially unable to obtain funds as quickly as needed to correct emergency conditions or situations needing urgent attention.

"(ii) The Secretary shall promulgate regulations—

"(I) targeting the program established under this subparagraph toward needy communities in rural areas;

"(II) setting forth a definition of 'emergency conditions or situations needing urgent attention'; and

"(III) requiring that the Secretary approve or reject applications within 30 days of their receipt.

"(iii) The Secretary shall limit the amount of loans provided to the same borrower under this subparagraph to $50,000, and the term of such loans shall not exceed 2 years.

"(iv) The Secretary may respond to the credit needs of rural towns or cities eligible to participate in the program authorized under this subparagraph by making loans that are eligible for refinancing after the expiration of the 2-year period described in clause (iii), and payments under such loans may be set at a level that is at a sufficiently low level during such 2-year period so that the financially troubled town or city can participate in the program established under this subparagraph. The Secretary shall assist such borrowers in obtaining financing through existing Farmers Home Administration programs so that such borrowers are able to pay the balance due on each loan at the end of such 2-year period.

"(v) There are authorized to be appropriated $2,500,000 for fiscal year 1991, and $5,000,000 for fiscal year 1992 and for each subsequent fiscal year, to carry out the emergency lending program authorized by the program established under this subparagraph.".

Subtitle E—National Rural Information Center Clearinghouse

SEC. ____51. NATIONAL RURAL INFORMATION CENTER CLEARINGHOUSE.

(a) ESTABLISHMENT.—The Secretary shall establish, within the National Agricultural Library, in coordination with the Extension Service, a National Rural Information Center Clearinghouse (hereinafter referred to in this subtitle as the "Clearinghouse") to perform the functions specified in subsection (b).

(b) FUNCTIONS.—The Clearinghouse shall provide and distribute information and data to any industry, organization, or Federal, State, or local government entity, on request, about programs and services provided by Federal, State, and local agencies and private nonprofit organizations and institutions under which individuals residing in, or organizations and State and local government entities operating in, a rural area may be eligible for any kind of assistance, including job training, education, health care, and economic development assistance, and emotional and financial counseling.

(c) FEDERAL AGENCIES.—On request of the Secretary, the head of a Federal agency shall provide to the Clearinghouse such information as the Secretary may request to carry out the functions specified in subsection (b).

(d) STATE AND LOCAL AGENCIES AND NONPROFIT ORGANIZATIONS.—The Secretary shall request State and local governments and private nonprofit organizations and institutions to provide to the Clearinghouse such information as such agencies and organizations may have about any program or service of such agencies, organizations, and institutions under which individuals residing in a rural area may be eligible for any kind of assistance, including job training, educational, health care, and economic development assistance, and emotional and financial counseling.

(e) AUTHORIZATION.—There are authorized to be appropriated to carry out this section $500,000 for each of the fiscal years 1991 through 1995.

Subtitle F—Water and Sewer Assistance

SEC. ____56. WATER AND WASTE FACILITY GRANTS.

Section 306(a)(2) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)(2)) is amended by striking out "$154,900,000 in any fiscal year" and inserting in lieu thereof "$194,900,000 in each of fiscal years 1991 and 1992, and $204,900,000 in each of the succeeding fiscal years.".

SEC. ____57. EMERGENCY COMMUNITY WATER ASSISTANCE GRANT PROGRAM.

(a) ESTABLISHMENT OF PROGRAM.—Subtitle A of the Consolidated Farm and Rural Development Act is amended by inserting after section 306A (as added by section ____22) the following new section:

"SEC. 306B. EMERGENCY COMMUNITY WATER ASSISTANCE GRANT PROGRAM.

"(a) IN GENERAL.—The Secretary shall provide grants in accordance with this section to assist the residents of rural areas and small communities to secure adequate quantities of safe water—

"(1) after a significant decline in the quantity or quality of water available from the water supplies of such rural areas and small communities; or

"(2) when repairs, partial replacement, or significant maintenance efforts on established water systems would remedy an acute shortage of quality water or would remedy a significant decline in the quantity or quality of water that is available.

"(b) PRIORITY.—In carrying out subsection (a), the Secretary shall give priority to projects described in subsection (a)(1), and provide at least 70 percent of all such grants to such projects.

"(c) ELIGIBILITY.—To be eligible to obtain a grant under this section, an applicant shall—

"(1) be a public or private nonprofit entity; and

"(2) in the case of a grant made under subsection (a)(1), demonstrate to the Secretary that the decline referred to in such subsection occurred within 2 years of the date the application was filed for such grant.

"(d) USES.—

"(1) IN GENERAL.—Grants made under this section may be used for waterline extensions from existing systems, laying of new waterlines, repairs, significant maintenance, digging of new wells, equipment replacement, hookup and tap fees, and any other appropriate purpose associated with developing sources of, or treating, storing, or distributing water, and to assist communities in complying with the requirements of the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.) or the Safe Drinking Water Act (42 U.S.C. 300f et seq.).

"(2) JOINT PROPOSALS.—Nothing in this section shall preclude rural communities from submitting joint proposals for emergency water assistance, subject to the restrictions contained in subsection (e). Such restrictions should be considered in the aggregate, depending on the number of communities involved.

"(e) RESTRICTIONS.—No grant provided under this section shall be used to assist any rural area or community that—

"(1) includes any area in any city or town with a population in excess of 5,000 inhabitants according to the most recent decennial census of the United States; or

"(2) has a median household income in excess of the State nonmetropolitan median household income according to the most recent decennial census of the United States.

Not less than 75 percent of the funds allocated under this section shall be allocated to rural communities with populations that do not exceed 3,000 inhabitants.

"(f) MAXIMUM GRANTS.—Grants made under this section may not exceed—

"(1) in the case of each grant made under subsection (a)(1), $500,000; and

"(2) in the case of each grant made under subsection (a)(2), $75,000.

"(g) FULL FUNDING.—Subject to subsection (e), grants under this section shall be made in an amount equal to 100 percent of the costs of the projects conducted under this section.

"(h) APPLICATION.—The Secretary shall develop a nationally competitive application process to award grants under this section. Such process shall include criteria for evaluating applications, including population, median household income, and the severity of the decline in quantity or quality of water. The Secretary shall make every effort to review and act on applications within 60 days of the date that such applications are submitted.

"(i) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section, $25,000,000 for fiscal year 1991, and $10,000,000 for fiscal year 1992, such sums to remain authorized until fully appropriated.".

(b) IMPLEMENTATION.—

(1) REGULATIONS.—The Secretary shall publish—

(A) interim final regulations to carry out section 306B of the Consolidated Farm and Rural Development Act not later than 45 days after the date of enactment of this Act; and

(B) final regulations to carry out section 306B of such Act not later than 90 days after the date of enactment of this Act.

(2) FUNDS.—

(A) OBLIGATION.—The Secretary shall designate 70 percent of the funds made available for the first fiscal year for which appropriations are made under section 306B(h) of the Consolidated Farm and Rural Development Act not later than 5 months after the date such funds are appropriated.

(B) RELEASE.—The Secretary may release funds prior to the issuance of final regulations under paragraph (1)(B) for grants under section 306B(a)(1) of Consolidated Farm and Rural Development Act.

SEC. ____58. SEWER AND WATER LENDING BY BANKS FOR COOPERATIVES.

The banks of the Farm Credit System that are authorized to extend credit under title III of the Farm Credit Act of 1971 (12 U.S.C. 2121, et seq.) are authorized to make and participate in loans and commitments, and to extend other technical and financial assistance for the purpose of the installation, expansion, or improvement of waste disposal facilities or drinking water facilities or systems, to any entity that has received or is eligible to receive a loan made or insured by the Secretary of Agriculture under section 306(a)(1) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)(1)).

SEC. ____59. RURAL WASTEWATER TREATMENT CIRCUIT RIDER GRANT PROGRAM.

(a) ESTABLISHMENT.—The Administrator of the Farmers Home Administration shall establish a national rural wastewater circuit rider grant program that shall be modeled after the existing National Rural Water Association Rural Water Circuit Rider Program that receives funding from the Farmers Home Administration.

(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated $4,000,000 each fiscal year to carry out the program established under subsection (a).

SEC. ____60. TECHNICAL ASSISTANCE FOR CERTAIN SOLID WASTE MANAGEMENT.

Section 310B(b) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1932(b)) is amended—

(1) by inserting "(1)" before "The Secretary"; and

(2) by adding at the end thereof the following new paragraph:

"(2) The Secretary may make grants to non-profit organizations for the provision of regional technical assistance to local and regional governments and related agencies for the purpose of reducing or eliminating pollution of water resources and improving the planning and management of solid waste disposal facilities. Grants made under this paragraph for technical assistance shall be made for 100 percent of the cost of such assistance.".

Subtitle G—Miscellaneous

SEC. ____71. MONITORING THE ECONOMIC PROGRESS OF RURAL AMERICA.

(a) BUREAU OF THE CENSUS.—The Director of the Bureau of the Census shall expand the data collection efforts of the Bureau to enable the Bureau to collect statistically significant data concerning the changing economic condition of rural counties and communities in the United States, including data on rural employment, poverty and income, and other information concerning the rural labor force.

(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated $1,000,000 for each fiscal year to carry out subsection (a).

SEC. ____72. HISTORIC PRESERVATION REQUIREMENTS.

With respect to applications for assistance under this Act, the Secretary of the Interior, in consultation with the Under Secretary of Agriculture for Small Community and Rural Development and the National Trust for Historic Preservation in recognition of its charter duties, shall prescribe and implement regulations concerning projects funded under this title and their relationship with the provisions of Acts entitled—

(1) "An Act to establish a program for the preservation of additional historic properties throughout the Nation, and for other purposes", approved October 15, 1966 (16 U.S.C. 470 et seq.); and

(2) "An Act to provide for the preservation of historical and archaeological data (including relics and specimens) which might otherwise be lost as a result of the construction of a dam", approved June 27, 1960 (16 U.S.C. 469 et seq.).

SEC. ____73. LOAN RATES APPLICABLE TO HEALTH CARE AND RELATED FACILITIES.

Section 307(a)(3) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1927(a)(3)) is amended by adding at the end thereof the following new subparagraph:

"(C) Notwithstanding the provisions of subparagraph (A), the Secretary shall establish loan rates for health care and related facilities that shall be based solely on the income of the area to be served, and such rates shall be otherwise consistent with the provisions of such subparagraph.".

SEC. ____74. ASSISTANCE TO COMMUNITIES DEPENDENT ON NATURAL RESOURCES.

(a) ADDITIONAL FUNDS FOR THE REFORESTATION TRUST FUND.—Section 303(b)(2) of Public Law 96-451, relating to the Reforestation Trust Fund (16 U.S.C. 1606a(b)(2)) is amended by striking "$30,000,000" and inserting "$40,000,000 (of which, $10,000,000, shall be subject to subsection (e))".

(b) ADDITIONAL PURPOSES FOR WHICH FUND AVAILABLE.—Section 303(d) of such Act (16 U.S.C. 1606a(d)) is amended—

(1) in paragraph (1) by striking out "and" at the end thereof;

(2) by redesignating paragraph (2) as paragraph (3); and

(3) by inserting after paragraph (1) the following:

"(2) economic diversification assistance to communities which are dependent to a significant degree upon Forest Service resource management decisions for their local economic activity; and".

(c) ASSISTANCE TO COMMUNITIES DEPENDENT ON NATURAL RESOURCES.—Section 303 of such Act (16 U.S.C. 1606a) is amended by adding at the end thereof the following new subsection:

"(e) In each fiscal year $10,000,000 of the amounts transferred to the Trust Fund by the Secretary under subsection (b)(2) shall be expended for purposes described in subsection (d)(2) and any such amount shall be available only as provided for in annual appropriations Acts.".

SEC. ____75. ASSISTING DISTRESSED RURAL HOSPITALS AND HEALTH CARE FACILITIES.

The Secretary shall establish and implement a program that is similar to the program established under section 353 of the Consolidated Farm and Rural Development Act (7 U.S.C. 2001), except that the debt restructuring and loan servicing procedures shall apply to delinquent community facility program loans (rather than delinquent farmer program loans) made by the Farmers Home Administration to a hospital or health care facility under section 306(a) of the Consolidated Farm and Rural Development Act (7 U.S.C. 306(a)). Not later than 120 days after the date of enactment of this Act, the Secretary shall promulgate regulations, as modeled after those promulgated under such section 353, that implement the program established under this section.

SEC. ____76. RURAL DEVELOPMENT RESEARCH ASSISTANCE.

Section 502 of the Rural Development Act of 1973 (7 U.S.C. 2662) (as amended by section ____41) is further amended by adding at the end thereof the following new subsection:

"(h) RESEARCH GRANTS.—

"(1) IN GENERAL.—In addition to the programs already conducted under this section, the Secretary shall also establish and carry out a program to award competitive research grants to land-grant colleges and universities, research foundations, and centers established by land-grant universities, State agricultural experiment stations, nonprofit organizations specializing in applied research, and to all colleges and universities having demonstrable capability in rural development research, as determined by the Secretary, to carry out research to improve economic competitiveness and diversification, support strategic planning for economic investments, improve human resources, and improve the data base for rural development decisionmaking in rural areas.

"(2) RURAL TECHNOLOGY TRANSFER AND INNOVATION.—The Secretary shall establish and implement a program to award matching grants to promote technology transfer, innovation, and new product development. Grantees shall include institutions described in paragraph (1) and other nonprofit organizations that have demonstrable capability in technology transfer, applied research, innovation, and new product development that will lead to economic growth and job creation in rural areas. Applicants for grants under this paragraph shall demonstrate the ability to provide, at a minimum, a one-to-one financial match.

"(3) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated $2,000,000 in each fiscal year to carry out this subsection. Amounts appropriated under this subsection shall remain available until expended.".

SEC. ____77. BUSINESS AND INDUSTRIAL LOAN PROGRAM APPLICATIONS.

Section 333A(a) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1983a(a)) is amended by adding at the end thereof the following new paragraph:

"(4) Notwithstanding paragraph (1), each application for a loan or loan guarantee under section 310B(a) that is to be disapproved by the Secretary solely because the Secretary lacks the necessary amount of funds to make such loan or guarantee shall not be disapproved but shall be placed in pending status. The Secretary shall retain such pending application and reconsider such application beginning on the date that sufficient funds become available. Not later than 60 days after funds become available regarding each pending application, the Secretary shall notify the applicant of the approval or disapproval of funding for the application.".

SEC. ____78. ANALYSIS BY OFFICE OF TECHNOLOGY ASSESSMENT.

(a) IN GENERAL.—The Office of Technology Assessment shall include, in a study of the effects of information age technology on rural America, an analysis of the feasibility of ensuring that rural citizens in their homes and schools have the ability to acquire, by computer, information in a national library.

(b) CONTENTS.—In conducting the analysis under subsection (a), the Office of Technology Assessment shall—

(1) evaluate, in consultation with the Librarian of Congress, the costs and benefits of establishing a national library whose volumes, periodicals, instructional materials, sound and video resources, and other data are accessible by individuals through their personal computers;

(2) assess the technological, regulatory or other impediments to the establishment of the library and information retrieval system described in paragraph (1), and the length of time required to establish such a library and retrieval system;

(3) describe the potential for the library and information described in paragraph (1) to provide rural citizens the opportunity to study and explore foreign languages, geography, math, science, history or other interests, as well as to exchange scholarly information and ideas with other users, and otherwise to engage in interactive study; and

(4) recommend to the Congress the measures that should be taken to establish the library and retrieval system described in paragraph (1).

SEC. ____79. SENSE OF THE CONGRESS CONCERNING TOLL RATE AVERAGING.

(a) FINDINGS.—Congress finds that—

(1) new technologies make it possible for previously isolated rural areas to compete for regional, national, and international business opportunities;

(2) such new business opportunities are made possible by modern communications, telecommunication, and satellite, and radio networks;

(3) the use of uniform averaged rates for toll calls of equal distance, duration, and class of service prevents price discrimination for telephone service to rural areas;

(4) the policy of toll rate averaging has long been recognized by Congress, the Federal Communications Commission, and the telecommunications industry as beneficial to the public interest;

(5) deaveraging may result in extreme price disparities between rural and urban areas due to the high cost of serving sparsely populated areas;

(6) higher rural toll rates could result in rural subscribers leaving the switched network; and

(7) the important relationship between toll rate averaging and universal service needs to be clarified.

(b) SENSE OF THE CONGRESS.—It is the sense of the Congress that toll rate averaging shall be defined as the cornerstone of universal service and that such policy, being in the public interest, shall be maintained.

SEC. ____80. NATIONAL ENDOWMENT FOR RURAL DEVELOPMENT.

(a) It is the sense of the Congress that a National Endowment for Rural Development should be established with the effective use of both public and private funds to maximize business development in rural communities in every feasible way.

(b)(1) The Executive Office of the President shall undertake a review of a National Endowment for Rural America, for the purposes of determining the desirability of such an Endowment for rural development.

(2) That review shall be completed by January 1, 1990 and shall make recommendations to the Congress on appropriate legislation to implement such an Endowment.

(3) Those recommendations should focus on, but not be limited to—

(A) the purposes and goals,

(B) the organizational structure with private and public participation,

(C) funding sources for the Endowment,

(D) eligible awardees of endowment.

SEC. ____81. GRANTS TO BROADCASTING SYSTEMS.

Section 310B(f) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1932(f)) is amended by adding at the end thereof the following new paragraph:

"(4) The Secretary may make grants to Statewide private non-profit public television systems, whose coverage area is predominately rural, for the purpose of demonstrating the effectiveness of such systems in providing information on agriculture and other issues of importance to farmers and other rural residents. Funds available under this paragraph may be used for capital equipment expenditures, start-up and program costs, and other costs necessary to the operation of such demonstrations.".

SEC. ____82. ECONOMIC IMPACT STATEMENTS.

When promulgating regulations concerning rural development activities after the date of enactment of this Act, the Federal agency or department promulgating such regulations shall issue an economic impact assessment concerning the effect of such regulations on rural communities and businesses.

SEC. ____83. NATIONAL RURAL DEVELOPMENT AND FINANCE CORPORATIONS.

Section 1323 of the Food Security Act of 1985 (7 U.S.C. 1932 note) is amended—

(1) by striking out "to September 30, 1988," wherever it appears therein and inserting in lieu thereof "to September 30, 1991,";

(2) in subsection (a)(4), by striking out "fiscal year ending September 30, 1987," and inserting in lieu thereof "fiscal years ending September 30, 1989, September 30, 1990, and September 30, 1991,";

(3) by adding at the end of subsection (a) the following new paragraphs:

"(6) Notwithstanding any other provision of law, lenders that have provided loans that are guaranteed under this subsection shall have limited reporting responsibilities, as determined by the Secretary, concerning such loans, and the National Rural Development and Finance Corporation shall be primarily responsible for the issuance of final reports concerning such loans.

"(7) Notwithstanding any other provision of law, loan guarantees provided under this subsection shall be for a period not to exceed 15 years."; and

(4) in subsection (b)(1)—

(A) by striking out "from funds transferred under paragraph (2)";

(B) by inserting the words "or expanding" after the word "establishing"; and

(C) by adding the following new sentence at the end thereof: "Such grants may also be made directly to affiliated statewide programs if the Corporation certifies to the Secretary that they are able to establish effective, ongoing State programs or rural development and revolving finance."; and

(5) by adding at the end thereof the following new subsection:

"(c) Nonprofit national rural development and finance corporations and affiliated Statewide programs that receive grants under subsections (a) or (b) may use not to exceed 10 percent of the amount of such grants over a 2-year period for program operation and administration costs.".

BENTSEN AMENDMENT NO. 2352

Mr. LEAHY (for Mr. BENTSEN) proposed an amendment to the bill S. 2380, supra, as follows:

In S. 2830, in the appropriate place insert the following:

Section 1231 of the Food Security Act of 1985 (16 U.S.C. 3831) is amended by adding at the end thereof the following new subsection:

"(k) For purposes of determining the eligibility of land to be placed in the conservation reserve established under this chapter, land shall be considered planted to an agricultural commodity during a crop year if an action of the Secretary prevented land from being planted to the commodity during the crop year.".

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FINANCE

Mr. LEAHY. Mr. President, I ask unanimous consent that the Committee on Finance be authorized to meet during the session of the Senate on July 24, 1990, at 10 a.m. to hold a hearing on and to consider the nominations of Stanford G. Ross and David M. Walker to be members of the Boards of Trustees of the Federal Hospital Insurance Trust Fund; the Federal Old-Age and Survivors Insurance Trust Fund, the Federal Disability Insurance Trust Fund, and the Federal Supplementary Medical Insurance Trust Fund.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON LABOR

Mr. LEAHY. Mr. President, I ask unanimous consent that the Subcommittee on Labor of the Committee on Labor and Human Resources be authorized to meet during the session of the Senate on Tuesday, July 24, at 10 a.m., for a hearing on ERISA enforcement.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. LEAHY. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, July 24, at 10 a.m. to hold a closed session hearing on the threshold test ban and peaceful nuclear explosions treaties with the U.S.S.R., together with verification protocols for each treaty; Ex. N, 94-2 and Treaty Doc. 101-19.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON EUROPEAN AFFAIRS

Mr. LEAHY. Mr. President. I ask unanimous consent that the Subcommittee on European Affairs of the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, July 24, at 2 p.m. to hold a hearing on Soviet disunion.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. LEAHY. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and For-

estry be allowed to meet during the session of the Senate on July 24 at 10 a.m. to hold a hearing on S. 2426, the National Tree Trust Act of 1990.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. LEAHY. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be allowed to meet during the session of the Senate, Tuesday, July 24, 1990, at 10 a.m. to conduct a hearing on the Capital Markets Competition, Stability, and Fairness Act of 1990.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON WATER AND POWER

Mr. LEAHY. Mr. President, I ask unanimous consent that the Subcommittee on Water and Power of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate, 10 a.m., Tuesday, July 24, 1990, for a hearing to receive testimony on S. 2807, the Grand Canyon Protection Act; and S. 1556, a bill to designate the Salt-Gila Aqueduct of the central Arizona project as the "Fannin-McFarland Aqueduct."

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMUNICATIONS SUBCOMMITTEE

Mr. LEAHY. Mr. President, I ask unanimous consent that the Communications Subcommittee, of the Committee on Commerce, Science, and Transportation, be authorized to meet during the session of the Senate on July 24, 1990, at 10:30 a.m. on S. 2800, the Communications Competitiveness and Infrastructure Modernization Act of 1990.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON WATER AND POWER

Mr. LEAHY. Mr. President, I ask unanimous consent that the Subcommittee on Water and Power of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate, 2 p.m., Tuesday, July 24, 1990, for a hearing to receive testimony on H.R. 3694, a bill to authorize reimbursement by the Secretary of the Interior of certain expenditures at the Minidoka project, Idaho and Wyoming; S. 1118, a bill to provide for the transfer of the Platoro Reservoir to the Conejos Water Conservancy District; S. 1932, a bill to provide further relief to the Vermejo Conservancy District from its repayment obligation; S. 1590, a bill to transfer certain rights-of-way to the Elephant Butte Irrigation District of New Mexico, and for other purposes; and S. 2716, a bill to amend the Warren Act to expand the purposes for which excess storage or carrying capacity in reclamation projects may be used, and for other purposes.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. LEAHY. Mr. President I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Tuesday, July 24, 1990, at 2 p.m. to hold a closed hearing on intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON ANTITRUST, MONOPOLIES, AND BUSINESS RIGHTS

Mr. LEAHY. Mr. President I ask unanimous consetn that the Subcommittee on Antitrust, Monopolies, and Business Rights, of the Committee on the Judiciary, be authorized to meet during the session of the Senate on July 24, 1990, at 2 p.m., to hold a markup on the savings and loan investigation.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. LEAHY. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on July 24, 1990, 10 a.m. to hold a hearing on the savings and loan fraud.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON HOUSING AND URBAN AFFAIRS

Mr. LEAHY. Mr. President, I ask unanimous consent that the Subcommittee on Housing and Urban Affairs of the Committee on Banking, Housing, and Urban Affairs be allowed to meet during the session of the Senate, Tuseday, July 24, 1990, at 10 a.m. to conduct a hearing on the actuarial soundness of the FHA fund.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. LEAHY. Mr. President, I ask unanimous consent that the Committee on Government Affairs be authorized to meet on Tuesday, July 24, 9:30 a.m. for a hearing on the subject: oversight of "high Risk" asset forfeiture programs at the Justice Department and Customs Service.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

ARMENIA

● Mr. LIEBERMAN. Mr. President, the collapse of communism in much of Eastern Europe and its decline in the Soviet Union has revealed astounding depths of poverty. The food, clothing, shelter, and medical care that we take for granted in the West are luxury items in these areas. In some cases, their main export is becoming their best educated people.

But as bad as conditions generally are in the former Soviet bloc, they are particularly dismal in Armenia. Five hundred thousand Armenians lost their homes in the earthquake on December 7, 1988. Many still live in tents. Conditions have become so serious that about 300 Armenians took refuge for more than 5 months earlier in the year in the Armenians Consulate in Moscow. They slept on the floor and suffered from dysentery; some went on a hunger strike for several weeks to protest these wretched conditions. Soviet authorities refused to find them homes for fear of attracting more impoverished refugees from Armenia.

Homelessness in Armenia is only part of the problem. The earthquake caused an enormous amount of psychological damage to the survivors, particularly children. The case of Meline, a 5 year old, is illustrative. She was from Spitak, the epicenter of the earthquake, and was found buried beneath the rubble in the arms of her dead mother. Although she was unharmed, she did not utter a single sound or even look at another human being for 5 months. It is doubtful that children like Meline will ever fully recover.

As if the earthquake was not enough, a second tragedy was visited upon the Armenians earlier this year by militant nationalists from Azerbaijan. Attacks against defenseless Armenians last January left more than 100 dead and 250 injured. As many as 300,000 Armenians fled the ensuing violence or were deported by Azeris. This, of course, added to the crisis in housing in Armenia caused by the earthquake.

If the Armenians of Azerbaijan have suffered from pogroms, the 170,000 Armenians of Nagorno-Karabagh are undergoing a war of attrition. This Armenians enclave, which was arbitrarily attached to Azerbaijan in 1921 by Stalin, has had its railroad lines cut periodically by Azeri guerrillas. So just as the Berlin Wall has come down, we see another wall slowly being constructed around Nagorno-Karabagh. Soviet authorities have not countered the blockade as vigorously as they should.

What can America do to help Armenia? First, we should impress upon Soviet officials that it is vital that the blockade of Nagorno-Karabagh be lifted indefinitively. We should urge that Nagorno-Karabagh should be eventually returned to the Armenian Republic. Until their eventual reunification, we should insist that the physical barriers be removed to enable Armenia and Karabagh to cooperate econonically and culturally.

Second, we should have better sources of information about Nagorno-Karabagh and the Armenian Republic. As of now, U.S. diplomats rarely visit there because of travel restrictions and the distances from Moscow and Leningard. We should establish a consulate in the Armenian capital of Yerevan, as Senator HARKIN has suggested, to monitor political and economic conditions. Projects such as the Armenian Relief Society and Johns Hopkins University's data base for earthquake survivors should be encouraged.

Third, the United States Government should complement the exceptional assistance that has been provided by American-American private individuals and organizations. While we have already provided assistance through the International Red Cross, I believe that we should consider direct aid to the Republic of Armenia in future appropriations bills. Food, medical supplies, and shelter are urgently needed.

Fourth, American businesses should consider investments in the Republic of Armenia. Economic reform has progressed more quickly in Armenia, where the dead-hand of the command economy was never as strong as in Russia. Unlike other Soviet republics which have tended to specialize in heavy industry, Armenia already has some highly developed sectors in electronics, computers, and medical equipment. The creation of additional investment in these areas is badly needed.

Finally, American doctors and psychologists should contact the Armenian-American organizations that have done such splendid work. Armenian-American doctors have offered their services free of charge in the United States and in Armenia. Armenian-American psychologists have helped to deal with post traumatic syndrome, which has ravaged the lives of survivors such as Meline. Hopefully, the example of Armenian-Americans will inspire other Americans to help Armenia.

Mr. President, the hopeful headlines coming out of Eastern Europe and the Soviet Union should not obscure the tragedies that have beset the Armenian people during the last several years. As welcome as glasnost has been, it has unleashed ethnic turmoil that has led to atrocities against Armenians. And, as welcome as the promise of perestroika has been, it has not yet been able to repair the ravages of the earthquake.

Armenia needs the world's help. It needs America's help in particular. Let us put Armenia high on our list of priorities. Let us never forget what is arguably the poorest region in Europe or the Soviet Union.●

DAY CARE FOR THE ELDERLY

● Mr. SIMON. Mr. President, we have an aging society. The average life expectency has increased from 47 years at the beginning of this century to approximately 75 years in 1990. And there is no evidence to suggest that this trend won't continue.

While this is a wonderful change and one that I hope continues, there is the underlying problem of ill health and, ultimately, dependency upon others for care. In spite of significant advances, science has not been able to keep step and ensure that our old years truly are our golden years. All too often, old age is accomplished by the onset of Alzheimer's and other disabling diseases. The question of who will provide for these parents, grandparents, elderly aunts and uncles, is answered, in most cases, by the traditional caregivers—women.

Last week, Newsweek's cover story highlighted this problem facing women. Despite changes in our society, women are still the primary caregivers. As the article emphasizes, men are increasingly sharing this responsibility, but three-fourths of the caregivers still are women. The implications of this are profound. All too often, women have to make enormous personal sacrifices. Aside from the heavy emotional burden accompanying such care, there are professional and financial ramifications. In many cases, the caregivers work full time and take care of their elderly relatives: both of which deserve full attention. Work productivity, careers, and personal lives suffer as these caregivers struggle under their burden. This cannot be allowed to continue—the costs to women and society are too great.

It is imperative that Congress move quickly to establish day care for the elderly. We must provide sufficient resources to enable these caregivers to remain productive, participating members of our society while guaranteeing a safe, secure environment for our loved ones. There is no question of the social benefits to be gained by this action.

I urge my colleagues to take a few minutes to read the Newsweek article and think about what has been written. I hope this article will help persuade others of the urgency of this situation, and ask for consent that it be printed in full in the RECORD.

The article follows:

[From Newsweek, July 16, 1990]

AGING: TRADING PLACES

Like many daughters of aging parents, Sandy Berman didn't recognize at first how far her mother and father had slipped. "You are so used to your parents being mentally competent that you don't realize what you're dealing with for a long time," says the Northridge, Calif., schoolteacher, 47. Her parents had been living with trash piling up in their home for almost a year when Berman finally convinced them to move closer. But the move only hastened their decline. Berman's father, 83, became forgetful and overdosed on his insulin. Her mother, 74, couldn't find her way from the bedroom to the bathroom. For months, Berman called every morning before going to work, and stopped by every afternoon. "I was going to make everything right, and better and perfect," she says. "But everything I did turned into mush."

While her mother was sweet and cooperative, Berman says, age turned her father mean. He called at all hours of the night and thought his daughter was stealing his money. He hired a detective and changed the locks on the door. Berman was haunted by anxiety attacks. Her job teaching third grade was her only refuge. "When the bell rang at the end of the day, my stomach started to clench," she says. She worried that she was neglecting her husband and son, and longed to be mothered herself again. She lost 30 pounds and had fantasies of running away: "San Fernando Valley schoolteacher disappears. No one knows why she didn't come home for dinner * * *"

In February 1989, Berman snapped. "I was nurturing at home, at school and at my parents', and getting nothing back," she says. She quit work and stopped seeing her parents for two months, all the while making decisions for them with the help of a geriatric counselor and a lawyer. Diagnosed with Alzheimer's disease and paranoia, her father went from one nursing facility to another, and died in May 1989. Berman found a board-and-care home for her mother and enrolled her in an adult day-care center to keep her mind stimulated. These days, Berman visits her twice a month, and calls once a week, though her mother doesn't seem to know if she has called or not. Berman has returned to work, but she still wonders—and always will—"Did I do the right thing?"

Anguish, frustration, devotion and love. A fierce tangle of emotions comes with parenting one's aged parents, and there isn't time to sort out the feelings, let alone make dinner, fold the laundry and get to work. More than 6 million elderly Americans need help with such basics as getting out of bed and going to the bathroom; millions more can't manage meals, money or transportation. Most are cared for by family members, at home, for free—and most families wouldn't have it any other way. There are myriad variations: "children" in their 60s looking after parents in their 80s; spouses spending their golden years tending ailing mates; empty-nesters who had paid the last tuition check only to have an aged relative move in. Increasingly, men are shouldering such responsibilities. Still, three fourths of those caring for the elderly are women, as it has always been. "Until the last couple of decades, women were home," explains Diane Piktialis of Work/Family Directions, a Boston consulting firm. "Caregiving was their job."

But today they have other jobs as well. More than half the women who care for elderly relatives also work outside the home; nearly 40 percent are still raising children of their own. In fact, just when many women on the "Mommy Track" thought they could get back to their careers, some are finding themselves on an even longer "Daughter Track," with their parents, or their husband's parents, growing frail. The average American woman will spend 17 years raising children and 18 years helping aged parents, according to a 1988 U.S. House of Repre-

sentatives report. As the population ages and chronic, disabling conditions become more common, many more families will care for aged relatives. And because they delayed childbirth, more couples will find themselves "sandwiched" between child care and elder care. The oldest baby boomers are now in their mid-40s; their parents are mostly in their late 60s and early 70s, when disabilities tend to begin. In the next few years, predicts Dana Friedman of the Families and Work Institute, there will be a "groundswell of baby boomers experiencing these problems."

The strains on women, long evident in their personal lives, are now showing up in the workplace. In recent years, about 14 percent of caregivers to the elderly have switched from full- to part-time jobs and 12 percent have left the work force, according to the American Association of Retired Persons. Another 28 percent have considered quitting their jobs, other studies have found. That's just what's aboveboard. Many employees are afraid to let on that they spent that "sick day" taking Mom to the doctor, visiting nursing homes or applying for Medicare. Many women shop, cook and clean for their parents before work, after work and on lunch hours, stealing time to confer on the phone during the day "Caring for a dependent adult has become, for many, a second full-time job," says Bernard M. Kilbourn, a former regional director of the U.S. Health and Human Services Department, now with a consulting group, Caregivers Guidance Systems, Inc.

To date, only about 3 percent of U.S. companies have policies that assist employees caring for the elderly. But Friedman predicts that such programs will become "the new, pioneering benefit of the 1990s." Businesses may have no choice. With the baby bust sharply reducing the number of young workers entering the job market, the U.S. Bureau of Labor Statistics warns that 60 percent of the growth in the labor force this decade will be women, virtually all aged 35 to 54. "This is the age group that's feeling the brunt of child-care responsibilities," says the BLS's Jesse Benjamin. "This is also the age group where elder care hits. It's a double whammy."

Congress is encouraging more family-friendly work policies—at least, it has tried. After five years of debate, lawmakers recently passed the Family and Medical Leave Act, requiring companies with more than 50 employees to grant them up to 12 weeks' unpaid leave to care for newborn or adopted children or relatives who are seriously ill. But President George Bush vetoed the bill, on the ground that government should not dictate corporate benefits.

American society is just waking up to the needs of an aging population. Even the words "elder care" and "caregiver" are new to the lexicon. Now, "there's a name and a description, and people are beginning to say, 'I fit into that' ", says Louise Fradkin, cofounder of the support group Children of Aging Parents (CAPS), which has more than 100 chapters nationwide. For years Fradkin says, caring for aged relatives was a hidden responsibility, one that most women assumed in silence. Even the major feminist groups have been slow to make it a cause. The National Organization for Women, for example, has been more concerned with abortion rights and advancement for women in the workplace than with family roles. "The problem today's midlife woman faces is that the rhetoric of the '70s and the realities of the '90s are somewhat discordant," says Michael Creedon of the National Council on the Aging.

Only the Older Women's League (OWL), a Washington advocacy group, has made elder care a pressing issue. "No matter what else we talk about, our members always come back to caregiving—it has a big impact on all their other roles," says OWL executive director Joan Kuriansky. "We get letters from women who are taking care of their children, and their parents and possibly their parents. They are running from place to place. How do we expect them to do that and stay employed?"

That is the dilemma of the Daughter Track. While women have become a major force in the American workplace, their roles as caregivers remain entrenched in the expectations of society and individual families. "Often it's the women's own sense of what's required of her," says Kuriansky. "Some of it is emotional. Some of it is economic—she may feel that she cannot contribute financially as much as a man does." And just as with child care, says CAPS's Fradkin, "women feel they have to be superwomen and do it all themselves."

Those who do ask for help at home are often frustrated. Many husbands are unable—or unwilling—to confront the emotional demands of elder care, even when the aged parents are their own. Two years ago, Pamela Resnick of Coral Springs, Fla., quit her job and moved her ailing father-in-law in. While he was in and out of hospitals, she says, "he always wanted to see me—not even my husband. My husband doesn't deal very well with that type of scene." Joan Segal, 49, who quit her job to care for her mother, threatened to leave her husband unless he helped her mother more Since then, Segal says, "He's so protective you'd think she was his own mother."

Grandchildren may also be swept into the changing family dynamics, and that adds to the guilt many women feel. Krissteen Davis, 43, a divorced accounting supervisor, has cut down her work hours since her 63-year-old mother, an Alzheimer's victim, came to live with her in Kansas City. Still, Davis's 13-year-old daughter must be home by 3:30 each day when her grandmother returns from an adult day-care center. "It's been hard on all of us," says Davis. Yet she says her mother "did for me when I was young. What's a couple of years out of my life?"

Time is often the most precious commodity for caregivers. "We were used to being George and Nancy with no kids at home," says Nancy Erbst, 38, of Minneapolis, whose mother-in-law, Hazel, lived with them for four years. "We used to take off on weekends and go camping. Our camping went down to one weekend in the summer." Nancy, an executive secretary, was also working to earn a bachelor's degree at the time. She would get up at 4 a.m. to study, then tend to Hazel before leaving for work at 7:45. Her husband's two grown daughters, who lived nearby, also helped watch over their grandmother until last spring, when her deteriorating health forced her into a nursing home. "It's what a family does for each other," Nancy says. "It's something you want to do."

Not all families rally so gracefully. Deciding who should do the caring, and where, can stir up old sibling rivalries—and create new bitterness. For several years, Linda Hunt, a 54-year-old Kansas widow, has been the primary caregiver for her mother, now in a nearby nursing home. Her brother has been mostly uninvolved. "Sometimes when he calls, he doesn't ask about her," she says. "It sets me hard against him."

Responsibility for an elderly relative usually falls to the woman who is nearest. And sometimes no one is close. Roughly one third of caregivers manage care for their aged parents long distance, assessing changing needs over the phone and with reports from neighbors. Even though her mother and father lived in a residential community that provided housekeeping and meals, Saretta Berlin, 60, flew from Philadelphia to Ft. Lauderdale, Fla., every 10 days during much of 1989, when her parents were failing. "I would tell myself that if I just made it to the plane, I would be OK," she says. "Then perfect strangers would ask me how I was doing, and the floodgates would open." Even now, with her father dead and her mother in a retirement home, Berlin calls daily and visits every three weeks or so.

As Berlin found, even when families put a parent in a nursing home, their responsibilities don't end. Many grown children rearrange their lives to visit as often as possible, and field lonely phone calls, night and day. Only about 10 percent of the disabled elderly are in such facilities—and the decision can haunt their families long afterward. Linda Hunt still feels guilty about putting her mother in a home three years ago—even though she was blind and Hunt was holding down two full-time jobs. "You think you should be able to do it all, but you can't," she says. "First you care for your children, then your mother. Pretty soon you just give your whole self to other people."

Unlike child care, the responsibilities of elder care often come suddenly. A stroke or broken hip can mean the difference between a parent living independently and needing round-the-block care. And while a child's needs can be planned for, an older person's requirements are often difficult to assess. Can Dad still manage in his own home? Will he need care for a few months—or many years? What's more, says Kilbourn, "in dealing with your parents, you do not have total control. Any decision * * * can be met with resistance if not total refusal to cooperate."

Reversing roles is one of the hardest aspects of caring for an aged parent. Kristeen Davis says her mother was "a really sharp lady—and one of my best friends" before Alzheimer's set it. Now, Davis says, "sometimes she just sits there like a little lump that used to be a person." Elderly people find it even harder to relinquish their old parental roles. Many are desperately afraid of burdening their busy children, yet desperately afraid of being alone.

Dot von Gerbig's mother and father moved in to help her in 1969, when she was a widow raising small children. Today, they still share her Honey Brook, Pa., home, along with her second husband and their 15-year old son. Von Gerbig's father, 92, is confined to a wheelchair, her mother, 84, is mentally confused, and both are legally blind. Before leaving for work at 7 a.m., von Gerbig arranges every aspect of their lives, laying out clothes and organizing food in the refrigerator, so they can manage by themselves until she returns. "So far, we're making it," says von Gerbig, 52. But she lives in fear that something will go wrong and make her break her vow to keep them out of a nursing home. What troubles her even more, she says, is how terribly cruel the aging process is. "It makes me angry and it makes me fearful," she says. "It's an awful thing that a person does a good job all his life and this is his reward."

Most caregivers lament that they can't do more for their parents. Some of the tough-

est constraints are financial. Medicare does not cover the costs of long-term care, anywhere. Medicare will pay for nursing homes, and home care in some states, but only after a patient has depleted his assets nearly to the poverty level. Thus, many elderly people exhaust their life savings paying for care, and families dig deep into their own pockets to help them.

Many married women, particularly those in low-paying jobs, find it cheaper to quit work and care for aging relatives themselves than to hire home health care. Professional women are less inclined to quit and more apt to hire help. Many are torn between the parents they cherish and the work they love. Just when many have gotten a long-awaited promotion, they find their parents in need of care.

Charlotte Darrow decided she had to abandon her career as a social psychologist at Yale and move to Ann Arbor, Mich., when her widowed mother fell ill in the late 1970s. She spend much of the next seven years cooking and chauffeuring for her. As a result, Darrow says, "I really lost everything—it was much too late to go back and recapture my career." She devoted the next six years to studying how 15 other professional women combined work and caregiving. Her manuscript tells how they hired help and sacrificed weekends, lunches and vacations to spend time with their parents. Despite enormous stresses, all 15 continued their careers. "What these women showed is that people don't have to say, 'My God, this is it!' " says Darrow, 67. "It is possible to go on with your life."

What can employers do to make that easier? One of the most helpful things is to acknowledge the situation. "Corporate America needs to create an environment where employees can say, 'I have a problem with an elder who needs care'," says OWL president Lou Glasse. The Travelers Companies was one of the first to do so; after a 1985 survey found that 28 percent of its workers over 30 cared for an aged parent, on an average of 10 hours a week, Travelers started a series of support programs. Today's leader may be The Stride Rite Corp., which this year opened the nation's first on-site intergenerational day-care center.

Other forward-looking firms have devised a wide range of programs and benefits. One of the most common, and least costly, is simply to educate employees about social services available in their communities. Some firms hold lunchtime seminars or "Caregiver Fairs," where local agencies describe their programs. Some publish detailed handbooks for employees, covering everything from how to select a nursing home to how to locate and pay for respite care. Growing numbers of companies also contract with private consulting firms that can help employees manage care even for relatives in distant cities. Work/Family Directions has developed programs for 21 national firms, linking their clients' employees with 175 agencies across the country. It also provides an 800 number for support and advice. In a few cities, government agencies provide similar services. Employees "don't want a way out of their caregiving responsibilities—they just want some help in coping," says Barbara Lepis, director of Partnership for Eldercare, a New York City program working with American Express, Philip Morris and J.P. Morgan.

The same Employee Assistance Programs (EAPs) that assist workers with drug and alcohol problems can often help with strains on the home front. In fact, EAP counselors frequently find that caregiving duties are at the root of employee's financial, marital or job-performance difficulties. Teresa Freeman, EAP manager at Travelers, says one employee was referred to her office because she was crying at work; another had been put on warning because she was unable to learn new skills. Both, it turned out, were caring for elderly parents and were cracking under the strain. Freeman formed a support group of caregiving employees. But other firms have found that support groups don't work well in situations where bosses and their subordinates may be reluctant to share intimate problems. Lepis says the chemistry works better when such sessions are called "caregiver exchanges" that deal with a specific topic, such as filling out a medical form, "Then we are able to get a cross-strata of the work force to commiserate together about this stupid form," she says.

Some firms are training supervisors to be compassionate about the demands workers face at home. Managers must also be reminded that the Mommy Track, and the Daughter Track, should not be slower roads to advancement. Otherwise, warned OWL in its 1989 Mother's Day report, "only orphans with no children could be placed on the fast track to professional success."

Growing numbers of firms are granting unpaid leaves to employees with family needs. IBM is perhaps the most generous. Full-time employees can take up to three years off, with benefits, and find their jobs waiting. "If we give our employees help in managing their personal lives, it helps us attract and retain the workers we need," says IBM spokesman Jim Smith. That has proved true at Aetna Life and Casualty as well. When it extended its family leave from a few weeks to as long as a year in 1988, the turnover rate among its female caregivers dropped from 22 to 13 percent. About 15 percent of U.S. companies offer flexible work hours. Some 35 percent of U.S. Sprint's 16,000 employees are on an "alternative" schedule—flextime, part time or job sharing, though most do so for child care or other reasons. Since January, Travelers has also granted every employee three "family-care days" a year that do not count as absences.

Alas, some elder-care programs are underutilized. In 1987, Remington Products offered to pay half the cost of respite care for workers' dependents during nonwork hours. Two years later, it dropped the program when fewer than six employees had signed up. Michael Creedon, who conceived the idea through his work at the neighboring University of Bridgeport (Conn.), speculates that Remington's highly ethnic work force may not have been comfortable with the idea of strangers in their home. Indeed, says OWL's Glasse, "many caregivers want to be so supportive of elders that they are reluctant to ask for help" and try to do it all on their own. Out of embarrassment, or their own individual work ethic, many employees are also reluctant to burden their bosses with family problems.

In the end, there is only so much the business world can do to help America's caregivers. Many liberal lawmakers and more than 100 special-interest groups are pressing the federal government to do more. In March, the U.S. Bipartisan Commission on Comprehensive Health Care proposed a giant new long-term care program that would guarantee home health care and three free months in a nursing home to all severely disabled Americans who need it, regardless of age or income. But the price tag—an estimated $42 billion a year—virtually assures that no legislative action will be taken any time soon.

Even without creating a massive new entitlement program, the federal government could do more to help the elderly and those who care for them. Federal funding for the network of social-service programs serving the elderly is a paltry $710 million a year; services are sparse and fragmented in many areas. Most offices are open only 9 to 5, forcing caregivers to deal with them during work hours. OWL is pressing the Social Security Administration to rewrite rules that penalize workers who take time out to care for childen or aged dependents. Upon retirement, a worker's monthly benefit is determined by averaging his or her earnings over the past 35 years. A zero is entered for any year not worked, no matter what the reason. Caregiving, says OWL executive director Kuriansky, "is a wonderful dimension of woman as nurturer—and it's something we don't want to undermine. But in playing that role, we want to make sure she is rewarded, not penalized."

Most women on the Daughter Track do not want to give up their family responsibilities—no matter what personal or professional sacrifices it entails. Many see their efforts as a chance to repay the time and care their parents gave them—a chance to say, again, I love you, before it's too late. What they would like is more understanding at work, more support from the men in their lives, more community services to help them—and a little applause from a world that often turns too fast to take time out for love.●

ONE MAN'S PURPOSE

● Mr. KERREY. Mr. President, I ask to have printed in the RECORD a newspaper article about Phil Sokolof of Omaha, NE, from the July 22, 1990, New York Times.

Phil Sokolof has gained national attention as a result of his crusade to encourage food companies to stop using coconut and palm oils in their products, because of the impact of these oils on cholesterol levels. Cholesterol has been identified as a major factor in heart attacks.

In promoting the use of alternatives to tropical oils which are saturated fats, Mr. Sokolof has proven that one individual can indeed make a positive difference in our society. I hope all Members will take his example to heart.

The article follows:

[From the New York Times, July 22, 1990]

ONE MAN WITH A PURPOSE TAKES ON HEART DISEASE

(By William Robbins)

OMAHA.—The "little guy out here in Omaha," as Phil Sokolof sees himself, has a new message for the giants of the fast-food industry. He has no plans to let up on them until he sees a lot of improvement in American diets.

"How can I stop as long as there are people out there I can help?" said Mr. Sokolof, a 67-year-old industrialist whose atten-

tion was focused on diet problems by a near-fatal heart attack 24 years ago.

For the last five years, Mr. Sokolof, a widower who prepares his own meals "with a microwave and a can opener," has been urging Americans to lower their cholesterol levels. For the last couple of years under the name of National Heart Savers Association, he has been financing a national advertising campaign against food companies he regards as offenders because of saturated fats in their products. He estimates that he has spent about $2.5 million so far in his crusade.

Mr. Sokolof's latest advertisement, which ran on July 3 in several newspapers including the New York Times, focused on the McDonald's Corporation and some of its rivals. "McDonald's, Your Hamburgers Still Have Too Much Fat!" it said, "and Your French Fries Still are Cooked with Beef Tallow." In a footnote, it said, "Both references are applicable to Burger King and Wendy's."

CONFIDENT OF IMPROVEMENT

"I can't say we're going to tear down the golden arches by the year 2000," Mr. Sokolof said in an interview here. "But I am confident that by the year 2000 they are going to be serving more healthful food under those golden arches."

Earlier, Mr. Sokolof ran a series of advertisements entitled "The Poisoning of America" that pictured products of several companies. His target was saturated fats used as ingredients, particularly coconut and palm oils. Saturated fats raise the level of cholesterol in the bloodstream; cholesterol has been identified as a major contributor to heart attacks.

A subsequent advertisement named a dozen food companies that had altered products to exclude saturated fats. The implication was that the changes had come in response to the advertising campaign.

Mr. Sokolof's attacks have stirred angry replies from several companies named in them, including McDonald's but some have indicated a grudging respect. Among independent specialists, observations have been mixed.

"HE DESERVES HIGH MARKS"

Spokesmen for McDonald's assail the advertisements as "absurd" or "reckless, misleading, the worst kind of sensationalism." And they say many McDonald's restaurants are experimenting with vegetable cooking oils.

Terry Thompson, a vice president of the Pillsbury Company, one of many food companies that have altered products, said: "My only observation then and now was that he was an effective communicator on an issue that was very important to him. He deserves high marks for that."

But he continued: "Like a lot of other food companies, Pillsbury's interest in reformulations preceded Mr. Sokolof's campaign. If anything, he probably accelerated some programs."

A FORTUNE IN CORNER BEADS

Philip Morton Sokolof was already a millionaire when he suffered his heart attack. Born in Omaha on Dec. 14, 1922, he was the son of a fruit-market owner who branched out into liquor stores and bars. Mr. Sokolof showed a childhood skill as a song-and-dance performer, and from the ages of 17 to 21, he earned his living on the road with a big band.

Following his father into business, Mr. Sokolof soon found himself in real estate and then in home building. In 1955 he found the niche in which he built his fortune. He bought a $15,000 metal-forming tool and began producing corner beads, and metal fittings that protect wallboard joints. Phillips Manufacturing, the company he formed to produce them, quickly became a success.

Meanwhile, he met and married Ruth Rosinsky, a woman who captured and held his admiration.

"She had an indomitable spirit," he said. His wife, who became ill at the age of 26 with a glandular cancer that finally caused her death in 1982, spent much of her life working with blind children while also bringing up the Sokolofs' two children.

Mr. Sokolof, always a compulsive worker, never had a hobby except bridge, a game at which he won many tournament events and became a life master. But he gave it up, complaining of a lack of time. Still he found time to pursue an interest in stock investments, a pursuit he credits as the source of part of his fortune, which he places as somewhere "in eight figures."

In 1966, when he was 43, came his heart attack, a surprise because he was slender, did not smoke and said he "was really into exercise, in great physical condition." After the heart attack, he discovered that his cholesterol level was dangerously high.

But it was not until 1984, when a Government study showed sharp reductions in heart attacks among people with low cholesterol levels, that he felt he had ammunition enough to start a national campaign.

In 1985 he started Heart Savers, an association with no membership rolls and with Mr. Sokolof as its sole supporter. That same year, in Grand Island, Neb., he started a program of cholesterol testing and soon replicated it in 16 other cities.

Mr. Sokolof summed up this way: "I have had great good fortune—being able to make a lot of money and being able to do something with it that I think is important." ●

THE ACTIVITIES OF UNESCO SINCE U.S. WITHDRAWAL: A REPORT BY THE SECRETARY OF STATE

● Mr. SIMON. Mr. President, all of us who had the opportunity to serve with Senator Robert T. Stafford of Vermont were impressed by him. He is a Republican who is proud of his party affiliation, but we all knew when he served here that he put the national interest first.

I particularly got to appreciate his leadership in the field of education.

I recently received a letter from him attaching a report from a committee that he headed.

One of the members of that committee is the distinguished member of the U.S. House from California, Congressman ESTEBAN TORRES. Another is Mary Hatwood Futrell, the former president of the National Education Association.

I ask, Mr. President, first, to insert the letter that he sent to me.

The letter follows:

UNITED NATIONS ASSOCIATION
OF THE UNITED STATES OF AMERICA,
Washington, DC.

Hon. PAUL SIMON,
Washington, DC.

DEAR PAUL: I appreciate your continued interest in my panel's work on the problems and progress of UNESCO. This is, after all, not exactly a burning campaign issue with the public at large, even if it is of interest to several sectors important to the country's future.

I enclose a copy of my final submission: a careful commentary on the State Department's recent report on UNESCO. After the year's work we had done on the issue, I was deeply disappointed by what came out of State—the review process was tightly controlled, the focus was very narrow, the questions it asked missed the real issues, and the findings were preordained. I would call it a fairly politicized report.

UNESCO is an issue that shouldn't just get lost in the shuffle. I am afraid that Congress may have to do some pushing on it. I'll be grateful for your help in trying to get a broad-based, balanced review process going by early 1991 in an appropriately neutral setting in the Administration.

I appreciate your help and continuing interest.

Sincerely,

ROBERT T. STAFFORD,
Chairman, UNA-USA Project on UNESCO.

Mr. SIMON. A commentary that he enclosed makes a number of points that we ought to be considering, as we look at the UNESCO situation.

At one point, the commentary states:

The Stafford panel postulated United States participation and leadership in the global system, including the United Nations agencies, as "normal"; U.S. nonparticipation in a major world agency only makes sense, the panel noted, if circumstances in the agency are abnormal and extraordinary.

Secretary Baker's report makes no mention of the broad context of U.S. participation in the multilateral system. Its fundamental perspective on such participation is implicit, but clear, in its assertion that:

As nonmembers, we are able to participate in and fund only those activities which are useful, effective, and unobjectionable from a political point of view.

This justification for nonmembership—that it allows a government to support only the programs that are immediately advantageous to it—would, if emulated by other states and applied to other international organizations, rapidly result in the disintegration of the postwar system of multilateral cooperation.

The Stafford panel had three sets of questions:

Are UNESCO's activities relevant to, and do they have an impact on, America's wide-ranging interests—in science, culture, education, human rights, and communication?

Are U.S. political objectives affected by UNESCO's actions?

Has the agency made progress in remedying the problems that the U.S. government cited as causes for American withdrawal? A corollary to this is the tactical question: If the United States does wish to press for additional reform of UNESCO, will continued nonparticipation strengthen or weaken American influence in the organization?

Frankly, those questions could be criticized because they did not ask a more fundamental question of whether UNESCO is contributing to a better

world and whether the United States presence on UNESCO could add strength to that contribution. Perhaps that is implied by the questions.

But the questions that were asked by the State Department's Bureau of International Organization Affairs in its review are clearly far too narrow and lack any sense of vision of how we build a better world. The State Department's questions were:

Is the United States able to protect its political interests as an observer?

What benefits could the United States expect to receive for the membership assessment of approximately $50 million per year?

Are the U.S. public and private institutions and individuals able to participate to the extent they desire in UNESCO activities? If not, is U.S. nonmembership the reason, or are there other factors, such as lack of funding, which are responsible.

A quote in one of the footnotes of the Stafford report is from Frank Press in behalf of the National Academy of Sciences. Many of us remember him as the President's science advisor. He is quoted from a hearing in Congress in 1989:

There is a consensus in the U.S. science and technology community that UNESCO is important and worth supporting under Federico Mayor. * * * From the perspective of the scientific community, a strong intergovernmental organization is essential to meet the increasingly urgent global problems that will confront us.

The Stafford report takes the various objections one by one and analyzes them, and I think effectively demolishes the criticisms of our participation.

On the Israeli/Palestinian issue, the Stafford report says:

The Stafford panel had noted (and shares) the U.S. concern about efforts by the Palestine Liberation Organization to secure voting membership in U.N. agencies, and international legitimacy, as the "State of Palestine." The Palestinians' application was turned aside at UNESCO, the panel concluded, in large part because its approval "would doom the chances of a hoped-for U.S. return in the coming year." But, concerned that Israel is "isolated and vulnerable while the U.S. is absent," the panel warned that if the U.S. is going to stay out of UNESCO, it will have scant leverage on this issue the next time around.

The I.O. report similarly concludes that hope for a U.S. return "was a key factor" in UNESCO members' decision not to seat the Palestinians. But the report is silent on how the U.S. can expect to see Palestinian membership denied next year, if member states conclude the United States will not rejoin anyway.

In one of the report's several passages that are critical of new Director-General Federico Mayor as an individual, it asserts that Mayor has "personally" paid considerable attention to the PLO while being "distant" from Israel. In this respect, the report cites a recent visit by Mayor to Israel (it does not mention that this was the first visit there by any Director-General in 15 years), claiming that Mayor "refused an offer to meet with the Israeli government" I.O. may have had faulty information. The Israeli government reportedly never invited him to come to Israel; and once there at the invitation of the Weizman Institute of Science, Mayor reports having met the prime minister, Yitzhak Shamir, and conferred with then-finance minister Shimon Peres and with foreign affairs vice-minister Samuel Hadas.

In the concluding paragraph the report states:

In what the I.O. report says and what it omits, it strays far from providing the balanced and comprehensive assessment needed by the nation's elected decisionmakers. Its narrow focus and contentious argumentation ignore and obscure the larger picture of UNESCO proposes, U.S. needs, and global interests. It does not attempt to contemplate the potential role that a revitalized UNESCO with vigorous American leadership might have in promoting peaceful change in an increasingly interdependent and multipolar world.

I ask that the full summary of the commentary of the Stafford panel be placed in the RECORD.

I urge my colleagues to look at this issue, which will be resurfacing again.

The summary follows:

COMMENTARY ON "THE ACTIVITIES OF UNESCO SINCE U.S. WITHDRAWAL: A REPORT BY THE SECRETARY OF STATE"

(Issued by the American Panel on UNESCO, convened by the United Nations Association of the USA)

On April 4, 1990, the Department of State announced that, based on its review of developments at the United Nations Educational, Scientific and Cultural Organization (UNESCO), "very little has changed since the United States withdrew at the end of 1984," and that a report detailing its findings would soon follow. The same day, the British Foreign Office issued its own statement describing progress at UNESCO but indicating the government was not yet prepared to rejoin. On April 17 the Secretary of State issued his report to the Congress on activities of UNESCO since the U.S. withdrawal.

The State Department report differs markedly in its tone and substance from both the British assessment and from the findings of an independent panel on UNESCO chaired by former Senator Robert Stafford and organized by the United Nations Association of the United States. In response to a number of requests from government officials and the nongovernmental community, the panel has released this assessment of the Secretary of State's report.

The report, prepared by the State Department's Bureau of International Organization Affairs (I.O.), offers justification, in the words of its conclusion, for "not reopening the question of whether to rejoin UNESCO." The document is a brief of arguments and objections in support of that contention, selective in its focus and facts. Given the perspective of the I.O. report and the questions it chooses to explore, it is not surprising that the conclusions it draws are rather different from those of the Stafford panel. In assessing the I.O. report, this commentary will at appropriate points contrast its approach and findings with those of the Stafford panel.

GENERAL PERSPECTIVE

The Stafford panel postulated United States participation and leadership in the global system, including the United Nations agencies, as "normal"; U.S. nonparticipation in a major world agency only makes sense, the panel noted, if circumstances in the agency are abnormal and extraordinary.

Secretary Baker's report makes no mention of the broad context of U.S. participation in the multilateral system. Its fundamental perspective on such participation is implicit, but clear, in its assertion that, "As non-members, we are able to participate in and fund only those activities which are useful, effective, and unobjectionable from a political point of view." This justification for nonmenbership—that it allows a government to support only the programs that are immediately advantageous to it—would, if emulated by other states and applied to other international organizations, rapidly result in the disintegration of the postwar system of multilateral cooperation.[1]

QUESTIONS FOR CONSIDERATION

The Stafford panel identified three basic questions at the outset of its inquiry:

Are UNESCO's activities relevant to, and do they have an impact on, America's wide-ranging interests—in science, culture, education, human rights and communication?

Are U.S. political objectives affected by UNESCO's actions?

Has the agency made progress in remedying the problems that the U.S. government cited as causes for American withdrawal? A corollary to this is the tactical question: If the United States does wish to press for additional reform of UNESCO, will continue nonparticipation strengthen or weaken American influence in the organization?

The panel organized its inquiry, and its report, around these questions. As a consequence, it devoted considerable attention to the issues and problems in education, science, culture, and communication on which international cooperation is needed, and to the contribution that UNESCO's program activities can or should make in addressing these needs.

The I.O. report does not survey, or even acknowledge, problems facing the world community in these sectors, and it does not consider whether or how international cooperation might help in addressing America's own problems and concerns in these fields. Nor does the report tarry over UNESCO's substantive program activities. The only attention given to the scope of the agency's efforts within its small budget is the repeated insistence that it should do less, although the report does not specify the program activities its authors think should be curtailed.

Instead, the I.O. report poses three somewhat different questions to guide its review:

Is the United States able to protect its political interests as an observer? Could we expect significantly better results as a member?

What benefits could the United States expect to receive for the membership assessment of approximately $50 million per year?

Are U.S. public and private institutions and individuals able to participate to the extent they desire in UNESCO activities? If

[1] In this vein, one linguistic idiosyncracy of the report acquires significance: its consistent use of the term "donors" to refer to member states that pay dues assessments. A donor, as Webster reminds us, is "one that donates"—i.e., "make[s] a gift" ("esp. to a charity or public institution"); and free-will offerings entail no obligation. Such usage admits of no obligations among states to contribute to structures advancing the common good of all the world community. It suggests a view of international relations fundamentally different from that undergirding the postwar framework of international institutions.

not, is U.S. non-membership the reason, or are there other factors, such as lack of funding, which are responsible?

This formulation accords apparent primacy to political concerns, ironically despite the U.S. complaint about "politicization" at UNESCO. In this context, membership meets the test of utility if it produces "significantly better" political outcomes. The value of membership dues is weighed in relation to the benefits the State receives. If American professionals' involvement in international activities sponsored by UNESCO is diminished, this may be attributed to other factors, like "lack of funding," rather than non-membership (even if non-membership may account for the absence of funding, much less loss of leadership positions).

Although the State Department report affirms that UNESCO activities in the three major areas of stated U.S. concerns at the time of our withdrawal are "elements bearing on [its] assessment," it seems significant that the above three questions—the ones on which, the report says, "[o]ur review of United States policy toward UNESCO has been based"—do not ask whether progress is being made on those concerns.

REVIEW PROCESS

The Stafford panel sought out the views of the professional communities active in UNESCO's fields of competence. Not only did it commission papers from outside experts in the various sectors to inform its deliberations; the panel conducted a survey among the many American nongovernmental organizations in science, education, culture, communication, and human rights with any international interest. The panel detailed the responses to the survey questionnaire in its report, *A Forum in Restoration*, and it listed all the citizen organizations whose governing bodies had endorsed renewed U.S. membership.[2]

In addition, the panel's major recommendation in its April 1990 Supplemental Statement was for an Administration review in "close consultation with the leaders of the nation's professional societies [and] the various federal agencies active in UNESCO's substantive fields." It noted that "such consultation will be crucial to the credibility of the report on UNESCO that Congress has required of the State Department."

The State Department bureau did not undertake a wide consultation. The I.O. report makes no mention of having solicited outside views. No nongovernmental organization active in UNESCO's fields has reported receipt of any questionnaire from the State Department, or any other office of the United States government, requesting an evaluation of problems and progress at UNESCO. Indeed, even the Government's own agencies in the relevant fields were apparently not asked to submit their assessments of UNESCO's work and usefulness. This was in marked contrast to the British government's far-reaching consultations this year with all interested nongovernmental organizations and public agencies.

The report emanates from within the Bureau of International Organization Affairs without broad inter-agency input. Its authors assert that they "studied with care" the views expressed, largely unsolicited, from outside; but the report dismisses most of them as "relatively uninformed." The report does not state which organizations had submitted views (with two exceptions), much less what their positions were.

Instead, the report advances a fourfold categorization of outside views, consisting of two opposed pairs:

(1) *Those who "support U.S. membership on philosophical grounds."* The report somewhat tendentiously summarizes this point of view thusly: "since UNESCO deals with education, science, and culture, the United States has a duty to support it." The report affirms that "a considerable number" of the views expressed to the Department fall into this category. However, because the report fails to identify most of the organizations it puts in this category, it is difficult to assess whether they include many U.S. professional societies unable to continue close collaboration with UNESCO since withdrawal. In any event, the report discounts the usefulness of their views because "(a)lmost all of them opposed our withdrawal in the first place."[3]

(2) *Those "opposed to membership in UNESCO on philosophical or political grounds."* The report notes "a number of organizations and individuals" fall into this classification, but does not identify them.

(3) *"Informed support for UNESCO."* The category is reserved for unnamed groups and individuals that, despite the U.S. withdrawal, "continue to participate actively in those UNESCO programs of interest to them"—particularly the American scientific community. These views are described as "usually narrowly focused."

(4) *"Informed opposition to UNESCO."* This category is said to include unnamed "individuals and groups interested in freedom of the press"; unlike the "informed support" category with which it is paired, this one is not described as "narrowly focused." However, the principal interested organization active at UNESCO on this issue, the World Press Freedom Committee, has always scrupulously refrained from taking a position on U.S. membership in UNESCO, as have such allied American organizations as the American Society of Newspaper Editors, the American Newspaper Publishers Association, and the Inter American Press Association. The report also does not indicate whether this "informed opposition to UNESCO" was expressed to the Department before or after the 1989 General Conference revised UNESCO's program plan for communication.

The report also places in this category of "informed opposition" unidentified U.S. government agencies "concerned about issues of management and efficiency in international organizations." This presumably refers to the Bureau of International Organization Affairs, responsible for writing the report.

The report does not address the views advanced at congressional hearings and in association resolutions by many concerned professional groups. Instead, based on the "only approximately 120 letters" received by the State Department on this issue, the report sweepingly concludes, "The overall total U.S. interest in UNESCO is very limited."[4]

---

[2] Since early 1989 the following national organizations have called for U.S. reentry: American Psychological Association; American Council of Learned Societies; American Association of Museums; Sierra Club; American Association for the Advancement of Science; American Bar Association; American Chemical Society; National Education Association; American Educational Research Association; Comparative International Education Society; National Science Teachers Association; Council of Scientific Society Presidents; American Home Economic Association; National Society of Professional Engineers; American Physical Society; International Theatre Institute of the United States, Inc.

The panel knows of no citizen membership organization or professional society that has called for the United States to remain outside UNESCO. It is aware of one political advocacy group, the Heritage Foundation, that opposes U.S. reentry.

[3] Limiting political credibility to those who supported U.S. withdrawal "in the first place" would leave participation in the UNESCO debate to a relatively narrow stratum. When the Gallup Organization posed the issue to the American public in mid-1984, despite a fair amount of press attention to the campaign by UNESCO critics for U.S. withdrawal, nearly two-thirds of Americans (64 percent) reported that they had not heard or read anything about UNESCO. Among the minority who had heard something, only a third favored U.S. withdrawal and half opposed it.

[4] Representatives from the following nongovernmental organizations expressed views at hearings undertaken by both houses of Congress in 1989:

Frank Press *(National Academy of Sciences):* "There is a consensus in the U.S. science and technology community that UNESCO is important and worth supporting under Federico Mayor. . . . From the perspective of the scientific community, a strong intergovernmental organization is essential to meet the increasingly urgent global problems that will confront us."

Thomas Lovejoy *(Smithsonian Institution):* "[Global change] cannot be addressed solely on a specialized or piecemeal basis. All science must be involved. . . . It is only within UNESCO's broad umbrella that we find an exciting mechanism which encourages this cooperation and dialogue; a dialogue that I personally believe should be continued and enhanced by the U.S. retaking its membership and leadership role within UNESCO."

Ronald Mitchell *(International Reading Association):* "The promotion of literacy and basic education, a goal that most countries and individuals share, can be advanced most effectively through the mechanisms of multinational organizations. . . . the U.S. Departments of State and Education have sought out the assistance of the International Reading Association to identify a professional in reading and literacy to provide a needed technical assistance to UNESCO as it prepares and implements its plans for International Literacy Year."

Leon Boothe *(American Council on Education and 11 affiliated associations of colleges):* "We support a return to full U.S. membership in the organization. . . . United States higher education will benefit if the U.S. participates directly in the formulation of policies to carry out such programs and in future planning for the organization."

Leonard Sussman *(Freedom House):* "We have made our political point; nothing can be gained by our absence—except counterproductivity. We shall continue our losses, and fail to regain the preeminence in information/communication we once enjoyed."

Mary Hatwood Futrell *(National Education Association):* "U.S. participation efforts to support basic education to persons throughout the world is a moral necessity . . . . NEA's Executive Committee has endorsed the literacy campaign of UNESCO. . . . I urge the Senate Foreign Relations Committee to recommend that the U.S. rejoin UNESCO as an active participant in this and other worthy projects."

Edwin Feulner *(Heritage Foundation):* "There is no concrete data on which to base any reconsideration of U.S. nonparticipation in the organization. . . . What evidence I have seen points to the fact that sufficient reform is not even seriously being attempted by the organization."

Terry Morton *(U.S. Committee for International Council on Monuments and Sites):* "UNESCO's cultural program. . . . was never politicized nor was it part of the factors that led to U.S. withdrawal. Its cultural heritage program has continued to receive international praise for its effectiveness and efficiency."

Paul N. Perrot *(Virginia Museum of Fine Arts, speaking in his personal capacity):* "[UNESCO] has done more than foster agreements, conventions and recommendations. . . . Its direct action has been particularly strong in fostering international campaigns for the protection of monuments."

The I.O. report did single out the United Nations Association of the United States (UNA-USA) by name, which it categorized among those philosophically supporting U.S. membership. The report described UNA-USA as having "consistently advocated resumption of [U.S.] membership," without mention of UNA's long advocacy of major reform at UNESCO.[5] It did not mention that the American and international panels convened by the Association were chaired by a Senator who had supported the U.S. withdrawal. The report did find UNA-USA worthy of quotation once, for a skeptical question its leaders posed in a personal letter to UNESCO's Director-General on a hiring decision, and again for the Stafford international panel's call for "fundamental structural reform" of the agency. The report slightly misstated the conclusion of the American panel as having "recommended that the United States rejoin UNESCO," omitting the condition the panel attached to it—namely, adoption by the 1989 General Conference of the substance of the Director-General's program reforms.

The State Department report did approvingly acknowledge the Stafford international panel's consensus recommendations for "much-needed changes" in the structure of the Executive Board and in the process for establishing overall spending levels. But it overlooked the central recommendation of the panel—that structural reform is needed to enhance the role of the world's professional communities and to limit the politicizing control of governments. The I.O. report likewise takes no note of the international panel's finding that "It is inconceivable that the United States would have interests in science, culture, education, and communications so different from those of the rest of the world that it could not participate in the one U.N. agency that looks after these sectors."

OTHER NATIONAL GOVERNMENTS

The report attaches some importance to the views expressed by other national governments—or, more to the point, to a lack of them, evidenced by the paucity of "written" communications to the President and the Secretary of State. (The report does not mention direct conversations at the presidential or ministerial level. Nor does it mention bilateral contacts with any other federal department.) The obvious—and unsurprising—inference to draw is that UNESCO is not, relative to other matters they would pursue with Washington, the highest priority for national leaders, on which they would expend political capital in bilateral contacts.

The State Department did not solicit comprehensively from other national capitals their governments' views on U.S. involvement in this specialized agency. Nor does the report detail those views as expressed by member states' representatives at UNESCO. It simply acknowledges that they "all want us to return eventually to membership." While it cites purported expressions of concern about UNESCO by unidentified envoys, none of them suggests support for continued U.S. nonmembership. It is thus impossible to ascertain the accuracy of the report's assertion that an unspecified number of those the report deems "the most reform-minded" urge the U.S. to hold back "somewhat longer" as "continued leverage for reforms."

In this context, the view expressed to the Stafford panel by the West German member of the Executive Board is relevant: "The shock value of the U.S. withdrawal was very helpful to us; but everything that could be squeezed out of it has been wrung out. Now it is time for the United States to return." (Ambassador Walter Gelhoff, June 22, 1989, interview)

AREAS OF U.S. CONCERN

The I.O. report, like the Stafford panel, examined progress in each of the three areas of concern cited by the Reagan Administration at the time of U.S. withdrawal.

1. Budgetary growth

The Stafford panel noted the simple record: The United States had objected to "excessive" budgetary growth (the 1984-85 approved budget was 5.5 percent higher than that of the previous biennium). After the American and British withdrawals, UNESCO's budget was cut by a fifth, and its budget has been held constant at zero real growth from 1986 through 1991.

The British Foreign Office looked at the same record and concluded, "In general UNESCO has successfully adhered to the principle of Zero Real Growth over the past few years . . . This is a satisfactory outcome and compares well with performance elsewhere in the U.N. system."

By contrast, the I.O. report's writers "remain unconvinced that there has been any progress on budgetary restraint." Instead, the report sets new goalposts, calling for formal establishment of a new mechanism for setting agency spending levels; decentralization of UNESCO's workforce (which also surfaces as a management issue); and a reduction in major program activities under the rubric of "concentration."[6]

The I.O. report sharply criticizes the Director General for last year proposing 2.5 percent real budgetary growth for new program initiatives in education, science, and other fields. It expresses satisfaction that the General Conference "decisively rejected" the executive's budget request and approved only a zero real growth budget. The report makes the puzzling observation that even so, the new budget showed a nominal growth in dollar terms (because of currency fluctuations, etc.) of 8.1 percent over two years—and then concludes, "It is unfortunate that UNESCO has not accepted the need for budget restraint."

2. Politicization

The Stafford panel pointed to the communication debate and anti-Israeli resolutions of the 1970s as the enduring political controversies that had most aroused American concerns. "On balance," it found, many of the concerns about "politicization" of UNESCO activities have resolved themselves over the past several years—by a sobered pragmatism among developing countries that has emerged in all the organs of the U.S. system, by developments in international relations in the Soviet bloc and the various theaters of regional conflict, and in particular by the change in UNESCO leadership. Americans cannot expect that the four-fifths of the world that is poorer than the U.S. will always see issues the way their government sees them; and it is inevitable that in a forum of ideas, ideas and ideologies will clash. But Americans do expect balance and mutual respect—not always present in UNESCO proceedings when North-South tensions ran high.

The State Department report likewise notes the improvement in the political atmosphere throughout the U.N. system, where developing countries have "adopted a more results-oriented and practical approach to their [*sic*] problems, and eschewed much of the rhetorical excess of the 1970's and early 1980's." It affirms that "these positive influences have been felt also at UNESCO." However, the report is critical of the views of member states on some specific issues:

(a) Communication

The Stafford panel noted that the treatment by the 1989 General Conference of the controversial communication issue would be "the litmus test" by which Americans would assess the progess on containing "politicization."

The State Department report indeed gives considerable attention—fully one-seventh of its entire text—to the communication controversy. To define the fundamental U.S. interest the report cites no less an authority than the U.S. Supreme Court to express "our unshakable national commitment, embodied in the First Amendment, that 'debate on public issues should be uninhibited, robust, and wide-open.'" Yet it is the controversial debate in UNESCO over communication policies that the report seems intent on inhibiting.

The report presents a lengthy historical review of the communication debate over two decades at UNESCO. It does not acknowledge the possibility that there may have been some genuine problems in international information flows two decades ago, which in the communication debate might have become entangled with the political efforts to tame the press that the United States consistently combatted. Instead the report insists that all along the debate was simply "a direct challenge to cherished Western principles concerning freedom of the press." Western concerns about "freedom of opinion" and journalists' "freedom to report" were, the report affirms, assuaged in UNESCO's 1978 Declaration on the Mass Media. But in this "vague and ambiguous" compromise calling for a new "world information and communication order" (NWICO), the report argues, lurked "more harmful elements—a balanced flow, the contribution and role of the media, a right of reply for those who feel unfairly treated by the media." (As the Stafford panel noted, the right of reply was long enshrined in U.S. domestic broadcasting law as

[5] UNA-USA's national convention in 1988 adopted a resolution recommending that "returning to UNESCO should be a top U.N. priority for the next administration. The U.S. should replace its reform observation panel with an observer of ambassadorial rank to develop for the U.N. Educational, Scientific and Cultural Organization specific suggestions for reform that would lead to renewed U.S. participation in the Organization." The Association had recommended a series of reforms in UNESCO operations prior to the U.S. withdrawal, but argued that these could be better realized by working inside instead of outside the organization.

[6] The Stafford international panel proposed creation of "a formal mechanism for reaching agreement on an overall budgetary ceiling," one that would "assure the major contributors that they have considerable input into—but no veto over—the size of the total budget." As the I.O report approvingly notes, the international panel thought it useful to "give major and minor contributors comparable negotiating power." The U.S. panel members rejected the notion that specific structural reforms could now plausibly be added as new preconditions for U.S. reentry, however, and urged the U.S. to embrace the full recommended reform agenda and press it to adoption on rejoining.

Neither the international panel nor its U.S. subgroup found the "decentralization" and "concentration" concerns to be major institutional issues.

the "fairness doctrine," and American journalists and academics have long debated both the role of the media and balance in coverage; these "elements" only risk becoming "harmful" if governments decide and enforce standards—the lingering shadow that has so discredited NWICO.)[7]

Not only is the report's view of the communication issue itself somewhat contentious; its assessment of the communication program adopted by the 1989 General Conference is far harsher than virtually any other commentator's. The I.O. report incorrectly asserts that the plan "was, even in the most favorable analysis, a 'mixed bag'." On the contrary, most analysts, led by Leonard Sussman of Freedom House (the first to sound the alarms on the issue 15 years ago), have hailed the new plan as a decisive affirmation of press freedom. The British Foreign Office, in its recent report on progress at UNESCO, noted that even those "who in the past have been highly critical of UNESCO's Communications Programme . . . now see NWICO as being only a minor problem," and concluded that "in its present form it no longer constitutes a serious obstacle."

It is only the I.O. report that sees the UNESCO text's repeated emphasis on freedom and independence of the press as merely "cosmetic." (Why UNESCO language is "harmful" when ambiguous but "cosmetic" when it is clear is not explained.) The report seems preoccupied with denying legitimacy to any ideas advanced in the long debate on international information policy, disparaging them under the name of NWICO, and it disapprovingly quotes delegates at UNESCO for seeing a continuity of concerns in UNESCO's evolving program. While it acknowledges that under the new program mandate UNESCO has this year convened conferences on strengthening a free press in Eastern Europe, the report does not see in the new text the opportunities it may afford to embed Western free-press values in international norms.

(b) Israeli/Palestinian Issues

The Stafford panel had noted (and shares) the U.S. concern about efforts by the Palestine Liberation Organization to secure voting membership in U.N. agencies, and international legitimacy, as the "State of Palestine." The Palestinians' application was turned aside at UNESCO, the panel concluded, in large part because its approval "would doom the chances of a hoped-for U.S. return in the coming year." But, concerned that Israel is "isolated and vulnerable while the U.S. is absent," the panel warned that if the U.S. is going to stay out of UNESCO, it will have scant leverage on this issue the next time around.

The I.O. report similarly concludes that hope for a U.S. return "was a key factor" in UNESCO members' decision not to seat the Palestinians. But the report is silent on how the U.S. can expect to see Palestinian membership denied next year, if member states conclude the United States will not rejoin anyway.

In one of the report's several passages that are critical of new Director-General Federico Mayor as an individual, it asserts that Mayor has "personally" paid considerable attention to the PLO while being "distant" from Israel. In this respect, the report cites a recent visit by Mayor to Israel (it does not mention that this was the first visit there by any Director-General in 15 years), claiming that Mayor "refused an offer to meet with the Israeli government." I.O. may have had faulty information. The Israeli government reportedly never invited him to come to Israel; and once there at the invitation of the Weizman Institute of Science, Mayor reports having met the prime minister, Yatzhak Shamir, and conferred with then-finance minister Shimon Peres and with foreign affairs vice-minister Samuel Hadas.

c. Human Rights

The I.O. report suggests some aversion to wide-open debate within UNESCO on the question of "rights of peoples" (such supposed group entitlements as a "right to self-determination" and a "right to development"), about which it details its suspicions even as it notes that UNESCO has allocated only $35,000 to study the concept. It claims to have "no doubt" about "the ultimate goal of the whole operation"—namely, "the evaluation of claims that particular peoples' rights have not been observed."

On this point too the British assessment was different: "Our concerns about 'peoples' rights' have also been largely allayed." The Stafford panel had likewise considered this tiny program, viewing it in the context of UNESCO's human rights activities. "While some Americans find discussion of 'rights of peoples' an annoyance, an irrelevance, or a sinister diversion from individuals' rights," the panel concluded, "an organization founded to promote the free flow of ideas need not shrink from analyzing them. * * * Americans should relish the challenge and opportunity of UNESCO's human rights program; it is foolish not to take part in shaping it."

3. Management

The Stafford panel had documented one major change in UNESCO personnel policy effected by Director-General Mayor in his tenure—the depoliticization of what had become a highly centralized political system of personnel recruitment that his predecessor had closely controlled, which Mayor remedied by returning hiring responsibility for program staff to program heads. The panel also noted Mayor's establishment of an international panel of management experts, chaired by Knut Hammarskjold, to advise on far-reaching administrative reform. The panel recently concluded that Mayor's subsequent announcement of a management restructuring, while politically inept, appeared consistent with the Hammarskjold blueprint, though it should be judged "in the long run" on how it facilitates efficiency in the implementation of the agency's program.

The State Department report declares that of the three stated U.S. concerns, "the least progress seems to have been made" on management reform. It does not mention the depoliticization of professional staff recruitment. The report does not attach great importance to the Hammarskjold Commission recommendations. But while Hammarskjold praised Mayor's administrative restructuring steps as "firm and determined reform action," "unique in the history of international organizations as to their scope and depth of vision," and "an uphill effort against traditional 'disciplinary turf' instincts and conservatism," the I.O. report describes the issue in somewhat dramatic language of a different sort ("most shocking," "worst crisis," "state of turmoil"). It sees virtually no merit in any of the reforms.

By contrast, the British government's report found that Mayor's "announced steps towards programme rationalisation, decentralisation and administrative reform * * *, by and large, are in line with our wishes." London held back from rejoining, however, "because these announcements are very recent," leaving "some uncertainty about * * * their full implementation in practice." The Foreign Office concluded that "some time is necessary" for the uncertainty to be dispelled.[8]

The State Department report is especially critical of the restructuring plan for its creation of new positions (without acknowledging the planned offset of freezing existing vacancies); for its seemingly arbitrary targets for moving professional staff out of Paris (precisely the "decentralization" the U.S. had been demanding); and for Mayor's selection of his top directors without "open recruitment" (a very legitimate criticism, if a not uncommon practice in many U.S. government appointments as well). On personnel appointments the report is quite solicitous of supposed prerogatives of the Executive Board (the body of whose "superficial or politicized debate" the report is elsewhere sharply critical). Some outside observers have praised Mayor for asserting his independence of governments' patronage demands, not currying political favor by seeking candidates from governments for the agency's top positions. The report volunteers no such praise, and endorses an alternative principle: "We believe that member governments which pay the bills should control international organizations."[9]

The report is critical of the secretariat's excessive reliance on consultants relative to regular staff, a new U.S. concern—and certainly a legitimate one for member states that UNESCO's Executive Board took up at its May 1990 session. The I.O. report continues, however, by attacking the Director General for making visits to national capitals, even to the point of counting days he has been away from headquarters ("this does not include vacation time"). It charges that Mayor went about, without exception, "at each stop asking the head of state to lobby the United States to return to membership," although it does not document this sweeping assertion. The British government's report did not see such questions as meriting attention, and they hardly seem relevant to whether the United States should be a member of UNESCO.

---

[7] The I.O. report quotes at length a 1983 paper by Leonard Sussman of Freedom House (a member of the Stafford panel) that it says "played a significant role in toughening up U.S. communications policy." The report does not quote the paper's conclusion, "I do not believe the challenges to the free flow of information would cease if UNESCO stopped addressing the issue tomorrow. There would be other forums." Nor does it acknowledge that the paper's author, and the organization, opposed U.S. withdrawal then as a misguided response to the debate, or that he supports U.S. reentry now.

[8] Despite the quite apparent divergence of views between the British Foreign Office and the U.S. State Department on all three major concerns budget, "politicization" (especially NWICO), and management—the I.O. report concludes that "their thinking on the subject remains essentially the same as ours."

[9] This view is very different from a central finding of the Stafford international panel: "Agency decision-making must not be left to government functionaries and political representatives but must embrace the expertise and commitment of professionals in all UNESCO's fields of competence." The panel proposed far-reaching structural reform to diminish politicization and enhance quality. From this perspective, it is ultimately not governments, but taxpayers, that "pay the bills."

BENEFITS OF MEMBERSHIP

The State Department report takes a narrowly utilitarian view of U.S. membership in U.N. agencies. UNESCO membership, it avers, would give the U.S. little more than a vote in UNESCO governing bodies; whereas by staying out the U.S. can get a free ride on the dues that 159 other countries pay to maintain the UNESCO forum and institutional infrastructure for needed cooperation. Besides, as a nonmember "we retain considerable influence," since member states have been eager to persuade the United States to return.[10]

The report expects that "United States influence will certainly remain high during the next two years." This speculative assertion is not shared even by Western delegates at UNESCO. The Swiss ambassador, for instance, insisted to Stafford panel members that he and a growing number of other delegates "see no use in catering to a U.S. government that plainly doesn't plan on rejoining anyway." West Germany's Executive Board delegate (and ex-U.N. ambassador) notes that "countries increasingly accept the proposition that they can live without the United States, and that Washington's coming back in is something they can't affect, so it's not worth begging the Americans." The president of UNESCO's General Conference, a Guatemalan newspaper published, last year recalled that when the U.S. withdrew, "everybody thought UNESCO was going to die. But it survived—smaller, but it survived."

The major impediment to the continuation of U.S. leverage while sitting outside the agency is one that the report nowhere addressees: the United States has never specified what change would lead to reentry. Indeed, nothing in the report suggests an interest by the State Department in returning. On the contrary, its tone and argument give little reason to believe the United States would seriously consider returning no matter what UNESCO did. The report goes so far as to declare (in terms of implicit applicability to any international organization) that "UNESCO needs the United States as a member far more than the United States needs UNESCO."

The Stafford panel had given considerable attention to the usefulness of withdrawal as leveraged for reform, and concluded: "Although withdrawal from a multilateral agency can certainly be justified in dire circumstances, it is not—except for isolationists—an end in itself. . . . Suspension of membership is a tactic that must have clearly defined and attainable purposes." It noted that now, "By staying out, the U.S. will have no leverage to influence policies adopted by the organization: There is simply no more damage it can do to the agency." On the other hand, it concluded, as a dues-paying member its bargaining leverage on issues of importance (e.g., press freedom, PLO) returns; and "its citizens could once again be hired to fill UNESCO posts—facilitating the flow into UNESCO's work of liberating ideas from American society."

The last is a consideration absent from the I.O. report. In its assessment of benefits of U.S. membership, the report gives no attention to the potential significance of having American experts present in, or absent from, leading roles in shaping and running UNESCO's program activities, in which many countries have considerable trust and on which they rely. The impact of a lively American presence in the secretariat as well as in governing bodies should seem to merit the U.S. government's attention.

The State Department report worries that by rejoining UNESCO, "We would lend both our money and our credibility" to the organization. The Stafford panel concludes that "by staying outside the agency after the General Conference has approved policy reforms the U.S. had long sought, America will sacrifice any credibility to press for further reform." In this debate, credibility is for all a major concern.

In what the I.O. report says and what it omits, it strays far from providing the balanced and comprehensive assessment needed by the nation's elected decisionmakers. Its narrow focus and contentious argumentation ignore and obscure the larger picture of UNESCO purposes, U.S. needs, and global interests. It does not attempt to contemplate the potential role that a revitalized UNESCO with vigorous American leadership might have in promoting peaceful change in an increasingly interdependent and multipolar world.

UNA-USA AMERICAN PANEL ON UNESCO

Chairman: Robert T. Stafford, Former United States Senator (Republican of Vermont).

Panel members: Mary Hatwood Futrell, Former President, National Education Association, Vice President, World Confederation of Teaching Professions; Walter Rosenblith, Professor Emeritus, Massachusetts Institute of Technology, Former Vice President, International Council of Scientific Unions; John R. Stevenson, Counsel, Sullivan & Cromwell, President, National Gallery of Art Board of Trustees; Leonard R. Sussman, Senior Scholar in International Communications, Freedom House; Esteban Torres, Member, United States House of Representatives (Democrat of California), Former Permanent Delegate of the United States to UNESCO.

Project director: Jeffrey Laurenti, Executive Director, Multilateral Studies, United Nations Association of the United States.

Funding for this project was provided by the James S. McDonnell, Ford and Rockefeller foundations.

In accordance with the standard practice for policy panels sponsored by UNA-USA, the views expressed in this statement are those of the panel members and do not necessarily reflect the views of the Association or the underwriting foundations.●

[10] This claim of "considerable influence" seems inconsistent with the State Department's overall finding that "very little has changed," which would suggest the withdrawal strategy has failed. It is not clear from the report to what ends—political or administrative, if not educational or scientific—this "influence" would be used.

USE INGENIOUS PRIZES TO CAPTURE INGENIOUSNESS OF INVENTORS

● Mr. SIMON. Mr. President, recently, I saw the column of Michael Schrage from the Los Angeles Times reprinted in the Washington Post about how we ought to encourage inventors.

Since it is buried in the financial pages of the Washington Post, probably few people read it. But it calls attention to a major deficiency in our country.

He points out that Charles Lindberg, in crossing the Atlantic, was trying for a $25,000 prize. But the basic message is that in this country we're going to have to do much better in the field of inventing.

A look at the U.S. Patent Office shows that American citizens getting patents is going down steadily year after year in the totals, while the number of foreign citizens getting patents from the U.S. Patent Office is going up year after year as a percentage of the total.

Another indication is that when I appear on college campuses one of the questions I frequently ask is, "How many of you ever thought of inventing anything and getting a patent?"

Rarely is a hand ever raised.

Somehow, we have to turn that around. It should not take huge amounts of money.

A few years ago, I encourage some State legislators to introduce a bill calling for an inventor-in-residence program at some of the colleges in Illinois. The idea was that a successful inventor would be on the campus and give lectures once a week in a credit course, but there would be lab work, and the inventor would be on the campus to stimulate the students to be thinking in the same direction.

The bill passed the legislature and, unfortunately, the Governor vetoed it. I probably should have explained it better to the Governor before the veto.

But the idea strikes me as still being sound, and it seems to me that the idea could be particularly effective on smaller campuses.

For example, two of my college years were spent at Dana College in Blair, NE. It is a fine, fully accredited liberal arts college with about 500 students. If some foundations were to make a $50,000 grant for 1 year for a inventor-in-residence on that campus, my instinct is that everyone on the campus would know about it, and it would stimulate both faculty and students to talk about inventing. An arrangement could be worked out that perhaps 15 percent of the profits from any patent developed by the inventor-in-residence, while on campus, could go to the endowment of the college, stimulating other schools to follow the pattern and perhaps generate some income for the school.

I have not refined the idea, but there ought to be a relatively simple way of doing much more to encourage creative minds in this country to invent.

Michael Schrage's idea of a prize is a good one, and I hope somewhere some foundation takes him up on that.

But another idea that ought to be explored is to have inventors-in-residence at some of our colleges and universities, so that we appeal to the creative spirit that is in America much more than we now are.

Mr. President, I ask to insert into the RECORD the column by Michael Schrage.

The column follows:

[From the Washington Post, July 20, 1990]

USE INGENIOUS PRIZES TO CAPTURE INGENIOUSNESS OF INVENTORS

(By Michael Schrage)

If you had to design the dullest, most conventional, most uninspired way to encourage creativity and innovation, you'd probably end up with something that looks a lot like the Nobel Prize or the MacArthur Foundation "genius grant."

Sure, a Nobel or a MacArthur is lucrative and glistens with a patina of prestige and media hype—but when you get right down to it, these awards have all the spirit of an accoutant's report. They serve as celebrations of the status quo rather than as challenges to the imagination. They confirm what everybody knows, instead of getting people to think about what they don't know. But the worst thing about them is that, short of pulling names of out a hat, they are the laziest possible way to reward creativity. Simply get a bunch of big names in a room and have then pick winners as they posh on pâré de fois gras. Gosh, it's a tough job but someone has to do it.

We need prizes that are designed with as much ingenuity and creativity as they are intended to reward. Nobels are nifty, but perhaps society could get more bang for the buck if prizes encouraged people to focus on solving specific problems that they otherwise wouldn't consider. It's not that people shouldn't be rewarded for achievement, but that's not the best way to go. Prizes are a wonderful mechanism for capturing attention and imagination; let's treat them that way. Look at the history of technology and you'll find that ingenious prizes evoke innovative solutions.

Everybody remembers how Charles Lindbergh's solo flight across the Atlantic in 1927 absolutely galvanized the world and revolutionized the popular perception of aviation. What people forget is that the 25-year-old Lone Eagle was gunning for the $25,000 Orteig Prize posted by French-born hotelier Raymond Orteig in 1919. Lucky Lindy wasn't just captured by the romance of a New York-Paris crossing; he was also in it for the money. The Spirit of St. Louis may have been piloted by an American hero, but it was fueled by a prize.

This tradition of prizes to push the boundaries of technology goes back hundreds of years. In 1714, a specially established Board of Longitude promised the extraordinary sum of 20,000 pounds to "such person as shall discern the longitude by sea"—absolutely essential for navigation. It took almost 50 years, but a clock accurate enough to solve the problem was built by John Harrison in 1762. That device transformed maritime travel.

Similarly, when the Napoleonic Wars cut off the Continent's supply of raw cotton for textiles, Napoleon promised a huge prize to the inventor who could figure out a way to spin linen into fabrics. In 1810, Frenchman Philippe de Girard perfected the idea of "wet spinning"—soaking the raw flax before it went to the spindles. (Although quite successful, Napoleon reneged on his offer. *C'est la vie.*)

More recently, prizes have been used to provoke people into thinking about problems that have launched whole new genres of technology. Back in 1960, the brilliant physicist Richard Feynman concluded his American Physical Society Talk, "There's Plenty of Room at the Bottom," discussing "the problems of manipulating and controlling things on a small scale," with not one, but two, prize offers.

The first was $1,000 for building a rotating electronic motor 1/64th-inch cubed; the second was $1,000 for the first person to put a page of a book in a form suitable for reading by an electron microscope. The motor was built that same year; the microtext didn't materialize until 1985. The issue, of course, wasn't the money—it was getting people to think about building ultra-small things. These challenges helped launch the discipline of "nanotechnology"—the technology of engineering machines and processes billionths of an inch in size.

"Prizes can be very motivating," sys Paul MacCready, who runs Monrovia, Calif.-based Aero Vironment, an environmental and aeronautical consulting firm. "You put up a small prize and 100 times more money gets invested in trying to win it."

MacCready should know. On Aug. 23, 1977, his man-powered Gossamer Condor flew into aviation history by traversing a figure-eight course around two pylons half a mile apart to win the Kremer Prize of 50,000 pounds. Established in 1959 by British industrialist Henry Kremer, the Kremer Prize for Human-Powered Flight had tantalized and infuriated aviation enthusiasts for years as they sought to emulate Icarus without getting burned.

What lured MacCready into spreading his wings? "I did the project solely for the money," he says. "I had been the guarantor of a $100,000 note that had gone sour. Figuring out the pound-to-dollar exchange rate, I suddenly noticed the connection between a $100,000 prize and a $100,000 debt. If there had not been the prize, I wouldn't have done it."

MacCready, who is also intimately involved with General Motors Corp.'s efforts to develop the electric-powered Impact car, notes that the Kremer Prize was magnificiently structured to tease the imagination.

"It's very rare that you can come up with a perfect prize like the Henry Kremer Prize for Human Powered Flight," he says. "It was big; it was absolutely impractical—no inventors could justify spending their own money. I think it was a hugely creative prize. You find there are very few prizes like that."

Indeed, pointing to the web of interrelated technologies that the Gossamer Condor helped spawn. MacCready insists that "If Kremer hadn't come up with his prize in the 1950s, there would not be an Impact today. . . . In time, this is going to be a winner."

"Wherever these kinds of prizes have been proposed, they've almost always made a big difference," says Joel Mokyr, a Northwestern University professor whose book, "The Lever of Riches," explores the history of technological creativity. "This can be a fantastic idea to spur innovation."

Historically, society relies on the marketplace to generate innovation. Obviously, we don't need prizes to get people to seek out a cure for AIDS or get clever computer software written—market forces will take care of that. Prizes should be created for problems that the market wouldn't take care of, like human-powered flight or an airborne Atlantic crossing in the 1920s. Today, problems like traffic congestion, the management of waste products and remedial education seemingly lend themselves to creative prize design.

"These impractical prize-driven things have been worthwhile and will become even more so," says MacCready. "It changes people's thinking by giving them a goal. Changing your perspective is much more potent than just an invention."

What we need are state and local governments—as well as philanthropists and foundations—to actually sit down and think of creative prizes to help solve difficult (or interesting) problems. It's not enough to toss prize money at people because you like and admire what they've done—we need a slew of prizes and awards to get people to do new things. Perhaps we should begin by offering prizes to people who come up with the best ideas for prizes?●

BUDGET SCOREKEEPING REPORT

● Mr. SASSER. Mr. President, I hereby submit to the Senate the latest budget scorekeeping report for fiscal year 1990, prepared by the Congressional Budget Office in response to section 308(b) of the Congressional Budget Act of 1974, as amended. This report was prepared consistent with standard scorekeeping conventions. This report also serves as the scorekeeping report for the purposes of section 311 of the Budget Act.

This report shows that current level spending is under the budget resolution by $3.3 billion in budget authority, and over the budget resolution by $4.2 billion in outlays. Current level is under the revenue floor by $5.2 billion.

The current estimate of the deficit for purposes of calculating the maximum deficit amount under section 311(a) of the Budget Act is $114.8 billion, $14.8 billion above the maximum deficit amount for 1990 of $100 billion.

The report follows:

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, July 23, 1990.

Hon. JIM SASSER,
Chairman, Committee on the Budget, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: The attached report shows the effects of Congressional action on the budget for fiscal year 1990 and is current through July 20, 1990. The estimates of budget authority, outlays, and revenues are consistent with the technical and economic assumptions of the 1990 Concurrent Resolution on the Budget (H. Con. Res. 106). This report is submitted under Section 308(b) and in aid of Section 311 of the Congressional Budget Act, as amended, and meets the requirements for Senate scorekeeping of Section 5 of S. Con. Res. 32, the 1986 First Concurrent Resolution on the Budget.

Since my last report, dated July 16, 1990, there has been no action that affects the current level of spending or revenues.

Sincerely,

ROBERT D. REISCHAUER,
Director.

THE CURRENT LEVEL REPORT FOR THE U.S. SENATE, 101ST CONG. 2D SESS., AS OF JULY 20, 1990

[In billions of dollars]

	Current level [1]	Budget resolution H. Con. Res. 106	Current level +/− resolution
Budget authority	1,326.1	1,329.4	−3.3
Outlays	1,169.4	1,165.2	4.2
Revenues	1,060.3	1,065.5	−5.2
Debt subject to limit	3,091.6	3,122.7	−31.1
Direct loan obligations	19.1	19.3	−.2
Guaranteed loan committees	115.1	107.3	7.8
Deficit	114.8	[2] 100.0	[3]14.8

[1] The current level represents the estimated revenue and direct spending effects (budget authority and outlays) of all legislation that Congress has enacted in this or previous sessions or sent to the President for his approval and is consistent with the technical and economic assumptions of H. Con. Res. 106. In addition, estimates are included of the direct spending effects for all entitlement or other mandatory programs requiring annual appropriations under current law even through the appropriations have not been made. The current level of debt subject to limit reflects the latest U.S. Treasury information on public debt transactions. In accordance with Sec. 102(a) of the Balanced Budget and Emergency Deficit Control Reaffirmation Act (101 Stat. 762) the current level deficit amount compared to the maximum deficit amount does not include asset sales.

[2] Maximum deficit amount [MDA] in accordance with section 3(7)(E) of the Congressional Budget Act, as amended.

[3] Current level plus or minus MDA.

THE CURRENT LEVEL REPORT, 101ST CONG., 2D SESS., SENATE SUPPORTING DETAIL, FISCAL YEAR 1990 AS OF CLOSE OF BUSINESS JULY 20, 1990

[In millions of dollars]

	Budget authority	Outlays	Revenues
I. Enacted in previous sessions:			
Revenues			1,068,600
Permanent appropriations and trust funds	954,969	791,109	
Other legislation	635,362	638,737	566
Offsetting receipts	−233,985	−233,985	
Total enacted in previous sessions	1,356,347	1,195,862	1,069,166
II. Enacted this session:			
Dire Emergency Supplemental Appropriations (P.L. 101-302)	2,293	666	
An act making technical amendments to Title 5, U.S. Code (P.L. 101-303)		−1	
Amtrak Reauthorization and Improvement Act (P.L. 101-322)	−10		−10

REFERRAL OF A BILL—S. 2500

Mr. LEAHY. Mr. President, I ask unanimous consent that the Commerce Committee be discharged from further consideration of S. 2500, the visual pollution, bill, and that the bill be referred to the Environment and Public Works Committee.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, on behalf of the majority leader I ask unanimous consent that when the Senate completes its business today, it stand in recess until 9 a.m., Wednesday, July 25; that following the prayer, the Journal of Proceedings be deemed approved to date; that the time for the two leaders be reserved for their use later in the day; that upon reservation of the two leaders time, there be a period for morning business, not to extend beyond 9:30 a.m., and that during the period for morning business Senators NUNN and PRYOR be recognized for up to 15 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, for the information of Senators, on tomorrow at 3:15 p.m., there will be a live quorum and the majority leader will shortly thereafter make a motion to instruct the Sergeant at Arms to request the attendance of absent Senators. As under the previous order, at 3:30 p.m., the Senate will begin consideration of Senate Resolution 311. The majority leader encourages Senators to plan their schedules accordingly and plan to be in their seats by 3:30. Senate committees will not be permitted to meet after 3:15 p.m.

PROGRAM

Mr. LEAHY. So, Mr. President, to briefly recap the schedule for tomorrow we will resume the farm bill at 9:30 tomorrow morning. Senator BAUCUS will offer an amendment under a 1 hour and 15 minutes time limitation. The Baucus amendment will be laid aside once all time is used, and then Senator ROTH will offer his peanuts amendment.

Mr. President, I do not know if the distinguished acting Republican leader has anything further.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, I commend the distinguished chairman of the committee for his guidance throughout the progress we made today. I share his hope tomorrow may see success for the farm bill of 1990.

RECESS UNTIL 9 A.M. TOMORROW

Mr. LEAHY. Mr. President, if there is no further business to come before the Senate today, I ask unanimous consent that the Senate stand in recess under the previous order until 9 a.m. tomorrow, Wednesday, July 25, 1990.

There being no objection, the Senate, at 11:29 p.m., recessed until Wednesday, July 25, 1990, at 9 a.m.

EXTENSION OF REMARKS

COUNTRY MUSIC'S FAITHFUL FOLLOWERS

HON. BOB CLEMENT

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mr. CLEMENT. Mr. Speaker, as the Representative of "Music City, U.S.A." I am pleased to share with my colleagues an article which appeared in today's Washington Post.

The article describes some of the feelings evident among country music fans at this year's "Fan Fair," the week-long celebration in Nashville, TN, where country music artists thank fans for their support and appreciation.

Mr. Speaker, country music holds a special attraction for people everywhere. It is a very unique form of American music, whose themes, melodies, and lyrics capture the very heart and soul of everyday living. As the article describes, for many fans, country's words and music carry them through the pain of hard times to a place of hope and greater understanding.

I am very proud that Nashville is the center of the country music industry. And I am very proud of the artists, who not only capture in their music the feelings of us all, but who also remember that the source of their personal success is the fan.

I commend the Washington Post article to my colleagues:

[From the Washington Post, July 24, 1990]

COUNTRY'S FAITHFUL FOLLOWERS

(By Linda Chion-Kenney)

Gary Daniels remembers who helped him heal the hurt that tore his heart almost 20 years ago. It was Ray Price, a man he never met, who sang a song he'll never forget.

"I was in the Navy," Daniels says, "and I was married to a very pretty little gal, my high school sweetheart. We split and it just devastated me. I sat and I listened to this song over and over and over on the jukebox, in Virginia Beach, in a little club called the Lamplighter."

Daniels, who is now working on his own country music career, recounts the song, "It Should Be Easier Now," in which Price sings: "The wound in my heart you carved deep and wide, followed and washed by the tears I've cried, but now there'll be more room for love inside, it should be easier now."

Those words, Daniels says, "gave me a light at the end of the tunnel. Here I'm 19 years old, and this is my first love, my true love, and I don't think there will ever be anybody else that could even compare. And all of a sudden this song is telling me: 'Hang on. Just hang on.' It carried me through."

And that, country music fans say, is country's draw: The words and the music carry them through the pain to a place of hope and greater understanding.

At least this was the consensus of dozens of country music lovers interviewed at the 19th annual International Country Music Fan Fair in Nashville last month. They were among the 24,000 performers, fans, promoters, managers, disc jockeys and roadies who attended the up-close, down-home fan appreciation week.

The event, sponsored by the Grand Ole Opry and the Country Music Association and held at the Tennessee Fairgrounds, included 13 shows featuring more than 90 acts—among them Randy Travis, Waylon Jennings, the Judds, Charley Pride and Charlie Daniels. Seven buildings housed more than 260 exhibit booths, mostly manned by fan club organizers. And many stars hosted breakfasts, luncheons and barbecues for their faithful followers.

Loretta Lynn headlined a 14-act dinner show sponsored by the International Fan Club Organization, a group founded by Loudilla Johnson of Wild Horse, Colo., and her sisters Kay and Loretta. Johnson says it was her idea for "some kind of party for all the fan club people" that led to the first Fan Fair.

"We envisioned it was going to be this huge success," Johnson says, "because we had worked with fans of country music enough to know that if the artist would devote the time, the fans would be there to support them."

Number among them Julie Sbraccia of Boston, who attended her first Fan Fair this year. "It's just something I thought I really should do, even just once," Sbraccia says. "So many stars participate and they stand behind their fan club booths and talk to you. You can actually walk up to someone you eally admire, meet them, shake their hand. In rock-and-roll, I don't think you'll ever see something like this."

For Sbraccia, and fans like her, it's all about connection.

"When you listen to somebody's music over and over, you kind of feel like you know him," Sbraccia says. "And then you come here and you meet him, it's almost like you feel you have a friendship. This person whose singing has done something for your life. And it's almost like: 'I finally got to meet that person who contributed to my life.' I might never do it again but I made a memory this time."

Sbraccia is among 30 million people nationwise (an industry estimate), among them President Bush, who listen to country music.

The misconception is that country music "is hayseed, but it's not," says Ronald Cotton, a concert promoter. "And it's not the 'Hee Haw' you see on television."

The stereotype is "twangy and hillbilly," says Lucy Grant, a Cleveland disc jockey who grew up in Bethesda, "And it's so much more contemporary now, with kind of a rock feel to it. It has a lot more mass appeal."

Country music "is everybody from k.d. lang to Hank Williams Jr., with the Kentucky Headhunters somewhere in between. Now you define that," says singer Larry Gatlin. "You can't. It's impossible. And it isn't important."

What is important Gatlin says, is what country stands for in the minds of those on both sides of the jukebox. And there, some common themes emerge.

"It's the 'Green, Green Grass of Home,' " Cotton says, citing the title of his favorite cut. "It's going back home. We'll never be able to. None of us will. But we try to remember the times as great."

"It's music for the people, everyday people," says Roy Wakely, a disc jockey in Dayton, Ohio. "People can relate to it in the way they live their lives: their love affairs, their ups and downs, their jobs, the hard times and the good times and the bad times."

"When you're down and out," says Michael Powell, of Michigan and a member of country singer Gary Morris's fan club, "you can listen to the music and say, 'Hey, I'm not alone. There's other people out there, maybe not in the same boat I am, but close enough. And they're making it. So I can make it too.' "

That's the key, says Jim Ibbotson of the Nitty Gritty Dirt Band, whose favorite self-penned lyric is: "Dance, little Jean, this day is for you, two people you love stood up to say, 'I do,' Today your mama's marrying your dad."

"We write songs that deal with the events of our lives," Ibbotson says, "and we present them in an easy-to-swallow melody. It's nothing real challenging for anybody to listen to. Plus, if the song is any good, it will touch a chord inside the listener. I think that's why most people tune in day after day,' 'cause they find out that somebody else hurts as much as they hurt or felt as elated as they felt."

In other words, country music is about "real people in real situations in a real world," says Jim London, co-host of the morning show on country music radio WMZQ-AM/FM (1390/98.7), the area's third-highest ranked station. And many of the listeners, says news director Kim Leslie, "look at the songs and the artists behind them as their own personal support group."

Support groups provide courage and encouragement from people who share a similar plight, "and you're saying the same thing goes on with a country music song," says Dan Hammer, president-elect of the Tennessee division of the Association for Marriage and Family Therapy. "The singer tells his story, and it's not exactly like my story, but it's close enough for me to say: 'Gee, I hadn't thought about telling my story in those words, but I can really relate.' "

This innate need for identification, for connection, magnifies in times of trouble.

"We listen to music all the time, even just walking around the mall, but we're not always feeling that particular need for support," Hammer says. "But when I'm experiencing a loss, I'm more heightened to words from anywhere. I'm not claiming country music is always artistic. But if it's in a form that can reach past some of our usual blocks, then we'll feel supported. We'll identify with the words."

Some people make the connection through other forms of artistic expression: an opera, a rock song, a poem, a painting, a dance. To focus on country is to "take a piece of Americana to show some very common, ordinary traits that happen to do

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

with being human," says Esco McBay, a family therapist in Nashville. "They're simply being expressed in this particular way in this particular setting.

"Obviously, behind every piece of art there is a person who expresses that thought or feeling," McBay says. "The music, then the song, becomes a connecting link between that person and the receiver. And so when I respond to that message, when I respond to that song, at some level I'm connecting to that person."

In today's "society of strangers," he says, "you see it even more. We're looking for a person to connect with, a person who understands us."

Garth Brooks, one of those people, found at Fan Fair a connection to the "real people" country music attracts.

"It's people who have started with nothing and built it," says Brooks, 26, whose debut album went gold in May. "They're chasing their dream, you've chased yours. They've given you your dream and now it's time to give something back."

Fan and star alike feel bonded by the values and memories they hold most dear. Fans talk about the stars almost as friends. Stars talk of fans who work hard, take pride in their families, believe in America and make it possible for the stars to live their dreams. And each sees in the other a reflection of himself.

"Hey, I slop hogs, I shovel horse manure and I change diapers," says Pam Perry, singer and mandolin player for Wild Rose, an all-woman band. "I know what that part of life is about."

"It hasn't been that long that I remembr being a fan, wanting to meet somebody," adds Kathy Mac, bass player for Wild Rose. "It's the American dream. It really is. Because you've seen somebody come from humble beginnings and suddenly become popular, and people want to meet them and they want to be around them. To people who are trying to get ahead in this world, that give them hope."

It's a matter of "taking courage in our own lives by the examples of others," McBay says. "The way that I can relate to that is the mentor concept. Most people develop mentors . . . people who . . . in a sense become a model."

Wendell Cox, lead guitarist for the Travis Tritt band, sees that with "I'm Gonna Be Somebody," a song the band sings "about this guy" everybody looks down on "so he wants to make something of himself."

And "most teenagers go through a hard time," he adds. "You get depressed or think about suicide and things like that. I think this song would probably give them a little bit different view of things and maybe help them to go for it, some kind of goal to have in mind, instead of sitting back and being depressed."

To tell a story that inspires, enlightens or entertains, someone needs to put pen to paper. And that's when country comes alive. "Our lives are better left to chance, I could have missed the pain, but I'd have had to miss the dance."

Those words, from a Garth Brooks song, "The Dance," written by Tony Arata, describe a dance "shared underneath the stars above" that for a moment made the world right. But the dance ends and the romance fades, and the song, says Janet Williams of Nashville, begs the greater question: "If you knew something was gonna hurt and break your heart and be painful, would you avoid it? If you did, then you'd never know the sweet part, the good things, the pleasure. And so the pleasure is worth the pain"

"If you're gonna throw stones and put on an act, you better move out of your house made of glass."

Those lyrics come from "It Takes One to Know One," a song about a woman who leaves her man because he's been cheating, which "is kind of typical country," says songwriter and singer Robbin Linda Brown, 34. Brown says while she has "a knack for rhyming and timing," she "had to live some life" to give heart to her songs. "I had to hurt a little."

"I've looked to the stars, tried all of the bars, and I've nearly gone up in smoke. Now my hand's on the wheel of something that's real and I feel like I'm goin' home."—From "Hands on the Wheel" by Willie Nelson

This theme of going home is a staple of country music.

"We wouldn't need to go back to childhood if our childhood were so perfect that it prepared us for everything that life was going to give us. And so there are some gaps," says family therapist Hammer.

For some people, he adds, a country music song provides "a retreat to a place where things were more secure. And there may be some things we would like to go back and experience because we'd like to have some more out of those experiences."

Such was the case for Ruth B. Swift of Baltimore, who was reminded at Fan Fair of good times with her father.

"He was a balladeer," Swift says, "and I remember as a child growing up, Daddy taking us to see a lot of the old performers." While walking the grounds at Fan Fair, the sound of country in the air, Swift says, the memories washed over her, "and I looked at my sister and said: 'Wouldn't Daddy love this?"

"And so it's personal," she says of her attraction to country music, tears welling in her eyes. "It's personal."

For Fans, 30 Seconds of Heaven

Ann Scalise of Brentwood, Tenn., had one goal in mind: to get Randy Travis's autograph to give to her mentally retarded sister.

"I know why I do it," she said in her fifth hour in line for the autograph at Fan Fair in Nashville last month. "But I don't know why people come and stand in these incredible lines for less than 30 seconds in front of this guy. I guess it's their one moment of glory. If they can't get famous, they're going to get close to somebody who is."

"Oh, it's worth it, just to get to meet them," says Sherry Hunt of Greenfield. Ohio, who waited hours at Loretta Lynn's fan club booth. "It's like being a part of their world for a little while."

An autograph, says Esco McBay, a family therapist in Nashville, is evidence of that contact, "reminders of a moment, a piece of time."

Says Tommy Daniel, who researches fan attraction for the Country Music Association: "It's like they [entertainers] live a life that's different from me, and I want to get close to them, to touch them, even if it's just for a moment."

Dozens of fans interviewed in Nashville say they see in the stars living proof that "real" and "down-home" people can, with sacrifice, humility, faith and hard work, overcome formidable odds. And many fans see in the stars a realization of the dreams they treasure.

"Everybody thinks they can sing to a certain extent," says Roy Wakely, a disc jockey in Dayton, Ohio. "They think: 'I can be a singer, but I don't want to because I've got a good job and a family. But that's me, Garth Brooks, if I would have pushed it. He's lived the life for me, and I'm staying home with my safe and secure job with my family.' People think like that."

JOHN G. RANGOS, RECIPIENT OF THE 1991 NATIONAL PATRIOTS AWARD FROM THE CONGRESSIONAL MEDAL OF HONOR SOCIETY

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mr. WALGREN. Mr. Speaker, I want to pay special tribute to John G. Rangos, Sr., a Pittsburgh resident who has just been named the recipient of the Congressional Medal of Honor Society's National Patriots Award.

It is a unique honor for western Pennsylvania to claim John Rangos as one of our own. In announcing his designation last week, J. Elliott Williams, the society's president, called Mr. Rangos "a citizen patriot." Few words describe him better.

The Patriots Award honors outstanding Americans, and John Rangos is certainly in that category. And it is fitting that proceeds from the awards dinner next January honoring Mr. Rangos will be used to educate young people against drug abuse and to provide scholarships for the children of veterans. He and his Pittsburgh-based company, Chambers Development, are well-known in western Pennsylvania for their community involvement and leadership.

I am delighted to salute John Rangos on this special recognition and am pleased to share with my colleagues a brief profile of Mr. Rangos issued by the Congressional Medal of Honor Society.

John G. Rangos, Sr., President and CEO, Chambers Development Co., Inc.

John G. Rangos, Sr., is a visionary. Throughout his lifetime he has identified the needs of people and then set forth to fulfill those needs. Whether serving as a corporate executive or as a humanitarian Mr. Rangos looks to the future.

As president and chief executive officer of Chambers Development Company, Incorporated, Mr. Rangos directs the activities of one of the fastest growing environmental firms in the United States. The once local company, which he founded in 1971, went public in 1985 and has grown to become a powerhouse with operations in numerous states.

Chambers Development Company is nationally recognized as a leading environmental firm offering services in collection, hauling, recycling and landfill development. The company has compiled an outstanding record of service, environmental protection and cost effectiveness. The company also provides security through its wholly owned subsidiary, Security Bureau Incorporated.

The son of a Greek restaurant owner, Mr. Rangos was born in West Virginia and raised in Pittsburgh. Throughout his life he has been active in many community and church activities. In 1988 Mr. Rangos was elected an Archon of the Ecumenical Patriarchate of the Order of St. Andrew the Apostle, the highest order of laymen in the Greek Orthodox Church. Personally and professionally he has remained steadfastly committed to a guiding principle: children are the future.

With that in mind Mr. Rangos has generously supported a number of charities whose missions are to add value to life. Children's Hospital of Pittsburgh is proud to be one of the recipients of Mr. Rangos' generosity. Mr. Rangos has a lengthy history of supports with Children's dating back to the early 70's.

Over the years Mr. Rangos' involvement with Children's Hospital increased. In 1987 Mr. Rangos and the employees of Chambers Development instituted an annual recycling campaign. Proceeds were donated to the hospital's Free Care Fund. In 1989 Mr. Rangos launched the Cruise for Kids, a one-night fund-raising event held aboard the Gateway Clipper Fleet's Majestic. In its first year the event raised over $150,000, and in June 1990 the Cruise raised $200,000.

A member of the Pittsburgh Press Old Newsboys, Mr. Rangos earned the distinction of becoming the largest contributing Old Newsboy in his first year with the campaign.

However, Mr. Rangos' most evident display of his vision for the future came in the form of his contribution to the hospital's StarBright Centennial Research Endowment Campaign, Mr. Rangos' gift of $3 million set the pact for the future of the hospital's $22 million campaign. Through his generosity Mr. Rangos has endowed the Rangos Research Center, certain to be the home of future breakthroughs in pediatric research.

He also significantly contributes to United Cerebral Palsy, Muscular Dystrophy and the Leukemia Society in addition to other charitable organizations. He is an active member of The Allegheny Club, the Pittsburgh Press Club, the Truman Library Foundation, the International Platform Association, the University of Pittsburgh Golden Panther and the Churchill Valley Country Club. Mr. Rangos has served on the board of directors of the Sanitary Refuse Haulers Association of Southwestern Pennsylvania, Craig House-Technoma, Winchester North, Inc., Hellenic College and the Presentation of Christ Diocese. He has been a national delegate to the United States Olympic Conference, a United Nations of America delegate, a 32nd degree mason, a Syria Shriner, a UNICEF Pittsburgh fundraising chairman and a member of the Clergy Liturgy Council.

Mr. Rangos began his career with Rockwell Manufacturing Company, where he gained the distinction of being the youngest general agent in Rockwell's history. During the 1960's, Mr. Rangos formed several companies and pioneered technological advances in waste transportation and disposal, resource recovery and recycling.

After attending Houston Business College, Mr. Rangos served in the United States Armed Forces from 1951–1954 with a tour of duty in Korea.

RULE ON H.R. 1154, THE SEMIAUTOMATIC ASSAULT WEAPON IMPORT CONTROL ACT OF 1990

HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mr. ROSTENKOWSKI. Mr. Speaker, I wish to serve notice to my colleagues that, pursuant to the rules of the Democratic Caucus, I have been instructed by the Committee on Ways and Means to seek less than an open rule for the consideration by the House of Representatives of H.R. 1154, the Semiautomatic Assault Weapon Import Control Act of 1990.

IN HONOR OF FLORENCE ZIEDMAN: AN EXTRAORDINARY VOLUNTEER

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mr. PORTER. Mr. Speaker, recently President Bush named one of my constituents, Mrs. Florence Ziedman of Buffalo Grove, IL, as his 197th "Daily Point of Light" volunteer. The President and Mrs. Bush, as well as President Reagan before him, have been so impressed with Mrs. Ziedman's contributions that they have both honored her with official recognition. Anyone who knows about "Mrs. Z" would be equally impressed, and I am proud to represent a congressional district that includes an individual of her caliber.

Although she is in the age category we refer to as "senior citizen," Florence Ziedman has energy and enthusiasm for life that would be the envy of a teenager. For over 45 years, she has volunteered at Edward Hines Veterans' Administration Hospital in Maywood, IL, assisting in the rehabilitation of spinal cord injured veterans who are paralyzed. For many of these veterans, she has been heaven-sent, leading them out of the depths of despair and giving them the will to live. I would like to share a moving description of Florence Ziedman that was written by someone who has known and worked with her for many years: Mr. Walter Schaffer, retired Chief of Recreation Therapy at Hines VA Hospital.

At the request of over 100 paralyzed veterans who wanted "Mrs. Z" to receive the recognition she so richly deserved, Mr. Schaffer wrote an essay entitled "They Only Wanted To Die." I have excerpted from that essay below, and anyone who reads it will understand why Florence Ziedman is truly one of our Nation's invaluable volunteers:

THEY ONLY WANTED TO DIE

"We love you Mrs. Z." Hundreds of severely paralyzed spinal cord injured veterans have been saying this to their wonderful "Mrs. Z" for years.

Her real name is Florence Ziedman. She is a bit over 78 years old and has volunteered for 45 years in the rehabilitation of injured veteran patients paralyzed from the neck or waist down. Some of them are so paralyzed they can move no part of their body except their head. Before Mrs. Ziedman came into their lives in 1944, many of them only wanted to die.

Mrs. Z is not the stereotype people have of a person over 78 years old. No one ever believes she is over 78. She doesn't look over 65 and has the energy of a person who is only 35.

President Reagan awarded her a commendation letter in 1988 for her dedicated volunteer work and for service to her country. The Veterans Administration has presented her with its highest honors. The Paralyzed Veterans of America has also honored her with numerous awards for helping their members.

Florence Ziedman has made over a half a million bedside visits in the 45 years she has been talking with and counseling spinal cord injured veterans. Her thousands of hours of volunteer work have saved the federal government over 100 thousand dollars in salary that would have been paid to a therapist doing similar work. In addition, Mrs. Z has secured over a quarter of a million dollars in donations for the hospital and its patients during her years of volunteer work.

Her commitment to the paralyzed veterans and her country can be comprehended through statistics describing the value of her service. Mrs. Ziedman has driven 187 thousand miles from her home to Hines VA Hospital, and has made this trip twice a week in all kinds of weather. Her fuel bill over the years has been $6,522 for 9,360 gallons of gasoline.

When most people her age retire to a rocking chair and watch television, Mrs. Ziedman is still driving down Interstate 294 on her way to Hines Hospital to help the people she loves to help the most . . . the veterans who need her so much.

In 1944, hospital troop trains were bringing hundreds of World War II injured to Hines every day. Twice a week, for 52 weeks, Florence tried to reach these patients as she walked the floors of the wards for hours on end. She smiled at them and offered to help them in any way she could. For one whole year, no patient ever smiled back. No patient even recognized her. They pulled the covers over their heads when she walked by.

They refused to face her. They looked the other way when she smiled at them. They did not want people to see their horrible physical condition. They did not want to see it themselves. The last thing they wanted was to talk about it. They looked at themselves as being among the living dead.

After 52 weeks of walking the wards in silence, one lone veteran smiled a faint smile at Mrs. Z. She smiled back. He talked with her. Others started to smile and talk too. Her lifetime career, which would span almost half a century of helping the severely disabled, started with this one little smile and after 45 years and one hundred thousand smiles it is still going strong. The patients smile at her and greet her and can't wait to see her when she walks the wards today. They have been doing this for 45 years.

Patients she helped rehabilitate in 1944; people who gave up on living; people who now live successfully in the community; all of these people still keep in touch with her. She has hundreds of paralyzed veterans as personal friends. They love her because they say they owe their lives to her. She gave them the will to live and a reason for living. She taught them something important about life and living that no doctor, nurse, therapist or even family member

could ever teach them. She taught them how to live when they only wanted to die.

Florence Ziedman showed them that life is a beautiful thing. She taught them that a physical disability was not a horror . . . something to hide from . . . something to fear and be ashamed of. She taught them that all people were beautiful people. She inspired them to see they had something of value to give back to them.

Mrs. Z is one of those rare people who understand how they feel. She listens and waits. She is a woman of great patience with the disabled. She knows that if she does not reach them today she will reach them at her next visit or the visit after that. In 45 years she has never failed to reach any patient.

The delicious food on her deli cart is given free to all of the patients. The federal government has never contributed any money to her food costs. Each year she raises $1,700 in donations to purchase food. Mrs. Ziedman does many other things to enrich the lives of the patients and to help the Veterans Administration. Her contacts with people in the theatrical world enable her to secure expensive tickets so patients can see first run plays and musicals appearing in Chicago. Since 1944 she has held 270 theater parties attended by patients on the spinal cord injury, nursing home, substance abuse and psychiatric wards. Not content with taking patients to the theater, Mrs. Z has also been responsible for bringing famous stars right to the bedsides of hospitalized veterans. Some of these stars have included Bob Hope, Jerry Lewis, Dean Martin, Milton Berle and others.

Every hospital should have a Mrs. Z. Many people have given their lives for their country, but Mrs. Florence Ziedman has given her life to her country by giving it to us, the paralyzed veterans, who served that country. She is a role model all volunteers in the nation can emulate; a role model of inspiration and love who taught disabled veterans how to live . . . when they only wanted to die.

ARAB REACTION TO SOVIET-JEWISH IMMIGRATION TO ISRAEL

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mr. LEVINE of California. Mr. Speaker, I rise today to share with my colleagues a report that was issued by the Anti-Defamation League of B'nai B'rith entitled "Arab Reaction to Soviet-Jewish Immigration to Israel." The report pulls together data regarding the coordination efforts of the Arab world to stop the flow of immigrants. It is an excellent and thorough report. I encourage my colleagues to read it carefully.

The text of the report follows:

ARAB REACTION TO SOVIET-JEWISH IMMIGRATION TO ISRAEL

PREFACE

As Soviet Jews emigrate to Israel in unprecedented numbers, their quest for security in a Jewish homeland is endangered by an Arab campaign to halt the exodus. The virulently anti-Zionist and anti-Semitic aspects of this campaign demonstrate once again the unwillingness of the Arab world to make peace with Israel and remind us that the Arab rejection of the Jewish state lies at the heart of the Middle East conflict.

The Arab reaction against Soviet Jewish emigration to Israel, as documented in this report, takes several forms:

An international lobbying campaign intended to persuade Moscow to cease issuing exit visas to Jews leaving for Israel. Pressure by Arab leaders has also been brought upon Eastern European countries that have been serving as transit points for Soviet Jews on their way to Israel to close their gates.

Strident media attacks throughout the Arab world depicting Israel as an alien, expansionist country with no legitimate right to co-existence in the region. These attacks have employed anti-Semitic caricatures and articles reminiscent of Nazi hate propaganda.

The call for "armed struggle" to prevent Soviet Jews from arriving in Israel. At least one terrorist group, Islamic Jihad, declared its intention to attack airlines and airports engaged in transporting Soviet Jews to Israel. PLO leaders have also been quoted as exhorting violent means to stop the immigrants. While none of these threats has been carried out, the targeting of refugees fleeing persecution for terrorist action is the most sinister aspect of the Arab campaign. It is one taken seriously by Israel.

INTRODUCTION

Soviet Jews, trapped for decades in the U.S.S.R. by repressive, anti-Semitic regimes, are finally being permitted to emigrate in large numbers. Thanks to a strenuous international effort and the onset of *glasnost*, the gates to freedom were unlocked by Soviet President Mikhail Gorbachev.

Spurring the exodus from Russia is the widespread fear of anti-Semitism. The unleashing of xenophobic passions and the near breakdown of the Soviet economy have revived grassroot threats against the Jewish population. Anti-Semitic stereotypes are surfacing throughout the U.S.S.R. more frequently. Harsh economic, conditions feed the need for a scapegoat. As a result, Jews are opting to leave the U.S.S.R. in unprecedented numbers.

With restrictions on the numbers of refugees permitted into the United States, the large majority of Soviet Jews are leaving for the one country that will take them—Israel. For Israel, whose security as a Jewish state is imperiled by its small population (less than 4.5 million Jews), the influx from the U.S.S.R. is viewed as a miracle for revitalizing the Zionist dream: the building of a Jewish homeland.

For Soviet Jews, their passage to freedom dramatizes another tenet of Zionism: the provision of safe refuge to Jews anywhere living under the threat of persecution.

ARAB REACTION

Throughout the Arab world, the response to the exodus from Russia to Israel has been one of unremitting hostility. Arab leaders have spoken out vociferously against the emigration, urging Moscow to deny visas to Israel. Their claim is that Jewish immigrants will settle in the West Bank and Gaza, thereby threatening the Palestinian inhabitants and their future hopes for a homeland. Taking this argument one step further, Iraq's Deputy Foreign Minister, Nizar Hamdoon, warned that should the new immigrants settle in the West Bank, a new physical, social and economic situation would emerge "which may lead to war." Among the same lines, Egyptian President Hosni Mubarak, speaking at a gathering of the Socialist International on May 22, declared that the influx of Soviet Jews into Israel "threatens to blow up the peace march and to put the whole region on the verge of a new, bloody confrontation."

This argument fails to consider the facts. Less than one percent of Russian immigrants choose to live in the territories. The stated Arab concern cannot be reconciled with the actual number of Soviet Jews that have thus far settled in the West Bank and Gaza. In reality, their concern continues to be about the very existence of a Jewish state in their midst.

The intensive Arab effort to stop Jewish immigration harkens back to the origins of the Arab-Israeli conflict. In the 1930s and 40s, Jews fleeing the Holocaust in Europe for British-governed Palestine were confronted with hostile opposition by the Arabs. As a result, Britain issued the notorious "White Paper" of 1939 limiting Jewish immigration as the threat to their existence increased in Europe. The moral implication of this heinous act ought not to be lost on the West today.

The campaign to stop the flow of immigration began with Jordan. King Hussein broadcast the message that Soviet Jews would displace Palestinians in the West Bank, driving them across the border into Jordan. The Hashemite Kingdom, claimed Hussein, would be jeopardized by this demographic surge. Neither the West nor the Soviets, argued Hussein, can permit this to occur.

This is an absurd charge. Apart from the fact that few Soviet Jews (less than one percent of the immigrants) chose to live in the territories, Israel has always viewed the future of Jews and Palestinians as living in peaceful coexistence. Far from displacing Palestinians, Israel is the only party engaged in their rehabilitation. In Gaza, for example, Israel, in cooperation with eight international organizations, purchased state land in the early 1970s to build low-cost homes as an alternative to the densely packed camps which have housed two-thirds of the refugees since 1949. However, the rehousing project has been denounced by Arab and PLO leaders who claim that the refugees should remain in the camps until an independent Palestinian state is established. At first, Arab government opposition and PLO intimidation prevented the program's implementation. But today, the real needs of the refugees have begun to outweigh external pressures and thousands of Palestinians have left the camps for more modern facilities built by Israel.

Despite the peace treaty with Israel, Egypt too has been an alarmist on the question of Jewish immigration. The Egyptian press—establishment and opposition alike—has been virulently hostile about Soviet emigration to Israel. "The crime of the age" is the recurring headline in Cairo. "The immigration is the third disaster after those in 1948 and 1967," is another theme which echoes throughout the Egyptian media.

Among the Palestinians there was no distinction between the so-called moderates and the hardliners on this issue. Faisal Husseini, portrayed as a voice of conciliation in the West Bank, visited Moscow in April and called upon Soviet authorities to restrict the emigration of Jews. When a Soviet Jew becomes a citizen of Israel, said Husseini in Moscow, "he becomes an element in the military machine that destroys Palestinians" (*Jerusalem Post*, April 19, 1990). Husseini's remarks were strongly rebuked by Is-

raeli peace activists for distorting the essence of Zionism and undermining the principle of coexistence.

LOBBYING

The sustained attack on Soviet Jewish *aliyah* in the Arabic press has been accompanied by an intensive lobbying campaign by individual Arab leaders and organizations such as the Arab League and the PLO. The main thrust of the campaign has been to persuade Moscow and East European transit countries to close the gates to the Soviet Jews and to protest in general against Israel's supposed intention of using the Soviet Jews as a demographic weapon against the Palestinians and the Arab world in general.

On January 18, 1990, a warning was given to the Israeli Ambassador to the United Nations by the Russian Ambassador that Moscow would stop Jewish emigration if Soviet Jews were settled in the West Bank or Gaza Strip. This warning followed "great pressure on the Soviet Union by the Arab states," according to the East Jerusalem newspaper Al-Quds (1/19/90). The Kuwaiti paper Al-Rai al-Am reported on January 20, 1990 that a high-level Soviet delegation had already secretly visited Israel to hand a letter to Prime Minister Shamir from Soviet Foreign Minister Eduard Shevardnadze on the same subject. PLO Chairman Arafat had reportedly sent Shevardnadze a letter on the matter.

Arab leaders have lobbied Soviet and American diplomatic representatives in Tunisia, at the United Nations and wherever else possible. The European Community has also been pressured for a response. PLO Chairman Yassir Arafat in particular has embarked on a series of high-profile meetings. He met with President Mitterand and ex-U.S. President Jimmy Carter in Paris, with President Cossiga in Italy and the Pope at the Vatican all in a matter of days at the beginning of April. Syrian President Assad visited Moscow in later April, 1990, where he raised the issue with Soviet leaders. While Gorbachev apparently decline to stop the exodus, he did tell the Syrian leader that "the issue of immigration should not only be concerned with human rights, but with the concrete rights of the Arabs as well."

Meanwhile, at the PLO's urging, an Arab League summit meeting to discuss the immigration issue will be held this month in Iraq.

Several other developments can most probably be attributed to this diplomatic offensive. Negotiations between the Soviet Union and Israel to institute direct flights from Moscow to Tel Aviv broke down. In late February 1990 U.S. Secretary of State James Baker linked the granting of $400 million in housing loan guarantees for Israel to a freeze on settlement activity in the administered territories. Jerusalem, which Israel does not consider as occupied territory and where many Soviet Jews have chosen to live, has also been targeted in the Arab campaign. Jerusalem is the capital of Israel and no amount of Arab pressure will infringe upon the rights of Jews to live in the city.

The Foreign Ministers of the European Community released a statement denouncing the policy of Israeli settlement in the disputed territories and the United Nations Security Council held a debate on the issue of Soviet aliyah, also at the behest of the Arab states.

ANTI-ZIONIST AND ANTI-SEMITIC THEMES AND IMAGERY

A survey of Arabic press coverage and statements of officials relating to the issue of Soviet aliyah reveals a number of recurring themes. These have little to do with today's Jewish refugees from the Soviet Union and much more to do with the historical anti-Israel attitude which still prevails in the Arab world. The expression of vehement opposition to the current immigration of Soviet Jews bears an uncanny resemblance to the way in which the Arab world greeted the influx of European Jews in the 1930s, before the state of Israel was founded.

In the 1950s, for example, constant comparisons were made in the Arab world between the Crusaders and the Israelis. Both were considered foreign interlopers who had come to the region as enemy invaders to wage war on Dar el-Islam, the Islamic world. Egyptian President Nasser even merged his army with that of the Syrians in a bizarre attempt to parallel Saladin's flushing out of the Crusaders seven centuries earlier. Little has changed in 1990. The Secretary-General of the Arab League, Chadhli Qlibi, stated that Soviet Jewish immigration "could fuel a new Crusade!" (Al-Qabas, Kuwait, 1/23/90), and the Saudi Arabian paper Al Jazira accused the Zionists of a plot "to establish a Jewish base on the land of Palestine from which to wage war on Islam" (2/1/90).

Another recurring theme found in Arab media coverage of the immigration is the depiction of all Jews as alien to the area, with no legitimate rights to settle there. The distinction is often blurred between the disputed territories of the West Bank and Gaza Strip and Israel in general. As a result, some articles are ambiguous. Others make their point perfectly clearly: that is, Israel is a false creation whose permanence and very existence is not to be taken for granted. The Egyptian journalist Ahmed Zein, for instance, wrote in the mainstream Al-Akhbar newspaper (2/1/90): "Israel cannot live, no matter how much the world powers support her, without peace in the region. But peace will not be realized as a result of aggressive policies, or by bringing in half a million residents who have no roots in the region, and settling them there. The land will not allow them to take root, as they are not its people. However long they live there, they will remain only on the surface. A strong gale will sweep them up and blow them far away."

Syrian President Hafez al-Assad went a stage further in a speech he made in Damascus on March 8, 1990. In his view, not only do the Jews of Eastern Europe have no historical claim at all on Israel, but they do not even belong to the Semitic people. Rather, they are descended from a "big tribe of Khazars that emigrated from the Far East to the West."

Saudi Arabia, regarded as a "moderate" in the Arab-Israeli conflict, takes no less a militant line on the question of immigration and Jewish presence in the Middle East. "Unless Palestine is turned into an inferno through escalation of the military struggle * * * the Jews in Palestine will number over 8 million by the beginning of the 21st Century," the Saudi newspaper Al-Riad recently stated.

Coverage of the new immigration also reflects feelings of deep uncertainty in the Arab world. Fears and accusations of the colonialism, which have lain dormant for some time, have resurfaced. The main threat is perceived as coming from Israel and her so-called expansionist aspirations. Much is made of Israel's supposed super-plan to establish a Jewish homeland stretching from the Nile to the Euphrates. The Arab media has depicted Soviet Jewish aliyah as a means by which Israel can bolster her numbers enough to acheive that expansionist end. Hussein Fahmi wrote in the Egyptian Akhbar al-Yawm (2/3/90): "If the program for huge immigration is realized, it will awaken the appetities of Israel and the Zionist extremists for the further incursion, harshness and expansion, and for a change in the balance of power in the interests of aggression."

PLO Chairman Yassir Arafat, in an interview with the Kuwaiti Al-Anba (3/12/90), urged the entire Arab nation to support the Palestinian struggle in the wake of the Soviet Jewish immigration. He noted "Israel's ambitions and plans to establish a Greater Israel from the Nile to the Euphrates." In the course of the interview, Arafat produced a map depicting the areas of "Israeli ambitions." The map included all of Jordan and Lebanon, two-thirds of Syria, a third of Saudi Arabia as far as al-Madina, the whole of Sinai and three-quarters of Iraq. "This is an implementation of the Zionist dream of establishing a state from the Nile to the Euphrates," stated Arafat.

The entire issue of Soviet Jewish immigration to Israel is widely depicted as a world conspiracy aimed against the Arabs. According to this thesis, Moscow, Washington, and Israel secretly plotted well in advance that once the Soviet gates had opened, the gates of the United States would close, forcing the Soviet Jews to go to Israel. The Soviet Jews themselves are cast for the most part as being pawns in the game of strengthening Israel. The reasons why they are so anxious to leave the Soviet Union in the first place are given very little consideration.

Finally, press on the issue has been replete with anti-Semitism, both in articles and in cartoons which address the subject. The abundance of anti-Semitic, stereotypical caricatures of hook-nosed, stunted Jews accompanying the press campaign against Soviet *aliyah* are reminiscent of those that appeared in Nazi hate pamphlets of World War II.

In the cartoons, Soviet Jews are for the most part represented as simple, weak victims of Israeli scheming. Israeli leaders including Shamir are depicted as aggressive bullies bristling with weapons. Stars of David adorn hats and sleeves to leave no doubt as to who is a Jew, again stirring up images of the Nazi era (see appendix).

TERROR

It did not take long for radical extremists in the region to respond to the new "Crusade" with an old weapon—jihad (holy war). The resort to terrorism is aimed at intimidating parties involved in facilitating the immigration of Soviet Jews to Israel. Israel and the United States have too often been victimized by the constant Middle Eastern terrorist threat against their interests worldwide. But countries such as Poland and Hungary have not.

In mid-March 1990, a terrorist group calling itself the Islamic Jihad for the Liberation of Palestine issued a threat in Beirut to target all airlines and airports helping to transport Soviet Jews to Israel. The Islamic Jihad for the Liberation of Palestine is believed to be linked with the Iranian-backed Hezbollah organization, and has been holding three U.S. hostages in Beirut since 1987. Following the threat, the national Hungari-

an airline, Malev, which had been providing a vital transportation link for the Soviet Jews via Budapest, suspended these flights. (Malev has since resumed the flights.)

Poland promptly offered to fill the void, and announced on March 24 that the number of flights between Warsaw and Tel Aviv were to be doubled. On March 30, gunmen shot down the representative of Animex, a Polish agricultural trade organization, and his wife, outside a Beirut hotel. Islamic Jihad for the Liberation of Palestine claimed responsibility for the attack, as did a previously unknown group calling itself the Revolutionary Action Arab Resistance Front—Sulayman al-Halabi Squad.

PLO leader Yassir Arafat, calling Soviet Jewish immigration a "more dangerous conspiracy" than Israel's establishment in 1948, has urged Arab and Palestinian throngs to confront the immigration threat "with effective measures and not merely with resolutions." Such sentiments have been voiced throughout the Arab world. In Egypt, for example, one newspaper editorialized: "The intifada must be intensified * * * in order to make the immigrants understand that they have to come from the Garden of Eden to Hell!" (Al-Kuds Arabia, March 1990)

According to a recent U.S. News and World Report, Palestinians are trying to enlist Hezbollah and European terrorists such as the Red Brigades to attack immigrants en route in Israel. Ahmed Jibril, head of the Damascus-based Popular Front for the Liberation fo Palestine, was quoted as urging Iraq, Syria and Jordan to form a military alliance that would stop the flow of Soviet Jews to Israel. "The greedy immigrant Jews will not come to Palestine to die," Jibril told the Arabic newspaper, Al Hayat.

To date, the only report of an attempted terrorist attack was of a Soveit airliner targetted by Palestinians. The report, carried by Tass (April 1990), the official Soviet news agency, claimed the attempted attack was made in Cyprus against an Aeroflo jet carrying Jewish immigrants to Israel. While Cyprus is not a transit point for Soviet emigrants, it is a stop-over for Soviet tourists visiting Israel. There was no further information or confirmation of this account.

CONCLUSION

Some may dismiss the Arab world's alarmist response to Soviet Aliyah as mere rhetoric. Nevertheless, it has introduced new tension and real physical danger into an already troubled region.

This anti-Israel sentiment in the Arab world is clearly no new development. The issue of Soviet Aliyah has merely provided a pretext for the Arab world to give vent to its historic opposition to Israel's very existence.

The Arab world's genuine acceptance of Israel's right to exist in security in the Middle East is a prerequisite for any kind of peace in the region. Such acceptance is obviously not yet forthcoming. The persistent attacks by the Arabs against Jewish immigration is not only an infraction of a cherished human rights principle—free emigration. It also undermines the prospects of a Middle East peace based upon mutual acceptance and Jewish-Arab coexistence in the region.

NONCONVENTIONAL FUELS CREDIT EXTENSION AND MODIFICATION ACT OF 1990

HON. MICHAEL A. ANDREWS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mr. ANDREWS. Mr. Speaker, today, I am introducing, and hope my colleagues will join me in cosponsoring, legislation which I believe will go a long way toward helping our country address its needs for both energy and a clean environment. The Nonconventional Fuels Credit Extension and Modification Act of 1990 provides the necessary tax incentives to encourage continued production of fuels which are difficult to remove from the ground. These relatively low cost incentives include a 2-year extension of the section 29 tax credit and a modification and clarification of the definition of qualified nonconventional fuels relating to tight sands gas production no longer regulated by the U.S. Government.

The section 29 tax credit was enacted by the Congress in 1980 to encourage the production of nonconventional fuels which could be used to supplement our conventional energy resources. With U.S. oil import dependence currently approaching 50 percent, and the Nation's desire for cleaner air likely to increase consumer demand for natural gas, continuation of this targeted credit is vital to both our energy security and our economic and trade interests.

Currently, section 29 of the Tax Code provides a credit to producers upon the sale of certain nonconventional fuels, including oil produced from shale and tar sands; gas produced from geopressured brine, Devonian shale, coal seams, certain tight formations, and biomass; and certain liquid, gaseous or solid synthetic fuels produced from coal. These fuels can be found in a number of States, including Ohio, Pennsylvania, New York, and Michigan, well beyond the scope of traditional oil and gas producing areas. However, the eligibility for the tax credit is limited to production from wells drilled or property placed in service prior to January 1, 1991. This date needs to be extended for at least 2 years to provide a meaningful incentive for the continued production of these difficult-to-extract fuels.

The other part of my bill affects the eligibility of tight formation gas, a nonconventional fuel, for the tax credit. Since passage of the section 29 credit in 1980, court cases and the Federal Energy Regulatory Commission [FERC], while focusing on energy instead of tax policy, have virtually eliminated the qualification of tight formation gas production for the credit.

The removal of tight formation gas from eligibility for the credit has been accomplished at a time when natural gas remains one of our country's cleanest fuels. As compared with other fossil fuels, natural gas produces much less carbon dioxide and emits virtually no sulfur dioxide, the cause of acid rain. Much of the natural gas in the United States is difficult to produce because it is located in tight formations. Providing reasonable incentives to producers of tight formation gas is necessary to ensure their continued production. This is particularly important to our Nation now. Cheaper, less environmentally sensitive fuels are keeping the prices for natural gas from these formations too low for economic production without these incentives.

Current section 29 rules provide that the credit is applicable to the production of tight formation gas, if it is regulated and given an incentive pricing under the Natural Gas Policy Act of 1978 ("NGPA"). Continued regulation was included as a condition for eligibility in 1980 because, at that time, most experts believed that the prospect of deregulation meant increasingly higher prices for natural gas. Such price increases would have necessarily obviated the need for a production tax incentive. In fact, however, gas prices have declined in real terms since then. Consequently, continuation and expansion of the credit is more critical than ever.

Moreover, the regulatory requirements have unfairly placed the Congress and the administration in the position of being at the mercy of having to affect tax law when their focus was only to affect the regulated status of natural gas production. My bill is designed to eliminate this problem on a prospective basis.

The complexity and unfairness of relying on the regulatory status of tight formation gas under the section 29 rules can be explained as follows. When the NGPA was enacted, it arbitrarily distinguished the treatment of tight formation gas, depending on whether the gas was committed or dedicated to interstate commerce on April 20, 1977. The NGPA provided for phase deregulation, beginning January 1, 1985, of certain categories of gas under which most tight formation gas was classified (excluding committed or dedicated gas). Further, the NGPA included another classifiation, under which tight formation gas was qualified, which provided for incentive pricing.

My bill addresses two inequitable situations which have occurred because current section 29 rules rely on this complicated NGPA regulatory classification scheme. First, the bill addresses the problems involving those producers, with gas that was dually qualified under both a deregulated category (gas not committed and dedicated) and the regulated category which allows incentive prices. These producers initiated drilling programs in anticipation of the continued use of the credit in the belief that gas which was dually qualified was still eligible for the credit after January 1, 1985.

In what has become the first of a number of recent decisions with a similar impact on the Tax Code, the FERC issued an order in 1984 stating that gas which qualified under both a regulated and deregulated NGPA pricing category (dually qualified) would be deemed deregulated. The January 1, 1985, date, therefore, eliminated tax credits along with price regulation for tight formation gas which was not committed or dedicated to interstate commerce on April 20, 1977. In 1988, the FERC's decision was finally upheld by the Supreme Court in *Federal Energy Regulatory Commission* v. *Martin Exploration Management Co.*, 106 S. Ct. 1765, 1770 (May 31, 1988).

My bill would address this problem by removing both the price regulation and incentive pricing requirements under current section 29,

on a prospective basis. Accordingly, those producers with gas that was not dedicated or committed could drill tight formation gas wells after the date of enactment of my bill and would no longer be subject to these troublesome requirements. Since FERC and the Congress have made an energy policy decision to deregulate most tight formation gas, my bill would keep this decision from dictating tax policy relating to the section 29 credit.

My bill also addresses problems under current law involving gas which remained regulated even after the Martin Exploration decision. These producers, with gas committed or dedicated by April 20, 1977, undertook multiple well drilling programs in reliance on the continued utilization of the credit. Under the NGPA, this gas would never be deregulated, and the FERC issued an order soon after the credit was passed in 1980, giving this gas an incentive price to compensate for the high economic risks of production, both requirements for the credit.

The enactment of the Natural Gas Wellhead Decontrol Act of 1989 ("Decontrol Act") on July 26, 1989, brought the problem with the regulatory requirement under section 29 into focus for gas that was committed or dedicated. The Decontrol Act provides that all regulated tight formation gas, from wells drilled by the date of enactment, will be decontrolled on January 1, 1993. Gas from wells drilled after the date of enactment of the Decontrol Act will be decontrolled sooner on May 15, 1991.

Without any action by the tax writing committees, the Decontrol Act foreshortened the eligibility of this previously regulated tight formation gas for tax credits by eight or more years. Gas that would otherwise have generated credits through the year 2000 will lose its eligibility as early as May 15, 1991. Although the legislative history of the Decontrol Act includes specific language indicating opposition to this unintended impact on tax credits, the eligibility of these wells for the credit is severely curtailed.

Recent FERC regulatory action has also taken its toll on utilization of the credit for producers of gas which was committed or dedicated to interstate commerce by April 20, 1977. Until the issuance of a recent FERC rule, this tight formation gas remained eligible for incentive pricing as required for the credit. In 1989, the D.C. circuit held that the FERC could not arbitrarily terminate a 1983 rulemaking wherein they had proposed that incentive pricing for tight formation gas was no longer in the public interest, given the gas supply outlook at that time. Because the FERC withdrew its proposal in 1986, the gas remained price-regulated and qualified for the credit. In response to the court's remand, however, the FERC issued a new order in February 1990 (Order No. 519) stating that regulated tight formation and production enhancement wells, if drilled after May 12, 1990, would no longer qualify for an incentive price. Accordingly, the dedicated or committed tight formation wells, if drilled after May 12, 1990, will not qualify for the tax credit.

Again, without any input from the tax writing committees, an energy regulatory decision had and continues to have a direct impact on taxpayers using the credit. Moreover, the FERC determined on rehearing (Order No. 519–A) that the tax effects of its actions would not be taken into account in its decision to rescind incentive pricing.

Similarly, in April 1990, the FERC again issued an order with a direct impact on the credit for producers with committed or dedicated gas. In Order No. 523, interpreting the Decontrol Act's effective date, the FERC ruled that gas, even temporarily released from a contract in effect on the date of enactment of the Decontrol Act, is not regulated during the period of release. This order deregulates retroactively all released gas, even if "dedicated or committed" and thus otherwise price regulated, and produced after the date of enactment of the Decontrol Act.

My bill would eliminate any effect of both the Decontrol Act and these and future FERC rulings on the use of the section 29 credit, for gas committed or dedicated on April 20, 1977. Although the FERC decisions have had an adverse impact on producers of tight formation gas effective from the date of enactment of the Decontrol Act (July 26, 1989), in order to assure prospective only application, these rules would apply to gas produced after the date of enactment of my bill.

The Nonconventional Fuels Credit Extension and Modification Act of 1990 and a section-by-section explanation of its provisions are reprinted below. I hope my colleagues will join with me in cosponsoring this important legislation.

NONCONVENTIONAL FUELS CREDIT EXTENSION AND MODIFICATION ACT OF 1990

SECTION 1. SHORT TITLE.

This Act may be cited as the "Nonconventional Fuels Credit Extension and Modification Act of 1990".

SEC. 2. EXTENSION AND MODIFICATION OF CREDIT FOR PRODUCING FUEL FROM A NONCONVENTIONAL SOURCE.

(a) EXTENSION OF CREDIT.—Subparagraph (A) of Section 29(f)(1) of the Internal Revenue Code of 1986 (relating to application of section) is amended by striking "January 1, 1991" each place it appears and inserting "January 1, 1993".

(b) MODIFICATION OF CREDIT WITH RESPECT TO GAS FROM TIGHT FORMATIONS.—

(1) In General.—Subparagraph (B) of Section 29(c)(2) of such Code is amended to read as follows:

"(B) Special Rules for Gas From Tight Formations.—The term 'gas produced from a tight formation' shall only include gas—

"(i) which is committed or dedicated on April 20, 1977, to interstate commerce (as defined in section 2(18) of the Natural Gas Policy Act of 1978, as in effect on the date of the enactment of this clause), or

"(ii) which is produced from a well drilled after such date of enactment."

(2) Effective Date.—The amendment made by paragraph (1) shall apply to gas produced after the date of the enactment of this Act.

EXPLANATION OF ACT

Section 1. Short Title. Provides a short title, "Nonconventional Fuels Credit Extension and Modification Act of 1990".

Sec. 2. Extension and Modification of Credit for Producing Fuel From a Nonconventional Source. This section includes an extension of the credit and a modification of the fuels applicable to gas production from tight formations.

Subsection (a) of the Act amends subparagraph (A) of section 29(f)(1) of the tax code to extend the placed in service date by two years, until Janury 1, 1993. Under this provision all qualified fuels (as defined in section 29(c)(1)), drilled or placed in service during this additional two year period, would be eligible for the credit.

Subsection (b) of the Act substitutes two new categories for the rules applicable to tight formation gas production, under section 29(c)(2)(B) of the tax code. Under the first category, effective for wells drilled after the date of enactment, all tight formation gas would qualify for the credit, without the requirement that the gas be price regulated and eligible for incentive prices. This would qualify the type of gas production which was deemed to be deregulated under the Supreme Court Decision, Federal Energy Regulatory Commission v. Martin Exploration Management Co., 106 S. Ct. 1765, 1770 (May 31, 1988) ("Martin Wells").

Under the second category, certain gas from wells drilled prior to the effective date of this Act would remain qualified for the credit, regardless of the regulatory impact of the Natural Gas Wellhead Decontrol Act of 1989 ("Decontrol Act") and subsequent FERC orders. Qualified gas under this category must be produced after the date of enactment of this Act and must be produced from wells in which the gas was committed or dedicated on April 20, 1977, to interstate commerce as defined under the Natural Gas Policy Act of 1978 ("NGPA"). The intent of the provision is to cover wells which were regulated, and for which there was no intention to deregulate, at the time the tax credit was enacted in 1980. Without this amendment, gas produced from these wells after December 31, 1993, would automatically be disqualified for the credit when decontrolled pursuant to the Decontrol Act, if from wells drilled before the date of enactment of the Decontrol Act; the gas would be disqualified on May 15, 1991, for wells drilled after the date of enactment of the Decontrol Act.

Further, this category would assure that current and future regulatory decisions of the FERC would not have an inadvertent tax effect on the continuing qualification of these wells for the credit. Examples include the inadvertent tax effect of FERC Order No. 519, in which the FERC partially terminated the regulated (incentive) pricing of tight formation wells drilled after May 12, 1990, and FERC Order No. 523 in which the FERC determined that released gas could not be considered regulated under the Decontrol Act.

A SALUTE TO JOHN E. PISANO

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mr. WALGREN. Mr. Speaker, I want to ask my colleagues to join me in honoring the late John E. Pisano, manager of the Pittsburgh office of the U.S. Department of Housing and Urban Development, who passed away earlier this month.

Mr. Pisano was a government servant who dedicated most of his short life to service to people, and we in Pittsburgh are going to miss him greatly.

He was a good administrator of the public interest—the kind of administrator that has

been important for America to have. He put the success of the project he was facilitating ahead of the politics of those in contact with the project. And as a result, citizens of western Pennsylvania now are living better because of his service.

John E. Pisano was manager of the Pittsburgh office of the U.S. Department of Housing and Urban Development from November 30, 1981, until the time of his death on July 3, 1990. He was appointed to that career senior executive service position by former HUD Secretary, Samuel R. Pierce, Jr. The Pittsburgh office, under his leadership, received the HUD Region III 1985 Fair Housing Award of Merit. Mr. Pisano was named the HUD Region III Manager of the Year in 1987 and 1988. He was also nominated for the national HUD Manager of the Year award in each of those 2 years. In November of 1988, the Pittsburgh HUD Office, under Mr. Pisano's leadership, was presented with a Sustained Outstanding Office Award by former regional administrator, Kenneth J. Finlayson. In 1989, Mr. Pisano was recognized by the Three Rivers Center for Independent Living for his leadership in advancing the rights of persons with disabilities.

Prior to his appointment, Mr. Pisano served as chief of the loan management section for the college housing program in the U.S. Department of Education, a position he held since May 1980. He was responsible for developing and implementing policies and procedures for servicing over 3,200 loans valued at $3 billion.

From 1976 to 1980, Mr. Pisano was a realty specialist in HUD's Washington, DC headquarters, where he administered loan and grant programs for college housing. Prior to his appointment as a realty specialist, Mr. Pisano held several managerial positions in the Department, including special assistant to the director of housing programs and consultant to the Assistant Secretary of Housing. In these positions, he served as a policy advisor on the management of a broad range of subsidized and non-subsidized housing programs. From 1972 to 1974, Mr. Pisano was special assistant to the Director of HUD's Disaster Field Office in Wilkes-Barre, PA. He assisted the director in the management of the disaster recovery effort following the devastation caused by tropical storm Agnes in parts of Pennsylvania and New York. While in this position, he received the Department's Meritorious Service Award.

Before entering the Federal service, Mr. Pisano was a housing consultant and developer for Government-sponsored housing programs, as well as vice president of the Vector Corp., a manufacturer of nuclear reactor components. He also taught in the Pittsburgh Public School System. Mr. Pisano was born March 9, 1937; he received a bachelor of science degree in economics from Duquesne University in Pittsburgh.

Mr. Pisano is survived by his wife, Cynthia, and his mother, both of whom reside in Pittsburgh.

RULE ON H.R. 4939, RELATING TO MOST-FAVORED-NATION TRADE STATUS OF THE PEOPLE'S REPUBLIC OF CHINA

HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mr. ROSTENKOWSKI. Mr. Speaker, I wish to serve notice to my colleagues that, pursuant to the rules of the DemocraticcCaucus, I have been instructed by the Committee on Ways and Means to seek less than an open rule for the consideration by the House of Representatives of H.R. 4939, relating to most-favored-nation trade status of the People's Republic of China.

COURAGEOUS HEROINE

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mr. PORTER. Mr. Speaker, I rise before you today to honor a very special lady whose selfless act of courage saved the life of a 3-year-old boy. Bea Porter, who bears no relation to myself, a 15-year member of the Ladies Professional Golf Association, rescued 3-year old, Jonathan Smucker who was drowning in a pool near Phoenix, AZ's Moon Valley Golf Course on March 16, 1988.

At the time of the incident, Porter was playing a qualifying round for the LPGA's Standard Register Turquoise Classic. As she stood on the left side of the par five 13th hole, prepared to take a shot, she caught a glimpse of a fully dressed Amish man jumping into a backyard swimming pool. Mary Porter immediately recognized this peculiar situation and reacted by taking a closer look at the pool. She noticed a small child, 3-year-old Jonathan Smucker, floating face down in the pool.

Fortunately, Ms. Porter reacted quickly. With the assistance of her caddy, Wayne Sharpe, she climbed a 7-foot wrought iron fence, and without wasting any time, began to perform CPR on the child. The process which lasted a total of 20 minutes proved successful as the child was revived and rushed to the hospital where he was reported to be in good condition.

As if nothing out of the ordinary had occurred, Porter returned to her game, but missed qualifying for the Standard Register by three strokes. I am certain, however, that in her mind nothing could match the victory which she had just scored by saving a young child's life. Ms. Porter's noble effort should serve as an example to us all that we must often transcend daily life and suffer minor setbacks in our own personal quests in order to better fulfill our obligations as members of society. I know that all Members will join me in offering our heartfelt congratulations to her for this selfless act of courage.

EL SEGUNDO SUPERINTENDENT OF SCHOOLS LEAVES FOR WASHINGTON, DC

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mr. LEVINE of California. Mr. Speaker, I rise today to bring to the attention of my colleagues in the U.S. House of Representatives the announcement by President George Bush naming Richard Bertain as Associate Director for the ACTION Agency for the Office of Domestic and Anti-Poverty Operations. Dr. Bertain will retire from superintendent of El Segundo Unified School District on July 26, 1990, after 12 years of dedicated service to the community of El Segundo, a jewel by the sea in my 27th Congressional District.

Since 1978, Dr. Bertain has served as superintendent and assistant superintendent, business services, El Segundo Unified School District, where he managed the budget, business services, and personnel function. Prior to his current position, he served as assistant superintendent, business services, Palm Springs Unified School District, Palm Springs, CA, where he was in charge of all business functions, including accounting, budgeting, contracting, and insurance.

His experience also included service as president, American Educational Services, a consulting service to school districts and associations; and deputy superintendent of schools, Glendale Unified School District, Glendale, CA. He began his career as a high school teacher in San Diego in 1957.

Active in civic affairs, Dr. Bertain is currently on the Advisory Council of the Boy Scouts of America, and a sustaining member of the Young Men's Christian Association.

Dr. Bertain's academic credentials include a doctor of educational administration, Harvard University, a master of arts in educational administration, California State University, San Diego, and bachelor of arts in philosophy/English, St. Mary's College, California.

Throughout all his endeavors, Richard Bertain, has enjoyed the enthusiasm and support of his gracious wife, Mary, and their six children.

It is a pleasure to bring Richard Bertain's record of accomplishments to my colleagues. I ask that they join in congratulations on his recent appointment to the ACTION Agency. Our country is fortunate to have Dr. Bertain to administer such an important agency which does so much good work for so many people.

LEXINGTON MAYOR TESTIFIES ON RURAL TOURISM

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mr. SKELTON. Mr. Speaker, on June 30, 1990, my small business subcommittee held a field hearing at the Truman Library in Independence, MO, examining how economic de-

velopment through tourism can benefit rural communities. One of the witnesses presenting testimony was Mayor Cindy Dickmeyer of Lexington, MO. Mayor Dickmeyer's statement colorfully details how the tourism industry has helped to revitalize Lexington's economy and to bring the culture and the history of the past to life for visitors and residents today. Mayor Dickmeyer also addresses the challenges facing small towns, with access to limited funds, trying to attract visitors to spend time in their communities and experience what rural America has to offer.

Lexington is my hometown, and I have seen first-hand the benefits of tourism at work. Rural communities across our Nation, working to preserve the heritage that made our country great, share our rich legacy with future generations while sustaining the livelihoods of present-day residents. At this time I would like to submit Mayor Dickmeyer's testimony into the Extensions of Remarks of the CONGRESSIONAL RECORD:

STATEMENT OF CINDY DICKMEYER, MAYOR, CITY OF LEXINGTON

Mr. Chairman and members of the subcommittee, on behalf of the citizens of the Lexington community, we are very grateful for the opportunity to present our testimony today concerning tourism and its relationship with the rural communities of America.

Tourism in rural America is unique. Just as Lexington, Missouri, is unique. The history of Lexington spans 168 eventful years from the western frontier to our present day. Few Midwestern towns can boast of the rich tradition and exciting heritage that belongs to Lexington—beginning as far back as 1804 when Lewis & Clark passed the site of Lexington en route to explore the Northwest via the Missouri River. Settled during the 1820's, Lexington soon became a booming farm community and river town. Traders, fur trappers, and suppliers brought a brisk business to the community, which for a few years was the most western settlement from which outfitters sent caravans west on the Santa Fe Trail. Lexington became the seat of Lafayette County in 1823. In the 1850's, the offices of the great freighting firm, Russell, Majors, & Waddell was established. In 1859, this very firm inaugurated the famed Pony Express. The proud roll of early schools lists the very first college in the world to be founded by the Masons was opened in Lexington in 1848. Today's noted Wentworth Military Academy was founded in 1880 and is still in operation today.

Many large, beautiful houses and public buildings were built during the 1840's and 1850's. The present Lafayette County Courthouse was built in 1847 and has been occupied continuously, making it the oldest Courthouse in the State of Missouri still in use. There are over 110 antebellum homes still standing in our community today.

In September 1861, the prosperity of Lexington was temporarily disrupted by the invasion of the pro-South forces during the Battle of Lexington. The Anderson House, build in 1853, was used as a hospital during the battle. The battlefield is one of the few Civil War battlefields that has never been cultivated. This entire area is now a state historic site. After the Civil War, Lexington once again emerged as a prosperous community due to the coal mining industry becoming the economic mainstay of the area. And finally, in the center of our history, we have the dedication of the "Madonna of the Trail" monument. She was dedicated on September 17, 1928, by a Jackson County Judge—the Honorable Harry S Truman of Independence. This monument is one of twelve that is located in the states through which the National Old Trails Roads ran. Lexington also has four historic districts listed in the National Register of Historic Places.

There are many other areas of historical significance and interest in this small, rural community. I have only tried to highlight a few of them to give you an idea just how important Lexington's past has been in helping to develop this great country of ours. Lexington is situated in the very heartland of the United States. We, as our forefathers, are the very backbone of this country. We are the laborers, blue collar workers, and farmers. We are proud of our past and work hard to protect and save what we have. We realize that Lexington has not made history—but that history is what has made Lexington. The preservation of history is a vital part of our American heritage.

In recent years, rural areas have been plagued by a sharp decline in the agricultural industry, as well as the closings of many manufacturing industries. Some rural communities, however, like Lexington, have the potential to support and sustain an economy based on tourism. Tourism can be an especially beneficial activity to incorporate within the economic structure of smaller communities and rural areas, due to the fact that tourism is an industry that requires a limited financial investment. Because the major capital asset of this industry is, in fact, the natural or cultural resource itself, it therefore becomes an ideal vehicle for many rural areas to develop. When most people think of tourism, they think of recreation. However, attractions are what draw tourists to a specific area. Tourism, therefore, can't be considered a viable option for a community, if there is not a marketable attraction to present. Once your attractions have been acknowledged and established, there is an important need to be able to inform people about the attractions and services you have available. Tourism can't support any rural community through any significant economic importance if it is not first perceived as an important industry to that community and is developed in that manner. Even though a community's stability should not be built on a single industry, sometimes you have no alternatives. Tourism may be your only means of economic stability.

In Lexington, we have acknowledged tourism as being a very important industry to our community's economic structure. However, it is not our only means of economic survival. We have several other industries and businesses that give us a small, but deverse economy. However, development tourism as an industry in Lexington seems only natural. Tourism helps to expand our economical growth by stimulating future businesses—such as restaurants, motels, hotels, stores, and shops. This, in turn, helps generate needed additional revenue which can then be used to help make improvements to our city. There is really no limit to the amount in which our community could benefit from a prosperous tourism industry.

To help develop the tourism trade in Lexington, we have had two video tapes made. One is for tourism information; the other gives necessary information to an individual or company who might be considering locating in Lexington. We also send brochures and printed materials to the seven Tourist Centers throughout the State, as well as, Auto Club offices, motels and tourist agencies around the country. For four years, we have had a Uni-sign located on Interstate 70 to advertise our community to motorists traveling through the area. We also advertise, from time to time, in outside publications on our community's activities. We arrange tours through the Chamber of Commerce office and we are currently working with the Department of Economic Development to hold a regional meeting in Lexington this September. There are many programs and activities in our community that are co-operative efforts. Every two years, Lexington offers a two-day historic Old Homes Tour, which brings approximately 10,000 visitors to our community. Also, the Battle of Lexington State Park sponsors a Civil War battle re-enactment every three years. The next re-enactment is scheduled for September 19, 1991. This is a three-day event which brings in over 5,000 visitors from all across the country. This doesn't include the large number of re-enactors that also travel here to participate in the battle. Every fall, there is a three-day River Festival, which also draws many people to our community. Lexington, as I mentioned earlier, is also the home of Wentworth Military Academy. This military school, dating back to 1880, has students attending from all over the world.

Lexington is an All-Missouri Certified City, achieving a "Five-Star" status through the Missouri Community Betterment Program. We are members of the Missouri Travel Council, the Missouri Chamber of Commerce, and the Lafayette County Economical Development Authority. This committee tries to promote all of Lafayette County. Our Lexington Industrial Development Corporation is very active in promoting economical development in Lexington. We all realize it takes a united effort, if we are to succeed. We have a very active Historical Society, which recently raised over $90,000.00 to restore an 1830's log house, the only known wooden structure still standing from Lexington's founding days, with the Santa Fe Trail passing both it's original location and its present site.

We are very pleased that the State of Missouri has decided to put additional funds in the Battle of Lexington State Park, to construct a new visitors tourism center and a summer kitchen at the Anderson House.

We also have five licensed antique shops which are frequent stops by tourists and a historical museum in Lexington. We are located in the heart of Missouri's apple orchard country within an hour's drive of Kansas City and not far from the recreational area of the Ozarks. Approximately 60% of all Missouri tourists come from the metropolitan areas. As I stated at the beginning of my testimony, there is something very unique about tourism in rural America.

One of the main problems that small, rural communities face today is the competition of the nearby metropolitan areas. We do not have the manpower or the resources to call upon as metropolitan areas do. There must be a more focused attention given to the small, rural communities. Simply put, we need to be put on an equal basis as our larger counterparts. Our wagon wheels are just as rusty, and squeak just as much as theirs—however, they apparently don't squeak as loud!!

In closing, I have just one final thought to present. Lexington, as well as many other rural communities, is well worth a few days of anyone's time. Visitors can wander

through museums, tour the old homes, dine and shop, or just walk around and enjoy the beautiful scenery and relaxed atmosphere. It is our sincerest hope and desire that our testimonies to you today will not go unheard and that many future generations will also be able to enjoy what the rural communities have to offer. Through your dedicated commitments to develop and increase the tourism trade in rural America, this will become a reality.

A CRY FOR FREEDOM FOR THE CYPRIOTS

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mr. WALGREN. Mr. Speaker, I would like to express my support today for a unified Cyprus, a nation that has endured a long battle against the illegal Turkish occupation of close to 40 percent of the island. This occupation has resulted in the creation of the "Green Line," a barrier that divides the Turkish and Greek people of that nation.

Cyprus first received its independence from Great Britain in 1960. At this time approximately 18 percent of the population was Turkish and the remaining 72 percent of the population was Greek. The Treaty of Association and Guarantee established a system that sought to ensure the rights of both peoples through a power-sharing system. But in 1974 the island was invaded by Turkish troops that were fearful that the Greek majority was seeking unification with Greece.

The sweeping changes in Eastern Europe can only serve as an example to the world. It is possible to overcome seemingly unsurmountable problems through the courage of a nation dedicated to freedom. Like the people of the United States and the rest of the free world, Cypriots deserve the chance to move freely throughout their country. The Berlin Wall has fallen and it is now time for the Green Line dividing north and south Cyprus to be abolished.

As a member of NATO, the United States must encourage a resolution of this dispute that divides Greece and Turkey, our NATO allies. I commend the people of Cyprus for their dedication to a united nation through a peaceful settlement and look forward to a similar commitment from the Turkish Government. Freedom for Cypriots is in reach.

FOR A FREE NEA

HON. MAJOR R. OWENS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mr. OWENS of New York. Mr. Speaker, later this week the House is expected to consider the reauthorization of the National Endowment for the Arts and with it, a number of proposals to censor the content of art financed by the NEA. The prospect of censorship has elicited an outpouring of outrage and opposition from the arts community and others who value artistic freedom. The intensity of opposition has been so strong, in fact, that some of our colleagues have begun complaining privately that supporters of the NEA are overreacting. But most clearly they are not. The response of the arts community and its allies has been exactly proportionate to the threat posed by the would-be censors among us. They understand that the creative process demands full and unfettered freedom; censorship, whether imposed from within or without, saps art of its integrity and meaning.

The very mission of the artist, as the great African-American writer James Baldwin once put it, is to be "an incorrigible disturber of the peace." This does not mean that all art must necessarily offend or shock us in order to be considered successful or worthwhile. But it does mean that, in realizing his or her creative vision, the artist must be free to ignore and trample over traditions, boundaries, and frontiers to which the rest of us adhere. As Baldwin eloquently explained:

The artist is distinguished from all other responsible actors in society—the politicians, legislators, educators, and scientists—by the fact that he is his own test tube, his own laboratory, working according to very rigorous rules, however unstated these may be, and cannot allow any consideration to supersede his responsibility to reveal all that he can possibly discover concerning the mystery of the human being. Society must accept some things as real; but he must always know that visible reality hides a deeper one, and that all our action and achievement rest ont things unseen. A society must assume that it is stable, but the artist must know, and he must let us know, that there is nothing stable under heaven. One cannot possibly build a school, teach a child, or drive a car without taking some things for granted. The artist cannot and must not take anything for granted, but must drive to the heart of every answer and expose the question the answer hides.

Many respected organizations and individuals outside of the arts community have come forward to speak out against the proposed restrictions on the creative freedom of NEA-funded artists; they have recognized that this is an issue not just for artists, but for all who value freedom of expression in this country. Prominent among these groups are the American Library Association and the New York State Board of Regents, both of which recently passed resolutions urging the Congress to resist calls to censor the NEA. I want to bring the texts of these resolutions to the attention of my colleagues in the hope that their appeals for a free NEA will be heeded when the House considers this issue later this week:

RESOLUTION ON THE REAUTHORIZATION AND REAPPROPRIATION OF THE NATIONAL ENDOWMENT FOR THE ARTS AND THE NATIONAL ENDOWMENT FOR THE HUMANITIES

Whereas, the American Library Association policy against government intimidation (53.4) states, "the American Library Association opposes any use of government prerogatives which leads to the intimidation of the individual or the citizenry from the exercise of free expression"; and

Whereas, current ALA Federal Legislative Policy encourages support of the National Endowment for the Arts (NEA) and the National Endowment for the Humanities (NEH); and

Whereas, there is a strong indication that the continued politicization of the Endowments' reauthorization and reappropriation process has caused a sense of uncertainty amongst grant applicants and recipients and even polarization between supporters and detractors of the Endowments; and

Whereas, the continuance of Federal grants unencumbered by political interference is of great and crucial significance to the Library community; and

Whereas, there is now an attempt to encourage the Congress to change the ratio of NEA grants to the States Arts Agencies which could seriously cripple the NEA's peer-grant process; now, therefore, be it

Resolved, that the American Library Association strongly urges the members of the United States Congress to resist any limitations or reductions of the appropriations for the NEA, the NEH or the Institute of Museum Services on the basis of partisan or doctrinal disapproval of projects funded by the Endowments; and, be it further

Resolved, that ALA urges that the Endowments enabling legislation, the National Foundation on the Arts and the Humanities Act, be reauthorized for a full five years without restrictions and without changes in the ratio of funds turned over to the States Arts Agencies; and, be it further

Resolved, that ALA urges the Chairpersons of the NEA and of the NEH and all of the grants officers of both Endowments to resist strongly any partisan or doctrinal influence over the grants-making process; and, be it further

Resolved, that copies of this resolution be forwarded to the Congressional Arts Caucus, Congressional Authorization and Appropriations Committees, the Office of Management and Budget, the Chairpersons of NEA and NEH, and any other appropriate bodies.

RESOLUTION OF THE NEW YORK STATE BOARD OF REGENTS REGARDING THE NATIONAL ENDOWMENT FOR THE ARTS

Resolved, That the Board of Regents of the University of the State of New York and the State Education Department support the five-year reauthorization of the National Endowment for the Arts (NEA) in its current form.

Thriving arts activity in New York enriches the educational experience of children and the lifelong learning of residents and visitors alike. Moreover, New York's unparalleled artistic excellence is a national resource shared in many ways with the entire nation and the world.

For twenty-five years, the NEA has granted public funds on the basis of a responsible peer review process to sustain and to encourage the nation's best artistic work and to make it broadly available to the public. NEA grants this past year provided $40 million to over 1100 grantees in New York to strengthen further the quality of the arts in New York and their national impact.

Although the peer review process is not infallible, even NEA's critics question only .02% (two one-hundredths of one percent) of the 85,000 grants that have been awarded. Vigilance to assure the accountability of the peer review process to the highest standards of quality should be required of the NEA National Council, but the process should not be changed.

Current attempts to weaken or circumscribe NEA activity, fueled by letter-writing campaigns of special interest groups, have already had a chilling effect on the arts. Any imposition of perceived or real limitations on the creativity, diversity and free-

dom of expression of publicly supported arts will produce far more harm than any isolated error of judgment could cause.

THE ABC'S OF BILINGUAL EDUCATION

HON. BILL EMERSON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mr. EMERSON. Mr. Speaker, misconceptions about the purposes and intent of the Language of Government Act, H.R. 4424, continue to surprise me. I understand that the opponents of this measure have stated that bilingual education would no longer be allowed if we passed this bill. This brash statement is absolutely untrue. I strongly support bilingual education, and I think it's an essential tool in the teaching of English to non-English speaking schoolchildren across America. My criticism of the bilingual programs we have today is that they don't work. Children finish years of bilingual training without a basic, fundamental knowledge of English. And when we allow this to happen, we're shortchanging our children.

If we want to see how well our bilingual education programs are working, we should ask the students. My good friend, Congresswoman NANCY JOHNSON, was kind enough to share with me the following two columns that appeared in the Hartford Courant last month. Here is a telling critique of bilingual education from the students' point of view. Next year, the Bilingual Education Act will be reauthorized. I recommend that each of my colleagues take the time to consider who benefits—and who doesn't—from our existing bilingual programs before the vote is cast.

STUDENTS OFFER CRITICAL VIEW OF BILINGUAL EFFORT

(By Tom Condon)

There's another precinct to be heard from on the bilingual education question—the kids. I recently wrote two columns criticizing the city's bilingual program. I said the program doesn't work for many youngsters because it doesn't teach them English, and hence inhibits their chances for a good job.

Michael May, an English teacher at Bulkeley High School, asked his freshmen and sophomores to write short essays on whether or not they thought I was right. Here are some of the responses. (He asked that I just use the students' first names.)

Sonia, a sophomore: "Yes, I think the system cheats the kids." She said most bilingual teachers speak only their students' native language, not English. Then the students go home, where the native language is spoken, so they never hear any English. "The student's only hope is to have a friend who speaks English," she wrote.

"When I was in bilingual class, the teacher never spoke to me in English. The only reason I learned was that my mother, who had come to Hartford at an early age, sometimes spoke to me in English, and I had a few friends who spoke English," she wrote. "I think if teachers are in the bilingual program they should teach the two languages so when students get to higher grades they won't have a hard time dealing with English."

Criticism of bilingual teachers was a recurrent theme.

Ramon, a sophomore, said that when he came to Hartford he didn't know he was in a bilingual class. "I had a teacher who only spoke Spanish. I thought it was a Spanish class. The teacher never spoke English. My mother found out and got me out into a class where the teacher could speak English."

I sensed from certain essays that there is some peer pressure not to learn English. "No matter if people make fun of you, don't give up. No matter what, learn English," advised Madelyn, also a sophomore. "Students who don't practice English are not going to be able to communicate with other people or teachers. When they need a job they won't."

As the system now stands, students are supposed to be brought up to a grade 3.5 level in Spanish before being switched to English. Some students take years and years to reach that level in Spanish. Abner, a freshman, suggested starting kids earlier in English. He said he was in a bilingual kindergarten but then was placed in an English first grade and learned English rapidly.

"If most of the Hispanic kids are given lots of English, they will learn it very quickly," he said.

Curiously, many students blame the non-English-speaking students and their parents for their not learning English. "The Spanish students have to get their acts together," one student wrote. "If a boy is 15 and can't speak English, do you ever think his mother or father is to blame?" another wrote.

Here's the kicker. All these kids are Hispanic themselves. They know they're going to need English to get further in school or get a good job. It's a shame they aren't serving on the school board.

They sense that some bilingual teachers aren't doing the job. I think they're right. Bilingual teachers are exempt from having to take CONNCEPT, the basic skills test in reading, writing and mathematics that other teachers must pass as part of the certification process. Are the bilingual teachers exempt because many couldn't pass the test? Is this fair to the kids?

The teachers and administrators who spoke to me in my first two columns have been called in to speak with the school administration. I trust this is for a constructive discussion on how to improve the program. It better be.

CRITICS CONSIDER BILINGUAL EFFORT A SLIP OF TONGUE

(By Tom Condon)

In the 1970s, Lorene Lugo, a reading specialist in the Hartford school system, was a big supporter of the bilingual education program. Over the years, she became disillusioned.

"It became almost a monolingual Spanish program; the English part didn't develop at the same pace," she said. "Because of that, many students stayed in it forever."

Two years ago, as reading consultant at the Burns School, she'd had it. There were too many children born in Hartford and in the sixth grade who couldn't read or write English.

She gathered teachers and said, in effect, "Let's teach more English sooner." Many agreed to try.

Nydia Rivera teaches a second-grade bilingual class at the M.D. Fox School. She taught mostly in Spanish, per city guidelines, but believed her pupils could start English.

So she tested them last year, then increased her English teaching to about half her lessons. By the end of the year, 19 of her 26 pupils were reading well enough to go into a transitional class, the last phase of the bilingual process.

For the 1988-89 school year, only five of 208 children in the bilingual programs in the McDonough School were "mainstreamed" into regular English classes. This year, 14 made the jump. "The kids need more time for English instruction," said Vice Principal Mary Alice McNaboe, and she said they'll get it—next year.

As these efforts indicate, the city's bilingual education program is in dire need of reevaluation.

The theory is to teach children in their native language—most often Spanish in the city—while they learn English, then switch to English when appropriate, said Adnelly Marichal, the program's director.

A recent state study found the kids spend an average of about four years in the program, but some spend much longer. Marichal doesn't see a problem with that, saying children learn languages at different speeds. She said if children learn subjects in Spanish, it shouldn't matter when they transfer to classes in English.

Some of the time it works. But for many, perhaps thousands, it doesn't, critics say. Youngsters aren't compelled to learn English, so some don't. Lugo said some children find it difficult, and sometimes stigmatizing, to be learning the basics of English in the middle grades or later.

Program critics also cite poor English texts, some bilingual teachers who are weak in English and kids who keep themselves in the program to go to high school with friends.

Marichal said many impoverished students often begin with weak language skills, and it is best to teach them to read Spanish first.

Lugo asks, "Why not start them in English?" She said they'll learn Spanish at home. "Putting a child born in Hartford in a Spanish kindergarten is ridiculous," said Lugo, now at the Lewis Fox Middle School.

Lugo said bilingual education should start earlier, be more intensive and have set time limits of two to four years. She is appalled when children are in the program longer than that, as is Terry Trask, principal of the Milner School.

"There's no excuse for it. It's that simple. The research is clear as a bell—they should be inundated with English, and they can learn it. We've known this for 20 years," Trask said.

Program defenders say more English might mean the loss of culture. "Keeping them unemployed and on welfare is not the culture," Rivera said. "I'm Puerto Rican and we keep the culture at home."

Rivera knows something is wrong. Her husband, Officer Eddie Rivera, as a recruiter for the Hartford Police Department. He's met scores of otherwise excellent applicants for the Department whose English was so bad they couldn't fill out the job applications.

RESOLUTION PASSED BY THE BOARD OF SUPERVISORS, COUNTY OF SAN DIEGO

HON. J. DENNIS HASTERT

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mr. HASTERT. Mr. Speaker, I was very pleased to learn that the San Diego County Board of Supervisors recently passed a resolution supporting my legislation to repeal the Social Security earnings test. I am extremely grateful of the efforts of Ms. Rosa Wilms who was instrumental in the board's decision to adopt this resolution.

The county of San Diego is another in the long list of earnings test repeal supporters. The chamber of commerce, the National Federation of Independent Businesses, the Seniors Coalition, the Seniors Cooperative Alert Network [SCAN], Sears Corp., Chevron Corp., and many others repeatedly call for the elimination of the penalty imposed on Social Security beneficiaries who work to supplement their income.

H.R. 2460, the Older Americans' Freedom To Work Act, has well over a majority of the House, 247 Members, as cosponsors. Yet, this legislation is being prevented from complete consideration by the whole House by the Ways and Means Committee.

The time has long past when this legislation should have been considered. Let's not further delay consideration of H.R. 2460. America and its seniors cannot afford to wait any longer.

RESOLUTION OF THE BOARD OF SUPERVISORS OF THE COUNTY OF SAN DIEGO RE: LEGISLATION TO ELIMINATE THE SOCIAL SECURITY EARNINGS PENALTIES FOR INDIVIDUALS WHO HAVE REACHED RETIREMENT AGE

Whereas, retirees of age 70 or greater are permitted by law to earn as much as possible without any reduction in their Social Security earnings; and

Whereas, persons between the ages of 65 and 69 have their Social Security benefits reduced one dollar for every three earned above certain thresholds; and

Whereas, continued participation in the workforce by skilled, experienced persons is becoming more and more critical to the standard of living in the United States; and

Whereas, H.R. 2460 would amend the Social Security Act to remove the existing penalties on persons between the ages of 65 and 69; and

Whereas, recent studies have shown that removal of the penalties would cause a reduction in the budget deficit: Now therefore be it

Resolved, by the Board of Supervisors of the County of San Diego, State of California, that it supports legislation which would amend the Social Security Act to remove the penalties on Social Security benefits of persons aged 62 through 69 whose earnings are above the thresholds.

A PROPOSAL FOR UNINSURED CHILDREN FROM THE AMERICAN ACADEMY OF PEDIATRICS

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mr. WYDEN. Mr. Speaker, the American Academy of Pediatrics has developed a proposal to provide health care access to the 12 million American children and 14 million women of childbearing age who currently lack health insurance. Millions more are underinsured; they lack adequate insurance coverage for necessary medical services and for even the most basic preventive care. Still others are uninsurable because of preexisting chronic or recurring conditions.

A majority of uninsured children do not come from stereotypical poor families. More than half of all uninsured children live in families with incomes above the poverty level. Three-fourths are white, and more than half live in two-parent families. Approximately 2 million uninsured children live in families in which one or both parents have employer-purchased health insurance.

Uninsured children are often unable to afford medical attention at the onset of an illness, and they are more likely to be in poor health. They also often fail to receive preventive care. The health insurance system in this country commonly provides reimbursement for expensive acute care, such as inpatient care and surgery, while limiting reimbursement for less costly preventive services. Preventive care, early treatment of acute illnesses, and other outpatient services can often eliminate or minimize the need for more costly procedures and hospital care.

Lack of preventive care can lead to dire consequences. Uninsured children are less likely to be immunized than those with insurance. One in three poor children is not immunized at age 2 against rubella, measles, and mumps. Coincident with declining immunization rates, epidemics of measles are occurring in many cities throughout our country with deaths of 40 children reported this year. The number of reported cases of mumps is also rising. Early treatment can influence long-term outcome and maximize a child's potential.

In addition to the alarming number of uninsured children, over 14 million women of childbearing age do not have insurance for prenatal care, maternity care, or both. One out of every four pregnant women receives no prenatal care during her first trimester. As a result, undetected problems may unnecessarily complicate pregnancies. Lack of counseling about proper nutrition and about the use of alcohol, tobacco, and certain drugs can result in low-birthweight, congenital anomalies, and sick newborns and a high rate of infant mortality. In fact, our mortality rate places us 22d among the nations of this world.

The proposal developed by the American Academy of Pediatrics would eliminate financial barriers to care. It would expand the delivery of prenatal, preventive, acute, and chronic care to all children and pregnant women by coordinating efforts of the public and private sectors.

While the Academy's proposal is not the perfect solution to our Nation's health care problems, it represents a first step which is worthy of further consideration by Congress. A summary of the proposal is as follows:

SUMMARY

Access to quality care will be met by creating, through federal legislation, a mechanism to:

1. Build on and improve the existing employer-based system that provides health insurance to employees and their dependents.
2. Develop, for children and pregnant women who are without employer-based insurance, a parallel system that provides private health insurance through a state-administered insurance fund (SAIF).
3. Rechannel into the SAIF federal and state monies for children and pregnant women currently served by the Medicaid program.
4. Allow maximum state flexibility for program administration within federal guidelines.
5. Rely on existing health care delivery models that are simple and easy to use for both the provider and patient.

All children and pregnant women will have access to private health insurance through an employer financed plan or a SAIF.

A standard benefit package of comprehensive care is arranged into three categories.

(1) Preventive benefits: Including preventive care visits at clearly defined intervals, prenatal and delivery care, care of newborns, and child abuse assessment. Regardless of income level or insurance system, no co-payments or deductibles will be applied.

(2) Primary/major medical benefits: Including care for acute and chronic illness, hospital care, subspecialty consultations, emergency room care, drugs, and laboratory tests. Based upon income, there will be a maximum deductible of $200 and a maximum co-payment of 20% of the total charges for services in this category.

(3) Extended major medical benefits: Including mental health, substance abuse, and treatment of developmental and learning disabilities. There will be case management for some benefits in this category. As with the major medical benefits, copayments and deductibles apply. There will also be caps for benefits in this category. Mechanisms such as prior approval, plan of care, preferred providers, and dollar limits may be applied to extended major medical benefits.

These benefits will be equally available through employer-based insurance and the SAIF.

Employers who offer insurance to their employees may choose to provide the mandated benefits for children and pregnant women. Employers who choose not to offer insurance to children and pregnant women or who offer less than the mandated benefits will pay a payroll tax of 3.17%. Employees enrolled in the employer-based system will be responsible—as they usually are—for premium payments, deductibles and co-payments.

All children and pregnant women who do not receive insurance through an employer will have access to private health insurance through the SAIF.

The SAIF will be funded by a combination of revenue sources including:

A 3.17% employer payroll tax.

Individual premium payments by families enrolled in the SAIF.

Federal and state dollars allocated for the children's and pregnant women's portion of Medicaid.

EMPLOYEE STOCK OPTIONS

HON. BARBARA B. KENNELLY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mrs. KENNELLY. Mr. Speaker, I am pleased to be an original cosponsor of legislation introduced by my colleague, Representative ROD CHANDLER, to restructure the existing Federal income tax incentives for employee stock options.

Employee stock options have always been important and this is particularly true today. Stock option programs, if properly structured, can function as an important part of a renewed national policy to encourage savings and investment generally, and employee stock ownership in particular. Congress has long recognized the importance of stock option programs and has accordingly sought to encourage such programs with tax incentives. Unfortunately, however, our existing tax incentives for stock options no longer contribute to these savings and employee stock ownership national objectives in the best possible way and they therefore need to be revised in a manner that is consistent with our current budgetary situation.

If tax incentives for employee stock option programs are to contribute effectively to the attainment of the national objectives to which I have referred, they must encourage employees to exercise the options they receive at an early date and then to hold the stock they acquire as a long-term investment. Our current tax incentives often encourage employees who receive stock options to do precisely the opposite. This is because the exercise of a stock option is generally a taxable event requiring the employee to pay a Federal income tax on the amount by which the value of the stock purchased exceeds the option price paid for the stock. Many employees who exercise options must immediately sell a portion of the stock they purchase in order to pay the tax. This "tax at exercise" rule does not produce much revenue because the employer gets a tax deduction equal to the income taxed to the employee, but it can encourage many employees to defer exercising their options until they have need for cash and then immediately sell all the stock they purchase, using a portion of the sales proceeds to pay tax and the balance to meet their individual cash need.

This "tax at exercise" rule does not apply to so-called incentive stock options, but the tax incentives for these options are no longer adequate. They are subject to a tax at exercise rule for purposes of the 21-percent alternative minimum tax, they are subject to a dollar limitation and employers do not receive any tax deduction for granting such options. Moreover, with the repeal of the preferential tax rate for capital gains in 1986, incentive stock options lost much of the attractiveness they might otherwise have.

The legislation I am cosponsoring today seeks to encourage employees to exercise their options early and then to hold the stock they acquire as a long-term investment. Under our legislation, so-called opportunity stock options would not be subject to any tax at exercise rule. The tax on the gain realized at exercise generally would be deferred and taxed as ordinary income when the employee disposed of the stock. The benefit of this tax deferral would in effect be denied in most cases where the employee did not hold the stock for at least 2 years. Finally, while the employer would be allowed a tax deduction with respect to opportunity stock options, this deduction would be deferred until the employee paid his or her tax upon disposition of the stock. Allowing an employer deduction is correct as a matter of tax policy as is deferring that deduction and deferral of the deduction also makes enactment of the bill consistent with our current budgetary situation.

Mr. Speaker, restructuring the stock option tax incentives in the manner contemplated by our legislation will both serve the important national objectives to which I referred earlier and it will promote a greater degree of stability in the ownership of our corporations and a greater alignment of the interests of employees and shareholders. These additional benefits are believed by many—including myself—to be critical if we are to compete in the emerging global economy in the 1990's and beyond.

Our legislation also merits support because it limits the tax benefits of "opportunity stock option" status to those stock option programs that both meet the principal requirements that Congress previously imposed on incentive stock options and a new requirement that the options be granted to a broad group of managerial-type employees and not just to a handful of the most senior executives. This distribution requirement requires that at least 40 percent in value of the options be granted to employees who are not senior managment employees.

This distribution rule is intended to promote the effectiveness of opportunity stock option programs by assuring that options are granted to those management employees whose positions within their corporate employers are such that they have the best "hands on" opportunities actually to put in place and carry out those policies that will promote the long-term productivity and efficiency that the global economy now demands as the price of survival of our Nation's employers. Moreover, the 40 percent ratio contemplated by the distribution requirement is a more reasonable and conceptually sound way to limit the benefits received by the very senior executives than is the somewhat arbitrary dollar limit now applied to incentive stock options.

Mr. Speaker, constructive legislative initiatives like this are critical if we are as serious as we need to be about promoting increased savings and investment and the ability of our employers to compete in the world marketplace. Hopefully, we can enact our legislation in the near future so that this important program can begin to operate.

INCENTIVE STOCK OPTIONS

HON. ROD CHANDLER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mr. CHANDLER. Mr. Speaker, I am today introducing legislation to revitalize the existing Federal income tax incentives for employee stock options. This legislation, which is intended to be substantially revenue neutral, has three specific objectives. First, to encourage corporations to award stock options to a broad class of their managerial employees—and not just to a few top executives. Second, to stimulate employees to exercise their stock options promptly and then to hold the stock they acquire as a long-term investment. Third, to assure that the incentives to accomplish these two economic objectives are structured so that a stock option transaction is taxed in accordance with its dual nature as a partially compensatory and a partially investment-oriented transaction.

Congress has for many years affirmatively sought to encourage stock options. Most recently, in adopting the present incentive stock option rules in 1981, Congress recognized that stock options are an important incentive device for attracting and retaining key personnel, and that the proprietary interest resulting from the exercise of stock options provides employees with an incentive to improve the financial performance of their employers. Stock options have an even more important role today. If we are to compete effectively in a global market in the 1990's and beyond, we must have a greater degree of stability in the ownership of our corporations, we must have managers at all levels whose decisions have a long-term orientation, and we must have managers whose interests are reasonably well aligned with the shareholders they serve. Properly structured stock option programs can make important contributions to these objectives.

Unfortunately, our current Federal income tax laws do not encourage, and in some cases may actually discourage, the very kinds of stock option programs that can contribute positively to the objectives I have outlined. Under present law, an employee who exercises a stock option must typically pay a Federal tax on the economic—but phantom—income he or she is deemed to have realized when the value of the stock exceeds the price the employee pays for it. This tax at exercise rule requires many employees to sell a substantial portion of the stock just to pay the tax and encourages some to defer exercising their options until they have a need or use for the cash they can obtain by selling all of the stock. In short, the general tax at exercise rule discourages the early exercise of stock options and the long-term holding of the stock.

The tax at exercise rule does not apply to incentive stock options, but incentive stock options have become equally unattractive for other reasons. With the elimination of the preferential tax rate for capital gains, incentive stock options no longer offer a significant advantage over other stock options. However, even if the capital gains preference were to

be restored, incentive stock options would not be effective because they are subject to an unrealistically low ceiling on options that can be exercised in any one year. Moreover, incentive stock options are in fact subject to a tax at exercise rule for purposes of the 21-percent alternative minimum tax. Finally, even though incentive stock options—like all stock options—have a compensatory element, employers are not allowed any tax deduction for incentive stock options. Thus, some employers prefer to grant other options that are subject to the full tax at exercise rule.

The legislation I am introducing today would create a new class of opportunity stock options that would remedy these defects in present law. However, opportunity stock option treatment would generally only be available for option programs that meet both the current law qualification rules for incentive stock options and a new requirement that at least 40 percent of the options be granted to employees who are not senior management employees. This new distribution requirement—which has no counterpart in the present law of stock options—is a critical component of the proposal because it encourages the granting of stock options to the management personnel who consistently have the best hands-on opportunities to implement changes that will increase long-term corporate productivity and net worth. Furthermore, using the ratio of options granted to senior management and management employees is a much more principled way to limit the benefits received by the most senior managers than is the artificial dollar limitation now embodied in the incentive stock option rules.

The tax consequences of an opportunity stock option can be described quite simply. The excess of the fair market value of the stock acquired upon the exercise of the option over the option price paid for the stock—commonly referred to as the "spread"—would always be subject to the regular income tax—and not to the minimum tax—as ordinary income and the employer would receive a tax deduction equal to the spread. To promote both the early exercise of opportunity stock options and the long-term holding of the underlying stock, the employee tax—and the employer deduction—would be deferred until the employee disposed of the stock. Any additional gain on the disposition would generally be taxable as income from the sale of a capital asset, just like sales from other investment assets, which would be taxed as ordinary income or capital gain in accordance with the then prevailing law. However, if the employee disposed of the stock within 2 years from the date the option was exercised, the employee would also generally have to pay the Government an interest charge so that he or she would get no economic benefit from the deferral of the tax on the spread.

This is very important legislation, Mr. Speaker. If enacted, it would promote the crucial goals of employee ownership and increased corporate productivity and efficiency. As I stated before, if we are serious about competing effectively in the global market, legislative measures such as this need to be enacted.

HOSPITAL ACCREDITATION

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mr. STARK. Mr. Speaker, recently the Subcommittee on Health held a hearing on hospital accreditation and compliance with Medicare's conditions of participation.

The focus of our hearing was a report from the General Accounting Office assessing the effectiveness of the Health Care Financing Administration's process to validate the results of accreditation decisions of the Joint Commission on Accreditation of Healthcare Organizations [JCAHO].

Validating the JCAHO process is critical, given that HCFA, through a process termed "deemed status," relies on JCAHO to assure that most hospitals are providing quality health services to Medicare beneficiaries. If a hospital is accredited by JCAHO, it is deemed to meet the Medicare conditions of participation.

The results of the GAO report were unsettling, to say the least.

The major conclusion of GAO's report is that given the total difference in the criteria against which HCFA surveys and those against which JCAHO surveys, we can't really tell much about whether hospitals are meeting the Medicare conditions of participation.

Prior to the hearing the members of the subcommittee were briefed by Dr. Dennis O'Leary, head of JCAHO, on the specific problems at specific hospitals which the JCAHO has identified in the last year. The briefing raised a number of concerns about the quality of hospital services.

We found that some hospitals have no system to monitor and evaluate the medical care being provided to Medicare patients. Therefore, these hospitals have no way to assure quality of care, whatsoever.

A number of hospitals do not review surgical cases, as they are expected and required to do. This means that these hospitals have no way to protect beneficiaries against unnecessary surgery and patients may be subjected to the risks of surgery without cause.

We have identified hospitals without infection control systems. These hospitals do not check the adequacy of their sterilization procedures; they may be using surgical instruments on patients that are dirty or contaminated by bacteria. Without infection control, no one knows.

Certain hospitals do not conduct blood usage reviews. Blood usage reviews protect patients against receiving incompatible or tainted blood. A patient receiving incompatible blood dies. A patient receiving tainted blood risks infection with hepatitis, AIDS, or other viruses or bacteria.

We also found hospitals which cannot document that they are not dumping poor patients from their emergency rooms nor assure that patients are not held in the emergency room prior to receiving life-saving treatment.

The biggest problem of all which we found, a problem verified by the General Accounting Office, is that an unconscionable period of time goes by between identification of a problem and follow up by JCAHO to assure that the problem is corrected. A hospital in my own district has problems which were originally reported in 1987; the hospital did not lose its accreditation until this year, and it is still providing services to Medicare beneficiaries.

Due to strong interest in the subject of hospital quality assurance, I am including at the conclusion of this statement the list of hospitals which were found by the JCAHO not to deserve full accreditation last year. I believe that Members will find this list of interest.

Given the findings of this hearing and the expected results of an ongoing investigation by the GAO, I intend to work with Dr. O'Leary and with HCFA to make sure that our hospitals are providing the best care possible. In particular, I want to make sure that those which don't measure up cannot continue to participate in the Medicare and Medicaid Programs.

HOSPITAL ACCREDITATION

HOSPITAL AND STATUS

1. North Star Hospital, Anchorage, AK 000037091. Conditional.
2. Randolph County Hospital, Roanoke, AL 006530802. Full Survey, tentatively not accredited [TNA].

JUSTICE FOR THE PALESTINIANS

HON. JON L. KYL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mr. KYL. Mr. Speaker, the foiled terrorist attack by the PLO against a beach near Tel Aviv, which led to the suspension of the United States-PLO dialog, served to remind us all of the enduring and intractable Middle East conflict, of which the Palestinian question is a part, and, to date, the inability to reach a lasting resolution to this conflict.

There is only one reason why a solution has remained elusive; namely, Israel's Arab neighbors, less Egypt, refuse to recognize Israel's right to exist.

In trying to understand the conflict in the Middle East, I found the following article by Max Singer very informative. Mr. Singer puts the Middle East conflict, and what is needed to resolve the conflict, in perspective.

The article follows:

JUSTICE FOR THE PALESTINIANS

(By Max Singer)

When Egypt signed a peace treaty with Israel a decade ago, she was thrown out of the Arab League (although the League's headquarters were in Cairo). But Egypt has now been accepted back into the Arab fold, and President Hosni Mubarak has just launched a new "peace" proposal. This "ten-point plan," responding to the Israeli plan to hold West Bank elections, proposes *inter alia* that all Palestinians, including those in East Jerusalem, be allowed to vote and run for office, that Israel allow international supervision of the process, and that the army withdraw from the "area of polling places" on election day.

There is a certain check in Arab countries (which don't enjoy free elections) telling Israel how to run one, particularly since Israel has already run fair elections in the territories it administers. Nonetheless, Egypt's "plan" has achieved some success. Yasir Arafat has endorsed it, and Israeli cabinet ministers are embarrassingly divided in their reactions to it. (The PLO Executive Council has rejected it, but divisions in the PLO are generally resolved by the world's devoting exclusive attention to Arafat's reaction.) If this sounds familiar, perhaps it is because this latest Egyptian initiative is but one example of a general Arab strategy in the Arab-Israeli dispute. It is to pretend that Israel's war is with the Palestinians and to treat the Arab states not as participants but as third parties, favorable to the Palestinians, perhaps, but anxious to foster a reasonable settlement.

There is a common perception that Israel has been treating the Palestinians unjustly—that she has responded to the Palestinians' drive for peace with a narrow-minded concern for security and a selfish desire to maximize her territory. It is true that the Palestinians are not being treated justly. And it is also true that Israel has a duty to act with justice toward them. But it is not Israel that is responsible for the injustice of the Palestinian situation. Israel and the Palestinians are both victims of the Arab states' enmity toward Israel. They are each simultaneously victim and oppressor. The Palestinians are victims of the Arab states, but as Arabs they also participate in oppressing Israel by denying her peace; Israel is a victim of Arab enmity and threat, and, as a result, has been forced to act as a temporary oppressor of the Palestinians.

The original reason why the Palestinians do not have their own state is that in 1948, when the UN ordered that such a state be created, the Arab armies prevented it. Most of the territory the new Palestinian state was supposed to get was occupied by Jordan. The reason why Arabs from Israel are still in refugee camps forty years after World War II is that the Arab states decided their suffering could be used as a political lever against Israel.

The key point is that the Palestinians, in addition to being their own nation, are also part of the Arab nation. To appreciate how central the Palestinians' Arab connection is to the question of justice, compare what Israel's two relationships with her neighbors would be if they could be separated:

Israel and the Palestinians: Israel is strong, the Palestinians are weak; Israel holds all the disputed territory; Palestinians never started a war against Israel and say they want peace (at least some say so). Palestinians present no real danger to Israel.

Israel and the Arabs: The Arab states have armies large enough to threaten Israel's existence, and they have five hundred times as much land and thirty times as many people as Israel. The Arab states have attacked Israel and (except for Egypt) refused to discuss peace since Israel came into existence.

The nature of Israel's obligation to the Palestinians, therefore, depends upon whether Israel has an obligation to ignore their Arab connection. So we have to ask how significant that link really is.

First of all, the Palestinians get their power from the Arab states. While it is the struggle of Palestinian people in the territories that makes news and appears to be the cause of the pressure on Israel to negotiate with the PLO, that appearance is an illusion. The Palestinians' struggle would have no political significance if it were not for the diplomatic, political, and financial power of the Arab states and their Communist and other allies.

Secondly, while many Palestinians are angry at the way the Arab states have abused them, there has been no movement among the Palestinians to separate themselves from the Arab war against Israel's existence. Nor have the Palestinians called on the Arab world to make peace with Israel if Israel would only deal fairly with them. For Israel to make peace with the Palestinians while the Arab war against Israel continues would be like making peace with a hand while the rest of the body is trying to kill you.

Israel must respect the humanity and the interests of Palestinians, and act as justly toward them as it can, but this does not mean that Israel is obligated to produce justice for them. That is beyond Israel's power. Israel can try to work out practical accommodations that would reduce the pain to both Palestinians and Israelis while the Arab war against Israel continues.

Israel must also pursue lasting peace with the Arab states, both as a matter of justice to the Palestinians, and because Israel's basic long-term security requires it—at least by the time her neighbors become modern enough to produce and operate high-quality armored divisions in mobile combat. (This is a rejection of the view that Israel has no choice but to be at war for the indefinite future, and therefore need not and cannot

have a policy of seeking peace.) But if Israel were tempted to do so by opening negotiations with the Palestinians for a new Palestinian state, she would be moving away from peace. The key to moving toward peace is to respond to the causes of the real war, which is why the Egyptian ten points are not helpful.

The original-cause was the Arab states' refusal to have a Jewish state in the Middle East. In the forty years since Israel's creation, the Arab states have learned that they cannot defeat Israel militarily (although that fact might change). They have no active programs to destroy Israel; their military forces (except Syria's) are primarily designed for use against each other. But none of the Arab states except Egypt officially recognizes the State of Israel; the others are legally still at war with it.

The government of each of the Arab countries is beset by one or more fundamentalist or fanatic Moslem organizations trying to get the country to return to more traditional Islamic practice. The Arab governments thus take pains to avoid actions that might stir up Islamic fundamentalist discontent—such as making peace with Israel. They continue to operate a worldwide boycott to prevent people from doing business with Israel; they refuse to negotiate; and they distribute anti-Jewish and anti-Israel propaganda, like The Protocols of the Elders of Zion. Generally, no argument for the legitimacy of Israel as a state is permitted in the Arab countries (with the partial exception of Egypt), and Arab children through the university level are educated to hate Israelis and to regard the State of Israel as illegitimate and evil. There is little doubt that, if they saw a chance to destroy Israel and slaughter Israelis, the Arab states would be held back only by concern for protecting themselves.

The critical step in designing a peace strategy is the selection of goals. The degree of "peace" that exists now—that is, an absence of combat except with the Palestinians—is too low a goal; it doesn't provide enough protection. But reconciliation—that is, cordial relations between Israel and the Arab countries—is too high a goal: it is unrealistically ambitious.

The realistic and necessary goal for Israel is peace treaties with the principal Arab states—Syria, Iraq, Jordon, Saudi Arabia, and Lebanon. If Syria and Iraq were not included it would be too dangerous for the other countries to make peace, but with Syria, Iraq, Egypt, and Saudi Arabia included, there is no other Arab state that could challenge the legitimacy of their action. Although peace treaties won't solve everything, they would be an important step for at least three reasons. First, signing peace treaties would force Arab governments to explain to their people why it is right to accept Israel as a legitimate state. Second, an Israeli embassy, flying the Israeli flag, in each Arab capital will help prepare new generations of Arabs to accept the idea of Israeli legitimacy. Third, Arab leaders who oppose attacking Israel or taking terrorist actions against her will be in a stronger position if their country has signed a peace treaty.

But before any Arab government will even consider making peace with Israel it must be convinced that Israel cannot be destroyed. As it happens, the main hope for destroying Israel is internal dissension, followed by conflict between Israel and the U.S. (and Europe). Any impression that Israel might become so divided as to lose the will to defend herself weakens the prospects for peace.

The Arab countries (like most countries) are impressed by power. If Israel is forced back—except in the context of an Arab defeat, as in 1973—the Arab countries will be encouraged to think that their faith in Islam's power is being vindicated and that they should redouble their efforts. They will never be *satisfied* by Israeli concessions or retreats.

But even once the Arab states understand that they have no hope of destroying Israel, there remain three major obstacles to peace. First, the Arab countries don't stand to gain much from making peace. They need their armies anyhow, for protection against other Moslem countries. Since the state of war is not costly to them, peace would not be profitable. Second, they are afraid that it would endanger their governments by giving their fundamentalist minorities an excuse to attack them. Third, the high visibility of the conflict between Israel and the Palestinians stirs Arab hatred of Israel.

But time is on Israel's side for two reasons. The Arab threat to Israel has been largely dependent on Soviet arms, money, and political help. But growing conflict within the Soviet empire suggests that, within the next decade or two, Soviet support for Arab resistance to peace will greatly diminish.

Furthermore, contrary to current impressions, the long-run trend is against the Islamic fundamentalists. Their main conflict with the rest of the Arab population is not about the war with Israel, it is about their effort to make their countries observe the law of Islam more strictly. Traditional Islam seems to be in conflict with modernity, and most Arabs want their countries to become modern enough so that the people can have educations and decent and healthy living conditions. The fundamentalists got a big boost from Khomeini's victory, and from Arab oil power, but the effect of these two events is beginning to wear off. Sooner or later the Arab populations will become strong enough to resist their fundamentalists tendencies, and the Arab states will be able to make peace with Israel.

Israel's conflict with the Palestinians gives peacemakers a cruel dilemma. On the one hand, if Israel could end the dramatic conflict with the Palestinians, that would remove one obstacle to an Arab-Israeli peace. On the other hand, if such a settlement led hopeful Arabs to think that Israeli power has begun to decline, then the Arab states would be completely unwilling to make peace. Evidence of Israeli weakness would stimulate Arab enmity at least as much as Israeli "oppression" of Palestinians. (This is the Middle Eastern Catch-22.)

This does not mean that Israel can't afford to make voluntary (i.e., not resulting from American pressure) concessions once the current uprising has been clearly defeated. But if Israel were forced to surrender most of the territories by internal political divisions, rock-throwing Arab crowds, and foreign pressure, that would exactly contradict all the requirements of the pursuit of peace. It would remove any pressure on the Arab states to move toward peace. It would demonstrate the success of a cheap form of Arab attack against Israel. It would show Israel's reluctance to do what is necessary to protect herself. And the maximum gain is a tenuous peace with only part of Israel's least dangerous enemy.

The real path to peace is to bring diplomatic and political attention back to the long-term underlying conflict. The world's concern for the Palestinians should be expressed by demands that the Arab states move toward peace. The United States must give the Arabs reason to think that (a) while they refuse to move toward peace, they will not gain American favor, and (b) the longer they wait, the worse the terms will be for them.

In sum, the way to pursue peace is to expose and counter the Arab strategy, expressed anew in the Egyptian ten points, of pretending that the war against Israel is a Palestinian war. Israel should stop discussing the terms of peace until the Arab states indicate that they are ready to make peace.

H.R. 4000, THE CIVIL RIGHTS ACT OF 1990, HAS NOTHING TO DO WITH QUOTAS

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mr. HAWKINS. Mr. Speaker, one of the principal purposes of the Civil Rights Act of 1990 is the restoration of the disparate impact theory under title VII. This theory derives from Congress' original intent, when it enacted title VII in 1964, to prohibit employment practices that are fair in form, but discriminatory in operation. Since a unanimous Supreme Court first recognized Congress' intent 19 years ago in Griggs versus Duke Power Co., Federal courts have applied the theory in hundreds of cases in the 1970's and 1980's.

Griggs and its progeny have led to the elimination of countless unnecessary barriers to employment opportunity, opening up millions of jobs to women and minorities. In many cases, women and minorities have successfully challenged discriminatory employment practices that had nothing to do with their ability to perform the jobs in question. However, in many other cases, employers have successfully defended practices which were, though discriminatory, truly necessary to their businesses.

Despite the fair balancing of interests Griggs achieved, however, five members of the Supreme Court gutted it last year in the Wards Cove case. The Civil Rights Act of 1990 restores the disparate impact theory and breathes life again into title VII.

For 6 months, critics of this legislation have complained that these rules, if reestablished, would be too difficult for employers to meet. They warn that employers will make sure their work forces are numerically proportioned so they can avoid lawsuits they cannot win. But for 6 months, and through 10 hearings and three markups, none of these critics has offered a shred of evidence that supports their assertions. Indeed, how could they, when 19 years of case law and experience suggests otherwise?

I would like to submit for inclusion in the CONGRESSIONAL RECORD two articles by Sholom D. Comay, president of the American Jewish Committee, which clarify this misperception about the Civil Rights Act of 1990. The American Jewish Committee is a longstanding opponent of quotas, but has fully

supported this legislation since its introduction last February.

[From the Christian Science Monitor, July 11, 1990]

THE CIVIL RIGHTS ACT IS NOT A QUOTA BILL

(By Sholom D. Comay)

A small coterie of opponents to the Civil Rights Act of 1990 have sought to advance their cause by labeling the act "a quota bill." Nothing could be further from the truth.

The act does not mandate quotas. Nor does it even encourage or authorize the institution of quotas as one of the remedies available to victims of discrimination. The American Jewish Committee is an organization long opposed to quotas and is a strong supporter of the bill.

Behind the specifics of this legislation to restore and strengthen civil rights protections are people: people whose lives will be, and already have been, dramatically and negatively affected by the weakening of laws against employment discrimination. When members of our society are adversely affected, society itself stands weakened.

The Civil Rights Act of 1990 would remove substantial barriers to relief from employment discrimination that face women and racial, religious, and ethnic minorities, barriers that have resulted from several recent Supreme Court decisions that overturned established law.

Among its goals, the bill would reestablish a Supreme Court standard first developed in 1971 in *Griggs v. Duke Power Co.* Before the court reversed itself in the June 1989 *Wards Cove* decision, the *Griggs* precedent stood for nearly 20 years, without once resulting in racially based numerical quota systems.

The standard enunciated in the Civil Rights bill, taken nearly verbatim from *Griggs*, recognizes a fair distribution of legal responsibility in cases of employment discrimination by providing that, if a plaintiff links an employment practice with a discriminatory or disparate impact, the employer then must prove the business necessity of that practice. The initial burden upon the plaintiff is significant. The plaintiff must not only first prove that a statistically significant disparity exists that presents a pattern of discrimination, but also that a link exists between the specific employment practice or group of practices and the discrimination.

Thus, contrary to the bill's opponents, the Civil Rights Act would not permit an aggrieved worker to attack an employer's "employment process" merely because a racial imbalance exists. Rather, he or she must prove a causal connection. Only then does it become the burden of the employer to prove, as a defense, that the specific practice or group of practices "bears a substantial and demonstrable relationship to effective job performance."

Contrary to statements by the bill's opponents, before *Ward Cove*, employers satisfied the business necessity standard without resorting to quotas. In fact, under Griggs, many employers were able to prove that a challenged employment practice was necessary for the success of the business, and thus the cases were dismissed.

An employer is far better equipped to show the necessity for a given employment standard than is an employee to show that there is no such need. After all, such information is available to employers, rarely to employees.

The bill's opponents cite other alleged problems. Faced with the almost 20 years of evidence to the contrary, opponents claim that "conservative legal counsel," fearful that their clients would be dragged into court, would now advise employers to institute quotas as a safety measure. Such counselors must not have been in practice between March 8, 1971, when the *Griggs* decision was handed down, and June 5, 1989, when *Wards Cove* overturned *Griggs*—or they failed to make such recommendations, or employers chose not to go along with their recommendations. In the years following *Griggs*, the court required employers to remove subjective tests which had a discriminatory impact, among other barriers, but never once required an employer to utilize quotas for hiring.

Opponents further assert that the Civil Rights Act of 1990 would lead to endless litigation and costs. Again, no data exist to support the claim. In fact, a strong case can be made that the bill would discourage litigation. Moreover, such litigation that may be brought, according to studies of litigation under a related civil rights statute, as a rule has not led to large verdicts. Opponents also charge that the bill and its policy of "quotas-by-threat" is another example of affirmative action gone awry, violating basic principles of equal justice. Not only is such a charge false, but it fails to distinguish among the many forms of affirmative action, including goals and timetables, that measure performance and encourage universities and employers to seek out *qualified* applicants.

The quota scare tactic is much ado about nothing. What *is* important is what the Civil Rights Act of 1990 would accomplish once it is approved by Congress and signed into law. Our government would then send the important signal that justice must not be denied; that this country will neither tolerate nor support employment discrimination; and that for the ethical, moral, and economic well-being of this nation such discrimination must not be allowed.

[From the Washington Times, July 17, 1990]

CIVIL RIGHTS REPAIR: PROTECTION FOR EQUAL JUSTICE

(By Sholom Comay)

The Civil Rights Act of 1990 is the subject of heated debate on Capitol Hill. As president of the American Jewish Committee, I write to underscore the importance of this measure. This "civil-rights bill of the 90s" is moving through Congress, after being introduced by a bipartisan coalition in both houses of Congress, and currently has the support of 48 senators and 182 representatives.

During a joint hearing of the House Education and Labor Committee and the House Judiciary Committee Subcommittee on Civil and Constitutional Rights, I testified with other civil-rights leaders who reviewed the struggle women and minorities have waged over the past quarter century. But why did we come before Congress to testify? Were not millions of Americans already protected by civil-rights laws dating back to the 1960s, and the 1860s?

We testified because many protections previously afforded under these laws no longer are available; they were eliminated by the Supreme Court's 1989 restrictive decisions. In its rulings, the Supreme Court turned dramatically away from the national consensus behind the vigorous enforcement of federal equal opportunity laws, abandoning the well-established principle that remedial civil-rights statutes ought to be broadly construed.

The civil-rights community, including the American Jewish Committee, has thus urged Congress to support the Civil Rights Act of 1990. This important measure would help remove the unfair restrictions women and racial, ethnic and religious minorities once again confront in the workplace.

Behind the dry legalisms in this bill are individuals whose lives will be, and already have been, dramatically affected by the weakening of laws against employment discrimination. The Civil Rights Act of 1990 would restore and strengthen remedies for gender, racial, religious and ethnic discrimination on-the-job, and in hiring, firing and promoting, and it would require employers to prove that a job practice or group of practices with discriminatory impact is necessary for business purposes.

The bill also would allow victims of intentional racial, gender, religious and ethnic employment discrimination to collect monetary damages, as is now the case for victims of intentional racial discrimination. The act also would allow employees to challenge discriminatory job practices when they learn how they would be personally affected and would, at the same time, limit extraneous, repetitive, and costly litigation of issues already resolved by the courts.

Those who oppose the act have taken several tacks. First, they argued that the Supreme Court's decisions were merely "technical corrections." Then they introduced an alternative bill. Finally, they have attacked the Civil Rights Act for allegedly establishing racially based numerical quota systems. However, nothing in this bill creates, condones, or even encourages the institution of quotas.

The portion of the bill thus criticized would merely codify case law existing prior to the Supreme Court's deplorable decision in the Wards Cove case. Reversing that decision to restore the earlier law would place the burden of justifying discriminatory job practices on the shoulders of those with the most information available about job practices: employers. If employers can prove that, regardless of the discriminatory impact, a particular job practice bears a "substantial and demonstrable relationship to effective job performance," employers would be free to continue that practice.

President Bush has offered an alternative to the Civil Rights Act of 1990, the Civil Rights Protections Act (S. 2166/H.R. 4081). The AJC opposes this bill because it targets only two of the six recent decisions of the court, inadequately at that.

The administration addresses only one aspect of the many types of employment discrimination, and is silent on the systemic nature of employment discrimination that retards the progress of women and racial religious and ethnic minorities.

What are our specific objections to this bill? And what does it tell us about the administration's views on civil rights? We oppose this bill because it would place an undue burden on the victim of discrimination. It would require employees to prove that an employment practice with discriminatory impact is not necessary for business. Thus, when fighting employment discrimination, workers would be required to use information they are not likely to possess, or be able to obtain. This would make cases with merit exceedingly difficult, if not impossible to win, and is fundamentally unfair.

We oppose the administration's bill for these additional reasons: It would permit in-

appropriate motives like race, gender, religion and ethnicity to be factors in hiring, firing, and promotion decisions; it would not allow a victim of intentional gender, religious or ethnic discrimination to seek monetary damages, although under present law a victim of racial discrimination is able to collect such damages; and it would allow continuous and costly legal challenges to civil-rights cases that have been settled on terms approved by a court.

Over the past 25 years, this country has made great strides in civil rights. Gone are the segregated drinking fountains, lunch counters and schools. This nation has held aloft the ideal of mutual respect for all people, regardless of the color of their skin, the accent in their speech, their religion or their gender. We cannot afford to go backward, fighting past battles, instead of meeting the challenges that a new century will present. We cannot let the vestiges of a bygone era keep us from finally achieving the goals envisioned in the Declaration of Independence, that all are entitled to life, liberty and the pursuit of happiness.

Let 1990 be a watershed in the history of civil-rights law. The AJC supports the Civil Rights Act of 1990 because we believe in this ideal and are committed to equal justice for all. I urge those of you who share this ideal and commitment to contact your members of Congress and let them know that you also support the Civil Rights Act of 1990.

VOTE-BUYING SCHEME

HON. ANDREW JACOBS, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mr. JACOBS. Mr. Speaker, in the cold initial months of 1985, a cynical campaign of slander was conducted against the Democratic Party with regard to the 1984 U.S. House election in the Eighth District of Indiana.

A few, a very few Members of this body actually said in House proceedings that the Democratic Party was stealing that election.

David Lilienthal spoke of "setting one American against another based on mere attacks, mere unsubstantiated attacks."

The following newspaper articles are not slander nor "mere unsubstantiated attacks." They constitute fact which confirms that "truth crushed to Earth shall rise again."

[From the Indianapolis News, June 30, 1990]

PROBE OF VOTE-BUYING ENDS IN SENTENCING

A four-year probe of vote-buying in a rural Indiana county ended Friday when U.S. District Judge Gene E. Brooks sentenced former Rockport Mayor Ferman M. Yearby to 60 days in prison.

As chairman of the Spencer County Republican Party, Yearby directed what many considered to be a traditional Spencer County practice of buying votes with dollars and whiskey.

Each election year, at least for the period 1982-1986, that was investigated. Yearby and others raised thousands of dollars that were funneled to "drivers."

The drivers would round up voters on election day, paying them $25 to $50 for their vote or buying them liquor.

Yearby, 70, was only one of 17 persons to be convicted in the vote-buying scheme. Others included two Republican Party county treasurers, a county commissioner and a township trustee.

In 1984, Spencer County vote-buying nearly changed the outcome of the 8th District congressional race. State officials initially declared Republican candidate Richard D. McIntyre the winner by 34 votes, but the House refused to seat McIntyre. A federal recount declared Democratic Rep. Francis X. McCloskey the winner by four votes.

[From the Indianapolis News, May 15, 1990]

ROCKPORT MAYOR MAY LOSE PARTY JOB, TOO

(By Terry Horne)

State law will require Rockport Mayor Ferman M. Yearby Jr. to give up his city office upon conviction in a vote-buying scheme.

However, state Republican Party officials say they may not be able to take away his job as Spencer County Republican chairman.

The U.S. attorney's office filed a plea agreement Monday in which the 70-year-old mayor said he will plead guilty to conspiring with the Spencer County GOP treasurer, a township trustee and others to buy votes in the 1982 and 1984 general elections.

Yearby's plea closes out a three-year investigation of vote-buying by Spencer County Republican officials, U.S. Attoney Deborah J. Daniels said

He will be the 17th person to be convicted in the vote-buying case, and Daniels said Yearby was at the top of the pyramid.

"It's a sad commentary on the electoral process when the top officer in a political party in a county is enmeshed in the vote-buying process." she said.

Yearby faces up to five years imprisonment and $250,000 in fines. He could not be reached for comment.

State GOP chairman Keith Luse and the news of Yearby's plea raises "real concern." Luse plans to bring the issue before the state central committee at its regular meeting later this week.

He added there do not appear to be any rules allowing the state officials to remove Yearby from his party office.

Any action would have to be taken by county party officials.

Luse said he has asked the party's legal counsel to review what measures can be taken.

The county vice chairman, Louise Talbott, said she didn't know whether Yearby would remain as county chairman. "We've never had this happen before," she said.

According to the indictment, Yearby and others raised thousands of dollars that eventually were funneled to "drivers," who would pay voters $25 to $50 or buy them whiskey for their votes.

At one point, the Spencer County vote-buying scheme had the potential to distort history.

In 1984, the 8th Congressional District, of which Spencer County is a part, was the scene of one of the nation's closest electoral contests.

State officials initially declared Republican candidate Richard D. McIntyre the winner by 34 votes, but the issue eventually was carried all the way to Washington when the House refused to seat McIntyre.

A federal recount declared incumbent Democratic Rep. Francis X. McCloskey the winner by four votes, however.

Yearby is scheduled to be sentenced June 29 before U.S. District Judge Gene E. Brooks.

[From the Indianapolis Star, May 27, 1990]

VOTES-FOR-CASH PROBE NETS SEVERAL CONVICTIONS

(By James A. Gillaspy)

During the past three years, federal authorities have won convictions against Republican Party officials and workers who paid more than $50,000 to buy votes in Spencer County elections for local, state and federal offices.

The principal target of the probe—and the last suspect to be charged in the six-year investigation—has agreed to plead guilty and be sentenced on June 29 in U.S. District Court at Evansville.

Rockport Mayor Ferman Yearby, chairman of the county's Republican Party, has admitted he solicited political contributions for Republican vote-buying: referred candidates to party officials for vote-buying assistance; and tried to conceal payoffs during the investigation.

Though he was charged in a 15-count federal indictment in October, Yearby is pleading guilty to a single charge of conspiracy as part of a plea agreement with first assistant U.S. attorney Timothy M. Morrison.

The maximum possible sentence for conspiracy is five years in prison and a $250,000 fine.

As part of his punishment, the 70-year-old mayor must resign from office. Others convicted during the investigation are:

L. J. Scamahorn, a former treasurer for the Spencer County GOP, convicted of conspiracy, fined $1,000 and sentenced to five years' probation and barred from public office during that period.

Ronald W. Cron, Scamahorn's successor as Spencer County Republican Central Committee treasurer, convicted of conspiracy, sentenced to two years' probation and barred from public office during that period.

James William Scherer, a former Spencer County commissioner, convicted of conspiracy, fined $2,500 and sentenced to five years' probation.

Kermit Lindsey, a former Ohio Township trustee in Spencer County, convicted of conspiracy and sentenced to five years' probation and barred from public office during that period.

James Harrison, an organizer of the vote-buying effort, convicted of conspiracy, fined $1,000 and sentenced to five years' probation and barred from public office during that period.

William Parm, a vote-buying recruiter, convicted of conspiracy and sentenced to two years' probation and barred from public office during that period.

John Donald Smith, a driver, convicted of vote-buying and fined $5,000.

Larry Snyder, a driver, convicted of conspiracy, fined $1,000 and sentenced to four years' probation.

Donald Crane, John Clark, Eldon Cleon Lindsey, Joseph Wilkowski, Larry Fodge, Bobby Gene English and Rudy Jackson, all drivers convicted of conspiracy and sentenced to two years' probation and barred from public office during that period.

Larry D. Williams, a driver, convicted of offering to buy a vote and sentenced to one year's probation.

Mr. Speaker, pursuant to article 1, section 5 of the Constitution, the historically close and disputed 1984 election results in Indiana's Eighth District were thrown into the House of Representatives.

The U.S. House Recount Commission, composed of one Republican and two Democratic House Members repeatedly bent over backward to give the Republican candidate the benefit of the doubt which is to say several advantages. In precincts where more votes were cast than voters, clear precedents of the House were rejected by the Commission to the benefit of the Republican.

Ten clearly illegal 1984 absentee ballots—counted in no other 1984 contest in the Eighth District of Indiana—were counted by the Commission to the 3-vote advantage of the Republican candidate. One of the ballots was not cast in the congressional race and the other 9 broke 6 to 3 in favor of the Republican, an illegal 3-vote gift from the Commission.

Even with these unfair advantages given to the Republican, the Democrat, our colleague, FRANK MCCLOSKEY emerged with a 4-vote plurality and was seated. The record itself shows that Mr. MCCLOSKEY actually won by 7 votes.

Except for those 10 illegal ballots counted, on balance, against FRANK MCCLOSKEY, no one can name a ballot that was allowed by the Recount Commission in the congressional race which was not also counted by the election officials in Indiana in the other contest involved in the same Eighth Congressional District. And no one can identify a ballot which the Commission did not count which was counted by the Indiana officials in other contests conducted in the same Eighth Congressional District.

The following April 22, 1985, Wall Street Journal editorial probably in good faith, asserted that Indiana election officials had declared the Republican the winner by 400 votes. As can be seen by the Indianapolis newspaper article, that figure was actually 34 votes. Even that figure was in dispute. The 400-vote figure emerged during an Indiana State recount pursuant to an archaic State statute which allowed the party in power—in this case, the Indiana Republican one—to throw out all perfectly legal ballots in any precinct where even the tiniest of clerical errors were made on tally sheets. Indiana Republicans themselves later in the same year rejected the same statute as unworkable and unjust.

TIP'S GOLD WATCH

It's nice every now and then to be able to write about one of those events held dear in American culture. In this instance, it's the traditional retirement party. If things go according to plan, the Democrats this afternoon will kick off the official beginning of the festivities surrounding the announced 1986 retirement of House Speaker Tip O'Neill. The keynote speech on the House floor today will go something like this: "And so, Mr. Speaker, in honor of your more than 32 years of service to the House and to the U.S. system of electoral politics, we present you with a small token—the eighth congressional seat of Indiana!" At this point the Speaker will be handed his human gold watch—a shiny new Democratic congressman named Frank McCloskey.

On Friday, two other Democratic congressmen decided that Mr. McCloskey won that long-disputed election in Indiana by a margin of four votes. While this gives the Speaker a chance to celebrate by finally winning one, don't expect much applause from the Republican side of the aisle. It is much more likely that what will occur on the floor of the House of Representatives today will less resemble a victory party than a bitter and bloody pit fight. Here's why:

For the past few weeks a group of official vote counters created by the House Democrats have been out in Indiana's Eighth District recounting the ballots cast there last November. The House Democrats didn't like the November outcome because a Republican named Richard McIntyre won the election by something over 400 votes, and his opponent, the incumbent Mr. McCloskey, complained about the results and about how votes were counted in several counties.

This was the first time in 24 years the House ordered a recount instead of accepting state certification, though at no point in the affair has anyone raised charges of fraudulent procedures. The House Democrats voted twice to refuse to seat Republican McIntyre, which means that the people of Indiana's Eighth District have had no vote in the House for nearly four months.

The Democrats set up a "task force" to recount the vote in Indiana. Last Friday, the Democrats' designated counters finished poring through the ballots and announced that Mr. McCloskey had won the election by a vote of 116,645 to 116,641. In the end, the great Indiana recount came down to judging several dozen disputed ballots as for either McIntyre or McCloskey. This task fell to the special commission's three House members—Democrats Leon Panetta and Bill Clay and Republican Bill Thomas. Ironically enough, the members judged the ballots by voting on them, and after watching the Democrats repeatedly vote for Mr. McCloskey, Republican Bill Thomas quit voting.

Throughout all the partisan contentiousness over this dispute, nearly all had agreed that if the outcome of the recount in this admittedly close election came down to a handfull of votes, there would be a new election. What no one took into account, but probably should have, was that this whole show has been run by arguably the two most partisan Democrats in the House—Tip O'Neill and Tony Coelho. At 3 p.m. this afternoon, the Democrats will most probably vote to seat Mr. McCloskey based on this four-vote "victory." The lively proceedings will be televised on C-Span.

From where Mr. O'Neill and Mr. Coelho sit, Mr. McCloskey's new, four-vote win is mainly an opportunity to stick it to their nemesis in the White House by staging a straight party-line vote on the seating. Such victories may afford the Speaker some pleasure as he battles toward the sunset, but we wonder whether younger House Democrats might not be wondering if that loud sound they hear is their party crashing into the rocks at the bottom of the falls. There is simply no way the Democrats can look good saying a Democrat's four-vote victory is valid after they said a Republican's 400-vote victory was invalid.

But then, the Speaker doesn't have to worry about the future, since he won't be around. If making a mockery of the democratic process will give him fond memories for his golden years, we believe he should by all means go ahead.

Mr. Speaker, there are people who owe Mr. MCCLOSKEY and his party an apology. But do not hold your breath until the apology is made.

COMMENTING ON AIDS RESEARCH FUNDING

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mr. PURSELL. Mr. Speaker, Congress approved an annual appropriation bill in mid-July which includes health research funding—and the process by which those research dollars are apportioned has drawn criticism.

At the heart of the debate is the level of funding provided AIDS research, currently $1.6 billion per year. The appropriation bill approved by the House calls for $1.7 billion during fiscal 1991, more than triple the fiscal 1987 level of $502 million.

In May, some 1,000 AIDS activists protested outside the National Institutes of Health [NIH] in Bethesda, MD—the umbrella agency through which most of the research dollars are channeled. The NIH demonstrators, like those outside the recent economic summit in Houston, claim government has been inattentive to AIDS. They believe more can and should be done.

There is no question the pain caused by AIDS is enormous. As a senior member of the House subcommittee charged with writing the annual health care appropriation, I recognize the devastation brought on by AIDS. I also recognize the need for ongoing research.

Each year my subcommittee receives testimony from AIDS researchers, doctors treating AIDS patients, AIDS patients themselves and the family members of AIDS patients. There is little doubt the victims deserve our attention, compassion, and a portion of our health care research dollars.

But AIDS victims are not alone in their pain. We also hear from witnesses testifying about cancer, heart disease, Alzheimer's disease, stroke, lung disease, and the list goes on.

With limited research dollars available, policy makers such as myself must focus on priorities—priorities built on a comprehensive point of view rather than political pressure. We must balance the health needs of an entire population.

Unfortunately, many fail to recognize the comprehensive approach needed for health research, viewing AIDS as the preeminent health crisis, rather than as one of the many health problems which claim lives each year.

Commenting after the NIH protest, columnist Charles Krauthammer wrote in a June edition of Time magazine:

AIDS is now riding the crest of public support, won in the rough and tumble of politics. All perfectly legitimate, and a tribute to the passion and commitment of AIDS activists. But that passion turns to mere stridency when they take to the streets to protest that * * * society has been ungenerous and stinting in its response to the tragedy of AIDS. In fact, American society is giving overwhelming and indeed disproportionate attention and resources to the fight.

Concerned about the disproportion, I raised this point a year ago during debate over fiscal 1990 health research funding.

Speaking at Herrick Hospital in Tecumseh in July 1989, I pointed out that while the total

number of AIDS-related deaths since 1981—now about 80,000—is devastating, cardiovascular diseases claim as many lives every 4 weeks. Yet, AIDS research funding exceeds the amount spent each year on heart disease, about $1 billion.

I also pointed out that Federal AIDS research funding now equals the amount spent annually on cancer research, despite the fact cancer claims some 500,000 lives a year, while AIDS claims less than 10,000.

Bringing the perspective closer to home, the leading cause of death in Michigan, like many other States, continues to be heart disease. In fact, Michigan has the Nation's highest chronic disease death rate—deaths caused by illnesses such as heart disease, stroke, diabetes, lung cancer, breast cancer, cervical cancer, colorectal cancer, or cirrhosis.

The more than 500 deaths per 100,000 population in Michigan caused by these chronic diseases compares with 5 deaths per 100,000 population for AIDS. Yet, funding for AIDS in Michigan from the Center for Disease Control [CDC] is second only to immunization funding. The CDC—which is a part of the health appropriation—reports its AIDS funding in Michigan exceeds chronic disease prevention by more than 40 to 1.

Since pointing out this growing disproportion a year ago, I have heard from many members of the national health research community. Most have expressed concern about the funding trend.

Researchers in all settings are feeling the effects of the shift, as funds and personnel increasingly are moving to AIDS-related projects, leaving vulnerable the other critical health research areas. Their voices, coming from NIH, hospitals, and universities are asking to be heard.

Last month, Dr. Anthony Fauci, Director of the National Institute of Allergy and Infectious Diseases—the lead AIDS institute—went on record concerning the AIDS funding trend.

"There is a disproportionate amount within the framework of what we're spending on biomedical research given to AIDS when you compare cancer and heart disease," Dr. Fauci said.

When the full record is reviewed, I believe the need to remove politics from the health research allocation process becomes apparent. As I said at the onset, policymakers must balance the health needs of an entire population.

The momentum of AIDS has pushed other health needs to the periphery. It's time we took a step back to regain our perspective and refocus our health research efforts based on priorities rather than politics.

PERSONAL WATERCRAFT: DANGEROUS TOYS?

HON. DOUG BARNARD, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mr. BARNARD. Mr. Speaker, I rise to alert my colleagues to the possible dangers to innocent bystanders arising from the use of small, motorized watercraft, known as water scooters or personal watercraft. Anyone who has attempted to relax near a river or lake or any open piece of water is aware of the annoying, whiny, persistent noise which these craft emit. However, they have also been known to be involved in several injuries and deaths to innocent people.

The Government Operations Committee's Commerce, Consumer and Monetary Affairs Subcommittee, which I chair, has a long and continuing interest in safety issues concerning the use of motorized vehicles. The subcommittee did the initial and basic investigation and hearings on the safety regulation of all-terrain vehicles [ATV's] by the Consumer Product Safety Commission. This investigation resulted in the agreement by the industry to cease selling the three wheeled version of the ATV. Personal watercraft present some of the same safety issues raised in the ATV matter, and for this reason the subcommittee has begun an investigation of the adequacy of safety of these vehicles.

Jurisdiction for regulation of the safety of these vehicles on the Federal level is lodged in the Coast Guard. The States and localities also share responsibility for safety regulation. Some States appear to be making an attempt to regulate age limitations and areas in which these vehicles may be used, but others are not. Unfortunately, at this juncture, it is my conclusion that more must be done on both the Federal and State and local levels in a concerted manner to get this incipient safety issue under control.

I want to call to the attention of my colleagues my recent letter which appeared in the July 23, 1990, New York Times concerning an article which had appeared on this subject.

The letter follows:

[From the New York Times, July 23, 1990]

AS MORE PEOPLE TAKE TO PERSONAL WATERCRAFT, DANGERS INCREASE

To the Editor:

Your July 8 article on personal watercraft as pleasure or nuisance neglects to mention that these new "toys" can be not only disturbing but also dangerous, and some vehicles may be more dangerous than others. Safety in the use of these vehicles has become a public-policy issue because increasing numbers of people have been killed or injured in their use.

The House of Representatives Commerce, Consumer and Monetary Affairs Subcommittee, which I head, has investigated the safety and regulation of these vehicles for more than two years. The Coast Guard, which collects statistics from state authorities on all boating-related deaths and injuries, reports to me that it knows of 55 deaths and more than 1,000 serious injuries since 1985 connected with use of personal watercraft. The figures may be incomplete because the Coast Guard estimates it receives reports on only 5 percent to 10 percent of all nonfatal accidents. One purpose of my investigation is to determine if more precise data collection should be required.

People have been killed in collisions with personal watercraft. A woman in a rubber raft on vacation in Hawaii was killed by a fast-moving motor craft driven by a 6-year-old boy. Most often collisions result, in the Coast Guard's words, from "the deliberate desire of the operators to use the maneuverability of the craft to the utmost—by riding in very close proximity to other boats, either making sudden but deliberate turns when riding in close formation with other personal watercraft or when 'wake jumping' behind other boats."

Many users of these craft are young, and state laws differ tremendously on age limits and training before they may be sold or rented. Young people rent these craft because they are relatively expensive. An industry publication states, "the statistics show that when you're out there cruising this summer and a personal watercraft comes whizzing toward you at 35 or 40 m.p.h., the odds are that the rider is young, inexperienced (perhaps it's his first time up on a rented craft, and he doesn't even know how to stop or turn it), and he knows even less about the rules of the road or anything else about boating." Young users have been disproportionately killed and injured by them.

The dramatic increase in personal watercraft makes this a public-policy issue. The industry estimates about 250,000 vehicles have been sold. Other estimates put the number in the United States at up to 500,000.

Finally, not all personal watercraft require the operator to stand or kneel. It has been alleged that the stand-up model encourages more dangerous maneuvers. Thus, another object of my investigation is to determine if there is a relation between accidents and deaths among different models.

DOUG BARNARD, JR.

WASHINGTON, *July 9, 1990.*

THE GRANDEST FLAG IN THE WORLD

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Ms. ROS-LEHTINEN. Mr. Speaker, it gives me great pleasure to recognize today a truly fine and patriotic American, Ann Shires of Miami Beach, FL.

In 1986, this outstanding constituent wrote a song expressing her great love for freedom and our grand flag. Her song, entitled, "American Flag," pays tribute and praise to that flag which has flown proudly for over 200 years.

Ann Shires is a patriot, who recognizes all that the flag stands for, and is willing to stand by it and is proud to keep it flying. She knows that the stars and stripes are meant to be respected and that pledging allegience is a virtue, not a vice.

Include Ann Shires as one who loves the flag of the United States of America and the Republic for which it stands and I am honored to include her song for all to read and enjoy:

AMERICAN FLAG

(By Ann Shires)

This is my flag, red, white and blue with 50 stars.
Each star is a state of the Union.
This is my flag which represents freedom to everyone.
This is my flag of 200 years.
It will never, never die, it will always live no matter how small, crumbled or ripped.
This flag will live and fly across every hill, valley, mountain top, moon and planet.

I'm proud to be an American who flys the greatest, grandest flag in the world.
It is the red, white and blue with 50 stars.
For as long as America lives so will "Old Glory" that is forever, that is forever.
This is the flag of 200 years.
It's the flag of the American Revolution, Bunker Hill, Boston Tea Party and Continental Congress.
This is the flag our forefathers fought for, Washington, Adams, Jefferson and Lincoln.
It is our Bill of Rights, Declaration of Independence, Constitution, Liberty Bell, Gettysburg Address, Statue of Liberty, and most of all liberty and freedom.
This is the greatest flag in the world.
And without our mother country, England, we would never have had this flag, so we must thank, thank you very, very much.
For our brave soldiers who fought all the wars for freedom home and abroad, so that our flag and America could live in peace, we are eternally grateful.
For our brave astronauts who explore the wonders of space, and implanted the flag on the moon, we are proud.

CONGRESS CARRIES THE TORCH FOR AFGHAN RESISTANCE

HON. DAVID DREIER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 24, 1990

Mr. DREIER of California. Mr. Speaker, as the struggle continues in Afghanistan against the totalitarian regime of Najibullah, much of what is going on there is ignored by the media. The Soviets admitted the bankruptcy of their occupation of Afghanistan, although they still send in, by some accounts, almost $300 million per month to prop up the Najibullah regime. It seems that when the Soviets officially withdrew, we in the United States lost interest. But, Mr. Speaker, we must not forget the valiant resistance fighters in Afghanistan. Their struggle for freedom and self-determination continues. I would commend to my colleagues an excellent article from Insight magazine on congressional support of the Afghan resistance and ask that it be printed into the RECORD.

AFGHAN FRONT RESTS ON CAPITOL HILL

(By Richard Mackenzie)

(Summary: First there was White House funding for the anticommunist guerrillas in Afghanistan. Then there was bipartisan congressional support for the policy. That because intense activism on Capitol Hill, which authorized even more aid than presidents have asked for. Now some advocates for the mujahideen say that Congress's next vote on sustained funding will be a much closer call, but they expect to be helped by new concern over Soviet actions toward the Baltic states.)

It took an act of Congress to fight the Afghan war. Indeed, it took several acts of Congress, a multitude of resolutions, a task force of legislators and a great deal of lobbying.

Afghanistan has been held up as a rare example of bipartisan congressional support for a president's activist foreign policy. It is also an example of what is often called extensive "meddling" by Congress in the foreign policy process, though, ironically, it is almost never cited as such by those who in other contexts deplore the emergence of "535 secretaries of state."

Congress has forced two successive administrations to spend money, mount programs and switch tactics in both covert and overt efforts to oust the Soviets and topple the Kabul regime installed by the Soviet invasion in 1979.

Pressure from Capitol Hill has been instrumental in everything from supplying the Afghan resistance with sophisticated surface-to-air missiles to providing a U.S.-sponsored reading room for Afghan refugees in a distant, dusty, provincial capital of Pakistan.

Although lawmaker's activism has often involved confrontation with executive branch officials, those same officials have not shied from seeking congressional allies as a way of bringing weight to bear in bureaucratic disputes. In fact today, with no victory in sight for the anticommunist resistance, a senior official who is intimately involved in developing and implementing U.S. policy on Afghanistan says: "The movement in the State Department and the White House is just to get rid of the problem by whatever method necessary. Only Congress can save the Afghans now."

Whether Congress is inclined to do so is the subject of some speculation. A member of the Senate Appropriations Committee staff, while denying report that support for U.S. aid to the resistance is crumbling, add: "It's a closer call in the Congress than it was two years ago, but not so close as to put the program in jeopardy." The staff member thinks that Mikhail Gorbachev's crackdown in Lithuania may have shored up support that had flagged as the Cold War wound down and the resistance fighters, known as *mujahideen,* failed to unite and achieve a quick victory.

"Before the Baltic states issue," says the staff member, "people were asking, 'Aren't you being unreasonable in continuing on Afghanistan in light of all the good things between the Soviet and us?' Now there is less of a willingness in the Congress to give Gorbachev the benefit of the doubt."

A COALITION IS BORN

Congress first became actively involved in the war effort out of unwillingness to give the CIA the benefit of the doubt. Declaring that the United States had "a moral obligation" to arm the Afghan resistance. President Carter in January 1980 allocated $30 million for covert military assistance for that year. On Jan. 9, CIA officials briefed the Senate Select Committee on Intelligence on details of the plan, which included sending old Soviet weapons from Egypt. There was no objection to the plan by any senator, says one of those involved.

Few in Washington questioned the policy or its details in the first years. "Although the great numbers of Congress supported the Afghan policy, most then felt, I suspect, that it was a lost cause," says Rep. Don Ritter, a Pennsylvania Republican. "In all of that time, the House Foreign Affairs Committee barely touched on it."

Backed by the CIA, President Mohammad Zia-ul-Haq of Pakistan insisted on "plausible deniability" for the delivery of weapons through his country to the resistance, so most activity was shrouded in secrecy. In part for this reason, early attempts by Congress to get involved in the Afghan cause were far from simple.

The early military supplies were fairly paltry. Even the $30 million plus other donations from supportive Muslim nations brought little in the way of modern or effective weapons. As a result, on Sept. 30, 1982, a liberal Democrat from Massachusetts, Sen. Paul Tsongas, introduced a non-binding resolution cosponsored by 98 other senators, calling on the administration to give the Afghan resistance "effective material assistance." It would be "indefensible to provide the freedom fighters with only enough aid to fight and die, but not enough to advance their cause," the resolution stated when it was introduced.

Only Sen. Charles McC. Mathias Jr., a liberal Republican from Maryland, stopped it from getting unanimous support, likening it to the 1965 Gulf of Tonkin resolution that essentially authorized the Vietnam War. The Tsongas resolution would give President Reagan a similar blank check, Mathias said. And as acting chairman of the Foreign Relations Committee, the body before which the Tsongas resolution lay, Mathias ensured it never moved.

Still, it had an effect. In December, Reagan instructed the CIA to provide the resistance with better weapons, including mortars, grenade launchers, mines and recoilless rifles, all of Soviet origin. Hidden in the Defense Department's annual appropriations bill, but administered by the CIA, the military aid soon grew to $80 million per year and later into hundreds of millions of dollars annually.

Senior CIA officials also went to work urging members of Congress to oppose the Tsongas resolution if versions of it came up again, say aides who worked for Congress at the time. "The agency felt that any public discussion of aid to the Afghans would endanger supply lines through Pakistan," says one former staff member.

Tsongas reintroduced the resolution in October 1983 with 67 other cosponsors, about one-third of the original 99 having withdrawn after hearing the CIA argument. At a closed Senate briefing in January 1984, State Department officials insisted that the "material assistance" phrase be deleted. Saying he did not want to jeopardize the aid, Tsongas did not push the issue. On Sept. 25, the Foreign Relations Committee deleted the "material assistance" phrase and inserted a generalized request that the United States "encourage and support the people of Afghanistan to continue their struggle [and] support effectively the people of Afghanistan in their fight for freedom." The resolution passed 97-0 Oct. 3, 1984.

The House version, presented by Ritter of Pennsylvania, languished in its original language in the Foreign Affairs Committee for much of the same time. The day after the Senate approved the compromise resolution, the House also passed the same wording by a voice vote with no objections.

SENDING STINGERS

The Tsongas-Ritter resolution established the principles that have guided Congress ever since. The prickly relations with the CIA and the State Department would also endure.

Jamsheed K.A. Marker, Pakistan's ambassador to the United States under President Zia, says three separate U.S. powers were at work in implementing Afghan policy: the administration, the CIA and Congress. "The role of Congress was twofold," says Marker, now living in Florida and writing a book on the subject. "It was almost the only issue on

which there was wall-to-wall support from both the Democrats and the Republicans. The second point is that the administration sometimes found itself one step behind. Had it not been for Congress, I'm not sure that many things, including the supply of certain weapons to the resistance, would have occurred."

Most crucial among those "certain weapons" was the Stinger. "The Stingers changed the face of the war," says Mohammad Hasham, an Afghan guerrilla commander now visiting the United States. "After they arrived, the Soviets no longer ruled from the skies."

Before the surface-to-air missiles arrived, by all accounts, a battle royal broke out within the government, starting in early 1985. Just who did what remains a controversy.

The CIA was less than enthusiastic about supplying the missiles, since the presence of U.S.-made weapons would mean that U.S. involvement could no longer be denied. Opposition came from the Joint Chiefs of Staff as well, says an aide to Rep. Charles Wilson, the Texas Democrat who has been publicly credited with a leading role in the fight. The Defense Department argued that the weapons could fall into terrorist hands and be used to shoot down a civilian airliner or could be captured by the Soviets and duplicated.

A former senior Defense Department official says that several senior State Department officials also opposed the idea at first—chief among them Principal Deputy Assistant Secretary of State Arnold Raphel, who went on to become the U.S. ambassador to Pakistan and who was killed in a mysterious plance crash in August 1988 along with Zia and his top generals.

The defense official says that Utah Republican Orrin G. Hatch, a member of the Senate Select Committee on Intelligence, pushed hardest for the program, making two important trips to Pakistan. On the second of these, in January 1986, he took along members of the so-called 208 Committee, which comprised representatives from all the major U.S. agencies with an interest in Afghan matters and convened regularly at the National Security Council. The group met with Zia and mujahideen leaders, who argued the critical military need of an effective antiaircraft weapon.

In private meetings at the Pentagon, the former defense official says he and others argued that the Soviets already had the specifications for the first-generation Stinger, which they had received from Greece, and had built their own lackluster version, the SAM-14. Defense Under Secretary for Policy Fred Ikle came forward, writing what provided to be a convincing two-page paper saying that the Joint Chiefs of Staff concerns were unrealistic. "Ikle finally swayed the Joint Chiefs," says a congressional aide.

The former defense official credits Hatch's taking the 208 Committee to hear Zia and the mujahideen firsthand with winning all agencies' support for the missiles. The Stinger fight finally was won in April 1986 when Reagan ordered their delivery and the first batch was sent to Pakistan.

On Sept. 26, 1986, a mujahideen group shot down a MiG jet fighter for the first time. Almost 1,000 other Soviet and Afghan regime planes and helicopters have since been shot down by the resistance, says the aide to Rep. Wilson.

HUMPHREY AND THE ENVOY

In the late 1980s, resistance leaders gave used Stingers to Wilson and Sen. Gordon J. Humphrey in gratitude for their help. Wilson's hangs over his congressional office door. Humphrey gave his to a young aide who worked on Afghanistan.

Gratitude to Humphrey went back a ways. Elected in November 1984 for his second term as a conservative Republican senator from New Hampshire, Humphrey picked up the cudgel for the Afghan resistance—with a vengeance. He immediately had his staff research how supplies were reaching the guerrillas, sending aides to Peshawar, the Pakistani border town where the mujahideen are headquartered. He was not happy with what they found.

Humphrey says he found in the Senate "a vacuum of interest" in the war. (Tsongas had retired after discovering he had a lymphoma.) "The resistance was not getting the help it should have from us," Humphrey says. "That's when we started criticizing the administration and the CIA publicly."

To increase the pressure and look for new ideas, Humphrey founded what became a 26-member bipartisan Congressional Task Force on Afghanistan. That group conducted four hearings in 1985 on subjects including the geostrategic importance of the region, medical conditions in the war zone, the threat of famine there and "effective public diplomacy" on the war. At the public diplomacy hearing, Zbigniew Brzezinski, the national security adviser under Carter, said U.S. policy toward Afghanistan had "suffered from managerial neglect. It has not been coordinated on a sustained and high enough level."

Humphrey seized on the phrase "managerial neglect" and on the analysis. His quest to get someone higher than a desk officer at State working full-time on the Afghan war may have begun at that hearing. But it continued for more than four years, producing some of the most virulent struggles between a senator and the State Department in recent times.

State insited that no special envoy was needed. Humphrey fought back, eventually bottling up adminstration nominees in the confirmation process. Things reached a head in June 1988, when there were 130 nominees to posts caught in what became a partisan logjam. The ranking party leaders, Kansas Republican Robert Dole and West Virginia Democrat Robert C. Byrd, intervened, writing to Secretary of State George P. Shultz June 15 to say having a special envoy was necessary and would "open the way to Senate action on a number of worthy ambassadorial nominees."

The next day Shultz pledged he would consider creating such a position, and the 130 nominees were approved. But in a lenghty letter to Byrd and Dole dated June 21, the secretary spoke only of how much he appreciated Senate interest in Afghanistan and what a good job the State Department was doing on it, making no mention of the special envoy position.

Humphrey then held up the confirmation of Christopher Ross as ambassador to Algeria, leading, by Aug. 11, to another logjam of 45 ambassadors and other officials. That day, on the Senate floor, the last day before a recess, Byrd asked if the calendar was cleared. Dole said, "I have one senator I hope comes to the floor who has a hold on Christopher Ross." Dole had in his pocket a handwritten note from Deputy Secretary of State John C. Whitehead, saying: "In order to solve Gordon Humphrey's problem, I am willing to agree that we will find an appropriate person and assign him as special envoy to Afghanistan."

On the floor, Dole continued: "I am not certain the State Department knows who it will be at this point but I hope we might —" Byrd interjected: "Maybe Senator Humphrey."

THE QUETTA QUEST

At times, sections of the administration leaked details of problems they were facing to Humphrey, believe he would happily cut through red tape or find funds they felt were necessary. Such was the case with the establishment of a U.S. Information Agency country program for Afghanistan.

A 1986 USIA memo given to Humphrey said "a gap exists" in U.S. diplomacy in Afghanistan. The Senate included an amendment in the 1988 Foreign Relations Authorization Act, mandating a USIA country program for Afgahnistan.

One component of the program, a USIA reading room in Quetta—the squalid capital of Pakistan's southwestern Baluchistan province and home to almost 1 million of the 3.5 million Afghan refugees in that country—had been shelved for more than two years, before it was brought to Humphrey's attention. The senator fired off a letter to Michael Pistor, counselor at USIA, May 20, 1988. "Knowing of your deep commitment to the Afghan country program," he said sarcastically, "I would appreciate what steps you will take to secure USIA funding for the Quetta facility."

After enormous energy and paperwork, U.S. Ambassador to Pakistan Robert Oakley opened the library of American books and magazines April 6, 1989, reading a declaration on Humphrey's behalf.

MCCOLLUM FLIGHTS

In 1985, Rep. Bill McCollum, a Florida Republican, came up with the idea of sending the resistance excess Defense Department equipment ranging from boots and blankets to medicine. He saw it as a complement to the humanitarian program then being started among the refugees in Pakistan by the U.S. Agency for International Development. That year, acting on a Humphrey amendment, Congress also ordered that the administration's initial allocation of $1 million a year for humanitarian aid be boosted to "not less than $15 million." (Each year since, Congress has pushed the number higher. It is now $83.5 million.)

McCollum's so-called Excess Bill passed in 1985 by a voice vote. Humphrey a member of the Armed Services Committee, pushed it through the Senate. All the controversy came in its implementation. The State Department at first was "less than enthusiastic" about the idea because it was not a State Department idea, says a Capitol Hill staff member who observed the talks.
